The faculties of the University of Virginia, whom I salute, maintain an authority based on professional standards and qualifications; and their recognized quality and distinction enhance the validity of each of the degrees which you, as members of the graduating class, receive.

In a time of civil and academic strife, it is instructive to pursue the meaning of authority a step farther and to note the distinction between *authority* and *power*. As Robert A. Nesbit has written recently:

"The most dangerous intellectual aspect of the contemporary scene is the widespread refusal of thinking men to distinguish between authority and power. They see the one as being as much a threat to liberty as the other, but this way madness lies and the ultimate sovereignty of power. There can be no possible freedom in society apart from authority. It is out of . . . [the] disposition toward fruitful self-discipline that authority emerges, and its legitimacy is recognized. Abolish the disposition and you equally abolish the capacity for liberty."

Authority rests upon regard or esteem. By definition, it stems from the influence of character and from mental or moral quality. In contrast, power is the ability to act, the capacity for action or force. Where authority is disregarded or where it fails, power in the sense of force or coercion takes place. The experience of several American universities in the last two years offers terrible testimony to this fact. The contemporary thrust for power by certain students in some universities seems to derive from a basic misconception of the nature of a university. With a limited few, this thrust is an announced ruthless and calculated step toward the destruction of one of society's central institutions.

As Nesbit wisely observes, "Authority, unlike power, is not rooted in force alone, whether latent or actual. It is built into the very fabric of human associations. Civil society is a tissue of authorities. Authority has no reality save in the allegiances of the members of an organization. . . ."

The allegiances of this and any university must be inspired by the purposes of the institution and the people who animate them. The faculty and administrative officers, in the quality and distinction of mind and character and their commitment to ideals, must be worthy of allegiance. The students, in their dedication to learning and their responsibility for their own actions, must be worthy of respect, regard, and trust. Within the university there must be vision and progressive change, while at the same time recognition that change is not an end in itself, and that change can lead to debilitation and paralysis, as well as to increased strength and vigor.

This University, so innovative in its founding, must be ready, as it has been, to modify its practices and seek fresh means to engage the enthusiasm and release the creative talents of all its members—on either side of thirty. We must discover ways of understanding various approaches to goals held in common and be willing to reconcile differences without anger and discord. We must be able to disagree over methods without impugning each other's motives and without self-righteousness and dogmatism.

The University will count upon your help, as graduate students and alumni, to make the educational experience on these Grounds increasingly stimulating and significant. As all of you know, excellence comes by devotion to high standards of discipline and performance—usually a lonely, time-consuming, and demanding effort. It does not result from passionate outbursts and emotional diversions or from a mere search for power for power's sake.

I believe we would all agree that force and coercion make impossible pursuit of the central purposes of a university—attainment of knowledge, thought exercised upon knowledge, and the discovery of new knowledge through free inquiry. There can certainly be no genuine intellectual activity by either students or faculty under conditions of intimidation or disruption.

As J. C. Helms has written about the events at Harvard this spring, the violence, noise, and chaos that occurred there for some ten days may have brought to many a new sense of euphoria and togetherness, but very little higher learning. At Cornell, where the shattering of authority caused the loss to that institution of President James A. Perkins, who has been one of the most perceptive, innovative, and dedicated leaders in American higher education, forty-one senior professors last month issued a statement as to the conditions for teaching and scholarly work that a university must maintain. They are quoted as saying, "We recognize the need for many substantial changes. There are, however, essential conditions for preserving our integrity as teachers and fulfilling our responsibilities to students. For the sake of both teachers and students, we must have

freedom to inquire, to teach, and to learn without intimidation. We must maintain standards of professional judgment and scholarly achievement."

Internal force or threat of force against freedom to teach, to speak, and to hear can be as mortal as external interference with the processes of a university.

Universities are losing public allegiance at the very time when they need increased public support and understanding, and when universities are more essential to the failure and the vitality of American society than ever before. When even a small minority of students and faculty attempts to politicize and radicalize universities and to make them instruments of political power, authority succumbs to power; and force must frequently be brought in, or will be sent in by governors or other civil authority, to restore and preserve basic order.

The fabric of the university has been rent whenever this has occurred, and no one yet knows how much time will be required to mend it. In the words of Meyer Abrams of Cornell, "The university was designed as an open forum and was not designed to cope with violence." One of the tragedies of the current national student unrest is the dissipation of energy so critically needed to solve overwhelming human problems of race relations, poverty, pollution of the environment, and the decay of cities. The capabilities of strong and compassionate minds are being distracted and wasted by disorder. The trained and disciplined mind searches not for scapegoats but for reasons and solutions.

The mind is man's primary human attribute, and reason has been his chief means of advancement. Reason, of course, is the ultimate source of authority in any university and in a democratic nation. If reason is lost in the academy, it is certain to be lost in the nation and supplanted with raw power and repression.

Here at the University of Virginia our hallmark is devotion to reason. I like to think that the authority of reason, so deeply woven into the fabric of this University by Thomas Jefferson, is the chief explanation why student dissent here during the past academic session has been carried out through orderly processes and discussion rather than by threats and physical damage. In founding the university of Virginia, Jefferson argued that any error was always to be tolerated so long as reason remained free to combat it. His appeal for the correction of evils in society was always to the common reason of the free men of that society. To be truly free a man must be educated. Hence the reliance on reason in this University and the authority that it gives to you, its graduates, as you enter the life of the nation.

According to John Gardner, in his book *No easy Victories*, "Each preceding generation has had its great work to perform—founding the nation, conquering the wilderness, settling the land. Ours is to make a livable society for every American."

Our society *is* deeply concerned over the inequalities that remain within its own ranks. We must find the means of bringing millions of black and other still disadvantaged Americans into the full range of the opportunities our country affords. We must find the means of challenging the idealism and energies of youth to creative participation in quickening the human quality of national life. We must support and encourage, as expressed in the words carved over our gateway, "the will to work for men." These tasks will not be accomplished by despair and destructive rage. These and similar tasks will yield to hope and determination, to forbearance and perseverance, to study and imagination, and to faith in what Mr. Jefferson envisioned as the continuing and constructive American revolution.

THE RIGHT TICKET BUT THE WRONG TRAIN

HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. FOUNTAIN. Mr. Speaker, I recently heard a sermon I shall long remember. It was beautifully preached to a National Presbyterian Church congregation by Dr. Lowell Russell Ditzen, director of the National Presbyterian Center on Nebraska Avenue here in Washington.

The title itself, "The Right Ticket But the Wrong Train," in addition to being both intriguing and meaningful, is a sermon. This was the kind of sermon all of us periodically need to hear. It is not always pleasing to stand before life's mirror and see yourself yesterday, today and tomorrow, but all of us need to do it more often.

How many of us make plans that are never carried out—commitments to ourselves and others which are never kept. We start out in the right spirit and with the best of intentions, but too often never get any further; or if we do, too frequently we have "the right ticket" but end up on "the wrong train."

Someone has said, "The life of every man is a diary in which he means to write one thing, but he writes another; and his humblest hour is when he compares the diary as it is with what he had hoped to make it." With that thought in mind and to afford everyone an opportunity to read it, I am placing in the RECORD Dr. Ditzen's sermon, "The Right Ticket But the Wrong Train":

THE RIGHT TICKET BUT THE WRONG TRAIN

(A sermon by Lowell Russell Ditzen, D.D., LL.D., L.H.D., Litt. D.)

Text: *"Father, give me the portion of the goods that falleth to me."*—(Luke 15:12.)

Scripture: Luke 16:11–32; II Kings 17:1–12.

If you have talked to a person coming to America to make this land his or her home, you know how keen is the anticipation of that newcomer. You will be aware, too, of the strange ideas many such pilgrims have about this country and of the odd adventures that befall some. Usually they have a destination in mind, but little knowledge as to how to get there and much misinformation as to what the place is like.

Up in the Mohawk Valley of New York tales are circulated that come from several generations past, when waves of Welshmen migrated to that area. A number settled in and about a little town called Remsen. See it now and it's a couple of stores and a dozen houses. But first comers had written back such glowing accounts of Remsen that some eager settlers landing at New York City and seeing the skyscrapers there, exclaimed, "If this is New York City, what must great Remsen City be!"

A more recent arrival, an emigre from the decimations of Europe before the second World War, arrived destined for Philadelphia. He made his way to the Pennsylvania Station where he bought the right ticket. But through errors unbeknown to him, he got on the wrong train and ended up at Atlantic City. When told he wasn't where he expected to be, he couldn't believe it. Surely he was in Philadelphia! It was stamped right there on his ticket. Hadn't he planned and dreamed for months and miles of being with his relatives to begin a new life in Philadelphia? This must be some strange American joke. You couldn't fool him! But the people at the station refused to be convinced that Atlantic City was Philadelphia. Finally they got the idea across: "Friend, you may have purchased the right ticket, but you're traveled on the wrong train!"

Now are there not those, who in the journey of life, with the best of intentions and the finest of beginnings, get on the wrong train, and when the journey is over, find to their dismay they are where they didn't want to be at all?

I have yet to meet a sensitive and mature couple who come to the time of their wedding without being willing to get the right ticket. There is receptiveness to the counsel that it takes a lot of cooperation and forgiveness and sharing and sacrifice to make a successful marriage and a happy home. That they understand. They have the right ticket. But there are some, who, in the adventure of marriage, end up where they didn't want to be at all: hopes unrealized; sweet anticipations turned rancid; love gone. They had the proper destination in mind at the beginning, but they ended up far from the anticipated goal.

We've known individuals who started out with a strong purpose to make a success in business or some calling. They're going to the top and they have the resources, it would seem, to get there. But while they seem to have their hands on the right ticket, not a few of them find, when the journey is over, that they aren't where they intended to be at all. They got on the wrong train. I've often wished that some Ph. D. student would analyze the "most likely to succeed" individuals in high school annuals. Did they make it? Or did they end up in a far country where no one gave them any attention?

Jesus portrays the thought we're feeling after in an indelible picture of a young man saying, "Father, give me the portion of the goods that is due unto me."

Who will deny that young man in that moment? In the promise of his budding manhood he wants to go away from home to make his own way. He probably is compelled by a vision that sees himself coming back home laded with honors and successes from afar. He had the right ticket. But the way of transport he unwittingly boarded took him to a country way off from the end of which he dreamed. Ask him when he starts off in that moment of high purpose and enthusiasm, if he's intending to end up scrapping with pigs for bits of garbage, and he'd say, "That ridiculous. Not on your life." But he ended up there just the same.

This theme of ours, it seems to me, ought to say something to us as Churchmen.

For generations, the Christian Churches, Jewish Synagogues, and other major world religions have been preaching the dream of the brotherhood of man—the idea and the ideal of a kingdom of righteousness and mercy for the total family of mankind. Millions of spiritually motivated people have responded with enkindled hearts to that high hope. But God knows that time after time, with that right ticket, we have zoomed over the wrong roadbed, ending up in wars which lead us into economic depletions, political confusions, and social disruptions. No question about the right ticket, but certainly the wrong train.

Let the Church talk not alone about the ideal of peace in the world, but let's all, who are a part of its life, pray and work in the day by day steps that will give such a dream a semblance of possibility. We each can practice greater justice and mercy toward the people whose lives touch ours. We can elevate our professions and make our businesses more equitable in their opportunities and

and services. The alabaster cities need foundations in the here and now.

Certainly, this thought of ours suggests the importance of discipline.

That word comes from the Latin word "discipulus" which has its rootage in the idea "to learn." The word is related to "disciple." A disciplined person is a learning person. He has subjected his life to a purpose, a principle, or a teacher, and so he becomes committed to a definite order and regime. That's necessary, isn't it? Mustn't something comparable to that be given priority in any field of activity if an individual wishes to achieve?

In Machiavelli's classic book, "On the Art of War," he emphasizes the factors that make for success in military struggle. One, he says, is the battle. Then analyzing what makes for success in such engagements, he comes to the determining factor of discipline. "Good order," he writes, "makes men bold. Few men are brave by nature, but discipline makes them so." Isn't that true? Some of you as mothers have had a grand vision of a home of beautiful order and peace, of children going into the world with a mature and high spirit. But what determines whether that dream is to become a reality? Isn't it in the daily battles with the irritations, intrusions, and tasks that drag one down and could make the vision wane? Isn't it "discipline," the fighting for self-control, the learning to grow, to let the heart be enlarged by forgiveness and patience and love?

You men represent many different fields of science, business, and the professions. Don't each of you know no matter what our specialized area, that it's the keeping of appointments, analyzing minute facts, meeting tiny details, that decides whether or not our goal is realized? Who will deny that "discipline" is the sesame to help get through each day and to carry tasks to large fulfillment?

And shouldn't this word of ours give a prod to all of us as Americans? We have a magnificent ideal in our heritage that comes to the living present saying, "this is to be a nation of free men, who in their freedom will build together for the common good—granting equal and increasing opportunities for all." That is a ticket for corporate living that has been purchased at the price of deep thought and painful effort of generations. But, if, with that ticket we try to ride on the roadbed of individual and group selfishness, God help us, because we'll end up where we didn't want to be at all. No strong nation in the past was destroyed from the outside. There was an inner deterioration which rotted the core of corporate life. When outside pressure came, the structure fell.

The other day I entered a New York taxi to find the driver a lady. Before we reached our destination she had given me her life history, which included a chapter when she returned for a time to her native Puerto Rico. "But I just had to come back to America. This really is the most wonderful country in the world. I want my children to grow up here." How right she is! But we need to remind ourselves of this fact. We need to appreciate and constantly protect what our fathers brought into being.

The time is at hand for us as Americans to say to ourselves and each other, "It's really ourselves that we have to overcome. Our pettiness, our indulgence, our carelessness, our warrings of groups against groups, our lack of reponsiveness to public responsibility—these are our real enemies! Let's defeat them! We have the right ticket. Let's be sure we stay on the right train!

There are so many wonderful things about that story of the prodigal son. The picture of that enthusiastic young man, brought up in a fine home, setting out to make his way in the world, hos opulent that is in its suggestiveness! But he made mistakes and sank low.

The words, *"he came to himself,"* are suggestive. Though he got into a pathetic state, there was still great good in him. He rediscovered, in his abject state, that self of high potential which he had forgotten. We should remember, that, as we are moved to wipe off the slate some individual who may have deflected from "the accepted way" that there is latent hope and will and goodness in that person. One of the first functions of the Christian is to keep alive in himself and cultivate in others that "good and best self" which is in every man. How said that no one tried help the prodigal when he really hit bottom—when he needed help most of all. One of the proofs of our really trying to be Christ's disciples is to give the helping hand and heart to the prodigals of our time.

Then note that the prodigal remembered, when he was really down and out, that he still had a home and a father. Jesus, in telling the parable, was telling more than a story of just one boy and his father. He was trying to tell us that God is like that father, and that we all are like the prodigal son. Being human beings, we at times do foolish things. We end up where we don't want to be. But the love and the compassion of the Father is always concerned for us, reaching out toward us.

As we realize our foolishness, sincerely repent and return to our home, we are forgiven, offered a new start and a fresh opportunity. What an undergirding and comforting assurance that truly is!

There was nothing questionable about the prodigal son's beginning. He had a good ticket, but he got on the wrong train, ending up where he didn't want to be. Yet, coming to himself, seeing his folly and remembering his Father, he went back home where he was received again into the family circle where he belonged.

So it can be with us! We have a Father and an Eternal citizenship! We may wander far. But the Father's love follows us no matter how lost we may seem. That will redeem us as we turn our steps to that home from whence we came.

DR. RICHARD WEIGLE: OUTSTANDING AMERICAN EDUCATOR

HON. JOSEPH D. TYDINGS

OF MARYLAND

IN THE SENATE OF THE UNITED STATES

Tuesday, June 24, 1969

Mr. TYDINGS. Mr. President, in the June 1 issue of the New Mexican, there appears an article paying a well-deserved tribute to Dr. Richard Weigle, on his 20th anniversary as president of St. John's College. St. John's is a small liberal arts college founded in 1784 in Annapolis, Md.; it is one of Maryland's finest educational institutions. St. John's has recently opened a second campus in Santa Fe, N. Mex.

Education has been a vital part of our American heritage since the days when our forefathers first landed on these shores. The belief in education on the part of generations of Americans has resulted in the finest educational system in the world. Today, all Americans have the right to and the opportunity for a free public education.

From the recognition of this right, however, has arisen the continuing problem of the impersonalization of education in the large megaversity, which faces our education today. It is to this problem that Dr. Weigle has offered a fresh and successful approach.

The article calls attention to the efforts of this deeply committed educator to enlarge the concept of liberal arts studies to include active student participation in their own educational experience. This has been realized through closer teacher-student relations brought about by his stress on the intellectual development of the student through the use of a combined liberal arts and great books curriculum.

In 1949, Dr. Weigle gave up a promising career in the State Department to devote his life to the ideal of a academic independence at St. John's. Since then, he has greatly strengthened the financial and academic status of the college. The expansion to New Mexico opens a new chapter in the history of their fine school. More importantly, Dr. Weigle has changed the skepticism toward his concept of education by other colleges and universities to recognition of its success. More and more of these other schools are restructuring their curricula along the lines of St. John's. The success of Dr. Weigle's ideals at the Annapolis campus has brought him national prominence.

Richard Weigle has had a profound effect on American education. In an age of technology and great size, he has shown that a small liberal arts school, where teachers teach rather than just publish, can play a significant role in the educational process. He has reaffirmed the value of a liberal arts education and bring credit to St. John's and to Maryland.

I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ST. JOHN'S DR. RICHARD WEIGLE OBSERVES 20 YEARS AS PRESIDENT

Dr. Richard D. Weigle is observing his twentieth anniversary this year as president of St. John's College, which now has campuses both at Annapolis, Md., and Santa Fe.

When Dick Weigle came to Annapolis from the U.S. State Department in 1949, he was considered a competent young administrator with a solid background in education and international relations.

At that time the St. John's concept of liberal education, initiated 12 years earlier by Scott Buchanan and Stringfellow Barr, generally was looked on as a successful experiment. However, many observers had serious doubts as to whether the small, private college could survive with its academic independence and idealism intact.

In the 20 years since then, St. John's not only has survived as an institution, but has triumphed as an educational ideal. It has inspired other colleges and universities throughout the country to offer variations of the St. John's program. This is partly because of its intellectual appeal and partly because its liberal arts-great books curriculum brings teacher and student together and makes students active participants, rather than bystanders, in their own education.

Under Weigle's leadership, the Annapolis campus was strengthened financially, as well as academically, building up a $9 million endowment fund.

In the fifties, St. John's went co-educational. When the student population reached the 300 mark, believed at that time to be the appropriate size for a true learning community, President Weigle proposed an unusual expansion plan.

He urged the establishment of a second college and the site chosen was half a continent away—Santa Fe. The Board of Visitors

and Governors approved the plan in 1961, and the new $5 million campus enrolled its first students three years later.

As the president of a college with two distinct campuses, Weigle is concerned with the diverse interests of two faculties, two student bodies and two communities.

He participates actively in the academic life of the college, often attending student seminars on the two campuses. He taught a special class, called a "preceptorial", this year at Santa Fe on the Chinese classics.

He plays a prominent role in national educational circles, including such organizations as the Association of American Colleges, which elected him chairman a few years ago. He also has headed the association's Commission on Liberal Education and served as director of the Independent College Funds of America.

When asked recently to describe President Weigle, a fellow-educator used such phrases as "constant concern for St. John's", "disciplined", "highly rational" and "very selfless".

Weigle received his first degree from Yale University when he was 19. Later he went back to Yale for his M.A. in 1937 and Ph.D. in 1939. He began his teaching career as an instructor in English at Yali Union Middle School (Yale-in-China) in Changsha, Hunan in the mid-thirties.

During the three years before the United States entered World War II, he served as an instructor and assistant professor in history, economics and international relations at Carleton College, Northfield, Minn.

After service with the U.S. Army Air Force in China in the war, he entered the U.S. State Department. He was executive officer in the Office of Far Eastern Affairs when he resigned to go to Annapolis.

Born in 1912 in Northfield, Minn., he is the son of Luther A. Weigle and the late Clara B. Weigle. The elder Weigle is Dean Emeritus of the Yale Divinity School and chairman of the committee which brought out the Revised Standard Version of the Bible.

In 1942 Richard Weigle married the former Mary Grace Day of Madison, Wis. They are the parents of two daughters, Mary Martha and Constance Day.

LEGISLATION TO REVISE THE QUOTA CONTROL SYSTEM ON THE IMPORTATION ON CERTAIN MEAT AND MEAT PRODUCTS

HON. BILL NICHOLS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. NICHOLS. Mr. Speaker, I am today introducing legislation which would revise the quota control system on the importation on certain meat and meat products. This legislation is vitally important to cattle farmers of our country who find themselves competing more and more for a market with meat and meat products which are being brought into this country from all over the world.

There are those, who refer to such legislation as "protectionist" legislation. I personally am willing to admit that I am introducing this legislation in part to protect the cattle farmers of our country, who have invested a tremendous amount of money in land equipment and stock to produce fresh red meat for the American consumer. I also am willing to admit I am introducing this legislation in part to protect the consumer of meat products, who wants to buy fresh meat rather than meat butchered in some foreign country and shipped to stores here.

Mr. Speaker, I would like to submit at this point a statement on the need for such legislation by Mr. Bill House, president of the American National Cattlemens Association. President House, as a spokesman for the American beef cattle industry, makes a very good case for revising our importation laws. His statement follows:

LINCOLN, NEBR., June 12.—"The outlook both for immediate and long-range supplies of manufacturing grade beef is good," said Bill House, President of the American National Cattlemen's Association.

House set the record straight concerning accusations put forth by the Meat Importers' Council in an address at the annual meeting of the Nebraska Stock Growers Association in Lincoln. The ANCA spokesman said, "Cow slaughter this year is running six to seven percent above last year's pace. In 1964, 8.3 million head of commercial cattle were slaughtered . . . last year the total was 9.8 million head . . . a jump of 15.3 percent."

The Cedar Vale, Kansas rancher said that recent scare tactics employed by the Meat Importers' Council concerning declining domestic commercial beef supplies have no foundation. House stressed the fact that the American cattlemen has proven he is perfectly able to supply all qualities of beef our consumers demand with the most wholesome product obtainable anywhere, and still have enough production left over to export to beef-deficient countries.

President House reassured the American consumer that the U.S. beef cattle industry will continue to produce enough manufacturing grade beef. House said, "In 1914 there were 15.5 million beef cows . . . in 1969 there were 36.1 million . . . a healthy increase of 132 percent. These animals, combined with the slaughter of dairy cows, illustrate very clearly the trend that cattlemen are keeping more females in their herds."

House zeroed in on the total beef import picture and said, "It is obvious that domestically-produced supplies of beef have been more than adequate to meet demand, and all projections reveal that this will continue in the future."

House reiterated the need for modifications to the 1964 Meat Import Act in order to further help stabilize the domestic beef cattle industry. House said, "Ever-increasing quantities of imported beef create uncertainties and distort the economic picture, which could have long-range effect on domestic supplies to the detriment of U.S. consumers." House saluted Senator Roman Hruska (R-Nebr.) for his efforts to amend the Import Act and modify the flow of the more than one billion pounds of fresh, chilled, and frozen beef pouring into the United States.

PUBLIC OPINION OF U.S. SUPREME COURT

HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Tuesday, June 24, 1969

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent to have printed in the Extensions of Remarks the Gallup poll, appearing in the Roanoke Times, dated June 15, 1969, showing that public confidence in the U.S. Supreme Court has steadily declined since 1963.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Roanoke Times, June 15, 1969]

U.S. OPINION OF HIGH COURT HAS DECLINED

(By George Gallup)

PRINCETON, N.J.—When Warren E. Burger assumes his role as chief justice, he will head a Supreme Court that is at a relatively low point in public esteem.

Six years ago, in 1963, when the American people were first asked to record their attitudes toward the Supreme Court, 43 per cent gave the court a favorable rating ("excellent" or "good"). Five years later, in 1968, the percentage had declined to 36 per cent. In the latest survey, conducted May 23 through 27, the comparable percentage was 33 per cent.

Among adults today, 8 per cent rate the court as "excellent," 25 per cent say "good," 31 per cent say "fair," and 23 per cent say poor." The final 13 per cent have no opinion.

An important factor behind the court's decline in public favor, as judged by the views expressed in surveys, is on the growing feeling that the court is "too soft" on criminals. Others complain that the rights of the individual are being protected at the expense of society as a whole. Another fairly large group argue that the court's role should be one of "interpreting" rather than "making" laws.

The latest results show no significant change in favorable attitudes over the last 12 months. It was during this period that Abe Fortas resigned as a Supreme Court justice following the disclosure that he had accepted funds for service to the foundation of Louis E. Wolfson, who was convicted of stock manipulation.

While 23 per cent give the Supreme Court a rating of "poor," an increase of 8 percentage points since 1963, many citizens interviewed applaud this body for helping to move society forward at an impressive pace while fully protecting the rights of individuals and minority groups.

Much of the explanation for the ratings given the Supreme Court can be seen in the public's reaction to widely discussed decisions made by the court in the last 15 years. The public favored three of these decisions, opposed three and was evenly divided on one.

A majority of the American people favored the 1954 ruling on desegregation in schools, the 1964 ruling on reapportionment, and the 1965 ruling on distribution of birth control information.

Majorities opposed the 1963 ruling on religious practices in public schools, the 1965 ruling on communist registration and the 1966 ruling on admissibility of confessions as evidence in trials.

They were evenly divided on the 1967 ruling on interracial marriages.

This was the question asked in the current study and in three previous surveys:

In general, what kind of rating would you give the Supreme Court—excellent, good, fair or poor?

The latest results, based on interviews with 1,515 adults, and the trend:

[In percent]

	1969	1968	1967	1963
Excellent	8	8	15	10
Good	25	28	30	33
Fair	31	32	29	26
Poor	23	21	17	15
No opinion	13	11	9	16

A citizen's evaluation of the Supreme Court bears a close relationship to his educational attainment. Forty-three per cent of the college-trained give the court an "excellent" or "good" rating, while only 25 per cent of persons with a grammar school background do so.

Younger adults are more favorably disposed toward the court than are older persons; 46 per cent of persons in their 20s give the Supreme Court a favorable rating. Democrats rate it somewhat higher than Republicans, while southern whites are far more critical of the court than are northern whites.

When new appointments are made by President Nixon, the public would prefer a conservative to a liberal by a 2-to-1 ratio. This is seen in a further question asked in the same survey.

Although the survey was conducted before the selection and confirmation of Burger, a conservative on law-and-order, it is unlikely that the public's views following his selection would be much different.

With one vacancy left to fill, the appointment of a conservative would give the Burger court a more conservative tone and could tip the balance in a number of important future decisions. Close decisions of the Warren court have included those involving the legal rights of suspected criminals, the civil rights of various groups, the vote laws of states and the apportionment of congressional districts and other political boundaries.

This question was asked in the survey:

When new appointments are made by the President to the Supreme Court, would you like to have these people be people who are liberal or conservative in their political views?

Here are the latest results and the trend, showing attitudes slightly less liberal than one year ago:

Who Should Fill Vacancies?

[In percent]

	1969	1968
Liberals	25	30
Conservatives	52	51
No opinion	23	19

Marked differences are found on the basis of educational attainment, with college-trained most people inclined to favor liberal appointments. This is consistent with results to the previous question which show people with a college background the most likely to be favorably disposed toward the Supreme Court.

People reached in the survey who favor the appointment of liberals would likely agree with a 40-year-old Detroit physician who said, "We've got to keep the country moving. Only liberals can match the times."

Those with opposite views would be likely to side with a 33-year-old salesman from Pennsylvania who said, "We've got to calm things down. It's time for the pendulum to swing back from the left where it's been going since 1932."

TEACHING ETHICS AND MORALITY IS IMPORTANT NATIONAL OBJECTIVE

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSP OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. BENNETT. Mr. Speaker the nine Democratic House Members of the Florida congressional delegation today are introducing a bill to provide Federal grants to assist elementary and secondary schools to carry on programs to teach moral and ethical principles. The content and nature of the instruction would be prescribed by State school agencies.

Introducing the bill with me are Congressmen ROBERT L. F. SIKES, JAMES A. HALEY, DANTE B. FASCELL, PAUL G. ROGERS, CLAUDE D. PEPPER, DON FUQUA, SAM M. GIBBONS, and BILL CHAPPELL.

There is a great need in America today for broad instruction in the development of man's moral and ethical values. Such a program can be developed in the elementary and secondary schools of our Nation and the Federal Government can give stimulus to this through the grant procedure.

The teaching of ethics and instruction in moral values are a proper function of our schools, especially in view of recent Supreme Court rulings prohibiting prayer and Bible reading in public schools. Educational programs of this nature and textbooks for such have already been developed in some school systems in the Nation.

The curriculum and academic instruction in morals and ethics could take the form of assembly programs or individual classes. Lessons of courage, heroism, and good works developed from actual stories and biographies of great men and women could be the teaching avenue.

Programs on the growth of the freedom of worship—how it became part of our Constitution; on patriotism—how brave men fought to preserve our freedom; on good citizenship—why it is important to obey the law and on the objective history of religion, which the Supreme Court has approved, could all be topics of classroom discussion.

J. Edgar Hoover has said that we have as a society failed our youth by failing "to teach them the meaning of discipline, restraint, self-respect, and respect for law and order and the rights of others." The teaching of moral and ethical standards belongs in the home, church, and school.

The juvenile crime rate is growing at a much faster rate than the overall crime rate and this is an indication of failure to teach our children the difference between good and bad. The latest figures show that arrests of juveniles for serious crimes increased 50 precent in 1967 over 1960, while the population in the juvenile age group, 10–17, increased only 22 percent.

If we are to reverse the rising crime rate, costing the Nation $27 billion annually, then we must concentrate on the problem where it hurts the most: our young people.

The legislation we are introducing today will attack the problem at the roots and through strong classroom teaching of moral and ethical values our young people will be better able to cope with the challenge of right and wrong.

A copy of the bill follows:

H.R. 12339

A bill to provide Federal grants to assist elementary and secondary schools to carry on programs to teach moral and ethical principles

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title VIII of the Elementary and Secondary Education Act of 1965 is amended by adding at the end thereof the following new section:

"GRANTS FOR TEACHING MORAL AND ETHICAL PRINCIPLES

"SEC. 807. (a) The Commissioner shall make grants to State educational agencies to assist them in establishing and carrying out programs under which students attending public elementary and secondary schools will be provided instruction in moral and ethical principles. The content and nature of such instruction shall conform to general standards prescribed by such state agencies.

"(b) For the purpose of carrying out this section, there is authorized to be appropriated $5,000,000 for the fiscal year ending June 30, 1970, and each of the two succeeding fiscal years."

SEC. 2. Section 804 of such Act is amended by inserting after "this Act" the following: "(other than section 807)".

RUSSIA AND THE "PUEBLO" AFFAIR

HON. STROM THURMOND

OF SOUTH CAROLINA

IN THE SENATE OF THE UNITED STATES

Tuesday, June 24, 1969

Mr. THURMOND. Mr. President, Reader's Digest has just published an article which may be of critical importance for public understanding of our relations with the Soviet Union. It is an account by the escaped Czechoslovak defector, Gen. Jan Sejna, of his conversations with Soviet Defense Minister Marshal Andrei Grechko in May, 1967—8 months before the seizure of the U.S.S. *Pueblo.*

According to Sejna, Grechko boasted to his Czech comrades that the Soviets intended to assist the North Koreans in the capture of a U.S. intelligence ship. He quotes Grechko as saying:

We have decided to humble the Americans. Just as we humiliated them in the air by shooting down the U–2, we are going to humiliate them at sea by grabbing one of these ships.

He further quotes Grechko as follows:

Our Korean comrades of course, are not capable of carrying this off without us; but we will guide and protect them.

Sejna further says that the Czech military apparatus was informed of the capture of the *Pueblo* in the following manner by the principal Warsaw Pact representative in Prague:

During the night we learned that, with the collaboration of our Korean comrades, we have achieved a great success.

Mr. President there is no way of verifying General Sejna's story, although the Digest says that all cross-references were checked and found accurate. However, the story is consistent with what we know about the close relationship of the North Korean Communists with the Soviet Union. I ask unanimous consent that the article, "Russia Plotted the *Pueblo* Affair," be printed in the Extensions of Remarks of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A COMMUNIST GENERAL'S STARTLING CHARGE: RUSSIA PLOTTED THE "PUEBLO" AFFAIR

(By General Jan Sejna)

(NOTE.—General Jan Sejna is one of the highest-ranking communists ever to defect to the West. Until February 1968 he was the Czechoslovak Communist Party senior secretary assigned to the Ministry of National Defense, charged with political control of the Czechoslovak Ministry and General Staff. As such, he dealt almost daily with the Soviet

marshals, generals and agents who rule Eastern Europe as a Soviet colony, and was privy to many military and political secrets of the Warsaw Pact nations.

(During 1967 and early 1968, in the struggle for control of the Czechoslovak Communist Party, he was accused of siding with the forces of arch-Stalinist Antonin Novotny. The general contends that he represented a group of politicians and young officers opposed to hard-line military men seeking their own gain in the political intrigue that has characterized the turmoil in Prague. Nevertheless, when Novotny lost, Sejna fled to the United States—bringing with him a perspective of the communist world rarely before available to the West.

(The following article, the first he has released since his flight, is excerpted from Sejna's forthcoming book. Much of what he reports here cannot be confirmed because of the rarefied circles in which he moved. But he has been interviewed at length by Digest editors, and specific references that could be cross-checked have been painstakingly investigated. No contradictions have been discovered.)

I first learned in May 1967 that the Russians were planning to capture an American intelligence ship—eight months before the USS *Pueblo* was seized off Korea. Some dozen Czechoslovak and Russian generals had gathered at the state guest villa in Prague for a luncheon honoring the Soviet defense minister, Marshal Andrei Grechko. I remember that the meal of delicate Czechoslovak fish, beef soup with liver dumplings, veal roulade, cream tarts and fruit was especially excellent. Our three-hour conversation was fueled by Italian aperitifs, Russian vodka, red and white Bulgarian wines, and some truly fine French cognac which we had liberated from the Germans.

Marshal Grechko, whom I had often encountered at Warsaw Pact conferences and during private visits in Prague, is taciturn to the point of rudeness when sober. But when he consumes too much vodka and Cinzano, he becomes a belligerent, loose-tongued braggart. Drinking heavily that afternoon, he embarked on his favorite subject—the invincibility of the Soviet armed forces—with emphasis this time on the multiplying might of Russian sea power.

He admitted that the Soviet Union had been powerless to intervene during the Cuban and Middle East crises because of the supremacy of American naval forces. The refusal of Nikita Khrushchev to allot enough money to develop a powerful Soviet fleet was a primary reason why the Russian military supported his ouster. But now Soviet naval strength was growing and would soon challenge the Americans on all the oceans of the world.

"It is absolutely insolent the way the Americans sail their damn ships around as if they owned the water," Grechko declared. "Their espionage ships come right up to our shores to spy on our communications. But I can tell you this: we have decided to humble the Americans. Just as we humiliated them in the air by shooting down the U–2, we are going to humiliate them at sea by grabbing one of these ships."

Marshal Grechko did not specify when, where or how the Russians expected to commander a U.S. ship. But he indicated that the seizure would be accomplished somewhere in the Pacific, in collaboration with the North Koreans. The Russians, he said, did not want to stage an incident in waters which might involve the Warsaw Pact in a confrontation with NATO. The Black Sea also had been ruled out because the world looked upon it as "a Russian lake"; loss of an American ship there would not be sufficiently "sensational." The Pacific had been chosen because it was considered an American preserve.

As I listened to Grechko, it became apparent that the Russians were almost as intent upon hurting the Chinese as upon hurting the Americans. "Our Korean comrades, of course, are not capable of carrying this off without us," Grechko said. "But we will guide and protect them. This will again show them that it is we, not the Chinese, upon whom they can depend. They will see that we *act* while the Chinese simply bray and posture."

General Josef Vosahlo, deputy minister in charge of the Czech air force, asked, "Is there not a danger that the American reaction could cause serious complications?"

"Don't worry about that," Grechko replied. "The Americans haven't dared to blockade Haiphong, because they know that our ships would shoot their way through. They won't do anything about an incident like this, either. We are not afraid of them, and that is what the whole world will see."

Grechko's arrogance made me privately want to doubt anything he said that day. Still, I wondered. I had disbelieved Khrushchev in 1961 when he secretly let us know that within a few months a wall would be erected to seal off West Berlin. I now also recalled a conversation I had had in March 1966 with Grechko's predecessor, Marshal Rodion Malinovsky, a much more prudent man. He had confided that the Russians suspected American ships of being extremely effective in ferreting out Soviet secrets. "Mark my word," he had vowed, "we are going to do something about those ships."

In the months following the Grechko luncheon, nothing related to his boasts came to my attention, and I almost forgot about them. Then, on the morning of January 24, 1968, I received a call from the secretariat of the National Defense Minister, informing me that "an unusually important announcement" would be made at the morning briefing. In the ministry council chamber, Soviet Colonel General Aleksandr Kushchev, the principal Warsaw Pact representative in Prague, rose.

"During the night we learned that, with the collaboration of our Korean comrades, we have achieved a great success," he began. We all were stunned as he announced that the *Pueblo* had been hijacked and was at the moment in communist custody.

"The entire operation went off smoothly—incredibly smoothly," Kushchev reported. "The *Pueblo* crew, to a man, capitulated. They did not fire a shot. Frankly, we thought it would be much more complicated. The Americans were so bewildered that they failed to destroy thousands of documents. It will take our experts quite a while to analyze them. We may have a gold mine.

"We've all heard about what a great communications and command system the Americans have," Kushchev went on. "How they use computers, how they can respond instantly to an attack. Well, yesterday it took Washington literally hours to pull itself together and even begin to react. This is a precise example of how the most advanced military technology cannot compensate for a lack of will and leadership."

Kushchev bragged on about the propaganda triumph. "On the one hand, it is a humiliation for the United States: we have made clear that the Americans do not rule the seas anymore. On the other, this is a disgrace for China. It proves to the entire socialist camp that the Soviet Union helped North Korea gain stature, while the loudmouthed Chinese could do absolutely nothing."

No one in the room doubted that capture of the *Pueblo* was a great coup. However, I and some of my fellow officers could not quite accept Kushchev's account of it. Accustomed as we were to Soviet propaganda exaggerations, we simply could not believe that the crew had not attempted some resistance to prevent the capture of thousands of valuable documents.

In the next few days, though, other Soviet officers confirmed Kushchev's version. Also, I began to see indications that the intelligence information the Russians were extracting from the *Pueblo* was immensely valuable.

At the weekly general staff briefing on February 23, we heard an extraordinarily detailed analysis of the deployment and operations of American naval forces in the Pacific. The source was identified as the *Pueblo*. Furthermore, we were told that, by using codes found aboard the ship, the Russians now were able to read previously indecipherable American messages that they had been recording on tape.

I derive no pleasure in recounting this American defeat and Soviet victory. I report these details now because I think they carry with them a message of importance to the people of the United States and the West:

The Soviet Union today is increasingly dominated by a militaristic clique of marshals who, with few exceptions, are perilously ignorant of the West. These narrow-minded hard-liners understand and react only to the prospect of superior force. Signs of weakness tempt them to risk ever more irresponsible adventures.

Unless they are convinced that the American government and the American people are prepared to resist future aggression, then more aggression is inevitable. On the basis of my personal experiences with these men, I know that each time one of their military gambles pays off, they edge closer to the brink. And by recklessness and miscalculation, they are likely to plunge the world into the war that ordinary men everywhere desperately want to avert.

RIDING THE COLORADO RAPIDS

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. UDALL. Mr. Speaker, the U.S. Information Agency's publication, Topic, has just published an interesting article for its overseas readers on the experience of boating through the Grand Canyon of Arizona.

"Riding the Colorado Rapids" is an exciting pictorial essay by Patricia Caulfield, describing a trip she and 12 others took through the Grand Canyon. Not satisfied to view the canyon from its rim, as do most sightseers, they ran the river for 15 days, covering 300 miles.

The article recreates the thrill of riding one of America's great "white water" rivers, an experience several of my colleagues shared with me 3 years ago and which a number of us plan to repeat during the August recess this year.

Without objection I will insert the text of Miss Caulfield's article in the RECORD at this point:

RIDING THE COLORADO RAPIDS

(By Patricia Caulfield)

Our sturdy little dories made a smooth line through the stretch of quiet water with the rhythmic slap-slap of the oars the only sound punctuating the continuous rumble of distant thunder. This muted rumbling would soon engulf us in another ear-splitting roar—this we knew well from 15 days of hurtling through hundreds of great and small rapids (one dropped 30 feet in 400 yards) in the capricious Colorado River. As we neared the last bend in the smooth waters before the river took a giant tumble down a precipitous, boulder-strewn drop, we braced ourselves for the jolting ride. It plunged our small crafts down steep drops and submarined them through walls of water beating off the rocks.

Suddenly in mid-rapids one boat was upended, flipped over and tossed about like a cork in a storm. For a long minute we watched the churning water, until its three passengers, buoyed by their life jackets, surfaced and floundered to safety on the sandy shore while their dory careened onward downstream.

Our 300-mile journey from Lee's Ferry, Arizona to Lake Mead, Nevada was nearly over and we would soon go our separate ways. Thirteen in all, our ages ranged from 15 to 66, our home states from Maine to California, our occupations from student to housewife, from bronco buster to magazine editor. Our common ground was a wish to see the Grand Canyon from its mile-deep floor, instead of from its rim, as most people do, and to see it the hard way by running the rapids of the Colorado River. In its passage through the Grand Canyon it is the most difficult stretch of "white water" in the world.

INFLATION WHOSE RESPONSIBILITY?

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. WHITEHURST. Mr. Speaker, inflation is probably the second most important problem which confronts our Government today. There have been so many suggestions made to bring a solution to this problem, but I have been very much impressed by a statement made by Mr. Angus Powell, president of the Lea Companies, with the thought that his comments are of particular significance to the Members of this body. I take pleasure in inserting Mr. Powell's comments in the RECORD:

INFLATION WHOSE RESPONSIBILITY?

(By Angus Powell)

Inflation is the most sinister, and the most deceptive, of all the problems that face America today. It is economic opium in that at first it delights the participants as they take their various "trips," and once addiction prevails, disaster is the result.

Too many persons in this country never give a second thought to the fact that the United States of America is not a "super country" that can withstand anything. By comparison, I remember so well the amazing baseball record of the late Lou Gerhig. He played in 2,130 consecutive games and made a phenomenal batting and fielding record. Those feats earned him the title, "The Iron Man of Baseball." But before the eyes of millions of Americans, their "Iron Man" contracted a terminal disease and died a relatively young man before his career had ended.

This can happen to America if we are not careful, courageous, and honest with one another.

What is inflation doing to this country?. . . Have we really got the disease? . . . What are some of its important causes? . . . What should be done about it?

WHAT INFLATION IS DOING TO THIS COUNTRY—SOME HIGHLIGHTS

(1) Senator Miller (Rep.—Iowa), in a speech before the Senate in June, 1968, asserted that in the past seven years inflation has added $100 Billion to the cost of all purchased goods and services. Further, it has stolen $32 Billion from our personal savings. It has devalued our life insurance and pension reserves by $30 Billion, and has sliced $15 Billion from the value of Government and other bonds.

One of the tragic hangovers resulting from inflation is *the undeniable moral effect it has on our nation*—it steals from the elderly and thrifty, and literally makes "suckers" out of them. It encourages everyone to distrust his government. Mr. George Champion, Chairman of the Board, Chase Manhattan Bank, in a recent speech referred to the above by quoting an international banking executive, who put his finger on the crux of the matter when he said, in effect, "the people of a country will remain healthy only as long as their country has sound money."

This year the interest charges on the Federal debt will exceed $15 Billion, up from $9 Billion in 1960, and the average interest rate is up about 33.3%, from 3.3% to 4.4%. How much money does this mean? Senator Harry Byrd, Jr. (Dem.—Va.), said in a public statement last summer that if the Federal Government were to levy a 100% tax on all income over $10,000 ($20,000 on joint return), the revenue produced would amount to $13.2 Billion—not nearly enough to pay the interest on the national debt.

(2) Cost of Living. Today the dollar will buy what 39c would in 1939. The cost of living is rising at an alarming rate . . . it rose 2% in 1965, 3.3% in 1966, 3% in 1967, and the estimated rate in 1968 is 4.5%. Quoting Senator Miller again, at the rate of 4.5% increase, the cost of living and the loss in value of cash convertible assets will amount to more than our Federal income tax. In some areas of our country the rate is a 5% increase annually. When this rate is compounded over a ten-year period, the increase amounts to the astounding figure of 65%.

(3) Effect on Home Purchases. In a section of one of our large metropolitan areas, a moderately priced home in 1964 sold for $14,900. The identical home today sells for $21,500—a 44% increase.

(4) According to the U.S. Bureau of Labor Statistics, wages in July, 1968, were the highest ever recorded, amounting to $109.16 per week. In 1957–59 dollars, this amounts to $79.25 slightly more than it was three years ago. In addition, local and state tax increases have to be accounted for.

(5) I am serving on the Boards of three educational institutions—a college preparatory school, a state teachers college, and a theological seminary—and it is tragic to see what inflation is doing to the operation of these institutions. Their sources of income cannot keep up with the uncontrollable costs facing them at every turn. The relative salary level of Ph.D. and M.A. degree holders is shockingly out of proportion to what it was just a few years ago. This group of extremely important citizens in our country, along with millions of other salaried and fixed income persons, is caught in a giant squeeze play. Little wonder that these groups are restless! A nation never can be strong if large segments of its people do not enjoy the same opportunities for benefits that other groups in our country enjoy.

WHAT ARE SOME OF THE CAUSES OF INFLATION?

The answer one gets to this question is colored to a large extent by the person who gives it. Labor leaders blame business; business blames excessive government spending, pro-labor laws, and unreasonable wage demands by labor operating under favorable monopolistic laws; Government—except for the period 1952–1960—has thrown its weight decidely behind labor leaders' demands. The truth is, all three of the above groups are involved in the answer to this question. The following are the main causes:

(1) Federal Government spending—outside of war essentials—far exceeds safe limits. One clear example . . . since 1960, about 500,000 employees have been added to the Federal payroll. I read recently that since 1960, the Federal Government has cost the taxpayers nearly $1 Trillion, which exceeds the total cost, including all wars, of operating the Government from 1789 to 1954. The Federal Government—except for the period 1952–1960—has vigorously followed the economic theory of "spend and spend; tax and tax." In 1967, our deficit was $25 Billion.

(2) Wage increases in industry have exceeded increases in productivity. Mr. George Champion recently pointed out that productivity during the past decade increased about 3% annually on the average, attributed almost entirely to capital expenditures. Wage increases today are 6.5% annually and in many sections of the country are phenomenally higher in the building trades.

Mr. A. H. Raskin, Assistant Editor of the editorial page of The New York Times, writing in the February, 1968 issue of Saturday Review, points out in his article, "Profit Sharing In The Paycheck," that: "Collective bargaining has become a dog chasing its own tail, with inflation eating up wage increases before workers ever get a chance to spend them." He points out also that: "The interrelatedness of the economy and the mammoth size of the bargaining units in steel, automobiles, aluminum, railroads, shipping, and most other large industries, make it ridiculous to suggest that the adverse effects of irresponsible labor-management decisions can be neatly contained." He expresses the same concern and hope that a great majority of the American people share when he makes the plea that: "Some day, someone in the White House or on Capitol Hill will address himself seriously to the problem of providing workable statutory safeguards against victimization of the country by abuses of concentrated labor-management power."

Realizing that about 65% of the cost of all products manufactured in the United States is represented, directly and indirectly, by labor costs, it can be seen what is happening to cost in the normal three-year labor contract period. For example, a $3,000 automobile has about $2,000 (65%) worth of labor in its cost. At the present rate of increase, the total increase in three years will amount to about 20%, or $400. Productivity increases, at best, can be expected to offset the above amount by $200, or one-half of the increase. The balance will have to come out of the profit column or be passed on in price increases.

Already the rate of return on invested capital in American industry has dropped from 13% in 1965 to 11% today—a drop of more than 15%. Therefore the availability of capital from modernization and expansion is caught in a double squeeze—the supply is diminishing and replacement costs are increasing rapidly. It also is important to note that many persons in America think American businesses are making as much as 20% net profit in sales. The fact is, the average is about 5%. The success of our entire free enterprise system rests upon this relatively small percentage figure.

WHAT MUST BE DONE ABOUT INFLATION?

It must be stopped as soon as possible, not just slowed down. Surgery can do the job now . . . tomorrow the disease could be terminal. Let us never forget what Arnold Toynbee pointed out in his history of civilization. He said: "Nineteen out of a total of twenty-one of the world's great civilizations were destroyed from within, and only two of them were conquered by an outside enemy."

Thankfully, I am convinced there is an answer to this critcal problem, but before we can take even a step, we in America must be willing to put the needs of our country first. Those who will direct and execute this program in the government, labor, business, and professional sectors, must level with the people and give them a new brand of leadership with integrity being the foundation of this leadership. Americans today, thanks to our communications media and educational systems, are the most intelligent and the best informed people the world has ever known. The great majority of them will not stand for doubletalk. They are paying an

enormous tax, which amounts to about one-and-one-half-days pay per week, and they have a right to demand intelligent and fair action.

PLAN OF ATTACK

Before any plan of attack on inflation can succeed, there must be a willingness on the part of government, labor and business, to do what is necessary to curb it. In short, the Government must drastically cut its political and non-essential spending, and balance its budget as soon as possible. Labor must work more closely with business management in an attempt to produce more goods in proportion to wage increases granted. Big business must lead the way in holding down prices as its part in this attack on inflation.

A great deal has already been written about cutting government expenditures, and I shall not pursue this phase of the subject further. I will direct my remarks to the field of business and labor because it is here that the vital organs of our free enterprise system must function in harmony for a common objective and for a common good.

To this question there is a sound answer which has tremendous possibilities. First, we must look eyeball to eyeball at *some basic facts* which are benchmarks in our country today, and recognize their existence:

1. We live in a politically oriented society and, by definition, the majority rules . . . the elected make our laws.

2. Highly organized minorities can have an unusually large influence on all levels of the political sector.

3. Elected representatives are extremely sensitive to the will of the control element in their electorate—they always have been and always will be.

4. In the past twenty-five years, America has been caught up in a combination of massive revolutions which have overlapping causes and effects at certain points. It is amazing how well we have digested these upheavals. I refer to:

(a) The social revolution—integration and mass education.

(b) The economic revolution—the greatest boom in the history of mankind; it has resulted, temporarily at least, in the greatest affluence for the greatest number of persons that the world has ever known. The base of the great middle class in America has been broadened substantially.

(c) The moral revolution—which manifests itself in so many directions:

(i) Massive problems as a result of the disregard for law and order.

(ii) Frustration of the Church and churchmen.

(iii) Basic degeneration of established moral codes in our society.

(d) Continuation of the industrial revolution. We are in an entirely new chapter in this vital area. Businessmen have created a society that is completely *interdependent*—i.e., automation, assembly-line production, highly coordinated marketing and distribution systems, and widely distributed stock ownership.

5. America is a nation whose existence and growth depend upon its business economy. If America fails economically, America fails overall, and becomes another statistic for Mr. Toynbee's loss column. No nation can grow or survive without a sound economy.

American business today has the greatest responsibility it ever has had—not only to its stockholders and employees, but to the American people and our nation. Likewise, it has its greatest challenge and opportunity.

WHAT CAN BUSINESS AND THE GOVERNMENT DO TO STOP INFLATION?

In the first place, business leaders must broaden their scope of interest and involvement, and provide more leadership in areas most of them overlook or are fearful of becoming involved in. The business leader's role should be more positive and broader in concept. Businessmen spend too much time being against something. They are on the defensive too often and not on the offensive enough.

Business leaders have got to recognize that it is they who have created, to a large extent, the interdependent society in which we live—that equity owners, management, and workers, are completely dependent on one another. No business can function without any one of the three categories performing. The big step that must be taken by business leadership is to *involve all employees*—not only as workers, but as partners. Company employees are not going to tolerate much longer a situation wherein they as a group in our business system are treated like a fifth wheel when it comes to dividing up the "kitty"—in plain simple truth, *they want a piece of the action,* because they feel they deserve it.

Fortunately, there is hard evidence that, in most cases, those companies which have ventured into well-designed employee stock ownership and profit-sharing plans have prospered extremely well. Already there are at least sixty-five national corporations, employing 5,000 or more employees, that have profit sharing and/or stock ownership plans in force, each tailored to the individual needs of each respective business. Among them are companies such as Sears Roebuck, Eastman Kodak, Kroger, Motorola, J. C. Penney, Standard Oil of California, Bank of America, Texas Instruments, and thousands of smaller companies.

In fact, the world's highest paid industrial employees, working for the world's largest manufacturer of welding equipment, have both a profit-sharing and stock ownership plan: The Lincoln Electric Company has been a forerunner in proving conclusively what can be accomplished when owners, management, and hourly-paid employees join together in all aspects of the business to generate unusual success for all concerned and, in the process, sell its product on the low side of the market-price structure.

To summarize: In order to defeat inflation and assure continued sound growth, Government and business must concentrate on the preservation and encouragement of those factors which serve as the foundation of our free enterprise system. Business must do those things that bring labor, management and stockholders together: This country can not endure much longer the *divisiveness* which exists today. The Government must back up and direct its attention more to the role of impartial referee and rules-maker and encourage the private sector to enter the problem-solving area which the Federal Government has excessively invaded. Of course, the Federal Government will have to continue in some of these areas, but to nowhere near the extent to which it is involved today. Tremendous sums of money can be saved in this way and at the same time private enterprise will be adding to the tax till.

WHAT CAN THE FEDERAL GOVERNMENT DO TO SPEED THIS PROGRAM?

Chief Justice John Marshall said years ago, "The Power to tax is the power to destroy." Let us never forget this.

Conversely, the way the power to tax is employed can substantially encourage business to adopt specific courses of action. This is a well established principle already employed by the Federal Government.

Therefore, I urgently recommend to our President and the Congress the following plan as a major program in the broad range attack on inflation. Monetary controls alone can not accomplish the total job.

THE FEDERAL GOVERNMENT PHASE OF THE ATTACK

(1) Any corporation, bank, business, or partnership would be permitted to deduct 6% of capital invested, figured in accordance with accepted accounting rules, as a business expense in arriving at pre-tax operating profits, provided:

(a) Said corporation, bank, business, or partnership paid out such an amount in cash as a dividend or partnership share.

(b) If said corporation or bank stock is listed or publically held, it must have in force an approved stock purchase plan under which a substantial percent of the stock of the company or bank would be made available over a period of time for this purpose, with the total shares involved not to exceed eventually 25% of the equity ownership, unless the company itself wishes it to do so. The objective of this provision would be to encourage every qualified employee to accumulate a meaningful amount of his company's stock.

(c) Each corporation, bank, business, or partnership would have to have an approved profit-sharing plan. In order to be appproved it would have to have substance, and be approved by the IRS.

(2) Any corporation, bank or partnership electing to adopt (1) above would be given broad legal assurances that would protect it against strikes. It is obvious that if a company has a broad stock ownership plan for its employees (if it is a listed company) and a profit-sharing plan of substance which is divided among all employees, strikes cannot be justified on any basis except as a tool of power to be used by power-oriented labor leaders. The day has passed when the working man needs massive protection from his management.

This plan would not be a scheme to weaken the importance of the unions. Rather enlightened union leadership would see the great benefits to be attained for all employees as the result of it. Furthermore, it would commit everyone to the essential task of working toward the best objectives of the business and its customers. The labor leaders' role would change significantly from that of instilling fear and encouraging distrust in management, to the objective of encouraging creativity, productivity, service, and cost reduction under a climate where everyone gains—including, of course, the customer, who is everyone's final boss.

(3) *Hold the line on price increases.* Under conditions which exist today, this is not going to be done voluntarily. It could happen in three ways, however, two of which could be dangerous; the third incorporates interesting possibilities:

(a) The Government could freeze wages and prices—a strong possibility if present trends continue.

(b) A major depression would depress prices, but the other effects would be disastrous and many businesses and people would be seriously hurt.

(c) The Government, through a tax credit plan, could materially restrict price escalations on a voluntary basis. For example:

Any business that did not increase prices during its fiscal year would be allowed a tax credit of 10% of net pre-tax profits. This percentage would be reduced according to a diminishing scale that would vary in proportion to the amount of total sales of a company which did not carry a price increase during the year. As an example, if 50% of a company's sales comprised items whose prices were increased, this company would be able to take a 10% credit on only 50% of its profit. Additional ground rules, far less complicated than many present tax regulations, could be established to cover the size of those increases a company did make under the plan.

In conclusion, we are talking about a vital decision and course of action for America. What I have outlined above obviously would have to be checked out and evaluated in terms of tax revenue for the Government. It is a plan designed to motivate people and assure sound growth and, at the same time, attack our most violent and deceptive enemy—inflation. This plan will correct, in part at least, one of the outrageous practices of double taxation with which stockholders and corporations are saddled today, because

it will permit business to take a reasonable tax deduction on capital invested. The fact that this money would have to be paid out to stockholders would mean that the money would go into widespread circulation and still would generate taxable income on an even wider base. When one accounts for the stimulating effects that this program would have on our economy, I am certain that tax revenues would increase.

This is a positive regeneration plan insofar as financial, commercial, and industrial growth is concerned. It would bolster the foundations of our free enterprise system. It also could be tailored to the public utilities and transportation fields. While there is no substitute for good management in any operation, private or public, stock ownership and/or profit sharing plans have achieved outstanding results in many companies. Moreover, it is significant to note that these companies are usually more competitive, sell at lower prices, and pay out more in taxes.

One of the major thrusts of this program is to make every employed American a capitalist in the truest sense. Only in this way will our free enterprise system survive, only in this way will the latent possibilities of the vast majority of our countrymen be challenged. An informed, involved, and participating citizenry is our greatest bulwark against Communism and general deterioration. It is our best assurance that we in America will remain a vibrant, energetic, and strong nation, dedicated to freedom, opportunity and equal justice for all. Such a program would revitalize America at this time of unusual crisis.

NEW JERSEY NEWSPAPER ASKS SECRETARY KENNEDY TO ANSWER CHARGES

HON. WRIGHT PATMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. PATMAN. Mr. Speaker, my mail has reflected a growing concern over Secretary of the Treasury Kennedy's obvious conflicts of interest.

Many people are questioning the Secretary's failure to explain his financial ties to the Continental Illinois National Bank despite my repeated requests for the information.

An editorial from the May 11 edition of the Newark, N.J., News has just come to my attention and this editorial plainly illustrates the concern being expressed across the country. Mr. Speaker, I place this editorial in the RECORD:

PATMAN VERSUS KENNEDY

Treasury Secretary David Kennedy owes the nation more than silence over his continuing financial relationship with the Continental Illinois National Bank & Trust Co., which he headed until he took over his federal post.

Rep. Wright Patman, D-Tex., chairman of the House Banking and Currency Committee and a nemesis of Treasury leaders, wants Mr. Kennedy to explain how he can take an objective view of banking matters in view of the fact his remuneration from the bank has exceeded his income from the government.

Mr. Kennedy has ignored the suggestion that he answer questions before the House Committee. An aide pointed out the secretary put some of his bank shares in a trust over which he exercises no control, and sold other stock acquired last month under an option plan.

But there has been no direct reply to Mr. Patman's demand that Mr. Kennedy renounce a $200,000 severance allowance he is to receive from the bank after he leaves government service. Nor has there been any statement on charges he receives a $4,800 monthly pension, has accepted $600,000 in a profit-sharing plan, and benefits from having the bank pay most of the cost of his life and health insurance.

Considering that his department exercises jurisdiction over national banks and is involved in the dispute over regulation of one-bank holding companies, such as the one recently set up by Continental Illinois, Mr. Kennedy should take advantage of the opportunity to testify on the questions of propriety which justifiably have been raised.

CONSERVATION LEGISLATION

HON. OGDEN R. REID

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. REID of New York. Mr. Speaker, today I am introducing a package of 13 conservation bills, the passage of which is vital if we are to protect this country's natural beauty from the onslaught of lumber companies, housing developers, miners, and other groups who would destroy it.

Four of the bills have as their purpose the enlargement of existing national parks or the establishment of additonal ones. In my judgment, the bill establishing the Redwood National Park, passed by this body last summer, failed to include some of the most important stands of redwoods—those along Skunk Cabbage Creek and in the Bald Ridge-Emerald Mile area. One of the bills I am introducing today would correct that omission. Others would provide for the establishment of the Channel Islands National Park in the State of California, authorize the Secretary of the Interior to study the most feasible and desirable means for establishing certain areas as marine sanctuaries, and increase the authorization for the Cape Cod National Seashore.

In addition to protecting the few remaining areas of great natural beauty in this country, I feel it is vital that we do more to improve the quality of the Nation's waterways. Therefore, I am introducing today a bill identical to S. 7, originally sponsored by Senator MUSKIE, and one identical to H.R. 6296, originally sponsored by the gentleman from California (Mr. TUNNEY). Mr. TUNNEY's bill, which would create a commission to make a comprehensive study and investigation of the discharge of oil and other pollutants from vessels, onshore and offshore facilities, and other sources, should do much to help prevent future disasters similar to those which have spoiled parts of the California coastline in the past year. Senator MUSKIE's bill deals with vessel pollution and thermal pollution, as well as oil polution. We must deal forcefully with all three of these problems if we are to improve the quality of our waters, or even maintain their present deteriorating quality.

Coal mining operations have attracted a good deal of attention in recent weeks because of their effect on the men who run the mines. Too often, we forget that mining operations also affect the surrounding countryside, causing stream pollution, loss of fish and wildlife habitat, and other damage to natural beauty. The Mined Lands Conservation Act, originally introduced by the gentleman from West Virginia (Mr. HECHLER), would authorize long-range programs for the reclamation, acquisition, and conservation of lands and water adversely affected by coal mining operations. If it is adopted by the Congress, it can go far toward repairing the damage that has already been done in many parts of the Nation, and perhaps help prevent such damage in the future.

In addition to protecting the physical resources of this country, we must pay more attention to the preservation of its animal resources. To that end, I am introducing today legislation which would provide for a comprehensive study of the polar bear and walrus for the purpose of developing adequate conservation measures; a bill to establish a national policy and program with respect to wild predatory mammals; and legislation to govern the use of pesticides and other chemicals.

Perhaps most important, if this country is ever to have a sensible and well-planned conservation policy, is the establishment of a Council of Conservation Advisers or a Council on Environmental Quality. The President has already announced the formation of such a council—composed of several Cabinet members and the President's science adviser, and chaired by the President—and I am heartened by his step in this direction. However, I feel we need a permanent council, composed of experts in environmental problems and their solution, who could conduct continuing studies of Government programs affecting the environment and recommend national policy to promote the improvement of our environmental quality. I, therefore, hope the Congress will take early action on a measure of this kind, and on the other bills which I have introduced today.

CRITICS OF VIETNAM WAR GIVE COMFORT TO ENEMY

HON. ELIGIO de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. DE LA GARZA. Mr. Speaker, recently I received a communication from a lady in my congressional district. She sent me the following editorial which she suggested I share with my colleagues, which I now respectfully do:

CRITICS OF VIETNAM WAR GIVE COMFORT TO ENEMY

The dawn of this Memorial Day finds thousands of American servicemen on duty throughout the world and by the time the day ends, more will have died in defense of freedom in Vietnam.

It is particularly fitting that this nation pause to honor these Americans.

They, and they alone, stand between Communist aggression and the right of others to live as they please.

They are protecting a guarantee—a solemn promise made by the United States to South Vietnam that Americans would offer protection in the event of aggression. They are paying the price to assure the survival of the free world.

These patriotic Americans, most of whom come from the mainstream of life, greatly overshadow the dissenters, the self-styled leaders, the headline hunters and the stupid who are actively aiding and abetting the enemies of this country.

It is particularly incredible that a young senator who has never worn the uniform of his country should, from the safety and comfort of his Washington office, adversely criticize the action of a field commander in Vietnam. It is even more incredible that a senior senator should call his own nation an aggressor and brand its young fighting men with the stigma of "fighting an illegal war."

But there is no cure for these people. They are exercising their right of free speech which is being guaranteed to them by the Americans they so freely criticize. They are also prolonging the Vietnam War by giving hope to the enemy in a most wanton and reckless fashion.

But the fluent speaker in the halls of Congress, the mob leaders and their followers—Americans all—fail to recognize the responsibility that accompanies the right of free speech.

It would be well for them to talk to an infantry rifleman or a shotgun rider on a helicopter. There they could get a lesson in the responsibilities of a citizen.

History will by-pass these deluded people because, in the final analysis, they contribute nothing to their nation or its people. They are the losers.

The only way to fight a war is to fight to win. Any other way amounts to appeasement and appeasement leads a nation on the downward path.

There are many markers along the road to freedom—Nathan Hale, Gettysburg, Abraham Lincoln, the Argonne, Omaha Beach, Bataan, Porkchop Hill, and Vietnam.

"We as military men," wrote an Army sergeant in 1965, "are welded by regulations, tempered by discipline, and share the strongest dedication to our country. Our ultimate challenge comes in war, and, perhaps in mortality.

"But we are also heirs to a responsibility which grows in magnitude by the hour.

"We accept this responsibility because we are Americans and we are free men."

It is to the men of this nation who accept responsibility and who take up each challenge so that we can live in honor and dignity and freedom, that Memorial Day is dedicated.

STATEMENT ABOUT PRESIDENT NIXON'S MESSAGE ON AIRPORTS AND AIRWAYS

HON. DONALD G. BROTZMAN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. BROTZMAN. Mr. Speaker, the President's recent message on air transportation addresses itself squarely to one of the most vexsome problems of modern society. In our airplanes and airports, we see, as cleary as anywhere in contemporary America, the two-edged results of our technological progress. Designed to bring speed and pleasure and efficiency and simplicity to our lives, air transportation has also brought with it a host of new frustrations and complexities and delays and dangers.

It is at that moment when one is circling endlessly over an airport that he begins to ask some of the most penetrating questions about modern technology. The reason that progress has been accompanied by frustration is simple, I believe. Progress has come without adequate planning. In just 10 years, the number of passenger trips made by airlines has tripled, and the use of air freight has been multiplied five times. And because our total transportation systems were not ready for this acceleration, the quality and efficiency of service has, in many cases, declined. Now we discover that similar increases are expected in the next 10 years.

We would be foolish, indeed, if we failed to learn the lesson of the last decade and failed to plan intelligently for the growth that is coming. The President's message provides us with a basis for such intelligent planning. It calls for an increase in the construction of facilities and equipment which is appropriate to the expected increase in demand for air service. It provides, too, for additional research and development so that our technological progress can be equal to the demands of the coming decades. It establishes a principle whereby those who use the airlines and those who run them will see their taxes which are related to air travel applied directly to airport and airway programs.

The President's program is realistic because it anticipates that additional revenues must be generated. The Congress will, I am sure, work closely with the administration to make certain that the formulas which are devised for these revenue sources are realistic.

Intelligent and responsible planning is needed now if we are to reduce the snarls and frustrations which threaten the future of air transportation. The President's proposals deserve our support, for they are both intelligent and responsible.

ADDRESS BY JOHN E. DAVIS, NATIONAL DIRECTOR OF CIVIL DEFENSE, DEPARTMENT OF DEFENSE, TO THE NORTH DAKOTA DEPARTMENT CONVENTION OF THE AMERICAN LEGION

HON. MARK ANDREWS

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. ANDREWS of North Dakota. Mr. Speaker, last week the North Dakota American Legion Convention was held in Grand Forks.

One of the featured speakers at this year's gathering was the Honorable John Davis, former Governor of North Dakota, past national commander of the American Legion, and current national director of civil defense. The major portion of this distinguished man's speech dealt with the immediate need of the ABM.

Because of the interest of my colleagues and the American people and the urgency of this matter, I insert in the RECORD the speech of the Honorable John Davis:

ADDRESS OF JOHN E. DAVIS

I am more than delighted that my first major speaking engagement as National Director of Civil Defense is here at home, before so many old friends and fellow Legionnaires. I felt deep regret, of course, at leaving North Dakota once again, but I could not easily decline the opportunity and the privilege of serving with Secretary Laird and Secretary Resor in the administration of President Nixon.

I have been on the job in Washington less than a month. But I have seen more than enough to make me extremely proud of America's new leadership and its dedication to the basic simple virtues which Americans have cherished since the founding of our Nation.

Americans cherish peace—but peace with honor and justice. This is what we strive for today in our continuous confrontation with the Communist world.

For Americans, Government must be the servant and not the master of our people; so we listen to the views of all, not just a few, as we chart our Nation's course. But we will not confuse freedom to dissent with license to destroy our great national institutions.

We cherish the freedoms for which so many Legionnaires have fought and sacrificed; and for this reason, we insist on a miiltary defense for this Nation second to no other in the world.

As your National Commander in 1966 and 1967, and in my present post, I have concerned myself with the state of our national defenses and with the nature of the threats to our security. I have found no substantial reason yet to convince me that we can drop our guard against aggression. There is, in fact, a need today to further strengthen our defenses.

We are the first generation of Americans to live in an age of nuclear weapons. It is a most perilous age, because while we have mastered the technology of the nuclear weapon, we have not yet been able to establish, in concert with other nuclear powers, the necessary political, social and moral guarantees against its use. This age, these weapons, will be an acid test of our national patience and our determination to do what is necessary and right to preserve our way of life and to provide future generations with some degree of security against the nuclear threat.

In the absence of international agreements to control or banish nuclear weapons our national policy has been one of deterrence—that is, maintaining the offensive strength necessary to destroy an aggressor should he launch an attack against us. And it is true that our nuclear striking power today could survive an attack by all of the nuclear weapons now in the Soviet inventory and still retaliate with a blow which would destroy the Soviet Union as a Nation.

Because deterrence is so necessary to the survival of our Nation, we must make every reasonable effort to protect our retaliatory forces. This is the reason for the decision to deploy the Safeguard ABM System. We see certain trends in Soviet deployments and developmental activities which, if continued, could lead to substantial threats to our nuclear retaliatory forces. First, there is the continuing deployment of the Soviet SS–9 intercontinental ballistic missile which can carry a warhead of up to 25 megatons. And as far as we can see at this time, such a missile would have only one military use—to erode our Minuteman deterrent capability.

At the same time, we are faced with a rapid growth in the Soviet nuclear powered submarine fleet, comparable to our Polaris. Soviet submarine-launched missiles pose a grave threat to our bomber force by cutting the time in which our forces could react to a Soviet first strike.

If these threats materialize, we would be left to rely primarily on our nuclear submarines for our retaliatory force. This is a formidable force and one which we are confi-

dent is safe now from detection and destruction by the Soviets. But we can be sure they are working on ways to counter Polaris. It would be unwise to rely on any single component of our nuclear force to ensure our survival—and it has long been our policy not to do so.

Neither do we believe that Safeguard erodes the possibility of fruitful negotiations for arms control. First, merely by responding to the recent Soviet developments which I have described, we are serving notice that we are prepared to take the necessary steps to ensure our security. Secondly, by responding with a *defensive* system designed so that it shall not escalate the arms race, we have served notice on them that we seek the kind of stability which could be achieved in an arms control agreement.

I am sure this audience is aware that the Defense Department has requested approval of Congress to locate one of our Safeguard installations near Grand Forks Air Base. I believe that it is essential that, not just the immediate situation, not just the cost in dollars, but the long-range threat which I have discussed be very seriously considered in any public debate over the deployment of Safeguard. I know the voice of the Legion will be powerful in speaking out on a matter so essential to our security and perhaps to our national survival.

However important it may be, protection for our missiles is not the most fundamental purpose of our national defense structure. Basically, ultimately, the defense establishment must be concerned with saving the lives of our citizens. This is where civil defense fits into the national security structure.

Civil defense is *the* major element in our national defense program which is solely and directly concerned with saving lives in a nuclear attack. President Nixon touched on this very point when he announced a determination to deploy Safeguard. In response to a question at his March 14 news conference, the President reminded the press that he had ordered a study of the shelter program, and I quote, "to see what we can do there to minimize American casualties." End of quote.

What is our civil defense capability right now?

If the Soviets should strike today, millions of Americans could be killed by the blast and fire effects of the attack. But tens of millions more would survive blast and fire and face the hazard of radioactive fallout. Our present civil defense system—based on a system of public fallout shelters supplemented by home shelter—could save these millions of Americans—and what I am talking about is the lifethread of our Nation.

Furthermore, fallout protection for our population can be purchased at such low cost, in terms of today's defense expenditures, that it would be difficult to explain why the Nation should not take this simple, inexpensive, logical step toward giving our people a maximum chance to survive in a nuclear war.

We've got to look on civil defense as the low-cost insurance we take out, as a Nation, to guard against the perhaps improbable, but certainly not impossible event of nuclear war or nuclear accident.

We must not accept the premise advanced by some, that because fallout shelters will not save people from blast and fire, we should abandon efforts to save those millions whose lives can be saved by such pragmatic and inexpensive civil defense measures. We do not abandon our fire departments because firemen are sometimes unable to save burning buildings, and we should not allow the national civil defense effort to be degraded by "all or nothing at all" demands.

In the short time during which the national civil defense program has been my responsibility, I have not absorbed all of its many and complex details, but one of the principles we must follow has become immediately apparent to me. The program must be carried out by a close partnership of the Federal, State and local governments, working with private institutions, the schools, industry, commerce and voluntary service organizations such as the Legion.

From personal experience, I know how loyally the Legion has supported the national civil defense program before Congress and other national leadership groups, and at the local level.

As National Commander in 1967, I sent letters to each one of the 17,000 Post Commanders in the United States, calling on them to support local civil defense shelter plans. I saw the 1967 convention reaffirm our concern for civil defense and specifically ask Departments, Districts and Posts to urge building owners of qualified buildings to cooperate by licensing their structures as public shelters. At the same time, the convention called on Congress to restore funds cut from the civil defense budget.

More importantly, Legionnaires at the Post level have made significant contributions of time and energy to local civil defense projects such as licensing and stocking public shelters. I earnestly hope for the continued cooperation and assistance of The American Legion in the complex tasks that lie ahead.

As a Governor, I became well aware of the role of civil defense in natural disaster. I have been impressed by the reports that came into the Pentagon about civil defense action in Ward County to evacuate, feed and shelter the victims of the April floods. I intend to be continually alert to see how our efforts to help local civil defense prepare for nuclar emergencies can provide better benefits in readiness to cope with natural disasters.

I am hopeful that more can be done by the Federal Government and perhaps by my agency, to aid communities threatened or struck by floods, hurricanes, tornadoes, forest fires and other peacetime catastrophies. Upon taking the office of National Director, I was naturally curious to get a first hand report on the status of civil defense in my home state. I have learned that the shelter surveys of the Office of Civil Defense turned up excellent results in North Dakota. This county of Grand Forks, for example, provides more than enough approved public shelter space for its population.

In the rural areas of the State, OCD's home shelter survey indicated that significant shelter exists in homes with basements to make up for deficits in large, public shelter space. And our Community Shelter Planning program is well under way in the state to explain to every citizen what to do and where to go in a nuclear attack emergency or, in other words, to make sure that shelter is used effectively if it is ever needed.

Not all of our States and communities are so fortunate. For some time to come, the Nation will face a shortage of shelter space because not all the spaces found are located where they are needed. We find an overabundance of space in downtown areas and shortages in the suburban and rural areas of the Nation.

OCD is attacking this problem through intensive research and development of low-cost shelter design techniques and through a constant appeal to builders and architects to plan for shelter areas in new building projects. In our budget for Fiscal Year 1970, we have requested Congress for authority to make small payments to building owners based on the extra expense they may incur in providing shelter in their buildings. We hope for an increase in our financial contributions to the States and localities to help them meet the rising costs of local programs.

We will continue to build up our national warning capability, to help in the establishment of emergency operating centers for government officials and to provide improved training and professional development programs for local civil defense personnel.

I have said that this is a most perilous age. This is all the more true because none of us likes to think about the prospect of nuclear war. Some of us tend to hope that if we don't look at it, it will go away. Others will argue that our resources are too limited to afford the defenses that we need.

I believe that any potential aggressor must be made to understand that we will not rely on speculation and wishful thinking alone to deter an attack.

If we were to chart the facts about Soviet weapons development alongside of our own steps in this field in the past few years, I believe we would find a definitely ascending curve on the Soviet side compared with a stationary, if not descending curve in our own development effort. Coming at this point in time, Safeguard represents a minimum, nonprovocative, essential step to preserve a reasonable balance between the great nuclear powers.

To those who argue that America's resources are too limited to support an adequate defense and carry on our vital domestic programs, I can only say that the modern history of the United States has been mainly the story of a nation superbly capable of marshalling resources to meet a severe threat or an actual emergency. I think I need only point to the landing in Normandy 25 years ago this month to recall the sacrifices we are capable of in defense of our country.

Let me say, in conclusion, that while we must be realistic about the facts of nuclear life, we need not be pessimistic. There is hope for meaningful negotiations between the United States and the Soviet Union to place some limitations on arms development.

I believe, however, that we must exercise great patience and negotiate from a position of strength. I further believe that this administration has the leadership and the vision and the dedication needed to improve the chances for peace, to make this a safer world for us and our children. I ask you to give our President and all our leaders your full support to achieve this goal.

JACKSONVILLE, FLA., SHERIFF IMPROVES POLICE IMAGE

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. BENNETT. Mr. Speaker, Sheriff Dale Carson of Jacksonville, Fla., is one of our Nation's outstanding law-enforcement officials. A former agent of the Federal Bureau of Investigation, Sheriff Carson has introduced a "police youth patrol," which will help bridge the gap between young people and police officers.

Sheriff Carson is attacking the generation gap and he seeks to give the youth of Jacksonville an important outlet for communication and discussion with adults. I applaud this idea of a "police youth patrol," and commend to your attention an editorial from the June 17, 1969, Jacksonville Journal, which I insert in the RECORD at this point:

YOUTH PATROL GOOD IDEA

Sheriff Dale Carson's proposed Police Youth Patrol is an imaginative idea that should pay off.

Police-community relations are of concern in nearly every major city these days.

Law enforcement officers are often bitterly accused of unspeakable assaults on personal freedoms and human dignity and as often stoutly defended as the sole remaining bul-

wark against a threatening tide that would sweep the nation to eternal perdition.

Neither image is entirely true, of course.

Police are human, like the rest of us. Their patience is often sorely tried and sometimes they are overzealous in the performance of their duties. They make mistakes.

But for the most part they are men trying to do a difficult job as best they know. Their responsibilities are great and the debt most of us owe to them is correspondingly large.

They are not enemies of society or even of individuals within it—or not the law-abiding ones, at least.

They are certainly not the tools of repressive government—out to break the back of any legitimate, peaceful dissent or protest movement.

Carson's plan, which calls for a close association between individual youths and policemen who are going about the business of performing their duties, should help to correct the distortions in the image.

His big problem will be in persuading those who have the most inaccurate image that they need to participate. Most of them probably will be firmly convinced that they are completely justified in thinking of policemen as pigs and that the whole idea is to somehow brainwash them.

If he can succeed in this, however, the experience will straighten out a lot of thinking.

"I am of the opinion," the sheriff said, "that if the young people could see that we spend more than 90 percent of our time helping people and less than 10 per cent of our time arresting people they would have a clearer understanding of our position in society."

We are of the same opinion. And we wish the sheriff well in his undertaking.

TRIBUTE TO MRS. EDWARD F. McMANUS

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. BOLAND. Mr. Speaker, I am pleased to advise my colleagues of a well-deserved and outstanding honor that was recently bestowed on one of my constituents, Mrs. Edward F. McManus of Palmer, Mass.

Recently she was selected as one of only four high school teachers from across the Nation to receive a Distinguished Secondary School Teaching award at Harvard University.

In writing to advise Mrs. McManus of her selection Dean Fred L. Glimp wrote:

You were nominated for this honor by Thomas Francis Rooney of the Class of 1969, and you were warmly supported in this nomination by your school administration and associates. The Harvard Faculty Committee responsible for selecting the recipients of the awards judged you to be representative of the finest traditions of your profession.

In receiving the award which included a generous cash payment, Mrs. McManus received the following citation:

MARY McMANUS

Mary McManus, housewife, mother, inspired teacher, first citizen of Palmer, Mass. Her intellectual standard is rigorous; her range of sympathies, extraordinary. Knowing the power of both the oral and the written word, she has shown countless young people how great literature may enrich their lives.

My colleagues will note that, in addition to praising Mrs. McManus' teaching skills, Harvard also took note of her outstanding citizenship. I am in a position to confirm that appraisal. Although I take some partisan pride in her active participation in the Democratic town committee, it must also be noted that she has long been a trustee of the Palmer Public Library. Further, since the recent tragic fire in Palmer with its drastic effects on employment and the general economy, Mrs. McManus has been a driving force in the recently formed Overall Economic Development Committee of Palmer that is doing a great deal to revitalize that community.

And so, Mr. Speaker, you and my colleagues can see why I take such pride in her accomplishments. Mary McManus is not only an outstanding teacher; she is truly the "First Citizen of Palmer."

I insert in the RECORD at this point a recent story in the Springfield Union about Mrs. McManus' achievement.

PALMER ENGLISH TEACHER TO GET HARVARD AWARD

PALMER.—Mrs. Mary McManus, English department head at Palmer High School, will be one of four teachers from across the country to receive a distinguished secondary school teaching award at Harvard University.

She was chosen by the Harvard faculty committee as representative of the finest traditions of the teaching profession.

Mrs. McManus was nominated by Thomas F. Rooney, an alumnus of Palmer High and a senior at Harvard. Mrs. McManus was his English teacher during his high school years.

The award will be presented to Mrs. McManus June 11 at a reception and dinner in the Harvard Faculty Club. She will be recipient of a certificate of award, together with a check for $1200. She also will be invited to attend the Harvard commencement exercises June 12.

Mrs. McManus has taught at Palmer High since September of 1956 and was made English department head March 1, 1964. Before coming to Palmer, she spent five years teaching Latin and English at Warren High School.

CIVIL DEFENSE MEETS BUDGET DISASTER

HON. SAM STEIGER

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. STEIGER of Arizona. Mr. Speaker, recently I have received from my district a number of letters taking bitter and even violent exception to the cuts made by the Bureau of the Budget on Civil Defense funds for fiscal year 1970.

Some of these letters were from old friends of mine, men whose opinions I value and respect.

One letter which I insert in the RECORD at the conclusion of my remarks illustrates why the funding proposed by the Bureau of the Budget—approximately $75.3 million, or 15 percent more than has been recommended by the Appropriations Committee—is insufficient to maintain an on-going program in Arizona at even the level of fiscal year 1969. It would not permit inclusion of any of a number of local governments in Arizona that wish to join in the civil defense program and would probably result in a reduction in the level of civil defense activities by municipalities, towns, and counties that have been in the program for years.

Let me quote just a few lines from this letter to illustrate how these people feel about the cut in civil defense money:

In the area of supplies, you will note that, again, 1963 offered the top funding in this area. There are many items of equipment that are absolutely and completely necessary for efficient operation during a catastrophe. True, many of these items can be used from day to day; i.e., mobile radio equipment, mobile warning systems, search and rescue equipment, etc., but almost invariably these items will not be acquired by any small political subdivision or entity because they are not absolutely essential for day-to-day use. The plain fact is that they can be done without in normal operations of cities and counties, but the day that disaster strikes, the lack of these items will cause tremendous loss of life.

Referring only to so-called matching funds, I am assured that $1 of Federal matching funds for civil defense may generate as much as $10 in State and local funds and services devoted to the same purpose.

I have the greatest respect for the capable and very hard-working members of the Committee on Appropriations. However, I must confess that I find myself at a loss to understand the reason for the continued reduction in funds for the National, State, and local civil defense programs.

The letter referred to follows:

ARIZONA CIVIL DEFENSE AND DISASTER ASSOCIATION,
Prescott, Ariz., April 22, 1969.

Congressman SAM STEIGER,
126 Cannon House Office Building,
Washington, D.C.

DEAR SAM: Reference is made to the letter of 8 April 1969 from Paul Rosenblatt and the enclosure therein.

Specifically, I should like to take violent exception to this enclosure which was in the form of a letter directed to you from one Joseph Laitin, Assistant to the Director of the Bureau of the Budget. To say that this is one of the most inane, naive, and just plain stupid letters that I have ever had the misfortune to read, is putting it mildly. This letter not only answers nothing but presents only a small portion of the problem. If you view the overall picture, this letter in itself answers very clearly and points up the exact problems which I have brought to your attention in previous correspondence.

Let's take the letter step by step. First, let us look at the funding in the table contained in this letter. If you will look at the Personnel and Administrative Expenses, you will note that the funding in 1968–69 and proposed funding for 1970 is approximately a 5% increase. This does not cover by any manner or means the increment raises that are generally granted for cost of living increases. It also leaves no room for increased Civil Defense activity and does not even permit the adoption of Civil Defense budgets by political entities that have heretofore not been tied to Civil Defense activity. For instance, right here in Yavapai County there are several cities that are looking to increase their Civil Defense activity as part of their constitutional and charter directives. These cities can expect no funding from the Personnel and Administrative Expenses under the present budget.

Right at this time, instead of expanding Civil Defense activity, the State Office of Civil Defense and Emergency Planning is looking to means to curtail the program due

to lack of funding. A priority system is being established that will offer first, funding to joint City-County operations, followed by County operations, City operations, etc. There is simply no way, with today's increased costs, that even the Personnel and Administrative present level can be continued. There should be at least a 15% increase in Personnel and Administrative Expense in the budget.

Next, we move to Emergency Operations Centers. These are essential for adequate direction and control in the event of any emergency or disaster, nuclear or otherwise. Maximum funding for these was reported in 1963 as in the letter. Nevertheless, there was sufficient funding in 1967–68 to continue the program as more states, cities and counties recognized the need for Emergency Operations Centers, either through experience or through other means, and they continued to be developed. Such was the case in Pavapai County. Our experience in the disaster period of 1967 clearly indicated the absolute necessity for an Emergency Operations Center in the Verde Valley. We proceeded to develop this center along the guidelines established by the Office of Civil Defense and it was funded accordingly by the county with the anticipation of matching funds as indicated by members of the Office of Civil Defense Region 7 during predevelopment conferences. When the first phase of the operation was completed we found that there was no funding available for the completion of the project. The entire development was dependent uopn the Federal Funding as provided in the Civil Defense Act. With the reduction of the budget in 1969 by more than 50%, we were left "holding the bag." Such has been the case in many other states, counties and cities throughout the country.

Under the present proposed budget for fiscal year 1970 there is no relief in sight. Many programs will have to be dropped. This, we feel, is a complete disservice to the public and will leave them virtually defenseless in the event of nuclear catastrophe.

In the area of supplies, you will note that, again, 1963 offered the top funding in this area. There are many items of equipment that are absolutely and completely necessary for efficient operation during a catastrophe. True, many of these items can be used from day to day; i.e., mobile radio equipment, mobile warning systems, search and rescue equipment, etc., but almost invariably these items will not be acquired by any small political subdivision or entity because they are not absolutely essential for day to day use. The plain fact is that they can be done without in normal operations of cities and counties, but the day that disaster strikes, the lack of these items will cause tremendous loss of life. Furthermore, this program alone was the Heart of the Civil Defense Operation. To be basic, it attracted City Councils and Boards of Supervisors to extend their Civil Defense operations because it meant the acquisition of equipment that ordinarily would be unobtainable. A small part of this program was the acquisition of surplus property on a matching fund basis. This has been totally discontinued.

The statement in Mr. Laitin's letter regarding a grant of $3,000,000 to a single state or county in one year is totally irrelevant and has no bearing on any facts contained within any of our correspondence. It is readily apparent that he did not read or perhaps did not understand the simple language of our letter. We merely mentioned that $3,000,000 of State, City, and County funds will go unused in fiscal year 1969 because appropriated as matching funds for Federal matching funds in like amount. This amount covered the entire United States, not one state, as Mr. Laitin stated.

The balance of Mr. Laitin's letter is just so much "gobbledygook" and it says absolutely nothing. We can find no relationship between the ABM System and attempts on the part of Civil Defense to assure national survival of the people of this nation.

Again, we say that this letter is a perfect example of the double-talk of Government in attempting to do a "snow job" and avoid rocking the boat.

Our only comment on page 2 of this letter is to state that the third sentence in paragraph three "While Civil Defense budgets have been reduced, we believe they are sufficient to provide for a creditable Civil Defense program." is totally without foundation. The Civil Defense program is crippled; it is staggering, and it will collapse unless Congress and the President of the United States take steps quickly and forcibly to prevent it. Civil Defense, under present world conditions, is the only certain means available at our command which will assure maximum survival in the event of nuclear holocaust.

With respect to Mr. Laitin's comments on the staffing of the Federal Civil Defense, we again draw to your attention the fact that the personnel levels are not consistent with the present administration of the program. At regional levels, the personnel generally are approving programs for which there is no funding or disapproving programs which have merit. All such approval or disapproval is granted after the particular situation has been thoroughly studied at state level. It is at state level that the approval or disapproval should come. These are the people that are concerned with the problems and the great mass of governmental directions in the form of directives, guides, pamphlets, etc., can do little or nothing to change the situation as it exists at the state and local level. Many of these people perform functions that have already been researched by state staffs; hence the duplication of effort. Furthermore, nine times out of ten, it is the people at state level who influence the people at Federal level to approve projects that are not only needed but necessary for a complete Civil Defense program.

In closing, I should like to clearly state that in no way do we concur with the final sentence of Mr. Laitin's letter. The information furnished does not, in any way, satisfy your constituents, the people of the State of Arizona, and I am not talking for myself alone but for the members of the Arizona State Civil Defense and Disaster Association. We are alarmed and concerned at the situation and fully expect you and the other elected representatives to the Congress of the United States from the State of Arizona to do everything within their power to alleviate this situation before it becomes another "lost cause."

It would be appreciated if you would contact Paul Fannin, Barry Goldwater, John Rhodes and Mo Udall and furnish them with copies of this letter.

Thank you for your continued interest and cooperation. It is sincerely hoped that something will be done to correct the inadequacy in the Civil Defense program prior to the final adoption of the fiscal year 1970 budget.

Kindest personal regards.

Sincerely,

WILLIAMS H. BEERS,
President.

AHEPA YOUTHS TO PROMOTE U.S. FRIENDSHIP WITH GREECE

HON. PETER N. KYROS

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. KYROS. Mr. Speaker, the Order of AHEPA—American Hellenic Educational Progressive Association—has initiated many commendable projects and programs promoting friendly relationships between the people of the United States and the people of Greece. Since its establishment in 1922, the Order of AHEPA has been cited many times by our Government for its contributions in the field of international affairs. The fraternity now has 780 local chapters and auxiliaries located in the United States, Canada, Australia, the Bahamas, and Greece.

This summer, the Order of AHEPA is offering two programs through which young Americans will have the opportunity to establish lasting friendships with the youths of Greece while steeping themselves in the traditions of Western civilization. I would like to bring these two excellent projects to the attention of my colleagues, for under these programs, 244 American high school students will travel and study in Greece, visiting many sites of archeological, historical, religious, and cultural significance.

One hundred of these students have been awarded scholarships under the AHEPA-Anatolia College summer in Greece scholarship program. These students will attend 6 weeks of classes at the Anatolia College of Salonika, which is an American school supported by American contributions. They will study the Greek language, history, heritage, and modern institutions; they will also take weekend field trips to sites such as Phillipi and Mount Olympus. In addition, these youthful ambassadors of American friendship will live in Greek homes for 5 days, learning the ways of Greek living while conveying our good wishes and strengthening the strong ties between the American and Greek peoples. Their stay in Greece will end with a tour of Athens and a number of Greece's historic cities and isles.

The AHEPA-Anatolia program proved to be so popular that the AHEPA youth summer in Greece program was established to bring 144 additional American students to the cradle of western civilization. These youths will spend 5 weeks in the vicinity of Athens and will benefit from many study and sightseeing programs.

I would like to commend the AHEPA Educational Foundation and AHEPA's supreme president, Gus Cherevas, for their dedicated work in establishing these two programs. I would also like to congratulate the 244 students, who are members of the Orders of the Sons of Pericles and the Maids of Athens, for their academic records which entitled them to be selected for these activities. I wish them all a pleasant and interesting summer.

A BILL TO AMEND THE AGRICULTURAL MARKETING AGREEMENT ACT OF 1937

HON. EDWARD JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. JONES of Tennessee. Mr. Speaker, I recently introduced a bill amending

the Agricultural Marketing Agreement Act of 1937, as amended, to make needed changes in the authority to incorporate class I base plans in Federal milk marketing orders.

This legislation has the strong support of the Nation's dairy farmers.

The present authority has been used for a class I base plan in only one marketing area. This one base plan is in dire need of revision, which can only be accomplished under the proposed legislative authority. Moreover, dairy farmers in other marketing areas are desirous of developing base plans, but cannot do so until the revised legislation is enacted.

My bill, H.R. 11853, would revise the authority requested by representatives of the National Milk Producers Federation, which speaks for the Nation's dairy farmers.

First, the bill removes the termination date. It takes time to develop a plan. Dairy farmers are reluctant to develop a plan which may be terminated even before it is put into operation. To operate to best advantage under such a base plan, many farmers would adjust their farming operations. This they cannot do for a period limited by a termination date.

Also, the bill improves the methods under which new producers may obtain bases and allows established producers to share equitably in the benefits of market growth.

This bill would authorize the use of histories of marketings by dairy farmers, not limited to a single period of time, so that bases can be updated. New producers would be able to obtain bases in a fair manner and thereafter participate in the same manner as established producers.

The bill also provides for the reduction of bases to producers who fail to deliver milk allocated to them in proportion to the share of sales, for their benefit.

These changes are needed to allow dairy farmers to develop base plans, which are consistent with their needs.

The purpose of a base plan authorized by this bill is to enable farmers to know just how much milk they can market and receive a price for it closely related to the class I—fluid milk—price. By knowing this, they can plan production. This prevents the artificial buildup of milk production by a farmer in order to obtain a maximum size base.

The base plan applies only to the distribution of money among dairy farmers supplying Federal milk marketing orders, and involves no cost to the Government.

It took nearly 2 years to put the first base plan into operation under the original base plan legislation. Because of the time required to set up such a plan, it is important that this legislation be passed as soon as possible.

WORLD TRADE OPPORTUNITIES

Hon. PETER H. B. FRELINGHUYSEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. FRELINGHUYSEN. Mr. Speaker, I should like to call my colleagues' attention to the United Nations development program report of 1968, and an article in the May 5, 1969, issue of International Commerce by John L. Malone. This material gives an example of the valuable role of the United Nations, in cooperation with private American firms, in speeding the process of economic growth in the underdeveloped nations. The material follows:

WORLD TRADE OPPORTUNITIES—UNDP APPROVED PROGRAMS OFFER GOOD PROSPECTS FOR ELIGIBLE U.S. BUSINESSMEN

(By John L. Malone)

The Governing Council of the United Nations Development Program (UNDP) recently approved a record number of new development programs. Projects approved at this session include many large-scale preinvestment prospects involving the training of specialists in research and economic planning in agriculture, industry, public utilities, housing, health and sanitation education, building and physical planning, social welfare, public administration and other economic services; mineral, water, land, fishery and various natural resources surveys.

Projects approved at the last session, which was held in January, as well as future UNDP projects for developing countries are carried out by the United Nations and 14 other participating and executing agencies.

Firms interested in availing themselves of these potential opportunities under the auspices of the UNDP should, after reviewing data contained in a narrative summary available from International Liaison and Trade Opportunities (ILTO) Staff, BDSA–541, U.S. Department of Commerce, Washington, D.C. 20230, direct their inquiries to the relevant executing agency (this summary is known as Stage 2).

A list of the participating and executing agencies and their addresses follow:

UN/United Nations—Director, United Nations Technical Co-Operation Office, Department of Economic and Social Affairs, United Nations, New York, N.Y. 10017.

ILO/International Labour Organization—Chief, Field Department, International Labour Organization, 154 Rule de Lausanne, Geneva, Switzerland.

FAO/Food and Agriculture Organization of the United Nations—Assistant Director General, Programme and Budget, Food and Agriculture Organization of the United Nations, Cia delle terme di Caracalla, Rome, Italy.

UNESCO/United Nations Educational, Scientific and Cultural Organization—Director, Bureau of Relations with International Organizations and Programmes, United Nations Educational, Scientific and Cultural Organization, Place de Fontenoy, Paris, VIIe, France

ICAO/International Civil Aviation Organization—Director, Technical Assistance Bureau, International Civil Aviation Organization, International Aviation Bldg., 1080 University St., Montreal 3, Canada.

WHO/World Health Organization—Deputy Director-General, World Health Organization, 20, Avenue Appia, Geneva, Switzerland.

IBRD/International Bank for Reconstruction and Development—Projects Department, Development Services, International Bank for Reconstruction and Development, 1818 H St., NW., Washington, D.C. 20453.

ITU/International Telecommunication Union—Chief, Technical Co-operation Department, International Telecommunications Union, Place des Nations, Geneva, Switzerland.

WMO/World Meteorological Organization—Chief, Technical Co-operation Division, World Meteorological Organization, 41, Avenue Guiseppe Motta, Geneva, Switzerland.

IAEA/International Atomic Energy Agency—Deputy Director-General for Technical Assistance, International Atomic Energy Agency, Kaerntnerring 11, Vienna 1, Austria.

UNIDO/United Nations Industrial Development Organization—Director, Technical Cooperation Division, United Nations Industrial Development Organization, Felder Laws, Felder Strasse, Vienna, Austria.

UPU/Universal Postal Union—Schoshaldenstrasse 46, Berne 3000, Switzerland.

IMCO/Inter-Governmental Maritime Consultative Organization—22 Berners St., London, W.1, England.

IADB/Inter-American Development Bank—1818 H St., NW., Washington, D.C. 20453.

ADB/African Development Bank—Abidjan, Ivory Coast.

UNITED NATIONS DEVELOPMENT PROGRAMME (SPECIAL FUND)

Total U.S. contract awards in 1968 within the total U.N.D.P. program:

Total contracts	14
Amount awarded	$3,789,000

Cumulative total contracts awarded to U.S. contractors, including 1968:

Total contracts	80
Amount awarded	$16,506,000

UNITED NATIONS DEVELOPMENT PROGRAM (SPECIAL FUND)

AMERICAN FIRMS AWARDED SUBCONTRACT, WITH TOTAL COST OF AWARDED CONTRACT, COUNTRY AND PROJECT DESCRIPTION (1968 CONTRACTS ONLY)

Headquarters (country) and name of contractor	Cost of contract (U.S. dollars)	Location, name, and agency of project
United States:		
Battelle Institute	65,000	Pakistan: Pre-Investment Studies for the Promotion of the Fertilizer and Petrochemical Industries (UNIDO).
Louis Berger, Inc. (in association with KAMPSAX, Denmark).	1,625,000	Indonesia: Highway Assistance and Transport Co-ordination Study (IBRD).
Development and Resources Corp.	479,000	Afghanistan: Khnduz—Kkanabad Irrigation Feasibility Study (FAO).
Ellicott Madi Corp	94,500	Yugoslavia: Pilot Land Reclamation Project on the Lower Neretva (FAO).
Fairbanks Morse International Inc.	406,300	Romania: Establishment and Operation of Pilot Irrigation Stations in the Danube Plain (FAO).
United States—Continued		
Geophysical Service Inc.	480,000	Trinidad and Tobago: Seismic Survey in the Marine Area between Trinidad and Tobago (U.N.).
Geoscience	170,000	Poland: Sub-Surface Exploration for Potassium Salts (U.N.).
GTS Corp	37,800	India: Institute for Petroleum Exploration Dehra Dun (Phase II) (U.N.)
National Lead Co	3,000	Bolivia: Centre for Petroleum Development Santa Cruz (U.N.)
Roscoe Moss Co	13,400	Bolivia: Feasibility Study and Demonstration of Agro-Industrial Development in the Abapo–Izazag Region (FAO)
Stanford Research Institute	296,400	Regional (Africa): Survey of Transport Studies in Africa (IBRD)

UNITED NATIONS DEVELOPMENT PROGRAM (SPECIAL FUND)—Continued

AMERICAN FIRMS AWARDED SUBCONTRACT, WITH TOTAL COST OF AWARDED CONTRACT, COUNTRY AND PROJECT DESCRIPTION (1968 CONTRACTS ONLY)—Continued

Headquarters (country) and name of contractor	Cost of contract (U.S. dollars)	Location, name, and agency of project
United States—Continued		
Theodore Riedeburg Associates	30,000	Rwanda: Pilot Plant for Industrialization and Pyrethrum Production, Mukingo (UNIDO).
Tuoluene Corp	48,300	Guatemala: Pre-Investment Study on Forestry Development (FAO).
United States—Continued		
U.S. Air Force	40,000	Regional (Americas): Eradication of the Mediterranean Fruit Fly (IAEA).

MAJOR ORDERS FOR SUPPLIES AND EQUIPMENT AND CONTRACTS AWARDED TO U.S. FIRMS, INCLUDING NAME OF SUPPLIER AND TOTAL COST OF CONTRACT AWARD

Country and name of supplier	Cost of order (U.S. dollars)	Description of equipment
United States:		
Acker Drill	17,284	Drilling equipment.
American Coldset	14,073	Do.
Ann Arbor Instrument Works Inc.	14,413	Machine-tool dynamometer.
Jarrel Ash Co	36,598	Atomic absorption spectrometer.
Beckman Instruments	40,560	Spectrophotometer.
Bendix International	31,195	Instruments.
Bisset Berman Corp	10,053	Fishing equipment.
Carrier International Ltd	17,704	Air-conditioning equipment.
Cenco	12,968	Physics laboratory equipment.
Chrysler Corp	50,090	Vehicles; boats.
Collins Radio Co	11,193	Telecommunication equipment.
Deere & Co	38,209	Agricultural machinery.
Digital Equipment Corp	52,500	Data processing equipment.
Denver Equipment	10,970	Gyratory crusher.
Dukane Corp	13,792	Language laboratory.
Eastman Kodak Co	12,214	Microfile equipment.
Export Oil Field	32,512	Drilling equipment.
E. J. Longyear	11,313	Do.
Marine Construction & Design Co.	22,278	Fishing equipment.
Motorola Communications International Inc.	11,314	Telecommunication equipment.
Owens Illinois	24,698	Laboratory equipment.
Perkin-Elmer	11,679	Gas chromatograph.
Pensalt Chemical	13,306	Freeze dryer.
Picker International Corp	42,659	X-Ray diffraction and fluorescent equipment.
Prater Pulverizer Co	28,163	Agricultural machinery.
Radio Research	20,482	Mobile radar.
Raytheon Inc	104,140	Radar parts.
Sabin St. Germain	19,741	Testing machine.
United States—Continued		
Scott-Engineering Sciences	34,386	Thermodynamics and refrigeration training equipment.
Singer Co	10,850	Spectrum analyser.
Soiltest Inc	10,365	Engineering laboratory equipment.
Speedstar Division	17,312	Drilling equipment.
Sprague & Henwood	39,314	Wireline equipment.
Tektronix Inc	10,282	Oscilloscopes and accessories.
Uniflow Manufacturing Co	15,123	Freezing plant.
Victoreen Instrument Co	15,672	Ionization chamber.
Westinghouse Air Brake Co	55,214	Drilling equipment.
Fisher Scientific Co	22,817	Chemical laboratory equipment.
Fort Motor Co	27,231	Vehicles; drilling equipment.
Fortune Electronic	83,148	Photographic equipment.
General Electric	10,799	Dynamometer.
General International Export	19,545	Engineering laboratory equipment.
General Motors	60,617	Vehicles.
General Precision System Inc	12,216	Aircraft.
Geophysical Instrument	39,938	Geophysical equipment.
W. & L. Gurley	11,763	Hydrological instruments.
Halliburton Co	17,709	Autoclave.
Haver-Lockhart Labs	14,844	Clinical and surgical equipment.
IBM	708,108	Electronic data processing.
Jeep, pickups	33,397	Vehicles.
Kaiser Jeep International Corp.	31,200	Do.
Kay-Fries Chemicals, Inc	10,200	Torula yeast.
Lab Cage, Inc	11,366	Laboratory cages and accessories.
Leopold & Stevens	32,904	Hydrological equipment.
Lewis Refrigeration	13,125	Laboratory freezing equipment
Leyland Motor Co	62,486	Vehicles.

HEARINGS ON STUDENTS FOR A DEMOCRATIC SOCIETY

HON. RICHARD (DICK) ICHORD

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. ICHORD. Mr. Speaker, the House Committee on Internal Security for the past 3 months has been investigating intensively the revolutionary nature and activities of the Students for a Democratic Society and is presently conducting its second hearing, the first basically on activities at Georgetown University here in Washington, the second on Kent State University at Kent, Ohio.

This morning Dr. Robert I. White, president of Kent State, reiterated a point which has come up time and time again with regard to campus disorders.

Dr. White testified that the SDS made its initial attempt to disrupt the normal processes of the university on November 13, 1968. He commented:

After several days of propagandizing, they were successful in forming a pre-planned and much hoped for (i.e., on the part of S.D.S.) coalition with the Black United Students (B.U.S.). The focal point of their combined efforts was the disruption of an Oakland Police recruiting visit.

He continued:

While the recruiting activity was temporarily disrupted and while campus tensions were on the fringe of large scale disorder for several days, it should be noted that all students desiring to be interviewed did so, that there were no serious outbreaks of violence, that there was no destruction of University property. After this initial confrontation, much to the credit of B.U.S., they proceeded without alliance and pursued their grievances in an orderly and constructive manner.

It was Dr. White's next sentence which has been the thread which showed up in the Georgetown hearing and again today in the Kent State hearing. His comment was:

Unfortunately, some aspects of the Oakland Police confrontation were distorted in the public press.

This concerns me a great deal for, as you know, one of the Nation's, indeed, the world's leading schools of journalism, that of the University of Missouri, is located at Columbia in my district. Just a few days ago, one of the eminent members of that faculty, Dr. John C. Merrill, whose recent book, The Elite Press, is getting international attention, chanced to speak at Marymount College in nearby Alexandria, Va.

He made this comment:

Minority and eccentric views and news get disproportionate coverage. I think what we have presently is a "reality" gap. The press' picture of what's going on is quite different from what's really going on.

Dr. Merrill continued:

It is quite natural that there is a credibility gap, and it is not all the government's fault. The press bears responsibility for much of it. The American people can't tell from the press what the majority of campus students and faculty are thinking and doing. But we know every time an SDSer picks up a picket sign or sits outside a dean's office.

Much of what the press reports may be part of what's going on, but it gives the wrong emphasis or picture. It may be truth but is not the whole truth, or even an attempt at a balanced truth.

Dr. Merrill's comment bolsters what I have long contended—and I am glad to see the universities, especially my own alma mater, and our academic journalists speak up on the matter. One of the great needs of the press and the country is for a more balanced perspective in the reporting of campus violence.

Dr. Merrill believes the press presents a fragmented, crazy-quilt view of the world, playing up negative aspects. He says the mass media need not be trapped into using anything because it is "news." I could not agree with him more.

Dr. Merrill, billing his remarks to Marymount students under the title, "The Press and Social Upheaval," he judged that the press is being used by loud, active minority groups and is presenting the atypical to make it appear as the typical. He described it thus:

The press naturally tends to overstress the sensational, noisy, atypical, loud, colorful, unusual. This usually means the minority activities in society.

The press, he says, allows itself to be used by skilled propagandists, extremists, bigots, and revolutionaries—and it is the latter with which I, as chairman of the Committee on Internal Security, am

particularly concerned. Dr. Merrill explained:

These propagandists know the press feeds on sensation, the lurid and the irresponsible statement and act. They are playing the press like a master musician plays a piano.

The press' role in reporting upheavals, Dr. Merrill said, "was good quantitatively but not qualitatively." Correlative to this, he made this point:

News executives can always select—in effect they define news by what they select. If they don't use a story about 30 students sitting in front of a dean's office, in a sense it is not news.

He believes further—and I can only concur—that overplay of riots and demonstrations is contagious.

"Too much coverage of explosive but isolated incidents simply spreads them," he declared:

A TV program can make it look as if the entire student body and faculty are behind SDS, for instance, when actually there are perhaps only 100 out of 15,000.

There is no doubt in my mind that expectation of media coverage affects events. Some events are even called off when no news media are present.

He asserted that TV cameras are no more "objective" than newspaper or magazine reporters. He continued:

TV generally is far more dangerous to social stability than the press. It is more dramatic, more selective, more superficial, more stimulative, more action-filled. It is less complete, less interpretive, less fair. Television makes a pretty poor showing generally as a complete news medium. It's really an entertainment medium and is geared to that purpose.

Dr. Merrill said he was not exonerating newspapers:

They make a pretty poor showing, generally. They still are more interested in scoops, even when TV is sure to beat them. They still present an undigested, unsynthesized version of reality. They give snippets—bits and pieces—of news and views.

Dr. Merrill said minority extreme groups trying to destroy and disrupt society need to be put in proper perspective and exposed by mass media. He specifically mentioned SDS, which he referred to as Students for the Demolition of Society.

He asserted that the mass media currently are contributing to the social upheaval "by giving loud, atypical, dangerous persons TV and press space—thereby saying, in effect—

These are important people. Generally they are simply paranoid persons, would-be or actual authoritarians feeding off publicity and notoriety.

Professor Merrill also accused the mass media of helping to "create" a generation gap through playing up differences, of perpetuating an aura of suspense, promise of worse things to come, and by "legitimatizing revolution as what is bound to happen."

Dr. Merrill concluded that social upheaval can be quite dangerous to the whole society unless channeled into nonviolent, peaceful dialog, and democratic solutions.

"The mass media must concern themselves with consequences to society—and even to themselves—of the extreme elements," he said:

In these days of social upheaval, the mass media are not doing a good job in reporting or giving meaning to it all. They must do better or their days are numbered.

The mass media had better wake up before they create a monster that will tear apart our whole social fabric, including the mass media.

Dr. Merrill's warning is not one to be taken lightly. In light of the testimony and facts which have come before the Committee on Internal Security, in view of the tragic reports of campus disorders which have blotted the campuses across this country, I hope the mass media do wake up before this monster is created, or if it is already created, before it moves out to grasp our entire society within its maw.

There is one real ray of hope in all this. I understand Dr. Merrill was given an ovation by the students at Marymount College who heard him. This gives me great hope. I hope the other great schools of journalism throughout this country give Dr. Merrill's words and advice the attention they deserve.

RULES FOR REVOLUTION

HON. DURWARD G. HALL

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. HALL. Mr. Speaker, paraphrasing Santayana we know that those who ignore the lessons of history are destined to relive its errors. A retired friend of mine forwarded the enclosure entitled "Rules for Revolution" as a reprint from "New World News" in February 1946. Along with his letter he stated in part:

The attached article "Rules for Revolution" was printed in February 1946. Perhaps the United States Supreme Court either does not accept these basic tactics or is revolutionary itself!

I strongly recommend that Members, and the people who read the CONGRESSIONAL RECORD, review this and note the startling conclusion of the path we tread as we neglect history's lesson. I insert this article in the RECORD at this point:

RULES FOR REVOLUTION

On a dark night in May, 1919, two lorries rumbled across a bridge and on into the town of Dusseldorf. Among the dozen rowdy, singing "Tommies" apparently headed for a gay evening were two representatives of the Allied military intelligence. These men had traced a wave of indiscipline, mutiny, and murder among the troops to the local headquarters of a revolutionary organization established in the town.

Pretending to be drunk, they brushed by the sentries and arrested the ringleaders—a group of 13 men and women seated at a long table.

In the course of the raid the Allied officers emptied the contents of the safe. One of the documents found in it contained a specific outline of "Rules for Bringing About a Revolution." It is reprinted here to show the strategy of materialistic revolution, and how personal attitudes and habits of living affect the affairs of nations:

"A. Corrupt the young. Get them away from religion. Get them interested in sex. Make them superficial, destroy their ruggedness.

"B. Get control of all means of publicity and thereby:

"1. Get people's minds off their government by focusing their attention on athletics, sexy books and plays, and other trivialities.

"2. Divide the people into hostile groups by constantly harping on controversial matters of no importance.

"3. Destroy the people's faith in their natural leaders by holding these latter up to ridicule, obloquy, and contempt.

"4. Always preach true democracy, but seize power as fast and as ruthlessly as possible.

"5. By encouraging government extravagance, destroy its credit, produce fear of inflation with rising prices and general discontent.

"6. Foment unnecessary strikes in vital industries, encourage civil disorders and foster a lenient and soft attitude on the part of government toward such disorders.

"7. By specious arguments cause the breakdown of the old moral virtues: honesty, sobriety, continence, faith in the pledged work, ruggedness.

"C. Cause the registration of all firearms on some pretext, with a view to confiscating them and leaving the population helpless."—From New World News, Feb. 1946.

FBI CITES RECORD ON KING WIRETAP

HON. ED EDMONDSON

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. EDMONDSON. Mr. Speaker, during recent months we have heard considerable controversy about reported Government wiretapping of the late Dr. Martin Luther King, Jr., with disputed versions of the Federal Bureau of Investigation's authorization for such action. The record has now been set straight and a detailed accounting given of the events which preceded authorization by the Attorney General for the FBI action.

I place in the RECORD an article from the Washington Evening Star of June 19, setting forth specific details on authorization of the wiretap in question.

The Star article states these disclosures "climaxed a long smoldering controversy over the role of the FBI." The article should also serve to end the controversy and any further irresponsible reporting on the subject.

FBI Director Hoover has documented his account of the record and the record now speaks for itself.

The Star article follows:

KING WIRETAP CALLED R.F.K.'S IDEA—HOOVER ASSERTS MEMO TO FBI CITED CONCERN OVER MARXISM

(By Jeremiah O'Leary)

Wiretapping of Dr. Martin Luther King Jr.'s telephone was proposed to the FBI by then Attorney General Robert F. Kennedy in June, 1963, and authorized by him in writing later that year, FBI Director J. Edgar Hoover told The Star today.

Hoover revealed the contents of two memorandums in one of which Kennedy expressed concern about possible infiltration of the race issue by Marxists and spoke of allegations that the Negro leader was closely associated with Marxist ideas and followers.

That memorandum to Hoover, dated June, 1963, was written by Courtney Evans, then assistant director of the FBI and liaison man with the Justice Department. It reported the substance of a conversation Evans had just had with Kennedy in which the Attorney General asked about the feasibility of installing electronic devices on King's telephones. King headed the Southern Christian Leadership Conference.

CONCERNED ABOUT ALLEGATIONS

Kennedy, according to the Evans memo, was concerned about reports that King was a student of Marxism, that he was associating with a New York attorney with known Communist connections, but that he did not openly espouse Marxism because of his religious beliefs. The Evans memorandum indicated Kennedy wanted to know if it was technically feasible to use electronic devices to prove or disprove these allegations.

The Evans memo said Evans replied to Kennedy that King was a man who traveled almost constantly and that it was extremely difficult to use wiretaps effectively in such cases.

Hoover told The Star that FBI officials also informed Kennedy at that time that they doubted the advisability of undertaking electronic surveillance of Dr. King because of possible political repercussions.

However, the second memorandum cited by Hoover shows that on October 7, 1963, the FBI chief reported to Kennedy that it was then technically feasible to apply wiretaps to King's telephones at two places, one of them at an unnamed location in New York.

That memorandum constituted the FBI's request for authority to proceed with the wiretap proposed by Kennedy four months before. The document bears in the lower left-hand corner the signature, "Robert F. Kennedy," and under the name the date "10-10-63."

Hoover did not indicate to The Star when the surveillance was started but said the taps were discontinued on April 30, 1965. At that time Nicholas Katzenbach was serving as Attorney General.

Asked about the results of the electronic surveillance today, Hoover declined comment.

The FBI director told The Star: "I have never authorized installation of technical electronic devices without written authority of the Attorney General."

Today's disclosures climaxed a long smoldering controversy over the role of the FBI, a subordinate bureau of the Justice Department, in using wiretaps or other electronic devices in investigative matters. The matter came to a head Sunday when Carl Rowan, a columnist for The Star, charged that the FBI had no authority to wiretap Dr. King's conversations. He quoted former Attorney General Ramsey Clark, who succeeded Katzenbach, as saying "the implication that people thought Dr. King was a security threat is outrageous."

The Rowan charges prompted Associate FBI Director Clyde A. Tolson to write to Rowan early this week defending legality of the King wiretaps.

"For your information," Tolson said in his letter, "the wiretap on Martin Luther King, Jr., was specifically approved in advance in writing by the late attorney general of the United States, Mr. Robert F. Kennedy."

Tolson added that the monitoring device was "strictly in the field of internal security and therefore was within the provision laid down by the President of the United States."

Evans, now a Washington lawyer, was en route to Puerto Rico today and could not be reached for comment. However, Tuesday night Evans said he had no recollection of whether a wiretap authorization directed at King had ever been involved in his discussion with Kennedy.

Aides to Sen. Edward M. Kennedy, D-Mass., said today he would have no comment on Hoover's disclosure.

Friends of Robert Kennedy had suggested in recent days that, during 1964, in the period after the assassination of President John F. Kennedy, the attorney general's interest in some of his official affairs had flagged. However, the assassination came nearly six weeks after Robert Kennedy signed the authorization for the King wiretap.

Hoover and Kennedy, after the latter became a New York senator, accused each other of being responsible for use of hidden microphones in investigations.

Evans figured in that controversy when Kennedy made public a February, 1966, letter to him from Evans which made the point that the use of hidden microphones was not Kennedy's responsibility but suggested he may have directly approved the use of wiretaps on phones. That letter said the FBI sent national security wiretap requests to Kennedy for approval.

It is reliably reported that Kennedy was reminded by the FBI that it still had in its files the authorizations signed by him as Attorney General for telephonic wiretaps. However, Hoover did not disclose at that time any names of persons under wiretap surveillance with Kennedy's approval.

At that stage, Kennedy and Hoover broke off the public exchange of charges as if by mutual consent. This was regarded partly as due to Kennedy's realization that his signed authorizations were still in FBI files, partly to the FBI's desire not to have special attention drawn to its investigative techniques nor to engage in a battle with the Kennedy forces that could have political overtones.

The Justice Department on Tuesday declined a direct answer when asked for documentation of Tolson's contention in his letter to Rowan. But earlier this month, a Justice Department spokesman said Hoover was "accurate in every respect" in his repeated statements that all wiretaps were being authorized in advance and in writing by the Attorney General during the timespan of the controversy.

A Justice department spokesman, asked today if Attorney General John N. Mitchell had given Hoover permission to discuss the contents of secret documents of the King wiretapping, replied simply, "no comment."

However, the spokesman recalled that the attorney general had declined to authorize disclosures in court of the basic authority for the wiretapping. Such disclosures had been demanded by defense lawyers in the Houston draft evasion hearing for former boxing champion Cassius Clay. It was during that hearing that the King wiretapping was officially revealed for the first time.

FLIGHT

HON. NICK GALIFIANAKIS

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. GALIFIANAKIS. Mr. Speaker, on Friday, April 11, I had the privilege of participating in ceremonies at the University of North Carolina Morehead Planetarium. The planetarium, which has previously distinguished itself as the site of U.S. astronaut training in celestial navigation under the able direction of Mr. A. F. Jenzano, was the site of an extraordinary sight and sound show entitled "Flight." This mixed-media blend of creativity and technical ability presents the evolution of man's intrigue with flying and his experiences in achieving contact with the outer atmosphere.

Under the brilliant direction of Capt. Normal D. Sauvage, U.S. Air Force, a university staff of 18, through the cooperation of approximately 50 companies, individuals, departments, and foundations, used slides, movie film clips, live TV, narration, music, and live dancers to take the audience through a 1 hour, smartly paced, smooth running, substantive, sensitive, historical experience. His artistic prowess was shown throughout the production in his imaginative and effective treatment of contrasting media.

The show will not be limited to the Fourth District. It has been graciously invited to Vienna, Austria, for the Third International Planetarium Director's Conference for a July 11 performance.

Lt. Gov. H. Patrick Taylor, Jr., served as honorary chairman of "Flight," which is dedicated to the memory of Mrs. Estes Kefauver, the great and gallant lady who as the first Adviser on Fine Arts for the U.S. Department of State, implemented and directed the art in the Embassies program which brought new dignity and dimension to American visual arts, especially as an important factor in international relations.

FEDERAL EMPLOYEES ANTI-ABM PETITION

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. EDWARDS of California. Mr. Speaker, an event of significance occurred Friday, June 6, when members of the Federal Employees for a Democratic Society presented Congress with a petition signed by 1,731 Federal employees opposed to the anti-ballistic-missile system.

Five Congressmen and two representatives of other Congressmen received the petitions and joined in praise of the courage of the employees signing the petition and in support of their position.

It took great courage for Federal employees to take such a stand, but Federal employees do not lose their rights of citizenship, including the right to petition, by becoming Federal employees.

Mr. Speaker, I submit the statement of the petitioning Federal employees for inclusion in the RECORD as follows:

FEDERAL EMPLOYEES ANTI-ABM PETITION

Traditionally federal employees have been a conspicuously silent group. Many believe it to be inappropriate to speak out on politically sensitive issues, in view of their official positions. Others recall the McCarthy era and live in fear of jeopardizing their jobs or their next promotion. I am here this morning to tell you that this timidity must come to an end and is coming to an end.

Federal Employees for a Democratic Society (FEDS), in its efforts against the Anti-ballistic Missile System (ABM), directly represents approximately 2,000 federal employees who have, thus far, signed the FEDS sponsored petition to Congress opposing the deployment of the ABM. The petition states, There is no convincing evidence that the ABM system will reduce the threat of nuclear destruction; instead, its construction may well accelerate the nuclear arms race, making eventual disarmament impossible. The Administration has failed to rebut the considerable body of evidence developed

within the scientific community indicating that this system is of doubtful reliability and utility and is not necessary to defend the United States from nuclear attack. There is a danger that the military-industrial complex is urging deployment of the ABM system to serve its own interests rather than the national welfare. This is the type of danger against which President Eisenhower warned.

We call upon Congress to begin to shift the nation's resources from the machinery of war to the solution of complex domestic social problems. We believe that poverty, hunger, racial tension, crime and environmental pollution are the most serious and immediate threats to our national security.

As the petition indicates, FEDS efforts on this issue transcends the goal of just defeating the ABM. We are asking for a thorough re-structuring of our national budget to meet the needs of a rapidly deteriorating American society. The ABM is an outstanding symbol of the kinds of decisions this nation is faced with. There are an estimated 22 million Americans living in poverty, about 10 million of these are suffering from malnutrition. The drop-out rate in our public schools system is 28 percent, and in many of our urban areas the rate approaches 50 percent. Our higher education system is facing possible total destruction, mainly because it considers the needs of the military-industrial complex while ignoring the educational needs of our youth. Air pollution is reaching lethal quantities because having clean air conflicts with the profit motive. The nation's Blacks, Puerto Ricans, Mexican-Americans and Indians continue to be treated as second class citizens.

These are only a few of the major domestic problems facing us today, but they alone pose a greater threat to our national security than all our real or potential foreign enemies. For the past 20 years we have been committed to military overkill, which has squandered an intolerable portion of our human and economic resources. We must now make the commitment to build a better society for all, not a stronger military.

We believe that defeating the ABM could mean the beginning of a realization that a spiraling nuclear arms race can benefit no one; the beginning of a realization that serious domestic ills must be given the highest priority.

THE POVERTY PROGRAM

HON. EDWIN D. ESHLEMAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. ESHLEMAN. Mr. Speaker, Mr. John M. Yancey, professor of psychology at Elizabethtown College in my congressional district, was interviewed concerning the poverty program by our evening newspaper, the Lancaster New Era. I feel some of his comments are worthy of being placed in the RECORD and shared with others. Excerpts from the newspaper article follow:

THE POVERTY PROGRAM

The war on poverty is failing because it gives financial rewards to people who spurn ambition, and it penalizes ambitious people who try to better their lot in life.

This is one of the views of John M. Yancey, professor of psychology at Elizabethtown College and coauthor of the controversial *Poverty in the Garden Spot* report that was published in 1966.

"The war on poverty needs to be reversed," Professor Yancey says. "Both nationally and locally, it should be revised to reward those who make a genuine effort to improve themselves and to adopt the values of the people who are taxed to pay for poverty programs.

"For those who refuse to hold jobs or who resist efforts at self-improvement, the anti-poverty program should include a penalty system," he said.

Yancey is convinced that the majority of the poor in Lancaster County could do better—except that they don't know how to go about it; that existing welfare systems are set up so as to discourage them from going about it as they must.

The key to continuing failure of the war on poverty at federal, state, and local levels, Professor Yancey believes, lies in the segregation of society into the poor and the affluent.

"There are some middle class who are poor," he observed, "and there are some lower class who are not poor."

"It is not a problem of economics. It is that the lower class is different. They have different attitudes on how our world should operate," he continued.

"We are trying to solve this class problem by giving the lower class money. Rather we should tell them that if we give them money they first should learn how to save money. They should learn to change their attitudes and values," Yancey said.

Yancey complains that poverty programs today are based on need, not on behavior.

"I think middle class people would be willing to support programs more than in the past," Yancey said, "If they could see the results they want to see. I think business and industry want to see behavior changing and I think they would support programs to a far greater degree than now if they could see the changes."

"People seem to have no understanding of how our resources are developed; how we get food to eat; how we get houses built."

"Someone has to work," he went on.

"It is not all in Washington where Congress can open a storehouse and put it in a truck and deliver it."

"In OEO (Office of Economic Opportunity and Community Action Program), Social Security, Medicare and the many charitable agencies," Yancey said, "I don't see anything that pretends to say to people that they will get help only so long as they start behaving the way I want them to behave."

"All of the welfare programs", Yancey says, "have shaped people in patterns of dependency. Now is the time to try to shape these people in the pattern of the good old get up and go. . . . Shape them this way until they get out of poverty then cut it off."

HOUSE JOINT RESOLUTION 486

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. ANDERSON of California. Mr. Speaker, I would like to bring to the attention of my colleagues a resolution by the city of Gardena, Calif., urging the creation of a Presidential commission between the United States and Mexico to help control the flow of narcotics and dangerous drugs between our two countries.

This resolution asks the President to set up a joint commission with the Mexican Government as Congressman DICK HANNA and I proposed in House Joint Resolution 486.

Mr. Speaker, it is my hope and that of many people in California that President Nixon will take the necessary steps to set up such a commission. This is especially important because all of the evidence indicates that use of narcotics is now increasing throughout the country. Recent notice has been given to estimates that perhaps as high as 35 percent of students in our college campuses on occasion used marihuana.

I am including in the RECORD a copy of the resolution by the city of Gardena and a copy of the bill we have introduced:

RESOLUTION OF GARDENA, CALIF., CITY COUNCIL

Whereas, the continuing increase in the use of narcotics and dangerous drugs by the minors in our country not only constitutes a major problem to society, but presents an extreme danger to the user, as well; and

Whereas, it is believed that the most effective way to stop the illicit traffic in narcotics and dangerous drugs into our communities is to cut off the supply at its source, and that there should be established a joint presidential commission between the United States and Mexico to undertake an action program to control the flow of narcotics between the two countries; and

Whereas, on the 24th day of April, 1969, the South Bay Councilmen's Association passed and adopted its Resolution No. 10, recommending and urging the creation of a commission to control the flow of narcotics and dangerous drugs between the United States and Mexico;

Now, therefore, be it resolved, that the City Council of the City of Gardena, California, does hereby endorse said resolution of the South Bay Councilmen's Association and urge the creation of such a commission in an effort to halt the illicit flow of narcotics and dangerous drugs between the two countries; and

Be it further resolved, that copies of this resolution be forwarded to Secretary of State William P. Rogers; to Attorney General John N. Mitchell; to Secretary of Health, Education and Welfare Robert H. Finch; to United States Senators Alan Cranston and George Murphy; to Congressman Glenn M. Anderson; and to the member cities of the South Bay Councilmen's Association.

Attest:

RUTH F. MORGAN,
Deputy City Clerk of the City of Gardena, Calif.

H.J. RES. 486

Joint resolution to request the President to negotiate with the Mexican Government for the purpose of setting up a joint United States-Mexican commission to investigate the flow of marihuana, narcotic drugs, and dangerous drugs between the United States and Mexico

Whereas Mexico is the primary source of supply for narcotic drugs and dangerous drugs brought into the southwestern part of the United States; and

Whereas these narcotic drugs and dangerous drugs are subsequently distributed throughout the United States; and

Whereas 100 per centum of the marihuana seized by the enforcement officials in the southwestern part of the United States comes from Mexico; and

Whereas the smuggling of narcotic drugs and dangerous drugs into the United States poses the largest single problem for collectors of the customs and for the Federal courts in the southwestern part of the United States; and

Whereas the use of narcotic drugs and dangerous drugs by juveniles has greatly increased due to the easy accessibility of such drugs from Mexico: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President

is requested to initiate negotiations with the Government of Mexico for the purpose of setting up a joint United States-Mexican commission to investigate and to recommend appropriate solutions concerning the flow of marihuana, narcotic drugs, and dangerous drugs between said countries.

SUNSET ECLIPSES DDT

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. UDALL. Mr. Speaker, Sunset magazine, a fine Western publication, this week took another responsible step in the public interest by banning advertising for DDT and five other insecticides which hold their potency for years.

The magazine also plans a major article telling consumers of safer substitutes and it will revise its garden books to bring them in line with new findings.

Sunset is to be commended for these actions. All of us everywhere seem to be acquiring DDT in our systems as it and similar products work themselves to every part of the globe. There are those who argue that it hasn't been proven that accumulation of DDT is bad for us. But I have yet to hear of some responsible study showing it is good for us. If I have my "druthers" when I dine I will skip the DDT, thank you.

Following is the text of the Sunset announcement:

SUNSET MAGAZINE MOVES AGAINST DDT AND FIVE OTHER INSECTICIDES

MENLO PARK, CALIF.—*Sunset* Magazine announced this week an immediate ban on accepting advertising for products containing DDT and five other insecticides, and is revising all of its *Sunset* gardening books to recommend substitute products, according to Lane Magazine & Book Company president, L. W. (Bill) Lane, Jr.

The move came after a continuing concern and a six-month intensive study convinced the magazine's gardening staff and management that damage to wildlife and the eventual possibility of harm to humans is far too great to offset the product advantages for use in home gardens.

The announcement is especially significant in view of the fact that *Sunset* currently carries more insecticide and pest-control advertising than any other non-farm magazine in the country.

Lane also announced that the magazine will publish a comprehensive report on the subject in its August issue, listing 19 acceptable substitute products for use around the home and recommended methods for getting rid of present supplies of the insecticides. He emphasized that many of the substitute products have been included in recent and all current printings of *Sunset* publications. The magazine's ban on product advertising goes into effect with the same August issue, which is the first issue going to press following the announcement.

Sunset's garden editor Joseph F. Williamson said that research and checking with all responsible authorities convinces him that the new restrictions imposed by the California Department of Agriculture are a step in the right direction, but that more controls are needed.

Sunset's decision not to accept advertising precedes the January 1, 1970, ban ordered by the State of California directive on only two insecticides—DDT and DDD.

Three other states—Arizona, Wisconsin, and Michigan—have passed or proposed legislation to control the use of DDT and related chemicals.

The *Sunset* article will also recommend that four other insecticides immediately be taken off the market for home gardening—aldrin, dieldrin, endrin, and toxaphene. They are also included in the ingredients not acceptable for *Sunset* advertising. Williamson explains that the major problem with these stems from what scientists call "nondegradability." Other kinds of insecticides "break down" or change into harmless substances within hours or days after application. These retain their chemical potency, wherever nature may take them, for years after application.

Williamson reports that manufacturers are actively cooperating in the drive to market substitute products that offer the benefits of insect control without the hazards of DDT and its related compounds. Some have voluntarily eliminated DDT products from their lines. Nevertheless, according to a *Sunset* survey of retail outlets, it still is currently contained in 35 products in the Western garden supply market.

Scientists report that certain forms of wildlife (California brown pelicans, peregrine falcons, bald eagles, and Dungeness crabs, to name a few) have taken enough DDT into their systems to make many adults no longer capable of reproducing, thus threatening their species with extinction.

Lane noted that not accepting certain categories of advertising is not new to *Sunset*. The publication, with a circulation of close to one million in Western America, has a long list of products that it does not accept in its advertising pages. "In the case of tobacco and hard liquor, we dropped advertising of such products 25 years ago," Lane said, "not because we set ourselves up as crusaders, but because we felt they didn't fit in the atmosphere of our family-oriented magazine. But in the case of insecticides, our readers expect us to be authorities; we can't very well accept advertising for products we would not endorse or recommend in our editorial pages."

In addition to publishing *Sunset* Magazine, the company is a major book publisher. Melvin B. Lane, publisher of *Sunset* Books, reports that revisions already are being made on all of the firm's garden books to conform with the new findings on insecticides. New printings are underway and will be completed by Fall. The company publishes nearly a half million garden books a year. Sales of its top seller, The Western Garden Book, have exceeded 1.3 million copies since first published.

EXCERPTS FROM FLAG DAY ADDRESS, MACARTHUR MEMORIAL, NORFOLK, VA., JUNE 14, 1969, BY ALF J. MAPP, JR.

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. WHITEHURST. Mr. Speaker, on Saturday, June 14, 1969, I had the opportunity to participate in Flag Day ceremonies at the Douglas MacArthur Memorial in Norfolk, Va. At that time, I was much moved by remarks made by Prof. Alf J. Mapp, Jr., who is on the faculty at Old Dominion College. Mr. Mapp emphasized the great danger in America of the diversity that is alienating us one from another. His comments seemed so pertinent that I would like to place them in the RECORD for the benefit of all Members and those who read this journal. Mr. Mapp's message deserves the attention of all of us. It follows:

EXCERPTS FROM FLAG DAY ADDRESS BY PROF. ALF J. MAPP, JR.

If the flag to which we pay tribute today is to remain the symbol of a vital and virile force among the nations, we must see that our historic source of strength does not become our fatal weakness. We have often gloried in the rich variety of cultures that have contributed to our land and have boasted of the diversity that has made us strong. And properly so! But this diversity is now threatened by a paradox. We Americans are great organizers and we have turned our genius for organization to the task of organizing our diversity. One of the great blessings of diversity has been the climate that it afforded for individualism. But individualism is now assailed by organized diversity. The individual is beset with appeals to think and act in conformity with a majority of his ethnic group, or economic group, or occupational group, or else be branded a traitor to his class.

This same tendency to line people up under a banner of narrow dedication is evident even in the realm of political ideology. We are no longer building a diversified nation where the attributes of one group complement another; we are in danger of fragmentizing the nation into groups spending their strength in savage in-fighting. Too many people have abdicated the power of individual decision in exchange for comfortable surrender to doctrinaire liberalism or doctrinaire conservatism. They never have the painful task of deciding a vital question on its merits. Having uncompromisingly labeled themselves, they know at once how to label everything else. In many cases they belong to organizations prepared to tell them how they—as good conservatives—should think about every issue that confronts them as citizens. On acquiring a life membership a man might almost as well give his proxy on the great questions of his lifetime. On those questions where the lines between conservatism and liberalism might be blurred even in the eyes of the most doctrinaire, the reliable computer might be called into service to determine where a man's allegiance lies.

An organization notifies its members that a legislator voted "wrong" 80% of the time. Another organization notifies its members that the same man voted "right" 75% of the time. The "rightness" or "wrongness," of course, depends upon the extent of conformity to the program of the group issuing the statement. The man who is concerned only with the estimate of the group to which he belongs has his decision made for him and also enjoys the comforting assurance of being "right."

Space age survival requires spacious thinking. There is no safety in scurrying retreat into the narrow warrens of organized conformity. If Americans do not reassert their right to think as individuals, the stripes in that flag in which we glory today will represent a stratification destructive of national unity. But if we have the courage and the energy to reassert our hard-won privilege of decision making, the starry blue firmament that also adorns it will proclaim before the whole world the measure of our aspirations for ourselves and for all mankind.

UPDATING OUR FISHING FLEET

HON. HOWARD W. POLLOCK

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. POLLOCK. Mr. Speaker, yesterday I introduced legislation which would

amend the U.S. Fishing Fleet Improvement Act. This legislation will offer fishermen a 50-percent Government subsidy for the purchase of any American-made fishing vessel. In addition, it will authorize low interest loans for the remainder of the purchase price. A further aspect is an authorization for the administration to accept as trade-in, existing vessels used by the American fishing industry with the requirement that these vessels not be allowed to compete with the new vessels in the fishing industry.

Our fishing fleet is in dire need of updating and without this subsidy American fishermen are unable to replace their out-of-date vessels with modern equipment.

Mr. Speaker, we must update our fishing fleet and I propose this legislation as a vehicle for this modernization.

OBSCENE TELEPHONE CALLS

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. ROGERS of Florida. Mr. Speaker, I have noticed an advertisement which I would like to call to the attention of my colleagues regarding obscene telephone calls.

General Telephone & Electronics points out in its ad that they have worked and developed a system so that a person who is harassed by obscene telephone calls can take steps which might lead to the capture of the caller.

I would like to commend General Telephone & Electronics for the work they are doing in the field. I think this is one important way industry can and is helping to aid in enforcing the law which we passed last year.

At this time I would like to include in the RECORD the text of the advertisement:

A WARNING TO PEOPLE WHO MAKE OBSCENE PHONE CALLS

You're sick. Not clever, but sick.

Because the calls you make aren't jokes. They're crimes. By local law and now, by Federal law.

Congress has just recently passed a bill that can fine you and send you to prison for 6 months if you're caught and convicted.

And you will be. Because now the odds are on our side, not yours.

We can say that because as General Telephone—the second largest telephone operating company in the country—we know what's being done about you.

Although we don't have it throughout our entire system yet, today's special telephone equipment can not only trace back and identify your phone from the receiving party's end; it can also identify any number you call from your end.

And don't think you can beat it by keeping your call short, either.

Because it can also prevent you from disconnecting. As long as the party you call doesn't hang up, the line will remain open. No matter what you do.

And while they keep the line open, they can make another call. To us.

Then there's the work being done on the voice print—an electronic picture of the human voice.

If yours is taken, it's as good as getting your fingerprints. That's how distinctive your voice is. No matter how good you are at disguising it.

And if all that isn't enough to stop you, remember this the next time you get the urge to call:

We haven't told you everything.

GENERAL TELEPHONE & ELECTRONICS.

MIRV SEEN ADDING TO MAD MOMENTUM

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. BINGHAM. Mr. Speaker, one of the primary contentions of those of us who have expressed concern over the development by the United States and the Soviet Union of a new generation of weapons systems characterized by the use of multiple, independently targetable reentry vehicles—MIRV—is that testing of these weapons might jeopardize planned United States-Soviet arms control talks. The Communist party newspaper, Pravda, and the Soviet foreign affairs monthly, Mezhdunarodnaya Zhizn, have recently published Soviet reactions to the Nixon administration's missile program, making specific reference to the development of MIRV. A report from the New York Times summarizing these Soviet statements follows.

In addition, a most interesting analysis by Richard Harwood and Laurence Stern of the growing debate over MIRV testing by the United States appeared in the June 22 edition of the Washington Post. I feel certain that the Members of the Congress and many readers of the RECORD will find this analysis enlightening.

Finally, the New York Times has recently published two thought-provoking editorials on the question of MIRV testing which also appear below:

[From the New York Times, June 11, 1969]

PRAVDA VOICES SOVIET DISPLEASURE WITH UNITED STATES OVER MISSILE POLICIES AND DELAYS ON ARMS-CONTROL TALKS

(By Bernard Gwertzman)

Moscow, June 10.—The Communist party newspaper Pravda today underlined Soviet displeasure with the Nixon Administration's missile program and its delay in beginning strategic arms-control talks with the Soviet Union.

An article by Boris G. Strelnikov, the newspaper's Washington correspondent, was the latest in a number of Soviet commentaries indicating dissatisfaction with the apparent desire of the United States to proceed with new defensive and offensive missile systems, and with the failure to set a date for the start of arms-control talks.

A commentary in the current issue of Mezhdunarodnaya Zhizn, a foreign affairs monthly, said that development of the Safeguard antimissile system the MIRV offensive system could only complicate future Soviet-American negotiations.

MIRV is the acronym for multiple, independently targetable re-entry vehicle.

"The development of these defensive and offensive systems would lead to a qualitative new step in the nuclear arms race and would add billions to the already large and burdensome military expenditures," the commentary said.

"It would open the way to further aggravation of international tensions, first of all in the mutual relations between the two most powerful world powers, the United States and the Soviet Union," it added.

"It would strengthen the mutual distrust between states and would make more complicated the already difficult negotiations on disarmament, "the commentary continued." The destructive force of nuclear rockets would be raised to an unparalleled level."

The Pravda article, apparently reflecting current Soviet thinking, said the Nixon Administration seems to believe that development of new arms systems would be "a trump card" for future negotiations with the Soviet Union.

"In other words, some in the United States would like to start the dialogue from a position of strength," Mr. Strelnikov said, "If this Pentagon thesis, which is incompatible with improving Soviet-American relations would be approved, it would be a great miscalculation for the United States," he added.

"Practice has shown long ago that any attempts to negotiate with the Soviet Union from a position of strength would doom the talks to failure in advance," Mr. Strelnikov said.

Most Western diplomats here believe that Moscow decided last year to go ahead with arms-control talks with the United States on the assumption that a rough balance of power existed between the two nations.

The Soviet Union now appears to be saying that if the United States begins preparations for large-scale deployment of new weapon systems, this could upset the balance of forces.

So far, the comments in the Soviet press have not ruled out the start of negotiations, but the delay by the United States on deciding on a time for the talks has been criticized.

Pravda said that the United States "has still not taken any practical steps" to begin the talks, which were to have begun last fall. They were postponed in the tense period following the invasion of Czechoslovakia by five Warsaw Pact nations led by the Soviet Union.

"At first it was said in Washington that the United States would be ready to enter into negotiations this spring," said Pravda. "Then they began to talk about the summer and now about the fall."

The article took no notice of a statement last week by Secretary of State William P. Rogers that he still believed the talks would start this summer.

There has been an effort among Russians, expressed privately by diplomats and publicly by the press, to disabuse the United States of the thought that Moscow feels itself under pressure to begin arms-control talks.

Some observers have argued that the Soviet Union wants arms reductions to be able to allocate additional resources to its civilian economy. The Pravda article rejected this viewpoint.

It said that Washington was making "a miscalculation" if it thought that the Soviet Union was more interested than the United States in starting negotiations. It said that some Americans, believing this "miscalculation," were talking about the forthcoming talks as "a sort of market where the American side will check the price for any agreement."

Pravda criticized Secretary of Defense Melvin R. Laird, saying he was carrying out "anti-Soviet propaganda in the spirit of the worst traditions of the cold war."

MIRV SEEN ADDING TO "MAD MOMENTUM"

(By Richard Harwood and Laurence Stern)

In the euphemistic phrasing of the war business, the new gadget is called a "bus." Its passengers are little warheads that could be dropped off "with a very nice area effect," as the Pentagon puts it, at such places in the Soviet Union as Minsk and Tomsk.

The official acronym is "MIRV" (as in Mervin). The letters stand for "multiple independently targeted re-entry vehicle." They are rapidly replacing "ABM" as the symbolic focus of the arms control debate in the United States.

To many scientists and politicians, MIRV is the newest and most deadly accelerator of "the mad momentum of nuclear armaments." It insures, Sen. John Sherman Cooper told the Senate last week, that the United States and the Soviet Union can, in a single stroke, "multiply the number of deliverable nuclear warheads in the world by a factor of 3 to 10."

To the managers of the Pentagon, MIRV offers one of the best hopes for slowing down the arms race. It is, in their view, a trump card in the forthcoming arms negotiations with the Soviet Union. If the Soviets agree to abandon efforts to defend their cities against American missiles, then the United States could agree, the Defense Department suggests, to abandon or limit the deployment of MIRV.

President Nixon hinted as much Thursday when he said he is willing to talk with the Russians about a MIRV moratorium.

Actually the first indication of the Administration's negotiating flexibility on MIRV came nearly three months ago in a little-noticed exchange between Deputy Defense Secretary David Packard and Sen. Albert Gore (D-Tenn.)

Gore asked: "Do you have any doubt that it is our intention to replace the Polaris with the Poseidon?"

Packard's response was: "It is our intention, Mr. Chairman, unless we conclude some agreements that would dictate otherwise."

Pentagon officials have some suggestions as to the general terms of such an agreement.

"If they tell us they are not going to defend their cities," said one spokesman, "we'll lose a lot of interest in MIRV. Since its purpose is to penetrate Russian cities' defenses, MIRV is negotiable."

Authoritative officials speak of a formula under which both sides would freeze the number of offensive missile sites and move into "thin" antiballistic missile systems. "That would, in effect, be disarmament," in the view of one Pentagon expert.

A more modest step, as some see it, would be a mere mutual freeze on the number of delivery vehicles, or buses. "If they freeze their delivery vehicles they can MIRV up to the kazoo and they would have no first strike," an official said.

This means however, that each side would have to make the worst assumptions about how much megatonnage lies in the silos of the prospective enemy.

It could still be a prescription for further arms stockpiling by both the Soviet Union and United States.

As with all of the scenarios on nuclear war and its probabilities, MIRV has created deep divisions in both the scientific and political communities in the United States. It suggests to some that American war planners are seeking a "first-strike" capability against the Soviet Union. It suggests to others that the Defense Department is a sucker for gadgets, that it will buy any new weapon that comes along, irrespective of need. It suggests to still others that the Nixon Administration is not serious about arms control.

The view from the Pentagon on these issues is both reassuring and confusing. It is based on the promise that security is, in effect, found in insecurity, that the best hedge against a nuclear war is, in Robert McNamara's words, "the certainty of suicide to the aggressor." That is what is meant by the "balance of terror."

That balance, the Pentagon maintains, could be upset by the United States in only two ways—an infallible system of defense (ABM) protecting the country from "suicide" or an infallible system of offense to destroy virtually all Soviet weapons in a sneak attack.

MIRV has been called, by its critics, the forerunner to that kind of "first-strike" offensive system. But the Defense Department rejects the argument.

The main reason offered is that MIRV's warheads are too small and too inaccurate for use against Russian missile silos. The MIRV "bus" to be installed on the new Minuteman III missile, according to Defense officials, will carry from two to three 200-kiloton warheads. The "bus" on the new Poseidon submarine missile will carry up to 15 warheads of about 50 kilotons each (the Hiroshima bomb was 20 kilotons).

In order for a 200-kiloton warhead to have a 70 per cent chance of knocking out a silo, it would have to land no farther than 200 yards away; a 50-kiloton warhead would have to land no more than 140 yards away.

This kind of accuracy, says the Pentagon, is not possible today nor in the foreseeable future; the best that can be done now is to guide a warhead to within about 440 yards of its target.

That is close enough to kill a target—a silo, for example—when large weapons are used, such as the 1-megaton warheads currently installed in Minuteman and Polaris. But it is too far away for smaller warheads to be effective.

Thus, MIRV's only present usefulness, its promoters insist, would be against "soft" targets such as cities.

There is general, although not unanimous, agreement in the scientific community that this description of MIRV's limitations is essentially correct.

But the Pentagon itself has cast doubt on this presumption by the conflicting statements it has issued. Although it now insists that MIRV is ineffective against silos, it took precisely the opposite view in January, 1968 when it put out a statement saying that "each new MIRV warhead will be aimed individually and will be far more accurate than any previous or existing warhead. They will be far better suited for destruction of hardened enemy missile sites than any existing missile warheads."

Defense Secretary Melvin Laird implied the same thing when he told Congress in March of this year that he planned to spend $12.5 million to improve the Poseidon guidance system and thereby make it more effective against "hardened" targets, meaning missile silos.

Statements of this kind have alarmed many scientists, such as Wolfgang Panofsky, the Standford physicist who was a member of the President's Science Advisory Committee from 1959 to 1964 and chairman of its panel on defense.

"They (such statements) are essentially threatening to the Soviets," Panofsky said, "and are technically wrong . . . From Laird's statement the Russians could not help but draw the worst possible judgment (about MIRV) . . . My own view is that this generation of MIRV is not a first-strike threat to the Russians. The verbiage that has gone with it is more of a threat than the technical side."

The "technical side," however, continues to bother MIRV critics such as Dr. Leonard Rodburg, a physicist at the University of Maryland. There may be, Rodburg says, limitations on MIRV's accuracy today. But there is no scientific barrier to far greater accuracy in the relatively near future, he believes. The work of such guidance experts as Dr. Charles Draper of the Massachusetts Institute of Technology may make it possible fairly soon to put a small MIRV warhead almost "on the silo door," Rodburg says. "With that kind of accuracy," he said, "you could destroy a silo with a satchel charge."

Whatever the implications of the Pentagon's conflicting descriptions of MIRV's mission, the present policy is to stress the limitations of the weapon. Dr. Roland Herbst, the Defense Department's deputy director of research, said last week that pinpoint accuracy for MIRV may be achieved "at some time in the future" but it is "not in the neighborhood at this moment."

Military pressure to develop MIRV began as early as 1962. Defense Secretary Robert S. McNamara at first said "no" to the new weapon. His reasoning was that the United States could already kill as many targets as it wanted to without going into MIRV deployment.

But at that time there were also military intelligence readings that the Russians were building an ABM system around Moscow. It turned out afterwards that what intelligence originally proclaimed to be ABM defenses were actually anti-aircraft installations to guard against advanced American bombers that McNamara never deployed.

The Pentagon debated two alternatives to the Soviet ABM. One was the use of penetration aids such as chaff and decoys for offensive missiles. The second was MIRV.

The first course was dropped on grounds that effective radar could distinguish incoming warheads from decoys and shoot them down—an argument that, ironically, opponents of the U.S. ABM used and Pentagon scientists dismissed. MIRV proved highly attractive to the military.

It promised a capability to hit more targets without violating McNamara's self-imposed freeze on the number of delivery vehicles. "MIRV was the best route to numbers," was one Pentagon spokesman's way of putting it.

And so, in an atmosphere of supersecrecy, the Defense Department began developing MIRV. No one mentioned the awesome acronym publicly until 1965 when a Pentagon official made reference to it at a press background session.

Pentagon newsmen were so astonished at the disclosure that they went back to their briefer and asked if he had really intended to let MIRV out of the bag. Everyone agreed to delete the reference to the new weapon system.

It was almost two more years before MIRV surfaced publicly. But it was overshadowed in the strategic weapons debate by the ABM.

MIRV's development as a "city-busting" weapon is now continuing on a schedule that calls for the first warheads to be installed on two nuclear submarines in January, 1971. If the development is carried out as planned it will cost, according to present estimates, about $17 billion—$7 billion for Poseidon, $10 billion for Minuteman III.

At present there are no clear answers to where the Russians stand on MIRV development. Last fall they tested the SS–9 missile with three huge warheads—presumably five megatons each. Whether these were guided war heads or simply gravity bombs, such as the Polaris A–3 missile has carried since 1962, is uncertain.

But no expert disputes the possibility that the Russians could quickly bring their MIRV technology abreast of the United States.

If both sides then proceeded to full-scale MIRV programs, their nuclear arsenals would increase enormously. The United States today possesses approximately 2350 strategic warheads, as against about 1100 for the Soviet Union. By MIRVing, the American arsenal could be raised to 8766 warheads with no increase in the number of delivery vehicles; the Russian arsenal could be raised to 5150.

This prospect is not disturbing to the Pentagon at the present time. The military reasoning is that both sides still would be left without a first-strike capability.

Disarmament proponents are less sanguine. They see MIRV's development as simply another useless step in the "mad mo-

mentum" of the arms race, a step that, if nothing else, would divert billions needlessly to weapons that neither side requires.

[From the New York Times, June 12, 1969]

MORATORIUM ON MIRV

The biggest challenge that confronts the National Security Council in its discussion this week and next of negotiating tactics for the impending Soviet-American strategic arms limitation talks is to find a way to get the Soviet Union to call off its test program for multiple warheads (MIRVs).

But Mr. Kosygin, like Mr. Nixon, obviously is not a "unilateral disarmer." One way to entice Mr. Kosygin into a MIRV test suspension would be to offer to suspend American MIRV tests—or even actually to suspend them with the announcement that they would not be resumed so long as the Soviet Union refrained from testing its multiple warheads.

This is precisely what a bipartisan group in the Congress has proposed in resolutions introduced on their behalf by Representative Jonathan Bingham, Democrat of New York, and Senator Clifford P. Case, Republican of New Jersey. The Administration has thus far failed to respond.

Instead, American MIRV tests continue. Secretary Rogers insisted last week that the tests would not injure chances for agreement with Moscow on missile curbs. But, when pressed on this by the Senate Foreign Relations Committee, he conceded that it would raise "new problems of inspection." Once MIRV is deployed, it could be subjected to arms control only if there is a degree of on-site inspection that the United States itself would have difficulty accepting, not to mention the Soviet Union.

The irony is that Soviet MIRVs, fitted atop the big SS–9 missile, could become a threat to the American deterrent. Each SS–9 could carry three five-megaton warheads, each of which, with an accuracy of a quarter of a mile, could destroy a Minuteman silo. But the first generation of American MIRVs, fitted atop Poseidon and Minuteman III missiles, would be too small with present accuracies to be used against underground Soviet missiles.

The United States already has enough offensive missiles to absorb a Soviet first strike and, in retaliating, to destroy the Soviet Union many times over. Yet it is preparing to increase its number of anticity missiles with MIRV, presumably to saturate a heavy Soviet antiballistic missile system which Moscow no longer is deploying. In so doing, it is encouraging the Soviet Union to deploy MIRVs that constitute a counterforce threat.

The madness of the missile race stands forth clearly in these facts. The Administration evidently is too much the prisoner of the Joint Chiefs of Staff to take the essential step of seeking a MIRV test moratorium. Early Congressional passage of the Bingham and Case resolutions would appear to be the only way to stimulate this vital step.

[From the New York Times]

MR. NIXON AND MIRV

No decision Richard Nixon will face as President is likely to be more momentous than the decision he faces within the next few days on the proposal to suspend the flight-testing of MIRV multiple-warhead missiles. Mr. Nixon yesterday described this proposal as "constructive" and said he would favor it if the Soviet Union would agree to do the same. But his attack on a "unilateral" suspension (of tests only the United States is now conducting) and his statement that this move must be part of an arms control agreement (which may take years to negotiate) confuse the issue.

Immediate suspension of MIRV tests is essential to keep the door open for a strategic arms agreement with the Soviet Union that would freeze the existing nuclear balance, head off further escalation of the missile race and assure security to both sides. Continued testing for even a few more weeks threatens to take the world past a point of no return into an expensive and dangerous new round in the missile race. It promises a five-fold multiplication of nuclear delivery vehicles in the American strategic missile forces—from 1,700 to about 8,000, an expansion that the Soviet Union would doubtless match. Even if limits on Soviet and American missile strength were later to be set at these higher levels, an era of nuclear nervousness would be almost sure to replace the present situation of stable mutual deterrence.

The bipartisan resolution introduced this week by Senator Brooke of Massachusetts and 40 other Senators urging the President to seek an immediate moratorium with the Soviet Union indicates a growing realization in Congress that MIRV testing is now the main governor on the arms race. It is more urgent than the issues that have dominated the missile debate in recent months, such as the Safeguard antiballistic missile (ABM) system, or the Soviet offensive SS–9 missiles and defensive ABM deployments.

These systems can be fully discussed in the approaching strategic arms talks with the Soviet Union. They take years to build and there is time to negotiate cut-offs long before their expansion will significantly affect the nuclear balance. Moreover, they can be monitored easily by reconnaissance satellite without on-site inspection. MIRV is a wholly different matter.

The United States already has staged fourteen full-systems flight tests of silo-based Minuteman III and submarine-launched Poseidon missiles carrying from three to twelve MIRV warheads. The first two of 31 Polaris submarines to be refitted at great expense for the big, MIRV-tipped Poseidon missiles already had gone into drydock for that purpose.

The Johnson Administration proceeded on schedule with MIRV flight-tests last August after advice from the Joint Chiefs of Staff that two years would be required to test to operational confidence. Within two months, it was thought, missile talks with the Soviet Union would be under way to halt MIRV and other aspects of the arms race. But the Soviet-American talks were delayed three months by Czechoslovakia, then another seven months so far by the determination of the Nixon Administration to re-examine the strategic balance and the American negotiating position at leisure.

Meanwhile, the American MIRV tests have moved much faster than the Pentagon originally indicated and operational confidence may now be reached in a matter of weeks, if the tests continue—a year ahead of schedule. Continuation of the testing this summer thus threatens to carry the world irrevocably into the MIRV era. MIRV can only be headed off in the test stage, since tests can be detected with relative assurance. Once deployed, MIRV can only be detected by on-site inspection more intrusive than even the United States, not to mention the Soviet Union, would be likely to accept. Satellite cameras cannot tell whether a missile is carrying one or ten warheads.

The American national interest lies overwhelmingly in heading off Soviet MIRV tests before they begin or, at least, before they get very far. The best way to achieve that would be suspension of American tests so long as the Soviet Union refrains from testing as well. An alternative would be an immediate approach to Moscow for a jointly announced test moratorium now. Postponement of this approach until the overall strategic arms talks begin in August—or, even worse, until agreement is reached there—would risk the true security interests of the United States and the world.

EPISCOPAL CHURCH COUNCIL RESOLVES TO END INVOLVEMENT WITH BANKS EXTENDING CREDIT TO THE REPUBLIC OF SOUTH AFRICA

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. REUSS. Mr. Speaker, the Episcopal Church Council, through several resolutions, has taken action to end its involvement with banks participating in the consortium credit to the Republic of South Africa if those banks renew that credit, as scheduled, early next year.

I commend the council's action, and include the text of the resolutions herewith:

RESOLUTIONS PERTAINING TO THE CHURCH'S INVESTMENTS IN SOUTHERN AFRICA AS ADOPTED BY THE EXECUTIVE COUNCIL

Resolved, That the Executive and Finance Committee, on behalf of the Executive Council, examine and apply, in relation to the investments of the said Executive Council in companies and banks doing business in southern Africa, the following criteria:

(a) Is the bank or business making credit available to or doing business in southern Africa, especially including South Africa, South West Africa, Rhodesia, Angola and/or Mozambique?

(b) If so, how significant is this involvement in the economy of the southern African country?

(c) If the involvement is significant, what is the effect in promoting such things as:

Education of Africans; Development of family life; Labor-management relations and the collective bargaining process; Increased skills of the African labor force and integration into higher levels of leadership; Equalization of wage scales, pension provisions and social security; Hospitalization and other benefits; Breaking down of the pass law system and other restrictions;

And be it further

Resolved, That, wherever the answers to criteria (a) and (b) are positive, the decision as to whether the Council invest and/or deposit the Church's fund or continue to invest and/or deposit in such companies and banks be dependent on *how* positive is the answer to criterion (c); and be it further

Resolved, That, nonetheless, where feasible in promoting the welfare or education of all the people of southern Africa without regard to race, the Council consider investments in such companies or banks promoting such projects.

Resolved, That the Executive Council direct the Executive and Finance Committee to consult with the banks in which the said Council has deposits or investments, and which are members of the consortium extending credit to the government of South Africa; and that, unless the said Executive and Finance Committee concludes that the involvement of the said banks is positive in respect to helping to promote the activities listed in Section (C) of Resolution I, the Treasurer be directed to terminate the Council's involvement with such banks within a reasonable period of time.

Resolved, That the Executive Council report its action on the above Resolutions to the Committee on Trust Funds and request them to examine their investments and to take appropriate action along similar lines and request that the Committee report its actions to the Council as soon as possible.

Resolved, That the Executive Council shall report its action on the above resolutions to the dioceses and parishes and request them

to examine their own investments and to take appropriate action along similar lines. To accomplish this the Council shall send the resolutions to the dioceses along with appropriate background materials and request the dioceses to draw these actions and materials to the attention of the parishes and other groups in their jurisdictions in the implementation of the 1967 General Convention's "Resolution on Apartheid."

Resolved, That this Executive and Finance Committee does not conclude that the involvement of the banks participating in the Consortium Credit to the Republic of South Africa is positive in respect of helping to promote the activities listed below:

Education of Africans; Development of family life; Labor-Management relations and the collective bargaining process; Increased skills of the African labor force and integration into higher levels of leadership; Equalization of wage scales, pension provisions and social security; Hospitalization and other benefits; Breaking down of the pass law system and other restrictions

and therefore directs the Treasurer of the Executive Council to terminate the involvement of this Council with the said banks (except overseas missionary accounts, and those only until other media of exchange can be found); and be it further

Resolved, that with respect to any bank participating in the Consortium, this action by the Executive and Finance Committee shall take effect immediately after the next annual renewal date of the line of credit in question, provided that such bank shall continue its participation in such line of credit thereafter; and be it further

Resolved, That the Executive and Finance Committee offer all assistance in its power which may aid the banks to understand the significance of the proposed action in the eyes of this Church and the profound concern which led to it.

NATIONAL DAIRY MONTH

HON. MARTIN B. McKNEALLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. McKNEALLY. Mr. Speaker, under leave to extend my remarks in the RECORD, I am pleased to include an editorial which appeared in the Delaware County Mirror of Stamford, N.Y., on June 18, 1969, on the observance of National Dairy Month. Representing as I do a dairy producing area, I want to take advantage of this opportunity to bring to the attention of the House membership the great nutritional value of milk and other dairy products.

The article follows:

DAIRY MONTH

We are observing National Dairy Month and judging by the interest shown by readers and advertisers in our own Four-County Area, it's a time for paying real tribute to the entire dairy industry from producers right on through to the processors, distributors, manufacturers, sales people and consumers.

In this region interest naturally centers on the dairy producer.

In the dairy farms nestled in our valley and the surrounding area we have a lasting and solid treasure. It is worth keeping and strengthening.

That is what makes National Dairy Month more than just another in a long series of catch phrases where we are concerned.

With New York state ranking second in milk production in the entire nation, it is not surprising that for most farmers in this area milk provides the principal source of income.

Now one of the biggest industries in the United States, dairying is dependent upon the public consumption of milk and its by-products for continued prosperity. But this is only one reason why we should all use these essential foods. Milk provides a prime source of vitamins and minerals needed for the healthy development of youngsters and the well-being of adults.

Comparatively inexpensive on a basis of value received, milk is one of the soundest investments for the family food dollar. It is to the advantage of all that so many of our area farms have been converted to the production of this health-giving food.

In the interest of the area economy, as well as from a standpoint of good nutrition, milk is vitally important to all of us. The more of it we consume the more we help ourselves in more ways than one.

THE GUIDELINES RACKET: CONSPIRACY OF CIVIL RIGHTS AGENCIES

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. RARICK. Mr. Speaker, to those who have observed and followed the guidelines manipulations—it eventually becomes quite apparent that there is a working relationship between HEW and the Justice Department. These bureaucrats operate by force, half-truths and deception to move the American people toward the desired goals and stated purposes of the minority which plots the course of our country.

The American people are more and more observing that when provisions of law enacted by the Congress do not conform to the desires of the conspirators, the law is simply ignored, or rewritten as "guidelines." Who are the criminals—those people who may disobey the illegal guidelines, or those bureaucrats who write the guidelines in defiance of the law?

Mr. Benjamin Ginzburg, a retired civil servant and informed patriot of Arlington, Va., has prepared an execellent memorandum on what he terms the "Guidelines Racket", which I include following my remarks, accompanied by a newsclippping from the New York Times of May 31 referred to in his memorandum.

The articles follow:

MEMORANDUM ON THE "GUIDELINES RACKET"

(By Benjamin Ginzburg)

I am a retired civil servant, whose last post was that of Research Director for the U.S. Senate Subcommittee on Constitutional Rights. I have devoted some of my leisure to testifying before Congressional committees on public issues (*e.g.,* I testified against the confirmation of the Abe Fortas as Chief Justice) and to protesting abuses of power (when I come across such things) by government agencies. In March and April of this year I came across linked abuses by 1) the Equal Employment Opportunity agencies, 2) Office of Civil Rights of HEW, and 3) the Housing Assistance branch of HUD. In all three cases, the authority of the Civil Rights Act of 1964 was being invoked in support of policies that not only were not authorized by that law, but were in several cases specifically forbidden. Since all this was being done under cover of the authorization by the Civil Rights Act that the various agencies may develop guidelines or interpretations of the substantive provisions, I baptized the linked abuses as the "guidelines racket."

Here is some of the evidence about the linked abuses. At the end of March, Senator Dirksen protested to a Senate committee that the Equal Employment Opportunity agencies were harassing businessmen by seeking to impose Negro employment quotas—something which the Civil Rights Act of 1964 specifically forbids. Most of the press omitted the reference to employment quotas and merely reported Dirksen's complaint about the harassment of businessmen—a complaint which they proceeded to dismiss as motivated by the Senator's desire to protect employment discrimination. Since I knew from personal acquaintance with the experience of one firm that there was substance behind the Dirksen complaint, I wrote letters to the New York Times and Washington Star taking them to task for their attacks on Dirksen. Neither letter was published.

In the last week of March, the press reported that the Office of Civil Rights of HEW issued orders to the heads of state college systems with a past history of segregation (Pennsylvania and Maryland, among others) directing them to desegregate their colleges under penalty of forfeiting all Federal financial assistance. I was aroused by a startling passage in the desegregation orders. The passage reads: ". . . *to fulfill the purposes and intent of the Civil Rights Act of 1964 it is not sufficient to maintain a nondiscriminatory admissions policy if the student population continues to reflect the former racial identification of that institution.*" The reason why I was startled by this passage was that I had just finished reading the text of the Civil Rights Act of 1964 and found that it defined "desegregation" as nondiscrimination in the assignment or admission of pupils or students. That act also prohibits the assignment of students in order to overcome racial imbalance. I wondered therefore how the order could be implemented—how the racial identifiability of a predominantly Negro or a predominantly white college could be overcome—without running afoul of the law. Shortly after the orders were issued, the Star carried a story about the perplexity of the Maryland educators, with one of them coming up with a "Rube Goldberg" proposal for the state to grant scholarships to Negroes good only in predominantly white colleges and scholarships to whites good only in predominantly Negro colleges!

On April 20 I came upon tell-tale evidence that the Department of Housing and Urban Development was also among the agencies abusing the authority of the Civil Rights Act of 1964. The evidence came in the course of an article by Ben Gilbert in the Washington Post praising the Regency House project for the elderly poor and urging that it be put through without delay. The Regency House is a luxury apartment house with air conditioning and a swimming pool situated in the high income area of upper Connecticut Avenue. Under the plan, which barring last-minute legal difficulties has now been signed, sealed and delivered, families of elderly poor will occupy apartments in this house and pay about one third of the commercial rents charged to present occupants. Gilbert, using official sources, defined the new policy adopted by HUD requiring the location of public housing projects in high income areas as follows:

"Nearly a year ago, Don Hummel, then HUD assistant administrator for renewal and housing assistance, told local housing authorities to do what they could to locate public housing outside the ghettoes, *in ac-*

cordance with the nondiscrimination requirements of the 1964 Civil Rights Act. [Emphasis my own] Hummel pointed to a 1967 low-rent housing manual directing authorities to select sites 'which will afford the greatest opportunity for inclusion of eligible applicants of all groups regardless of race, color, creed, or national origin, thereby affording members of minority groups an opportunity to locate outside of areas of concentration of their own minority group.'"

The low-rent housing manual is supposed to function as a set of guidelines for the application of the provisions of Title VI with regard to nondiscrimination in public housing projects. But what are the housing provisions of Title VI? They are included in a general paragraph reading as follows:

"No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance."

In my simple mind I could not help wondering about the magic that derives the Ben Gilbert paragraph, with all its tortuous formulations, from the simple language of Title VI.

A friend of mine, a retired government lawyer, suggested that I might be able to clear up my difficulties in understanding the policies of these various agencies by asking them for the legal opinions (that is to say, opinions of their own counsel) on the basis of which the policies which I am complaining of were adopted. I realized that in the case of the Equal Employment agencies the policies complained of were probably not put in writing, but in the case of the other two agencies (HEW and HUD) I followed my friend's suggestion and wrote letters on April 22 asking for the respective legal opinions justifying the policies I was questioning.

To date I have not received a satisfactory answer from either agency, but as a result of correspondence, conversation and research my worst fears have been confirmed. We are in the presence of a conspiracy by civil rights agencies to frustrate the will of Congress and carry out policies pushed by minority group agitators—policies which are doctrinaire and destructive of the welfare of the nation as a whole, including the welfare of the minorities.

To begin with HUD, I addressed my letter of April 22 to Secretary Romney. Under date of May 5, Assistant Secretary Lawrence M. Cox replied that "the Secretary has asked me to reply, and I shall do so shortly." On May 26 he wrote to Congressman Broyhill (whose assistance I had requested) assuring him that a detailed reply was being prepared for me. I am still waiting for that reply, but I learned in conversation (June 2) with Mr. Notti, of his office, some of the reasons for the delay. He told me that the adoption of the new site policy for public housing projects was not preceded by a legal opinion justifying the policy from the point of view of legal authority, but that the lawyers had simply cooperated with other officials in drawing it up. For this reason, he explained, it was necessary to prepare a legal justification from scratch in answer to my inquiry, and this required careful preparation and clearance, particularly in view of the fact that it was expected that I would publicize the agency reply. I wrote Mr. Cox yesterday expressing my amazement at the novel development in government, whereby the administrators of a great agency embark on a policy without a written statement of the legal authority therefor. I thought it was on a par with trying to run a business without possessing a fire insurance policy.

From HEW I received a reply dated May 22 and signed by one Burton Taylor, civil rights specialist. The letter simply asserted the proposition for which I wanted a reasoned proof—to wit, that "under Title VI of the Civil Rights Act of 1964, state college systems which had previously segregated components must take steps to eliminate the racial identifiability of institutions within the system if a nondiscriminatory admissions policy has not had this result." The letter appended three court case references, and it turned out that the one court case which dealt with education on the college level *rejected* the demand that colleges have to take steps to eliminate racial identifiability, in addition to maintaining a nondiscriminatory admissions policy. This decision has been affirmed by the Supreme Court (over the objection of Justice Douglas).

The fact that HEW was taking a position in advance of what the Supreme Court is willing to accept and is being "more Catholic than the pope" led me to delve into the mysterious relationship between HEW's Civil Rights Office (which is charged to withhold funds from school boards not meeting the desegregation requirements specified in the Civil Rights Act) and the Department of Justice (which brings and stimulates suits to further interpret and apply the Supreme Court's *Brown* decision of 1954). I found unexpected help in a New York Times front page article on May 31, which while lauding the work of the two agencies explained how they cooperated.

The Times article describes the cooperation between the two agencies under the Democrats and indicates that the Nixon Administration proposes to intensify the cooperation. "Under the Democrats," the article declares, "these two approaches by the two departments were used as parallel devices. *Frequently, when a requirement for desegregation was made stiffer by the Health, Education and Welfare Department, the Federal courts, under the prodding of Justice Department officials and other civil rights lawyers, would stiffen their requirements to conform to the new desegregation standards.* It worked the other way, too, with the Health, Education and Welfare Department using a new court standard as leverage to gain acceptance of a similar change in its own guidelines."

The last statement is a bit of a euphemism, for the evidence is that the HEW uses a court decision not for the purpose of catching up but for the purpose of staking out new ground in advance of the court decision which it hopes to get the Supreme Court (via collusion with the Justice Department) to accept later on. But what stands out in the Times article is the admitted (and even boasted of) fact that the HEW operates on a progressive interpretation of the definitions and standards set down in the Civil Rights Act of 1964. In other words, it operates by the procedure of tightening the screws after the public has become accustomed to a degree of pressure.

There is of course nothing wrong with Congress writing a law that goes into effect in specified stages. But the fact remains that Congress did not write such a law in Title VI of the Civil Rights Act of 1964. For a bureaucratic agency to interpret a specific statute progressively—calculating each time what they think they can get away with—is an unspeakable outrage on the American people. Never mind that the Supreme Court has succumbed to the vagaries of a progressive interpretation of its original decision in the *Brown* case of 1954. (The Supreme Court problem will have to be dealt with at the proper time.) Supreme Court decisions applying (as in the *Green* case) "higher standards of desegregation" in court cases brought before it do not legitimize—in my opinion—the higher standards used by HEW in administering its responsibilities under the Civil Rights Act of 1964. If Congress has chosen that funds should be cut off from school boards and institutions which do not meet the standard of desegregation defined as nondiscrimination, that standard should remain the standard for cutting off funds regardless of what the Supreme Court does in court cases brought under the Brown decision.

Still less can HEW use Supreme Court decisions on public schools as authority for what it wants to do in the case of colleges. It cannot count on future decisions of the Supreme Court to legitimize its grab for power, particularly when the facts are that in its own court cases the Supreme Court has rejected that HEW standard.

If we combine the revelation that HEW uses a progressive interpretation of the law with the confession by HUD that it operates without a legal justification of its new policies, the picture we get is a truly alarming one. The Executive Department gets Congress to pass a law, and it accepts provisions that it does not like. But the next day it sticks the law into its pocket, and carries out policies which violate the law. This is a corruption of democratic government that is far more serious and far more dangerous than the mere monetary corruption of a few officials. This is a corruption that turns a government of laws into a government of invisible men, and turns our democracy into a dictatorship.

[From the New York Times, May 31, 1969]

INTEGRATION PLAN WOULD JOIN WORK OF TWO U.S. AGENCIES—HEALTH AIDES WEIGH ACTION WITH JUSTICE DEPARTMENT ON THE NATION'S SCHOOLS—EFFICIENCY IS THE AIM—CASES INVOLVING CUTOFFS OF FEDERAL FUNDS WOULD BE LINKED WITH LAWSUITS

WASHINGTON, May 30.—The Department of Health, Education and Welfare is studying a plan that it says will desegregate schools more efficiently and smoothly in both the North and the South.

Under the proposal the Health, Education and Welfare Department and the Justice Department would work together with the Federal courts.

The plan, which has been discussed for several weeks and has been the source of some press speculation, would differ markedly in a procedural way from the approach used by the Johnson Administration.

Whether it would result in a substantive difference—that is, in more or less desegregation—is difficult to estimate.

EXERTING TWO LEVERAGES

Under the present system, the Justice Department, acting on a citizen's complaint, can bring a lawsuit against a school district to force the district to remove racial barriers, or to speed their removal if desegregation seems to be lagging.

In another part of Washington, the Department of Health, Education and Welfare attacks segregation with a different weapon. It can, and in many cases has, cut off Federal funds to school districts that are found to be violating the Civil Rights Act of 1964 by maintaining racial discrimination.

All the districts that have lost funds are in the South. The Nixon Administration has said it will move against Northern segregation, but that is in early stages.

COMPLEMENTARY ACTION

Under the Democrats, these two approaches by the two departments were used as parallel devices. Frequently, when a requirement for desegregation was made stiffer by the Health, Education and Welfare Department, the Federal courts, under the prodding of Justice Department officials and other civil rights lawyers, would stiffen their requirements to conform to the new desegregation standards.

It worked the other way, too, with the Health, Education and Welfare Department using a new court standard as leverage to gain acceptance of a similar change in its own guidelines.

Some Republicans, noting the continuing turmoil and uncertainty surrounding school

desegregation, have decided that this two-headed approach in the executive branch can be improved upon.

They believe the operation will run more smoothly if the two departments work together on the same cases instead of each pursuing its own.

The Health, Education and Welfare plan is mainly the work of Robert H. Finch, Secretary of the department, and such top associates as Leon Panetta, head of the agency's Office for Civil Rights. Under it, the Justice Department would bring a suit against a district or a group of districts and the Health, Education and Welfare Department would be prepared to cut off funds for those districts if they did not comply with the resulting court order to desegregate.

The Justice Department, for its part, would be prepared to file suits against other districts whose funds had been cut off by the health agency and that had simply accepted the loss as the price of keeping segregation.

The Justice Department might be especially helpful in bringing suits against districts with Negro majorities. These have been the most difficult for the Health, Education and Welfare Department to deal with.

BEING TESTED IN CAROLINA

The cooperative approach is being tested in a South Carolina case now pending before a four-judge Federal Court panel.

Twenty-two South Carolina districts with token integration in schools were taken to court in an effort to speed their desegregation. The plaintiffs were individual Negroes in some cases and the Justice Department in others.

The four judges on March 31 ordered the 22 districts to work with Health, Education and Welfare experts to draft acceptable desegregation plans. They had 30 days to produce the plans, but that deadline was extended.

The judges said on March 31 that they would approve any plan agreed to by the defendants and the education department unless the plaintiff—an individual or the Justice Department, as the case might be—should persuade the court that the plan did not meet constitutional standards.

PLAN FROM AGENCY

For districts that did not agree to a plan, the Health, Education and Welfare Department was to submit a plan on the district's behalf.

Officials of the department argue that this approach, or some variation of it, would prevent the discrepancies that sometimes now exist between those districts operating under the department's compliance plans and those operating under court-ordered plans.

They concede that the block suit approach as in South Carolina, may be an ideal procedure but difficult to fulfill. The Justice Department is short of men and money in its Civil Rights Division, and filing suits on such a vast basis would require much of both.

LAW AND ORDER

HON. WENDELL WYATT

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. WYATT. Mr. Speaker, during his tenure as Attorney General of the United States, Mr. Ramsey Clark did little to create a sense of urgency for action to meet the serious breakdown in law and order in so many areas of our country. Now that he is out of Government, Mr. Clark has gratuitously called for the retirement of Mr. J. Edgar Hoover, Director of the Federal Bureau of Investigation.

While Attorney General Mr. Clark quite obviously was privy to the procedures governing the use of electronic surveillances by the Federal Bureau of Investigation allowed only with the full approval of the Attorney General. Yet, when Mr. Clark had some power as Attorney General to hasten the retirement of Mr. Hoover, he apparently did not exercise it. Under the circumstances no creditability can be given Mr. Clark's call for Mr. Hoover's retirement, nor should it be.

In the absence of Mr. Clark as Attorney General we have seen an upsurge in zeal to enforce existing laws against crime and civil disorders, which were mounting when he was the chief law enforcement officer of the land. In Washington, D.C., where bank robberies under Clark were almost a daily occurrence, we have seen a dramatic change with bank robberies, now a rarity.

Mr. Hoover, the great Director of the Federal Bureau of Investigation, needs no defense, but I could not let Mr. Clark's bogus call for his retirement go unchallenged.

MEMORIAL DAY SERVICE REMARKS OF HON. JAMES D. HITTLE, ASSISTANT SECRETARY OF THE NAVY FOR MANPOWER AND RESERVE AFFAIRS

HON. L. MENDEL RIVERS

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. RIVERS. Mr. Speaker, one of the names that will live forever in the memory of all Americans, one of the hallowed names of our tradition, is Belleau Wood, where, in the fateful summer of 1918, Americans fought one of the decisive battles of World War I. For the Memorial Day service this year at the Belleau Wood Cemetery at Chateau Thierry, France, the guest speaker was the exceptionally articulate Assistant Secretary of the Navy for Manpower and Reserve Affairs, the Honorable James D. Hittle.

In his address, Assistant Secretary Hittle vividly recreates the importance of that memorable battle and reminds us once again not only of the great sacrifices Americans have made to the freedom of France, but also the great contribution that Frenchmen once made to the freedom of America. He says that the bond between France and the United States was forged in combat and is for all eternity.

I urge all my colleagues to read this moving address, which follows:

REMARKS BY HON. JAMES D. HITTLE

Ladies and Gentlemen: Today we are gathered in remembrance of those who have fought in the defense of freedom. Such a memorial service as this is good in many ways. It is good because, in the hectic pace of today's life, there is a tendency even by the most well-meaning, to forget things that are more important than the problems of the moment. We are all too often forgetful of the fact that the good things we have—our freedom, our way of life, are not so much the products of our own efforts as they are the heritage which has been passed to us by those whom we remember with this memorial service.

These things that make France and America great are in many ways the peculiar attributes and possessions of our Nations and, in a sense, of the free world. What we enjoy and accept as almost routine and commonplace are the objects of envy by those who do not have them.

Oppression has always had as it prime target the destruction of freedom. The reason is simple—oppression can never conquer while an example of freedom still exists by which the oppressed can gauge the nature of the tyranny that has engulfed them.

This freedom, which above all else is the foremost feature of our governmental institutions and beliefs, has been assailed and attacked by oppressors. We enjoy this beneficence because those whom we pause to remember today, fought and died so that we could live as we do.

This memorial service is an opportunity for remembering many things—achieved and preserved by suffering, bravery, God-fearing and God-trusting determination; that those who brought forth our independence on the bloody field of battle lit the torch of freedom which has been handed down from generation to generation of our departed comrades; that each generation of veterans has manned the shell-torn ramparts of freedom, holding high that torch.

Thus, this is a memorial service for remembering, for reverent recollection, for realistic reflection.

We remember that month of mortal suspense of June 1918. The Imperial German Armies had commenced their fourth offensive and were on the road and marching for the capital of France.

We remember that moment of history when the American troops were committed for the first time under American command.

We remember that it was in these now-quiet woods where one of histories' most vicious and decisive battles was fought. It was here in Belleau Wood where the enemy and the defenders of freedom both knew they would find the strategic key that opened or locked the door to Paris.

We remember that far more was at stake than these woods which are only about one mile square. At issue were the lives of brave men, the fate of Paris, the fate of France, and in a real sense—the fate of freedom.

We remember that it was in these strategic and historic woods that the German Imperial Forces massed on 16 June 1918, and that nine days later, on June 25th the United States Army and Marines were able to report: "The hills are entirely ours."

We remember the tremendous and tragic cost of that decisive and necessary victory. Almost a thousand Americans were killed and over three thousand wounded. And, as the smoke of battle cleared, as the ebbing gunfire was lost in echoes rolling across the shell-torn French countryside, as the stretcher-bearers brought in the wounded and dead, this ground was transformed by the ordeal of combat into hallowed shrine at which we now reverently gather.

Before the bitter conflict of World War I was over, the thousands of Americans who died in the battles of Belleau Wood and in Marne Valley during the fateful Summer of 1918, were joined in eternal rest by the thousands of other Americans who fought shoulder to shoulder with the soldiers of France and our other Allies in the common defense of a common freedom.

We remember, those who died that freedom might live. Here that sacrifice was made by the young men who came to France because here was where freedom was threatened. Each who marched toward the sound

of enemy guns has enshrined himself forever on the honor roll of freedom. Young men like:

Corporal Bert Evert Ames, Croix de Guerre, from the farmland of Kansas;

Private William F. Bell, Croix de Guerre, from New York;

Corporal Robert A. Burhans, Croix de Guerre, from Michigan;

Navy Gunner Walter R. Cornell, Distinguished Service Cross, from Illinois; and

Corporal William Hanson, Distinguished Service Cross, from Oregon.

These young men were but a few of the thousands who found eternal rest where they paid the supreme price for our freedom.

We remember, also, that once again, in World War II, oppression challenged freedom. And, once again, American young men left their homes, their pleasant land, and their loved ones. Once again, they stood shoulder to shoulder with the French in defense of the freedom in which French and Americans have long been united.

We remember, by honoring these fallen of World Wars I and II, the lamentable lesson of history—that each generation in its time must be willing and ready to continue, with utmost determination, the struggle to preserve our independence and freedom. This, in essence, is at once the heritage, the responsibility, and the task which has been passed to us, and which we must pass on as intact and secure as we received it.

And, something else that we must remember is this: On this Memorial Day, while we are honoring the American dead who fell in defense of freedom in France, Americans are honoring and remembering Frenchmen who fell to bring freedom to America.

We must never forget that were it not for the support of the French nation and the sacrifice of French fighting men, America would not have become a free and independent nation.

It was George Washington and our other Revolutionary leaders who realized that we must have help from France to win our freedom. It was in February of 1778 that Benjamin Franklin, our first ambassador to France, signed, on behalf of the United States, the Treaty of Alliance with France. That Treaty bound our two nations together in our struggle for freedom.

That Alliance was more than a casual diplomatic nicety. France delivered the military support America so direly needed. The French assistance to George Washington's Army is an inspiring story and it should be told frequently.

It is the story of seven first-line regiments of the French Army that came to America. It is the story of the skillful generalship of one of Europe's most able commanders, Count Rochambeau.

It is the story of how this eminent French General willingly subordinated himself to George Washington and served our cause of freedom ably and loyally.

It is the story of French Regulars with whom Rochambeau and Lafayette marched southward along the Atlantic seaboard to the fateful battle of Yorktown. There, fighting bravely alongside Washington's Continentals, the soldiers of France helped us gain our independence.

It is the story of a French Fleet under Admiral De Grasse, who at that critical moment of history engaged the British Fleet and sent it scudding northward. It is the story of how this naval battle, beyond sight of the Virginia capes, in which a French Fleet under a French Admiral, without a single American soldier present, sealed the fate of the Imperial British Forces in Yorktown and assured victory for French and American arms in our Revolutionary War.

On the historic battleground of Yorktown, there is a monument. On that monument are inscribed the names of the soldiers of France who fought and died there to help bring freedom to America. Among them are these sons of France:

Privates Etienne Cortois, Antoine Francois, and Joseth Desmont of the Bourbannais Regiment;

Privates Jean Francois Aimont, Nicolas Bourden, and Jacques Antoinne Chatillori of the Agenois Regiment;

Privates Jean Bidot, Andre Carar, and Sidet Castail of the Touraine Regiment; and

Captain Jean De Sireiul of the Gatinais Regiment.

Americans today reverently remember and honor these and the other brave sons of France who left their homeland, their pleasant fields, and their loved ones. Not only are their names enshrined on the solemn monument of Yorktown; their names are etched deeply into the hearts of all who love freedom.

And so at this memorial service, we remember the gallant French and American fighting men who have done their duty and marched on, leaving to us both the heritage of freedom they created and preserved, and the responsibilities of its stewardship. The spirit that characterized this memorial service is eloquent proof that the memory and reverence for our departed French and American heroes is not just for a day but for the ages.

By your presence here today you have demonstrated again the eternal truth that the memory of those who fought the good fight cannot die.

You have demonstrated, also, that between France and America there is a bond—

Forged in combat.

Tempered in the crucible of conflict,

Sanctified by blood shed in the defense of freedom,

A bond of French-American fraternity that is for eternity.

AN OLD-FASHIONED MOTHER

HON. LAURENCE J. BURTON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. BURTON of Utah. Mr. Speaker, it was my pleasure this week to meet a choice constituent on her first visit to Washington. She is Mrs. Alta Cutler Rust from Vernal, Utah. I think Mrs. Rust and her family are so modest that the people of Utah should know something of their accomplishments.

Eighteen years ago her husband died suddenly and left her with five sons, ages 5 to 14. Mrs. Rust, who was a graduate nurse, immediately took up nursing in the hospital, and has made a wonderful home for her boys and has instilled in them the principles that have made America great.

Richard Dilworth, her oldest son, has his Ph. D. from the University of Wisconsin and is on the faculty at the University of North Carolina. He is a young man with great promise who has his feets squarely on the ground in the face of the present discontent and dissent on the campuses. The next son is David, who is also a schoolteacher. He teaches in his home town of Vernal. His degree is from Brigham Young University. Joseph, the third son, graduated toward the top of his class in law school from the University of Utah 2 years ago. The fourth son, Harold, is a graduate of the Air Force Academy. As a matter of fact, Harold graduated first in his class from the Academy. The youngest son, Marvin, still has a few months to go before he receives his degree from Brigham Young University.

All five sons are devout L.D.S. church members and have been married in the Temple. Four of the sons have been on missions for the Church of Jesus Christ of Latter-Day Saints. The fourth son, Harold, was L.D.S. Servicemen's Group Leader at the Air Force Academy and is going on to special training for the Defense Department. Three of the boys are Eagle Scouts.

These young men believe in the old-fashioned virtues of making their own way, of hard work, and of upholding the institutions which have made our country great. This is a family to whom adversity has been a challenge. I am very proud of Mrs. Rust.

WELFARE MOTHERS IN ACTION

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. CARTER. Mr. Speaker, recently my attention was brought to an editorial entitled "Welfare Mothers in Action." The conduct of the mothers at the national conference of social welfare would definitely not win friends nor favorably influence people. Actions such as those recounted built antagonism toward recipients.

I submit this editorial for your perusal.

WELFARE MOTHERS IN ACTION

(By Thurman Sensing)

Some of the ugliness and moral cowardice on the national scene these days is almost beyond belief. Certainly, it is hard to believe what happened at the recent National Conference of Social Welfare in Washington. Yet it did happen.

The Washington Post was handicapped in its reporting of the shocking events at the conference, for much of what was said could not be printed in a family newspaper.

The 5,000 social workers who gathered in the capital for their annual meeting were subjected to a stream of four-letter obscenities. Members of welfare "rights" organizations jumped on the stage and took over the microphones. They shouted vile words at the audience of social workers. These workers were called "racist pigs" and members of the "white imperialistic oppressive society." Such terms were mild compared to other words and phrases employed. The Washington Post referred to "obscene" demands made by the welfare mothers.

But that wasn't all. When one of the captive audience attempted to lead a mass walkout from the conference room a human chain of welfare mothers blocked the exits. Dr. George A. Wiley, head of the welfare protesters, declared nobody was going to leave until thousands of dollars were anted up for more of the poor to attend the national conference by getting contributions. With that, plastic ice buckets were passed around for financial contributions.

The Post reported that it was necessary for the temporary ballroom dividing wall to be removed in order for the delegates to the conference to escape.

This unspeakably crude and insulting session was not the last, however. Wiley and his

welfare mothers carried out other interruptions of the proceedings during the remaining days of the conference. Unscheduled speakers, who broke into the meeting, included black social workers, Puerto Ricans, an Indian and a young woman who shrilled that she was a former mental patient and an ex-drug addict.

The social workers apparently were stunned by the experience. One of them told a reporter: "I said to myself this couldn't happen to US."

As shocking as the behavior of the welfare mothers, was the craven attitude of the outgoing president, Dr. Arthur S. Flemming, who also is president of the National Council of Churches. He didn't order the silencing or removal of the welfare mothers who shouted obscenities at the delegates. On the contrary, against the advice of some of his board members, he refused to stop anyone from speaking. When the time came to turn over the presidential gavel to the incoming president, Dr. Flemming bragged "I did not use this gavel once this week—I didn't think it was appropriate."

The public has no idea of what the delegates thought of Dr. Flemming's toleration of obscenity-shouting disruptionists. But many Americans familiar with the story of these shocking events in Washington must be sickened by Dr. Flemming's attitude. The country simply cannot afford mental confusion or moral leniency in confrontations with barbarians. This is what America really faces today, and which was manifested at the social workers conference in Washington—barbarism.

Educated men and women who refuse to apply the remedies of law and order when confronted by savage behavior, as in the case of the welfare mothers at Washington, are exposing the nation to rule by barbarians.

It is a mistake to think of barbarism and savagery as features of the ancient past or remote jungle areas. Even the most advanced societies can be exposed to primitivism within. The methods used by the welfare "rights" organizations are manifestations of this primitivism. In New York City, members of welfare "rights" have attacked city welfare officers, broken furniture and upset files—all because they weren't getting the size relief payments they demanded. Toleration of this kind of violent behavior is impossible if America is to remain a civilized country. Some people, like Dr. Flemming, apparently regard toleration as the ultimate virtue, but it is obvious from the ugly events of our time that excessive toleration is a major evil. It opens the door to the worst excesses in human behavior.

It is time for all Americans to view toleration in perspective and to insist that the organizations to which they belong adopt a get-tough policy with respect to disruptionists.

LITTLE PEOPLE HURT AGAIN

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. RODINO. Mr. Speaker, I, as so many other legislators, businessmen, and people of all walks of life, was concerned and shocked by the recent full percentage increase of the prime interest rate from 7½ to 8½ percent. I am heartened that the Banking and Currency Committee is currently holding hearings regarding the spiraling rise of interest rates and I think that the following editorial from the Nutley, N.J., Sun hits the nail on the head when it states that "Little People Are Hurt Again":

LITTLE PEOPLE HURT AGAIN

(By Frank A. Orechio)

The recent increase in the prime interest rate to 8½% is bad news for all of us little people who have to work for a living and on occasion find it necessary to finance capital improvements in business and the numerous items that ambitious home owners buy to make them feel they are sharing a piece of the technological progress of the Twentieth Century.

Interest on automobile loans must now go higher. Interest on home repair loans will cost more. Interest on loans for the purchase of furniture and various kitchen appliances will make these purchases cost more.

There is nothing anyone buys on time today that wouldn't cost more than it did before the interest hike.

We hear Washington politicians talking about ways and means to keep down inflation. We hear Washington officials talking about maintaining the surtax on the income tax in order to control inflation.

Nothing in the field of economics has happened in recent months more devastating to the pocketbook of the little man than the outrageous increase in the interest rate.

It is time a meaningful investigation of this problem is conducted at our state and national levels. The policy of uncontrolled interest rate rises cannot be endured by people who already are over-burdened and are finding it difficult to make ends meet.

Is there one legislator willing to take on the burden of protecting the little man against the financial lobbies? We hope so.

SPORTS READY TO COLLECT ON PAY TV

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. DINGELL. Mr. Speaker, a recent article in the Washington Post carried the headline "Sports Set To Collect on Pay TV." Because of the significant impact that pay television may have on the American public, I ask unanimous consent that the text of that article appear in the RECORD at the end of my remarks.

Most people think that pay TV, now authorized under Federal Communications Commission action, would merely supplement their present free television programing.

The fact is pay television would soon be the sole outlet for much of the most widely viewed programing which is freely available today.

Pay television interests naturally will look toward the purchase of broadcast rights of the most popular events, since these would provide them the greatest revenue.

A subscriber base of only 16 percent of the television homes in this country paying only $2 per week would generate approximately $1 billion for the pay television licensees. The tremendous economic power could then be wielded to outbid existing free television networks for the biggest drawing events. This same strategy could apply to recent movies and entertainment programing highlighting the big-name stars.

An argument offered by the pay TV advocates is that programing on free television would be supplemented by pay television. The truth is that it would be supplanted instead of supplemented.

In this time of grave concern over the lack of communication between the different segments of our society, it should be noted that, according to the fourth report and order of the FCC, approximately 30 percent of all families in the United States could not afford to subscribe to pay TV.

Further, as the top-rated programs are siphoned off free television by pay TV, those public service programs and news shows which depend on the financial support from other programing would be eliminated.

Congressional responsibility is being tested by the FCC. I urge my colleagues to join in an effort to block this ridiculous scheme. It is this body which will bear the brunt of that charge should we defer to the FCC. Gentlemen, I suggest in the strongest terms that we will be rightly accused of being derelict in our duty if we let an administrative agency foist pay TV on the American public.

The text of the Washington Post article follows:

SPORTS READY TO COLLECT ON PAY TV

The prospect of a bountiful new source of revenue for sports came closer to realization following the Federal Communications Commission order yesterday permitting the start of pay television.

There are legal, technical and other obstacles to be overcome before the householder will be asked to pay for his television fare, but Dick Bailey Sr., president of the Hughes Sports Network, said, "It is coming, there is no use fighting it."

Art Modell, president of the National Football League, said, "I believe it is 'way, 'way off for pro football. We're married to free TV, except for a special game or two. I could understand pay TV in an area which has been blacked out of free TV during postseason games."

Harry Markson, director of boxing for Madison Square Garden, said, "We will be most interested in the developments of pay TV."

The Garden recently contracted to show 125 sports events on community antenna television over a one-year period, including all the games of the New York Knickerbockers and New York Rangers.

Baseball Commissioner Bowie Kuhn could not be reached for comment.

Pro football already has made provisions for pay TV in the merger agreement between the two leagues which takes full effect in 1970.

With most stadiums already playing to capacity crowds and negotiations for regular Sunday game telecasts reaching the choking price, pro football recently went to prime-time Monday night telecasts for 1970 to raise an extra $8 million in revenue.

At the time of the merger between the American and National football leagues, in 1966, owner Ralph Wilson of the Buffalo Bills estimated that pay television of the Super Bowl could mean $25 million to $30 million in revenue for a game that now brings in $2.5 million from free TV.

"Wilson is probably right," president Bailey of the Hughes Sports Network said yesterday. "If I had not sold this network to Howard Hughes, I know I would be going into pay TV now instead of bucking the three conventional networks.

"Only Mr. Hughes can say what we will do now. He makes the decisions."

Bailey revealed that the Hughes network bid on the 13 Monday night telecasts for 1970, which went to the American Broadcasting Co.

"We did not bid lower than ABC," Bailey said. "There were other circumstances."

Bailey added, "There is a new era coming and a lot of people will be scrambling to get into it. Free TV will have to worry about losing sports to pay TV."

But not for two years because sports events regularly shown on free TV cannot make the switch to pay TV until that much time has elapsed under the projected regulations.

COOK COUNTY EMERGENCY COMMUNICATIONS PATROL, INC.

HON. HAROLD R. COLLIER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. COLLIER. Mr. Speaker, most people are against crime, but few are willing to try to do something constructive about the problem. Among those who are trying to help the police in their efforts to prevent crime and to apprehend those who commit crimes are the members of the Cook County Emergency Communications Patrol, Inc.

This nonprofit organization, which has headquarters in Melrose Park, in my district, is licensed by the Federal Communications Commission. It is composed of volunteers whose main objective is to assist law enforcement agencies. Its director, Robert Ruge, received the American Legion's Award for Law and Order this year.

Through the use of its citizens band radios, the emergency communications patrol has helped reduce vandalism in the schools. Radio equipped cars patrol the various school districts, the base station of the patrol being located in the police station.

Mr. Speaker, having received permission to extend my remarks, I submit an article in which the organization discusses its program. My colleagues will, I am sure, agree with me that it is better to cooperate with the police, as these public-spirited citizens are doing, than to hamper and harass them, as altogether too many irresponsible people are doing.

The article follows:

THE CITIZEN, COMMUNICATIONS, AND LAW ENFORCEMENT

This article is written so you, the public, will understand your responsibility to your fellow man. This title was chosen because it is felt that these are just three of the things that would make this country safer. With the rising crime in our country today, citizens need to help each other in any way that they can. Every time a crime is committed you, the public, take it upon yourselves to blame the law enforcement agencies when in reality had you, the public, remembered your responsibility to communicate with the proper authorities, many of these crimes could have been prevented. For the abovementioned reasons, a group of concerned citizens formed an organization to act as an extra pair of eyes and ears for our law enforcement agencies.

This organization realizes that one of the most important means of assisting our law enforcement agencies is communications. There are three ways that we can communicate with our law enforcement agencies: the telephone, appear in person, or, in our case, the two way radio (citizens band radio).

It is the object of our organization to assist all law enforcement agencies as well as the public. We have, within our organization, people, from all walks of life, who are willing to try to make our nation safe at all times.

Please help our law enforcement agencies by communicating with them if you see any suspicious or unlawful acts. Don't turn your backs on someone in need, because some day that someone might be you.

FOR WHAT PURPOSE?

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. OBEY. Mr. Speaker, recently a newspaper in my district, the Stevens Point Daily Journal, published an editorial which I believe sums up the feelings of a good many American people and a good many GI's. I commend it to the attention of my colleagues, as follows:

FOR WHAT PURPOSE?

The more than 50 Americans who died in the recent assault on "Hamburger Hill" in South Vietnam must have believed they were fighting for something. Men do not fight that well without a purpose.

"Hamburger Hill" is officially considered an American victory. The hill was taken, and enemy forces withdrew after sustaining heavy casualties.

But somehow it is difficult to rejoice. Only in this topsy-turvy war could a tragedy of the magnitude of "Hamburger Hill" be billed as a victory. The fact is that those men may have died needlessly. A week after their sacrifices, American forces abandoned the hill.

Either the objective had military value or it did not. If it was worth taking, it is now worth occupying. If it was not strategically or tactically vital, the sacrifices were not justified.

Maj. Gen. Melvin Zais shed light on the subject when he said that the only importance of "Hamburger Hill" was that enemy forces occupied it. He added that his mission was to destroy those forces.

In a few words, General Zais has given an insight into what is wrong with the conduct of the war in Vietnam. We no longer measure progress by the number of strategic positions captured, the amount of territory taken from the enemy, or the extent to which we destroy his supplies and deny him the ability to wage war. We now measure it in terms of the number of enemy soldiers killed.

In previous wars, killing was incidental to the achievements of the war's objectives. Review the brilliant strategies of Gen. Douglas MacArthur in World War II. He did not waste men. He bombed the enemy stronghold at Weewak, in New Guinea, apparently attempting to soften the defenses in preparation for a major landing of troops there. But instead he by-passed Weewak and sent his forces against lightly-defended Hollandia, farther up the coast, sealing off the enemy's strength at Weewak and avoiding the murderous sacrifice of lives that would have resulted in a frontal assault on that bastion.

Next he diverted attention to the strategic importance of the island of Palau as the next target, and he started to soften that stronghold. But there was no landing on Palau; the troops instead established a beachhead on Leyte, in the Philippines, where the enemy's capacity to resist was comparatively weak.

In the war going on today in Vietnam, America seeks not to win, but only not to lose, and killing seems to have become an end in itself. Body counts of enemy dead seems to have replaced traditional standards of judging military success.

WORKMEN'S COMPENSATION FOR MINERS SOUGHT

HON. ROBERT H. MOLLOHAN

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. MOLLOHAN. Mr. Speaker, the House will in the next few weeks consider health and safety legislation to protect this Nation's coal miners. This legislation is a very necessary step in an industry that once again has become a vigorous competitor in supplying power to the Nation's industrial plants and to its homes.

There are other measures that must accompany coal mine health and safety legislation. One of these measures, H.R. 8789, is under consideration now in the General Subcommittee on Labor of the House Committee on Education and Labor. The purpose of this bill is to grant workmen's compensation to the men injured in the mines who have not been covered by State workmen's compensation laws because of injuries prior to passage of such laws.

This effort is being carried out in conjunction with efforts at the State level to improve existing State workmen's compensation statutes. The following letter is part of this effort. It comes from the president of a labor organization charged with the protection of the interests of the vast majority of coal miners in our Nation. The United Mine Workers of America has by long years of experience in protecting the rights of miners developed an unparalleled expertise in the field of compensation and this letter deserves the careful attention of every Member of the House. The letter follows:

MAJOR IMPROVEMENTS IN THE RECENTLY ENACTED "BLACK LUNG" COMPENSATION LAW SOUGHT

DEAR GOVERNOR MOORE: The last regular session of the West Virginia legislature passed a bill which provided compensation payments for the victims of coal workers' pneumoconiosis, or as it is more commonly termed, "black lung." The legislation as finally enacted, however, fell far short of what we believe coal miners suffering from black lung should receive. This is the reason I have urged that you include in the call for the upcoming extraordinary session of the legislature an item relating to the workmen's compensation as it pertains to coal workers' pneumoconiosis.

I now reiterate my request that you include the subject of black lung in your call. If you do this we intend to ask the legislature to strengthen the section of the West Virginia workmen's compensation law dealing with coal workers' pneumoconiosis in the following way:

1. We want a redefinition of the term "occupational pneumoconiosis" which would eliminate any specific reference to X-ray diagnosis. In our view, occupational pneumoconiosis is a disease of the lungs caused by the inhalation of minute particles of dust resulting from coal mining.

2. We would like a broadened "presumption" clause which would provide for the presumption of black lung where the employe has been exposed to the hazards caused by coal dust for a period of five years during the ten years preceding the date of his last exposure and where the employe has sustained a respiratory disability. Of course, we recognize that the presumption could be rebutted by the industry.

3. We would like to extend the period during which a man can reopen his coal workers' pneumoconiosis claim after receipt of the last payment under a permanent disability award from one year to five years. We do this because black lung is a progressive disease and it is apparent to us that the one-year limitation, as it is currently written, is too short to fully cover the individual's case.

4. We would like an amendment to the current statute so that the permanent disability from occupational pneumoconiosis will be related to the employe's ability to perform his usual occupation.

5. We feel in all justice the coal miner deserves the same medical benefits when he has contracted black lung as are payable to victims of industrial accidents—and we want him to receive them. Black lung is an occupational hazard and we can see no reason why its victims should not be entitled to medical care.

6. We would like to change the time limitations for the filing of claims for black lung so that they may be filed within three years from the date of the last exposure, or one year from the date when the miner first learns that he has contracted black lung, whichever last occurs. Because black lung is a progressive disease and is so insidious in the way it develops in the lungs of a coal miner, we firmly believe that the miner should have the maximum latitude on the time period in which he must file to secure compensation.

7. The present medical boards have not been able to keep pace with the number of claims pending. We feel that serious consideration should be given to procedures which will shorten the time required for board action, either within the two-board structure or by a significant change in that structure if such a change is more feasible.

8. Finally, we believe the code should be amended to permit a civil action by the employe in the event of an accident where the cause of the accident was gross negligence on the part of the employer.

I earnestly believe that the foregoing amendments will go far toward strengthening the compensation bill in West Virginia and will be highly beneficial to the coal miners in your state.

Your favorable consideration of our request is urgently sought and will be very greatly appreciated.

Sincerely yours,

W. A. BOYLE.

REVERENCE FOR THE LAW

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. WYDLER. Mr. Speaker, we all are aware that there are many problems and controversies about the right of protest and dissent in this Nation today. The bounds of protest and dissent, and how they fit in with our laws and institutions of society is something that has been discussed in many different viewpoints since this Nation was founded.

There are so many different viewpoints and so many different ideas on this subject, that I often wonder if our young people can sift through the maze of information and take out the basic facts for a background on this subject.

Judge James F. Niehoff of the Nassau County District Court from my home county recently write an article in a local club publication that explained the basic facts. Judge Niehoff in his article, "Reverence for the Law" covers this complex topic in such a simple and concise manner, that anybody can understand what is involved and grasp the legal concepts. For those people who find themselves at a loss, when asked to explain the matter of what dissent and protest is about, I urge them to read Judge Niehoff's piece. At this point, I insert Judge Niehoff's article:

REVERENCE FOR THE LAW

The struggle for equal justice under law and the preservation of the dignity and liberty of the individual has been of paramount concern to Americans. This Nation has grown from 13 small colonies into the greatest democracy in the history of the world because the overwhelming majority of our people have observed the law steadfastly and faithfully.

Despite the fact that today Americans enjoy greater freedom than ever before we are told by certain dissidents in our midst that our society is so intrinsically evil that it must be altered drastically even smashed—and that unlawful means including violence is justified to accomplish such goal. Right thinking men and women of all races and creeds shun such views. They recognize that responsible protest has a vital place in our well ordered system of government and is entitled to constitutional protection. However, disobedience of the law, mob rule, and violence do not constitute "responsible protest". The right to protest does not confer upon the protestor a license to infringe upon the liberties of others. Nor does the right to protest confer upon the protestor a license to choose the laws he will obey and those he will disobey. Government as we know it could not survive for a day if it permitted any group to obey only those laws with which it agreed. And, surely it is manifest that violence breeds corresponding violence, with an end result of anarchy. History teaches us that anarchy leads to a strong government—even a dictatorship.

If we hope to pass on to future generations the American heritage of justice and liberty it will be necessary for us to demonstrate our reverence for the law in the days that lie ahead.

McCAFFREY HONORED FOR 25 YEARS SERVICE AS WASHINGTON CORRESPONDENT

HON. JOEL T. BROYHILL

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. BROYHILL of Virginia. Mr. Speaker, under leave to extend my remarks I should like to take this opportunity to join many of my colleagues in honoring our good friend, Joe McCaffrey at WMAL-TV on 25 years service as a Washington correspondent.

Most of us agree, I feel sure, that Joe McCaffrey knows more about what is happening at the Capitol than almost any other man, and that he reports the events here with complete fairness and impartiality.

It is a pleasure to congratulate Joe on 25 years of outstanding service and to wish him many more years of success in his field.

LEARNING DISABILITIES, PART 2—THE DISTURBED CHILD IN THE CLASSROOM

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. PUCINSKI. Mr. Speaker, yesterday I inserted an article in the RECORD outlining the general definitions of learning disabilities in children.

The Subcommittee on Education will soon be holding hearings on legislation to mitigate the special problems of children afflicted with learning disabilities. One of the purposes of this legislation is to provide teachers in classrooms with the skills and tools to reach these children.

Following is an article written by a teacher who has encountered disturbed and disruptive children in her classes. Emotional disruption can be one symptom of a learning disabled child. Mrs. Katharine F. Tift, the article's author, was formerly an educational therapist with the Hillcrest Children's Center here in the Nation's Capital. Her suggestions are helpful to teachers and it is our hope that the legislation we will soon take up in our subcommittee will provide further suggestions and methods for teachers who encounter learning disabled children on a regular basis in their classrooms.

Mr. Speaker, Mrs. Tift's article from the NEA Journal of March 1968 follows:

THE DISTURBED CHILD IN THE CLASSROOM

(Katharine F. Tift, teacher of English and civics, Kensington Junior High School, Montgomery County, Md.)

If you are assigned a student whose daily action foul up the learning climate in your classroom, you must have feelings of frustration, and even of fury, at times. The purpose of this article is, first, to reassure you that you are not inadequate because you wish the child would disappear forever and, second, to suggest specific ways for dealing with problems which arise because he does not disappear.

One note of clarification: If the comments which follow seem overly simple, it is because emotional illness is overly complex. Little attempt will be made here to analyze the causes of emotional disorder; rather, the goal is to provide practical suggestions for dealing with those surface behaviors which disrupt your classroom.

Try to visualize a "typical" disturbed child. DC is a ten-year-old whose social behavior much of the time is at a three-year-old level. The minute your back is turned he runs his pencil across a neighbor's worksheet, he dips water from the fishbowl into the clay barrel, or he shoves and trips others without warning. He keeps you on edge be cause of his destructive actions but masters just enough subject matter and conforms just enough to your demands to keep you from telling your principal: "Either he goes or I do." (You can't ask to have him transferred; the other teachers have DC's too!)

When you first get such a student, a useful step is to check with other staff members who have come in contact with him. Does your school counselor have a case record for him? Did *other* teachers find your DC disruptive in *their* group situations?

If the answers are No, put aside this article and, instead, ask a peer whom you trust

to visit your classroom for a day. Tell him to observe *your responses* to the youngster, rather than vice versa. If your friend's findings lead you to seek guidance for *yourself*, be thankful for the experience! As you acquire insights into your own feelings, everyone—especially you—will be the winner.

Once you feel confident, however, that *you* are not largely responsible for this "enemy" action in your classroom, take the next step of acquainting yourself with the general nature of DC's disease. What *is* emotional disturbance? Where does it come from? In what different ways does it manifest itself? For meaningful answers to these questions, try the following activities:

1. See the motion picture, *David and Lisa*. (Your principal might arrange a showing for his whole staff.)

2. Visit an accredited school for emotionally disturbed children. (Observe there for a day and talk with different staff members.)

3. Read at least one book which deals with the emotionally disturbed child in the classroom. (In my opinion, one of the best texts to date is *Conflict in the Classroom: The Education of Emotionally Disturbed Children*, edited by Long, Morse, and Newman. Wadsworth. 1965.)

As you follow up these suggestions, you will become increasingly aware that the behavior which angers you is a *signal* of an illness, just as red spots are a signal of measles. You will understand that a disturbed child does not have a disease of destroying property or hurting people; these are but symptoms of his emotional disorder. And you will be reassured, once again, that *you are not responsible for his illness*.

The completion of step one (ascertaining that you'll be part of the solution, not the cause of the problem) and step two (becoming aware that emotional illness has deep environmental roots, that it is very complex, and that you alone won't "cure" it) frees you to ask the constructive "How can I help this DC and thus help all of us in the group?" instead of the defensive "Why is he doing this to *me*?"

For a third positive step, read about the following classroom situations, imagining yourself as the teacher in each of the three.

Situation number one: As you sit with a reading circle, you see the children stop reading and begin to stare across the room at DC, who is drawing pictures on the floor with chalk.

Your response to help DC goes something like this. You say clearly, for all to hear, "DC, I'm unhappy because my reading students are looking at your pictures instead of at their books. Tim [Tim is a dependable "normal"] will you help DC erase the chalk from the floor and then you and he may carry some books to the library for me."

COMMENTS

1. DC is relieved because (a) his unacceptable behavior was clearly defined, and (b) provisions were made enabling him to stop the behavior.

2. Tim experiences an ego boost. He has helped another human, and thus his concept of self-worth is enhanced.

3. Other class members feel secure; DC's behavior did not take their teacher from them.

4. You enhance your self-concept by dealing constructively with a challenging situation.

Question: But DC had unmet needs! Shouldn't he have been allowed to work them out on the floor with the chalk? The pictures weren't hurting anything!

Answer: Nonsense. DC's behavior was destroying the learning climate in your classroom. Furthermore, if DC had been permitted to continue unchecked, he would have experienced progressive feelings of:

Guilt ("Teacher is mad at me. I'm bad.")

Panic ("Help! I'm losing control!")

Anger ("Why won't someone *stop* me?")

Situation number two: DC keeps interrupting a small discussion group. You feel the children's annoyance at him, and this intensifies your own impatience with his behavior.

You let the tone of your voice, as well as your words, communicate the group indignation. "DC, you're butting in and taking other people's turns. I don't like to have you take over while I'm talking! Now, I want you to get the cards box so we can help you take turns. Okay?"

You know from experience that your students all enjoy this game. The card box referred to holds about 50 blank 3 x 2 cards. Each person receives the same agreed-upon number of cards, and every time a student speaks he must put one of his cards back in the box. When someone's cards are used up, he cannot talk until everyone else's cards are gone. (The students learn through trial-and-error how many times they are willing to permit DC to speak, and thus commit themselves to speaking.)

COMMENTS

1. DC is grateful that his unacceptable behavior was identified with honest directness. (A disturbed child cannot tolerate a honey-sweet. "Let's not do that anymore," ladled out through clenched teeth. It comes through to him as, "I'm pretending to like you, but only because I'm afraid of my real thoughts. I wish you'd drop dead.") The other students are also grateful because your acknowledgment of resentment allows them to feel comfortable with, instead of guilty about, their anger toward him.

2. Again you've given prompt assistance with impulse control, involving other group members. By playing a game that structures "equal rights," the pupils have a pleasurable as well as constructive role in helping their classmate.

3. You feel better and better. As you involve everyone in helping DC, it becomes "our" class instead of "my" class. A family bond begins to evolve.

Question: But DC is getting extra attention. Is that fair?

Answer: Who said life is fair? An emotionally ill person is a dependent person and requires extra attention. Don't you, as an adult, pay extra taxes to provide for patients in prisons and mental hospitals?

Situation number three: DC refuses to do a written assignment at his desk.

Withdrawal behavior presents a special challenge. Your first response might well be to hypothesize *why* he is refusing:

Too short an attention span? Call on a dependable pupil: "Jill, here is my stopwatch. Would you see how long it takes DC to complete his worksheet? DC, see if you can finish it before ten minutes are up."

He just can't do the work? "DC, I want you to do at least the first sentence now. I'll sit here and help you with it.

He simply won't do the work? "DC, I'm sorry you aren't ready to write today. Maybe tomorrow you'll be able to." (Coaxing or pleading will only reinforce the behavior you wish would go away.)

Comment: Of course there's a chance that none of these approaches will work. If he shows total resistance, keep your cool and retreat for awhile.

Question: But doesn't that mean he wins?

Answer: Wins? Who declared war? This child is *not* attacking you; he is just protecting himself from real or imagined danger.

Question: Well, after I've retreated for awhile, should I try again to get him involved?

Answer: Of course. Does a doctor make out a single prescription, and then abandon his patient if it doesn't work?

In the above three incidents, you responded differently to different problems, but your approach each time included:

1. Stating clearly to the child what his inappropriate behavior consisted of

2. Identifying your own feelings about this behavior

3. Providing a supportive structure for a change of behavior

4. Using, whenever appropriate, the participation of other students in this supportive structure.

Incorporating these basic steps, you can deal with a variety of disruptive classroom situations. DC could be a girl instead of a boy, of course. (While statistically we have more disturbed boys than girls, how many giggly girls disrupt a lesson because they were brought up as "first a female" while they heard their brothers challenged to be "serious students" first of all?)

Or instead of being age 10, DC could be 4 or 14. (Although he may be emotionally ill, a high school student must have mastered a fair amount of impulse control to survive in that structure.) Also, DC's behavior could take the form of *repression* of hostile feelings rather than expression of them. (A silent resister can sometimes hold up group effort more effectively than the loud-mouthed extrovert.)

(One unholy situation which has not been discussed is what to do when a *number* of DC's are placed in your already overcrowded classroom. In my opinion, you'll have to give up. The only, question is how you go about throwing in the sponge.)

In the foregoing discussion, our disturbed child was compartmentalized as though he were much different from his peers. In reality, no clear line can be drawn between "healthy" behavior and that which isn't so healthy. Each of our students moves up and down his own continuum of neurotic responses which he employs to master a particular environment at a particular time. But the disturbed child makes *compulsive responses* which occur *day after day* and which *interfere regularly* with classroom goals.

While there are constructive ways to cope with a DC, such as those suggested above, as long as a teacher is asked to contain sick psyches while he teaches subject matter, he will have cause for deep frustration. Happily, there is help on the horizon in addition to that which may be available to your school system from experts in special education. One form this help is taking is the study carrel, with CAI (computer assisted instruction). R. Louis Bright of the U.S. Office of Education predicts that within another decade "almost the entire acadamic portion of instruction will be on an individualized basis in most schools."

If this forecast becomes fact—and if subject matter is fed into machines, to be reached for by each learner as he becomes ready to assimilate it—DC's behavior will no longer stop other pupils from getting academic instruction.

No longer will you, the teacher, face the dilemma of *"his* needs or *theirs?"* Rather, with the help of educational technology, you will have added time for those caring relationships which every human hungers for and which bring to him a sense of self-worth. You will have more time, through small-group encounters, to help each of your students experience individual growth by making important contributions to the needs of others.

CADETTE SCOUTS TOUR NATION'S CAPITAL

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. JACOBS. Mr. Speaker, on June 13, 1969, Cadette Scouts No. 928 of Lawrence Township, Ind., came to the Capital for a 4-day trip to learn as much as possible in that time about what goes on in Washington, and to see the things of historical

value which are so numerous in the District. The girls went on a tour of the White House, the FBI, the Smithsonian, the National Art Gallery, the National Archives, and saw the monuments and many other cultural and historical sights. I showed them the floor of the House of Representatives, and they had breakfast in the Speaker's Dining Room.

The leaders of the group were Mrs. Terrence Sewell, Mrs. Ezio Baseggio, Mrs. Thomas Pease, and Mrs. Joseph Mattingly. The girls that came to Washington were: Connie Barker, Maria Baseggio, Penny Berry, Peggy Conner, Cindy Ewing, Barbara Elliot, Janeen Hayes, Bonnie Herin, Kathy Mattingly, Denise Pauli, Andy Pease, Kittie Reid, Carla Sewell, Debbie Thompson, Vickie Vanderpool, Marilyn Wells, Leslie Wimmenauer, and Jane Myers.

The leader's son, Craig Sewell, has shown himself to be a scholar and an athlete at Lawrence Central High School. As a member of the National Honor Society, it is no surprise that Craig is going to attend Harvard College in the fall. He won the Lion's Award Scholarship of $200 as the outstanding athlete for breaking the record for the butterfly for the swimming team. I want to congratulate Craig for his success, and wish him well at Harvard.

FOURTH DISTRICT SCHOLARSHIP TRIP

HON. JAMES R. MANN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. MANN. Mr. Speaker, the service clubs of my congressional district have long expressed an active interest in the young people of their communities. This has been evidenced in many ways. One program, in particular, deserves special mention and I am proud to bring it to the attention of my colleagues.

On Sunday, June 22, eight rising high school seniors arrived in Washington from Greenville, Spartanburg, and Laurens Counties for the second leg of the newly initiated Fourth District scholarship trip.

This trip, sponsored by local service clubs, is designed to give outstanding students from my district an opportunity to tour the Nation's Capital for 4 days and observe all facets of our Government in action. The agenda on this trip includes such activities as a Peace Corps briefing, attendance at both sessions of Congress, meetings with officers of the House and Members of both Houses, and a tour of the Supreme Court.

These young people are all deserving students selected on the basis of outstanding scholarship, leadership, and participation in school activities.

Through the financial sponsorship of various service clubs, two trips from the Fourth District were made possible. These sponsors in the Fourth District are certainly to be commended for their efforts and support in this regard for they have recognized the importance of training our young leaders and stimulating their interest in, and knowledge of, governmental processes.

The students participating in this second trip and their sponsors are as follows: Patrica Bennett, a student at Beck High School, daughter of Mr. and Mrs. John T. Bennett, sponsored by the Greenville Rotary Club; Anita Bowles, of J. F. Byrnes High School, daughter of Mr. and Mrs. A. E. Bowles, sponsored jointly by the Greer Kiwanis and Greer Exchange Clubs; Mary Washington, a student at Gray Court-Owings High School, daughter of Mr. and Mrs. W. M. Washington, sponsored by Watts Mill; William Adair, student at Clinton High School, son of Mr. and Mrs. Forest Adair, sponsored by the Clinton Lions Club; Barry Gray, of Pacolet High School, son of Mr. and Mrs. Elston Gray, sponsored by the Pacolet Lions and the Ruritan Club; Clarence Hammond, a student at Sterling High School, son of Mr. and Mrs. C. E. Hammond, sponsored by the Greenville Rotary Club; Lewis Cason, a student at J. L. Mann High School, son of Mr. and Mrs. Bill Cason, sponsored by the Pleasantburg Rotary; and Bill King, a student at Travelers Rest High School, son of Dr. and Mrs. Joe M. King, sponsored by the Travelers Rest Lions Club.

On their behalf, and on behalf of the people of the Fourth District, I wish to thank all the organizations, schools, and individual people who have contributed to making the Fourth District scholarship trip a reality.

REEVALUATION OF EAST-WEST TRADE

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. ASHBROOK. Mr. Speaker, if the free nations of the world coordinated their efforts to preserve and extend the areas of freedom as well as the Communist nations do in advancing their policy of tyranny, perhaps more human beings would be enjoying their God-given rights today. A good case in contrast is the war in Vietnam in which the United States and its allies defend the South Vietnamese against a Communist takeover while the Communist regimes are alined with Ho Chi Minh.

At the recent World Communist Conference the Communist regimes implemented their support by issuing an appeal to all workers to boycott supplies bound for U.S. troops in South Vietnam. As a Reuters dispatch in the Chicago Tribune of June 11 points out, the boycott idea was first put forth at an international Communist-sponsored labor union meeting in Moscow last summer.

Here in the United States one organization which has used the boycott approach but against the Soviet Union has been the International Longshoremen's Association and for many years has refused to handle Soviet goods. According to a New York Times article of June 2, for the first time in many years a Russian ship with a Russian cargo is on schedule to land cargo at an American port. We therefore have the ludicrous policy, if the Times account is true, of extending the red carpet to a nation which has been the chief supporter of the enemy in Vietnam by supplying planes, antiaircraft equipment and other armaments. The insanity of our policy is all too apparent when we remember the toll in American lives which recently surpassed the over 33,000 battle deaths we suffered in Korea.

To complicate matters further, a Senate subcommittee recently voted to liberalize controls on U.S. exports to the Soviet Union and other Communist countries of Europe. This was in contradiction to the administration's recent policy against a slackening of restrictions in East-West trade.

It seems to me that now is the appropriate time to push for the establishment of a House select committee to review the complex issue of East-West trade. During the last Congress over 120 Members of the House introduced this legislation which, unfortunately, did not get out of committee. I am again this year introducing similar legislation which, it is hoped, will receive favorable action and which could, if enacted, reevaluate our policy in this all-important area.

I insert the text of the legislation, along with the above-mentioned newspaper items, in the RECORD at this point:

[From the Chicago Tribune, June 11, 1969]

BOYCOTT GI SUPPLIES, REDS ASK

Moscow, June 10.—The Kremlin-sponsored World Communist conference today unanimously adopted an appeal to all workers to boycott supplies bound for United States troops in South Viet Nam.

The 75-nation conference, in its fifth day, issued the call in a document giving full support to North Vietnamese and Viet Cong proposals toward ending the Viet Nam war.

Neither North Viet Nam nor the South Vietnamese Communists, who have remained neutral in the China-Russia dispute, have sent delegations to the conference.

WORKED OUT WITH HANOI

Conference spokesman said the document was worked out in conjunction with "our Vietnamese comrades," and that an East German delegation has gone to Hanoi for this purpose.

The boycott appeal was first made at an international communist-sponsored labor union meeting here last summer.

The document adopted today congratulated the Vietnamese Communists on their "historic successses scored in the struggle against United States imperialism," and support the communist position at the Paris peace talks.

PUT END TO INVOLVEMENT

It demanded that "Thailand, New Zealand, Australia, and the South Korean puppet regime, as well as the German Federal Republic and Japan, put an end to their overt or disguised involvement in the United States agression in Viet Nam."

The document set July 20, anniversary of the signing of the 1962 Geneva agreements on peace in Indo-China, as a day of international solidarity with the Vietnamese Communists.

The conference heard a speech from the head of the Cuban observer mission to the conference, Carlos Rafael Rodriguez.

DETAILS NOT DISCLOSED

No details of his speech were given, but sources believe he may have answered pointed remarks from Wladyslaw Gomulka, Polish leader, that guerrilla warfare, while

right for some parties under some conditions, could not be turned into a rule, for the world revolutionary movement.

The chilly relationship between Cuba and Russia has appeared to thaw in recent months, and observers said Rodriguez' speech could be an indication of how far this trend has progressed.

Cuba had refused to participate in preparation for the conference and only at the last moment decided to send an observer delegation.

SOVIET GOODS ENTER DESPITE I.L.A. BAN

(By George Horne)

Some Soviet commercial shipments are probably entering East Coast ports despite an embargo imposed by the International Longshoremen's Association, which has a rigid anti-Communist policy, according to the head of the union.

Thomas W. Gleason, president of the I.L.A. has reported the "discovery" of Russian goods arriving here in containers from West Europe.

There is no official Government policy against Russian ships or Russian goods carried in ships of other nations, but for many years the militant dock union has refused to handle any Soviet goods.

Mr. Gleason said last week that to avoid the I.L.A. ban on such cargoes, the Soviet Union was known to be sending merchandise to Rotterdam, where it is packed in containers, which are becoming standard packaging for ocean commerce.

"We have already caught some of it, and when we find such cargo we simply put it back in the container and refuse to let it land," he said.

Mr. Gleason was commenting on a report that for the first time in many years, a Russian ship with a Russian cargo is on schedule to land cargo at an American port. She is to sail from a Siberian port for Portland, Ore., some time this month.

The vessel will probably have no trouble landing her cargo, since longshoremen of the big union on the West Coast, the International Longshoremen's and Warehousemen's Union, has an open policy on Communist cargoes.

The ship, the Orsha, is scheduled to carry a shipment of titanium to the Oregon port. It will be the first big Russian cargo to come to this country in many years.

According to shipping records, the last large Russian cargo in the Port of New York arrived in 1950. It became the subject of a State Crime Commission inquiry.

Investigating conditions on the then crime-ridden waterfront, the commission heard testimony in 1952 of a big shipment of Russian furs, valued at more than $3-million. The I.L.A. refused to handle them and for a while the two ships that had brought them stood idle at a dock in Elizabeth, N.J.

However, after the ships had sailed, it was discovered that the cargo had been secretly unloaded during the night.

A fur merchant explained to investigators that he had been called to a secret meeting with two minor officials of an I.L.A. local in New Jersey. As representative of the various importers awaiting the furs, he paid the two men $70,000 as a bribe, and the fur shipments were brought ashore.

HOUSE UNIT BACKS EASED RED TRADE—OVERRULES NIXON'S POLICY—FAVORS RELAXED CONTROLS

(By Edwin L. Dale Jr.)

WASHINGTON, June 18.—A Senate subcommittee voted by 8 to 2 today to override President Nixon's recommendations and approve a liberalization of controls on United States exports to the Soviet Union and other Communist countries of Europe.

Three Republicans joined five Democrats to approve a major modification of the Export Control Law, which expires June 30 and will be extended in one form or another. The Administration had asked for a simple extension of the present law, which has been interpreted strictly to limit exports of hundreds of categories of goods to Communist countries.

The bill approved by the subcommittee today leaves considerable discretion in the hands of the President and does not guarantee significant liberalization of controls. But, if enacted, it would represent a clear expression of Congressional sentiment and would be expected to bring a change in the way controls are administered.

OUTLOOK IS UNCERTAIN

The full Banking Committee is expected to give its approval of the bill, or a very similar one, on Friday. But the situation in the House is less certain.

The bill would abolish the requirement that 50 per cent of any agricultural products sold to European Communist countries be shipped in American-flag vessels.

It would also permit the President to limit exports only in cases where they have military significance. He can now cut off goods that contribute to the "economic potential" of a Communist country.

The bill would apparently end the present practice under which export licenses to some Communist countries are granted more liberally than to others, but it would allow the President to continue a total ban on trade.

A motive behind the Senate drive toward liberalization of controls has been complaints of American business concerns that they are being denied profitable sales at the expense of competitors in Western Europe and Japan.

H. RES. 847

Whereas Americans are being killed in Southeast Asia and the peace of all free nations is threatened by the Communist war of aggression in Vietnam, by the explosive division of world interests in the Middle East, and by the activation of cold war fronts in Latin America; and

Whereas the United States has no territorial ambitions and seeks only to remain free and strengthen oppressed peoples in their determination to work out their own destinies within the whole family of man; and

Whereas there is a need to determine the impact that East-West trade has on the national interest and international commitments of the United States: Now, therefore, be it

Resolved, That there is hereby created a select committee to be composed of nine Members of the House of Representatives to be appointed by the Speaker, one of whom he shall designate as chairman. Any vacancy occurring in the membership of the committee shall be filled in the same manner in which the original appointment was made.

SEC. 2. The committee is authorized and directed to conduct a full, complete study and investigation of:

The impact of East-West trade on the productivity and capability of nations which directly or indirectly supply North Vietnam, North Korea, the Middle East, Cuba, or any Communist faction within any nation in Latin America, or elsewhere with military, technical, economic, or financial assistance;

The extent of the participation of international organizations, institutions, groups, or financial arrangements such as guaranteed credits, with which the United States is associated, in aiding nations that supply North Vietnam, North Korea, the Middle East, Cuba, or any Communist faction within any nation in Latin America, or elsewhere with military, technical, economic, or financial assistance;

The effectiveness of United States laws, regulations, commitments, and policies governing trade with and aid to nations which directly or indirectly supply North Vietnam, North Korea, the Middle East, Cuba, or any Communist faction within any nation in Latin America, or elsewhere with military, technical, economic, or financial assistance.

SEC. 3. For the purpose of carrying out this resolution the committee or any subcommittee thereof is authorized to sit and act during the present Congress at such times and places within the United States, including any territory, Commonwealth, or possession thereof, or elsewhere, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents as it deems necessary; except that neither the committee nor any subcommittee thereof may sit while the House is meeting unless special leave to sit shall have been obtained from the House. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member.

The committee shall report to the House as soon as practicable during the present Congress the results of its investigation and study, together with such recommendations as it deems advisable. Any such report which is made when the House is not in session shall be filed with the Clerk of the House.

MARGARET MYER, WASHINGTON CORRESPONDENT FOR DALLAS TIMES HERALD, REPORTS ON HER VISIT TO SOVIET UNION

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. TEAGUE of Texas. Mr. Speaker, Miss Margaret Myer, correspondent in Washington, D.C., for the Dallas Times Herald, has recently returned from a trip to the Soviet Union and other satellite countries in Eastern Europe. She has reported on this trip in a series of articles, and under leave to extend my remarks in the RECORD I wish to include her article for June 19 in which I believe she has included a most significant statement which I would like to set forth here in my introduction:

Space exploration is, without question, the best thing America has going for it in the Soviet Union and, next to freedom, the best thing going in the satellite countries.

The article follows:

WASHINGTON.—To return to the United States from three weeks in East Europe and find business executives for peace in Vietnam picketing in front of the White House and poor people's campaigners picketing in front of the Department of Health Education is a rude reminder that better housing, better food, better clothing and freedom of expression do not a paradise make.

That reminder can, in effect, be found among Americans one encounters in a tour of the Soviet satellites.

Two young adult men from Ohio seemed almost angry that they had not been confronted during four days in Leningrad by any display of anti-American feeling over Vietnam.

They were unimpressed, at the same time, by interest they could have elicited from Russians in another American endeavor—the space shot.

Apollo 10 was aloft at the time and, had they asked, they would have learned that al-

most any Russian they were liable to meet could tell them of the progress of the "American cosmonauts."

This was not because Russians were glued to television sets watching live color telecasts from the moon. They weren't. The pictures were not available to them (although they were available and avidly followed in Poland a few days later). The Russians had sufficient interest that they were following American exploration in space via brief accounts in their newspapers and on radio.

Space exploration is, without question, the best thing America has going for it in the Soviet Union and, next to freedom, the best thing going in the satellite countries.

No western thriller (the television series Bonanza is a big hit in Poland) grips the people as does the courage and bravery of men who explore the unknown with only the little-understood technology of scientists to assure their safe return.

The two Americans from Youngstown, Ohio, thought "the money could be used for better things."

"Sending men to the moon," they complained with disgust, "when we should be concentrating on getting men out of Vietnam."

Maybe they are right. Sen. Edward Kennedy has expressed something of the same attitude.

It is true that American presence in Vietnam is dimly regarded in East Europe. Soviet citizens seem convinced our presence there is imperialist aggression (they do not taunt visitors with the subject but will give an impression when asked). Soviet satellite citizens view American involvement in Southeast Asia as folly.

Persons in Poland and Hungary expressed the opinion that the Vietnamese do not know the value of freedom and America is wasting itself in a thankless endeavor.

America is still regarded in East Europe as the fountain of freedom. One gets the impression that East Europeans follow the space shots not only because of the drama that surrounds each launching but also because of the competition they represent between America and the Soviet Union.

The United States has, wisely, shared its accomplishments in space with the world. Every daring feat reflects credit on the Nation. But, something more is involved. The bravery of the astronauts has a universal appeal that cuts through the strictures of national boundaries.

Sen. Kennedy and the two young men from Youngstown, Ohio, may be right but they haven't been talking to the man from England who said of the success of Apollo 10:

"It gives us all hope."

THE "ESTABLISHMENT" IS DEFENDED

HON. G. ELLIOTT HAGAN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. HAGAN. Mr. Speaker, everyday as we read our papers, listen to the radio, or watch television we are confronted with reports of trouble and turmoil on our campuses—students rioting and shouting and making demands about everything. We are easily led to believe these troublemakers and dissenters are in the majority. We do not see or hear much about the "young silent generation," the students who are earnestly going about the business of working and learning and preparing themselves to meet the challenge of tomorrow. All over this Nation they are graduating by the thousands from high schools and colleges. I thank God for them. They will be the backbone of our country, they will accept the responsibilities of citizenship, and they will continue to achieve and accomplish the things that will keep this Nation great.

An example of one of these fine young people is Robb Holmes, a senior at Griffin High School in Griffin, Ga. He was the winner of the Georgia Power Co.'s annual Jack McDonough Editorial Award which is presented to the writer of the best editorial on free enterprise published in a Georgia high school newspaper. Robb Holmes received a $500 scholarship to the Henry W. Grady School of Journalism, a bronze plaque, and a portable electric typewriter. It is a pleasure for me to bring his editorial to the attention of my colleagues as reprinted in the Forest Blade of Swainsboro, Ga.

[From the Forest Blade, June 11, 1969]

THE "ESTABLISHMENT" IS DEFENDED

Great American Tradition of today: protest. Protest the establishment. Few are willing to defend the establishment today.

Protest is valuable. It is probably necessary in a democracy. But what of the establishment? What is the establishment? The establishment is many things, and there are many things to be considered before one speaks out against the establishment as a whole.

Just where does one go to learn about the establishment? Students of the establishment are few. Therefore, it would seem natural that textbooks on the establishment would be few, but this is not so. There are thousands of them printed daily in the United States. Millions of people read them every day and take them for granted. They are the newspapers.

Buy a newspaper. Sit down and read it. On the front page you will probably find a story on the war in Vietnam. There may also be a story on demonstration protesting our involvement in Vietnam. If the demonstration was violent or destructive, the police certainly dispersed it, or attempted to, and arrested the leaders. If, however, it was peaceful, the demonstrators were allowed to continue exercising on their basic Constitutional rights.

Look on the inside pages of your newspaper. Read the ads; the advertisements for many competitive products and services, competitively priced. Look at the choice you have as to what to buy, and try to imagine a country, where there are few of those basic freedoms, and coincidentally, where there is no competition among businesses.

Read the editorials. Maybe you'll read a scattering indictment of an administration proposal for a tax increase, or something equally popular.

As you read you may ask, "What kind of government is this, anyway?"

(This is not a statement on the military establishment. Like many others, I view the war with mixed feelings; partially for, somewhat against, but mainly bewildered and not understanding. Nor is this a statement on the social establishment or longstanding injustices. This is a statement on what kind of government this is.)

This is a democracy. One of its oldest and most essential elements is the free enterprise system, and that's part of the establishment.

Take a look at those who favor the abolition of free enterprise. They are almost invariably failures, in most cases by their own fault, for under the free enterprise system each individual controls his destiny to a greater extent than under any other system.

That is why free enterprise is almost necessary to a democracy. Abolish free enterprise and the government decides the success or failure of the businessman, the individual. When the government controls the individual's fate, it quite effectively controls his entire life—including his vote. Suddenly opposition to the government in power almost vanishes. There being no opposition to the state, the government in power becomes self-perpetuating and democracy becomes a cruel farce.

Granted, democracy, along with free enterprise, is frequently confusing, often infuriating, and the decisions made by the people are sometimes as bad as those made by a despotic ruler. But when compared to other existing forms of government, democracy looks very, very good.

Of course, free enterprise is not exactly necessary to a democracy. There are such things as socialist democracies—for a little while, anyway. Usually in such governments, half of the establishment eventually falls. Either socialism falls to free enterprise or democracy falls to tyranny. Unfortunately, the latter is usually the case.

Last year Czechoslovakia came very near to establishing an effective and humane socialist democracy. If the Czechoslovaks had not been betrayed by their supposed allies, their experiment might have succeeded. We'll never know.

As it is, we do know this:

Although there are many forms of government and many different economic systems, only one combination has been found to be practical and to approach in any way having the interests of humanity at heart. That is the combination of democracy and free enterprise, the basis of American government.

Many parts of the American establishment need to undergo drastic change. Even our economics could stand much improvement. But these facts in no way justify or recommend junking the entire system.

The American system is certainly no paradise, but a better system has yet to show itself. Until one does we would do well to work within the framework of the existing system. This is free enterprise: you may work and attempt to make something of yourself, or you may never attempt to do anything, never do anything—and then, of course, blame your failure on the establishment.

TITLE IX: A NEW DIMENSION IN FOREIGN AID—IV

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. FRASER. Mr. Speaker, other obstacles to carrying out the congressional mandate in title IX of the Foreign Assistance Act are found in the State Department, in shortcomings in academic literature on modernization, and in some resistance in host countries. Professor Schott spells out these external obstacles, as follows:

OBSTACLES OUTSIDE THE AGENCY

Owing to the broad policy implications of Title IX, its implementation also meets with a number of formidable obstacles outside the framework of the Agency proper. Not the least of these has been the obstructionism of the State Department. Many Foreign Service Officers view Title IX either as a bureaucratic encroachment on their own prerogatives in the field of overseas political analysis,

or as a significant threat to important U.S. short-term interests in the LDCs. To the extent Title IX broadens A.I.D.'s responsibilities, it must also, however, broaden the Department's. Yet, constrained by their representational responsibilities and the *status quoism* of traditional diplomacy, the State Department cannot be enthusiastic about a mandate that associates the U.S. Government with a cause that, to the uniformed or pernicious, can be described as a kind of overt C.I.A. operation.

Although recognizing Title IX implementation as an operational responsibility of A.I.D., State Department officials tend to view it as far too delicate a mandate to entrust to an Agency presumed to be unattuned to the subtleties of international diplomacy. The result is disastrous to Title IX: as it is an A.I.D. mandate, State feels no responsibility to respond to it; as it affects U.S. foreign policy, it is primarily a State Department concern and ought not to be A.I.D.'s. In consequence, State tends to take a negative posture towards any explicit attempt by A.I.D. to implement it. And given the present concept of the Country Team and Ambassadorial responsibility for all aspects of the U.S. presence in a particular country, this negativist posture can be effectively enforced.

An inherent conflict can exist between the development activities of A.I.D. and the representational role of State. This becomes particularly evident if one chooses the broader construction of Title IX. To holders of this view, Title IX was intended to counter previous foreign aid programs seen to shore up existing regimes and reinforce the present holders of social and political power in aid-recipient countries; it was designed to cause U.S. foreign aid, on the contrary, to seek the dispersal of political power and to support the forces of responsible social and political change. Such a construction of Title IX is understandably anathema to many State Department officials, particularly if those primarily responsible for implementing this mandate are to be the narrow-gauged agricultural technicians and the "apolitical" macro-economists who constitute the stereotypical A.I.D. officials.

This is not to say, however, that if State Department officials would only take a more positive view of Title IX, the Department would be appropriately organized and staffed to provide the guidance and coordination which Title IX's implementation requires. Unfortunately, the contrary is the case; just as A.I.D. is today improperly staffed to pursue Title IX objectives, so is the Department. The "change in approach" which the HFAC suggested might be required of A.I.D. will also be required of State—for the formulation of appropriate policies toward individual LDCs, for the analysis of long-run social, economic, and political forces in LDCs, and for the coordination of all appropriate U.S. foreign policy instruments as they may bear on the implementation of Title IX.[11]

A second major external obstacle faced by A.I.D. is the paucity of operationally-useful knowledge about the processes of social and political modernization. Despite the unabating flow of academic works with "political development" in their titles, their reading is a discouraging exercise for anyone interested in devising activities which may significantly contribute to these processes. So painful a labor becomes even more disagreeable if the reader dares seek in such literature operationally useful criteria by which to measure the success of relevant assistant efforts. Hiding behind the facade of academic respectability and the desire for methodological perfection, many academicians who might otherwise lend a hand in this important work deign not to do so. Rather, they have concentrated upon describing and explaining the operations of existing political systems to the exclusion of developing concepts and techniques for improving them. Without their assistance, however, the "operator"—lacking basic information and prescriptive commentary—either flounders, doggedly persists in the convenient ways of the past, or throws up his hands in despair. Unless ways can be devised to enlist the scholarly community in operational problems and to make existing knowledge available to the operator in terminology he can understand and utilize, a sophisticated approach to Title IX's implementation will prove appreciably more difficult.[12]

Presumed or actual host country sensitivity to direct U.S. Government activity in the field of political development constitutes another major obstacle. For those who believe that a U.S. foreign aid program should avoid political development activities, this becomes an effective argument against even broaching the subject with friendly governments. The signatories to the Charter of Punta del Este, for instance, may have declared their interest in achieving "broader social justice within the framework of personal dignity and political liberty." But, regrettably, this can scarcely be considered a compelling counter-argument: the Alliance may be seen as an abysmal failure precisely on this score, if one has the temerity to appraise its progress after but seven dismal years. Far from living up to their professed interest in the "democratization" of their states, the parties to the Alliance have, in general, refused to consider this aspect of the Charter as a meaningful prescription, just as the United States has been reluctant to press for relevant reforms.

It should be unnecessary here to dwell on the supporting argument that the implementation of Title IX involves "interference in the internal affairs" of sovereign states. Yet it is remarkable how often this argument is employed. Suffice it to say that in a world so highly interdependent as today, this whole line of reasoning is woefully obsolete. Noninterference has become a practical impossibility; indeed, one interferes by not interfering. The relevant questions concern the type, magnitude and duration of the interference, not the interference itself. Besides this, of course, is the fact that foreign aid programs are cooperative undertakings agreed to by host-governments (however much armtwisting is often erroneously reputed to be involved) and that no more "interference" could conceivably be foreseen by implementing Title IX than has already been effected by many of A.I.D.'s rural development activities and counter-insurgency programs.

All of A.I.D.'s current economic undertakings, however, cannot help but have profound social and political ramifications in aid-recipient countries. It is Title IX's argument that the U.S. interest will be served not only by anticipating such consequences of its programs before blindly undertaking them but also by taking these consequences systematically into account when programming its foreign aid activities. In so doing, however, A.I.D. becomes *ipso facto* engaged in the business of political development.[13]

It is obvious that individual aid-recipients are unreceptive to certain economic development activities; so are they likely to be respecting political development activities. Yet it is reprehensible to generalize from the particular and assume that *all* political development activities will prove equally resented everywhere; it also demonstrates a rather perverse understanding of Title IX and the field of political development. Two points need here only be made: First, the spectrum of potential political development activities is extraordinarily broad, ranging from locating a road or similiar capital project so as to contribute to national integration to the provision of direct assistance to particular "modernizing" political parties. Within such a spectrum, it would be difficult not to find a way to "do" political development in any given aid-recipient country if only the interest of operators was aroused and the perspicacity of knowledgeable advisers was employed. Secondly, and closely allied to this point, is the fact that implementing Title IX in a particular country may entail doing nothing at all, e.g., when an increase in popular participation could prove counter-productive given the level of that country's institutional development, or when any form of aid through whatever U.S. instrumentality would likely contribute to the perpetuation of an intolerably undemocratic regime or the maintenance of a closed socio-economic elite. As long as Title IX is not so narrowly defined as to insist upon the encouragement of particular types of institutions having rigidly defined characteristics or so broadly defined as to be utterly meaningless, there are a wide range of realistic options available to U.S. foreign aid administrators for responding significantly to Title IX. The major problem is more one of determining relative priorities among available alternatives than of identifying the alternatives themselves.

---

[11] Title IX, to be an effective stimulant of a new approach in foreign aid, must be associated with the activities of other governmental agencies with significant overseas responsibilities—particularly the Defense Department, the Peace Corps and the United States Information Agency. To make certain that all these agencies undertake compatible and mutually reinforcing developmental activities in individual countries must be the responsibility of the State Department, if only because it is now normally expected to perform this role, and because no other agency currently exists which is capable of doing so.

[12] The problem, of course, lies not alone with the aloof academician. His aloofness has been encouraged by inordinately tight government research budgets (except as available to the Defense Department), the unnecessarily bureaucratic administrative and security requirements imposed upon those performing government-sponsored research, the extraordinarily haphazard and inept determination of research priorities by government officials, and the sometimes sarcastic references by A.I.D. and other bureaucrats to the "irrelevance" of contract research to the decision-making process and actual overseas operations.

[13] It is argued by many in A.I.D. that Title IX's implementation should be confined only to so indirect an approach as this. Such a position enables A.I.D. to remain an agency concerned exclusively with economic development, although permitting economic analyses and project evaluations to be infused at various stages of the programing process with social and political development considerations.

SALUTES TO SIERRA LEONE AND JORDAN

HON. ADAM C. POWELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

A SALUTE TO SIERRA LEONE

Mr. POWELL. Mr. Speaker, on April 27, 1961, the former British colony of Sierra Leone attained her independence. At this point, I would like to salute the progress of Sierra Leone, and extend my best wishes for a continuing prosperous and successful future for the nation.

Sierra Leone is situated in the tropical area of West Africa, a region noted for its wet rainy climate and its lush vegetation. A large part of the population is made up of the Mende, the Limba, and other tribal peoples. An equally important part of the population is the descendants of the freed slaves for whom the colony was originally founded. In fact, the spirit of the colony's founding is reflected in the name of the capital, Freetown.

Despite their diverse backgrounds, the Sierra Leoneans have been able to work together for their nation. One of the positive legacies of the colonial period was the educational system, which provided a well-educated manpower pool for the nation to draw on in the development process. The educational system is being further expanded, and increasing numbers of Sierra Leoneans are now able to make important contributions to their nation's development. The University College at Fourah Bay is known throughout Africa, and has been important and successful in the education and training of Sierra Leoneans.

The economy is expanding quite rapidly. There are rich resources of iron ore now being developed. The exports of this ore, especially to Japan, are creating an important source of revenue. Also of great potential are the rutile—titanium ore—deposits, currently being developed by a group of American and European interests. Sierra Leone has most of the world's high-grade deposits of this mineral, which is used in the making of many modern alloys. There has been an increase in foreign investment in Sierra Leone, and tourism is on the rise. The tourist industry has been greatly helped by the construction of new facilities, especially at some of the beach areas, which are reputed to be the loveliest beach areas in West Africa. Another great aid to the development of Sierra Leone is the port at Freetown; it is the finest natural harbor in the West African area, with good, modern dock facilities. Sierra Leone's economic development is well on its way toward the goal of modernization.

Sierra Leone learned the art of responsible self-government from her British mentors; she has demonstrated a capacity to manage her own affairs. This has been a great aid in her continuing forward progress. I wish to congratulate Sierra Leone on her progress since 1961, and am happy to extend my greetings to one of the newest and most successful members of the "family of nations."

A TRIBUTE TO JORDAN

Mr. Speaker, the Hashemite Kingdom of Jordan received her independence in March 1946, after years of struggle and frustration. The modern Jordan was created out of the area known as the Kingdom of Trans-Jordan. The area west of the Jordan River, known as the West Bank, was controlled by Arab forces during the fighting, and became part of the new Kingdom of Jordan. The West Bank, which included parts of the historic city of Jerusalem, tended to be more developed in economic and manpower terms than the eastern side of the Kingdom. However, the two areas of the new Kingdom fitted together well, and Jordan's development after 1950 has been impressive.

The gross domestic product, one indicator of economic development, rose from a 1954 level of 51 million dinars to a 1964 level of 140 million dinars. This great increase reflects many things—the stability of the nation under the rule of King Hussein, the increase in the level of tourism, the relatively large amounts of foreign aid that have been available, and the earnings sent home by Jordanians employed in other areas. Light industries such as woolen mills and phosphate mining have also been developed, with great success.

The economy has been able to continue and in some instances, prosper, despite the severe disruptions created by the June war of 1967. The war caused many serious problems for Jordan, not only economic, but also political and social. At this point, Jordan's major concerns are, naturally, those problems, for example the refugee problem, which stem from the June war. But despite the problems, Jordan is more than holding its own. For example, in Amman, the capital city, there is a building boom, and the retail businesses are thriving.

A very large measure of credit is due to King Hussein. Jordan, under his rule, has become a remarkably stable nation; this stability has no doubt contributed greatly to the forward progress of the nation. Hussein's diplomatic efforts over the years have insured the availability of relatively large amounts of foreign aid and foreign good will. Hussein's stature throughout Jordan and the Arab world has served well as a unifying force for the nation. Perhaps Hussein's major contribution to his nation has been the many efforts he has made on the behalf of peace in the often troubled Middle East area. His efforts as peacemaker are, indeed, worthy of gratitude by the rest of the world. I take this opportunity to salute both the King and his nation on their progress and success in creating a nation. I am pleased to extend my best wishes to Jordan in her development efforts, and wish her a stable and happy future.

DUBUQUE, IOWA, TAKES LEAD IN LOCAL PLANNING-PROGRAMING-BUDGETING

HON. JOHN C. CULVER

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. CULVER. Mr. Speaker, I would like to bring to the attention of the House today a pilot planning-programing-budgeting program underway in Dubuque, Iowa, which has significant implications for improved economy and efficiency in local programs, not just in Dubuque, but in all Iowa communities and cities of similar size throughout the country.

The project, which was developed through the initiative of a creative city government in Dubuque, is being financed in part by the Department of Housing and Urban Development, with the State's share absorbed by the community itself.

The objective of the program is to develop a model fiscal management system in Dubuque, which can then be made available for other cities, counties, and school systems in Iowa, with the ultimate objective of a uniform budgeting system for all units of government in the State.

All of us in this House are very much aware that, as the functions of government at every level—city, State, and Federal—have expanded to meet the demands of the citizens each serves, efficiency and economy of government operations has suffered.

As a member of the House Government Operations Committee and a sponsor of legislation to bring about executive and legislative reorganization, I am deeply concerned about these trends and strongly feel that this should be a matter of priority attention for the 91st Congress.

The project in Dubuque represents such an effort at the local level, and deserves our attention and commendation as well as the support it already has received from the Department of Housing and Urban Development and the State.

Recently, the Dubuque Telegraph-Herald carried an article by Tom McDougall, explaining in more detail the PPB system, and under unanimous consent I include it at this point in the RECORD, for the information of the Members of this body:

[From the Dubuque (Iowa) Telegraph-Herald, June 8, 1969]

PPB: A NEW WORD AROUND CITY HALL THESE DAYS

(By Tom McDougall)

PPB will be a big word in Dubuque after this summer.

It stands for Planning-Programming-Budgeting, and as the name implies it is a system of budgeting that goes far beyond the listing of expenditures.

You won't hear many Dubuquers, even those who are close to that sort of thing, talking with authority on PPB. At least not yet.

Nor will you find any books on it at the Carnegie-Stout Public Library. Look a little and you will find some obscure government publications devoted to it, and you will find that books have indeed been written about it. But you won't find them here.

But PPB is coming to Dubuque, and with it should come a major reform of the city's financing system.

In a nutshell, PPB is an information-gathering system that will list all the functions of the city not only according to the cost of each as is now done, but also according to the objectives each hopes to achieve and with alternate ways to achieve the same objectives.

A PPB program involves five steps:

1. Specify the objectives of each program.

2. Analyze its output—that is, the degree to which it achieves its objective.

3. Measure total costs of the program, not just for one year but for several years ahead as well.

4. List and analyze alternate ways of achieving the objectives, together with the cost of each alternative.

5. Establish the program in a systematic way.

PPB has been in use for several years now in many departments of the federal government, notably the Defense Department, and it has both its critics and its admirers.

The critics say it has the potential to lull decision makers into accepting bad programs

by attempting to change political facts into numbers.

Even PPB supporters admit that this is a possible pitfall. They stress that PPB does not do away with political decisions, but only makes it easier to follow the right course of action once the decision is made.

A PPB study has already been underway for about two weeks to switch Dubuque over to the new system.

It is the first such study conducted in Iowa, and its results will be applicable to other cities, counties or school boards that wish to use it. Because of this, the League of Iowa Municipalities has taken on the sponsorship of the study and has obtained a $40,000 federal Department of Housing and Urban Development (HUD) grant to pay half its cost.

The city is paying the remaining $40,000 of the cost.

Baxter, McDonald and Co., a managerial consulting firm from Berkeley, Calif., has already been hired to do the study and its consultants have been popping in and out of City Hall for the past two weeks.

A secondhand portable class-room that soon will be moved in next to City Hall will serve as the firm's headquarters when school is out in the Western Dubuque Community School District, but until then the consultants will continue squeezing in their work in whatever space they can find.

Allen Baxter, the founder and president of the nine-man firm, is among the consultants in Dubuque.

Baxter, a tall loquacious man, was a philosophy professor at the University of California before starting into the consulting business 10 years ago. The firm's eight other consultants have specialties ranging from engineering to accounting, for Baxter, McDonald and Co. specializes in solving all manner of managerial problems.

The firm attained its reputation for the PPB angle of its work after a study it conducted in California analyzing the financial aspect of intergovernmental relations.

That a philosopher—albeit one whose field delved especially into economic philosophies—should lead a PPB study is not so surprising as it may sound.

For despite the financial connotation of PPB and its ultimate tendency to contain numbers, especially those preceded by dollar signs, it is not entirely an accounting procedure.

It goes beyond that—certainly into the fields of political decision-making, and perhaps so far as to touch philosophy itself.

Basically it is an information-gathering system, enabling city officials to gather all known relevant facts on a particular subject and to sort them in meaningful ways.

The prime elements of PPB are, firstly, objectives and, secondly, alternative methods by which the objectives can be met. (PPB users prefer the word "trade-offs" to "alternatives" but essentially they mean the same.)

Basically PPB provides a format within which decision-makers can define their objectives specifically, then list the combined and alternative methods by which the objectives can be reached, together with estimated costs of each.

With this information at hand the decision-makers—in Dubuque's case the City Council, the city manager and the department heads—can quickly determine which objectives they wish to obtain and which methods will attain them in the most economical or the most effective way.

A certain amount of this type of data is already used in decision-making and always has been, but not in an organized way.

We have a foggy idea of our objectives—usually much foggier than we think—and we realize that one method could cost more or less than another, but we have no format in which to arrange these random thoughts.

We are especially vague on our objectives. Baxter explained that in their simplest terms objectives should be aimed at seeking either maximums or minimums. For example, a program could be aimed at minimizing expenses, or at maximizing profit, or at maximizing public knowledge, and so forth.

He then asked this reporter what the objective is for, say, the Police Department.

"To minimize crime," this reporter answered smugly.

"Well," Baxter answered "what about the policemen who are called out to save a cat caught up in a tree?"

The answer? There is no specific answer as yet, and that's one of the things the study is all about. It will help each city department head to define precisely what his objectives are, a task that can involve some real soul-searching.

This step is only the first of PPB, but in itself it can have an immense effect. When specific objectives are known it will become clear immediately whether they are being attained, or whether they are even worthwhile.

Baxter stresses, however, that it is not he or his colleagues who will define the objectives; this will have to come from the individual involved. His task is to show how to arrive at usable objectives and how best to list ways of carrying them out.

This point is important, he stresses, because it brings out the fact that PPB in itself is no guarantee of success. A properly developed PPB approach can show the best way to achieve an objective, but if the objective itself is bad then the resulting course of action will remain bad despite PPB.

He gave as an example a hypothetical military decision. If the objective were, say, to drop a certain tonnage of bombs on a given area of North Vietnam for a minimum cost, PPB could probably show the most efficient way of doing it. But whether it is right to drop the bombs in the first place—that is, whether the objective is sound—is a decision of another sort.

In other words, PPB will not do away with political decisions and it will not eliminate the possibility that the hypotheses behind those directions may be unsound.

But once the decision has been made to pursue an objective it can show the best way to carry it out. It can also, by the very act of spotlighting the objective, reveal the flaws in it and therefore guide decision makers away from bad objectives.

Once an objective has been defined the next step it to list ways in which it is to be carried out. Under the PPB concept the last should be as complete and far-reaching as possible and should take in as much as possible not only what the city is doing but what the county, the schools and private organizations are doing.

Under the hypothetical heading of health, then, would go not only the work of the City Health Department but also that of other departments—the Building Department's housing inspections for instance—and of other agencies such as the schools' free lunch programs, the activities of the city's three hospitals and so forth.

Once all the data, or as much as can be gathered, is listed, administrators can tell at a glance exactly what the city is doing to meet the objectives—in this case, to keep its citizens healthy—and how much it is costing for each phase of the objective.

Once this is done there can be added to the list whatever alternative ways can be used to meet the same objective and the projected costs for each.

Obviously, with such a wealth of data at his fingertips an administrator will find it much simpler to make the correct decisions for meeting objectives. It will also point out most of the flaws there are in the traditional means of meeting the objectives, thereby making them easy to eliminate.

Baxter is quick to point out again, though that PPB will not make the decisions. That is still the job of the administrators and the politicians. But PPB is a data gathering system that will enable leaders to see what the effects, economic or otherwise, of those decisions will be.

Once the first PPB plan is drawn up with its sets of forms and instructions, city officials themselves will be able to take it over, merely updating each category of information as needed.

But the first set of PPB data will be drawn by the consultants. They will both draw the blank forms and fill them in with information they glean from the city, the county and other agencies.

Once the plan is drawn up its skeleton will be made available for other cities, counties or school systems in Iowa so they too can switch over.

Hopefully, the result of this will be something the state government has hoped to see for some time: A uniform budgeting system for all units of government in Iowa. With such a uniform system comparing data from one city with that of another will no longer be like comparing apples and oranges because the facts from each will be tabulated in essentially the same format.

HOOSIER STATE BANK OF HAMMOND, IND., REFUSES TO RAISE INTEREST RATES

HON. RAY J. MADDEN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. MADDEN. Mr. Speaker, John F. Wilhelm, president of the Hoosier State Bank in Hammond, Ind., is contacting the banks in northwest Indiana in an effort to oppose the large eastern bank combinations who have raised the prime interest rate.

Older Members of the House remember when Andrew Mellon was Secretary of the Treasury under three Presidents in the 1920's. Secretary Mellon's high-interest policy helped dry up buying power for millions of working people and was a major cause in bringing on the Great Depression of the early 1930's. Secretary of the Treasury George Humphrey, during the first months of the Eisenhower administration raised interest rates several times and it aided in bringing on three smaller depressions in the 1950's.

I congratulate President John Wilhelm, of the Hoosier State Bank in Hammond, Ind., in his drive to maintain a lower interest policy and thus protect buying power, building expansion, and help preserve our prosperity.

I am hereby submitting an article from the June 17 Gary, Ind., Post Tribune which includes excerpts from President Wilhelm's letter which was received in my office last week:

AREA BANKER TELLS MADDEN INTEREST TO STAY SAME HERE

WASHINGTON.—Hoosiers are battling the big banks' boost of prime interest rates to 8½ per cent.

What appears to be a trend among smaller banks to stand fast against the higher rates has reached the attention of Congress, particularly the House Banking and Currency Committee, which will hold hearings on the escalation later this week.

Heading the hold-fast brigade is the Hoosier State Bank of Hammond, whose

president, John F. Wilhelm, wrote U.S. Rep. Ray J. Madden, D-Gary:

"I have discussed this matter with the majority of banks in Lake County, and I think you can rest assured that we have no intention of following the New York banks' example."

Wilhelm is expected to be invited by the committee to express his views on the matter.

Rep. Wright Patman, D-Tex., committee chairman, announced the hearing will start Thursday afternoon. Treasury Secretary David Kennedy, Attorney General John Mitchell and a representative of the Federal Reserve have been called to testify.

On Friday, the banks which raised their rates will explain why to the committee. The committee already has summoned six of the big banks.

They are Bankers Trust of New York, First National Bank of New York, Chase Manhattan Bank of New York, Continental Illinois National Bank of Chicago and Riggs National Bank of Washington.

On Saturday or Monday, the banks—such as Hoosier State—who have decided not to raise rates, will be asked as witnesses. Their views are more in accord with that of Patman and his committee.

Wilhelm, in his letter to Madden, said he was "very upset" with the turn of events which has caused the prime interest rate increase.

"I want you to know personally that the Hoosier State Bank will not raise its rates because of this temporary situation," he said.

Wilhelm said he wanted to make a few things clear to "Mr. Patman and his group."

"It seems," he said, "That they would have the nation believe that the commercial banks, each and every one of us, is ready to start 'socking' our customers the top dollar for their money. You could also jump to the conclusion that the banking industry is having a 'merry old time.' This is not true."

THE BANKERS' DILEMMA—INTERNAL AND EXTERNAL

HON. JOHN J. McFALL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. McFALL. Mr. Speaker, the increase in prime interest rates from 7½ to 8½ percent by many large banks, application of truth-in-lending regulations, prospects for stronger Federal legislation over lending institutions, and information on bank robberies were among topics discussed by Irvine H. Sprague, Director of the Federal Deposit Insurance Corporation, at a banking industry meeting in Milwaukee recently.

Sprague, whose home is Stockton, Calif., was a member of the White House staff prior to his appointment to the Board of Directors of FDIC last year. Previously he had served as deputy director of the California Department of Finance for 4 years and was my administrative assistant slightly more than 6 years.

His remarks before the Wisconsin Bankers Association on June 17 were of particular interest because of the great public attention focused on activities of the banking industry.

I commend to your attention two news articles describing Director Sprague's address. The first article appeared June 18 in the Milwaukee Sentinel and was entitled: "Bankers Told Image Fading." The second, published in the June 18 edition of American Banker, was: "FDIC Analyzing Bank Crime Data in Effort To Implement Effective Protection Program." They follow:

[From the Milwaukee (Wis.) Sentinel, June 18, 1969]

BANKERS TOLD IMAGE FADING

(By Ray Kenney)

The recent prime interest rate increase has tarnished the banking industry's image in congress and will affect banking bills now in the legislative hopper, members of the Wisconsin Bankers Association were told Tuesday

Irvine H. Sprague, a director of the Federal Deposit Insurance Corp., Washington, D.C., and a former member of President Johnson's White House staff, tossed away his text at a WBA convention session at the Pfister hotel here and told state bankers some things that many of them didn't want to hear.

There is no possibility of a delay in truth in lending regulations, despite appeals from many banks that "We're not ready" for the July 1 implementation of the regulations.

New advertising regulations, scheduled for release later in the day Tuesday to eliminate "substantial abuses," will be "tough."

One bank holding companies will be subject to "a fairly strong bill this fall."

Congress is "extremely interested" in the bankers' decision to boost prime interest rates from 7½ to 8½% in an historic and unprecedented move last week.

Many bankers feel, according to the FDIC official, that the criticism will blow over.

"I don't read it that way," said Sprague, who has acted as a congressional liaison man, in one capacity or another, for 16 years.

When he first was named to a six year term on the FDIC's three member board of directors last July, Sprague said, congressmen used to ask, "How are you getting along with your banker friends?"

Last weekend, at a cocktail party, he added, the question was reworded to, "How are you getting along with your greedy banker friends?"

"I think that's indicative," he told several hundred WBA members. "The congressmen tell me that bankers are very smart . . . they ought to be able to find a way to hold interest rates down.

"I think what I am really saying is that the image of the banking industry is going down hill a little bit and it's going to affect you when legislation you are interested in comes aboard. Make no mistake about that," Sprague said.

In the area of one bank holding companies, and the possibility of approval of Rep. Patman's bill to bar them, Sprague said the issue apparently will reach the house floor. However, he said, compromises may have to be reached.

"I think we'll see a fairly strong bill this fall," he said. "Jurisdiction (over the one bank holding companies) probably will go to the federal reserve, and, I think, we'll probably see a grandfather clause, and some definition of what a bank really is," he said.

He indicated that the First National City Corp., the New York holding company built around the First National City Bank of New York, would not have backed away from the acquisition of the Chubb Corp., American agents for a British insurance group, if Citycorp did not also believe the measure restricting the operation of one bank holding companies would not be a strongly worded measure. Citycorp backed away from the acquisition of Chubb Corp. last week in the face of justice department objections.

Sprague had been scheduled to speak on the new bank protection act, which requires banks to implement extensive security policies and procedures.

Statistical data presently is being fed into FDIC computers and will be circulated among the nation's bankers, he reported. The early statistics are too general to permit conclusions, he pointed out.

For example, he said, Wisconsin banks are way below the emerging average for photo surveillance equipment, and below the average number of security guards, but the state also is below the national average for bank robberies.

"I sort of wish I hadn't asked for the figures," Sprague shrugged.

Banks must file written security programs with the FDIC by July 15, he warned. The agency "is more concerned with the spirit of the law than the letter of the law," he added.

"We're not trying to make things more difficult for you, we are trying to make it difficult for robbers and burglars."

[From the American Banker, June 18, 1969]

FDIC ANALYZING BANK CRIME DATA IN EFFORT TO IMPLEMENT EFFECTIVE PROTECTION PROGRAM

MILWAUKEE.—As part of a review of the effectiveness of the Bank Protection Act of 1968, the Federal Deposit Insurance Corp. has undertaken what it calls "the first methodical effort to analyze cause and effect in bank crimes in this country."

Addressing the 78th annual convention of the Wisconsin Bankers Association at the Pfister Hotel and Tower, Irvine H. Sprague, a director of the FDIC, said that from report forms received from banks, "we hope to pinpoint areas of high crime incidence; to isolate the factors that make a banking office vulnerable to crime and those that protect it."

The FDIC is analyzing statistics gleaned from reports on bank crimes committed during the past five years as required under regulations implementing the bank protection laws.

"Until we do know more about the cause and effect of bank robbery, the rule of common sense is the best guide we have to protecting a bank office," he declared. "Some banks that do not now have them obviously need alarm systems. All banks should have 'bait' money. Many more banks probably should have cameras installed—simply because they are in high crime areas."

Mr. Sprague said that, starting next month, FDIC examiners will make compliance checks "a regular part of their examinations."

Some requirements of the law will be mandatory "in about a month—with July 15 the deadline for completion of a written security program for each banking office."

By Jan. 1, 1979, he said, vault lights, bait money, bullet-resistant shields for walk-up or drive-in teller cages and other items will be mandatory.

In cases where a bank security officer has chosen not to install cameras or other devices, "the examiner will want to look at a statement of reasons for that decision and at the names of the law enforcement people who were consulted," he asserted.

"For the first year this procedure will be as new to the examiners as it is to you," he told the bankers. "They are not going to expect perfection."

Mr. Sprague said the examiners "will be looking for signs that you are making both an effort and reasonable progress toward making your bank and the people who work in it and use it safer."

The FDIC officer told the delegates: "I think you will find that the spirit of this law is going to be as important to us in this first year as the letter of it."

"We do not expect to eliminate bank robbery or burglary in 12 months. But if we have not reduced it by the end of 1970, we will be turning to the information we are now collecting in an effort to determine why.

If our approach is not working, we will modify it."

In other action, delegates passed a resolution supporting extension of the 10% surtax as an anti-inflationary measure and urging establishment of a banking school—similar to the Midwest Banking Institute of the University of Minnesota—at Morris, Wis., through the University of Wisconsin.

The convention ends Wednesday.

PRESIDIO: CLEMENCY DENIED

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. KOCH. Mr. Speaker, on May 8, I wrote to Army Secretary Stanley Resor and urged that he follow the example of Navy Secretary John H. Chafee in relieving those involved in the *Pueblo* incident of the possibility of any disciplinary action, and that he, Secretary Resor, act immediately with similar compassion in directing that the mutiny charges against the 27 Presidio prisoners be dropped. It is important to note that my recommendation was not simply that no disciplinary action be taken, but rather that the mutiny charges be dropped, for certainly the charge of mutiny is a severe one ordinarily reserved for graver or seditious acts and not the kind of infractions which took place in this case.

I now have a response from Secretary Resor who seems to be content in letting "the orderly review process" go forward and to let this black mark in our Nation's history of military justice remain.

Secretary Resor seemingly is in agreement with the Judge Advocate General's decision in reducing the confinement portion of the imposed sentences to 2 years for three of the defendants. This step the Secretary labels as "a matter of clemency preliminary to the appellate review of the convictions and the sentences."

In his letter, the Secretary continued:

I do not believe that any additional clemency action is justified at this time.

I find it a bit difficult to agree that a 2-year prison sentence for this kind of act comes under the clemency umbrella. A majority of the Presidio defendants have recently been sentenced to only 6 months. What kind of rationale supports sentences that have varied from 6 months to 15 years for precisely the same offense?

I am submitting for the RECORD a copy of my May 8, 1969, letter and a copy of Secretary of the Army Stanley Resor's response of June 21, 1969:

MAY 8, 1969.

Hon. STANLEY RESOR,
Secretary of the Army,
The Pentagon,
Washington, D.C.

DEAR SECRETARY RESOR: I very much appreciate receiving a letter on March 26 from your General Counsel, Mr. Jordan, who enclosed a comprehensive fact sheet concerning the Presidio trials. I am sure that you have monitored the continuing trials and are prepared to see that justice is done in these matters.

I would, however, like to call to your attention how speedily Navy Secretary John H. Chafee acted on May 6 when, upon receiving the recommendations of the court of inquiry charged with the responsibility of investigating the Pueblo incident, he overruled the court of inquiry and announced that no disciplinary action will be taken against anyone involved. He could have awaited the outcome of the court martial which would have ensued and let the matter work its way up the military trial calendar until it reached him and then exercised clemency. If he had done that, think of the months and perhaps years of trial and tribulation which everyone involved would have had to suffer.

Surely, the powers vested in Navy Secretary Chafee do not exceed those vested in you with respect to the Presidio incident. I urge you to direct that all pending mutiny charges be dropped and to remit or suspend all unexecuted portions of any sentence as a matter of clemency.

I believe that you would be rendering a great service to the young men involved and to the country at large if in your wisdom you emulated the very charitable act of Navy Secretary John H. Chafee.

Sincerely,

EDWARD I. KOCH.

DEPARTMENT OF THE ARMY,
Washington, D.C., June 21, 1969.

Hon. EDWARD I. KOCH,
House of Representatives,
Washington, D.C.

DEAR MR. KOCH: I have carefuly considered your letter of May 8, 1969 in which you cite the decision of Secretary Chafee in rejecting disciplinary action against members of the Navy involved in the *Pueblo* incident. You have suggested that I extend clemency to the men known as the "Presidio 27" by directing that all pending mutiny charges be dropped and that all unexecuted portions of any sentences be remitted or suspended.

By all accounts, there is abundant evidence that those involved in the Presidio incident deliberately defied the stockade authorities and refused to end their sit-down and return to their places of duty. These facts provided a clear legal basis for preferring some court-martial charges against them and for the convening authority, the Commanding General, Sixth U.S. Army, to convene courts-martial for trial of the charges without the prior approval of any superior authority.

Whether it was an over-reaction to charge the prisoners with mutiny has been the subject of a debate which probably will continue for some time. The sentences imposed in the trials of the first three men to be convicted have also been criticized as excessive. I support the action of The Judge Advocate General in reducing the confinement portion of those sentences to two years, as a matter of clemency preliminary to appellate review of the convictions and the sentences.

I do not believe that any additional clemency action is justified at this time. The records of the initial trials are now being studied by a Board of Review. This initial appellate review could result in the mutiny charges being reduced to a lesser offense, followed by a further reduction of the sentence. The Board of Review may also consider, with regard to the appropriateness of sentences, results of the mutiny trial recently concluded at Fort Ord, in which the most severe sentence to confinement, after a conviction of mutiny, was 15 months, and two defendants were convicted of lesser included offenses. As you are aware, the cases are also subject to final review by the Court of Military Appeals.

The cases are being handled strictly in accordance with the procedures outlined in the Uniform Code of Military Justice. In the review, the rights of the accused will be fully protected and all mitigating circumstances will be fully considered. Accordingly, I see no reason at this time to intervene in this orderly review process.

Sincerely,

STANLEY R. RESOR,
Secretary of the Army.

COLUMBUS, IND.-BASED ARVIN INDUSTRIES IS CELEBRATING ITS 50TH ANNIVERSARY

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. HAMILTON. Mr. Speaker, this year, Arvin Industries, one of the country's foremost manufacturers of automotive components, electronic products, electrical appliances, and architectural products, is celebrating its golden anniversary.

The growth of this industry, based in Columbus, Ind., is a success story with few parallels. Now listed among the 500 largest U.S. industrial corporations, it had its beginning 50 years ago with three founder-employees, each of whom invested his future, his talent, and $3,000 of his treasure.

Today, the firm has subsidiaries in 16 U.S. cities, as well as in Hong Kong and in Tokyo. A work force of some 8,000 men and women turned out products which last year sold for more than $147 million.

This kind of success just does not happen. It comes about because of the dedication and the hard work of many people—people who have faith in the firm, in the free enterprise system, and in the United States.

Because I know so many people in the Arvin family, it is a special pleasure for me to join so many friends of Arvin Industries around the world in wishing the firm continued success.

I wish to submit at this time an excellent article incorporating the remarks of Arvin's top executives at a recent shareholder's meeting in Columbus.

The account, written by George Thomas, business news editor of the Columbus Republic, reads as follows:

GOLDEN ANNIVERSARY: FIFTY YEARS FORWARD WITH ARVIN

(By George Thomas)

"Fifty Years Forward" is the theme of the golden anniversary this year of Arvin Industries here, and it was only appropriate that shareholders attending the company's annual meeting Thursday at Donner center not only be given an insight into the industry's future but also a look into its past.

Eugene I. Anderson and James K. Baker, executive vice-presidents, shared remarks directed at the company's future while T. Earl Robinson, vice-president of finance and treasurer, gave a presentation of Arvin's history.

Mr. Robinson, who joined the company in 1928 at Indianapolis, traced the history of Arvin back to Jan. 1, 1919, when it was founded as the Indianapolis Air Pump company by the late Quintin G. Noblitt, the late Frank H. Sparks, and Albert G. Redmond, now retired and living in Lansing, Mich.

Mr. Robinson told how the three men started the company with a $3,000 investment in a building rented for $10 a month. The first year's production, he said, was near-

ly 40,000 tire pumps. Sales amounted to $60,000, and the profit approximately $10,000.

Later in his talk with the use of color slides, Mr. Robinson explained how the company grew from one small rented room in 1919 to operations today in 20 cities, in nine states and two foreign countries.

From a total of 720 square feet of floor space the first year, he said the company expanded to 665,000 square feet in 1945 and today has approximately 3,400,000 square feet in all of its facilities.

In the neighborhood of sales, he said that from the $60,000 in 1919 the company's sales volume had grown to $167,477,000 at the end of 1968, and net earnings for the firm over the 49-year period had risen from $10,000 to $6,543,000 after taxes for 1968.

Starting out as the Indianapolis Air Pump company, the firm was incorporated as the Indianapolis Pump and Tube company in 1921, Mr. Robinson said. The name was changed to Noblitt-Sparks Industries, Inc., in 1927, and continued under that banner until 1950 when it became as it is now known today—Arvin Industries, Inc.

Mr. Robinson dwelled at length on the early leaders of the company and their accomplishments. Besides the founders, they included Glenn W. Thompson, now chairman of the board who has been with the company 45 years; Eldo H. Stonecipher, now president of Arvin who has been with the company 37 years; Harlan Foulke, vice-president and secretary who has been with Arvin 43 years, and Richard Arvin, whose name the company's products now bear.

Diversification of products manufactured by the company started in the fall of 1920, according to Mr. Robinson, when Mr. Arvin came to the partnership with some patent claims he owned on an automobile heater. The Indianapolis Air Pump company built the heaters which were sold to the Arvin Heater company, another partnership that did the distributing. A year later the Indianapolis Air Pump company bought out Mr. Arvin, Mr. Robinson said.

Other products in those early years, he said, were Arvin hotair heaters, Arvin coaster wagons, Arvin hot-water heaters and the Noblitt electric water heater that was tried as a new product in 1930.

Because of operating costs the electric water heater wasn't feasible at the time, but from this apparent failure, Mr. Robinson said, came a product, a fan-forced electric room heater, in 1931 that has been an outstanding product of the company ever since.

His talk included how the company established a plant in Greenwood in 1923 and plants at Columbus and Seymour in 1925, and then moving of the general offices to Columbus in 1931.

Other highlights mentioned by Mr. Robinson were the company's entrance into the field of manufacturing other automotive parts such as the famed Arvin muffler, the work of its sale force in securing automotive business and government contracts during the second world war.

"In spite of the tremendous progress that was achieved during the past 50 years," Mr. Robinson said, "I am certain that the growth in the next 50 years is going to demonstrate how well these about whom I have talked have built, by this company setting such a blistering pace that the growth of the first 50 years will seem puny by comparison."

Mr. Anderson and Mr. Baker said they felt that Arvin's corporate growth and improvement must of necessity evolve from a corporate plan, and that such a plan should extend a minimum of five years into the future.

They said the 5-year plan will indicate direction of corporate growth, it will indicate rate or speed of the identified directional growth, it will include a method for the evaluation of the effectiveness of growth, and it will possess adequate flexibility to permit change in the plan to accommodate technological, political, social and economic changes of the future.

Their presentation followed an introduction by Mr. Stonecipher, who said that most of the company's efforts are based on plans for the future. "Management can do nothing about the past," he said, "but the experiences in the past can guide in the future."

Reflecting on the past 50 years, he said, "We have had 50 years of success, and they were successful or we wouldn't be here today."

CONSERVATION OF LONG ISLAND SOUND

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. WOLFF. Mr. Speaker, a bed of concrete; or a closed-off salt water lake; or a highly polluted victim of raw sewage; or a graveyard for fish killed by thermal pollution; or a place of natural beauty ruined by a patchwork of bridges.

These are obviously undesirable, yet possible, descriptions of the future of Long Island Sound.

I do not seek to unduly scare boaters, swimmers, fishermen, and those who admire the natural beauty of the Sound.

But this resource is in danger of destruction as a result of unplanned development and too little cooperation between the State and local governments surrounding Long Island Sound. In an era when environmental concern is rising rapidly the Sound has been the stepchild of progress and we must prevent its unnecessary destruction.

The Sound is, of course, an unusually large body of water so accessible to a metropolitan area. Its 1,299 square miles makes it more than twice as large as Puget Sound and 50 percent larger than Cape Cod.

The benefits of Long Island Sound are many: It is a beautiful product of nature; it is a vital transportation link in the Northeast; it is an excellent recreation spot attracting thousands of boaters and millions of swimmers on both sides of the Sound; it is an ideal fishing ground for sport and commercial fishermen and yields plentiful amounts of shellfish; it is a welcome, peaceful haven for thousands of commuters who turn to the Sound on weekends as a respite from the workday world.

The Third Congressional District includes the entire shoreline of the Sound in Nassau County. Included in this area are Little Neck Bay, Manhasset Bay, Hempstead Harbor, Oyster Bay, and Cold Spring Harbor. Thus my interest in conserving the Sound and its shoreline and providing for their planned development consistent with ecological needs.

The legislation that Senator RIBICOFF and I shall introduce today is not designed to impede constructive progress. Rather we seek an Intergovernmental Commission to provide for the cooperation of all appropriate governmental bodies in studying the Sound and its shoreline and recommending what steps might be taken to protect it from the ravages of master builders, polluters, and others who would rob us of this resource.

This legislation is an extension of a bill I introduced in the past and I wish to thank Senator RIBICOFF for his active interest in this matter.

SCANNING THE ARTS

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. BRADEMAS. Mr. Speaker, a recent column in the Kansas City Star, "Scanning the Arts," by Henry C. Haskell, is a most thoughtful summary of some of the arguments for adequate support of the arts and humanities.

I insert the article at this point in the RECORD:

[From the Kansas City Star, May 4, 1969]

SCANNING THE ARTS

(By Henry C. Haskell)

Somewhat less than four years ago—on September 29, 1965, to be exact—President Johnson signed into law a bill establishing the National Foundation on the Arts and the Humanities. That action was hailed at the time as a major development in the formulation of public policy. And there was much rejoicing among those who felt that here, finally, our federal government had accorded belated recognition to one of the most important fields of human activity. Alas, as anybody familiar with the ways of government should have foreseen, the battle was far from won.

Since then, Congress has actually appropriated the munificent total of 32 million dollars for various programs under this project, plus an additional 4 million in matching funds and another 4 million to cover administrative costs. In the last fiscal year, alone, Washington spent more than 5 billion dollars on furthering the natural and social sciences, with nearly 95 per cent of that amount going to basic and applied research on behalf of the former. The support assigned to the arts and humanities still represented less than 1 per cent of this imposing aggregate.

Such comparative figures, of course, can be misleading. Adequate research in the nuclear, biological and space sciences tends, by its very nature, to be enormously expensive, as against the funding required to carry on corresponding work in the humanistic area. It may also be argued that as a nation, we've had far longer experience in backing our scientists. Of necessity, the two "endowments" (one for the arts, the other for the humanities) which comprise this particular national foundation have had to proceed at the start largely on an experimental basis.

Moreover, not only have the various current crises in American society focused attention on what scientific research is able to contribute, but the achievements of such research can be readily perceived, whereas the impact of investment in the arts and humanities is likely to be deferred. We're an impatient people, no doubt, who put great store on quick and easily discernible results. Nevertheless, admitting all these circumstances, it still seems to me hard to justify the apparent reluctance with which Congress has been moving to underwrite its 1965 decision.

For clarity, let's erase the artificial distinc-

tion made between the arts and the humanities in the original legislation. They're a single ball of wax, even if there was a mechanical convenience in separating them for administrative purposes. So, let's talk about the whole humanistic operation as embracing the arts, in addition to such disciplines as history, archaeology, anthropology, literature, philosophy and jurisprudence, which are traditionally assigned to the humanities. I'd include the social sciences among them. But that may be a more controversial position.

In the protracted struggle to secure recognition for the humanities as worthy of direct national assistance (of the sort already granted the natural sciences), many compelling arguments were advanced by some of our most distinguished citizens. It was pointed out how seriously we'd lagged in this respect. It was noted how great an imbalance had gradually been created by the neglect of humanistic studies in our recent concentration on the spectacular potentialities of scientific research. To control the vast physical forces we were unleashing, it was contended, we urgently needed to know more about ourselves and about the lessons of the past, as they bear on the present and future of mankind.

Evidently, our legislators were sufficiently convinced, in principle, to *authorize* such an endeavor. But only just, in the face of so many other demands, they've given its implementation thus far an exceedingly low priority. (Having been previously chastened, the two endowments are now seeking combined program appropriations of no more than 13 million for fiscal 1970.)

My own impression is that the case for beefing up the humanities today is, if anything, even stronger than it was in 1965. We're confronted by a growing value crisis in Western society. As perhaps never before, young Americans are questioning many of the basic assumptions their elders had taken for granted. The more militant among them, especially on college and university campuses, exhibit signs of rejecting these earlier accepted premises *in toto*. Yet if some of us in the older generation complain that they're acting recklessly, without troubling first to become knowledgeable about our common heritage, how deeply have we, ourselves, examined it?

A spirit of alienation is abroad in the land, not limited to any one age group or any one race. Protests—and confrontations—multiply. Some of them appear contradictory. Others seem curiously trivial. And it's often contended that most of them are primarily concerned with dissent, as such; that they don't add up to a constructive alternative which can then be backed by responsible action. These are the typical symptoms of a society in the process of being torn from its accustomed mooring. But what's to replace those norms that are being so widely challenged?

One major function of the humanities, I take it, is to provide a solid base for change, so that we don't in our haste simply repeat follies of the past which experience has demonstrated can lead to disappointment or worse. With honorable exceptions, how many contemporary humanists have been performing that function? How many have allowed themselves to become beguiled by pseudoscientific attitudes, as the fashion of the moment, or have turned increasingly career-oriented, at the expense of transmitting a humanistic vision from one generation to the next?

Is it possible that over the last half century or more the humanities in America have emerged as more and more of an esoteric study for specialists and that we may now be paying the price for this trend in a widespread feeling that they have no practical application to our daily lives? As I see it, in essence the National Foundation on the Arts and the Humanities was set up to help correct that dangerous misapprehension. Thirteen million dollars won't go far. But at least it's something about which we can write our congressmen.

STUDENTS WHO DO NOT MAKE HEADLINES

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 24, 1969

Mr. DENT. Mr. Speaker, in this day of dissension, disinterest, and disloyalty, it is refreshing to learn of a group of college students who still believe college is a place of learning, growing, and serving.

I salute, and I believe Congress will salute, the students at Thiel College in Greenville, Pa. These students may be called squares and scornfully labeled as not very hep. The loudmouthed, bewhiskered few that take over, refuse to learn, to grow, or to serve, cannot understand that they will only get out of life what they put into it. If they sow discontent, they will harvest discontent. If they sow disrespect, they will harvest disrespect. If they practice power and violence, they will reap the same. The laws of nature being what they are, for bad seeds sown one can expect more thistles and thorns than the fruits of good will.

The students at Thiel College represent, not the minority, but in fact the great majority of children. Left alone they can and will make their grievances known, they always have. They will do what needs to be done whenever and wherever the need is known.

The following editorial sums up the case for the Thiel College so very well:

STUDENTS WHO DO NOT MAKE HEADLINES

It's high time somebody investigated the unconventional behavior of students at tiny Thiel College in Greenville, Pa.

A group of Phi Theta Phi fraternity brothers staked a walkathon through more than a dozen nearby communities and raised $1,630 which they donated to Children's Hospital in nearby Pittsburgh.

The Chi Omega sorority sisters have adopted a Navajo Indian girl in New Mexico and contribute to her support. At Christmas time they sing carols at the St. Paul Home for the Aging.

Thiel students raised almost $1,000 for college-related charities and the local Community Chest. They are regular donors at the Greenville Hospital Blood Bank.

Each week a group of Thiel students visits St. Paul Children's Home to tutor orphans. The Sigma Phi Epsilon fraternity house is the scene of an annual Christmas party for these youngsters.

Students teach Sunday evening parish classes at St. Michael's Church. In the summer they paint, repair and do odd jobs in Greenville community centers to help create a better atmosphere for local youngsters.

SENATE—*Wednesday, June 25, 1969*

The Senate met at 12 o'clock noon, and was called to order by the President pro tempore.

Maj. Walter Kennedy, divisional secretary, Indiana headquarters, the Salvation Army, Indianapolis, Ind., offered the following prayer:

Gracious and Eternal God, Thou who art from everlasting to everlasting.

We bow our heads and our hearts before Thee in grateful adoration, for Thou art a great God and worthy of our praise. We give Thee thanks for men and women who are dedicated to public service.

Awaken all of us gathered in this Chamber this day to our need of Thee that our talents and energies may be used to meet the great needs of our country and of the world.

Create within us a divine discontent so that we are dissatisfied with life as it is. Give us wisdom to continue with dignity and confidence to enact laws based upon the great principles laid down by our Founding Fathers.

We further pray, O Heavenly Father, that You will give Your continued strength to the President, to his Cabinet, and to the Congress of our beloved United States.

Through Jesus Christ, our Lord. Amen.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Tuesday, June 24, 1969, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that statements in relation to the transaction of routine morning business be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider a nomination on the Executive Calendar under "New Report."

There being no objection, the Senate proceeded to the consideration of executive business.

DEPARTMENT OF JUSTICE

The PRESIDENT pro tempore. The clerk will state the nomination under "New Report."

The legislative clerk read the nomination of Robert B. Krupansky, of Ohio, to be U.S. attorney for the northern district of Ohio.

The PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed, and the President will be so notified.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

NO TAXATION WITHOUT REFORM LEGISLATION

Mr. METCALF. Mr. President, our tax system is supposed to be based on the premise that the more money a man makes, the more taxes he pays. Yet when we examine statistics of people in high-income brackets, we find a complete breakdown in the fairness of the individual income tax.

For example, in 1967 there were 155 tax returns with adjusted gross incomes above $200,000 on which no income tax was paid, including 21 returns with incomes above $1 million. But these figures do not measure the full degree of tax escape at this level. As former Assistant Secretary of the Treasury Stanley S. Surrey pointed out when he testified before the House Committee on Ways and Means on February 27, these figures only reflect adjusted gross income and not actual incomes. This means that items such as tax-exempt interest, full capital gains, excess percentage depletion, farm tax losses, excess real estate depreciation, and intangible drilling expense deductions were not included in the total amount of income when searching for the number of individuals with incomes above $200,000 and $1 million who are now paying no tax. Figures for those who escape tax in this group would be even more startling if excluded items such as I have just listed were added to adjusted gross income figures.

The point of all this is that a 10-percent surtax imposed on someone who has substantial income but files a nontaxable return is not going to do anything to curb inflation. Even under the new math 10 percent of zero is still zero. So when we get right down to it, those who are already suffering from the injustices of our existing tax system are being asked to take on an additional inequitable burden. They are being asked to bear practically the full load for the surtax.

As I have stated before, I do not intend to vote for a bill to extend the surtax unless I have before me at the same time some meaningful tax reform legislation. The action taken yesterday in the House of Representatives indicates that a majority of the Members of that body feels the same way that I do. I suppose if I had to adopt a motto for the extended debate that is certain to take place in the Senate over this issue, it would be: "No taxation without reform legislation."

(At this point, Mr. ALLEN assumed the chair.)

WINNERS OF THE 1969 McGEE SENATE INTERNSHIP CONTEST

Mr. McGEE. Mr. President, each year I sponsor a competition for Wyoming high school juniors in which a panel of disinterested judges selects winners, one boy and one girl, to spend a week in my office in Washington. The contest is designed to stir up interest among high school students in national and international questions.

The competition is limited to juniors in high school with the thought in mind that their essays would stir interest on their part that they could carry back to their high schools during their senior year. Always I have found the winners to be students of high merit, who have a great interest in their Government and its affairs, and who are students of exemplary conduct. This year is certainly no exception.

This is the seventh year for the competition. The 1969 winners of the McGee Senate Internship Contest are with me in Washington. They are Miss Debbie Davidson, of Burlington High School, Burlington, Wyo., and Pete Williams—who has a namesake in this body—of Natrona County High School, Casper, Wyo.

I wish to pay special tribute to the caliber of the competition they represent, for this, indeed, was one of the high years. The subject of the essays this year was "Our President: How Should We Choose Him?" Frankly, it was a study of our electoral college system. The essays were constructive and contributed a great deal to my own thinking. I quickly add that were their ages to permit it, I think the two winners could make a valuable contribution to a discussion of this question on the floor of the Senate.

Mr. President, it would take considerable time to relate the accomplishments of these two outstanding students, but let me say a few words about each. Debbie, who maintains a straight 4.00 grade average, has been a class officer all through school thus far, and served as vice president of her student council and president of her class this past year. Pete ranks very near the top in a class of 609 at Natrona County High School, where he is president of the National Honor Society and a student senator, as well as one of three students elected to represent the young people of his student community on a committee which also includes nine adults and which is designed to improve the dialog among students and adults.

Mr. President, I ask unanimous consent that the essays written by Debbie Davidson and Pete Williams be printed in the RECORD.

There being no objection, the essays were ordered to be printed in the RECORD, as follows:

ELECTION OF A PRESIDENT?

(By Debbie Davidson, Burlington High School, Burlington, Wyo.)

"It becomes more apparent with every election that a less complicated, more streamlined voting system is needed,"[1] stated the late President Eisenhower. This is only one of the *numerous* outcries against the present election method. Each voting year this problem is seen more vividly by hundreds of voters. More and more Americans are realizing that it is not only time for a change, but time for *action*.

Careful study and consideration of the election process of a President convinces me that the best and most appropriate change in this system would be to abolish the Electoral College and use the "direct election method." I think the Electoral College should be eliminated because it is unable to give accurate results; it is unfair to minorities in the various states; it is unjust to the majority popular vote; it is hazardous and can lead to violence in the settling of disputes; and it can easily break down as a result of misfortune or outright fraud.

The Electoral College has, in almost every election in our history, distorted the popular vote because of its unit-vote system. Comparing two extreme examples one notes that in "1860 the vote for Stephen A. Douglas equaled 74 per cent of Abraham Lincoln's popular vote, but less than 7 per cent of his electoral vote. Yet Franklin D. Roosevelt in 1936 had about 60 per cent of the popular vote, but 98 per cent of the electoral vote."[2]

This distortion of popular vote is especially unfair to minorities in the states. No Republican in Georgia, no Democrat in Vermont, no minority party member in any state can depend on his vote being counted. Far worse, their votes are often tallied against them, thus the almost 3,000,000 popular votes cast for Thomas E. Dewey in New York in 1944 were converted in the Electoral College to votes for Franklin D. Roosevelt. Inevitably, the canceling of votes cast for minority parties helps maintain the unwanted essentially one-party areas such as the "Solid South."[3]

Yet, the Electoral College may also be unjust to these same majority parties because at any time a President may be elected with fewer popular votes than another candidate. This was evidenced in 1876 when Samuel J. Tilden, the Democratic candidate, received a majority of the popular vote, but Rutherford B. Hayes clinched the election by a single electoral vote—185–184. Twelve years later Benjamin Harrison became President even though Grover Cleveland had 100,000 more popular votes.[4]

Besides being inaccurate and unjust to various groups, the system is hazardous and can lead to violence in the settling of disputes. At least twice the country has come close to pandemonium when the Electoral College floundered. One instance occurred in the 1800 election when Republican candidates Jefferson and Burr drew the same number of electoral votes. No doubt existed that the electors intended Jefferson for the presidency and Burr for the vice-presidency, but the final vote had to be cast in the House according to law. "Because of violent feeling

against Jefferson, it took thirty-six ballots in the House to break the deadlock." [5] The above example clearly indicates the future possibility of one President finishing his term without a new President to succeed him—Result: Stock market crash? Nuclear war? Anarchy with its accompanying violence? Can we risk these possibilities?

Included with this possible chaos and other faults is the fact that the Electoral College can easily break down as a result of misfortune or outright fraud because electors are not bound legally to vote for the man they are pledged to support—precedents exist for independent action. In a close race electors might die or become ill leaving confusion which could easily result in numerous arguments.[6] Then, too, the chicanery of secret intrigues are always possible when the decision falls to the House; the election might be bought over by the opposition throwing the whole process into a mock procedure. For instance, in 1800 the opposing party, the Federalists, tried to induce Jefferson to agree to retain Federalist officials in return for their support in the disputed election. Also in the election of 1824, Andrew Jackson was defeated by John Quincy Adams in a contest decided in the House of Representatives. Jackson had a plurality of the popular vote cast, but at that time the electors in Vermont, New York, Delaware, South Carolina, Georgia, and Louisiana were chosen by the legislatures, and no popular votes were recorded in those states.[7]

At the beginning of our democracy, perhaps the Electoral College was necessary for the transition from kingly rule to democratic rule. The founding fathers probably knew that there needed to be some check on the elections of the President because the people with their old ideas and customs, poor communication systems, and little or no education were not ready for the responsibility of a "direct election." Yes, the Electorial College was probably the best answer then, but times have changed! It is now ineffectual, undemocratic, and outdated as was shown in the preceding paragraphs. We are now ready for the *Direct Election of the President!*

Perhaps the strongest point in favor of this process is that the people are now accustomed to the idea of democracy. They want to know that their vote actually counts in the election of the President no matter how small of a minority they represent. Perhaps this is the reason the percentage of people voting in the U.S. is lower than that in numerous other countries who have fewer democratic rights. With a direct vote, hopefully this situation will change. Possibly, we would again begin to realize that THE PEOPLE ARE THE GOVERNMENT, and that by voting for the man of their choice they are adding their voice to the government of the United States.

By directly electing the President, the candidate chosen by the majority of the people (the one with the most popular votes) would always become the new President. It is important to us who still believe in the ideals of our Constitution that the people elect their Presidents as they do their governors, their Congressmen, their mayors, and other political officers; thereby, not allowing the ludicrous possibility of a minority President making decisions that affect the future of the majority.

In conclusion, this system would take away most of the inefficiencies, hazards, and injustices of the Electoral College. The preceding facts against the Electoral College illustrates election possibilities of confusion, disorder, dispute, and political unfairness. Fortunately, thus far, we have avoided a national crisis. However, as important as law and order is in our lives today, we cannot leave it a matter of mere chance any longer. We, the people, need to control our government and I feel this can best be done through the *direct election of our president!*

OUR PRESIDENT: HOW SHOULD WE CHOOSE HIM?

(By Pete Williams, Natrona County High School, Casper, Wyo.)

In May of 1787, about forty men sat in a hot room in Philadelphia. They argued, planned, debated, wrote, created, and drafted for four months. At the end of this period of time, they submitted their work to the public for approval. They called it the Constitution of the United States of America, and this document laid down the fundamental workings of American democracy. But one of the touchiest points of the Constitution was the establishment of the electoral college. It has most recently come under fire since Richard M. Nixon squeaked by former Vice-President Hubert H. Humphrey in a neck-and-neck race for the highest office in the land. Nixon's lead over Humphrey was hardly overwhelming. The figures had to be read to four and five significant digits before Nixon's lead became apparent. Yet Nixon did score a substantial majority of electoral votes, which at best seems an inconsistency. Many Americans are now asking themselves and their Congress, "Our President: How Should We Choose Him?"

We chose our most recent president, Richard Nixon, by using the status quo—the electoral college which was formed by the "Founding Fathers" at the Constitutional Convention in 1787. They had a great deal of trouble deciding how the president should be chosen. Some favored electing him by having each state legislature cast one vote, but the representatives from the large states were opposed. Others wanted direct election by Congress, which was decided against because of violation of separation of power. Direct popular election was vetoed because it was feared that a popular president might seize power. Finally it was concluded that the president should be chosen, as stated in Article II, Amendment XII, by electors equal to the number of Senators and Congressmen in each state who meet on the first Monday after the second Wednesday in December and vote according to the way in which their state voted. (However, as proven by time, the elector need not vote according to the whim of his state, as has happened about six times in United States history.) The president of the Senate then counts the ballots in the presence of Congress, and the person with a majority of electoral votes moves to the White House.

But the electoral college has had several problems in its history. Basically, it has enabled a president to be elected with fewer popular votes than his opponent. Such was the case when John Quincy Adams became president in 1824, even though Andrew Jackson had the popular vote. Similarly, Rutherford B. Hayes became president, yet Samuel Tilden had the popular vote as was the situation when Benjamin Harrison defeated the later president Grover Cleveland. The electoral college simply does not provide for an accurate determination of the people's will.

Back in 1787, without television, radio, widely circulated newspapers and magazines, the populace was not sufficiently well informed. The Constitutional Convention did not want the people to have direct vote. Alexander Hamilton, who favored government by an aristocratic few said,

"A small number of persons, selected by their fellow citizens from the general mass, will be most likely to possess the information and discernment necessary to choose proper candidates for the candidacy." [1]

Thus the electoral college is not responsive to the people, nor do the people have an equitable representation. Connecticut's total vote was six thousand more than Tennessee's in 1968, but the latter had three more electoral votes. In Alaska, there is one electoral vote for every 75,000 people. But in California, an electoral vote represents 393,000. Obviously, this gives less populous states like Wyoming a clear cut advantage. But democratically, no state, regardless of population, should have any advantage over any other state. The electoral college is an undemocratic element in a supposedly democratic society.

But to protest and disagree with the present system is inadequate. Alternatives and solutions must be proposed. Nationally, there have been four suggestions for replacing or repairing the electoral college declared by the 1967 American Bar Association commission to be "archiac, undemocratic, complex, ambiguous, indirect, and dangerous." [2]

The first proposal is to modify the status quo by having each state's electoral vote divided according to the popular vote. Now, all of the state's votes go to the majority winner in that state, regardless of how close an opponent comes to winning. But under the new system, the number of electoral votes a candidate receives would be directly proportional to his total state-wide vote. For example, in Wyoming, if Hubert Humphrey had received 100,000 votes in the last election, and Richard Nixon had won 50,000, Humphrey would have received two electoral votes (⅔ of the total vote) and Nixon one electoral vote (⅓ of the total vote). However, critics say that this idea would be harmful to America's two party system making it easier for minority parties to nibble at a majority of the leading candidate's vote.

A variation on this theme is a second idea supported by Senator Karl Mundt. Here the electoral votes would be rationed into districts, most likely concurrent with Congressional districts, and the winner in each state district would win the district's one vote. In addition, the overall winner would get two bonus points, similar to gin rummy. There are two basic problems here. First, this represents no change for a sparsely populated state like Wyoming. The winner would still get three electoral votes. In addition, this could cause large state political machines to gerrymander districts in favor of a certain political party.

The third proposal would merely abolish the electors. The state would have its election in the normal way, and the candidate with the majority of votes would automatically receive all of the state's electoral votes. The only change would be that there were no

more electors or meetings on the first Monday after the second Wednesday in December. This, of course, is no significant change from the established procedure. The electoral votes would still determine the president, and hence the problems, as previously mentioned, would still remain.

By far the most significant and promising plan is to do away with the electoral system. The next president would then be chosen by direct popular vote, the winner being the candidate with forty percent or more of the votes. If no candidate were to receive that, a run-off election would be held between the top two plurality scorers. There would be several advantages to this plan. There would be no confusion over "unpledged" electors. There would be no more bias on certain "key state", nor would the wishes of people in different states be represented any differently in the total count. A vote in Alaska would have exactly the same influence as one in California. But most importantly, it would be absolutely impossible for a man to become president of the United States without the majority of Americans behind him. With a majority president in office, he would have more public backing and could perhaps be more productive.

But such a procedure would require a constitutional amendment. And when, as Tennyson said, "The old order changeth, yielding place to new", there would be a great deal of controversy and disagreement. As President Nixon noted, "The electoral system is deeply rooted in American history . . .".[3] It will take a great deal of public backing to persuade the President and Congress that a change is indeed in order. A Gallup poll after election day showed that no less than 81% of the populace favors direct election of the president.[4] Possibly, the task might not be as difficult as alleged.

Regardless of the system, the public is due for a change. This is not to say that the men of wisdom who framed our constitution were in error. On the contrary, they did what was best for the time. Thanks to their clear thinking, the Constitution has kept the United States intact for some 182 years. But part of the beauty of America is the politics of change. The Constitution is not a rigid, unyielding, task-master. It is a loyal servant that can bend to the needs of the times. This was immediately apparent when the Bill of Rights was added, and has continued to manifest itself in the form of no less than twenty four constitutional amendments. Now it is time for another change. The American citizen is better informed today than ever before in history. Through the mass media, he now knows the issues and answers of the candidates better than any of his ancestors. In other words, he is now adequately qualified to vote for the man who will make all the vital decisions for his country.

In 1787, the public was merely being educated, but it has continued to learn more and more about politics as the years have progressed. It is now time for the American citizen to be graduated from the electoral college and choose the president himself.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ALLEN in the chair). Without objection, it is so ordered.

DEPARTMENT OF DEFENSE— CONFLICT OF INTEREST

Mr. PROXMIRE. Mr. President, I ask unanimous consent to proceed for 5 additional minutes in the morning hour.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, yesterday, I sent a letter to the Attorney General calling on him to act on testimony before the Subcommittee on Economy in Government, of the Joint Economic Committee. The testimony appeared to bring out what was a clear violation of the conflict-of-interest laws and regulations.

I enclosed pages 631 to 634 of the transcript of our hearings for June 10, 1969, when Mr. Merton Tyrrell testified, and I also referenced excerpts from a memorandum from Mr. A. E. Fitzgerald to Air Force Gen. J. W. O'Neill, which appeared on page 1044 of the transcript for Friday, June 13, 1969.

The testimony related to five Air Force officers who dealt with the Minuteman missile contracts. They retired and went to work for the company, the Autonetics Division of North American Rockwell or the parent company, where they had represented the Government on contracts the company held.

Two of the men were Air Force plant representatives at the company. A third was the guidance and control project officer in charge of the guidance systems the company was making. A fourth was in charge of the Ballistic Systems Division pricing for the Air Force before he retired and went to work for the company. A fifth was the general in command of the Ballistics Systems Division who dealt with the company on these contracts.

The problem is presented most forcefully in an excerpt from Mr. Fitzgerald's memorandum to Gen. J. W. O'Neill. In it he stated:

> In formulating a broad management improvement plan for Minuteman I believe you should consider the problem posed by the mass migration of Air Force officers into the management ranks of contractors with whom they have dealt.

Mr. Fitzgerald continues:

> The Air Force Plant Representative (AFPR) . . . who revoked our clearance at Autonetics is now a division manager at Autonetics. His predecessor, equally protective of the contractor's interest, is also now employed by North American Aviation. The procurement officer who blocked access by the Minuteman Program Control Office to Autonetics contract negotiation records is now employed by North American Aviation. The immediate superior of the project office who was excluded from Autonetics' plant is now employed by Autonetics. The officer cited to me as responsible for killing the cost reduction project I contracted to perform at Autonetics is now employed by North American Aviation.

It is quite clear that these officers represented the Government in connection with the Minuteman missile system and the guidance and control systems of the Minuteman missile with the North American Rockwell Co. and its Autonetics Division subsidiary. It is also clear that they went to work for the company following their retirement from the service.

Title 18, section 207 of the United States Code certainly appears to make such action illegal. It provides that anyone who has been an officer or employee of the Government and then "knowingly acts as agent or attorney for anyone other than the United States in connection with a judicial or other proceeding, application, request for a ruling or other" and I emphasize "other proceeding, determination, contract, claim, controversy, charge, accusation or other particular matter involving a specific party or parties in which the United States is a party or has a direct and substantial interest and in which he participated personally and substantially as an officer or employee, through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise, while so employed, shall be fined, etc."

It is clear that these men participated personally and substantially as officers of the Government in a wide variety of decisions affecting North American Rockwell.

As high-placed employees of the Autonetics Division of North American Rockwell and of the parent company which did some $668 million in defense work in 1968 there appears to be every reason to believe that they acted as agents for the company in connection with proceedings and contracts or other particular matters in which they were involved as specific parties when they were agents and officers of the U.S. Government.

It is one thing for a military or civilian officer of the Government to retire and go to work generally for a company doing business with the Government. It is another thing for those who represented the Government in the plant and in direct negotiation and supervision of contracts with a particular company to then go to work for that company.

As I wrote to the Attorney General:

> If this is not a conflict of interest, then the laws and the DOD directives are not worth the paper they are written on.

Mr. President, I ask unanimous consent that the letter I sent to the Attorney General and the excerpts from the transcript of the hearings which I mentioned be printed in the RECORD; as well as a letter I received from Mr. Barry Shillito, Assistant Secretary of Defense for Installations and Logistics.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
JOINT ECONOMIC COMMITTEE,
Washington, D.C., June 23, 1969.

Hon. JOHN N. MITCHELL,
Attorney General of the United States, Department of Justice, Washington, D.C.

MY DEAR ATTORNEY GENERAL: On Tuesday, June 10, 1969, the Subcommittee on Economy in Government of the Joint Economic Committee heard testimony from Mr. Merton Tyrrell, Executive Vice President of the Performance and Technology Corporation. Mr. Tyrrell had performed work for the Defense Department and the Air Force in connection with the cost efficiency of the production of the guidance and control systems for the Minuteman Missile. In the course of his work he had visited the plants of the contractor and conferred extensively with representatives of the Air Force and the company.

During his testimony, Mr. Tyrrell mentioned what he believed were the harmful effects on efficiency and costs when military or civilian Defense Department contracting, procurement, and plant representative officials go to work for the very firms where they have previously represented the Government on contracts held by these companies.

Under questioning by me Mr. Tyrrell gave a number of specific examples where the plant representatives of the Air Force retired and went to work directly for the company (Autonetics Division of North American Rockwell) where they had just been representing the Government on contract work for the Air Force. In this case, the four men mentioned by Mr. Tyrrell worked on the Minuteman contract for the Air Force and then went to work for the Minuteman contractor. Two of them had been plant representatives for the Air Force. A third was the guidance and control project officer for the Air Force. A fourth was in charge of BSD pricing for the Air Force before he retired and went to work for the company.

In addition to these four, a memorandum provided by the Air Force indicates that the General in Command of the Ballistics Systems Division who dealt with the company on these contracts, also went to work for the company. (See p. 1044, Friday, June 13, 1969 transcript of hearings).

In 1968, North American Rockwell, the parent company, was the 9th largest defense contractor and had contracts worth some $668 million in that year. As of February 1969, they employed over 100 retired military personnel of the rank of Colonel or Navy Captain and above.

I am enclosing copies of pages 631–634 of the transcript of the hearing where the testimony is given.

I am forwarding this testimony to you for action. If true, and I have no reason to doubt the testimony, these acts appear to be a clear violation of the conflict of interest laws, regulations, Executive Orders, and codes of ethics laid down by the Defense Department, the Civil Service Commission, and by the Congress. If these acts are not a violation then, contrary to the repeated representations and statements by the Defense Department, either the laws are toothless or their enforcement is feeble. If this is not a conflict of interest, then the laws and the DOD directives are not worth the paper they are written on.

I say this because when I made public the list of almost 2100 former retired officers of the rank of Colonel or Navy Captain and above who in February of this year were working for the 100 largest defense contractors, I received reassurances that the laws and regulations against conflict of interest were effective from no less a person than the Assistant Secretary of Defense for Installations and Logistics, the Honorable Barry J. Shillito.

Concerning these former officers, Secretary Shillito wrote,

"Their employment, as is the case of all of our approximately 700,000 retired military personnel, is covered by regulation and laws which are designed to prevent conflict of interest."

In reference to the conflict of interest statutes (P.L. 87–649, 87–778, and 87–849 plus the policies and procedures implementing them in DOD Directive 5500.7), Secretary Shillito said:

"We feel these controls are sound and are working."

I therefore urge you to take immediatae action in this case as well as any others brought to light by our hearings.

When government contracting officers and representatives—whether civilian or military—leave the government and go to work directly for a company where they have just been representing the government on contracts with that company, there certainly appears to be a prima facie case of a serious conflict of interest.

With best wishes.

Sincerely,

WILLIAM PROXMIRE,
U.S. Senator.

EXCERPTS FROM JUNE 10, 1969, HEARINGS OF THE SUBCOMMITTEE ON ECONOMY IN GOVERNMENT OF THE JOINT ECONOMIC COMMITTEE, PAGES 631–634

Senator PROXMIRE. Thank you gentlemen, very much.

Mr. Tyrrell, this is one of the most shocking examples of waste and extravagance that I have seen in the years I have been in Washington.

As I understand it, on Minuteman overall, we have been told by a witness before our committee last November, there was a profit of 42 percent on invested capital. Now, in your statement you refer to the harmful effects as you put it "of the switchover of personnel between Government and industry," the very thing Senator Goldwater and I were discussing, that is, procurement officials who go to work for the industry, and sometimes industry officials who come in and go to work in procurement. Can you explain what you mean specifically, how much of a problem was it on Minuteman—let me put it this way—first, how many Defense Department officials, civilian or military, made the switch over to the contractor?

Mr. TYRRELL. Well, in the area of the guidance and control area alone, there were a number of them. For example, the Air Force Plant Representative when we first arrived there, Colonel Roland, retired and went to work for Autonetics. Another Air Force Plant Representative while we were there, Colonel Yockey, retired and went to work for Autonetics.

Senator PROXMIRE. What jobs did these men hold in the Defense Department before they went to work?

Mr. TYRRELL. They were the Air Force Plant Representative who was locally stationed at the contractor's plant and who in effect headed up the administrative administration of the guidance and control contracts.

Senator PROXMIRE. Isn't there a law that prohibits a procurement official from going to work for the contractor with whom he is dealing within a period of two years?

Mr. TYRRELL. I am not a lawyer, sir, and I could not tell you if there is a law to that effect.

Senator PROXMIRE. At any rate, you know as a matter of fact that these men did work on the Minuteman contract for the Air Force?

Mr. TYRRELL. That is correct.

Senator PROXMIRE. And then went directly to work for the Minuteman contractor?

Mr. TYRRELL. That is correct.

Senator PROXMIRE. What were their jobs with the contractor when they went to work for them?

Mr. TYRRELL. Yockey I believe is a director of the business operations there.

Major Klecker, who was the guidance and control project officer, is assistant program manager at Autonetics.

I am not familiar with Colonel Roland's title.

Senator PROXMIRE. Are there other people whose names you could give us?

Mr. TYRRELL. Well, as I mentioned, Major Klecker, who was the project officer, went to work for Autonetics.

Additionally, when we first arrived there there was a Colonel Richard Cathcart who subsequently retired and went to work for Autonetics. And he was the head of the PSD pricing before his retirement.

Senator PROXMIRE. In your judgement, is this prevalent in defense industry in its relationship with the Defense Department?

Mr. TYRRELL. I think it is relatively prevalent. We see it quite frequently. And a number of personnel or military people do retire at a relatively early age, and they quite frequently go to work for the defense contractors.

Senator PROXMIRE. Is it your conviction that this is one of the reasons why there is a soft attitude toward cost overrun and why there isn't the kind of strict surveillance and discipline which you recommend?

Mr. TYRRELL. I think it probably relates to that. I am not sure whether it is the sole cause. I think one of the things that tend to create the softness as you phrase it is this team concept that I brought out in my statement, wherein they consider themselves all members of the same team. And it becomes rather difficult, then, for them to disassociate themselves. And I don't think it is conscious collusion as was pointed out by the Senator, it is something that has just evolved.

They are all part of the same group.

Senator PROXMIRE. Autonetics is a division of North American; is that correct?

Mr. TYRRELL. Yes, it is.

Senator PROXMIRE. And what companies made up the contract or team to which you refer on page 3?

Mr. TYRRELL. There were eight major associate contractors in the Minuteman program.

The Autonetics divisions of North American Rockwell is the guidance and control contractor.

The Boeing company is the integrating contractor, and produces some of the aerospace vehicle equipment.

The Thiokol Wasatch Division produces the first stage motor.

Aerojet General, Sacramento the second stage motor.

Hercules Bokas Works did produce the third stage motor.

Sylvania Electronics the electronics system.

The General Electric Systems Department the Mark XII re-entry system.

Avco Lycoming missile systems division the Mark XI re-entry.

Senator PROXMIRE. You say 490.4 million dollars was the original cost of the research and development for the Minuteman II as of 1962?

Mr. TYRRELL. That is correct.

Senator PROXMIRE. What were the total original estimates including R&D and production as of 1962?

EXCERPTS FROM DECEMBER 15, 1967, MEMORANDUM FROM A. E. FITZGERALD TO AIR FORCE GEN. J. W. O'NEILL INCLUDED IN HEARINGS FROM FRIDAY, JUNE 13, 1969

In formulating a broad management improvement plan for Minuteman, I believe you should consider the problem posed by the mass migration of Air Force officers into the management ranks of contractors with whom they have dealt. The AFPR who revoked our clearances at Autonetics is now a division manager at Autonetics. His predecessor, equally protective of the contractor's interest, is also now employed by North American Aviation. The procurement

officer who blocked access by the Minuteman Program Control office to Autonetics contract negotiation records is now employed by North American Aviation. The immediate superior of the project officer who was excluded from Autonetics' plant is now employed by Autonetics. The officer cited to me as responsible for killing the cost reduction project I contracted to perform at Autonetics is now employed by North American Aviation.

It is of course impossible to assess the effect of impending employment by contractors on the actions of officers still on active duty. I am sure that many of the individuals I have cited had no idea of going to work for North American at the time they were so vigorously protecting the interests of that company vis-a-vis the Government. On the other hand, it is perfectly clear to me that these same officers studiously avoided any action which might offend their ultimate employer.

Lest you accuse me of being unfair to North American and the officers they have employed, I concede that the condition I have described is not unique. Indeed, it is common enough to be our next national scandal. However, the fact that it is so widespread makes it imperative that the practice and its corrosive effect on our stewardship be controlled.

I believe publicity is the solution to the problem just cited. However, I do not have strong convictions on this point. I should like to discuss it with you further.

LETTER FROM MR. BARRY SHILLITO TO SENATOR PROXMIRE

ASSISTANT SECRETARY OF DEFENSE,
INSTALLATIONS AND LOGISTICS,
Washington, D.C., April 10, 1969.

Hon. WILLIAM PROXMIRE,
Chairman, Subcommittee on Economy in Government, Joint Economic Committee, U.S. Senate, Washington, D.C.

DEAR SENATOR PROXMIRE: In further response to your letter of 20 January 1969 concerning the employment of retired military officers by defense contractors, attached are letters from the final six of the 100 parent companies.

With all contractor replies now in, I would like to make some observations concerning the employment of approximately 2,100 senior retired military officers by the 100 top defense contractors. Their employment, as is the case for all of our approximately 700,000 retired military personnel, is covered by regulations and laws, which are designed to prevent conflicts of interest. In my view, our nation has great need today for the skills and professional expertise of our retired military personnel, both commissioned and noncommissioned. They are serving, after honorable careers in uniform, in positions of responsibility throughout our society. In this regard, I am mindful of the thousands of retired people who are in teaching and health and welfare positions, as well as other areas of public service. I am also aware of the contributions which retired people are making to industry.

There are several statutes, as you know, that limit the activities of both civilians and officers after leaving federal service, as well as while in the service. Those covering retired military personnel are more restrictive than those applicable to civilians. The adequacy of these statutes was the subject of congressional consideration in 1962 at the time of enactment of Public Laws 87–649, 87–778, and 87–849. These statutes are referenced, together with DoD policies and procedures implementing them, in DoD Directive 5500.7, a copy of which is attached. We feel these controls are sound and are working. I also feel there should be greater public knowledge of the many checks and balances which exist—government wide—in the acquisition of major weapons systems. Decisions governing major programs are made at high levels with participation by many individuals both military and civilian within the Defense establishment and are subjected to congressional reviews and scrutiny by the Comptroller General. The best weapon to guard against the possibility of impropriety or lack of objectivity is the continued application of the system of checks and balances provided by established legislative and executive processes of our government and in continued surveillance of our program and acquisition processes by Defense Department managers, by the Congress, and by others.

In my letter to you of 26 February 1969, I stated that additional information was being developed. All of our compilations are not yet completed. However, I believe the factors involved in current higher employment of retired officers by the top 100 defense contractors, as compared to 1959, can better be assessed by examining other related data now available that bears on the causes and provides a degree of perspective. For example:

1. INCREASE IN NUMBER OF RETIRED OFFICERS

In 1959, there were approximately 18,600 retired officers with the rank of Colonel or Navy Captain, or higher, receiving retirement pay. The total number of these officers employed then by the top 100 contractors, as reported in letters from those firms, was about 767, or about 4.1% of the total. In 1968 there were about 38,000 retired officers in the same category. Of these, based on letters recently received from the top 100 contractors, about 2,122 are currently employed by them or about 5.6% of the total. This apparent increase must be assessed in context with the increased numbers of business entities that now employ them, as well as other factors discussed below.

2. MERGERS AND ACQUISITIONS

It will be noted from the published lists of the top 100 firms for FY 1958 and FY 1968 there have been many mergers and acquisitions that in some cases compress the current total retired officer hirings into fewer firms, compared with 1959. Examples are McDonnell-Douglas and Ling-Temco-Vought. Other examples include, North American's merger with Rockwell-Standard; Litton Industries' acquisition of Ingalls Shipbuilding; Ford's acquisition of Philco, and many others. Also, there are about 131 more corporate or company entities listed under the 100 parent firms as covered in the FY 1968 list than in the FY 1958 list. Additionally, many acquisitions and consolidations may not be apparent from the firm names or from entities described in the FY 1968 published list of 100 firms and affiliates. This may occur when the acquired firm is absorbed within the acquiring corporation as an operating element and its government contracts and other sales commitments are executed in the name of the acquiring corporation, with no change in the corporate identity. These facts would tend to distort the comparison of present employment totals with the 1959 totals.

3. INCREASE IN BUSINESS ACTIVITY

I believe it is worth noting that for the 16 firms specifically mentioned in your recent statement, total dollar sales (defense and nondefense) increased from about $23.9 billion in CY 1958 to about $47.3 in CY 1968, almost double. This is due in part to the mergers and acquisitions mentioned above. In the same period, total employment of individuals by these firms increased from about 1,084,000 persons to about 1,608,000 persons, an increase of almost 50%. Although comparable employment figures for FY 1959 have not been compiled for most of the top 100 firms, it might be of interest to note that 89 of the 100 firms, which currently employ 2,073 of the listed retired officers, now employ a total of about 6,537,753 persons. This comes out to about .0003% of the total employees.

4. POSITIONS HELD BY RETIRED OFFICERS

It is clear from the recent contractors' letters that a large number of the listed officers are either employed in separate corporate entities or divisions that are entirely commercial in nature, or their position descriptions indicate non-defense activity. For example, the reply from American Telephone and Telegraph Company shows that of the nine retired officers listed, one is with the New York Telephone Company, two are with the Pacific Telephone and Telegraph Company, one with the Ohio Bell Telephone Company, and one is a methods specialist in restaurant management. There is a large number of positions that cannot, by their description alone, be categorized clearly as defense or non-defense in nature. However, of the operational entities below the parent corporate level (under which many of the larger firms have grouped retired officer employees) very few are engaged exclusively (100%) in defense work.

5. THE MILITARY RETIREMENT SYSTEM

Military career officers generally retire at much younger age than civilian employees both in Government and in industry. With many productive years remaining and frequently with heavy financial responsibilities, such as in providing educations for their children through the college level, the vast majority of these officers find it desirable or an economic necessity to seek employment after retirement. While many are specially qualified to continue their federal service in a civilian status, there are statutory restraints. In seeking private employment, they are frequently faced with age bars and "rigid promotion from within" policies of many firms. Thus, they are motivated to seek those types of employment for which they are particularly qualified and where there is a need for their expertise. One of these areas, of course, is the performance of functions incident to research, development and production of military hardware.

6. FEWER OFFICERS OF HIGHEST RANKS NOW EMPLOYED

While a few firms did not identify the specific ranks of the listed individuals either in the 1959 or the recent survey, it appears that approximately 249 retired generals and admirals were employed in 1959 by the top 100 defense contractors (FY 1958 listing). The recent survey discloses that the total number of retired officers in these ranks increased from about 2,580 in 1959 to about 3,485 in 1968.

7. INACCURACIES IN DATA

In compiling data from DoD records on dates of retirement and dates hired by contractors (mentioned in my 26 February letter to you), we are finding errors. Some contractors have incorrectly listed individuals as retired officers (drawing retirement pay). Evidence of this is contained in the attached letter of 25 March 1969 from Honeywell, Inc. Honeywell is rechecking its officer listings and expects that instead of 26 officers there may be no more than 5. We have noted other errors that are apparent on close examination of the listings, such as inclusion of lower ranking officers. These adjustments will reduce the 1969 employment totals. You will be informed of any corrections based on our review of service records.

In summary, this Department is fully aware of the concern expressed in President Eisenhower's farewell address to the nation in January 1961. He stated then that "we can no longer risk emergency improvisation of national defense; we have been compelled to create a permanent armaments industry of vast proportions," and that "we recognize the imperative need for this development." At the same time, he said, . . . "we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial com-

plex." In my view, the Department of Defense is fulfilling its share of responsibility to the nation that we all bear in this effort. I feel it is important, in this regard, that the Congress and the public be aware of the factors I have outlined that put in perspective the increased employment of retired officers by the top 100 contractors. I am concerned that without benefit of this additional information, some may gain the impression that there is an abnormal upsurge or serious disproportionate growth in employment of retired officers in this segment of our national economy. In my view, the facts do not warrant those conclusions. We respectfully request that this letter be placed in the Congressional Record in amplification of the information published on 24 March 1969.

As indicated in my earlier letter, additional information bearing on these questions will be furnished when compiled.

Sincerely,

BARRY J. SHILLITO,
Assistant Secretary of Defense,
Installations and Logistics.

Mr. PROXMIRE. Mr. President, in this latter record, Mr. Shillito assured me that existing laws and regulations are so effective that the Nation has little to concern itself about when almost 2,100 former, high-ranking military officers are working for the 100 largest defense contractors.

OUR ARMED FORCES HAVE BEEN IN EUROPE FAR TOO LONG

Mr. YOUNG of Ohio. Mr. President, as early as April 1963, I spoke out, urging the withdrawal of a large number of our troops from Western Europe. Since then I have on many occasions continued to urge that we reevaluate our military and naval requirements in Europe with a view toward bringing home hundreds of thousands of military personnel with their dependents, as well as thousands of civilian employees stationed in nations of Europe.

Today, more than 300,000 men of our Army, Navy, Air Force, and Marines are stationed in Europe with their 255,000 dependents. Of that number, 209,450 servicemen are stationed in West Germany, along with 146,000 dependents. All this, at great expense to American taxpayers, 24 years following the end of World War II.

In addition, there are more than 15,000 U.S. citizens who are civilian employees of our Armed Forces in Western Europe. Then, of course, in addition to these civilian employees, 12,534 dependents of such employees are in Western Europe, of whom more than 8,000 are in West Germany.

The time is long past due for us to withdraw at least four divisions of our Armed Forces from Western Europe. World War II was ended nearly 25 years ago. Are we going to police all Europe for another 25 years? Such a probability—and it is a probability—really seems preposterous.

The United States contributes approximately one-third of the manpower and almost 80 percent of the cost of defending Western Europe. The fact is that today the Western European nations are strong enough, both militarily and economically, to provide for a much greater share of their defense needs. Following the devastation caused by World War II, Western Europe completely rehabilitated itself, largely with money supplied by American taxpayers.

That seems to be our habit. We sent millions of men to Europe to crush Nazi Germany. Then, we provided aid to restore her. Now we are spending billions of dollars in Southeast Asia and are sacrificing the priceless lives of American youngsters. A few years hence, after the bloodletting stops, no doubt we shall be sending billions of dollars to restore Vietnam, which had been devastated by a civil war and then by our occupation.

West Germany is now a thriving and dynamic region of greatly expanded economic, political, and potential military capacity.

The United States is the only member of the NATO alliance that has met its commitment 100 percent. The only other NATO nation that has come up to even 80 percent of its commitment has been West Germany. Based on gross national product, West Germany is the third richest country in the entire world, ranking next to the United States and the Soviet Union. The West German mark is one of the world's strongest currencies.

Surely, it is outrageous and unthinkable that nearly a quarter of a century following the end of World War II, the United States continues to maintain 200,000 officers and men of our Armed Forces in West Germany. Just why should we be protecting this powerful nation in this manner and to this extent, particularly at a time when there is no threat of aggression from the Soviet Union, because that nation is having a hot time with Communist China and suffering battle casualties in military engagements along the border with Communist China?

West Germany has a conscription law which drafts some of its nationals for a period of 18 months only, while young American draftees are required to serve for 2 years. Furthermore, the total number drafted is insignificant compared with the draft in our Nation under our selective service laws.

Very definitely, the United States should withdraw troops from West Germany instead of sending more troops over to protect a country well able to defend itself.

The expense of maintaining our Armed Forces and their dependents in Europe accounted for $1.5 billion of our foreign exchange deficit in 1967. This is in addition to the more than a billion dollars spent annually in Western European countries by our servicemen and their families stationed there and by American civilians employed in Europe by the Department of Defense.

It is crystal clear that bringing hundreds of thousands of officers and enlisted men and their dependents home from Spain, Belgium, West Germany, and other European nations would reduce the drain on our gold supply and help to solve our balance-of-payments problem.

Furthermore, whatever men of our Armed Forces are sent to Western Europe for a tour of duty in the future should be sent for a period of not more than 13 months, and with no dependents. If there really is a need for our troops in Europe, then we should have a lean, trim, combat-ready force stationed there, not hundreds of thousands of men of our Armed Forces living like "squawmen" with their wives and children.

Many sergeants are living there with their wives and children. I know from experience as a private in time of war that the sergeants run the Army. Any sergeant who is worth his salt—and they are all worth their salt—would not have his wife and children there if there were an imminent danger of attack.

Furthermore, families of our officers, from captain on up to general officers, with their servants and fine homes, "never had it so good." Many of those officers buy Mercedes automobiles, paying for those foreign-made automobiles with American dollars. Anyone who goes to Garfinckel's department store can hear the chatter of the wives of majors and colonels who are buying luggage to go to Europe, looking forward to a luxurious life there.

Mr. President, I ask unanimous consent to proceed for 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. YOUNG of Ohio. Following World War II, a bitter cold war was raging with the Soviet Union, and there was a threat of aggression which required the presence of our Armed Forces to deter the Russians. Stalin was then dictator of the Soviet Union. He is dead. The threat of military aggression by the Communists against Western Europe has all but vanished. The present rulers of the Soviet Union are no longer rattling their missiles. In fact, the Russians are veering toward capitalism. The Soviet Union is no longer a have-not nation. Its leaders now appear principally dedicated to the objective of raising the standard of living of their people.

Furthermore, it is the nuclear umbrella of the United States that provides the real protection for Europe and West Germany, not large numbers of ground troops. In addition, by our Operation Airlift we have proven we can airlift a combat-ready division to West Germany from the continental United States in a matter of hours.

The nations of Western Europe can today provide the necessary troops to defend themselves, instead of continuing to depend on us. Let their young men be conscripted and drafted into their own armed forces. Why should the lives and aspirations of our teenage young men be disrupted to form the first line of defense for the Germans and French? Under the shelter of our protection, these nations have waxed prosperous while our fiscal and monetary problems have grown steadily more serious.

We should immediately return at least half of the highly trained professional fighting men now stationed in Western Europe to the United States.

It is a stupid policy on the part of the Secretary of Defense and the generals of our Joint Chiefs of Staff to maintain in West Germany six of our best combat divisions, made up in large part of enlisted men and commissioned officers who are career soldiers. Undoubtedly, they are

the finest and best equipped soldiers who have served any nation under the bending sky of God.

Mr. President, the reduction in U.S. Armed Forces in Western Europe might very well induce the leaders of the Soviet Union to make a similar reduction in its military forces in eastern and central Europe. Such action would produce a significant easing of world tensions and go far toward helping to promote a peaceful settlement in Europe, and go far toward promoting the hope that all of us entertain—to live in a period of international peace and contentment.

THE HOSPITAL STRIKE IN CHARLESTON, S.C.

Mr. MONDALE. Mr. President, on May 15, 1969, a bipartisan group of 17 Senators wrote to President Nixon and urged him to use the prestige of his office to bring the hospital strike in Charleston, S.C., to a satisfactory resolution. The President has not responded to our appeal.

It is now June 25, and the strike continues. Tensions have heightened in Charleston, and there is an atmosphere which hauntingly reminds us of a similar strike in Memphis in another year.

My original concern in this matter has been intensified by a series of events occurring over the past several weeks.

As of Thursday, June 10, it appeared that the Charleston strike was near settlement, due in large part to HEW's recommendation of June 5 that the 12 workers, whose dismissal triggered the strike, be rehired. Then, on that day, the director of the hospital, Dr. William M. McCord, suddenly withdrew the formal offer to settle which the hospital had previously made. At the same time, it was reported in the Charleston newspapers that Secretary of Health, Education, and Welfare Robert Finch had been the object of political pressure and had given some assurance that he would take an independent look at HEW's position. This statement, which Secretary Finch did not repudiate, changed an encouraging situation into one which is now rapidly deteriorating.

This is most unfortunate. HEW has been negotiating with the hospital since July 1968 over a number of violations of civil rights laws, including violations of Executive Order 11246, which requires an equal opportunity employment policy on the part of Federal Government contractors. These violations are so substantial that it took a nine-page, single-spaced letter from a HEW official to Dr. McCord to list all of them.

This letter was written last September, but the situation is no different today. The evidence of the hospital's continuing failure to comply with Executive Order 11246 is particularly relevant to the issues in the strike, for it includes the firing of the 12 workers, the denial to blacks of opportunities for higher positions, and the failure to have an affirmative equal opportunity hiring program.

If HEW indeed intends to relax its pressure, its reasons for doing so are plainly, overtly, and shamefully political. For the record clearly shows that the hospital has failed to comply with the Executive order; and the law requires that Federal funds should be cut off if it does not come into compliance.

Mr. President, this is a very serious matter. There are thousands all over the country who are watching to see whether nonviolence can work in Charleston and whether justice will prevail. If the dispute is not settled, there is grave danger that frayed tempers and thinned patience lead to a tragedy in Charleston which could have the most serious implications for the domestic tranquillity of city after city around the Nation.

So this is not merely a labor dispute. It is a civil rights matter, and the good faith of the Government's civil rights policy is at stake—good faith which has already seriously been brought into question by recent actions involving schools and other Government contractors.

If this matter is to be resolved justly and expeditiously, it is essential that Secretary Finch publicly state that he intends to stand by HEW's original intention to enforce the Executive order. All rumors, leaks, and intimations to the contrary must be repudiated, so that the hospital officials and others in South Carolina will know exactly where they stand—that they must obey the law or lose their Federal funds. That is the only way this dispute can be resolved. I hope that Secretary Finch will take that path. It is so clearly the right and proper thing to do.

Mr. President, I ask unanimous consent that the following items be printed in the RECORD:

First, HEW's letter to hospital officials concerning violations of Executive Order 11246.

Second, a telegram which I sent to Secretary Finch on June 14, 1969, asking HEW to stand behind its recommendation to the hospital that the 12 workers be rehired.

Third, an article entitled "Hospital Strike Now Political Football," written by Rudolph A. Pyatt, and published in the Charleston, S.C., News and Courier of June 15, 1969.

Fourth, an article entitled "Political Infighting Balks Charleston Hospital Pact," written by Bruce Galphin, and published in the Washington Post of June 16, 1969.

Fifth, an editorial entitled "Secretary Finch and the Charleston Strike," published in the Washington Post of June 18, 1969.

Sixth, an editorial entitled "The Charleston Strike," published in the Washington Post of June 18, 1969.

Seventh, an editorial entitled "The Charleston Cycle," published in the New York Times of June 23, 1969.

Eighth, an article entitled "Charleston Calm As Negroes March," written by James T. Wooten, published in the New York Times of June 23, 1969.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,
Atlanta, Ga., September 19, 1968.

Dr. WILLIAM M. MCCORD,
President, Medical College of South Carolina, Charleston, S.C.

DEAR DR. MCCORD: Unforeseen circumstances prevented me from writing to you on the schedule I promised. I sincerely hope the delay has not been too inconvenient for you. I apologize for the length of this communication, but I am attempting to spell out all of our findings and recommendations as clearly and concisely as possible.

Our review was concentrated in three major areas. They were, a) Equal Educational Opportunities, b) Equal Health Opportunities, and c) Equal Employment Opportunities. I will list both our findings and recommendations for each of these areas of investigation.

EQUAL EDUCATIONAL OPPORTUNITIES

Findings

1. The Medical College of South Carolina had not established an affirmative program designed to attract Negro students.

2. There was no systematic or comprehensive recruitment program for predominantly Negro schools.

3. The minority community had not been informed of loans or scholarships that were available to them.

4. There were segregated housing advertisements on the college's bulletin boards.

5. Students were placed with practicing physicians for the purpose of receiving on-the-job training. It appears from reports that some of these physicians practiced racial discrimination.

6. The Medical College Hospital is owned and operated by the Medical College of Charleston. Physicians at the hospital have faculty status—all are white. In order to practice medicine in the hospital, physicians must be members of a specialty board. No Negro physicians in Charleston County are members of a specialty board. There are several Negro physicians in Charleston.

7. The School of Pharmacy places students for "apprenticeship" training with some pharmacies that engage in discriminatory practices.

8. The fraternities in the School of Pharmacy discriminate racially in membership requirements.

9. The School of Allied Sciences has affiliations with white schools only. This policy tends to limit the potential of the Negro students of the State of South Carolina.

Recommendations

1. That the Medical College catalogue, brochures, and other printed promotional material and applications clearly indicate the nondiscriminatory policy of the college.

2. That comparable action be taken to recruit Negro students to pursue a medical education at the Medical College. These steps should include:

a. Broad dissemination of information as to the availability of a medical education, and the availability of financial assistance to undergraduate colleges and to high school counselors (especially to Negro colleges and high schools) in the state, and to Negro colleges throughout the eastern and southeastern states.

b. Due to the history of discrimination, special efforts should be directed toward the pre-med advisors at Negro undergraduate colleges and possibly high schools to help motivate more Negroes and minority group members toward a medical career.

c. The Medical College might consider developing a recruitment team from all of its related schools (e.g., Pharmacy, Nursing, Allied Sciences, etc.) which could make concentrated recruitment efforts, some of which

would be directed specifically toward minority students. Various techniques should be developed which would have considerable potential for recruitment of minority group students including:

(1) Contact with Negro professional, civic, and social groups to elicit their help in recruitment, and in dispelling the image of the Medical College as a segregated institution.

(2) Promotion of visits to the Medical College by Negro pre-med students over the state.

(3) Visits to Negro college campuses by Medical College staff.

(4) Sponsorship of health-related career days, especially for Charleston County High Schools.

3. That the College assure itself that no arrangements are made between the college and private physicians for the purpose of teaching students when the physician discriminates on the basis of race in his practice.

4. That the Medical College assure itself that no notices for rental or sale of living quarters are posted or lists kept by the College unless such housing is available to all students without regard to their race.

5. That the School of Pharmacy assure itself that every pharmacy to which they refer a student for work in an "apprenticeship" arrangement, will accept those who are referred without regard to race.

6. That the fraternities that have engaged in racially discriminatory policies and practices be informed of the College's posture on civil rights and asked to change. If they do not comply, that the organization should be banned from campus by the administration.

7. That the School of Allied Sciences establish affiliations with Negro colleges in the state immediately in order to give all students of South Carolina an equal educational opportunity.

Since the School of Nursing has not previously enrolled non-white students, the following steps are recommended:

1. There are several non-white persons who have applied and have been admitted to study practical nursing. Persons in this category should be screened carefully as potentials for full professional training as graduate nurses.

2. That predominantly Negro schools be informed of the opportunities and policies in the School of Nursing.

3. That continuous attempts be made to identify students with potential at the high school level. Local Negro school counselors can be of great help in this endeavor.

EQUAL HEALTH OPPORTUNITIES

Findings

1. There were no written nondiscriminatory policy statements.

2. It was alleged that the clerk at the admission office called the floor and gave the nurse the race of the patient, and asked what bed assignment should be made. This suggests that room assignments might follow a racial pattern.

3. We were informed in the community that patients were shifted around to achieve a bi-racial mix in anticipation of the H.E.W. visit. When white patients complained about rooming with Negroes, the Negroes were moved.

4. No comprehensive or systematic methods have been used to notify all of the people of Charleston (both Negro and white) of the hospital's nondiscriminatory policy.

5. Mr. Porter, who was assigned the responsibility for civil rights, has not developed any kind of affirmative action program. The subject of civil rights has not been a formal part of the staff meeting agenda.

6. It was alleged that courtesy titles are seldom used and staff members are often rude to Negro patients at the clinics.

7. Service (non-paying) patients and private patients are separated and are alleged to be treated differently.

8. It was alleged that senior medical students attend to private patients, while junior medical students attend service patients.

9. There is some degree of desegregation in the wards, but the separation of the service and private patients has created an apparent imbalance.

10. From interviews and observation, private patients appear to have received better nursing and other care than service patients. The majority of the private patients are white.

11. Private patients have three visiting periods per day; service patients have only one. It was alleged that on one floor, a white patient's sister was allowed to visit while the Negro patient's sister was not allowed to visit.

12. It was also alleged that husbands of Negro patients are not allowed in the labor room, while husbands of white patients are.

13. In many parts of the hospital, it was found that there are still essentially "dual" restroom facilities, although "white" and "colored" signs have been removed. It is apparent that these signs have only recently been removed because outlines of the old signs are still visible. This suggests the possibility that old customs are still being practiced in the use of these facilities.

14. In the out-patient clinic, patients appear to be seen on a first-come, first-served basis, however Negro patients are told to wait in Room 18, while white patients are told to wait in Room 53. However, it was alleged that when an observer who appeared to be concerned with civil rights procedures was seen near the admitting station, patients were told to wait in either Room 18 or Room 53.

15. White staff members were observed acting in what appeared to be a rude manner to Negro out-patients. Courtesy titles were not being used.

Recommendations

1. That policy statements regarding nondiscriminatory practices be written and widely distributed immediately.

2. That room assignments be made at the admitting desk without regard to the patient's race.

3. That a daily racial census be taken and forwarded to the Office for Civil Rights each week for one month, and thereafter upon request.

4. Since everyone will not read distributed material, and since it is the responsibility of the administration to see to it that everyone understands his/her responsibility, it is recommended that seminars be conducted which include the following topics: (a) specifics of the application of Title VI to hospitals; (b) Title 45; (c) H.E.W. guidelines; (d) equal opportunity in hospitals and all health programs; (e) the Federal dollar and nondiscrimination; (f) the Civil Rights Act of 1964; and (g) civil rights obligations of staff members at all levels. A schedule of when and where these meetings are held should be kept for your record.

5. That discussions of developments in civil rights accomplishments be placed regularly on the agenda at staff meetings.

6. That all staff be specifically instructed about the necessity for the use of courtesy titles. The breach of this policy should be dealt with severely by the administration.

7. That the quality of service be equalized immediately as between private and service patients.

8. That waiting rooms be truly integrated.

9. That staff restrooms be posted as such and all staff be advised accordingly.

EQUAL EMPLOYMENT OPPORTUNITIES

Findings

1. Bulletin boards did not have Equal Employment Opportunity (EEO) posters.

2. Personnel policy statements did not reflect contractor's equal opportunity posture.

3. There was no Equal Employment Opportunity Officer.

4. Advertisements for employment do not reflect that the facility is an equal opportunity employer.

5. Recruitment and employment sources were not informed of contractor's posture on EEO.

6. The old established personnel policies and procedures precluded affirmative action, which was needed to guarantee equal employment opportunity.

7. Interview reports are evaluated by a clerk who does not have personnel experience.

8. Applicants are given a written test that has not been validated. For some job categories, the test is irrelevant.

9. Some job descriptions require in-house experience for jobs that minorities have not had the opportunity to get. There is no training program to fill this gap.

10. Department heads and supervisory staff are not conversant with the contractor's position regarding equal employment opportunity.

11. Employment patterns clearly suggest a stratification of employees with regard to race, i.e., administrative and professional positions are occupied by whites; nonwhites are concentrated in service and non-skilled categories.

12. The application for employment requires each applicant to submit a photo.

13. The contractor (Medical College of Charleston) has not taken appropriate steps to insure the compliance under Executive Order 11246 by the company building the new addition to the Medical College.

Recommendations

1. That there be a proper display of posters at key points such as main lobby, personnel office, and all employee bulletin boards.

2. That there be put in writing a firm equal employment opportunity policy statement to be disseminated to all department heads and supervisory personnel.

3. That an equal employment opportunity officer be appointed. This officer will assume the duties of, (a) disseminating information concerning equal employment opportunity; (b) keeping surveillance over the implementation of the equal employment opportunity policy; (c) planning equal employment opportunity actions and goals; and, (d) evaluating equal employment opportunity progress.

4. That all advertisements contain the tag line, "An Equal Opportunity Employer."

5. That all recruitment and employment sources be notified of the contractor's posture on equal employment opportunity. It will be desirable to receive an acknowledgement of this notification. This may be done by leaving space at the bottom of the letter for endorsement, or in any other manner which the contractor chooses.

6. That purchase orders contain a reference to Executive Order 11246. This will serve to notify sub-contractors of their responsibility to the prime contractor in accordance with Executive Order 11246.

7. That all personnel procedures serve to support affirmative action as exacted by Executive Order 11246.

8. That all department heads and supervisory personnel be made fully conversant with the contractor's position with regard to equal employment opportunity.

9. That training programs support the total equal employment opportunity effort.

10. That persistent efforts be made to break the old patterns of stratified racial employment which have concentrated white employees in administrative and professional positions, while shunting non-whites into the unskilled and service categories.

11. That the equal employment opportunity officer maintain a day-to-day file relating to the problems and progress of the implementation of the equal employment

opportunity policy of the Charleston Medical School.

12. That anything that would identify the applicant, and which might cause him/her to be subjected to discriminatory acts, not be a part of the application form. Such information should not be a part of the employee's personnel folder.

13. That the contractor (Medical College of Charleston) take the necessary steps to ensure that the building contractors who are currently constructing the new physical plant for the school, comply fully with the requirements of Executive Order 11246 in all phases of their employment.

In your response to the recommendations which are set forth above, it will be helpful if you will structure your reply so as to address yourself to each of the three areas separately. Upon receipt of your letter, this office will evaluate your response and then advise you of our findings.

Please let me say once again, on behalf of our staff, that we appreciate your cooperation and that of your entire staff on whom we called. Your personal concern and intentions to correct problem areas made our task much easier than it would have otherwise been.

Sincerely yours,

HUGH A. BRIMM,
Chief, Contract Compliance Branch, Office for Civil Rights.

JUNE 14, 1969.

Hon. ROBERT H. FINCH,
Department of Health, Education, and Welfare, Washington, D.C.:

I am extremely concerned about the continuing labor strife in Charleston, South Carolina, involving hospital workers and the city hospitals.

It is my understanding that the two sides were very close to a settlement of their dispute, due in large part to HEW's recommendations to hospital officials that the 12 workers whose dismissal precipitated the walkout be rehired.

However, on June 12, 1969, these hospital officials informed the union that their settlement offer was being withdrawn.

In light of this development, it is vitally important that HEW stand behind its original recommendation concerning the rehiring of these 12 workers. If the recommendation is withdrawn, there may be no end in sight to the strike.

I commend you and the department for your original recommendation in this matter, I urge you not to take any action which would prolong this potentially dangerous labor situation.

WALTER F. MONDALE,
U.S. Senate.

[From the Charleston (S.C.) News and Courier, June 15, 1969]

HOSPITAL STRIKE NOW POLITICAL FOOTBALL

(By Rudolph A. Pyatt)

WASHINGTON.—The 12-week-old Charleston Hospital strike has developed into a political football now being fumbled in the nation's capital.

Caught in the center of the scramble this week was Secretary of Health, Education and Welfare, Robert H. Finch.

Finch, in a familiar role since becoming head of HEW, found himself having to placate members of Congress who take a dim view of federal guidelines.

This past week Finch performed a nifty routine as he attempted to allay the fears of at least two members of the South Carolina delegation.

In the wake of an HEW letter to Dr. William M. McCord recommending certain changes to be instituted at the college and hospital, Finch found himself breakfasting with Rep. L. Mendel Rivers, receiving a letter and telephone messages from Sen. Ernest F. Hollings and giving assurances to Sen. Strom Thurmond.

The activity of those three members of the delegation produced some rather curious developments here. At the same time, the net effect of the attention given Finch by Thurmond and Rivers has had a damaging effect on negotiations in Charleston, a source close to the situation told this reporter.

When it appeared the strike at the two Charleston hospitals would explode into an embarrassing and violent episode, several members of the House and Senate pleaded with President Nixon to intervene.

Hollings, Thurmond and Rivers, silent until then, took exception to the "meddling" by their colleagues.

Still Hollings and Thurmond were guarded in their public comments on the strike and related matters. Rivers, after HEW agreed last month to investigate a complaint by 12 employes who had been fired by the Medical College Hospital, wrote a letter to Finch demanding that he review HEW's policies in handling the complaint.

Finch replied to Rivers' May 21 letter but the congressman complained "it wasn't satisfactory."

Meanwhile, HEW's contract compliance branch chief wrote a letter to Dr. McCord June 5 recommending that the dismissed 12 employes be rehired with retroactive pay.

Three key sections of that letter which was made public last week apparently spurred Rivers, Hollings and Thurmond into action while paving the way for a threatened strike of nurses and doctors at the Medical College Hospital.

In addition to the recommendation that the 12 employes be rehired, the letter also stated that a HEW investigation "has established one basic fact, which is, that the Medical College of South Carolina together with its hospital facilities is in non-compliance with the requirements of Executive (presidential) Order 11246."

The letter to McCord further stated: "in order to continue as a government contractor it will be necessary that the Medical College develop an affirmative action program in equal employment opportunity as set forth in the rules and regulations of the executive order."

After reading the letter, a member of the state's congressional delegation here, noting that Dr. McCord had requested that the letter be written, said it allowed the Medical College to put the onus on the federal government. "That way they (the hospital) could always say 'we had to yield to pressure from HEW in meeting these demands,'" the member reasoned, asking that he remain anonymous.

The letter from HEW's Hugh Brimm to Dr. McCord states in part:

"Pursuant to your request following our discussions on June 3 with you and members of your staff and Mr. Robert Alexander from Governor McNair's office, I am sending this communication."

But the most curious development Thursday was a strongly unequivocal statement by Leon Panetta, director of HEW's Office of Civil Rights.

"At this level of the office of civil rights, we are proceeding according to our letter to Dr. McCord," Panetta insisted. An aide to Panetta said he was fully aware of the meeting between Finch and Rivers earlier that day.

Just what Finch told Dr. McCord has not been determined.

Whatever it was may have had a key bearing on McCord's decision at the last minute not to rehire the 12 employes after all.

The offer to rehire the 12 was made last Monday but was withdrawn late Thursday.

A spokesman for the striking hospital workers, obviously disappointed over seeing the prospects for a settlement shattered, told this reporter Friday:

"We suddenly realized what happened. We know that Mendel Rivers, Fritz Hollings and Strom Thurmond applied pressure to the White House, and Finch, through Thurmond and Rivers makes this representation that he's going to investigate the matter personally. Meantime no funds would be withdrawn.

"So I gather that the real motivating factor for offering to rehire the 12 was based on the earlier HEW recommendation and for no other reason."

The Spokesman concluded: "McCord has gotten encouragement from somebody."

He added that is the feeling of the strikers that Finch's alleged statement is "indicative of a long, drawn-out and extended process during which time the Medical College of course will be able to continue without the 12 and still receive benefit of the funds.

"That sort of explodes the settlement right in our faces, whereas if there was an imminent threat of a withdrawal of funds, they would rehire the 12 workers."

Oddly enough, the administration ignored the requests of non-South Carolina congressmen to intervene in the strike but it now finds itself very much involved—apart from the question of unionization.

The involvement has become deeper, it appears, because of Washington politics. Secretary Finch, ever the politician—some say he has designs on the presidency—while saying what Rivers and Thurmond wanted to hear, may have succeeded in giving the Southern Christian Leadership Conference a new lease on life in Charleston. At the same time Thursday's events served to satisfy nurses and doctors who were reportedly ready to abandon the sick in favor of non-humanitarian principles in much the same manner as the strikers they have criticized.

On the other hand, Finch has not made a public statement about his conversations with Rivers, Thurmond or Dr. McCord.

But given Finch's past performances, he may respond to someone of more liberal bent by reminding them that the Nixon administration last week Wednesday announced plans for a major crackdown on government contractors who practice racial discrimination in jobs.

That in effect is what the June 5 letter to Dr. McCord is all about. Rehiring of the 12 employes is only part of the package, HEW officials say.

[From the Washington (D.C.) Post, June 16, 1969]

POLITICAL INFIGHTING BALKS CHARLESTON HOSPITAL PACT

(By Bruce Galphin)

Just before 6 p.m. last Thursday, leaders of striking hospital workers in Charleston, S.C., were in a jubilant mood. That night was to be the climax of their costly, 12-week-old walkout. A compromise settlement had been approved by all parties, and they were about to put it in writing.

Then an officer of the Medical College of South Carolina telephoned William Saunders, who as a member of the Charleston Community Relations Committee had helped forge the agreement.

A hitch had developed, the college officer said, and there wasn't any point in having the meeting until it was straightened out. He would call again the next day.

Forty-five minutes later, Saunders discovered what the hitch was. A messenger brought him a one-sentence note from Dr. William McCord, president of the Medical College and director of its hospital. It read:

"Please be advised that the offer to employ the 12 discharged workers made on June 9, 1969, is now withdrawn as of Thursday, June 12."

Firing the dozen black nonprofessional workers had triggered the strike, and rehiring them was an irreducible demand of the union—with the strong but coincidental support of the U.S. Department of Health, Education and Welfare.

So the strike continues. The union—Local 1199B of the Drug and Hospital workers—

and the Southern Christian Leadership Conference say they will escalate demonstrations. The longshoremen's union is talking of tying up the port of Charleston. Moreover, the situation is now ensnarled by Federal-state conflicts, Democratic-Republican feuding, and internal GOP squabbles.

What had happened to the settlement? Even Gov. Robert E. McNair—who reportedly had approved its terms two days before—is believed to have been caught off balance by McCord's reversal.

For one thing, South Carolina Republican state chairman Ray Harris made it a partisan issue. He warned that voters would hold Democrat McNair and other officials accountable if the 12 workers were rehired. McNair may challenge Republican Sen. Strom Thurmond in 1972.

State Republicans also are embarrassed that a Republican-ruled HEW has taken a strong rehiring position.

Sen. Ernest F. Hollings and Rep. Mendel Rivers, Democrats, and GOP Sen. Thurmond made protestations to HEW. As a result, HEW Secretary Robert H. Finch said the rehiring proposal was subject to review—but that was no more or less than Atlanta compliance officials had said.

It was also reported that several doctors and nurses at the Medical College had threatened to resign if the 12 were rehired. Some doctors actively sought help through Republican Party contacts.

But the prime suspect, in the union's eyes, is Dr. McCord himself. Even in a state where anti-unionism prevails, few match his vehemence on the subject. He once told employes the union was only after their money, and on another occasion remarked: "I am not about to turn a $25 million complex over to a bunch of people who don't have a grammar school education."

The strike began with the March 17 firing of 12 Negro workers who, in Dr. McCord's view, deserted their posts but who in their own view, merely came to his office on free time to present grievances.

Within 11 days, more than 400 nonprofessional workers had walked out of the medical college and Charleston County Hospital. The basic issues include not just rehiring the 12 but union recognition, wages and grievance procedures.

In the meantime, and unknown to the workers, HEW had been conducting since last July 31 its own investigation of the Medical College—a routine check on whether it was meeting standards for Federal contractors. (The college receives about $8 million in construction money and $4 million for research and other grants.)

In a still-unreleased letter dated Sept. 19, 1968, Dr. Hugh A. Brimm of Atlanta, HEW's regional contract compliance chief, notified the hospital of nine "findings" relating to equal educational opportunities, 15 relating to equal health opportunities and 13 to equal employment opportunities.

Some of the "findings" were indisputable fact. Others were allegations. Some of the items:

All the physicians at the hospital were white, although there are several Negro physicians in Charleston.

The School of Pharmacy placed students for "apprenticeship" at institutions practicing racial discrimination.

"We were informed in the community that patients were shifted around to achieve a biracial mix in anticipation of the HEW visit."

Nonpaying patients—mostly black—allegedly received poorer doctors' and nursing care than paying patients—mostly white.

Personnel policies precluded action on equal employment. For example, some job descriptions required in-house experience in work from which Negroes had been excluded. There was no training program to allow Negro employees to upgrade skills.

"Employment patterns clearly suggest stratification of employes with regard to race: i.e., administrative and professional positions are occupied by whites; non-whites are concentrated in service and nonskilled categories."

Dr. McCord and HEW officials then engaged in months of correspondence, deadline-extensions and delays on a compliance agenda.

Coincidentally, the union filed a complaint about the firings with the Atlanta compliance office and, without realizing it, became a party to the deliberations.

On June 5, Brimm wrote McCord a letter stating that investigation had "established one basic fact, which is that the Medical College of South Carolina, together with its hospital facilities, is in noncompliance with the requirements of Executive Order 11426 . . ."

The letter said the hospital would have to adopt an affirmative equal employment program. "As a first step" of good faith, Brimm "recommended" rehiring the 12.

McCord had vowed never to rehire them, but an HEW order involving $12 million in Federal aid provided a face-saving out. He and the hospital trustees agreed to rehire the 12.

There also was progress elsewhere. Charleston's business and tourism had been crippled by SCLC's marches, boycotts and "shop-ins" and by the nightly curfew and the month-long National Guard presence. Mayor J. Palmer Gaillard appointed a committee to deal with the crisis, and it has played an important role in seeking a settlement.

The first breakthrough came in early June when the state announced it would raise the state minimum wage to $1.60 an hour July 1. The hospital workers now earn $1.30 or a few cents more, and it is believed the union would settle for the $1.60 figure.

Union recognition remained a problem. McNair maintains the state cannot recognize unions because the Legislature sets state workers' wages. (Actually the state does recognize several railroad unions, and Medical College trustees are empowered to set salaries). However, the union is willing to settle for less than full recognition—as it did in organizing New York hospital workers in 1959.

That left only the issue of grievances, and on June 5 negotiators reportedly agreed on a plan for worker-elected appeals panels.

Seemingly, the strike was all but over.

Then last Thursday came Dr. McCord's message withdrawing his agreement to rehire the 12 fired workers.

And by the weekend, the SCLC, the union local and the Charleston black community were preparing to renew demonstrations.

[From the Washington (D.C.) Post, June 18, 1969]

SECRETARY FINCH AND THE CHARLESTON STRIKE

Secretary Finch of the Department of Health, Education and Welfare holds a key to settlement of the bitter and potentially explosive six-week-old strike of hospital workers in Charleston, S.C. A word from him that he intends to enforce Federal guidelines against discrimination in employment, it seems, will provide the necessary spur to get the dispute settled. Early last week it appeared to have been settled until word reached Charleston that members of the South Carolina congressional delegation had persuaded Secretary Finch to hold off any fund cutoff.

Apart from the guidelines question, the dispute is important because it represents an effort by low paid public employes in the South who are usually black to use the machinery of collective bargaining to improve their lot. Traditionally, the South has resisted this extension of collective bargaining. A similar strike of black garbage workers in Memphis in 1968 was settled only after the assassination of Dr. Martin Luther King, Jr. As in Memphis, the Southern Christian Leadership Conference has intervened in Charleston on behalf of the strikers.

Complicating the Charleston dispute is the claim by Sen. Strom Thurmond (R-S.C.) that he has been able to persuade Secretary Finch before the latter departed for a vacation to withhold any fund cutoff "pending a personal investigation." Democrats Sen. Ernest F. Hollings and Rep. L. Mendel Rivers similarly have intervened. When word of their intervention reached Charleston, the understanding that had been carefully worked out between the two public hospitals and the union of hospital employes with the help of Gov. Robert E. McNair blew up. Union officials despair of putting the agreement back together again without word from Mr. Finch that he intends to enforce the employment guidelines, or failing that, without a call to other unions and civil rights organizations to broaden the dispute into a major national issue. Already, SCLC is planning night marches and "escalated" demonstrations to dramatize the matter.

The sticking point is the question of rehiring twelve employes whose discharge precipitated the strike. Among the dozen are the president of the union and its most active members. Governor McNair skillfully got around a previous refusal to bargain on wages by raising the applicable minimum wage from $1.30 an hour to $1.60 an hour. The union, in turn, was prepared to finesse the question of union recognition, but not the question of reinstatement. Although the trustees of the Medical College of South Carolina which operates one of the hospitals authorized the rehiring of the twelve, the president of the college, Dr. William McCord, said that he was not going to do so. Dr. McCord's announcement was made as word reached Charleston that a Federal fund cutoff was not imminent.

HEW's regional compliance office in Atlanta has come up with a list of 37 findings against the college hospital indicating a pattern of discrimination in treatment of patients, students and employes. Those allegations relating to employes are relevant to the strike, and all are a matter of concern as far as the expenditure of HEW funds is concerned. But the immediate issue is the strike. It should be settled in Charleston and not be allowed to take further national overtones. Secretary Finch can help accomplish this end by giving assurances that the guidelines will be enforced.

[From the New York Times, June 18, 1969]

THE CHARLESTON STRIKE

It takes no great cynicism to suspect political pressure on a high level in the lost opportunity for a settlement of the racially explosive hospital workers' strike in Charleston. On June 9 Dr. William McCord, president of the Medical College of South Carolina, announced that he was prepared to reinstate twelve Negro employees who had allegedly abandoned their posts by coming to his office to present grievances. In the following three days, agreement was reached on all other issues in the three-month-old strike, including a raise from the wretched $1.30 an hour which most of the 400 strikers were getting.

Then, on June 12, minutes before the jubilant principals were to sign the agreement with the blessings of Governor McNair, word came that Dr. McCord had withdrawn the offer to take back the workers.

If there was no explanation of Dr. McCord's arbitrary reversal in Charleston, there was a plausible explanation in Washington. Earlier in the day Senator Strom Thurmond and Representative L. Mendel Rivers of South Carolina had paid a call on Robert H. Finch, Secretary of Health, Education and Welfare. Secretary Finch was a key man in

the situation, since it was his department's apparent willingness to withdraw Federal funds from the state's hospitals for noncompliance with the Civil Rights Act which had in all likelihood induced in Dr. McCord the earlier mood of conciliation. The views of the two South Carolina statesmen on the subject of the strike were known to reflect those of the state's Republican chairman, who had warned that if the twelve workers were reinstated, Governor McNair and others would be held politically accountable. Senator Thurmond was able to come away with assurances by Mr. Finch that no Federal funds would be cut off pending a thorough investigation by the department, whose regional office had already found a forbidding list of violations.

If it is too much to expect Dr. McCord to account for his sudden about-face, it is reasonable to expect a clarification from Mr. Finch, who has been notably sensitive on racial problems in the past. Even now a strong statement from him, promising a swift probe and appropriate action, might induce another 180-degree turn by Dr. McCord.

[From the New York Times, June 23, 1969]

THE CHARLESTON CYCLE

Lingering prospects for an early settlement of the Charleston hospital workers' strike have been gravely jeopardized by the worst violence in the three-month history of the struggle. Although both sides share responsibility for the weekend flare-up, the rising tension in Charleston was foreseeable—and foreseen—and is the inevitable consequence of a chain reaction that started last week in Washington.

With a settlement apparently only hours away, Robert H. Finch, Secretary of Health, Education and Welfare, issued a statement that at the very least left up in the air the question of whether his department seriously intended to cut off Federal funds for two South Carolina hospitals unless they corrected certain violations of the Civil Rights Act reported by its own regional office.

The Secretary's call for another investigation, following a conference with Senator Strom Thurmond and Representative L. Mendel Rivers, was seen as a delaying action taken just as the strike was on the point of settlement. From that frustrating moment events took a highly predictable course: Dr. William M. McCord, president of the Medical College of South Carolina, went back on his agreement to reinstate the twelve workers, whose firing had touched off the strike. His action, arrogantly unexplained, triggered the decision of the Southern Christian Leadership Conference to "lift non-violence to a new level."

Charleston authorities in turn banned the proposed night march as inflammatory and were defied, with arrests following the defiance and rioting following the arrests.

Just as the vicious cycle started in Washington, it can be ended there. Let Secretary Finch state unequivocally that funds to the Charleston hospitals amounting to twelve million dollars, will be cut off for further noncompliance, and it is extremely probable that Dr. McCord will once more see the light—or at least feel the heat. There would be nothing unduly coercive in that approach; it was precisely to effect such compliance that the Civil Rights Act was passed.

[From the New York Times, June 23, 1969]

CHARLESTON CALM AS NEGROES MARCH—HOSPITAL STRIKE SETTLEMENT IS REPORTED IMMINENT

(By James T. Wooten)

CHARLESTON, S.C., June 22.—The second day of summer slipped serenely into this city's history with the peaceful integration of traditionally white churches and a noisy but non-violent parade through the quaint streets by striking Negro hospital workers and their supporters.

Although there has been no substantial abatement of the tensions that prompted a dusk-to-dawn curfew, strike leaders have shown a marked hesitancy to create confrontations that might result in arrests and violence. A short march last night ended when the police ordered the Negroes to go home, and in another demonstration today the marchers followed a route approved in advance by local officials.

As the result of a spur-of-the-moment idea, typical of techniques being used by the Southern Christian Leadership Conference in its campaign here on behalf of the striking workers, small groups of Negroes visited several all-white churches this morning. Except for a minor scuffle involving television newsmen and a non-churchgoer, there were no incidents.

SETTLEMENT SEEMS NEAR

The reluctance of Negro leaders to continue aggressive demonstrations in the tradition of previous campaigns is thought to be the result of an imminent settlement to the strike, which began March 20 when 12 Negro workers were discharged from the South Carolina Medical College Hospital.

According to informed sources nearly every issue in the dispute has been resolved to the mutual satisfaction of both Local 1199B, the all-Negro union pressing the strike, and officials of the college hospital and the county institution where Negro employes are also on strike.

It is known that on Friday afternoon, a few hours before the Rev. Ralph David Abernathy was arrested and jailed, Gov. Robert E. McNair spoke with representatives of the S.C.L.C., the organization founded by the late Rev. Martin Luther King, Jr. As a result of that conversation, there was an agreement on conditions for the settlement, including the re-employment of the dozen workers who were dismissed.

TWO WERE ARRESTED

That night, however, Mr. Abernathy, president of the conference, and an aide, the Rev. Hosea Williams, were charged with inciting to riot following a three-hour rally at a Negro church and both are being held in $50,000 bail. Their arrest, according to the sources, represents an unexpected impediment to a quick settlement of the strike.

Tomorrow, officials of the medical college are to meet in Atlanta with representatives of the United States Department of Health, Education and Welfare, which has already recommended that the employes be rehired, one of the primary demands of the workers. Other union requests, such as those for higher wages and a grievance system, have been met through a new state employe wage and classification system.

One theory about the caution of the civil rights leaders who have guided the long strike is that they have no desire to place Governor McNair in a position that would make a settlement appear to be a capitulation to their demonstrations and their demands.

CITE LACK OF LAW

The position of both the county and the state hospitals has been that there can be no negotiation with the union because there is no enabling statute that allows government institutions to deal with labor organizations.

That barrier apparently has been removed by the union's agreement to be satisfied with something a bit less than formal recognition, such as the willingness of the hospital to establish payroll contributions to an employes' credit union.

The remaining issue is the re-employment of the discharged workers. The board of trustees of the college hospital has agreed to do so on recommendation of the Health, Education and Welfare Department. However, the hospital's president, Dr. William M. McCord, has refused, saying that wholesale resignations of doctors and nurses will result if the workers are allowed to return.

The presence of Negroes in traditionally all-white churches this morning was, in most places, ignored by regular worshipers. One exception was St. Michael's Episcopal Church, the oldest in this peninsula city, where about 15 Negroes, including some children, were invited to an informal reception with punch and cookies in the church's parish house following the morning service.

As they left the sanctuary, television newsmen filming their departure were heckled and then attacked by a man in shirtsleeves who was angry at their presence near the church. A parishioner called the police, but another canceled the request and there was no further disturbance.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Bartlett, one of its reading clerks, announced that the House has disagreed to the amendments of the Senate to the bill (H.R. 11400) making supplemental appropriations for the fiscal year ending June 30, 1969, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MAHON, Mr. WHITTEN, Mr. ROONEY of New York, Mr. EVINS of Tennessee, Mr. NATCHER, Mr. FLOOD, Mr. BOW, Mr. JONAS, Mr. CEDERBERG, and Mr. DAVIS of Wisconsin were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 17) to recognize the 10th anniversary of the opening of the St. Lawrence Seaway, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 12167. An act to authorize appropriations to the Atomic Energy Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and for other purposes; and

H.R. 12307. An act making appropriations for sundry independent executive bureaus, boards, commissions, corporations, agencies, offices, and the Department of Housing and Urban Development for the fiscal year ending June 30, 1970, and for other purposes.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled joint resolution (S.J. Res. 123) to extend the time for the making of a final report by the Commission To Study Mortgage Interest Rates, and it was signed by the President pro tempore.

HOUSE BILLS REFERRED OR PLACED ON CALENDAR

The following bills were each read twice by their titles and referred or placed on the calendar, as indicated:

H.R. 12167. An act to authorize appropriations to the Atomic Energy Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and for other purposes; placed on the calendar.

H.R. 12307. An act making appropriations for sundry independent executive bureaus, boards, commissions, corporations, agencies, offices, and the Department of Housing and Urban Development for the fiscal year ending June 30, 1970, and for other purposes; to the Committee on Appropriations.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDING OFFICER laid before the Senate the following letters, which were referred as indicated:

REPORT ON EXPORT-IMPORT BANK INSURANCE AND GUARANTEES ISSUED IN CONNECTION WITH U.S. EXPORTS TO YUGOSLAVIA

A letter from the Office of the Secretary, Export-Import Bank of the United States, reporting, pursuant to law, the amount of Export-Import Bank insurance and guarantees issued in May 1969 in connection with U.S. exports to Yugoslavia; to the Committee on Banking and Currency.

REPORT ON PROPOSED ALTERATIONS AT THE GENERAL ACCOUNTING OFFICE BUILDING

A letter from the Acting Administrator, General Accounting Office, transmitting, pursuant to law, a prospectus for proposed alteration at the General Accounting Office Building, Washington, D.C.; to the Committee on Public Works.

REPORTS OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on a study of the acquisition of peripheral equipment for use with automatic data processing systems, dated June 24, 1969; to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the effectiveness and administration of the Cispus Job Corps Civilian Conservation Center Under the Economic Opportunity Act of 1964, Randle, Wash., Department of Agriculture, Office of Economic Opportunity, dated June 25, 1969; to the Committee on Government Operations.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDING OFFICER:

A joint resolution of the Legislature of the State of Connecticut; to the Committee on Finance:

"SENATE JOINT RESOLUTION NO. 9

"Resolution memorializing Congress to enact certain welfare legislation

"Resolved by this Assembly:

"Whereas the question of welfare assistance is of paramount importance to the entire United States of America; and

"Whereas the disparity of payments among the several states and the lack of national standards of assistance have created crisis situations in state fiscal management;

"Now therefore, be it resolved, That the Congress of the United States be memorialized to take immediate action to enact legislation which will include the following provisions:

"The financing by the federal government of all welfare payments throughout our nation; the establishment of uniform national standards for all welfare assistance; the continued administration by the individual states and towns of welfare from the local level and emphasis on training and incentive programs, as well as programs, as well as programs designed to reunite families receiving welfare assistance; and

"Be it further resolved, That the Clerks of the House and Senate cause copies of this resolution to be sent to the Speaker of the United States House of Representatives, to the President of the United States Senate and to the members of the United States House and Senate from Connecticut.

"CHARLES M. MCCOLLAM, Jr.,
"Clerk of the Senate."

"PAUL B. GROOBERT,
"Clerk of the House."

"Attest:

"ELLA T. GRASSO,
"Secretary of the State."

A resolution adopted by the city council, city of South San Francisco, State of California, concerning the taxation of State and local government bonds; to the Committee on Finance.

A telegram, in the nature of a petition, from the President, African American Repatriation Association, of Philadelphia, Pa., praying for a redress of grievances; to the Committee on the Judiciary.

A petition, signed by Mrs. Roscoe Smith, and sundry other members of the Antioch United Methodist Church, of Roaring Gap, N.C., praying for the enactment of legislation relating to pornography, and so forth; to the Committee on the Judiciary.

By Mrs. SMITH (for herself and Mr. MUSKIE):

A joint resolution of the Legislature of the State of Maine; to the Committee on Finance:

"JOINT RESOLUTION MEMORIALIZING CONGRESS TO REVISE THE PRESENT SYSTEM OF ADMINISTERING FEDERAL GRANTS

"We, your Memorialists, the House of Representatives and Senate of the State of Maine in the One Hundred Fourth Legislative Session assembled, most respectfully present and petition your Honorable Body as follows:

"Whereas, the Federal Government's preeminence in the income tax field has led to a greater need for unrestrictive sharing of such revenue with state and local governments by means other than its complex system of categorical grants-in-aid; and

"Whereas, the over development of categorical grant-in-aid programs has imposed stringent restrictions and conditions which are contrary to the needs and requirements of this State; and

"Whereas, the complexity of federal grant-in-aid programs creates administrative difficulties at the state and local level because of different matching, administrative, planning and reporting requirements; and

"Whereas, unless the trend toward restrictive categoric federal grants is reversed, these grants will so entwine themselves that the state's freedom of movement will be significantly inhibited; and

"Whereas, there is a need and justification for consolidation, simplification and revision of grant programs which will allow the State and its municipalities more opportunity to express their own initiative and reflect their specific needs and preferences; now, therefore, be it

"Resolved: That We, your Memorialists, most sincerely recommend and urge the Congress of the United States to enact legislation designed to consolidate, simplify and revise the existing system by which grants-in-aid are made available to the states by replacing the numerous individual categorical grants with fewer but more flexible tax-sharing programs or block grants which impose no qualifying conditions as to use, thereby restoring to the State and its municipalities the ability to more effectively meet its primary responsibility through the exercise of independent judgment and freedom to determine the needs of its people; and be it further

"Resolved: That a copy of this Resolution, duly authenticated by the Secretary of State, be transmitted by the Secretary of State to the Honorable Richard M. Nixon, President of the United States, and to the Senate and House of Representatives in Congress and to the members of the Senate and House of Representatives from this State.

"In Senate Chamber, June 12, 1969. Read and adopted, Sent Down for Concurrence, Ordered Sent Forthwith.

"JERROLD B. SPEERS,
"Secretary."

"House of Representatives, June 13, 1969. Read and adopted, In Concurrence.

"BERTHA W. JOHNSON,
"Clerk."

"Attest:

"JOSEPH T. EDGAR,
"Secretary of State."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MUSKIE, from the Committee on Banking and Currency, without amendment:

S.J. Res. 122. A joint resolution to provide for a temporary extension of the authority conferred by the Export Control Act of 1949 (Rept. No. 91–275).

By Mr. RUSSELL, from the Committee on Appropriations, without amendment:

H.J. Res. 790. A joint resoution making continuing appropriations for the fiscal year 1970, and for other purposes (Rept. No. 91–274).

By Mr. YARBOROUGH, from the Committee on Appropriations, with amendments:

H.R. 11582. An act making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies, for the fiscal year ending June 30, 1970, and for other purposes (Rept. No. 91–278).

By Mr. NELSON, from the Committee on Interior and Insular Affairs, with amendments:

S. 621. A bill to provide for the establishment of the Apostle Islands National Lakeshore in the State of Wisconsin, and for other purposes (Rept. No. 91–276).

By Mr. LONG, from the Committee on Finance, with amendments:

H.R. 4229. An act to continue for a temporary period the existing suspension of duty on heptanoic acid (Rept. No. 91–279).

DEPARTMENT OF AGRICULTURE ANNUAL APPROPRIATION BILL—REPORT OF A COMMITTEE (S. REPT. NO. 91–227)

Mr. HOLLAND. Mr. President, for the Committee on Appropriations I submit the committee report on H.R. 11612, the annual appropriations for the Department of Agriculture and related agencies. The bill is reported with amendments.

Mr. President, I ask unanimous consent that the report of the committee, which contains no dissenting views, be printed.

The PRESIDING OFFICER. The report will be received, and the bill will be placed on the calendar; and, without objection, the report will be printed.

ADDITIONAL ASSISTANCE FOR AREAS SUFFERING A MAJOR DISASTER—REPORT OF A COMMITTEE—SEPARATE VIEWS (S. REPT. NO. 91–280)

Mr. BAYH. Mr. President, from the Committee on Public Works, I report

favorably, with an amendment, the bill (S. 1685) to provide additional assistance for areas suffering a major disaster, and I submit a report thereon. I ask unanimous consent that the report be printed, together with the separate views of the Senator from Kansas (Mr. DOLE).

The PRESIDING OFFICER. The report will be received and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from Indiana.

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

Keith S. Snyder, of North Carolina, to be U.S. attorney for the western district of North Carolina;

William R. Burkett, of Oklahoma, to be U.S. attorney for the western district of Oklahoma;

William L. Osteen, of North Carolina, to be U.S. attorney for the middle district of North Carolina;

Fred C. Sink, of North Carolina, to be U.S. marshal for the middle district of North Carolina;

John P. Milanowski, of Michigan, to be U.S. attorney for the western district of Michigan;

James W. Norton, Jr., of North Carolina, to be U.S. marshal for the eastern district of North Carolina;

Doyle W. James, of Colorado, to be U.S. marshal for the district of Colorado.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. NELSON:

S. 2480. A bill for the relief of Anastassios Klepetsanis; to the Committee on the Judiciary.

By Mr. SYMINGTON:

S. 2481. A bill for the relief of Dr. Farid M. Fuleihan; to the Committee on the Judiciary.

By Mr. JAVITS (for himself, Mr. JACKSON, Mr. MAGNUSON, Mr. YARBOROUGH, Mr. AIKEN, Mr. BENNETT, Mr. BIBLE, Mr. CANNON, Mr. CHURCH, Mr. CRANSTON, Mr. DODD, Mr. EAGLETON, Mr. FANNIN, Mr. GOODELL, Mr. GORE, Mr. GRAVEL, Mr. HARRIS, Mr. HART, Mr. HATFIELD, Mr. HOLLINGS, Mr. HUGHES, Mr. INOUYE, Mr. MCCARTHY, Mr. MCGOVERN, Mr. METCALF, Mr. MILLER, Mr. MONDALE, Mr. MOSS, Mr. MURPHY, Mr. MUSKIE, Mr. NELSON, Mr. PELL, Mr. PROUTY, Mr. RANDOLPH, Mr. RIBICOFF, Mr. SCHWEIKER, Mr. SCOTT, Mr. YOUNG of North Dakota and Mr. YOUNG of Ohio):

S. 2482. A bill to amend the Public Health Service Act so as to add to such act a new title dealing especially with kidney disease and kidney-related diseases; to the Committee on Labor and Public Welfare.

(The remarks of Mr. JAVITS when he introduced the bill appear later under the appropriate heading.)

By Mr. MUSKIE (for himself and Mr. GOODELL):

S. 2483. A bill to establish a system of general support grants to State and local governments; to allow partial Federal income tax credit for State and local income tax payments; to authorize Federal collection of State income taxes; to enlarge the Federal estate tax credit for State death tax payments; and to permit States or local taxing authorities to tax property located in Federal areas; to the Committee on Government Operations.

(The remarks of Mr. MUSKIE when he introduced the bill appear later under the appropriate heading.)

By Mr. INOUYE:

S. 2484. A bill to amend the Agricultural Marketing Agreement Act of 1937 to authorize marketing agreements providing for the advertising of Hawaiian papayas; to the Committee on Agriculture and Forestry.

By Mr. HARRIS:

S. 2485. A bill to amend title 5, United States Code, with respect to civil service retirement credit for employees injured in line of duty, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MCGEE:

S. 2486. A bill to authorize the Secretary of the Interior to provide grants to the State of Wyoming to assist in a program to seal abandoned coal mines and to fill voids in abandoned coal mines; to the Committee on Interior and Insular Affairs.

(The remarks of Mr. MCGEE when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. WILLIAMS of New Jersey (for himself, Mr. YARBOROUGH, Mr. CRANSTON, Mr. EAGLETON, Mr. INOUYE, Mr. MONDALE, Mr. RANDOLPH, and and Mr. STEVENS):

S. 2487. A bill to amend the Longshoremen's and Harbor Workers' Compensation Act, and for other purposes; to the Committee on Labor and Public Welfare.

(The remarks of Mr. WILLIAMS of New Jersey when he introduced the bill appear under the appropriate heading.)

By Mr. CURTIS (for himself and Mr. HRUSKA):

S. 2488. A bill to amend section 4(h) of the Commodity Credit Corporation Charter Act so as to authorize the Commodity Credit Corporation to insure loans made to farmers for the construction on purchase of grain storage facilities for storage of grain on the farm; to the Committee on Agriculture and Forestry.

By Mr. HARRIS (for himself and Mr. BELLMON):

S.J. Res. 127. A joint resolution authorizing the President to invite the States of the Union and foreign nations to participate in the International Petroleum Exposition to be held at Tulsa, Okla., from May 15, 1971, through May 23, 1971; to the Committee on Foreign Relations.

(The remarks of Mr. HARRIS when he introduced the joint resolution appear later in the RECORD under the appropriate heading.)

By Mr. HARRIS:

S.J. Res. 128. Joint Resolution to authorize the President to issue annually a proclamation designating the 7-day period beginning on the first Sunday in April of each year as "Volunteer Week"; to the Committee on the Judiciary.

S. 2483—INTRODUCTION OF THE INTERGOVERNMENTAL REVENUE ACT

Mr. MUSKIE. Mr. President, I introduce, for appropriate reference, the Intergovernmental Revenue Act, on behalf of myself and Senator GOODELL. I ask unanimous consent that the text, a section-by-section analysis of the bill and exhibits be printed in the RECORD following these remarks. The bill and the exhibits were prepared by the Advisory Commission on Intergovernmental Relations, of which I am privileged to be a member. I am introducing the bill at the request of the Advisory Commission for purposes of discussion and further study.

Senator GOODELL has long been a strong advocate of Federal revenue sharing with the State and local governments, and has sponsored major bills on this subject in 1967 (H.R. 4070) and in this session (S. 50). The first title of the proposed Intergovernmental Revenue Act would create a system of revenue sharing that is closely analogous to that proposed by him in his S. 50 bill introduced earlier this year.

The central objective of the Intergovernmental Revenue Act is to help redress the fiscal balance of our federal system. It would do this by:

First, supplementing the tax base of States and localities, through a system of Federal general support payments; and

Second, encouraging States and localities to adopt stronger tax systems of their own, by establishing Federal tax credits for State and local income and estate taxes.

It is designed to put new life into our federal system by strengthening the fiscal base of States and local governments.

Urgently needed steps must be taken toward redressing the growing fiscal imbalance among the levels of our Government. This imbalance poses a grave threat to the integrity of our federal system of shared power.

While the Federal income tax has given the Central Government of this Nation a strong fiscal base, capable of growing as the economy expands, the fiscal base of our State and local governments, however, has not had the same strength and growth potential. Consequently, many State and local governments face a financial squeeze today, and have become increasingly dependent on Federal grant-in-aid programs in order to meet rising demands for public services.

The fiscal crisis that has followed is a product of rising State and local expenditures, outdated State and local tax systems and increasingly, interarea competition for a limited amount of tax dollars.

The current revenue-producing abilities of State and local governments cannot keep pace with rising public expenditures. Many of our State and local governments still have outdated tax structures. Only a minority have a built-in capacity to provide for revenue growth as the economy grows. Those States and municipalities with modern tax structures have suffered from interstate and interarea competition, losing affluent taxpayers to neighboring lower tax areas.

In sum, this is the problem of fiscal imbalance. It has been carefully documented by the Advisory Commission on Intergovernmental Relations in its landmark 1967 report, "Fiscal Balance in the American Federal System." That report made a number of major recommendations for reform many of which have been developed in detail in this proposed legislation.

One proposed remedy for this crisis concerns revenue sharing. Under that proposal, the Federal Government would distribute a portion of its tax revenues to States and localities without speci-

fying a particular use of the funds. The States and local governments receiving these payments would be free to determine for themselves how to use the grants. The Federal Government does not now provide this type of general support payments to States and localities, and instead makes grants-in-aid for specifically defined purposes, often with extensive controls.

The objective of distributing, from Federal revenues, percentage of personal income to States and local governments without Federal controls would be to provide greater vigor to State and urban governments. It would supplement these governments' local tax base, thus enabling them to strengthen their administrative apparatus, supply better public services, and meet pressing social needs more effectively.

General support grants to State and local governments date back 130 years, when the Federal Government on a one-shot basis, distributed the surplus accumulated in the National Treasury to the States. Today, many States have their own systems of revenue sharing with local governments analogous to proposals made for its adoption at the Federal level.

As a concept, revenue sharing has been endorsed by the National Governors' Conference, the National League of Cities, the U.S. Conference of Mayors, the National Conference of State Legislative Leaders, and the National Association of Counties. In the 90th Congress alone, over 110 Members of Congress sponsored or cosponsored over 90 revenue-sharing payments to States and local governments for fiscal year 1970. Under the distribution formula of the bill, it is estimated that on a nationwide basis about 49 percent of these payments would be allocated to States, 22 percent to major cities, 12.5 percent to urban counties, and 16 percent to the support of local schools.

A unique feature of this bill is that it combines revenue sharing with tax credits to reinforce the fiscal independence of State and local governments. Revenue-sharing supplements the tax base of States and localities. Tax credits help strengthen the tax base of States and localities, by creating an effective incentive for improving their tax systems.

To assist States in adopting or strengthening their own income tax systems, the bill authorizes the Treasury to collect State personal income taxes under terms mutually agreeable to the Secretary of the Treasury and the appropriate State officials.

The proposed income tax credit would result in an estimated Federal revenue loss of $2.6 billion in the first year of its operation. The offsetting State revenue gain is difficult to estimate, as it depends on how many States adopt the income tax or upgrade their existing income tax, but in the long run the State gains should exceed the Federal loss because the States will be collecting $1 for each 40 cents of Federal credit.

By combining revenue sharing with tax credits, the bill will help achieve the complementary objectives of supplementing and modernizing State and local tax systems. It will assist in assuring that States and localities keep up their own tax efforts after they begin receiving general support payments from the Federal Government. It will constitute an important step toward eliminating the serious interstate and interarea taxing disparities that have placed the most progressive taxing jurisdictions at a competitive disadvantage.

Mr. President, I hope that the bill can be given early consideration in the Senate. The fiscal crisis confronting our State and local governments is deserving of prompt resolution and this alternative is one well worth exploring.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill, section-by-section analysis, and exhibits will be printed in the RECORD.

The bill (S. 2483), to establish a system of general support grants to State and local governments; to allow partial Federal income tax credit for State and local income tax payments; to authorize Federal collection of State income taxes; to enlarge the Federal estate tax credit for State death tax payments; and to permit States or local taxing authorities to tax property located in Federal areas, introduced by Mr. MUSKIE (for himself and Mr. GOODELL), was received, read twice by its title, referred to the Committee on Government Operations, and ordered to be printed in the RECORD, as follows:

S. 2483

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Intergovernmental Revenue Act".

DECLARATION OF POLICY

SEC. 2.(a) The Congress affirms that the governments of the United States and of the several States and their political subdivisions bear jointly and severally the duty and responsibility to safeguard the quality of American life; that the States and local communities have and must retain control over and primary responsibility for the provision of most domestic public services and facilities for the population of the Nation; and that to fulfill these commitments the States and their political subdivisions must have access to an equitable share of the Nation's fiscal resources which the Congress now commands and influences through the tax system of the Federal Government.

(b) Therefore, the Congress hereby declares it to be the policy of the United States to federalize the Federal income tax; to reduce impediments to the use of personal income taxes by the several States; to facilitate the exercise of adequate powers of taxation by the several States and their political subdivisions; and to provide general support payments to help States, cities, and counties to finance their own programs and set their own priorities to help solve their unique and most crucial problems.

TITLE I—GENERAL SUPPORT PAYMENTS TO STATES AND THEIR POLITICAL SUBDIVISIONS

DEFINITIONS

SEC. 101. For purposes of this Act—

(1) "Secretary" means the Secretary of the Treasury;

(2) "State" means the several States and the District of Columbia;

(3) "trust fund" means the General Support Trust Fund established by this Act;

(4) "taxable income" means taxable income as defined in Section 63 of the Internal Revenue Code of 1954 as shown by returns made by individuals of the tax imposed by chapter 1 of such Code;

(5) "total personal income" means the aggregate personal income for residents of a State as reported in the official reports of the Department of Commerce;

(6) "local revenue ratio" of a city or county means the ratio, for the most recent annual period for which usable data are available, between—

(A) the total receipts from all taxes imposed by such city or county; and

(B) the total receipts from all taxes imposed by the State and all its political subdivisions;

(7) "population ratio" of a city or county having a population between 50,000 and 99,999 shall be the percentage by which the population of the city or county exceeds 50,000; and

(8) "local school tax ratio" means the ratio between—

(A) the total receipts from all taxes imposed by public school systems which are administratively and fiscally independent of any other government and are classified for Census Bureau reporting of governmental data as independent school district governments; and

(B) the total receipts from all taxes imposed by such independent school districts and the State government.

GENERAL SUPPORT TRUST FUND

SEC. 102. (a) There is hereby established in the Treasury of the United States a trust fund to be known as the General Support Trust Fund. The trust fund shall consist of such amounts as may be appropriated to such fund as provided in this section.

(b) There is hereby appropriated to the trust fund, out of any money in the Treasury not otherwise appropriated, for the fiscal year beginning July 1, 1969, and for each fiscal year thereafter, an amount, as determined by the Secretary equal to the amount obtained by adding (A) 1 percent of aggregate taxable income reported on Federal individual income tax returns filed during the preceding fiscal year, and (B) 25 percent of State personal income tax collections for the preceding fiscal year and dividing the sum by two. In no event shall the amount so appropriated for any fiscal year be less than any amount appropriated for the preceding fiscal year.

(c) Beginning with the first quarter of the fiscal year beginning July 1, 1969, the Secretary shall, not less than once each quarter, transfer from the general fund of the Treasury to the trust fund the amounts appropriated by subsection (b). Such transfers may, to the extent necessary, be made on the basis of estimates by the Secretary of the amounts referred to in subsection (b). Proper adjustments shall be made in the amounts subsequently transferred to the extent that prior estimates were in excess of or less than the amounts required to be transferred. Computations by the Secretary under this section shall be final and conclusive.

(d) In each of the first three years following the enactment of this Act, the Secretary shall deduct an amount not to exceed 1 percent of the amount appropriated to the trust fund for the purpose of enabling the Secretary to carry out his duties and responsibilities, including the provision of any requisite statistical or data gathering activities required under this Act. The Secretary is hereby authorized to spend the amount so deducted for such purposes as in his discretion will facilitate the equitable distribution of the General Support Trust Fund established by this Act.

BASIC PAYMENTS

SEC. 103. (a) Subject to the provisions and qualifications of this Act, the Secretary shall, during the fiscal year beginning July 1, 1969,

and during each fiscal year thereafter, pay to each State from amounts appropriated to the trust fund for the fiscal year in which payments are made, a total amount equal to the entitlement of the State under section 104. Such payments shall be made in installments periodically during any fiscal year but not less often than once each quarter. Proper adjustments shall be made in the amount of payment to each State to the extent that payments previously made were in excess of or less than the amounts required to be paid. Adjustments in payments by the Secretary under this section shall be final and conclusive.

STATE ENTITLEMENT

SEC. 104. (a) The Secretary shall determine the basic entitlement of each State to an amount of the trust fund during the fiscal year beginning July 1, 1969, and during each fiscal year thereafter as provided in this section.

(b) The total entitlement for each State for each fiscal year shall be the amount equal to the amount appropriated to the trust fund multiplied by the ratio of the product obtained by multiplying the total resident population of each State for the fiscal year by the tax effort factor of each State and then dividing such product by the sum of such products for all States.

(c) For purposes of subsection (b), a State's tax effort factor for any fiscal year is the result obtained by dividing (1) the annual total of taxes plus the net profits from the operation of State-owned liquor stores collected by the State and its political subdivisions by (2) the total personal income of individuals residing in the State for a closely related annual period.

(d) For purposes of subsection (b), a State's tax effort ratio factor for any fiscal year is the ratio of the State's tax effort factor as defined in subsection (c) for the latest fiscal year to the State's tax effort factor for the immediately preceding fiscal year.

QUALIFYING AGREEMENTS WITH THE SECRETARY

SEC. 105. (a) In order to be qualified to receive the payments provided for by this Act, the Governor of a State, with the approval of the legislature, shall enter into an agreement with the Secretary to undertake—

(1) to adhere to the same methods of public scrutiny and debate over the use of funds and the same budgetary process, laws, and responsibility with respect to the fiscal control and accountability for all payments received under this Act as it does with respect to State funds derived from its own taxing powers and to report annually to the Secretary at such time as he may prescribe, on the disposition of such payments. This report shall include a five-year projection of State government expenditures. The Secretary shall have no power either to approve or disapprove State expenditures of payments received under this Act;

(2) to impose no restrictions on the use of funds distributed to political subdivisions which are not applicable to the use of funds which its political subdivisions derive from their own taxing powers other than to prohibit a political subdivision from spending any portion of the funds distributed to it for purposes which are in conflict with any State plan enacted into law dealing with the utilization and development of the State's human and physical resources or particular aspects thereof;

(3) to confirm by annual reports filed with the Secretary following each of the first three years after the effective date of this Act, that the State distributed to each city and county government for which an allocable share is specified in this Act, a total amount not less than the sum of the annual amount allocable to that government under this Act plus all amounts it received from the State during the State fiscal year that ended in calendar 1969 or to demonstrate to the satisfaction of the Secretary that any failure to meet this requirement is entirely offset by the intervening transfer from the local government to the State of financial responsibility for direct support of particular services or facilities;

(4) to adhere to all applicable Federal laws in connection with any activity, program, or service provided solely or in part from any funds received by a State or its political subdivisions under this Act;

(5) to make reports to the Secretary, the Congress, and the Comptroller General in such form and containing such information as they may reasonably require to carry out their functions under this Act; and

(6) to make the distributions out of the payments of the State entitlement received by it to certain cities and counties as provided under subsection (b) and to school districts as provided under subsection (e).

(b) Each State shall distribute in each fiscal year out of payments of the State entitlement—

(1) to each city and county having within its boundaries a population of 100,000 or more an amount not less than the product obtained by multiplying (A) the general support entitlement for the State under section 104 by (B) twice the local revenue ratio of the city or county; and

(2) to each city and county having within its boundaries a population between 50,000 and 99,999 an amount not less than the product obtained by multiplying (A) the general support entitlement for the State area under section 104 by (B) a fraction representing the product of (i) twice the local revenue ratio of the city or county, and (ii) the population ratio of the city or county.

(c) To encourage States to take the initiative in strengthening the fiscal position of major cities and counties and to maximize flexibility in the use of the authorized general support payments for meeting the particular needs of differing State-local fiscal systems, the Secretary shall accept an alternative plan for the use of general support funds made available to major cities and counties under this section provided the plan is enacted by the State legislature and conforms to at least one of the following conditions:

(1) each major city and county receives a total amount under the State alternative plan equal to or greater than the general support payment it would otherwise have allocated to it under the provisions of this section.

(2) The city and county councils or governing bodies, representing at least half of the cities and counties entitled to receive at least 50 percent of general support payments otherwise required to be distributed, concur by formal resolution, that the State's alternative plan will result in the use of general support funds that accords better with the requirements of the State and its cities and counties than could be achieved by distributing the funds to cities and counties in accordance with the formula set forth in this Act.

(d) The proposed State alternative plan as authorized in subsection (c) shall be submitted to the Secretary with such supporting information as he may require annually not later than 90 days preceding the fiscal year to which the plan pertains. In the event of the acceptance of such an alternative plan, its provisions shall govern the use of funds otherwise allocated by this Act to cities and counties.

(e) Each State shall distribute to school districts in each fiscal year out of the State entitlement an amount not less than the product obtained by multiplying the local school tax ratio by the amount of the State entitlement remaining after the distribution to cities and counties under subsection (b).

(f) Determination under this section of this Act shall be made by the Secretary on the basis of the most recent acceptable data available from the Department of Commerce.

POWERS OF THE SECRETARY

SEC. 106. (a) The Secretary is authorized to obtain from other Federal agencies statistical data, reports, and other materials which he deems necessary to discharge his responsibilities under this section, and Federal agencies shall carry out their statistical functions in such manner as will, to the maximum extent permitted by other applicable law, assist the Secretary in carrying out his duties and responsibilities under this section. For the first three fiscal years following the enactment of this Act, the Secretary shall reimburse, with funds provided to him in section 102(d), Federal agencies for the cost of providing any data which in his discretion are necessary for the proper administration of this Act. For subsequent fiscal years there are authorized to be appropriated sums sufficient to enable Federal agencies to provide information required by the Secretary for the administration of this Act.

(b) Whenever the Secretary finds, after reasonable notice and opportunity for hearing to the Governor of a State, that there is a failure by such State to comply substantially with any undertaking required by section 105, the Secretary shall notify the Governor that further payments under this Act will be withheld until the Secretary is satisfied that appropriate corrective action has been taken and that there will no longer be any failure to comply. Until he is satisfied, the Secretary shall make no further payments to such State under this Act.

JUDICIAL REVIEW

SEC. 107. (a) Any State which receives notice under section 106 that payments to it will be withheld may, within sixty days after receiving such notice, file with the United States Court of Appeals for the circuit in which such State is located a petition for review of the Secretary's action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary. The Secretary shall file in the court the record of the proceedings on which he based his action as provided in section 2112 of title 28, United States Code.

(b) In accordance with the provisions of this subsection, the court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part. The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive. However, if any finding is this consistent with preceding sentence and is not supported by substantial evidence, the court may remand the case to the Secretary to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(c) The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

REPORT BY SECRETARY

SEC. 108. The Secretary shall report to the Congress not later than the first day of March of each year on the operation of the trust fund during the preceding fiscal year and on its expected operation during the current fiscal year. Each such report shall include a statement of the appropriations to, and the disbursements made from, the trust fund during the preceding fiscal year; an estimate of the expected appropriation to, and disbursements to be made from, the trust

fund during the current fiscal year; and any changes recommended by the Secretary concerning the operation of the trust fund.

CONGRESSIONAL STUDY

SEC. 109. (a) The Appropriations Committee and the Finance Committee of the Senate and the Appropriations Committee and the Ways and Means Committee of the House of Representatives shall conduct full and complete studies, at least once during each Congress, with respect to the operation of the trust fund and its relation to the financing of State and local governments and report findings to each House, respectively, together with recommendations for such House, respectively, together with recommendations for such legislation as they deem advisable.

(b) This section is enacted by the Congress as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, with full recognition of the constitutional right of either House to change such rules (so far as relating to the procedure in such House) at any time, in the same manner and to the same extent as in the case of any other rule of such House.

TITLE II—PARTIAL FEDERAL INCOME TAX CREDIT FOR STATE AND LOCAL INCOME TAX PAYMENTS

STATE AND LOCAL TAX CREDIT

SEC. 201. (a) Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended (1) by renumbering section 40 as 41; and

(2) by inserting after section 39 the following new section:

"SEC. 40. STATE AND LOCAL INCOME TAXES

"(a) Allowance of Credit.—If an individual chooses to have the benefits of this section, there shall be allowed to such individual as credit against the tax imposed by this chapter for the taxable year, an amount equal to 40 percent of the State and local income taxes paid or accrued for such taxable year.

"(b) Definitions and Special Rules.—For purposes of this section—

"(1) State and local income taxes.—The term 'State and local income tax' means only—

"(A) a tax imposed upon the income of the taxpayer, after the deduction of an amount for personal exemptions and dependents allowances or the subtraction of a tax credit or credits equivalent in amount to the amount allowed for this purpose under part V of subchapter B of chapter 1 (relating to deductions for personal exemptions);

"(B) the taxpayer's distributive share of a tax imposed upon the income of a partnership of which the taxpayer is a member; and

"(C) the taxpayer's pro rata share of a tax imposed upon the income of an electing small business corporation (as defined in section 1371(b)) of which the taxpayer is a shareholder, by a State or any political subdivision thereof or by the District of Columbia. In the case of a separate return by a married individual, the amount of State and local income taxes imposed upon the income of such individual shall be determined under regulations prescribed by the Secretary or his delegate.

"(2) Change of election.—The choice as to whether an individual shall elect to have the benefits of this section may be made or changed at any time before the expiration of the period prescribed for making a claim for credit or refund of the tax imposed by this chapter for the taxable year with respect to which such State or local income tax was paid or accrued.

"(3) Adjustments on payment of accrued taxes.—If accrued taxes when paid differ from the amounts used by an individual as the basis for claiming a credit under this section, or if any tax paid is refunded, in whole or in part, such individual shall notify the Secretary or his delegate, who shall redetermine the amount of the tax for the year or years affected. The amount of tax due on such redetermination, if any, shall be paid by such individual on notice and demand by the Secretary or his delegate, and the amount of tax overpaid, if any, shall be credited or refunded to the individual in accordance with subchapter B of chapter 66 (section 6511 and following). In the case of a State or local income tax accrued but not paid, but used as the basis for claiming a credit under this section, the Secretary or his delegate, as a condition precedent to the allowance of such credit may require such individual to give a bond, with sureties satisfactory to and to be approved by the Secretary or his delegate, in such sum as the Secretary or his delegate may require, conditioned on the payment by the individual of any amount of tax found due on any such redetermination; and the bond herein prescribed shall contain such further conditions as the Secretary or his delegate may require. In such redetermination by the Secretary or his delegate of the amount of tax due from such individual for the year or years affected by a refund, the amount of the taxes refunded with respect to which credit has been allowed under this section shall be reduced by the amount of any State or local income tax imposed with respect to such refund; but no credit under this section, and no deduction under section 164 (relating to deduction for taxes), shall be allowed for any taxable year with respect to such State or local income tax imposed on the refund. No interest shall be assessed or collected on any amount of tax due on any redetermination by the Secretary or his delegate, resulting from a refund to the individual, for any period before the receipt of such refund, except to the extent interest was paid on such refund by the State or local government for such period.

"(c) CROSS REFERENCE—

"(1) for deductions of State and local income taxes, see sections 164 and 275.

"(2) for right of each partner to make election under this section, see section 703(b)."

(b) Section 275(a) of such code (relating to certain taxes not deductible) is amended by adding at the end thereof the following new paragraph:

"(6) State and local income taxes, if the individual chooses to take to any extent the benefits of section 40 (relating to State and local income taxes)."

TECHNICAL AMENDMENTS

SEC. 202. (a) The table of sections for subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 is amended by striking out the item relating to section 40 and inserting in lieu thereof the following:

"SEC. 40. State and local income taxes.
"SEC. 41. Overpayments of tax."

(b) Section 37(a) of such code (relating to retirement income) is amended by striking out "and section 35 (relating to partially tax-exempt interest) and inserting in lieu thereof "section 35 (relating to partially tax-exempt interest), and section 40 (relating to State and local income taxes)".

(c) Section 46 (a) (3) of such code (relating to amount of credit) is amended—

(1) by striking out "and" in subparagraph (B);

(2) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof, a semicolon and the word "and"; and

(3) by adding after subparagraph (C) the following new subparagraph:

"(D) section 40 (relating to State and local income taxes)."

(d) Section 703 of such code (relating to partnership computations) is amended—

(1) by relettering subparagraphs (D), (E), and (F) of subsection (a) (2) as subparagraphs (E), (F), and (G);

(2) by inserting after subparagraph (C) of paragraph (2) the following new subparagraph:

"(D) the deduction for taxes provided in section 164 (a) with respect to State and local income taxes;" and

(3) by amending subsection (b) to read as follows:

"(b) ELECTIONS OF THE PARTNERSHIP.—Any election affecting the computation of taxable income derived from a partnership shall be made by the partnership, except that the election under sections 40 (relating to State and local income taxes) and 901 (relating to taxes of foreign countries and of possessions of United States), and any election under section 615 (relating to exploration expenditures) or under section 617 (relating to additional exploration in the case of domestic mining), shall be made by each partner separately."

EFFECTIVE DATE

SEC. 203. The amendments made by this title shall apply to taxable years beginning after the date of the enactment of this Act.

TITLE III—FEDERAL COLLECTION OF STATE INCOME TAXES

FEDERAL COLLECTION

SEC. 301. (a) Chapter 77 of the Internal Revenue Code of 1954 (relating to miscellaneous provisions) is amended by adding at the end thereof the following new section:

"SEC. 7517. Federal collection of State income taxes.

"(a) GENERAL.—Where the law of any State or possession of the United States imposes an income tax, on the request of the proper officials of such State or possession authorized to make such request pursuant to State law the Secretary or his delegate is authorized in his discretion to enter into an agreement with such State or possession, under which, to the extent provided therein, the Secretary or his delegate will administer and enforce such income tax in behalf of such State or possession.

"(b) COSTS.—As a part of any agreement entered into pursuant to subsection (a), the Secretary or his delegate shall require that such State or possession pay to the Treasury Department the cost of the work or services performed (including material supplied) in administration and enforcement of such tax."

(b) The table of sections for chapter 77 of such code is amended by adding after the item relating to section 7516 the following new item:

"SEC. 7517. Federal collection of State income taxes."

(c) Subsection (c) of section 7809 of such code (relating to deposit of collections) is amended—

(1) by striking out "and" in paragraph (2);

(2) by renumbering paragraph (3) as paragraph (4); and

(3) by inserting a new paragraph (3) immediately following paragraph (2) as follows:

"(3) Work or services performed (including material supplied) pursuant to section 7517 (relating to Federal collection of State income taxes); and"

TITLE IV—LARGER FEDERAL CREDIT FOR STATE DEATH TAX PAYMENTS

ALTERNATE CREDIT

SEC. 401. Section 2011 of the Internal Revenue Code of 1954 (relating to credit for State death taxes) is amended by adding at the end thereof the following new subsection:

"(f) ALTERNATIVE CREDIT.—

"(1) ALLOWANCE OF CREDIT.—In lieu of the credit authorized by subsection (a) for estate, inheritance, legacy, or succession taxes, the tax imposed by section 2001 may be cred-

ited with the amount of any estate tax actually paid to any State in respect of any property included in the gross estate (not including any such tax paid with respect to the estate of a person other than the decedent) of a decedent dying after December 31, 1971.

"(2) MAXIMUM AMOUNT OF CREDIT.—The credit allowed by this subsection shall not exceed the appropriate amount stated in the following table:

"If the taxable estate is—	The maximum credit shall be—
Not over $5,000	2.4% of the taxable estate.
Over $5,000 but not over $10,000.	$120 plus 5.6% of the excess over $5,000.
Over $10,000 but not over $30,000.	$400 plus 10% of the excess over $10,000.
Over $30,000 but not over $50,000.	$2,400 plus 16% of the excess over $30,000.
Over $50,000 but not over $100,000.	$5,600 plus 22% of the excess over $50,000.
Over $100,000 but not over $150,000.	$16,600 plus 24% of the excess over $100,000.
Over $150,000 but not over $500,000.	$28,600 plus 6% of the excess over $150,000.
Over $500,000 but not over $1,000,000.	$49,600 plus 7% of the excess over $500,000.
Over $1,000,000 but not over $2,500,000.	$84,600 plus 9% of the excess over $1,000,000.
Over $2,500,000 but not over $5,500,000.	$219,600 plus 12% of the excess over $2,500,000.
Over $5,000,000 but not over $8,000,000.	$519,600 plus 14% of the excess over $5,000,000.
Over $8,000,000 but not over $12,000,000.	$939,600 plus 15% of the excess over $8,000,000.
Over $12,000,000	$1,539,600 plus 16% of the excess over $12,000,000.

"(3) REQUIREMENT OF STATE CERTIFICATION.—"The provisions of this subsection shall apply in the case of the estate of a decedent dying before January 1, 1972, only if his death occurs after the Governor of the State imposing the tax for which the credit is claimed certifies to the Secretary or his delegate—

"(A) that the estimated annual revenue level of the death taxes of such State has been increased by an amount which is not less than the amount which the Secretary or his delegate shall have certified to the Governor as the amount by which (i) the estimated aggregate credits determined under this subsection on the basis of Federal estate tax returns filed during the calendar year 1968 from his State exceed (ii) the aggregate credits claimed under subsection (a) on such returns, and

"(B) that under the applicable provisions of law such increase in death taxes is effective with respect to estates of decedents dying before January 1, 1972.

"(4) DEFINITION.—As used in this subsection with respect to the District of Columbia, the term 'Governor' means the Commissioner of the District of Columbia."

TECHNICAL AMENDMENTS

SEC. 402. (a) Section 2011 (b) of the Internal Revenue Code of 1954 (relating to amount of credit for State death taxes) is amended by striking out "the credit allowed by this section" and inserting in lieu thereof "the credit allowed by subsection (a)".

(b) Section 2011 (e) of such code (relating to limitation in cases involving deduction under section 2053(d)) is amended—

(1) by striking out "subsection (a)" each place it appears in paragraphs (1) and (2) (B) and inserting in lieu thereof "subsection (a) or (f)(1)";

(2) by striking out "subsection (b)" in paragraphs (2)(A) and (2)(B) and inserting in lieu thereof "subsection (b) or (f)(2)"; and

(3) by inserting "in any case where the credit is determined under subsection (a)" after "subparagraph (A) of that paragraph" in paragraph (3).

TITLE V—TO PERMIT STATE AND LOCAL TAXING AUTHORITIES TO TAX PROPERTY LOCATED IN FEDERAL AREAS

SEC. 501. Title 4, United States Code, is amended by inserting after section 105 the following new section:

"§ 105A. Same; property tax

"(a) Subject to the provisions of subsection (b), no person shall be relieved from liability for payment of any otherwise applicable property tax levied by any State, or by any duly constituted taxing authority therein having jurisdiction to levy such a tax, on the ground that all or part of the property taxed is located in a Federal area. Such State or taxing authority shall have full jurisdiction and power to levy and collect any such tax in any Federal area within such State to the same extent and with the same effect as though such area were not a Federal area.

"(b)(1) Before a State or taxing authority may levy and collect a tax as provided in subsection (a), an agency designated for that purpose by the President must have certified that persons owning property subject to taxation under this section or living or working in areas under the exclusive Federal legislative jurisdiction within the State are afforded substantially the same rights, privileges, and tax-supported services as if the area were not under exclusive Federal jurisdiction. In no case shall such certification be given unless those persons permanently residing within such areas are afforded the same rights to vote and to hold public office as those available to persons permanently residing in such State outside of such areas.

"(2) The designated agency shall have the authority to revoke certification upon its determination that the State no longer adheres to the requirements of paragraph (1) of this subsection.

"(c) For the purpose of this section, a property tax means any tax imposed directly on, or measured by the value of, real or personal property or any interest in real or personal property.

"(d) Nothing in this section shall affect—

"(1) any of the rights, privileges, and protections afforded by section 514 of the Soldiers' and Sailors' Civil Relief Act of 1940 (50 U.S.C. App. 574); or

"(2) the provisions of section 408 of the Housing Amendments of 1955 with respect to the taxation of an interest of a lessee from the Federal Government in or with respect to any property covered by a mortgage insured under the provisions of title VIII of the National Housing Act in effect prior to August 11, 1965.

"(e) The provisions of this section shall apply only to taxes levied on or after January 1, 1971."

SEC. 502. The analysis of chapter 4 of such title, immediately preceding section 101, is amended by inserting between items 105 and 106 the following new item:

"105A. Same; property tax."

SEC. 503. (a) Section 107(a) of title 4, United States Code, is amended by inserting immediately after "105" a comma and "105A,".

(b) Section 108 of such title is amended by striking out "sections 105–110" and inserting in lieu thereof "sections 105, 105A, 106, 107, 108, 109, and 110."

(c) Section 109 of such title is amended by inserting immediately after "sections 105" a comma and "105A,".

SEC. 504. Section 1343 of title 28, United States Code, is amended—

(1) by striking out the period at the end of paragraph (4) and inserting in lieu thereof a semicolon; and

(2) by adding after paragraph (4) the following new paragraph:

"(5) To secure equitable or other relief to prevent the collection of taxes contrary to the provisions of section 105A of title 4 or other provisions of law."

The material presented by Mr. MUSKIE follows:

SECTION-BY-SECTION ANALYSIS OF THE INTERGOVERNMENTAL REVENUE ACT

Section 1 provides that this legislation may be cited as the "Intergovernmental Revenue Act."

Declaration of policy

Section 2 affirms the "federal" character of the governmental system of the United States and contains the declaration of Congressional policy to federalize the Federal personal income tax, reduce Federal tax impediments to more intensive use of State personal income taxes, facilitate the exercise of adequate powers of taxation by States and localities and establish a system of general support (revenue-sharing) payments to the States and major units of local government.

Confronted with the diversity of objectives in fashioning a program to aid State and local governments, this legislation proposes that a variety of techniques including revenue sharing and income and death tax credits be combined into a remedial measure that will:

Redress the unequal distribution of taxable resources and thereby help create a fiscal environment that will enable States and localities to exercise wider latitude in determining their budgetary priorities.

Strengthen the financial base of State and local governments with revenue sources that grow as the national economy expands.

Reward States and major local units that go the extra mile on tax effort to respond to their own expenditure requirements.

Arm States with the revenue source that enables them to enlarge their fiscal flexibility, diversify their tax systems, and adjust the distribution of tax burdens for family size as well as other equity considerations.

Reduce State vulnerability to and political leaders concern with tax competition from other States based solely on their making intensive use of the personal income tax.

TITLE I—GENERAL SUPPORT PAYMENTS TO STATES AND THEIR POLITICAL SUBDIVISIONS

Section 101 defines several terms used in this title of the Act.

General Support Trust Fund

Section 102 establishes the General Support Trust Fund in the Treasury of the United States and provides for annual appropriations to the trust fund. The section directs the Secretary of the Treasury to determine the annual appropriation to the trust fund as an amount equal to either (a) the result obtained by adding (i) 1 percent of Federal individual taxable income and (ii) 25 percent of State personal income tax collections and dividing the sum by 2 or (b) the amount appropriated to the trust fund for the preceding year, whichever is greater. The last sentence of subsection (b) protects States and localities from a cutback resulting from a recession. The section also requires the Secretary to transfer from the general fund to the trust fund quarterly on the basis of estimates and subsequently adjust the trust fund transfers to reflect the precise formula determination.

In fiscal 1970 the appropriations to the

trust fund under this act would approximate $2.8 billion determined as follows:

[In billions of dollars]

(A) 1% of Federal Individual Taxable Income	3.8
(B) 25% of State Personal Income Tax Collections	1.8
Sum of (A) and (B)	5.6
Result of dividing sum by 2	2.8

Initially, growth in the State income tax collections factor will outrun growth in the Federal individual taxable income factor because of State tax rate increases and new State income tax enactments. Thus, in the near term, the general support fund will rise faster than the growth of the Federal individual income tax base. The trust fund appropriation will continue to grow at a fairly rapid pace even after all the States have entered the personal income tax fold because of the responsiveness of this tax to growth in the national economy.

This section further provides a percentage set aside, for the first three years following enactment, to be used by the Secretary of the Treasury to fulfill his administrative and data gathering responsibilities under this title.

Basic payments

Section 103 requires the Secretary of the Treasury to make quarterly payments from the trust fund to the qualifying States and adjust subsequent payments to reflect any previous over or under payments.

State area entitlement

Section 104 directs the Secretary of the Treasury to determine by formula, the amount of the entitlement to the trust fund for each State. The formula specified in this section allocates to each State area an amount that depends on the population and relative tax effort in each State. It recognizes that responsibilities are divided in different ways as between State and local governments in each State. Each State thus shares in the fund in proportion to its population and State-local tax effort—the respective indicators of a State's revenue needs and the response made to these needs.

The Secretary would obtain for each State its:

(A) resident population;

(B) tax effort, i.e., the result of dividing the annual total of State and local taxes plus profits of State-owned liquor stores by the total personal income of individuals in the State; and

(C) tax effort ratio, i.e., the result of dividing the current tax effort (B) by the tax effort for the previous period.

After multiplying each of the factors (A, B, and C) for each State, the products are added to determine the sum for the 50 States and the District of Columbia. This total becomes the denominator for calculating a ratio between each State's population-tax effort product and the total population-tax effort product for all States. The amount of the trust fund multiplied by this ratio for any State yields the amount of that State's entitlement.

The use of two tax effort factors in the formula provides a bonus to States which maintain and increase their tax effort. The factors also protect the National Government against attempts by States to replace State-local tax effort with funds from revenue sharing.

Qualifying agreements with the Secretary

Section 105(a) requires the Governor of a State with the approval of the State legislature to enter an agreement with the Secretary in order to qualify to receive revenue sharing payments. States would pledge to adhere to these conditions:

(1) Financial control and accountability over payments to the State of the same type the State gives to State funds;

(2) Preparation and submission to the Secretary of a five-year projection of State government expenditures along with a report on the disposition of revenue sharing payments in order to subject the spending of the funds to the usual budgetary processes. The Secretary has no power either to approve or disapprove the plan or the expenditures.

(3) Maintenance of the unrestricted character of the funds distributed to cities and counties, except that a State could prohibit cities and counties from spending the money for a purpose that conflicts in whole or in part with a State's plan dealing with the utilization and development of its human or physical resources.

(4) Confirmation by report to the Secretary that in each of the first three years after the effective date of the act that the State did not reduce its grants out of its own funds to eligible cities and counties because of the Federal aid assured to these governments under this act. It is thus the intent of the act that the States not reduce their grants out of their own funds to eligible cities and counties.

(5) Adherence to all Federal laws in connection with any activity or program supported by funds provided in this Act so that these funds do not perpetuate practices that conflict with national policy.

(6) Submission of reports as necessary to the Secretary, the Congress, and the Comptroller General to help them carry out their responsibilities under this act;

(7) Distribution of the funds within the State required under other provisions of Section 105, described below.

Distribution of State entitlement

Section 105 (b) requires each State to pay over to cities and counties of 50,000 population a portion of the State entitlement in accordance with a formula that varies the payment to each city and county on the basis of its local revenue ratio, i.e., the ratio between its tax receipts and the total tax receipts of the State and its localities plus State liquor store profits. The amount of local tax receipts is assumed to implicitly reflect variations in local tax effort.

Specifically, the pass-through requirement in this act provides that (a) cities and counties of 100,000-plus population receive an amount equal to the product of multiplying the State entitlement by two times the local revenue ratio, and (b) cities and counties of 50,000-plus population receive an amount equal to the product of multiplying the State entitlement by two times the local revenue ratio multiplied further by the percentage by which the city or county population exceeds 50,000. This population modification for the cities and counties in the 50,000 to 100,000 size class avoids the possibility of drastically different treatment for cities and counties just below and just above the minimum population of 50,000.

The 50,000 population cutoff figure is designed to reconcile the competing demands of "federalism" and "urbanism." By drawing the line at 50,000, Congress still leaves each State with considerable discretion in the allocation of revenue sharing payments to its units of local government, a policy that accords with the tenets of federalism.

By specifying payments to the 872 counties and cities above the 50,000 mark which account for approximately 75 percent of the nation's population, Congress includes virtually all of the local jurisdictions experiencing the most severe fiscal tensions. The use of the multiplier of two times the local revenue ratio is designed to reflect the national urgency of the urban fiscal crisis.

It is estimated that on a nationwide basis, this formula allocates 22 percent of the trust fund to cities and 13 percent to counties.

To encourage States to take the initiative in strengthening the fiscal position of cities and counties and to maximize flexibility in the use of general support payments for meeting the particular needs of differing State-local fiscal systems, this section requires the Secretary to accept an alternative State plan that meets either of two conditions:

(1) Each city and county will receive more under the State alternative plan than it is entitled to under the statutory formula; or

(2) An alternative State plan is accepted by formal resolution of the city and county legislative bodies representing, at one and the same time, half of those entitled to receive payments under the statutory formula, and those entitled to receive at least 50% of the amount designated by the statutory formula for cities and counties.

Under the second of these conditions, a State with the concurrence of cities and counties, may carry out a plan that would shift financial responsibility for a major function such as support for public schools or public assistance from the local governments to the State.

In recognition of the contribution that locally imposed school taxes make to aggregate State and local tax effort, Section 105(e) further designates part of the State entitlement for support of local schools. The amount spent for this purpose is determined by multiplying the payment to the State (after subtracting the amount allocated to cities and counties) by the ratio of separate school taxes to State and separate school taxes. It is estimated that on a nationwide basis this requirement allocates 16 percent of the trust fund to school support.

Powers of the Secretary

Section 106 directs the Secretary to obtain the requisite statistical data, reports and other materials he needs to discharge his responsibilities under this title. This section also gives the Secretary authority to reimburse Federal agencies for the cost of providing any data necessary to the administration of this act from the funds allocated for the Secretary by a percentage set aside in the first three years following the enactment of the act. It further authorizes appropriations after the first three years to support the continuing information requirements of the Secretary under this act.

This section also empowers the Secretary, after giving notice and conducting a hearing, to stop payments to a State that fails to comply with the agreements required under the act until such time as corrective action is taken.

Judicial review

Section 107 permits a State to file a petition for review of the Secretary's action in the appropriate United States Court of Appeals. The scope of the judicial review authority is spelled out and includes final appeal to the Supreme Court.

Report by the Secretary

Section 108 requires the Secretary to report to the Congress on the operation of the trust fund for the preceding and current fiscal years. He must file a statement of the actual and estimated appropriations and disbursements from the trust fund and may recommend changes in its operation.

Congressional study

Section 109 charges the respective Appropriations and Legislative committees of both the House and the Senate to conduct a full and complete study with respect to the operation of the trust fund at least once during each session of Congress. This section explicitly provides that the Congress retains the same rule-making authority with respect to these rules as it does with other rules.

TITLE II—PARTIAL FEDERAL INCOME TAX CREDIT FOR STATE AND LOCAL INCOME TAX PAYMENTS

Section 201 amends the Internal Revenue Code by renumbering Section 40 as 41 and

inserting a new Section 40 that permits individuals to elect, in lieu of deductions, to take full credit against their Federal income tax liability an amount equal to 40 percent of their State and local income tax payments. The section defines State and local income taxes so as to include only those that apply to net income (after personal exemptions and dependent allowances). It pins down the period in which the taxpayer changes his election of the Section 40 credit or deductions. It spells out the methods to be used in accounting for adjustments on payments of accrued taxes claimed as Section 40 credits. It also incorporates cross references and the necessary technical and conforming amendments to other sections of the Internal Revenue Code.

The effect of the partial Federal tax credit on State use of the income tax cannot be predicted with certainty. Nonetheless, the thrust of the credit will be to encourage greater State use of this revenue source. Assuming the credit stimulates State income tax effort to a moderate degree, the Federal revenue forgone during the second year of the operation of the credit may be more than offset by the increasing State income tax receipts. Once State income tax receipts pass this threshold, State gains should overshadow Federal revenue loss because the States will be collecting one dollar for each forty cents of Federal credit.

Section 202 contains technical amendments.

Section 203 makes the amendments to the Internal Revenue Code contained in this title effective with taxable years beginning after the date of the enactment of this act.

TITLE III—FEDERAL COLLECTION OF STATE INCOME TAXES

Section 301 adds a new section to Chapter 77 of the Internal Revenue Code to allow the proper officials of any State and the Secretary of the Treasury to enter into an agreement for Federal administration and enforcement of that State's income tax. It requires that the State pay to the Treasury Department the cost of any work or services performed as a result of the agreement.

If the States, on their part, evidence a willingness to enter into the agreements authorized under this section, the day may come when taxpayers of a State can discharge both Federal and State tax liabilities with a single set of tax officials. States have tended increasingly to conform their income tax laws to the Federal Internal Revenue Code. The prospects of working out a mutually accepted agreement have thereby been enhanced. Currently, several States are considering the enactment of a personal income tax for the first time. If the Secretary of the Treasury had this authority, one or more of these States might immediately take steps to enter into an agreement in order to avoid the cost of establishing its own income tax administrative machinery.

TITLE IV—LARGER FEDERAL CREDIT FOR STATE DEATH TAX PAYMENTS

Section 401 amends the Internal Revenue Code by adding a new subsection at the end of section 2011 to restructure and liberalize the Federal credit for State death tax payments in return for State enactment of: (a) an estate tax in States now using an inheritance tax in order to ease taxpayer compliance and tax administration burdens; and (b) revised estate tax rates to pick up the increases in the Federal credits so that their effect is to raise State revenue rather than to reduce State taxes.

Taxpayer compliance and tax administration are frequently difficult under the present system of Federal estate and gift taxes and State estate, inheritance, and gift taxes. Jurisdictional conflicts frequently arise. State revenue from death taxes fluctuates from year to year. This section replaces the present Federal estate tax credit for State death tax payments with a two-bracket credit. This two-step credit gives the States a larger part of the revenue produced by the lower tax brackets—taxable estates up to $50,000—and reserves for the Federal government the portion of the revenue produced by the larger estates. This section would make the liberalized credit applicable to decedents dying after December 31, 1972 to give States time to make appropriate adjustments in their tax laws to obtain the revenues involved. The budgetary impact of this section would build up gradually after the first few years.

Section 402 contains technical amendments.

TITLE V—PROPERTY TAXES IN FEDERAL ENCLAVES

Section 501 adds a new section 105A to Title 4 of the United States Code. This new section permits the imposition and collection of property taxes on privately owned real and personal property within Federal areas, such congressional consent to take effect (or terminate) State-by-State upon certification (made or withdrawn) by an agency designated by the President that persons living and working in areas under the exclusive Federal legislative jurisdiction within the State are afforded substantially the same rights and privileges and tax supported services as those available to other residents of the State.

Under the provisions of Title V the National Government would permit States and their localities to tax the personal property of private individuals located in areas under exclusive Federal jurisdiction. This privilege would be accorded only if the State could demonstrate to the satisfaction of the Department of Justice that all persons residing in such Federal enclaves enjoy the same rights and privileges accorded to residents of the State. Adoption of this provision would not result in a direct revenue loss to the National Government—it would, however, result in some personal property tax gain to those local governments that have Federal enclaves located within their jurisdictions.

In view of recent economic trends, the rise in local tax rates and an estimate that States and localities in 1961 would have gained about $10 million a year, it seems reasonable to estimate the current revenue gain would be on the order of $20 million annually.

Sections 502 and 503 contain technical amendments, and Section 504 establishes a legal remedy to prevent collection of unauthorized taxes.

INTERGOVERNMENTAL REVENUE ACT OF 1969

EXHIBIT A.—ESTIMATED FEDERAL TRUST FUND APPROPRIATION FOR FISCAL YEARS 1970, 1971, AND 1972 UNDER THE PROPOSED FORMULA FOR GIVING EQUAL WEIGHT TO 2 FACTORS—1 PERCENT OF FEDERAL TAXABLE INCOME AND 25 PERCENT OF STATE PERSONAL INCOME TAX COLLECTIONS

[Amounts in billions]

	1 percent of Federal taxable income (estimate)	25 percent of State income tax collections [1]	Trust fund, cols. 1+2+2
Fiscal year:			
1970	$3.8	$1.8	$2.8
1971	4.1	2.6	3.35
1972	4.4	3.5	3.9

[1] Assumes adoption of Federal tax credit proposal in 1969 and that its acceleration effect on State personal income tax collections is moderately strong as shown in exhibit E for 1970 and 1971 and that collections for 1969 are $7,200,000.

EXHIBIT E.—ESTIMATED STATE INCOME TAX COLLECTIONS AND FEDERAL REVENUE FORGONE FOR THE FISCAL YEARS 1970, 1971, AND 1972 UNDER 4 HYPOTHETICAL CONDITIONS

[Amounts in billions]

Hypothetical conditions	1st year, 1970		2d year, 1971		3d year, 1972	
	State income tax collections	Federal revenue forgone	State income tax collections	Federal revenue forgone	State income tax collections	Federal revenue forgone
I. No change in present law that permits deduction of State tax payments when computing Federal tax	$8.5	[1] $1.9	$10.0	[1] $2.2	$12.0	[1] $2.6
II. Congress adopts ACIR-type tax credit proposal and the acceleration effect on State income tax collections is relatively weak [2]	9.4	[1] 3.9	12.0	[1] 5.0	15.6	[1] 6.6
III. Congress adopts ACIR-type tax credit proposal and the acceleration effect on State income tax collections is moderately strong [3]	10.6	[1] 4.5	14.0	[1] 5.9	19.2	[1] 8.1
IV. Congress adopts ACIR-type tax credit proposal and its acceleration effect on State income tax collections is strong [4]	11.9	[1] 5.0	16.5	[1] 6.9	22.8	[1] 9.6

[1] Assumes an average State income tax write-off against Federal tax of 22 percent under present law and 42 percent under ACIR-type credit.

[2] Assumes that it will take 3 years before the increase in State income tax collections will offset the additional amount of Federal income tax forgone. Specific acceleration assumptions: 10 percent 1st year, 20 percent 2d year, and 30 percent 3d year, and no further State income tax collection acceleration after the 3d year attributable to the tax credit.

[3] Assumes that the break-even point will be reached in the 2d year. Specific acceleration assumptions: 25 percent 1st year, 40 percent 2d year, 60 percent 3d year, and no further acceleration in State income tax collections after the 3d year attributable to the Federal tax credit.

[4] Assumes that even in the 1st year the increase in State income tax collection attributable to the tax credit will more than offset the reduction in Federal revenue. Specific acceleration assumptions: 40 percent 1st year, 65 percent 2d year, 90 percent 3d year, and no further acceleration in collections after the 3d year attributable to the Federal tax credit.

State-local revenue gain	4.9	7.4	11.8

[1] Federal collection of State income taxes.
[2] Authorizing State-local property taxes in Federal enclaves.

Source: ACIR staff estimates.

Mr. GOODELL. Mr. President, today I have joined my distinguished colleague, Senator MUSKIE, in sponsoring the Intergovernmental Revenue Act.

The Intergovernmental Revenue Act was prepared by the Advisory Commission on Intergovernmental Relations. Senator MUSKIE has served with great distinction on that Commission, as has the Governor of my State, the Honorable Nelson A. Rockefeller, and other leaders of this Nation who have been concerned with renewing and strengthening our federal system of government. A product of years of study by the Commission, the bill is designed to put new life into our federal system by reinforcing the fiscal base of States and local governments.

I have for the past 10 years been active in promoting one of the major reforms embodied in this bill—Federal revenue sharing with State and local governments. I sponsored comprehensive legislative proposals on this subject in 1967, H.R. 4070, and again this year, S. 50. The first title of the proposed Intergovernmental Revenue Act would create a system of revenue sharing which closely resembles that proposed by me in my S. 50, introduced in January of this year.

The proposed Intergovernmental Revenue Act has my full support.

I. OBJECTIVES OF THE BILL

The bill is an urgently needed step toward redressing the growing fiscal imbalance among the levels of our Government—an imbalance that has been posing a grave threat to the integrity of our federal system of shared power.

The Federal income tax has given the Central Government of this Nation a strong fiscal base, capable of growing as the economy expands. The fiscal base of our State and local governments, however, has not had the same strength and growth potential, and has not been keeping pace with the rising demands being made upon State and local treasuries. As a result, State and local governments have been increasingly facing a financial squeeze, and have become increasingly dependent on Federal grant-in-aid programs in order to meet rising demands for public services.

This fiscal crisis facing States and municipalities has been a product of rising expenditures, outdated tax systems and interarea competition for tax dollars.

Sharply rising welfare, education, and other costs have been making unprecedented demands on State and municipal budgets. These spiraling costs have been especially acute in the great urban centers, with their grave problems of poverty and urban blight.

The revenue-producing abilities of State and local governments have not kept pace with these rising expenditures. The majority of States and local governments still have outdated tax structures. Only a minority have made full use of the income tax, with its built-in capacity to provide revenue growth as the economy grows. Those States and municipalities that have modernized their tax structures have suffered from interstate and interarea competition, losing affluent taxpayers to neighboring lower tax areas.

The problem of fiscal imbalance has been carefully documented by the Advisory Commission on Intergovernmental Relations in its landmark 1967 report, "Fiscal Balance in the American Federal System." That report made a number of major recommendations for reform that are developed in detail in the Intergovernmental Revenue Act.

The central objective of the Intergovernmental Revenue Act is to help restore fiscal balance in our federal system. It would do this by supplementing the tax base of States and localities, through a system of Federal general support payments; and, encouraging States and localities to adopt stronger tax systems of their own, by establishing Federal tax credits for State and local income and estate taxes.

II. REVENUE SHARING

Title I of the proposed act would create a new system of Federal revenue sharing, closely analogous to that proposed by me in my Federal Revenue Sharing Act, S. 50, introduced earlier this year.

"Revenue sharing" refers to a plan by which the Federal Government distributes a portion of its tax revenues to States and localities without specifying a particular use of the funds. The States and local governments receiving these payments would be free to determine for themselves how to use the grants. The Federal Government does not now provide this type of general support payments to States and localities, and instead makes grants-in-aid for specifically defined purposes, often with extensive Federal controls.

By returning to State and local governments a stated share of Federal tax revenues without Federal controls, revenue sharing will give greater vigor to States and urban governments. It would supplement these governments' local tax base, thus enabling them to strengthen their administrative apparatus, supply better public services, and meet pressing social needs more effectively. It can put new life in our federal system by giving greater emphasis to decentralized decisionmaking, initiative, and innovation.

The Intergovernmental Revenue Act is not offered as part of a plan to cut back projected expansions of Federal grant-in-aid programs or as a substitute for portions of existing grant-in-aid programs. Instead, it is conceived as a supplement to existing Federal grant programs, designed to strengthen States' and local governments' fiscal base.

General support grants to State and local governments date back 130 years, when the Federal Government on a one-shot basis, distributed the surplus accumulated in the National Treasury to the States. Many States have their own systems of revenue sharing with local governments analogous to proposals made for its adoption at the Federal level.

Ten years ago, the introduction of a number of bills in Congress stimulated considerable interest in the idea of revenue sharing. I introduced one of the earliest of these bills, in 1959.

As a result of the interest generated by these bills, Walter W. Heller, former Chairman of the Council of Economic Advisers, conducted an important study of the matter in 1964. Mr. Heller recommended the adoption of a revenue-sharing system with States. This proposal was supported by a Presidential task force headed by Joseph A. Pechman of the Brookings Institution. These studies received widespread public attention—so much so that revenue sharing is often spoken of as the "Heller-Pechman plan," although its history antedated the Heller and Pechman studies.

Thereafter, congressional interest in revenue sharing continued to grow. In 1967, while a Member of the House of Representatives, I introduced a comprehensive and detailed statutory scheme for revenue sharing—H.R. 4070—including an allocation formula based on States' population and tax effort, and a mandatory "pass through" of a portion of revenue-sharing payments to localities. It served as a model for many of the subsequent legislative proposals on this subject.

The Advisory Commission on Intergovernmental Relations recommended the adoption of Federal revenue sharing in its 1967 "Fiscal Balance" report.

The concept of revenue sharing has also been endorsed by the National Governors Conference, the National League of Cities, the U.S. Conference of Mayors, the National Conference of State Legislative Leaders, and the National Association of Counties. In the 90th Congress, over 110 Members of Congress sponsored or cosponsored over 90 revenue-sharing bills.

This year, the National Advisory Commission on Urban Problems, headed by former Senator Paul Douglas, of Illinois, urged the adoption of a Federal revenue-sharing system. The Douglas Commission proposed a special formula requiring states to pass on to cities and urban counties a specified portion of the revenue-sharing payments they receive from the Federal Government. This formula was included in slightly modified form in my revenue-sharing bill, S. 50, introduced earlier this year, as well as in the the proposed Intergovernmental Revenue Act.

On the basis of present estimates, the proposed act in its first year of operation—fiscal 1970—would provide about $3 billion of revenue-sharing payments to States and local governments. Under the distribution formula of the bill, it is estimated that on a nationwide basis about 49 percent of these payments would be allocated to States, 22 percent to major cities, nearly 13 percent to urban counties, and 16 percent to the support of local schools.

The act would create a revenue-sharing trust fund and appropriate into this fund an amount based on 1 percent of the Federal individual income tax base and 25 percent of State income tax collections.

The amounts in this trust fund would be allocated in the first instance among the States according to population and tax effort. The tax effort factor serves as a bonus to States that are making above-average tax efforts, and as deterrent against States reducing their own taxes in expectation of receiving revenue-sharing assistance.

The bill gives recognition to the legitimate claims of urban governments by requiring a specified portion of revenue-sharing payments to be "passed through" by States to cities and urban county governments having more than 50,000 population.

Specifically, each city and urban county would be entitled to a share of the State's revenue-sharing payments equal to twice the ratio that the city's or county's taxes bear to the total State and local tax receipts in the particular State concerned. This approach has the following advantages:

Basing the formula on local taxation would allocate the largest share to the most populous and most "active" metropolitan governments. It would, moreover, restrict the amount of payments to urban county governments which are relatively "dormant"; that is, which impose few taxes and provide few services.

The formula would take into account the variation in State-local fiscal relations throughout the Nation. The shares it would allocate between the State government and metropolitan governments in a given State would depend upon their relative shares of the total burden of State and local taxation.

The formula serves automatically to allocate payments between cities and urban counties which have overlapping boundaries.

To provide flexibility and to encourage States to take the initiative in strengthening the fiscal position of major cities and counties, the bill would authorize a State, by statute, to establish an alternative plan for application of revenue-sharing payments otherwise earmarked for major city and county governments. To assure that the alternative plan provides adequate funds, the bill would require that it either, first, provide each major city and county with more aid than they would be entitled to receive under the statutory formula, or else, second, that it be accepted by resolution of the local legislative bodies representing at least half of the cities and counties eligible for assistance.

The bill also would assure support for local schools, by requiring that a State spend a specified portion of its revenue-sharing payments for school purposes. This would be determined by a formula measured by the ratio of school taxes to State taxes plus school taxes. It is estimated that on a nationwide basis this requirement allocates 16 percent of revenue-sharing payments to school support.

III. TAX CREDITS

A unique feature of the Intergovernmental Revenue Act is that it combines revenue sharing with tax credits to reinforce the fiscal independence of State and local governments.

Revenue-sharing supplements the tax base of States and localities.

Tax credits help strengthen the tax base of States and localities by creating an effective incentive for improving their tax systems.

By combining revenue sharing with tax credits, the proposed act will help achieve the complementary objectives of supplementing and modernizing State and local tax systems. It will assist in assuring that States and localities keep up their own tax efforts after they start receiving general support payments from the Federal Government. It will constitute an important step toward eliminating the interstate and interarea taxing disparities that have placed the most progressive taxing jurisdictions at a competitive disadvantage.

Title II of the bill creates a Federal income tax credit for payment of State and local income taxes. The amount of the credit would be equal to 40 percent of the amount of State or local income taxes paid by the taxpayer in the taxable year.

At present, the Internal Revenue Code authorizes a deduction for State and local taxes paid. However, this deduction provides only a limited benefit to taxpayers in the lower tax brackets and no benefit to taxpayers who do not itemize their deductions. Under the bill, a taxpayer could elect to continue to take the deduction in lieu of the credit, but this election would be attractive only to the more affluent taxpayers who are in the 40-percent-plus tax brackets.

To assist States in adopting or strengthening their own income tax systems, title III of the proposed act authorizes the Treasury to collect State personal income taxes under terms mutually agreeable to the Secretary of the Treasury and the appropriate State officials.

The proposed income tax credit would result in a Federal revenue loss of $2.6 billion in the first year of its operation. The offsetting State revenue gain is difficult to estimate, as it depends on how many States adopt the income tax or upgrade their existing income tax. In the first year, the State gains would probably be less than the Federal revenue loss, but in the long run the State gains should exceed the Federal loss because the States will be collecting $1 for each 40 cents of Federal credit.

Title IV of the bill would increase and restructure the Federal tax credit for each State estate tax payments. The new credit would be available only in States which adopt an estate-type tax—that is, a tax upon the entire estate of the decedent, instead of the inheritance tax; that is, tax upon the heirs—that many States have. Moreover, the credit would be available only if the State adopts a high enough rate to recapture in State estate tax collections an amount equal to the enlarged Federal tax credit.

Because it is difficult to predict how quickly various States will enact legislation to substitute estate taxes for their present inheritance taxes and to increase their tax rates to "pick up" the increase in the available tax credit, it is difficult to estimate the timing of the impact of the proposed estate tax credit upon Federal estate tax collections. For 2 or 3 years, it will have no appreciable revenue impact. In the long run, say 5 years, the State revenue gain and Federal revenue loss might each approach $1 billion.

The final title of the bill, title V, would permit States and localities to tax personal property of private individuals located in enclaves therein under exclusive Federal jurisdiction, provided that those residing in the enclave have the same privileges, rights, and tax-supported services accorded to other residents outside the enclave. This title would result in some personal property tax gains to those States and local governments that have Federal enclaves within their jurisdictions, but would not cause any direct Federal revenue loss to the Federal Government.

S. 2486—INTRODUCTION OF A BILL PROVIDING GRANTS TO THE STATE OF WYOMING TO SEAL ABANDONED COAL MINES

Mr. McGEE. Mr. President, I introduce, for appropriate, reference a bill to authorize the Secretary of the Interior to provide financial assistance to the State of Wyoming for the purpose of filling voids in abandoned coal mines in my State. This bill is directed to the situation which has resulted in Rock Springs, Wyo. Unfortunately, the Rock Springs area was undermined for the removal of coal deposits many years ago when far too little attention was directed to proper mining practices or the conditions in which the area was left when mining activities were terminated. Earlier this year many property owners in Rock Springs were subjected to rather severe property damage due to earth slippage or subsidence as a result of the underground voids which remained from previous mining activity.

This damage alone has resulted in losses of several thousands of dollars, and of course, this type of loss is not covered by the ordinary home insurance policy. This has resulted in severe hardship on these homeowners, and this, in and of itself, presents a most serious situation. The threat of further slippage, however, poses an even greater threat—a threat which could spread to other areas of the city and inflict far greater damage to both life and property.

We must keep in mind the fact that where we have a situation involving unstable subsurface conditions, there is the ever-present danger of ruptured utility lines—water and natural gas. With these conditions we have a constant threat of underground fires, and this could quickly result in damage and destruction which would reach catastrophic propor-

tions. Past experience has shown that these underground fires are both costly and difficult to control. The health and welfare of the residents of Rock Springs would certainly be affected if there was any substantial breakage of water and sewer lines. These are situations which we should avoid to every extent possible, and my bill is introduced with this in mind.

The Bureau of Mines in the Department of the Interior has had considerable experience with this type of problem and has had some degree of success in filling these mine voids. By act of July 15, 1955—30 U.S.C. 571 et. seq.—the Secretary of the Interior was given authority to make financial assistance available to the Commonwealth of Pennsylvania for this type of corrective work. It is my understanding that a considerable amount of work has been accomplished under the authority and conditions contained in that act. My bill would authorize similar activity by the Bureau of Mines in Wyoming.

Also, when the Appalachian regional bill was enacted by Congress in 1965, Public Law 89–4, a provision was included in the bill to authorize the Secretary of the Interior to make grants to the States comprising the Appalachian region for the purpose of filling the voids in old and abandoned coal mines in that area.

It is clear, then, that the Congress of the United States has recognized a responsibility to assist the States in filling the voids in these old abandoned coal mines, but the present legislative authority is apparently limited to the two specific areas involved in the Pennsylvania and Appalachia Acts. With this recognized statement of policy and responsibility, there does not appear to be any logical reason why this policy should not be extended to other areas of the country in which this troublesome problem occurs.

At the present time we do not know the entire scope of the involved area underlying Rock Springs. The Bureau of Mines has been conducting a study of the area in order to accurately define the magnitude of the problem. It is my understanding that the Bureau's report should be available in about a month or the latter part of July. When this report is available, we shall be in a better position to evaluate the scope of the problem together with an estimate of the probable costs involved in correcting it. It is clear even at the present time, however, that we are facing a significant and a most costly problem and one that will require finances far beyond available local and State resources. In other words, some Federal financial assistance will be necessary if we hope to remove this threat of further damage to one of Wyoming's principal cities and industrial areas.

For these reasons, I am introducing this bill today with the hope that it might receive early and favorable consideration by the Congress. By early and favorable consideration of my bill, I feel the Congress has the opportunity to prevent a most serious situation from reaching catastrophic proportions.

The people of Wyoming are most grateful for the efforts which personnel from the Bureau of Mines have made and continue to make in an effort to resolve this matter. The Bureau unquestionably has the qualified personnel and expertise to contribute significantly to the ultimate solution to this problem. We look forward to working with them in the months ahead. The Bureau, however, will need additional legislative authority and funds, and I would hope that the Congress will provide both with as little delay as possible.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2486) to authorize the Secretary of the Interior to provide grants to the State of Wyoming to assist in a program to seal abandoned coal mines and to fill voids in abandoned coal mines, introduced by Mr. MCGEE, was received, read twice by its title and referred to the Committee on Interior and Insular Affairs.

S. 2487—INTRODUCTION OF THE LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT AMENDMENTS OF 1969

Mr. WILLIAMS of New Jersey. Mr. President, on behalf of myself and other Senators, I introduce, for appropriate reference, a bill to amend the Longshoremen's and Harbor Workers' Compensation Act. This act provides workmen's compensation benefits for some 1 million privately employed workers subject to Federal jurisdiction—chiefly longshoremen and ship repairmen working on navigable waters of the United States. Its provisions have been extended to other private employment, including employees in the District of Columbia, and employment by contractors at U.S. bases overseas.

While the workmen's compensation statutes of many other jurisdictions have been updated to reflect increases in the cost of living in recent years, and to provide more adequate protection, the Longshoremen's and Harbor Workers' Compensation Act has not been amended since 1961. Improvements are consequently long overdue.

One of the chief features of this bill relates to the weekly benefits paid to totally disabled workers. Under the law such a worker receives two-thirds of his wage as weekly compensation while totally disabled; however, this is subject to a maximum of $70 a week. This bill would increase that weekly maximum to $132, and the minimum benefit from $18 to $36.

Other features of the bill include payment of compensation would be permitted without a waiting period when the disability exceeds 14 days rather than 28 days presently required, compensation on behalf of dependents would be extended to those in a student status from 18 to 23 years of age, the time for giving notice of injury and filing claim with respect to latent injury would be extended, the liability of employers with respect to subsequent injuries suffered by employees with preexisting physical impairments would be limited, thereby encouraging the employment of handicapped persons, benefits would be extended to cases of disfigurement of the neck and other normally exposed parts of the body, and, provision would be made for further financing of special funds by increased payments from $1,000 to $5,000 from employers in fatal injury cases where there are no survivors, and, in addition, by assessments upon insurance carriers and upon self-insurers.

Mr. President, in 1966 the Congress amended the Federal Employees Compensation Act to provide improvements which we recognized were necessary. It is the purpose of this bill to deal with the other major area of Federal workmen's compensation responsibility, by making the benefits of the Longshoremen's and Harbor Workers' Compensation Act more realistic in light of today's living costs and to modernize its provisions in other respects. Most of the workers covered by this act are engaged in extremely hazardous work, for longshoring is one of the most dangerous of any occupations. Indeed, marine cargo handling ranks the highest of all industries in terms of injuries per man-hours of work.

It is, therefore, especially appropriate that we now enact legislation which will insure more adequate compensation protection for these workers and their families.

Mr. President, I ask unanimous consent that the provisions of the bill be printed at this point in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2487), to amend the Longshoremen's and Harbor Workers' Compensation Act, and for other purposes, introduced by Mr. WILLIAMS of New Jersey (for himself and other Senators), was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

S. 2487

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Longshoremen's and Harbor Workers' Compensation Act Amendments of 1969."

STUDENT BENEFITS

SEC. 2. (a) Section 2 of such Act is amended by redesignating paragraph (19) as paragraph (20) and adding a new paragraph (19) as follows:

"(19) The term 'student' means a person regularly pursuing a full-time course of study or training at an institution which is—

"(A) a school or college or university operated or directly supported by the United States, or by any State or local government or political subdivision thereof, or

"(B) a school or college or university which has been accredited by a State or by a State recognized or nationally recognized accrediting agency or body, or

"(C) a school or college or university not so accredited but whose credits are accepted, on transfer, by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an institution so accredited, or

"(D) an additional type of educational or training institution as defined by the Secretary,

but not after he reaches the age of twenty-three or has completed four years of education beyond the high school level, except that, where his twenty-third birthday occurs during a semester or other enrollment period, he shall continue to be considered a student until the end of such semester or other enrollment period. A child shall not be deemed

to have ceased to be a student during any interim between school years if the interim does not exceed five months and if he shows to the satisfaction of the deputy commissioner that he has a bona fide intention of continuing to pursue a full-time course of education or training during the semester or other enrollment period immediately following the interim or during periods of reasonable duration during which, in the judgment of the deputy commissioner, he is prevented by factors beyond his control from pursuing his education. A child shall not be deemed to be a student under this Act during a period of service in the Armed Forces of the United States or while receiving educational or training benefits under any other program authorized by the Congress of the United States."

"(b) The last sentence of section 2 (14) of such Act is amended to read as follows: "'Child,' 'grandchild,' 'brother,' and 'sister' include only persons who are under eighteen years of age, and also persons who, though eighteen years of age or over, are (1) wholly dependent upon the employee and incapable of self-support by reason of mental or physical disability, or (2) are students as defined in paragraph (19) of this section."

(c) Section 8(d) of such Act is amended by striking out the words "under the age of eighteen years" wherever they appear therein.

TIME FOR COMMENCEMENT OF COMPENSATION

SEC. 3. Section 6(a) of the Longshoremen's and Harbor Workers' Compensation Act (44 Stat. 1426, 33. U.S. 906) is amended by striking out "more than twenty-eight days" and inserting in lieu thereof "more than fourteen days."

MAXIMUM AND MINIMUM LIMITS OF DISABILITY COMPENSATION AND ALLOWANCE

SEC. 4. (a) Section 6(b) of such Act is amended by striking out "$70" and inserting in lieu thereof "$132", and by striking out "$18" wherever it appears, and inserting in lieu thereof "$36".

(b) Section 14 of such Act is amended by striking out subsection (m).

COST OF REEXAMINATION

SEC. 5. The last sentence of section 7(e) of such Act is amended to read as follows: "The deputy commissioner may charge the cost of such examination to the carrier or self-insurer."

DISFIGUREMENTS

SEC. 6. Section 8(c) (20) of such Act is amended to read as follows:

"(20) Disfigurement: Proper and equitable compensation not to exceed $3,500, shall be awarded for serious disfigurement: (A) of the face, head, or neck; or (B) of other normally exposed areas likely to handicap the employee in securing or maintaining employment."

COMPENSATION AT END OF SCHEDULED AWARD

SEC. 7. Section 8(c) of such Act is further amended by adding the following new paragraph:

"(23) With respect to any period after payments under paragraph (c) (1) through (c) (20) have terminated, compensation shall be paid as provided in subsections (a) and (b) of this section if the disability is total, or, if the disability is partial, 66⅔ per centum of the difference between the injured employee's average weekly wages before the injury and his wage-earning capacity after the injury in the same or other employment."

SPECIAL FUND

SEC. 8. (a) Section 8(d) of such Act is amended by adding the following new paragraph (6):

"(6) If there be no surviving wife, dependent husband, or child, then to the special fund established under section 44(a) of this Act."

(b) Section 44(c) of such Act is amended to read as follows:

"(c) Payments into such fund shall be made as follows:

"(1) Each employer shall pay $5,000 as compensation for the death of an employee of such employer resulting from injury where the deputy commissioner determines that there is no person entitled under this Act to compensation for such death.

"(2) When the amount in the fund at the beginning of the calendar year is less than $300,000, each carrier or self-insurer shall be obligated to make prorated payments into the fund based on the gross premiums collected by the carrier for risks during the preceding fiscal year or the amount of premiums a self-insurer would have had to pay during the preceding fiscal year for compensation insurance.

"(3) All amounts collected as fines and penalties under the provisions of this Act shall be paid into such fund."

(c) Section 44 is further amended by adding the following new subsection (h):

"(h) The proceeds of this fund shall be available for payments under section 8 (f) and (g), under section 18 (b), and under section 39 (c): *Provided*, That payments authorized by section 8 (f) shall have priority over other payments authorized from the fund: *Provided further*, That at the close of each fiscal year the Secretary of Labor shall submit to the Congress a complete audit of the fund."

INJURY FOLLOWING PREVIOUS IMPAIRMENT

SEC. 9. (a) Section 8(f)(1) of such Act is amended to read as follows: "In any case in which an employee having an existing permanent physical impairment suffers injury, the employer shall provide compensation for such disability as is found to be attributable to that injury based upon the average weekly wages of the employee at the time of the injury. If following an injury falling within the provisions of section (8)(c)(1)-(20), the employee is totally and permanently disabled, and the disability is found not to be due solely to that injury, the employer shall provide compensation for the applicable prescribed period of weeks provided for in that section, or for one hundred and four weeks, whichever is the greater. In all other cases of total permanent disability or of death, found not to be due solely to that injury, of an employee having an existing permanent physical impairment, the employer shall provide, in addition to compensation under paragraphs (b) and (e) of this section, compensation payments or death benefits for one hundred and four weeks only. After cessation of the payments for the period of weeks provided for herein, the employee or his survivor entitled to benefits shall be paid the remainder of the compensation that would be due for permanent total disability or for death out of the special fund established in section 44."

(b) Section 8(f) of such Act is further amended by striking out paragraph (2).

DEATH BENEFITS

SEC. 10. (a) Section 9(a) of such Act is amended by striking out "$400" and inserting in lieu thereof "$800".

(b) Section 9(e) of such Act is amended by striking out "$106" and inserting in lieu thereof "$198", and by striking out "$27" and inserting in lieu thereof "$54".

DETERMINATION OF PAY

SEC. 11. Section 10 of such Act is amended by adding the following new subsections:

"(f) Each June 30th the Secretary shall determine the percent change in the weekly wage level in the longshore industry during the preceding year. Effective the first day of the third month following this determination, compensation payable on account of disability or death which occurred more than one year before that first day, and which occurred after enactment of this subsection, shall be increased by the percent rise in the wage level.

"(g) The weekly compensation after adjustment under subsection (f) shall be fixed at the nearest dollar. However, the weekly compensation after adjustment shall reflect an increase of at least $1."

TIME FOR NOTICE AND CLAIMS

SEC. 12. (a) Section 12 (a) of such Act is amended to read as follows:

"NOTICE OF INJURY OR DEATH

"SEC. 12. (a) Notice of an injury or death in respect of which compensation is payable under this Act shall be given within thirty days after the date of such injury or death, or thirty days after the employee or beneficiary is aware or in the exercise of reasonable diligence should have been aware of a relationship between the injury or death and the employment. Such notice shall be given (1) to the deputy commissioner in the compensation district in which the injury occurred and (2) to the employer."

(b) Section 13(a) of such Act is amended to read as follows:

"(a) Except as otherwise provided in this section, the right to compensation for disability or death under this Act shall be barred unless a claim therefor is filed within one year after the injury or death. If payment of compensation has been made without an award on account of such injury or death, a claim may be filed within one year after the date of the last payment. Such claim shall be filed with the deputy commissioner in the compensation district in which such injury or death occurred. The time for filing a claim shall not begin to run until the employee or beneficiary is aware, or by the exercise of reasonable diligence should have been aware, of the relationship between the injury or death and the employment."

FEES FOR SERVICES

SEC. 13. Section 28 (a) of such Act is amended by adding the following new sentence: "In cases where an award is made or increased after payment under the Act is resisted, a claim for legal services approved by the deputy commissioner or a court shall be added to the compensation award and become a lien upon such award in the amounts so fixed."

TECHNICAL AMENDMENT

SEC. 14. Section 3(a)(1) of such Act is amended by striking out the word "nor" and inserting in lieu thereof the word "or".

EFFECTIVE DATE

SEC. 15. The amendments made by this Act shall become effective six months after the date of enactment of this Act.

Mr. CRANSTON. Mr. President, I rise to explain briefly a qualification to my cosponsorship of S. 2487, a bill introduced today by the distinguished chairman of the Labor Subcommittee, the junior Senator from New Jersey, to amend the Longshoremen's and Harbor Workers' Compensation Act, and for other purposes.

I fully agree with Senator WILLIAMS that the substantive revisions made in the bill are long overdue in order to provide economic comparability to the injured longshoreman and harbor worker and their families and to correct other deficiencies in the present act. At the same time, however, I am not fully convinced of the justification of the amount of the dollar increases in sections 4 and 10 of the bill, relating to the minimum and maximum weekly disability benefit rates and dependent death benefit rates, respectively, in terms of the level of similar compensation under the workmen's compensation laws of the many States.

I expect to follow the hearings on this bill carefully before reaching a judgment

on the appropriate amount of such increases and will welcome the presentation of all views on this or any other issue raised by the bill.

SENATE JOINT RESOLUTION 127—INTRODUCTION OF A JOINT RESOLUTION RELATING TO INTERNATIONAL PETROLEUM EXPOSITION

Mr. HARRIS. Mr. President, I introduce, for myself and for the junior Senator from Oklahoma, a joint resolution authorizing the President to invite the States of the Union and foreign nations to participate in the International Petroleum Exposition to be held in Tulsa, Okla., from May 15 to May 23 in 1971.

The most important aspect of this exposition is not the impetus it gives to an already thriving and productive oil industry in Oklahoma, nor is it even the benefit it brings to the petroleum industry nationally. The greatest contribution of the International Petroleum Exposition is that it is truly international. Over the past two decades it has welcomed the representatives of over 50 nations throughout the world and stands as a dynamic and working symbol of cooperation in an all-important sphere.

I stress international, for I know that what is traded goes beyond technical ideas and modern equipment. An integral part of the exposition has always been a practical exchange of international good will.

The International Petroleum Exposition in Tulsa, the oil capital of the world, is a forum for progress which helps oilmen throughout America. It benefits us all even more by aiding those nations in the developing world who may leave it better able to seek the kind of progress which America's petroleum industry has offered to all of us.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 127) authorizing the President to invite the States of the Union and foreign nations to participate in the International Petroleum Exposition to be held at Tulsa, Okla., from May 15, 1971, through May 23, 1971, introduced by Mr. HARRIS (for himself and Mr. BELLMON), was received, read twice by its title, and referred to the Committee on Foreign Relations.

SENATE JOINT RESOLUTION 128—INTRODUCTION OF A JOINT RESOLUTION AUTHORIZING THE PRESIDENT TO DESIGNATE A WEEK OF EACH YEAR AS VOLUNTEER WEEK

Mr. HARRIS. Mr. President, I introduce, for appropriate reference, a joint resolution designating the first week in April as Volunteer Week.

Motivated by their deep concern for their communities and their country, millions of volunteers throughout the United States serve without pay in the fields of health, recreation, education, welfare, culture, community action, and politics. This common desire to serve draws volunteers of all ages, from all neighborhoods, from all ethnic groups, all religious and all political persuasions. They serve at all hours of day and night, many being on call 24 hours a day, such as volunteer firemen, those serving in suicide prevention or with other distressed persons. They share their many talents and skills on highly sophisticated jobs or on simple but necessary jobs.

Accordingly to a recent Gallup poll, 69 million people are prepared to donate their time and energies to some form of volunteer effort. Of these, 60 percent said they would be willing to serve in dealing with local problems such as housing, recreation, traffic, welfare, or health.

The contribution being made by volunteers throughout this Nation is truly outstanding. This contribution should be recognized and accordingly I offer the joint resolution to designate a week of each year as Volunteer Week.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 128) to authorize the President to issue annually a proclamation designating the 7-day period beginning on the first Sunday in April of each year as "Volunteer Week," was received, read twice by its title, and referred to the Committee on the Judiciary.

ADDITIONAL COSPONSORS OF BILLS AND JOINT RESOLUTIONS—REMOVAL OF COSPONSOR OF JOINT RESOLUTION

S. 745

Mr. McGOVERN. Mr. President, I ask unanimous consent that, at its next printing, the name of the senior Senator from Texas (Mr. YARBOROUGH) be added as a cosponsor of the bill (S. 745) to amend the Agriculture Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 1790

Mr. YOUNG of North Dakota. Mr. President, I ask unanimous consent that, at its next printing, the name of the Senator from Texas (Mr. YARBOROUGH) be added as a cosponsor of the bill (S. 1790) to amend the act of August 7, 1956 (70 Stat. 1115), as amended, providing for a Great Plains conservation program.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2073 AND S. 2074

Mr. SCOTT. Mr. President, at the request of the Senator from Illinois (Mr. DIRKSEN), I ask unanimous consent that, at their next printing, the name of the Senator from Idaho (Mr. CHURCH) be added as a cosponsor of the bills (S. 2073) to prohibit the use of interstate facilities, including the mails, for the transportation of certain materials to minors, and (S. 2074) to prohibit the use of interstate facilities including the mails for the transportation of salacious advertising.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2375

Mr. CASE. Mr. President, on June 12 I introduced for Senator HART and myself S. 2375, a bill to amend the Civil Rights Act of 1964 to authorize the Attorney General to initiate school desegregation suits based on his finding that discrimination exists in a school district.

Since then a number of other Senators have expressed a desire to cosponsor this bill. Therefore, I ask unanimous consent that, at its next printing, the names of the Senator from Hawaii (Mr. INOUYE), the Senator from Pennsylvania (Mr. SCOTT), the Senator from South Dakota (Mr. McGOVERN), the Senators from Oregon (Mr. HATFIELD and Mr. PACKWOOD), the Senators from Wisconsin (Mr. PROXMIRE and Mr. NELSON), the Senator from Minnesota (Mr. MONDALE), the Senator from Massachusetts (Mr. BROOKE), and the Senators from New York (Mr. JAVITS and Mr. GOODELL) may be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2470

Mr. SCOTT. Mr. President, I ask unanimous consent that, at its next printing, the names of the Senator from West Virginia (Mr. RANDOLPH) and the Senator from Oregon (Mr. PACKWOOD) be added as a cosponsor of the bill (S. 2470) to amend the Food Stamp Act of 1964 to authorize elderly persons to exchange food stamps under certain circumstances for meals prepared and served by private nonprofit organizations, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

S.J. RES. 19

CORRECTION OF S.J. RES. 7

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that, at their next printing, the name of the Senator from Wisconsin (Mr. PROXMIRE) be added as a cosponsor of the joint resolution (S.J. Res. 19) proposing an amendment to the Constitution of the United States, extending the right to vote to citizens 18 years of age or older, and that his name, which was inadvertently added to the joint resolution (S.J. Res. 7) be removed as a cosponsor of that measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF THE GREAT PLAINS CONSERVATION PROGRAM

Mr. YARBOROUGH. Mr. President, on January 15, 1969, the Senator from South Dakota (Mr. McGOVERN) and others, of whom I was one, introduced a bill in the Senate to extend the Great Plains conservation program for 10 years. The names of the cosponsors of that bill are as follows: Mr. McGOVERN, Mr. ANDERSON, Mr. BURDICK, Mr. DOLE, Mr. HARRIS, Mr. McGEE, Mr. MANSFIELD, Mr. METCALF, Mr. MONTOYA, Mr. NELSON, Mr. PEARSON, Mr. TALMADGE, and myself.

At the conference of the subcommittee of the Committee on Appropriations this week, it was agreed in the Appropriations Committee that a composite Great Plains conservation bill would be reported to the Senate by the Committee on Agriculture, cosponsored by all Senators who had cosponsored any of the several Great Plains bills now pending in the Senate.

The bill was reported June 24, 1969, committee report No. 91-269, Calendar 260, S. 1790, but by a clerical error several Senators' names were omitted as cosponsors, including my name. I ask unanimous consent that my name be added as a cosponsor of S. 1790, and that the bill, as so corrected, be printed in full at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill, ordered to be printed in the RECORD, is as follows:

S. 1790

A bill to amend the Act of August 7, 1956 (70 Stat. 1115), as amended, providing for a Great Plains conservation program

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 16(b)(1) of the Soil Conservation and Domestic Allotment Act, as amended, is amended to read as follows:

"(1) the Secretary is authorized, within the amounts of such appropriations as may be provided therefor, to enter into contracts of not to exceed ten years with owners and operators of land in the Great Plains area having such control as the Secretary determines to be needed of the farms, ranches, or other lands covered thereby; but such contracts shall be entered into with respect to lands, other than farms or ranches, only where erosion is so serious as to make such contracts necessary for the protection of farm or ranch lands. Such contracts shall be designed to assist farm, ranch, or other land owners or operators to make, in orderly progression over a period of years, changes in their cropping systems or land uses which are needed to conserve, develop, protect, and utilize the soil and water resources of their farms, ranches, and other lands and to install the soil and water conservation measures and carry out the practices needed under such changed systems and uses. Such contracts may be entered into during the period ending not later than December 31, 1981, with respect to farms, ranches, and other lands in counties in the Great Plains area of the States of Colorado, Kansas, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming, designated by the Secretary as susceptible to serious wind erosion by reason of their soil types, terrain, and climatic and other factors. The land owner or operator shall furnish to the Secretary a plan of farming operations or land use which incorporates such soil and water conservation practices and principles as may be determined by him to be practicable for maximum mitigation of climatic hazards of the area in which such land is located, and which outlines a schedule of proposed changes in cropping systems or land use and of the conservation measures which are to be carried out on the farm, ranch, or other land during the contract period to protect the farm, ranch, or other land from erosion and deterioration by natural causes. Such plan may also include practices and measures for (a) enhancing fish and wildlife and recreation resources (b) promoting the economic use of land, and (c) reducing or controlling agricultural related pollution. Inclusion in the farm plan of these practices shall be the exclusive decision of the land owner or operator. Approved conservation plans of land owners and operators developed in cooperation with the soil and water conservation district in which their lands are situated shall form a basis for contracts. Under the contract the land owner or operator shall agree—

"(i) to effectuate the plan for his farm, ranch, or other land substantially in accordance with the schedule outlined therein unless any requirement thereof is waived or modified by the Secretary pursuant to paragraph (3) of this subsection;

"(ii) to forfeit all rights to further payments or grants under the contract and refund to the United States all payments or grants received thereunder upon his violation of the contract at any stage during the time he has control of the land if the Secretary, after considering the recommendations of the soil and water conservation district board, determines that such violation is of such a nature as to warrant termination of the contract, or to make refunds or accept such payment adjustments as the Secretary may deem appropriate if he determines that the violation by the owner or operator does not warrant termination of the contract;

"(iii) upon transfer of his right and interest in the farm, ranch, or other land during the contract period to forfeit all rights, to further payments or grants under the contract and refund to the United States all payments or grants received thereunder unless the transferee of any such land agrees with the Secretary to assume all obligations of the contract;

"(iv) not to adopt any practice specified by the Secretary in the contract as a practice which would tend to defeat the purposes of the contract;

"(v) to such additional provisions as the Secretary determines are desirable and includes in the contract to effectuate the purposes of the program or to facilitate the practical administration of the program.

In return for such agreement by the landowner or operator the Secretary shall agree to share the cost of carrying out those conservation practices and measures set forth in the contract for which he determines that cost sharing is appropriate and in the public interest. The portion of such cost (including labor) to be shared shall be that part which the Secretary determines is necessary and appropriate to effectuate the physical installation of the conservation practices and measures under the contract."

SEC. 2. Section 16(b)(2) of said Act is amended to read:

"(2) the Secretary may terminate any contract with a landowner or operator by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest, and may agree to such modification of contracts previously entered into as he may determine to be desirable to carry out the purposes of the program or facilitate the practical administration thereof or to accomplish equitable treatment with respect to other similar conservation, land use, or commodity programs administered by the Secretary,

SEC. 3. Section 16(b)(7) of said Act is amended to read:

"(7) there is hereby authorized to be appropriated without fiscal year limitations, such sums as may be necessary to carry out this subsection: *Provided*, That (A) during the period ending December 31, 1971, (i) the total cost of the program (excluding administrative costs) shall not exceed $150,000,000, and (ii) for any program year payments shall not exceed $25,000,000; and (B) during the period beginning January 1, 1972, (i) the total cost of the program (including administrative costs) shall not exceed $250,000,000, and (ii) the cost of the program for any year (including administrative costs) shall not exceed $25,000,000. The funds made available for the program under this subsection may be expended without regard to the maximum payment limitation and small payment increases required under section 8(e) of this Act, and may be distributed among States without regard to distribution of funds formulas of section 15 of this Act. The program authorized under this subsection shall be in addition to, and not in substitution of, other programs in such area authorized by this or any other Act."

Amend the title so as to read: "An Act to amend section 16(b) of the Soil Conservation and Domestic Allotment Act, as amended, providing for a Great Plains conservation program."

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, June 25, 1969, he presented to the President of the United States the enrolled joint resolution (S.J. Res. 123) to extend the time for the making of a final report by the Commission To Study Mortgage Interest Rates.

DEVELOPMENT AND IMPROVED MANAGEMENT OF NATIONAL FOREST COMMERCIAL TIMBERLANDS—AMENDMENTS

AMENDMENTS NOS. 50, 51, AND 52

Mr. BENNETT. Mr. President, I rise to submit three amendments, intended to be proposed by me, to S. 1832, a bill which I have cosponsored with the distinguished chairman of the Banking and Currency Committee, the distinguished majority leader, and several others of my Senate colleagues.

I wish again to reiterate my support for the overall approach contained in the National Timber Supply Act of 1969. The hearings conducted by the Housing Subcommittee of the Banking and Currency Committee on the high cost of plywood and other lumber certainly showed the need for immediate action by the Federal Government. I again call upon the administration to make its legislative desires known to the Congress. I trust the Senate Agriculture Committee will also move quickly on S. 1832.

The first amendment which I offer deals with section 5 of the bill. Under the bill language, lumber revenue moneys credited to the special Treasury fund are available only when appropriated therefore, by Congress. I feel this approach leaves us basically where we are today. While section 5 would set up a fund, we have no guarantee that timber revenue money would be available for improved management procedures and practices in our national forests.

My amendment to section 5 simply makes the money in the fund available for expenditures by the Secretary of Agriculture, until and unless the right to use the money is suspended in whole or in part by the Congress. Of necessity, the first sentence of section 6 is also amended to strike out the appropriation reference to section 5.

The PRESIDING OFFICER. The amendment will be received, printed, and appropriately referred.

The amendment (No. 50) was referred to the Committee on Agriculture and Forestry.

Mr. BENNETT. Mr. President, my second amendment will be added to the end of section 6 and authorizes the Secretary of Agriculture to transfer funds generated by one national forest for use in other national forests. I realize that there is concern about this prospect, but I think such an amendment is absolutely necessary. We obviously have some national forests in better condition than others, and I think it would be unwise to overmanage a given national forest simply because funds generated by the particular area cannot be used elsewhere.

I think the specific national forests are protected by the language which requires the Secretary of Agriculture to

determine that there is an excess of funds before any transfer can be made.

The PRESIDING OFFICER. The amendment will be received, printed, and appropriately referred.

The amendment (No. 51) was referred to the Committee on Agriculture and Forestry.

Mr. BENNETT. Mr. President, my third amendment is in the form of a new section at the end of the bill which requires the Secretary of Agriculture to submit a report to the Congress not later than January 31 of each year, regarding the expenditures under this act during the preceding fiscal year. The report would also include plans and estimates for the next fiscal year.

The PRESIDING OFFICER. The amendment will be received, printed, and appropriately referred.

The amendment (No. 52) was referred to the Committee on Agriculture and Forestry.

NOTICE CONCERNING NOMINATION BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nomination has been referred to and is now pending before the Committee on the Judiciary:

Wade H. Ballard, III, of West Virginia, to be U.S. attorney for the southern district of West Virginia for the term of 4 years, vice Milton J. Ferguson.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee, in writing, on or before Wednesday, July 2, 1969, any representations or objections they may wish to present concerning the above nomination, with a further statement whether it is their intention to appear at any hearing which may be scheduled.

NOTICE OF HEARING

Mr. YARBOROUGH. Mr. President, I wish to announce that the Committee on Labor and Public Welfare will hold a public hearing on the nomination of Luther Holcomb to be a member of the Equal Employment Opportunity Commission on Monday, June 30, 1969, at 9 a.m. in room 4232 New Senate Office Building.

CONTINUATION OF SUSPENSION OF DUTY ON HEPTANOIC ACID

Mr. LONG. Mr. President, from the Committee on Finance I report H.R. 4229 with a committee amendment to continue the 10-percent surtax withholding schedules in effect for 1 additional month. I ask unanimous consent that the Senate proceed to the consideration of the bill (H.R. 4229).

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 4229) to continue for a temporary period the existing suspension of duty on heptanoic acid, reported with an amendment, after line 6 to insert a new section, as follows:

SEC. 2. (a) Section 3402 of the Internal Revenue Code of 1954 (relating to income tax collected at source) is amended—

(1) by striking out "June 30, 1969" in subsection (a)(1) and inserting in lieu thereof "July 31, 1969";

(2) by striking out "July 1, 1969" in subsection (a)(2) and inserting in lieu thereof "August 1, 1969"; and

(3) by striking out "July 1, 1969" in subsection (c)(6) and inserting in lieu thereof "August 1, 1969".

(b) The amendments made by subsection (a) shall apply with respect to wages paid after June 30, 1969.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana?

There being no objection, the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. EAGLETON in the chair). Without objection, it is so ordered.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting a nomination was communicated to the Senate by Mr. Leonard, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The PRESIDING OFFICER laid before the Senate a message from the President of the United States submitting the nomination of Nicholas Costanzo, of New York, to be Superintendent of the U.S. Assay Office at New York, N.Y., which was referred to the Committee on Banking and Currency.

CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1970

Mr. RUSSELL. Mr. President, I understand that the favorable report of the Committee on Appropriations on House Joint Resolution 790 has been filed at the desk. This is a joint resolution to enable the departments of Government to continue to function in the absence of their regular appropriations bills.

Mr. President, I ask unanimous consent that the joint resolution may be considered.

Mr. LONG. Mr. President, will the Senator yield?

Mr. RUSSELL. I yield.

Mr. LONG. Mr. President, I would suggest that the Senator's request be amended to provide that the pending business (H.R. 4229) be temporarily laid aside, and that it will again become the business of the Senate after the consideration of the joint resolution has been concluded.

Mr. RUSSELL. It would automatically come back before the Senate.

Mr. President, I ask unanimous consent that the pending business be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution will be stated.

The BILL CLERK. A joint resolution (H.J. Res. 790) making continuing appropriations for the fiscal year 1970.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. RUSSELL. Mr. President, the Committee on Appropriations met this morning and, in view of the fact that the present fiscal year will come to a close at midnight next Monday, June 30, authorized the chairman of the committee to call up the joint resolution at today's session of the Senate.

House Joint Resolution 790 provides funds and authority for the continuation of those programs and activities of the Federal Government for which appropriations for the fiscal year ending June 30, 1970, have not been enacted. Specifically, the joint resolution continues funds available until October 31, 1969, or until the enactment of the regular annual appropriation bills.

As of today, the House of Representatives has passed three regular appropriation bills—the Agriculture, Treasury-Post Office-Executive Office, and Independent Offices and Department of Housing and Urban Development appropriation bills for the fiscal year 1970.

This morning, the Committee on Appropriations met and ordered reported to the Senate the Department of Agriculture appropriation bill, which was reported by the Senator from Florida (Mr. HOLLAND). The Treasury-Post Office-Executive Office appropriation bill was also ordered to be reported by the Senator from Texas (Mr. YARBOROUGH). In summary, then, 10 regular annual bills have yet to be reported by the House committee. The Senate committee is engaged in hearings on several bills; however, the actual bills are not before the committee at this time.

In view of the status of the provisions for the operation of the executive offices of Government, and because of the proposed congressional recess during the month of August, the committee felt that the expiration date provided in this joint resolution—October 31—was by no means unrealistic.

Mr. President, the joint resolution provides as follows:

In those instances where an appropriation bill has passed both Houses of the Congress, but has not yet been enacted, and the amounts or authority therein differ, the pertinent project or activity shall be continued under the lesser of the two amounts and the more restrictive authority.

If an appropriation bill has passed only one House, or if an item is included in only one version of the bill as passed by both Houses, the pertinent project or activity shall be continued at a rate for operations not exceeding the fiscal 1969 rate or the rate permitted by the one House, whichever is lower.

In those instances where neither House has passed the particular appropriation bill, appropriations are provided for continuing projects or activities con-

ducted during fiscal year 1969 at the current rate, or the rate provided in the budget estimate for fiscal year 1970, whichever is lower, and under the most restrictive authority. In addition, in this latter instance, if there is no budget estimate for a particular item but it is a continuing program from fiscal year 1969, special provision is made in the resolution for minimum continuation until the matter is resolved in the processing of the regular appropriation bill affecting the activity.

As in other continuing resolutions, any obligations or expenditures incurred pursuant to the authority granted in this resolution will be charged against the applicable appropriation when the bill in which such funds or authority are contained is enacted into law.

Mr. President, it seems to me to be imperative that if the executive branch of the Government is to function, the joint resolution should be passed. I therefore urge the passage of House Joint Resolution 790.

The PRESIDING OFFICER. The joint resolution is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

CONTINUATION OF SUSPENSION OF DUTY ON HEPTANOIC ACID

The Senate resumed the consideration of the bill (H.R. 4229) to continue for a temporary period the existing suspension of duty on heptanoic acid.

The PRESIDING OFFICER. The clerk will state the committee amendment to the pending bill.

The bill clerk read as follows:

SEC. 2. (a) Section 3402 of the Internal Revenue Code of 1954 (relating to income tax collected at source) is amended—

(1) by striking out "June 30, 1969" in subsection (a)(1) and inserting in lieu thereof "July 31, 1969";

(2) by striking out "July 1, 1969" in subsection (a)(2) and inserting in lieu thereof "August 1, 1969"; and

(3) by striking out "July 1, 1969" in subsection (c)(6) and inserting in lieu thereof "August 1, 1969".

(b) The amendments made by subsection (a) shall apply with respect to wages paid after June 30, 1969.

Mr. LONG. Mr. President, the amendment is to a bill to continue the suspension of duty on heptanoic acid. It is not a controversial bill—I am sure it would pass on the Consent Calendar. The amendment is more significant. It is one which would provide a 1-month extension of the existing withholding tax rate.

Mr. President, the amendment is necessary if the House is to be permitted the necessary time to send us a revenue bill, on which it has been working for 7 months now. We shall endeavor to report within that time limit, if we can, but that may be difficult for the Senate committee to do. We may have to ask for more time, but it is agreed within the Finance Committee, that when we report the bill, we will also report recommendations with regard to tax reform.

We invite all Senators who have amendments they would like to offer on the subsequent bill, should the House send it to us, to make their amendments available to the Committee on Finance and to be prepared to appear with any witnesses they may want to bring in who will support their positions on the tax reform proposals in which they are interested.

The committee, in voting for the 30-day extension, voted for what it believed will be a major tax reform. We intend to repeal the investment tax credit as of April 18, which is the House date. It is our judgment that the investment tax credit cannot be justified, and we intend to vote to repeal it with that effective date. We therefore thought that all Senators interested should know about it. That will be the committee recommendation. Of course, Senators can offer other amendments, but it was the consensus of the committee that we should make clear, at least in reporting on this matter, that we intend to recommend that position on the investment tax credit.

Please understand, Mr. President, that what we are talking about here is not an extension of the tax, but merely an extension of the withholding. If it should be the judgment of the House or Senate, as the case may be, that the existing surtax of 10 percent should not be continued, then there would be a rebate owed to the taxpayers by the Secretary of the Treasury, when returns are filed next year, for the overwithholding which would result as a matter of continuing this tax rate for an additional 1 month.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Louisiana yield?

Mr. LONG. I yield.

Mr. WILLIAMS of Delaware. I support the position of the committee as outlined by its chairman. The approval of this 31-day extension does not in any way mean an extension of the tax rate itself, nor does it commit anyone to the surtax or to the extension thereof. It merely extends the same withholding tables for a period of 30 days in order to give Congress an opportunity to work its will between now and the end of that period.

As the chairman points out, should, perchance, there be no extension of the surtax it would mean that the taxpayers would have overpaid and would have that much extra credit at the end of the next fiscal year when they face up to the full tax obligation.

I think that this is a measure which must pass. It needs to be passed immediately in order to avoid business companies having to change their computers with new withholding tables, which could possibly be reversed in the next few days when Congress acts on the extension of the surcharge.

Mr. LONG. Basically this is an amendment to avoid chaos and confusion while Congress acts on the matter.

Mr. WILLIAMS of Delaware. That is correct.

Mr. DIRKSEN. Mr. President, will the Senator from Louisiana yield?

Mr. LONG. I yield.

Mr. DIRKSEN. Mr. President, this is a matter of transcendent importance. Business and industry now resort to computer devices in order to figure out all the withholdings, and to change over is a colossal job and extremely expensive. Just an instance in point, with respect to the Treasury Department forms, if they had to be done over to meet the situation, the cost would be approximately a quarter of a million dollars. For industry and business, it would be even more expensive. So the measure must be passed in order to avoid confusion.

I want to add my voice, also, and say that, when we get around to it, the surtax also must be approved, because its impact on the economy will be enormous. I think we had better face up to it, first and last.

Mr. HARTKE. Mr. President, will the Senator from Louisiana yield?

Mr. LONG. I yield.

Mr. HARTKE. I should like to ask the Senator from Louisiana exactly what is the full implication of this proposal. Is it an implied consent that the surtax will be continued and that the intention is to remedy the financial and fiscal crises, which will provide for some kind of tacit approval of what has been going on in the past year?

Last year, during his campaign, President Nixon said that the surtax would be allowed to expire on June 30, 1969. I know that he has changed his mind, but I personally think he was right when he made that statement. I agreed with him at the time he made it, and I agree with him today. It appears to me that this measure takes as a basic assumption the fact that the tax will be continued.

The question left, then, is whether other amendments concerning reform measures will be added to this tax as it ultimately comes over to us from the House. As I have indicated to the chairman of the committee, I want to be recorded as voting against this proposal, and any other kind of gadgetry which is being proposed.

There is plenty of time. The President repudiated his campaign pledge earlier this year. One of the first things he did after he entered the White House was to repudiate his campaign pledge regarding the surtax. Who convinced him of that, I do not know. Someone advised him, I am sure.

The surtax was justified on three grounds. One was that it would reduce the interest rate. It does not take an expert to know that interest rates are now at a historic high, and there is indication it will go still higher. The second point was that it would reduce the cost of living. The only satisfying aspect about the cost of living figures that were released yesterday was the fact that they were the lowest of the year, but for the entire year of 1969, they have shown a tremendous inflationary rise which has been fired, in my opinion, by restrictive, artificial restraints placed on the gigantic economic machine of the American business community, and all we are doing is adding to the confusion.

So what happened? The cost of living for April and May increased the most it ever has in 18 years.

The third thing the advocates of the surtax said—and I argued against this at the time—was that it would obviate the necessity for an increase in the na-

tional debt limit. The first message President Nixon sent to Congress was a request that demonstrated the complete absurdity and stupidity of the surtax. The first message that came to us asked for a $12-billion increase in the national debt ceiling.

Here was a program the administration had been selling on three basic points. Not only has it failed on all three points; it has put our financial condition and the whole financial community in turmoil.

These prophets of gloom and doom are trying to force the American economy to its knees, trying to make it genuflect, and to put into practice some artificial theories. They have come before us at the last minute and have said, "We have to have this emergency measure to keep the country going."

I would be the last one to say we ought to force business to change the withholding rates, but I want to know if there is, on the part of the leadership of the Republican or the Democratic Party, an admission that implies, tacitly or otherwise, consent to the extension of the surtax. I do not want to be on record as doing that. I want to try to make it possible to pass a tax reform bill. I want to try to bring down the cost of living to relieve the credit crunch which is on us. I want to bring down the interest rates.

I would like to have an admission that the passage of this measure is not to be construed as an implication that we are going to go along with the surtax extension.

Mr. LONG. Mr. President, so far as I am concerned, a vote for this measure does not bind any Senator to vote for the surtax. All the measure does is extend the 10-percent withholding rate for 31 days—to be precise, from June 30 to July 31. If the Senator wishes, he can vote against the measure; but he need not be concerned that anyone will owe any more taxes. If the measure passes, and the Senate or the House, as the case may be, should decide it does not want to pass the surtax extension, the taxpayers would be entitled to have the additional amount which they paid as a result of the continuing rates refunded to them when they filed their returns at the end of the year.

So the measure does not commit the Senate, nor will it commit the House, if it is passed in the House, to an extension of the surcharge. It merely gives Congress the time to act. It only continues the withholding tax rate, and does not commit the Senate or the House, if it is passed, to extend the surtax. If the House did not want to pass such a bill, it could vote it down.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. MANSFIELD. Mr. President, the present proposal to extend the present withholding tax rates for 31 days is to afford an opportunity for the House of Representatives to pass the surtax extension within that period of time.

Yesterday, at the luncheon meeting of the majority policy committee, it was voted unanimously to have a 3-month extension of the withholding rates, during which time a full review of reform could be accomplished in an orderly legislative manner.

The full text of the resolution which was adopted by the policy committee is as follows:

Whereas, the Senate Majority Policy Committee, having met and considered the matter of the extension of the income tax surcharge, hereby resolves:

That meaningful tax reforms should be adopted as a means of achieving an equitable national income tax policy, and further resolves,

That any proposal to extend the income tax surcharge be considered simultaneously with recommendations on meaningful tax reform and further resolves,

That the present income tax withholding rates be continued after June 30, 1969 for a period of one quarter to permit full consideration and disposition of the reform and extension of the surtax.

Mr. President, with the passage of this bill today, the Senate is taking no action that is inconsistent with the action of the policy committee yesterday. Because of the timing of the decision arrived at by the policy committee on yesterday, it was not possible to report to the full Democratic caucus the matters which have since developed in the Finance Committee, nor was is possible to report the action taken by the Democratic policy committee yesterday to the distinguished minority leader for his edification and the edification of his colleagues.

It is still the hope of the leadership that prior to the passage of any surtax for another year, meaningful tax reform will be considered simultaneously.

Therefore, if and when the House of Representatives passes the extension of the surtax and the measure arrives in the Senate, it is the Senate's intention to seek, if necessary, a further extension of the withholding rates to permit a full review of meaningful tax reform in an orderly legislative manner by the appropriate Senate committee.

It is noted that the chairman of the Finance Committee, now managing the bill, the Senator from Louisiana (Mr. LONG), attended yesterday's meeting of the policy committee and joined in its deliberations. The action about to be taken today is interpreted as totally consistent with the sentiment of those deliberations.

Mr. HARTKE. Mr. President, will the Senator yield to me, because this is the question I was asking?

Mr. MANSFIELD. I yield.

Mr. HARTKE. In other words, so far as the policy committee is concerned, it does not give consent to the extension of the surtax, implied, tacit, or in any fashion whatsoever? All that the policy committee has said, as I understand it, in substance, is that it is going along with the continuation of the withholding rates at the present level until such time as the Finance Committee can proceed to have hearings, not alone on the surtax, but also on meaningful reform in the field of taxation? Is that correct?

Mr. MANSFIELD. That is correct.

Mr. HARTKE. Coming back to the question about being bound, I want to make it perfectly clear that, I or any other Senator are not bound, as a result of the Senate's action today. If any Senator comes back and says, "Well, we have agreed in substance that the surtax is going to be extended, the only reservation being that there must be meaningful reforms passed with it," that will not be a correct statement of the Senate's action today. I did not want to get into that trap.

Mr. MANSFIELD. No Senator is bound in any way by the passage of this bill. His freedom of action is preserved.

Mr. HARTKE. I want to make it clear to the ranking minority member of the committee, as well as to the chairman, that by taking this action at this time, statements will not come back from the Finance Committee to the effect that we have in substance agreed that there would be an extension of the surtax, but the only thing that would be left would be amendments attached thereto.

As the Senator from Delaware and the Senator from Louisiana know, I have given consideration even to attaching to a tax bill, whenever it comes before us, if there is one, proposals for the modernization of social security.

What I am asking, therefore, is merely to know whether or not, in the consideration of the bill, there is any implied or tacit agreement that the surtax extension itself would not be left open for dispute or discussion or that this action was in fact approval of the need for extension of the surtax.

I would like to know the opinion of the chairman of the committee and the ranking minority member in that regard.

Mr. LONG. Mr. President, the amendment preserves entirely the right of the Senator from Indiana and, for that matter, of any other Senator to oppose any extention of the surtax whatever. It does not commit even the Finance Committee, or any member of it, to vote for an extension of the surtax. It is not a consent type of arrangement whatever. It is an extension of the existing tax rate for withholding purposes long enough to give the House, and hopefully the Senate, an opportunity to take action on the surtax bill on its own merits.

The policy committee acted yesterday, expecting that the House would be voting on its tax bill today. That is not going to be the case, according to what I read in the newspapers, and what I hear from House Members. So we do not know how many of the 30 days we are asking for that the House will actually consume. But it is clear that at least 30 days will be needed for the Senate to act. We will do the best we can in the time available to us.

The resolution of the policy committee indicated that we should report within the quarter, which would be 92 days. We were hoping to report prior to that time. We would expect to recommend meaningful tax reform. We voted in the committee that we intend to recommend a repeal of the investment credit as one of the meaningful tax reforms we have in mind.

Mr. HARTKE. Mr. President, will the Senator yield at that point?

Mr. LONG. I yield.

Mr. HARTKE. Are we committed to that proposition? Is that an implied statement or direct statement that repeal of the investment credit is going to be attached to the bill as an important tax reform? I know that economists will come before us, and one of them will be Mr. Pierre A. Rinfret, who was Mr. Nixon's adviser, and he will say

that if we repeal the investment credit we will be doing the wrong thing. He will say that such a tax change would be a step in the wrong direction.

Mr. LONG. So what we voted, as I understand it, in that connection—and that is not a part of the resolution; that is simply in the committee report—was that a majority of the committee intend to recommend to the Senate, the repeal of the investment credit. But that does not bind any members of the committee who wants to vote otherwise. I think I can say to the Senator that it is the sentiment of the committee, and a consensus of a majority of the committee, that we intend to make that recommendation on one bill or another, even if the House of Representatives does not send us this one.

Mr. HARTKE. So we have taken a position to vote, in the committee, without a hearing, without any testimony whatsoever, and the committee has made a decision already, without any hearings, as to whether or not this is in the best interests of the Nation's economy.

We have not had any growth in this country for years. Since 1966, the wage earner of the United States has not had a real increase in his take-home pay, to enable him to purchase more groceries or to help him pay his rent. His prices are going up and up, and he cannot make ends meet.

Mr. President, I want to change that policy. I do not want to keep the country on this merry-go-round. I want to get away from this bad economic policy, and start doing business the American free enterprise system way, to move this gigantic machine forward, and let it pay its bills. We demonstrated for 4 years before the adoption of present invalid economic theories that such unrestricted economy policies would work.

We have followed the yo-yo system on the investment tax credit: we put it on; we took it off; we were going to take it off for a year; but within 6 months we put it right back on. Now we are proposing to take it off again. We have done the same thing with the excise taxes. We have been ruled by indecision. I wonder how the poor businessman, or the man trying to keep his family going, could keep on a budget under such circumstances, if he had one.

But I do want assurance that this amendment carries with it no implied consent on the part of the Finance Committee that by its adoption we are going on record as favoring the continuation of the surtax.

I would like the surtax to die now, and be given a decent burial. But I am sure the Senate is going to agree to this amendment. I understand that fully. But I want to make it crystal clear that this is not, in effect, an implied consent, whether we say so or not, that the surtax shall continue.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. HARTKE. I yield.

Mr. WILLIAMS of Delaware. The chairman has already emphasized, and I concur, that the adoption of this amendment does not in any way bind any Senator, whether he be a member of the committee or not, on his vote on the surtax proposal, or on the investment tax credit when they come before the Senate.

As to the suggestion by the Senator from Indiana regarding his desire to have a chance to work for meaningful tax reform, at the White House yesterday, as the minority leader can substantiate, I made this same point. I stated that when this tax bill comes before the Senate certain tax reforms will be considered, and I personally have some of them in mind. I mentioned specifically the one on which the Senator from Indiana and I always concur; and that is, to reduce the depletion allowance which favors some industries.

I welcome the Senator's support, I shall be with him in trying to accomplish that, as well as many other proposals, when the time comes. The Senator from Indiana will be afforded by both the chairman of the committee and the rest of us ample opportunity to present any proposal he may wish as an amendment to the tax bill when it comes over from the House of Representatives. The approval of this 30-day extension of the withholding rate does not in any way bind him or any other Senator as to what he will do at that time.

Mr. HARTKE. Following that just one step further, we have had indications from the chairman of the Committee on Ways and Means that he does not intend to hold hearings on social security.

Inflation is like an open, running ulcer in this country; and the biggest sore, as far as the people are concerned, is that being suffered by the elderly people on social security who, even if they receive the 7-percent increase that President Nixon has recommended—which I think is too small—it would be eaten up by the end of the year. They will be in worse shape than they are now. Is there any type of assurance we can receive from the chairman of the committee and the ranking minority member, who speaks for the administration, that we will see some efforts made to provide some relief this year for the people on social security? We are willing to tax the people, but are we willing to take care of those people who are hurt worst by inflation?

Mr. WILLIAMS of Delaware. Mr. President, I cannot say what the House of Representatives will do about hearings, but there will be an opportunity to offer any proposals here as amendments if they have not already included such provisions in the bill.

I share the concern of the Senator from Indiana over the manner in which the elderly citizens of this country have been pauperized over the past few years as a result of the inflationary spiral. I suggest that the best manner to correct that inflationary spiral is for the Senator to join those of us who are trying to hold the Government's expenditures within its income.

As long as Congress continues to spend, as we have done in the past 6 years, an average of about $8 to $10 billion a year more than we take in we are gradually not only bankrupting the country but pauperizing the elderly by creating this inflation. As a Member of the Senate I assure the Senator that I shall lead the effort to roll back some of the expenditures of this Government so that we can live within our income. Really, that is the only way to curb inflation, not just expressing concern or sympathy, for sympathy does not taste very good when it is all you have to put on the table.

Let us give them some real relief from the ravages of inflation. That can only be done by you and me and other Senators joining together in cutting down the cost of this Government, which is completely out of hand. I assure the Senator I shall be there voting for these reductions, and I hope we can have his support.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. GORE. Mr. President, I concur in the statement made by the distinguished majority leader that the intent of the amendment is not in any sense inconsistent with the resolution of the policy committee, because the intent of the policy committee was to preserve and reserve fully the right of the Senate, and to assert the intention of the Senate, to consider tax reform with respect to and in connection with the extension of the surtax.

The pending amendment, as the distinguished chairman has pointed out, does not extend the surtax even for 30 days. It merely relates to the withholding tables; and I concur in the action of the committee, as well as the statement of the majority leader.

Mr. HARRIS. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. HARRIS. Mr. President, a representative of the administration, the Secretary of the Treasury, Mr. Kennedy, appeared before the Committee on Finance today, and requested that the Senate amend a House revenue measure to extend the present withholding rates under the 10-percent surcharge, and send that back to the House of Representatives, so that they could act upon it before the end of this fiscal year.

I think that has both its good and its bad aspects. It would have been better if the administration had acceded to that kind of request on the part of a great many people earlier, when this matter was before the House Committee on Ways and Means. At that time, despite the requests from many Members of the House of Representatives and others, that the administration ask for a shorter extension of the surtax until such time as the House and Senate could take up the related matter of tax reform, the administration, as I understood, insisted upon a full 1-year extension of the tax under the bill which is now pending in the House of Representatives.

I think that was a mistake; and the request of Secretary Kennedy before the Committee on Finance this morning is, of course, an admission, now, that they have gone about it in the wrong way, and that they should have agreed to the shorter extension earlier. Had they done so, we would not now find ourselves having to respond, at the last minute, in a rather unusual way—that is, by initiating a revenue measure in the Senate

rather than in the House of Representatives, as the Constitution provides.

But I believe there is something good about this action. First, it has been made quite clear in the House of Representatives, I take it—or else Secretary Kennedy would not have come before the Finance Committee this morning with his request—that a permanent extension of the surcharge tax cannot now pass the House of Representatives unless it is coupled with some kind of meaningful tax reform.

So I think, from the action that the Senate is about to take now, that we can draw the conclusion that the possibilities of real tax reform, of one kind or another, are very good during this session of Congress. We should make it clear today that the Senate does not agree that it will consent to extension after extension of the withholding rates; that if we come up to the deadline again, and the bill has not come over from the House of Representatives, and we agree to another extension; and then, if we come up to the deadline again, and have the Secretary of the Treasury coming in and saying, "As a practical matter, you have just got to extend this one more time," we will not agree to do so, and continue to do so and put off tax reform.

We discussed that matter in the Committee on Finance this morning, and I think it was made rather clear by the chairman himself and by other members of the committee that the committee, or at least a majority of the committee, does not propose to be a party to such a procedure.

We are saying that we recognize the special problems that we face, the special problems that will confront a great many businesses in the country if they have to withhold under one set of facts, and then change around and withhold under another set of facts. Therefore, recognizing the emergency, Secretary Kennedy has brought to us, we say, that it is an emergency, and that we will not be coming before the Senate time after time, asking for temporary extensions of withholding rates, but that we want to get down to business and really consider the question of permanent tax rates as well as tax reform.

I think there is another good aspect of the action we are proposing to take this afternoon, as has been pointed out by our distinguished chairman. And that is that as of now at least, a majority of the Committee on Finance has decided that it wants to repeal the 7 percent investment credit. In my judgment, such credit presently adds fuel to the inflationary fire and should be repealed. The Committee on Finance, or a majority of it, has now said that.

Furthermore, we continue to hear discussion, as the distinguished chairman of the committee has said, as to when the repeal should be made to take effect. The majority of the Committee on Finance has now agreed on the date when that repeal would take place.

Our intent is simply to relieve an emergency, but then say to the House of Representatives, "Send us a bill and send it to us in time that we can have hearings" so that we can report out a bill coupled with tax reform and not have it come up here again, all of a sudden, with some kind of emergency action which the administration has asked us to take.

Mr. DIRKSEN. Mr. President, the observation of my friend, the Senator from Oklahoma, that the Secretary appeared here and that his appearance is an admission they started wrong is about as romantic and fanciful as anything I can think of.

The Secretary was there, in case the committee wanted to advise with him. He came only to tell the committee what a real, bewildering problem was confronting the Treasury and the business and industrial people of the country insofar as the computering of their withholding taxes is concerned, and the tax treatments involved.

It was not an admission at all on his part. He appeared at the invitation of the Committee on Finance to give the committee the benefit of his knowledge.

Let us not have my friend the Senator from Oklahoma tell the Senate that all the tax reform is on that side of the aisle. We on the minority side have been trying to get tax reform for years, and we have not gotten anywhere. The Senator now complains about the repeal of the so-called dividend credit. Let me remind the Senator that he voted for that dividend credit before. Only a couple of Senators voted against it. And I was in the same boat with the Senator. I voted for it.

I asked this morning that the chairman be careful about the language submitted here so that it would not step on anyone's toes and would not confine anybody. A good many people have come to me to indicate that there ought to be some exceptions.

I said to the Committee on Finance that I can vote either way. I try to maintain some flexibility in the matter. But I do not want anyone's hands tied, and I do not want anyone's voice stilled when he has a chance to speak. However, let us not hear the statement that the Secretary was there to admit an error. If there was an error, it was in the delay in another body of Congress that I cannot mention under the rules of the Senate.

Mr. HARTKE. Mr. President, I intend to vote against the extension, although I am not going to ask for a rollcall vote.

I think this is in fact, in spite of all the comments to the contrary, an endorsement of an extension of the surtax, which I do not want to be a part of. Too many people have been hurt by inflation. I do not believe we should continue to put this burden on their backs.

I think if we want to move the country along, we ought to pay our bills under the system we have used in the past; namely, to expand the economy instead of having inflation.

I have said personally for a long time that I consider this an inflationary measure. I believe it is bad economics and bad propaganda.

We are now going to put another 31-day extension on the measure. If that is not putting the cart before the horse, I do not know what it is.

Mr. LONG. Mr. President, I think the Senator from Indiana made it very clear that he would not vote for the measure in any form, even if we were to include the social security amendment.

Mr. HARTKE. The Senator is correct.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 4229) was read the third time and passed.

Mr. DIRKSEN. Mr. President, I move that the Senate reconsider the vote by which the bill was passed.

Mr. LONG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended, so as to read:

An Act to continue for a temporary period the existing suspension of duty on heptanoic acid, and to continue for one month the existing rates of withholding of income tax.

S. 2482—INTRODUCTION OF THE NATIONAL KIDNEY DISEASE ACT OF 1969

Mr. JAVITS. Mr. President, I introduce for myself, the Senators from Washington (Mr. JACKSON and Mr. MAGNUSON). The Senator from Texas (Mr. YARBOROUGH), the chairman of the Labor and Public Welfare Committee; and 36 other Senators from both parties, the National Kidney Disease Act of 1969, to launch a national comprehensive cooperative medical program for the treatment of kidney disease, to control and reduce kidney disease by preventative and detection programs, and to provide research support for kidney disease programs.

A companion measure is being introduced today in the House of Representatives by Representative EDWARD G. BIESTER, JR., of Pennsylvania, and more than 80 Members of that body. The bill has the active support of the principal organization engaged in the fight against kidney disease, the National Kidney Foundation, composed of affiliates in every section of the country, each of which is assisted by a medical advisory board of local physicians concerned with kidney disease.

In recent years, kidney diseases have steadily gained as a matter of vital concern for Federal and institutional research and service efforts. The increased interest stems from the development of dramatic but expensive techniques for the diagnosis and prevention of the end-stage disease. The success of these expensive therapeutic approaches—along with other research advances in understanding kidney disease—have led to an increasing demand that we do more to avoid the chronic diseases and death that result from a lack of availability of these facilities for modern diagnosis and treatment.

As the Public Health Service's report on kidney disease states:

The significance of these diseases in terms of human suffering and death charges as to develop programs which will have the maximum impact on human well-being.

The sad statistics of human suffering and death are that over 7,800,000 Americans suffer from kidney disease and that over 50,000 of them die of end-stage kidney disease.

But the saddest statistic is the cruel fact that 8,000 died needlessly, merely for lack of money. These 8,000 were ideal candidates for treatment by kidney transplant or the artificial kidney—dialysis. But only 450 patients received transplants and 550 began artificial kidney treatments last year. Thus, for every eight patients who could be returned to normal lives through these lifesaving treatments, the American medical profession must allow seven to die.

This bill, by providing, first, for grants for the construction, equipment, planning, establishment, and operation of regional cooperative medical programs for research, training, and patient care in the field of kidney diseases; second, for the establishment of local advisory groups; third, for the creation of a National Advisory Council on Kidney and Kidney-Related Diseases; fourth, for the establishment of special treatment and training center information; and fifth, for an Office of Kidney Disease and Kidney-Related Diseases to establish a special program to combat kidney disease. By dealing with all these areas, this bill fulfills recommendations of the blue-ribbon Gottschalk Committee on Chronic Kidney Disease, contained in a report to the Director of the Bureau of the Budget. For these purposes, a total of $74 million would be authorized for the next 5 fiscal years.

Cosponsoring this bill with Senators JACKSON, MAGNUSON, YARBOROUGH, and me are Senators AIKEN, BENNETT, BIBLE, BURDICK, CANNON, CHURCH, CRANSTON, DODD, FANNIN, GOODELL, GORE, EAGLETON, GRAVEL, HARRIS, HART, HATFIELD, HOLLINGS, HUGHES, INOUYE, MCCARTHY, MCGOVERN, METCALF, MILLER, MONDALE, MOSS, MURPHY, MUSKIE, NELSON, PELL, PROUTY, RANDOLPH, RIBICOFF, SCHWEIKER, SCOTT, YOUNG of North Dakota, and YOUNG of Ohio.

In detail, this bill would:

First, establish an Office of Kidney Disease and Kidney-Related Diseases within the Health Services and Mental Health Administration and provide that all functions of the National Institutes of Health relating to kidney disease or kidney-related diseases shall be performed by such office.

Second, provide incentive grants for the construction, equipment, planning, establishment, and operation of cooperative medical programs, for research, training, and patient care in the field of kidney disease. Cooperative medical programs are an arrangement among a group of public or nonprofit private institutions engaged in research, training, diagnosis, and treatment relating to kidney disease; but only if such group is situated within a geographic area composed of any part or parts of any one or more States, and consists of one or more medical centers, one or more clinical research centers, and one or more hospitals.

Third, provide that planning grants and grants for the establishment and operation of cooperative medical programs can only be made after first, consultation with the National Advisory Council on Kidney and Kidney-Related Diseases; and second, if such national medical programs planning, establishment, and development is recommended by a local advisory group consisting of practicing physicians, medical center officials, hospital administrators, representatives from appropriate medical societies, voluntary health agencies, and representatives of other organizations, institutions, and agencies concerned with activities of the kind to be carried on or under the program and members of the public familiar with the need for the services provided under the program.

Fourth, establish a National Advisory Council on Kidney and Kidney-Related Diseases of persons selected by the Secretary and who would consist of the Surgeon General and 16 leaders in the fields of the fundamental sciences, the medical sciences, or public affairs, and who would serve 4-year staggered terms.

Fifth, require the Secretary to establish special treatment and training center information through establishment and maintenance of lists of facilities in the United States capable of providing the most advanced methods and techniques in the diagnosis and treatment of kidney disease or kidney-related diseases, with such other information, including the availability of advanced specialty training in such facilities, and have the Secretary consult with interested national professional organizations to make the information the most useful.

The prohibitive costs of comprehensive kidney treatment were fully described in a Wall Street Journal article on March 10, 1969, entitled "The Cost of Living; Some Kidney Patients Die From Lack of Funds for Machine Treatment," written by Jim Hyatt. I ask unanimous consent that the full text of the article be printed in the RECORD as part of my remarks.

There is an urgent need for this legislation because, as Dr. Carl W. Gottschalk, chairman of the Committee on Chronic Kidney Disease, said in his report:

> Until treatment capability meets demand, agonizing decisions concerning patient selection are inevitable.

There must be action at the Federal level to provide the professional skills and facilities, the prevention techniques, and the research that will defeat kidney disease.

Mr. President, I ask unanimous consent that a section-by-section analysis of the bill be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the analysis and article will be printed in the RECORD.

The bill (S. 2482), to amend the Public Health Service Act so as to add to such act a new title dealing especially with kidney disease and kidney-related diseases, introduced by Mr. JAVITS (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

The material presented by Mr. JAVITS follows:

SECTION-BY-SECTION ANALYSIS—NATIONAL KIDNEY DISEASE ACT OF 1969

Section 1—*Short Title: National Kidney Disease Act of 1969.*

Section 2—*Declaration of Policy.*

(1) The lack of trained individuals, available facilities, research and equipment for the diagnosis, evaluation, treatment and prevention of kidney disease is a major health problem.

(2) Techniques have been developed for the diagnosis and prevention of disease which would save lives, and yet, at the same time, people continue to progress to chronic kidney disease and death only for the the lack of facilities for diagnosis and treatment.

(3) Basic research is needed into the nature of diseases of the kidneys and the problems of kidney transplantation; in developing mass testing procedures for the early detection of kidney disease; and for the development of more effective and economical devices for blood purification.

(4) There is an urgent need for a comprehensive program to combat kidney disease through the combined efforts of the Federal, State and local governments, medicine, universities, nonprofit organizations and individuals.

Section 3(a)—*Amends Public Health Service Act to add new title:*

"TITLE X—EDUCATION, RESEARCH, TRAINING, AND DEMONSTRATIONS IN THE FIELD OF KIDNEY DISEASE"

Purposes: To encourage cooperative arrangements in the field of kidney disease to secure for patients the latest advances in the diagnosis and treatment of kidney disease.

Appropriations: Appropriations are authorized for construction planning and equipment grants for cooperative medical programs relating to kidney disease: $8 million for FY 1970; $11 million for FY 1971; $17 million for FY 1972; $18 million for FY 1973; and $20 million for FY 1974. The maximum Federal participation in the costs of construction of facilities and built-in equipment grants is 90%.

Definitions: The terms "cooperative medical program," "Medical Center," "clinical research center," "hospital," "non-profit," and "construction" are defined.

Planning Grants: The Secretary, after consultation with the National Advisory Council on Kidney and Kidney Related Diseases (established by the new Section 1005) is authorized to make grants to public or nonprofit private agencies for planning the development of comprehensive medical programs. Applications for grants must meet criteria including the designation of a local advisory group, comprised of concerned professionals and the lay public, to advise in the formulation of plans for establishment and operation of the Regional Medical program.

Cooperative Medical Program Grants: The Secretary, after consultation with the National Advisory Council on Kidney and Kidney Related Diseases, is authorized to make construction, planning and equipment grants to public or non-profit private agencies for the establishment and operation of cooperative medical programs. Grants under this section may be made only if it meets criteria and is recommended by the local advisory group. The usual financial reports and Davis-Bacon Act compliance is specified.

National Advisory Council: The Secretary shall appoint a National Advisory Council on Kidney and Kidney Related Diseases which shall consist of the Surgeon General and 16 leaders in the fields of fundamental sciences, medical sciences, or public affairs. They serve four-year staggered terms. The Council shall advise and assist the Secretary in the preparation of regulations and policy matters regarding the administration of this title, consider all applications for grants

under this title and make recommendations to the Secretary with respect to approval of applications for and the amounts of grants under this title.

Regulations: The Secretary, in consultation with the Council, is authorized to prescribe regulations for approving grant applications, and coordinated programs assisted under this title with all other kidney disease or kidney-related diseases programs.

Special Treatment and Training Centers: The Secretary is authorized to establish and maintain a current list of facilities capable of providing the most advanced methods in the treatment and diagnosis of kidney disease.

Report: The Secretary shall submit to the President and to the Congress a report with recommendations regarding activities under the title in the field of kidney disease before June 30, 1973.

Records and Audit: Each recipient of the grant shall keep such records as prescribed.

Multi-Program Services Project Grants: Funds appropriated shall be available for grants to any public or non-profit private agency for services which will be needed by any two or more cooperative medical programs..

Section 3(b)—*Renumbering of Sections.*

Section 3(c)—An Office of Kidney Disease and Kidney-Related Diseases is established within the Health Services and Mental Health Administration. All of the functions of the National Institutes of Health relating to kidney disease or kidney-related diseases shall be performed by such office.

[From the Wall Street Journal, Mar. 10, 1969]

SOME KIDNEY PATIENTS DIE FOR LACK OF FUNDS FOR MACHINE TREATMENT—ARTIFICIAL ORGAN WORKS WELL, BUT USE IS COSTLY; FEDERAL GRANTS, DONATIONS DWINDLE—INSURNACE DOESN'T MEET BILLS

(By Jim Hyatt)

The effort to treat suffers from chronic kidney disease by machine, which once promised to save thousands of lives a year, is floundering for lack of financial support.

High costs have plagued the so-called artificial kidney program from the outset. Hospital bills for the twice-weekly machine blood "washings" that take over the kidneys' vital function of removing blood wastes and adjusting body chemistry now run from $10,000 to $20,000 annually per patient. That's the main reason only about 1,700 Americans currently receive the treatments, while an estimated 8,000 people will die this year for lack of them.

But even this far from adequate situation is deteriorating. Federal grants have been running out at the 14 hospitals designated by the U.S. Public Health Service about three years ago as demonstration centers for the process; without Government help, some of them have had to reduce the number of cases they handle.

Some private hospitals have been forced into similar cutbacks because of difficulties in attracting donations to support patients who can't pay the cost themselves. Indeed, private support of any kind has been slow in coming.

COMING OUT SECOND BEST

"The cost per capita of the treatment is an overwhelming drawback when we approach organizations for help," says Dr. Frederic B. Westervelt, director of the kidney care demonstration center at the University of Virginia School of Medicine in Charlottesville. "They say, 'Look what we can do for $10,000 a year—we can give 20 people an artificial leg.' When they measure what they think is the greatest good for the greatest number, we come out second best."

As a result of this lack of funds, hospital committees that once spent weeks agonizing over which artificial kidney candidates would receive the life-giving treatments, called hemodialysis or simply dialysis, now find that the decision has been taken out of their hands. "Who gets the care here now is determined purely by ability to pay—we don't like it, but that's the way it is," says Dr. Daniel Leb of the Louisville (Ky.) General Hospital's kidney center, run by the University of Louisville School of Medicine.

Physicians' chagrin over the financial obstacles to the treatment is heightened by the highly advanced state of artificial kidney technology. The prototype of the present artificial kidney machine, which resembles a squat old-fashioned washing machine, was developed in 1943 in Holland by Dr. Willem J. Kolff, who now is a resident of the U.S. The patient is connected to the machine, and his blood is pumped through a series of tubes, coils and filters.

The key element of the device is a thin cellophane membrane immersed in a saline solution. Through the process of osmosis, wastes in the blood that otherwise would accumulate and cause death pass through the membrane into the solution. At the same time, vital chemicals normally added to the blood by healthy kidneys pass from the solution into the blood. The "cleansed" blood then is returned to the body.

A SURGICAL BREAKTHROUGH

For a number of years, the machine could be used only when a few treatments would suffice—such as in cases of acute infections—because the surgery required to connect the patient to the machine was difficult and dangerous. In 1960, however, a team of specialists from the University of Washington devised a system that made the artificial kidney available to individuals who had suffered irreparable kidney damage and needed frequent blood washings. In minor surgery, they permanently inserted small plastic tubes in an artery and vein in a patient's arm or leg. During dialysis, the machine is easily connected to the body through those tubes; when the treatment is finished, the tubes are plugged and covered with a small bandage.

Recently, some doctors have improved on this method. By increasing the flow of blood through an artery and a vein, they enlarge them to the point where they can be easily punctured with large needles for connection to the kidney machine. This makes the mechanics of dialysis about as simple as giving blood.

Dialysis is time consuming; the twice-weekly treatments take from six to 13 hours each, depending on the patient and model of machine used. But it is painless, and patients undergoing the life-long treatment can lead a nearly normal life. Clyde Shields of Seattle, who nine years ago received vein and artery implants from the University of Washington team and became the first person to start regular dialysis by machine, still is regularly employed as a mechanic. He is 49 years old.

THE ROLE OF TRANSPLANTS

Treatment by kidney machine isn't the only alternative open to victims of kidney failure. Kidney transplant operations have been performed since 1954 with a high and growing rate of success. Up to last year, three-fourths of the transplant patients who received a kidney from a blood relative had survived for at least one year after the operation (people have two kidneys but can live with just one). The one-year survival rate for a person who received a kidney from a cadaver was 45%.

The utility of this operation is limited, however. Many kidney patients might not survive a transplant operation because of poor general physical condition, and not nearly enough suitable organs are available for those who could benefit. Only about 2,000 kidney transplants have been made in the past 14 years, an average of less than 150 a year.

Moreover, transplant candidates often require dialysis. They usually must undergo the treatment while awaiting an organ, and they must fall back on the machine if the operation fails.

Amid the general gloom over the outlook for artificial kidney treatment, some see a hopeful sign in the recent trend for more patients to receive machine dialysis at home instead of in a hospital. The savings from such a move can be substantial. The first-year bill for home dialysis, including $3,000 to $4,000 to purchase the artificial kidney machine itself and fees for training a family member to run it, usually total about $10,000. After that, it costs $3,000 to $5,000 a year to maintain the machine and buy the various components and chemicals that must be changed after every use.

About 200 of the 1,700 Americans on machine dialysis currently are treated at home, and some kidney specialists say they have high hopes that the number will rise sharply in the next few years. In 1967, the U.S. Public Health Service moved to accelerate the trend by setting up 12 home treatment training centers around the country and promising them $4 million over a five-year period.

But many experts in the field strongly doubt that home care will assume the majority of the treatment burden in the near future. They point out that some patients don't have a relative who can assume the job of operating the complex artificial kidney, others don't have homes where the treatments can be safely carried out and still more have strong fears about entrusting themselves to the care of a family member when a mistake could prove fatal. Moreover, even patients who intend to purchase their own artificial kidney must receive hospital dialysis for several months while a relative is being trained to run the machine.

THE FINANCIAL SQUEEZE

To date, the financial squeeze has been hardest on the hospitals picked by the Federal Government in 1965 and 1966 to demonstrate the feasibility of the widespread use of artificial kidneys. The Federal grants—which totaled $2.5 million—paid the operational costs of the kidney centers and permitted them to admit patients who couldn't pay for their own treatments. Federal funds for medical projects go only for research or treatment-demonstration purposes, not for daily general patient care, so the centers knew the funds might not be renewed when the grants expired. But many of them felt that the Government wouldn't cut them off after having made a commitment.

Since it became clear that the grants would stop in the wake of the Government economy drive caused by the war in Vietnam, the centers have moved to pare their rolls. None have summarily cut off any patients, but when a patient receives a transplant or moves to home care, he isn't replaced.

The center at Cleveland's Mt. Sinai Hospital, for instance, now has only 17 patients on dialysis, down from 30 in 1967; its Federal grant expired Dec. 31. The unit at the University of Alabama Medical Center in Birmingham now only accepts patients likely to receive transplants fairly quickly; if new funds can't be obtained, it plans to phase out its artificial kidney program as soon as other facilities can be found for its 15 present patients.

PAY IN ADVANCE

The center at Hennepin County General Hospital in Minneapolis, whose Federal grant expired Dec. 31, now requires some prospective patients to put $12,000—funds for at least one year's care—in an escrow account before they can begin dialysis. "A couple of people have felt they'd rather die than spend the amount of money involved," says one doctor at the hospital.

A bill now pending in Congress would commit new Federal money for artificial kidney programs, but its prospects for passage

aren't clear now. A similar bill made little headway last year.

The outlook for developing other sources of funds is even less bright. Only a half dozen states support dialysis patients, and few others show signs of following. New York has the largest state program; according to Dr. Ira Greifer, medical director for the National Kidney Foundation. Medicaid in New York helps pay dialysis bills for more than half of the state's 400 dialysis patients and the state has set up a Kidney Disease Institute to coordinate the various public and private kidney treatment projects. But state officials say that about 900 New Yorkers a year need the treatments, and their efforts help only a fraction of those who need financial help.

Ordinary types of health insurance often pay some costs of dialysis but typically fall far short of meeting the actual expenses. The average maximum major medical policy benefit of $10,000 "just about covers the preliminary steps to start a patient on dialysis," says L. A. Orsini, an official of the Health Insurance Association, a New York-based trade group.

A few companies now offer kidney treatment policies. Western States Life Insurance Co. in Sacramento, Calif., for instance, sells a $50,000 maximum benefit group policy for an organ transplant or dialysis. However, most private insurers have been reluctant to enter the field.

Persons covered by the Federal Medicare program for the elderly receive little aid for dialysis. Medicaid, the Federally assisted program adopted by some states to help low-income people pay medical expenses, provides more aid—$25 for each in-hospital dialysis treatment—but still leaves substantial bills.

What's left for some kidney disease sufferers, then, is charity. While organized support for kidney care has been slow in coming, instances abound of local largess in individual cases. Last Christmas, for example, residents of Whitesville, Ky., a town of fewer than 1,000 raised $26,000 in four days for Roscoe French, a 33-year-old carpenter for whom machine dialysis represented the only chance at life.

Even well-off victims may end up needing charity. "If you aren't indigent when you start dialysis, you soon will be," says one physician.

ORDER OF BUSINESS

Mr. JAVITS. Mr. President, I ask unanimous consent that when the Senator from North Carolina (Mr. ERVIN) completes his remarks, I may be recognized for certain remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

NATIONAL COMMITMENTS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate resume the consideration of the unfinished business.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 85) expressing the sense of the Senate relative to commitments to foreign powers.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate resumed the consideration of the resolution.

SENATE RESOLUTION 85—SYMBOL OF THE SENATE'S RESPONSIBILITY TO THE AMERICAN PEOPLE

Mr. ERVIN. Mr. President, Senate Resolution 85, the so-called national commitments resolution, signifies what hopefully may be an important watershed in our Nation's constitutional history. The resolution is evidence of the fact that the Senate has once again become alert to its responsibilities in the field of foreign affairs. This resolution is a declaration that the Senate henceforth will insist upon its constitutional prerogatives. And it is a promise to the American people that the Senate intends to discharge its obligations as the representative of the people's voice in the making of foreign policy. As such, I support the resolution wholeheartedly, and urge its adoption.

While I support the resolution and commend the efforts of the junior Senator from Arkansas in bringing it forth, I cannot help observing that it is unfortunate that such a declaration by the Senate has become necessary. The resolution is testimony to the fact that over the course of the past 50 years, and especially since World War II, the power to make foreign policy has shifted almost entirely to the President. This trend has gone so far that a theory has developed that the making of foreign policy is solely the President's prerogative. This view is held by a large segment of the Nation's political scientists. It is shared by much of the public and, needless to say, it is forcefully espoused by the executive branch as well.

Under this theory, Congress is considered to be little more than a rubberstamp of the executive branch. The functions of Congress is to approve what the Executive does in foreign affairs, to appropriate the money it seeks without question or cavil, and to give its automatic consent and support to whatever policy comes from the executive branch. As the foremost advocate of this theory, the Department of State often makes little effort to hide its belief that foreign policy is much too important and much too complicated to be left to the untutored mercies of mere Senators and Representatives. In its view, foreign affairs must be exclusively the concern of experts, of which class the Department considers itself the epitome. The Department and those who share its views make the common mistake of confusing information for knowledge, and knowledge for wisdom. They are ignorant of that definition which is singularly appropriate in this context—that an expert is one who knows about nothing.

This feeling that the Senate intrudes upon the President's constitutional duties when it seeks to participate in the formulation of foreign policy reflects a state of affairs which has existed for some time. It is not a happy moment when the Senate must in a resolution declare that foreign policy is a product of "action taken by the executive and legislative branches of the U.S. Government." This is clear from the plain words of the Constitution. Unfortunately, because of the abdication of its constitutional responsibilities over the past decades, the point has now been reached when the Senate must try to regain—first symbolically, as by the adoption of the resolution—and then in practice, its coequal role in the formulation of foreign policy.

The present low state of the Senate's power in the field of foreign policy was forcefully brought home to me during hearings conducted by the Subcommittee on Separation of Powers in mid-1967. The Subcommittee on Separation of Powers was established earlier in that year to examine the doctrine of division of powers established by the Constitution and to evaluate its modern strength and significance. At its first hearings, the subcommittee received testimony from the Senator from Arkansas (Mr. FULBRIGHT) and from the then Senator from Oregon, Mr. Morse, outlining their views of the responsibilities of Congress in the making of foreign policy. In their testimony they described the persistent trend to Executive supremacy in this field. The Senator from Arkansas (Mr. FULBRIGHT) summarized the major events which have marked the decline of congressional influence in foreign policy:

> The authority of Congress in foreign policy has been eroding steadily since 1940, the year of America's emergence as a major and permanent participant in world affairs, and the erosion has created a significant constitutional imbalance. Many, if not most, of the major decisions of American foreign policy in this era have been executive decisions. Roosevelt's destroyer deal of 1940, for example, under which 50 American ships were given to Great Britain in her hour of peril in exchange for naval bases in the Western Hemisphere, was concluded by executive agreement, ignoring both the treaty power of the Senate and the war power of the Congress, despite the fact that it was a commitment of the greatest importance, an act in violation of the international law of neutrality, an act which, according to Churchill, gave Germany legal cause to declare war on the United States. The major wartime agreements—Quebec, Tehran, Yalta, and Potsdam—which, as it turned out, were to form the de facto settlement of World War II, were all reached without the formal consent of the Congress. Since World War II the United States has fought two wars without benefit of congressional declaration and has engaged in numerous small-scale military activities—in the Middle East, for example, in 1958, and in the Congo on several occasions—without meaningful consultation with the Congress.

That the Congress shares constitutional power with the executive branch in the making of foreign policy is clear, as I have said, from the plain words of the Constitution itself. In his statement to the subcommittee, Senator Morse summarized the powers in the field of foreign policy allocated to the President and to Congress:

> Scholars in the field generally recognize that under the Constitution the powers in the field of foreign policy and war were divided between Congress and the President. The President was made Commander in Chief of the Army, Navy, and militia when called into service. He was given the power to receive Ambassadors and other Public Ministers and the duty to see that the laws be faithfully executed.
>
> Congress was given the power to declare war, to raise and support armies and provide and maintain a Navy, to make rules governing these forces, to provide for organizing and calling forth the militia, and to regulate

commerce with foreign nations. In addition, Congress was to make all laws necessary for carrying out the powers vested in the Government and was given the power of the purse through the provision that no moneys could be drawn from the Treasury without an appropriation by law.

In addition, of course, the Senate has the responsibility of confirming appointments to diplomatic posts and by two-thirds vote must give its "advice and consent" to treaties before they become effective.

Despite this constitutional power and responsibility, the post-World War II years have seen a failure on Congress part to play an active, creative role in the making of foreign policy. The report on the resolution by the Foreign Relations Committee traces the reasons for this decline:

[T]he basic cause has been the unfamiliarity of world involvement and recurrent crisis to the American people and their government. Prior to 1940 foreign crises were infrequent and therefore put no lasting strain on our institutions.

Since 1940 crisis has been chronic and, coming as something new in our experience, has given rise to a tendency toward anxious expediency in our response to it. The natural expedient—natural because of the real or seeming need for speed—has been executive action.

In other words, the trend to Executive supremacy is a product of the cold war and of recurrent and almost constant crisis in which the stakes are often the very survival of this country and the world. Since the United States became the major actor in world affairs, we have become involved in almost every event everywhere on the globe, and even our noninvolvement is a key element in the affairs of other nations. The sheer size, complexity, and critical nature of America's foreign policy has led to a feeling that only the President with his advisers can adequately formulate as well as execute foreign policy.

Congress itself acquiesced and supported the preeminent role of the Executive. Understandably, Congress became reluctant to question the judgment—before the fact—of the President and his advisers. The salutary principle of a nonpartisan foreign policy—"Politics stops at the water's edge"—developed into a withdrawal of Congress from any significant role in the formulation of foreign policy.

Evidence of this withdrawal of Congress from its constitutional obligations can be seen in almost every aspect of our policy. In the years since World War II, for example, the treaty power which the President shares with the Senate has atrophied. Since 1946, the United States has become a party to more than 5,000 international agreements, but only 245 of them have been treaties. The great bulk are executive agreements. The executive agreement, of course, is a purely executive contract. Unlike the treaty, which requires two-thirds approval by the Senate, the executive agreement can be negotiated and executed without Senate advice or Senate consent. For the most part, the public and the Senate are not even aware when these executive agreements are made or what they contain.

In an effort to obtain a fuller understanding of the use of executive agreements and their influence on the distribution of power between the Executive and Congress in the field of foreign policy, the Subcommittee on Separation of Powers recently asked the Department of State to analyze all of the executive agreements entered into since World War II. The Department of State was requested to collect all the agreements, classify them by subject matter, and state the legal or constitutional authority under which they were made.

It took the Department almost 4 months to prepare the report the subcommittee requested on these 5,000 executive agreements. Their report totals almost 300 typewritten, legal-sized pages. It is not, I must stress, a reprint of the agreements nor an exhaustive analysis of their terms, their legal effect, or even their legal underpinning. It is merely a listing by subject matter of the agreements and a listing by citation of the authority for each.

The accompanying memorandum by the Department states:

From time to time comparisons are made between the number of treaties and the numbers of so-called executive agreements made during the same period. It will be observed . . . that this study covers nearly 5,000 international agreements other than treaties made during the period 1946–1968. During the same period, and not counting certain earlier treaties which were brought into force during the period, 245 treaties (121 bilateral, 124 multilateral) were made and brought into force and have been published or are in the process of being published in the Treaties and Other International Acts Series and the permanent statutory volumes (UST). A comparison merely on the basis of total figure is, of course, meaningless.

While it is true that the mere enumeration of these agreements is not conclusive proof that the executive agreement has supplanted the treaty, it is enough to warrant a full-scale study of the importance of the executive agreement and its effect on the Senate's role in treatymaking.

The Senate cannot take at face value the assertion by the Department that every agreement is properly based upon constitutional authority and that all are consistent with congressional delegations of authority and existing law. Many of them, it appears, were made according to the President's "inherent powers" to conduct foreign policy. But what those "inherent powers" consist of, and whether executive agreements signed under such authority trespass on the Senate's treaty powers, are questions which the Senate ought to answer for itself if it is to give substantive meaning to the resolution.

The quantitative increase in the use of executive agreements in recent decades has been matched by an increase in their qualitative standing. Where once the executive agreement was a decidedly subordinate instrument reserved for international "housekeeping" arrangements, now it is often alleged that the executive agreement stands on an equal footing with the treaty. It is commonly asserted, for example, that anything which can be done by treaty can be done by executive agreement. Thus, the President, under this view, has the power to determine whether the Senate will play any role in making foreign commitments by his choice of using executive agreements or formal treaty. The logical result of such a theory is to make a dead-letter of the Senate's prerogatives under article II, section 2.

The executive agreement also may be in the process of becoming equivalent to the treaty in its effect on domestic law. Treaties, under the Constitution, are part of the supreme law of the land and prior, inconsistent statutes are inferior to provisions of treaties. Until recently, executive agreements were not thought to have this same legal standing. But the controversy last year over the international Anti-Dumping Code suggests that the executive branch would like to see even this distinction erased.

The international code was negotiated during the Kennedy round of international trade negotiations despite a prior warning from the Senate that the authority to negotiate did not extend so far as to authorize an agreement to prevent dumping of goods on the international market which was at variance with existing statutory law. Nonetheless, the U.S. representative negotiated an agreement which was in a number of respects inconsistent with the Anti-Dumping Act passed by Congress in 1921. Although the executive branch never actually conceded that there was a conflict between the two, it was generally agreed that the two were inconsistent. In my judgment this was a clear attempt on the part of the executive branch to utilize an executive agreement to repeal or modify prior existing statutory law adopted by Congress.

As a result of the dispute which arose over the 1967 code, the Senate adopted a provision in the Renegotiation Amendments Act of 1968 which would have suspended the code. However, the compromise language adopted by conference committee permits the code to come into effect but states that in the event of a conflict between the 1967 code and the 1921 act the latter is to govern. It is possible to interpret this series of events as precedent for the principle that executive agreements can modify prior inconsistent statutes unless the Congress takes affirmative steps, as it did in this case, to make clear that the prior legislation is still primary. If such a theory were accepted, then all legal distinctions between executive agreements and treaties would be eliminated. Executive agreements made by the President would then become part of the supreme law of the land without the necessity of ratification by the Senate.

If Congress is to reassert its prerogatives in foreign policy, as Resolution 85 declares, then one of its first tasks should be to scrutinize all past executive agreements to assure itself that each was made under proper legal and constitutional authority. Even more important, the Senate should demand to be informed of all future executive agreements as they are being negotiated and should satisfy itself that the United States is not entering into an international commitment by exclusively executive action which should instead be a product of the joint Senate-Presidential function of treatymaking.

The increase in use and importance of the executive agreement has been matched by the reduced role of the Senate in the treatymaking process itself. Treaties are now reserved for the most solemn of international commitments. It sometimes appears that the President submits international agreements in treaty form when he wishes to give particular public stature to an agreement. With the fanfare and publicity given to such agreements, the Senate has little actual power to alter their terms, or even express its views on the nature and scope of the obligations they represent. Invariably Senate misgivings about terms of treaties are represented as obstructionist tactics. The argument is repeatedly heard that so much time and trouble has gone into negotiations that nothing can be permitted which would jeopardize the agreements which have been reached.

The Subcommittee on Separation of Powers' hearings contain an editorial from the New York Times of March 10, 1967, which epitomizes this attitude. The Times said:

> A treaty is a contract negotiated by the executive branch with the government of one or more other countries. In the process there is normally hard bargaining and the final result usually represents a compromise in which everyone has made concessions. Thus when the Senate adds amendments or reservations to a treaty, it is unilaterally changing the terms of a settled bargain. The practical effect of such action is really to reopen the negotiations and force the other party or parties to re-examine their previously offered approval.
>
> Every time the Senate exercises this privilege it necessarily casts doubt upon the credibility of the President and his representatives and weakens the bargaining power of the United States in the international arena. The Senate's power to do this is unquestioned, but it is equally unquestionable that this power is best used only to express the gravest of concerns, especially in a period of crisis such as is posed by the Vietnam war and efforts to end it.

The Department of State is not aware of the fact that the Senate's ability to "advise" on major treaties is generally nullified by the pressures which are brought to bear to obtain its "consent." As long ago as 1953, Secretary of State Dulles displayed a commendable approach to the problem. He said:

> The Constitution provides that the President shall have power to make treaties by and with the advice and consent of the Senate. This administration recognizes the significance of the word "advice." It will be our effort to see that the Senate gets its opportunity to "advise and consent" in time so that it does not have to choose between adopting treaties it does not like, or embarrassing our international position by rejecting what has already been negotiated out with foreign governments.

The fact is, however, that the executive branch in practice prefers to take full advantage of the position expressed in the New York Times.

As an example of this approach at work I would cite the recent Senate action on the Nonproliferation Treaty. Certain Senators, including myself, were seriously concerned about the nature of the commitment that the treaty imposed upon the United States. Our concern was that the United States was obligating itself to come to the aid of any nation signing the treaty that was thereafter attacked with nuclear weapons or threatened with nuclear blackmail, and that this commitment went beyond our obligations under the United Nations Charter. Our belief that the Nonproliferation Treaty could be the basis for a major expansion of U.S. overseas commitments was based on a resolution passed by the United Nations Security Council and a simultaneous statement of the United States in the United Nations, both of which occurred only 11 days before the treaty was signed. These declarations were clearly for the purpose of assuring nonnuclear nations that signed the treaty that they would be protected from nuclear attack and blackmail. In my opinion, the resolution and U.S. statement amounted to a thinly veiled commitment that we would come to their immediate assistance. In other words, the United States was giving an implicit guarantee of protection to these nations as the price for their accepting the treaty.

Since supporters of the treaty denied that this was the correct interpretation of these statements and assurances, I introduced a reservation to the treaty to make their judgment crystal clear. My purpose was to make certain that no nonnuclear nation would sign the treaty under the misapprehension that the United States, by these words, had made a national commitment to send our boys into battle again to die, without authorization from the Congress of the United States. As I said at the time of the debate on the treaty, we have had much less than this get us into war in the past. I said:

> We are in a war today, a war in which over 32,000 American boys have been killed in South Vietnam. We were placed in that war by the act of the President of the United States. He did not have a single statement to make as strong as this reply of the United States to the resolution in the United Nations Security Council to justify his actions.

The reaction from the Department of State to Senate efforts to clarify the treaty was that any attempt to attach a reservation would destroy the delicate political agreement that had been reached. If a reservation were adopted, the treaty would have to be renegotiated. In the words of the Department, a reservation would cause "a stampede which might very well mean the demise of the treaty." Even my alternative of adopting an "understanding"—which is a purely domestic matter between the President and the Senate—was rejected. Again, the argument was that such a step might be misinterpreted by other nations and destroy the treaty's acceptability to them.

It is my feeling that the Senate had an obligation to make clear its views on the nature and extent of the commitments contained in the treaty. It was evident that the Senate was not in favor of any new commitment of the United States to defend nations attacked or threatened by nuclear weapons other than those imposed by existing treaty obligations. It is my judgment that the Senate ought to have made this interpretation explicit in the form of a "reservation," or at least an "understanding." Our experience in the past has shown us that vague words which all agree at one moment in history mean one thing, can at another point in time be used as the basis for quite a different purpose. What individual Senators may think deep in their hearts about the meaning of a treaty is irrelevant if its words and legislative history mean something else entirely. In acts as important as the ratification of treaties, the Senate has an obligation to make explicit its views on the nature and limits of the obligations which the United States is incurring. And especially in so critical an area as nuclear policy we should be extremely reluctant to substitute private faith in unofficial assurances for explicit limitations that no one can mistake or misinterpret. In the past, we have seen to our dismay what can result from vaguely worded grants of power or authority.

The story of the Nonproliferation Treaty is illustrative of the low state to which the Senate's role in treatymaking has fallen. Since treaties are reserved for major declarations, and there is no room for reservations or understandings, the Senate generally is left with little choice but to approve them, lest the President be repudiated in the eyes of the whole world. As a consequence, major treaties do not offer much room for the Senate in the exercise of its "advice and consent" function.

Of course, the reduced role of the Senate and Congress in foreign policy is best illustrated by the events leading up to our major involvement in Vietnam. As has happened all too often in recent years, the President sought congressional approval of his actions in the heat of crisis. The Congress always finds it difficult to refuse a President when he calls for national support at such a moment. There has been much debate over the legal character and effect of the Tonkin Gulf resolution. In my judgment the resolution did authorize the President to put the Armed Forces into Vietnam, however wise a decision that may have been.

Debate on the meaning of the resolution has led in turn to a consideration of the larger question of whether the President has inherent power to commit U.S. forces to fight overseas in the absence of congressional authority. Those who hold to this view argue that in these modern times the President must and does have the independent power to employ American armed might in the world in order to safeguard our national security. Implicit in this view, and perhaps explicit, is the idea that the Constitution is outmoded. I cannot agree with such a view.

In Youngstown Sheet & Tube Co. against Sawyer, the famous case on the legality of President Truman's seizure of the steel mills during the Korean war, the issue of the President's "inherent war powers" was raised. Mr. Justice Black's opinion in that case contained what I regard as the most ringing reaffirmation of the doctrine of separation of powers that has ever been made. In rejecting the contention that the President had the power to seize the steel mills as an exercise of his authority as Commander in Chief, Justice Black said the power belonged to Congress. The existence of a crisis was no excuse for going beyond the words of the Constitution. Justice Black said:

The founders of this nation entrusted the law-making power to the Congress alone in both good and bad times.

I do not claim to be an expert on the subject of the war powers of the President or of the Congress. I have, however, given a lot of thought and study to it. I have concluded that a distinction must be drawn between defensive warfare and offensive warfare. There is no doubt whatever that the President has the authority under the Constitution, and, indeed, the duty, to use the Armed Forces to repel sudden armed attacks on the Nation. But any use of Armed Forces for any purpose not directly related to the defense of the United States against sudden armed aggression, and I emphasize the word "sudden," can be undertaken only upon congressional authorization. In other words, the power of the President as Commander in Chief of the Army and Navy under the Constitution, when not acting pursuant to congressional authority, is wholly defensive in nature; Congress and Congress alone, by virtue of its constitutional right to declare war, has the power to authorize the employment of the Armed Forces of the United States in offensive warfare.

My position that the power of the President to employ the Armed Forces of the United States is limited to defensive warfare—that is, to resist any attacks upon the United States—and that Congress has the constitutional power to declare war, and that only Congress can authorize the President of the United States to use the Armed Forces of the United States in offensive war, is sustained by three separate provisions of the Constitution.

The first is found in clause 11 of section 8 of article I of the Constitution, which expressly provides that Congress shall have the power to declare war. That refers to wars which may be designated as offensive wars.

Then there are two provisions in the Constitution which recognize that this country can fight in its own defense without any authorization by Congress.

The first of these is found in clause 3 of section 10 of article I of the Constitution, which provides that no State shall engage in war unless actually invaded or in such imminent danger as will not admit of delay. Under his provision even a State can go to war to defend itself against invasion or imminent threat of invasion, without the consent of the National Government.

The other provision of the Constitution is found in section 4 of article IV. It provides that "the United States shall guarantee to every State in this Union a Republican Form of Government, and shall protect each of them against Invision."

Those constitutional provisions make these two propositions crystal clear: First, that the President has no power under the Constitution to put this Nation at war when the war is offensive in nature; and, second, that the President, or even a State, can fight in self-defense to repel invasion, without the consent of the Congress.

When the people of the United States adopted the Constitution, vesting in Congress alone the power to authorize offensive warfare, they contemplated that the Members of the Senate and the Members of the House of Representatives should determine, in the exercise of their own judgments, whether sufficient justification exists for committing the Armed Forces of the United States to offensive warfare before they authorize the waging of such warfare. They did not intend that the Members of the Senate and House of Representatives should abdicate their constitutional power and responsibility by delegating to the President the power to engage in offensive warfare or by acquiescing after the fact in such an improper utilization of the Armed Forces.

If, as some believe, the Constitution has become outmoded in respect to which branch should exercise the war power—a view with which I strongly disagree—then the Constitution should be changed by the amendment processes and not by extra-legal action of the President and the Congress. I am not impressed with the recitation of precedents to support de facto constitutional amendments. Even 200 years cannot make constitutional what the Constitution declares is unconstitutional.

Mr. President, when the Senate seeks to regain its constitutional role in the field of foreign affairs, much more is at stake than a formalistic observance of a paper distribution of powers, prerogatives, and functions. The framers of the Constitution did more in devising that document than merely deal out the elements of power among three branches of the Government. They recognized that in a government resting ultimately on the consent of the governed, a balance must be struck between the need to have power and exercise it, and the need to control power and keep it disciplined. They sought to strike a balance between tyranny on the one hand and anarchy on the other. This principle was recognized as applicable to foreign policy as well as to domestic policy. It was for this reason that they gave Congress and especially to the Senate such important responsibilities in this field. The Senate's ultimate responsibility is to make certain that our Nation's foreign policy remains responsive to the wishes of the people. This is because in a democratic society, no policy, however enlightened, can long survive without the consent and support of the people.

The importance of the congressional role in formulating foreign policy lies in mobilizing and expressing popular support. Through the Congress, the people have a voice and a way to make it heard. Neither the Department of State, nor the Supreme Court, nor even the President can perform this great function of giving expression to the people's wishes on an issue.

This is the lesson that the debacle in our Vietnamese policy has taught us. Because foreign policy had become the province of the Executive, the decisions and the policy of the United States were not made with the active participation of the people. Instead, policy was made exclusively within the executive branch. The Congress, the Senate, and the country were asked to support that policy, which for some time they did, but they were never asked for their consent, and they never had a hand in the making of the policy. Regardless of the merits of our decision to wage war in Vietnam, it has become tragically clear that the people will not support forever a policy which is made for them, but without them.

The consequences of this failure to observe the Constitution are all too evident. True, no Supreme Court decision has adjudged the war in Vietnam as unconstitutional on the grounds that Congress adopted no formal declaration of war and because the Senate gave no effective advice and consent. Instead, the declaration of unconstitutionality has come from the judgment of the people. We see the decree everywhere. For the first time in our memory, an incumbent President was forced from office. Young men whose fathers and brothers volunteered to serve their country now desert to Canada and Scandinavia rather than bear arms in the country's cause. Thousands march on Washington and picket the White House, the Capitol, and the Pentagon. Now we have riots and violence on our university campuses. ROTC programs are being forced out of schools, and there is dissension and antiwar activity even among those in uniform.

Perhaps not all the anarchy we see today has been caused by the Vietnamese war and the way in which we became involved. No one can say. But no one can say that the war was not the cause, or at least the catalyst. And I cannot shake the feeling that ultimately the reason so many are now disrespectful and unresponsive to authority is because authority was disrespectful and unresponsive to the Constitution in the making of our policy in Vietnam.

Sadly, if we needed proof, we once again can see the wisdom of the framers' determination that the representative branch of the Government should play a key role in the making of foreign policy. Senate Resolution 85 does not fulfill that constitutional responsibility. It merely testifies to an awareness of it that had been lost for far too long. Adequate exercise of the Senate's functions in making policy requires a constant, forceful assertion of that role in all proper circumstances. If the Senate has once again become sensitive to its responsibilities, then proof must be in its actions.

But we must be wary of mistaking opposition pure and simple for the partnership in policymaking that is required between President and Congress. The Senate's responsibility is not fulfilled by obstructionism any more than by abdication of judgment and unthinking acquiescence. The Senate did not exercise its constitutional responsibilities 50 years ago by driving us into isolationism, neutrality, and blind pacifism. The tragedy of World War II should be proof enough that isolation, pacifism, and a blindness to the realities of national security is not the way for the Senate to "advise and consent" in foreign policy.

I commend the Senator from Arkansas for his efforts to bring this resolution to the attention of the Senate, and for his efforts to reawaken a stronger sense of the Senate's constitutional responsibilities.

While we may not always agree on the direction in which the Senate should

exercise its responsibilities in foreign affairs, I think we have always been together on the need for a more vigorous Senate role. The Senator has performed a public service of the first importance in causing this debate on the constitutional obligations of the Senate.

(The following proceedings occurred during the presentation of Mr. ERVIN's address:)

Mr. JORDAN of North Carolina. Mr. President, will the Senator yield?

Mr. ERVIN. Mr. President, I am glad to yield to my distinguished colleague from North Carolina.

Mr. JORDAN of North Carolina. In the exhaustive study that the Senator has instructed the State Department to make and present to his committee, has the Senator been able to estimate the cost of these treaties to the American taxpayers?

Mr. ERVIN. No, I did not make an effort to do that. The number of treaties were, of course, relatively small compared with executive agreements.

Mr. JORDAN of North Carolina. Is it not true that some of the treaties have carried enormous expenditures of moneys for such purposes as the building of dams and the establishment of boundaries, so that when we entered into these agreements they finally cost us a large amount of money?

Mr. ERVIN. The Senator is correct. Most of the agreements along that line are done under the foreign aid program and they are approved by Congress, although not by my colleague from North Carolina and myself.

Mr. JORDAN of North Carolina. I thank the Senator.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. GRAVEL in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I wish to make some observations. May I have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. JAVITS. Mr. President, I wish to make certain observations respecting the resolution which is before the Senate. I support the national commitments resolution as submitted by the Senator from Arkansas (Mr. FULBRIGHT). I should like to advance some of the reasons why I support it, and to state my understanding of what it means, as well as its significance.

First, I wish to make it clear that the resolution, as I understand and support it, is concerned with major issues of the highest national interest, not with the routine conduct of foreign affairs. I consider the most important aspect of the resolution to be the use of the words "national commitment."

A national commitment, Mr. President, is not a policy action, is not chasing bandits into Mexico, is not dealing with a redress of the rights of some American who might be imprisoned or whose liberty might otherwise be restrained. In short, it is a major national action, which is of a solemn character so far as the country is concerned, and of such a nature that it could involve us in war or in a national change of position of comparable magnitude and gravity.

I have in mind the two illustrative poles; one, a commitment which puts us in military bases, for example, where the forces of the United States represent a trip-wire if there be any military action and the other pole a commitment, for example with respect to arms limitation or arms control which would change the position or posture of the United States in a major way.

I think the specific words "national commitment" represent the most critical aspect of the resolution. I know the Senator from Arkansas, our chairman, recognizes that, and has sought to refine and clarify the use of those words. Unless they are very clearly understood by Congress, the country, and the world, the resolution really loses its major impact.

Mr. President, we are not seeking to tie the President's hands, nor are we asking that he seek congressional approval every time he wants to do something in the foreign affairs field.

In my judgment, it is essential that the President of the United States be an activist in international affairs, and I am confident that President Nixon will be a wise and prudent activist in his conduct of the Nation's diplomacy. The world situation and the safeguarding of our national interests demand nothing less. Indeed, it is widely recognized that skill and wisdom in foreign affairs is one of the greatest tests of Presidential success in modern times.

It is a fact of life, nonetheless, that no President can be successful in foreign policy, in the long run, unless he enjoys a relationship of mutual trust, confidence, and responsiveness with the Congress, and especially with the Senate. The almost total breakdown of communication and mutual responsiveness concerning the Vietnam war which characterized the previous administration's relationship with the Senate, during its last 18 months or so, is a vivid and tragic example of the damage to our Nation, and to our political system itself, which can result from a breakdown of the indispensable rhythm of responsive interplay between the Senate and the President. The Nation has paid a heavy price for this lesson. Today the Senate—as a continuing body— is intact, but the administration of President Johnson was virtually destroyed politically as a result of unresponsive unilateralism with respect to the Vietnam war.

I do not believe that the present administration—nor any of its successors in the foreseeable future—is likely to forget the lesson of Vietnam with respect to the question of relations with the Senate.

Senator FULBRIGHT and other distinguished Senators have given much thought and attention to the pre-Vietnam history of the problem of the diminishing role of the Senate and House in the field of foreign affairs, and national commitments in particular. In my judgment, they have performed a real service in presenting this full historical perspective, with the committee report tracing trends well back into the last century.

Nonetheless, I do not think anyone would seriously dispute the assertion that had it not been for our experience in Vietnam, and especially our experience with respect to the Gulf of Tonkin resolution, we would not be debating the resolution now before us.

I share the belief that the Senate has witnessed in practice during recent decades a serious diminution of its constitutionally intended powers and influence with respect to the establishment of solemn national commitments in the international field, and I repeat, particularly in respect to national commitments, which is what this resolution refers to.

If the legislative history is inquired into, I hope it will have been made crystal clear—and if I can inspire our chairman to make it even more clear, I shall feel that my time on the floor has been very worth while—precisely what is meant by the term "national commitment." A national commitment is an obligation upon the United States of a nature which could involve us in war, or which represents a vital change of national position with respect to matters of comparable magnitude and gravity.

It seems to me that we ought to ask ourselves as we deal with the pending resolution what brought about the diminution in the impact of Congress on the foreign policy of the country. In part, the answer lies in the extraordinary growth of Presidential powers in all fields of national endeavor during this century and especially since 1933 and 1945. Clearly, this dramatic extension of Presidential authority has been a historical process in response to changing conditions and circumstances. The men who have occupied the office of President in these years have been men of strong will and self-assertion, but the growth of the Presidency has been something essentially other than the product of individual self-assertions. By comparison, the power and prestige of the Congress has seemed to have shrunk during these decades—despite the presence of many individual grants in the Senate and the House.

In my judgment it is crucial that we as Senators also examine the other side of the coin. What is it that we as Senators have done, or failed to do, to permit such an erosion of our power and influence? It is in the context of this question that I feel that Senate Resolution 85 takes on its real significance.

Authority rests with those who exercise it. No resolution of itself is going to add a whit to the power and the authority of the Senate. Conversely, I believe that we will have all the authority and influence we need or want—if we exercise the authority available to us. In short, the wisdom, the skill, the vigor, and the vigilance of the Senate as a body—and of Senators as individuals—is what will count in practice. Our relationship to the Executive—by its very nature—must be both competitive and cooperative. We can be both competitive and cooperative in sterile and unproductive ways, or we can be competitive and cooperative in ways which bring credit and strength to ourselves, to the President, and to the

Nation. We should vie for the laurels of excellence in statesmanship and wisdom, in a common and joint pursuit of the Nation's highest interests. In the deepest sense, the roles of the Senate and the Presidency are complementary—it is the great wisdom of the framers of the Constitution that they profoundly designed to be so.

I sense three specific meanings in the passage of the resolution. First, quite frankly it is an admission by the Senate that we have been diffident in exercising our constitutional powers and responsibility. A resolution by the Senate which confesses its own irresolution of the past is a matter of significance and hope.

Second, I see this resolution as a concrete response to the desire, perhaps I should say the demand, of the American people that—now—the Senate play its full role in the national security field, especially with respect to nationa commitments. It has been a great source of strength and gratification to me and to my colleagues that our efforts—particularly with respect to Vietnam and the nuclear arms race—have elicited such strong and broad popular support from the people we represent. In our differences with President Johnson over the Vietnam war there is no doubt that the Nation approved and supported the role we played and the efforts we made to recapture control of policy for the majority which opposed the course the Nation had been set upon. In this resolution we are giving an earnest to our constituents that we will play the role they want us to play—the role we must pay if the whole scheme of things in this Nation is to work.

Third, I see this resolution as a signal to the executive branch that it must adjust itself psychologically and procedurally to a new reality—the reality that the Senate will not again shrink from its responsibilities or yield its constitutional power with respect to national security issues and the solemn undertaking of national commitments.

The Senate is given the broad role of advice and consent in foreign affairs. In military affairs, its powers are quite specific: the authority, with the House, to declare war, and the authority to raise and regulate the armies of the Republic. Under the Constitution, these are exclusive powers of Congress and there is no need for reticence in asserting them—provided we do so with prudence, wisdom, and foresight, in cooperation with the President for the good of the Nation.

I am grateful to the Senator from Arkansas for his leadership and for having brought the Senate to the point at which we are today.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. FULBRIGHT. Mr. President, I deeply appreciate the remarks the Senator has made both with regard to the resolution and to my part in it. I feel a strong responsibility for doing something about the matter.

I certainly was not aware of how far we had gone in the Senate and how little we had been conscious of our responsibilities in certain cases, specifically those dealing with the Vietnam war.

I do appreciate what the Senator has said.

I think this will be significant not only for those of us—and particularly me—who have gone through the last several years in which the Senate's role has been eroded, but it will also be helpful to future Senators to have had a resolution like this adopted.

I believe the Senator's words are wisely put with respect to that.

I also appreciate the Senator's comments because they disabuse the minds of some people who are not familiar with the background of the pending resolution concerning any suspicion that there may be anything partisan about the matter.

I repeat that the resolution was submitted last year under a Democratic administration. It is not intended in any way to reflect upon the present administration. It is simply a statement of a principle which I think is applicable at all times and under any administration.

Mr. JAVITS. Mr. President, I think President Nixon is a very spirited President. I can hardly conceive of his feeling that the pending resolution curtails his powers. I am sure that he will not allow them to be curtailed.

I consider the resolution to be a unilateral expression by the Senate of its determination not to yield the constitutional powers which have been given to it and an expression that it will exercise them.

A President would be thinskinned indeed who felt that the pending resolution is an attack upon him or an attempt to clip his wings or indicate that we were going to be obstructionist and petty.

Mr. FULBRIGHT. Mr. President, the Senator is correct. It is addressed more to some Senators than to the Executive. It is a statement that we are going to be more conscious of our responsibilities in the future.

Mr. JAVITS. The Senator is correct. We have been burned. The Senator has been burned because he, unhappily, handled the Gulf of Tonkin joint resolution.

Mr. FULBRIGHT. The Senator is correct. Anyone who thinks there is anything partisan about the matter is entirely wrong.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. MANSFIELD. Mr. President, I was present in the Chamber only at the end of the speech of the distinguished Senator from New York. However, I agree entirely with his three conclusions. He said, first of all, that the Senate has been indifferent and irresolute, not down through the years, I might add, but down through the decades.

I agree with the Senator's second conclusion: that the bipartisan resolution is an earnest effort on our part to be responsible to the people we represent in our respective States as well as to the people of the Nation as a whole.

And I agree with the Senator's third conclusion: that the resolution represents a reaffirmation of our responsibility—a responsibility that has been eroded in the past.

I think the time is long past due when we should face up to the fact that this is a matter, as the distinguished Senator has indicated, that applies not so much to the Executive as to some Senators.

It is something that we, as Senators, must face up to and carry out if we are to face up to our bounden responsibility.

I congratulate the Senator for a fine statement and for his extremely fine work.

Mr. JAVITS. Mr. President, I am grateful to the Senator.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, without losing my right to the floor.

The PRESIDING OFFICER (Mr. GURNEY in the chair). Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that at the conclusion of the remarks of the distinguished senior Senator from Connecticut (Mr. DODD) there be a time limitation on the pending resolution of 1 hour to a side, the time to be divided equally between the chairman of the Committee on Foreign Relations, the Senator from Arkansas (Mr. FULBRIGHT) and the distinguished Senator from South Dakota (Mr. MUNDT).

Mr. MUNDT. Mr. President, reserving the right to object, I thought our understanding was that after the speech by the Senator from Connecticut I would call up my amendment and there would be 1 hour to a side.

Mr. FULBRIGHT. Mr. President, reserving the right to object, it is my understanding—and I have been negotiating this matter, and I thought other Senators so understood—the Senator from Kentucky intends to propose a slight change in my resolution. I thought he would have the right to offer that change as a perfecting amendment to the resolution; and that the Mundt-Dodd substitute would be voted on. That is what I understood would be the procedure.

Mr. MUNDT. I am not familiar with the amendment of the Senator from Kentucky.

Mr. FULBRIGHT. I gave a copy to the distinguished majority leader.

Mr. MUNDT. I would still want to offer my substitute.

Mr. FULBRIGHT. It would save one step or one vote, and it would be orderly. The amendment is on the desk of the majority leader. I have a copy. The Senator from South Dakota was not here. I do not think it would take any more time. Then the Senator's amendment would be offered as a substitute, and we would have the vote on that measure.

Mr. MUNDT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. Does the Senator yield for that purpose?

Mr. MANSFIELD. I yield.

Mr. MUNDT. Assuming I call up my amendment, would not the Senator from Kentucky still have the right to offer his

perfecting amendment to the author, and he have the right to accept it?

Mr. FULBRIGHT. His proposal is not a substitute. It is an amendment to my resolution. It is a perfecting amendment.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

Mr. MUNDT. Mr. President, I did not get an answer to my parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Kentucky would have the right to offer a perfecting amendment to the original language.

Mr. FULBRIGHT. I was not clear about that. It is satisfactory.

Mr. MANSFIELD. Mr. President, I am glad the Senator from South Dakota corrected me.

Mr. President, I ask unanimous consent that at the conclusion of the speech by the Senator from Connecticut (Mr. DODD) there be a time limitation of 2 hours on the Mundt-Dodd substitute, the time to be equally divided between the Senator from South Dakota, with the permission of the Senator from Connecticut, and the chairman of the Committee on Foreign Relations, the Senator from Arkansas (Mr. FULBRIGHT).

The PRESIDING OFFICER. Is there objection?

Mr. MANSFIELD. Mr. President, is there objection?

Mr. MUNDT. I have no objection.

The PRESIDING OFFICER. The Senator from South Dakota should offer his substitute before the Chair rules on the request of the Senator from Montana.

AMENDMENT NO. 49

Mr. MUNDT. Mr. President, I call up my amendment in the nature of a substitute and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

Resolved, That a national commitment for purposes of this resolution means a promise to a foreign state or people to use the Armed Forces of the United States in hostilities either immediately or upon the happening of certain events, and that it is the sense of the Senate that, under any circumstances which may arise in the future pertaining to situations in which the United States is not already involved, no national commitment shall be made without appropriate affirmative legislative action and Armed Forces of the United States shall not be used in hostilities on foreign territory unless there has been appropriate affirmative legislative action, except when such use is to repel an attack on the United States, or to meet a direct and immediate threat to the national security or to protect United States citizens and property.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

Mr. FULBRIGHT. Mr. President, the Senator from Kentucky has just entered the Chamber. I want him to understand that he will have an opportunity to offer a perfecting amendment to the resolution.

Mr. MANSFIELD. Mr. President, the Chair has so ruled, has it not?

The PRESIDING OFFICER. The Chair has ruled that a perfecting amendment would be in order.

Is there objection to the unanimous consent request of the Senator from Montana to limit debate? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. Mr. President, if I may have the attention of the chairman of the Committee on Foreign Relations, with respect to the time under the control of the chairman of the Committee on Foreign Relations, I should like to ask unanimous consent that 20 minutes be allocated to the Senator from Indiana (Mr. HARTKE).

Mr. FULBRIGHT. Out of how much time?

Mr. MANSFIELD. Out of the hour.

Mr. FULBRIGHT. I have no objection.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Connecticut is recognized.

Mr. DODD. Mr. President, the issue of how much power the Constitution confers on the President and how much it confers on the legislature in the field of foreign relations is an extraordinarily complex one.

I support the general proposition that there has been an erosion of the power of the legislative branch which requires correction. This is the ostensible purpose of Senate Resolution 85.

I voted for this resolution in the Foreign Relations Committee. I did not, however, have an opportunity to read the majority report which was drafted after the vote because, under the rules of the Committee, reports are circulated before publication only to those members of the Committee who specifically request permission to see the text. This I overlooked.

This report is an important document because if the resolution is approved, the report will become part of the legislative history on which future interpretations of the language of the resolution will be based.

A careful study of the majority report has left me with mixed emotions about the intent and wording of the actual resolution.

There are parts of the majority report which, in my opinion, make an important contribution to the understanding of the problem and which I can support without reservation. On the other hand, there are other sections of the report about which I have the gravest reservations.

Reconsidering Senate Resolution 85 in the context of the majority report, it is now my conviction that Senate Resolution 85 is not a satisfactory vehicle because in certain respects it does not go far enough, while in other respects, it goes too far.

First of all, I understood most of the discussion which took place in Committee as concerned with commitments leading to military involvement or opening the way to military involvement. On reexamination, the resolution turns out to be very vague on this point because it does not really define what is meant by a commitment.

If the language of the resolution is interpreted literally, there should be no executive agreements of any kind with foreign countries; all future agreements should take the form of treaties.

It is my own opinion that there have been far too many executive agreements on matters of substance that should properly have come before the Senate in treaty form.

But it makes no sense to insist that the Senate be required to ratify every single executive agreement, no matter how trivial the subject matter.

I do not, for example, think it is necessary to encumber the Senate with the ratification of an agreement providing for exchange tours by symphony orchestras or providing for a mutual encouragement of tourism through the easing of visa requirements.

On this point, I believe that the purpose of the resolution should be clarified by adding a clause which defines a national commitment as a promise to a foreign state or people to use the Armed Forces of the United States in hostilities, either immediately or upon the happening of certain events.

The second major respect in which the resolution is defective is that it calls for no change in the procedure that has heretofore been followed in the ratification of treaties, a procedure which denigrates the hallowed words "advise and consent" and in most cases presents the Senate with a fait accompli when it is called upon to ratify a treaty.

I shall have more to say about this matter.

The third major weakness I see in the resolution is that its sweeping language would make it impossible for the President of the United States to use our Armed Forces to protect the national security except in the case of an actual armed attack on our country.

And this would be true no matter how grave the emergency that confronted us or how brief the time available for response.

I cannot agree with the finding of the majority report that this is compatible with modern conditions.

The fact is that we live in a gravely divided world and in the nuclear age. The postwar period has abounded in crises, and the chances are that we shall face many more crises before, in God's good time, a solution is found for the cold war.

THE QUESTION OF THE CONSTITUTION

From a constitutional standpoint, there have been impressive arguments and quotations from authorities on both sides of Senate Resolution 85.

The administration has pointed out that when John Marshall was a Member of Congress in 1799, he noted:

> The President is the sole organ of the Nation in its external relations and its sole representative with foreign nations. * * * He possesses the whole Executive power.

The majority report, on the other hand, appears to argue that, because Congress alone has the power to declare war, the executive branch cannot constitutionally involve the United States in military action outside its own frontiers without the prior specific sanction of Congress. The report quotes a number of historical precedents in support of this position.

Neither side, I am afraid, can make a conclusive case on constitutional grounds for the simple reason that the Constitution is flexible enough so that intelligent men can interpret it either way.

I note at this point that the Senator from Idaho in his very able presentation in support of Senate Resolution 85 last Friday, conceded that the constitutional delineation of authority is anything but ironclad. This is what he said:

First of all, I would agree that the precise limit of the authority delegated to the Congress by the Constitution, or the precise limit of the Presidential authority, is subject not only to reasonable argument, but from time to time, in the ebb and flow of history, there have been changes in the precise lines of demarcation.

How we decide to interpret the Constitution, therefore, should depend in the final analysis on recent experience and on the requirements of national security in a period of recurring crises, when events sometimes move with the speed of hurtling missiles.

As a general rule, I would support the argument that, except in emergency situations where there is no time for congressional action, our forces should be committed only pursuant to the ratification of treaties or to joint resolutions of authorization by Congress.

It is my conviction, however, that in the present perilous state of world affairs, it is fortunate that the United States has a Constitution which makes it possible for our President, in crisis situations, to react immediately and vigorously when, in his considered opinion and in the opinion of his advisers, our national security is imperiled.

The rigidity of the resolution's language and its total lack of flexibility worry me all the more because the impression is inevitably created that the resolution constitutes an ex post facto condemnation not merely of our intervention to defend South Vietnam against Communist aggression, but also of our intervention in the Greek-Turkish crisis of 1946, in Korea in 1950, in the Syria-Lebanon crisis of 1957, and in the Dominican Republic crisis of 1965.

Hindsight estimates are always easier than estimates made under the pressure of the moment. But in retrospect it does seem to me that there might have been time for congressional action in the case of the Greek-Turkish crisis, and that the Truman Doctrine, therefore, probably should have taken the form of formal agreements with the Greek and Turkish Governments, subject to congressional approval.

I do not pretend to any certainty about this estimate, however, because the situation at the time was precarious and the Communist guerrillas were at the gates of Athens.

But in Korea and in the Syria-Lebanon crisis and in the case of the attempted Communist coup in the Dominican Republic, several days' delay might have made it too late to do anything.

Even a 24-hour delay might have had disastrous consequences.

These were situations where the United States had to act immediately, or not act at all and suffer disaster.

There were no formal commitments in the case of Korea or in the case of Syria-Lebanon or in the case of the Dominican Republic.

In the case of Korea there was a danger which might have justified a prior commitment. But we foolishly took it for granted that the Communists would not make a full-scale aggressive military attack on South Korea.

In the case of Syria-Lebanon, not merely was there no way of foreseeing the emergency which arose overnight, but, in advance of the crisis, political considerations would have made it virtually impossible for either the U.S. Government or the Syrian or Lebanese Governments to enter into a formal agreement.

In the case of the Dominican Republic crisis, a commitment prior to the attempted Communist coup would have made no sense because there appeared to be no threat. Once again, a completely unforeseen situation arose on an overnight basis which posed a clear threat to our national security.

I know that there were some who said in the period prior to the Cuban missile crisis that we should not get overly excited about Castro, because he was, at worst, a nuisance rather than a dagger pointed at our throat.

We were soon to find out that, despite the natural tendency to hope for the best, the Castro regime was, in fact, a dagger pointed at our throat, and, in reality, it was the worst.

The existence of a Communist stronghold in the heart of the Caribbean poses a continuing threat to our own security and to the security of the Americas. This threat would have been magnified many times over if the attempted Castro-Communist coup in the Dominican Republic had succeeded, because it would, in effect, have turned the entire Caribbean into a Communist lake.

I believe that history will accord our Presidents high marks for the courage and dispatch with which they moved in each of these situations.

In an age of nuclear weapons and blitzkrieg and totalitarian governments, the enactment of Senate Resolution 85, in its present inflexible form, would be an invitation to Communist aggression in both Europe and Asia.

It would, in effect, tell the Communists in advance that the U.S. Commander in Chief had been rendered powerless to react immediately, as Harry Truman did in Korea, as Dwight Eisenhower did in Syria-Lebanon, as John F. Kennedy did at the time of the Cuban missile crisis, and as Lyndon Johnson did at the time of the attempted Communist takeover in the Dominican Republic.

On rereading the resolution, I am not prepared to accept the categorical statement that every single national commitment by the United States must "necessarily and exclusively" result from "affirmative action taken by the executive and legislative branches through means of a treaty, convention, or other legislative instrumentality specifically intended to give effect to such a commitment."

Nor can I agree with the finding of the majority report that this categorical stipulation is compatible with modern conditions.

In the complex and interdependent world in which we live, it is naive to argue, as the report appears to do, that the constitutional power of the President to use our Armed Forces to protect the Nation applies only in the case of an actual armed attack on the United States. As we have learned in two World Wars, our own security can be threatened by events that occur in faraway places.

The recurring talk that one hears today about why we should not get involved in faraway places rings an all-too-familiar historical bell for those of us who recall the course of events that plunged humanity into World War II.

It recalls the well-intentioned folly of that tragic statesman, Neville Chamberlain, when he sought to justify the surrender of the Sudetenland to Hitler by saying that—

Czechoslovakia is a faraway place about which we know very little.

Chamberlain and the British people were very soon to discover that Czechoslovakia was not so far away after all, and that geographic distance did not provide them with the security that they had hoped for.

This is a lesson of recent history which would bear repetition to those who today tell us that Vietnam or Korea are "faraway places." In fact, given the incredible advances in technology since World War II, it is probably no exaggeration to say that Vietnam is as close to us today as Czechoslovakia was to Britain in 1939.

It would be blind isolationism to limit the President to taking action only if and when our own territory is brought under attack by an enemy.

WEIGHING THE RELATIVE DANGERS

Admittedly, there are dangers in conceding to the President the limited power to commit American forces in crisis situations where the national security is menaced but where there is no time for congressional action.

It is my belief, however, that the danger of a Presidential decision is largely imaginary because no President would act to commit American troops without the advice and support of his experts and of the National Security Council and the Cabinet.

Every President, moreover, inevitably acts with public opinion in mind because, so long as our country remains a democracy, he has to think in terms of continuing political support for his administration and for his party. This basic fact of political life, too, militates against arbitrary or whimsical decisions in the field of foreign policy by any President.

On the other hand, there is a very real danger that we will be faced with crisis situations where even 24 or 48 hours' delay could have disastrous consequences.

In his speech in support of Senate Resolution 85, the Chairman of the Foreign Relations Committee suggested that we have now concentrated so much power in the hands of the President in the field of foreign policy that, by contrast, the Soviet emphasis on collective decision-making sounds "almost Jeffersonian." He quoted Premier Kosygin as saying:

In our country it is the collective that works. And herein lies our strength. If one makes a mistake, others set him right.

Premier Kosygin, of course, was talking about the Soviet Politburo, the small group of Communist tyrants who rule the Soviet peoples with absolute power. I am sure that he did not mean that questions of foreign policy are submitted for discussion to the rubber stamp Congress of Soviets or even to plenary sessions of the executive committee of the Communist Party.

Moreover, the record is clear on the point that the Soviet Politburo does not have to contend with any challenge to its decisions by a foreign relations committee of the Soviet Congress, or with any other challenge within the Soviet Union.

But, more than this, it is misleading to imply that any American President would act, even in the gravest crisis, purely on the basis of his personal predilection.

When President Johnson acted in the Dominican Republic crisis, for example, he did so on the basis of the unanimous recommendation of all the officers of our Embassy in Santo Domingo, and of all the State Department and White House officials concerned with Dominican Republic affairs. The decision, moreover, was not so much a personal decision as a decision of the National Security Council and of the Cabinet.

Above all, I want to take issue with the charge made by the Senator from Arkansas in his opening statement that the conduct of our foreign policy in recent policy in recent years has been moving our country both in the direction of becoming an empire and in the direction of a dictatorship. "If America," he said, "is to become an empire, there is very little chance that it can avoid becoming a virtual dictatorship as well."

I take issue with this statement on both scores.

America has not sought and does not seek to become an empire or to acquire colonies or to impose its rule on other nations.

On the contrary, the entire thrust of our foreign policy since the close of World War II has been anti-empire.

On the one hand, it has been directed toward the dissolution of the old Western colonial empires.

On the other hand, it has been directed against the expansion of the Soviet empire in Central Europe and the creation of parallel Communist empires on a regional basis by Mao Tse-Tung and Ho Chi Minh and Fidel Castro.

The world we seek is a world of free nations, where the strong and the weak alike can live without fear of attack or of organized subversion from abroad.

In the several situations where we have intervened, it has not been for the purpose of establishing our own empire, but for the purpose of defending free nations and preventing expansion of the Communist empire.

I am aware that no administration is infallible, and that the best administration can make mistakes.

Admitting the possibility of mistake, however, I think it is the grossest kind of distortion to argue that the executive power about which the Senator from Arkansas complains has moved our country in the direction of dictatorship or threatens to move it in that direction.

The fact is that the post-World War II period, which seemed to be the prime target of the Senator's criticism, has in our country been characterized by the most rapid and most remarkable expansion of freedom and civil rights in history, notwithstanding the massive contraction of freedom within the expanding Communist empire.

Most of us now in the Senate remember the battle for real freedom in the very recent past.

We remember the debates and we remember the votes.

We know the hard fight to win those victories.

We know where we all stood on those basic issues of freedom.

And history will not forget.

THE ABDICATION OF CONGRESS

Mr. President, as I have already indicated, I agree with the purpose of the resolution insofar as it points to an erosion of the constitutional power of Congress in the field of foreign affairs.

This erosion has not been due exclusively or even primarily to usurpation by the executive branch.

To a very large degree, it has been due to the fact that there has in recent decades been a marked tendency on the part of Congress tc voluntarily abdicate its legitimate powers to the executive branch.

I, myself, have had occasion to complain many times since I first entered the Congress in 1953, about the erosion of the legislative power, especially in the field of foreign policy; about the excessive willingness of Congress to leave decisions to the President's discretion, and about the growing tendency to take executive action without consulting Congress and to substitute executive agreements for treaties.

I recall, for example, that when the sale of wheat to the Soviet Union was discussed in the Senate in October 1963, I urged the President and his advisers not to attempt to accomplish through a questionable executive action what they could not accomplish through the legislative process.

I said:

Without any approval from Congress, in fact, in the face of expressed Congressional disapproval, our government is to sell to Russia subsidized wheat at a price substantially below that paid for it by the American taxpayer. This would be, in effect, an initial subsidy to Russia of more than 100 million dollars. Only a few weeks ago this would have been unthinkable, as it was in 1961 when Congress passed Public Law 87-128 which states the Sense of Congress that subsidized agricultural commodities should not be made available to the Soviet Union or to countries dominated by the U.S.S.R.

In a second statement on October 8, 1963, I again urged the administration to act in consultation with Congress and I submitted a resolution calling for the establishment of a Select Committee on the Sale of Surplus Agricultural Produce to Communist Countries.

The resolution specified that the committee should submit its report to the Senate no later than January 31, 1964, and it declared it to be the sense of the Senate "that no sale of wheat or agricultural surplus should be concluded with the Soviet Union or any other Communist country until the results of the study are available for the guidance of the administration."

In my statement supporting the resolution I said that the proposed sale of wheat to the Soviet Union was a matter of very great importance that had serious implications, for better or for worse, from the standpoint of the free world.

I said further that it was the kind of matter that called for conscientious study and which should be the subject of careful consultation between the executive and the legislative branches.

The Foreign Relations Committee held no hearings on this resolution and took no action on it. And my recollection is that only a very small number of Senators expressed support for the position I then took.

The attitude of the majority of the Senate and of the Foreign Relations Committee at the time apparently was that this entire matter should be left to the discretion of the executive branch, and that there was no need for consultation with Congress.

The period prior to the Soviet wheat crisis of 1963 had been one of intense and unremitting cold war activity on the part of the Kremlin.

In November 1958 there was the Berlin ultimatum. This ultimatum was followed by a whole series of missile-rattling perorations by Mr. Khrushchev; by the bloody riots in the Panama Canal; and the establishment of a Communist regime in Cuba in January of 1959.

In August of 1960 there was the unilateral Soviet resumption of atmospheric testing of nuclear weapons. In the same month there was the attempted Soviet takeover in the Congo.

In the month of December 1960 the Communist insurrection was launched in Laos with overt Soviet military backing.

In August 1961 there was the Berlin wall.

In October 1962 there was the Cuban missile crisis.

It was against this background that the United States, by executive action in October 1963, moved to save the Soviet Government from the consequences of its own disastrous agricultural policies.

This we did by selling them several hundred million dollars' worth of wheat at a subsidized price, with concessions on freight rates and on long-term credits thrown in, and without conditions of any kind.

We did not ask that they call off the cold war. We did not even ask that they identify the wheat they were receiving from the United States as American wheat. We asked nothing.

I do not mean to imply by this that I was completely opposed to the sale of wheat to the Soviet Union. But, as I said at the time, I think it would have been better to give them the wheat, provided it was properly identified, rather than sell it to them on terms so disadvantageous to ourselves.

For saving the Soviet Government at the time from the critical food shortage which threatened it, we have been repaid over the intervening years by the Vietnam war, by the Mideast war of 1967 which the Soviets fomented, by the invasion of Czechoslovakia, and by a

stepped-up campaign of political subversion in many parts of the world.

This, of course, should surprise no one.

I make this point only to underscore the fact that the national interest was directly involved in the sale of wheat to the Soviet Union and that Congress should have played an active role in the decision.

I relate this entire incident for the purpose of establishing that I am not any Johnny-come-lately on the proposition that Congress has abdicated too much of its power to the executive branch.

Among other things, I believe that we must seek to reverse this trend through a new set of rules under which the Senate will not be called upon to rubberstamp treaties that have already been negotiated but will, instead, be actively consulted during the initial planning for treaties and agreements.

Although the Senate Resolution 85 says nothing about this, I am convinced that the Senate will never be able to play its proper constitutional role in the conduct of foreign affairs unless its advice and consent become far more than the formalities they have been for many years.

Let me illustrate this point by recounting some recent history.

In March of this year the Senate ratified the Nuclear Nonproliferation Treaty. I voted for this treaty; but, in the course of the debate, I offered two understandings to the resolution of ratification aimed at strengthening the treaty and making it more effective.

The first understanding was directed against a repetition of the Czechoslovak invasion which, incidentally, took place little more than a month after the treaty was signed, in flagrant violation of the language of the preamble.

This understanding simply provided that after the treaty had been ratified, any attack directed against the independence of another country by a nuclear weapons state party to the treaty, would be regarded as a violation of the spirit of the treaty justifying the withdrawal of the other signatories.

The second understanding was:

> The United States shall deposit its instrument of ratification simultaneously with the Soviet Union, at a time to be agreed upon.

These understandings, even though they did not alter a single word of the treaty, were rejected by the great majority of the Senate and the Foreign Relations Committee, apparently on the theory that it is inadvisable to tamper in any way with a resolution of ratification.

But, despite the fact that the Senate refused to incorporate these understandings in the resolution of ratification, I was informed at a later date by an authoritative source that the administration did intend to hold out for the simultaneous deposit of the instruments of ratification, as had been proposed by my second understanding.

What all of this boils down to is that a majority of the Senate seemed prepared to downgrade to a mere formality the Senate's role in advising and consenting to the ratification of the Nonproliferation Treaty.

It is not merely the Nonproliferation Treaty that is involved, although this is the most recent case in question.

On most major treaties that have come before the Senate, in my experience, the terms of the treaty have been negotiated without any serious consultation with the Senate, and the Senate, in consequence, has been confronted with a fait accompli.

On the one hand, it is difficult, if not impossible, to alter the wording of a treaty after it has been negotiated, especially when it has been negotiated on a multilateral basis as was the case with the Nonproliferation Treaty.

On the other hand, Senators, even though they may have grave reservations about individual clauses of a treaty are always reluctant to refuse ratification because of the obvious damage that such a refusal would do to our world standing and to the administration's conduct of foreign affairs.

I myself have been in this position a number of times, and I know that this holds true for many of my colleagues.

One of the most dramatic instances I recall was the Nuclear Test Ban Treaty of 1963.

I supported this treaty, and I have reason for believing that my resolution of May 27, 1963, which was cosponsored by 33 other Senators, had a good deal to do with making the treaty possible.

But when the treaty was presented to the Senate for ratification in August 1963, we discovered that the wording, for some reason which has never been explained, not merely prohibited test explosions of nuclear weapons in the atmosphere, but also prohibited nuclear explosions for peaceful purposes under international supervision.

Now it appears that both the Soviet Union and the United States are moving in the direction of correcting this original blunder.

But when the treaty came before the Senate, and when some of us expressed concern about this aspect of the treaty, we were told that we must not seek to amend it because this might jeopardize the agreement; that we should not rock the boat.

All this points to the conclusion that the time for the administration to seek the advice of the Senate on a treaty is not after it has been negotiated, but before negotiations are entered into and, repeatedly, in the course of the negotiations.

Mr. President, as a matter of general principle, I favor maximum consultation between the administration and Congress whenever such consultation is possible.

I favor it not only where treaties and national commitments are involved, but also on vital issues of foreign policy like the sale of wheat to the Soviet Union.

I agree that American forces should not be committed in any situation unless this commitment is supported by affirmative legislative action.

I also believe that this general principle must not be interpreted so inflexibly that it leaves no room for immediate response in crisis situations.

To put an end to the circumvention of Congress by Executive agreements, I would like to see an understanding between the executive and the legislative branches stipulating what types of matters should be handled by Executive agreement, and what types should be submitted in treaty form for ratification by the Senate.

Mr. President, I believe that the substitute amendment which Mr. MUNDT and I introduced yesterday, and which is at the clerk's desk, is the best answer to our problem.

I believe that this amendment is superior to the original text of Senate Resolution 85 in the following ways.

First, it provides a clear definition of a national commitment.

Second, it establishes the general principle that "no national commitment shall be made without appropriate affirmative legislative action, and Armed Forces of the United States shall not be used in hostilities on foreign territory unless there has been appropriate legislative action."

Third, it recognizes the fact that situations may arise in which the President will have to act without delay to meet a direct and immediate threat to the national security or to protect U.S. citizens and property.

I believe that the language of this substitute resolution accomplishes what Senate Resolution 85 set out to do, more specifically, more effectively, and more flexibly.

I hope that it will receive the earnest consideration of Senators and that it will be adopted by the Senate.

But, as matters stand now, in view of the world situation, I cannot vote for Senate Resolution 85.

It is for these reasons that I have joined the Senator from South Dakota in submitting the substitute amendment, and for no other reason.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FULBRIGHT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. FULBRIGHT. Mr. President, do I correctly understand that the Senate is now operating under a unanimous-consent agreement?

The PRESIDING OFFICER. The Senator is correct.

Mr. FULBRIGHT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The quorum will be charged to whose time?

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FULBRIGHT. Mr. President, I yield to the Senator from Kentucky as much time as he may require.

Mr. COOPER. Mr. President, I send to the desk amendments en bloc.

The PRESIDING OFFICER. Does the Senator ask unanimous consent that his amendments be in order at this time?

Mr. COOPER. Yes. Mr. President, I ask unanimous consent that my amendments be in order at this time.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DIRKSEN. Mr. President, I wish to make sure the RECORD will show that after the proposal is offered and has been accepted, it will still be subject to amendment.

The PRESIDING OFFICER. It would not be subject to amendment unless the unanimous consent request is made that the amendments be considered as original text for the purpose of amendment.

Mr. COOPER. Mr. President, I ask unanimous consent to modify the text of the resolution offered on behalf of the Committee on Foreign Relations so that it will read in conformity with the language which has been agreed upon by the chairman of the Committee on Foreign Relations (Mr. FULBRIGHT) and me.

The PRESIDING OFFICER. Is the Senator from Kentucky also asking that this language be considered as original text for the purpose of amendment?

Mr. COOPER. Yes.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. DIRKSEN. I do not object, Mr. President. I only want the RECORD to show that the amendments will be open to amendment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kentucky? The Chair hears none, and it is so ordered.

The amendments offered by Senator COOPER are as follows:

On page 1, line 1, after "That" insert the following: "(1) a national commitment for the purpose of this resolution means the use of the armed forces of the United States on foreign territory, or a promise to assist a foreign country, government, or people by the use of the armed forces or financial resources of the United States, either immediately or upon the happening of certain events, and (2)".

On page 1, lines 2 and 3, strike out "to a foreign power necessarily and exclusively results" and insert in lieu thereof "results only".

On page 1, line 5, strike out "through" and insert in lieu thereof "by".

On page 1, lines 5 to 7, strike out "convention, or other legislative instrumentality specifically intended to give effect to such a" and insert in lieu thereof "statute, or concurrent resolution of both Houses of Congress specifically providing for such".

Mr. FULBRIGHT. Mr. President, I yield 20 minutes to the Senator from Indiana.

Mr. HARTKE. I thank the Senator.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

RESOLUTION ON NATIONAL COMMITMENTS

Mr. HARTKE. Mr. President, I wish to speak in favor of Senate Resolution 85. The resolution is neither a proposed law nor an amendment to the Constitution. It is, in the refreshingly modest language of the Senate report, an invitation. An invitation "to the executive to reconsider its excesses, and to the legislature to reconsider its omissions, in the making of foreign policy, and in the light of such reconsideration, to bring their foreign policy practices back into compliance with the division of responsibilities envisioned by the Constitution."

Despite the valid practices and procedures established in the last century, during this century, and particularly in the last 20 years, U.S. foreign policy has been conducted in a manner dangerous to democracy in the United States, to the freedom of its people, and to their welfare. While the exact extent of Congress' role in the formation of foreign policy is not clear, it is clear that Congress does have a constitutionally vested role and that in two important areas of foreign affairs, that of the war powers and of approving treaties, Congress' role is exclusive.

The usurping of Congress' role in the last 20 years has resulted in a growing belief in and a dangerous acceptance of the executive's right to commit this country to war under all circumstances. During the Glassboro summit, several commentators and the State Department cautioned the public not to expect too much from the summit, because Mr. Kosygin representing the Soviet Union did not have the same authority to commit his country that President Johnson had. Apparently, few were aware of the irony that the representative of the most popular based government had more personal power than the representative of an autocratic and monolithic government. Under Secretary of State Nicholas Katzenbach, in his testimony before the Senate Foreign Relations Committee on August 16, 1967, made probably the most extreme statement of this new concept of constitutional nullity. It amounted to a doctrine that the constitutionally defined role of Congress is merely a historical curiosity, and the Senate's function to advise and consent is merely a matter of executive courtesy. The Senate is not expected to advise but to approve.

The present resolution brings into question the wisdom of concentrating foreign policy decisions in one branch of government and the concomitant abandonment of constitutional safeguards and congressional oversight. Gibbon, in the "Decline and Fall of the Roman Empire," wrote:

It was on the dignity of the Senate that Augustus and his successors founded their new empire . . . In the administration of their own powers, they frequently consulted the great national council, and seemed to refer to its decision the most important concerns of peace and war . . . The masters of the Roman world surrounded their throne with darkness, concealed their irrestible strength, and humbly professed themselves the accountable ministers of the Senate, whose supreme decrees they dictated and obeyed . . . Augustus was sensible that mankind is governed by names; nor was he deceived in his expectation, that the Senate and the people would submit to slavery, provided they were respectfully assured that they still enjoyed their ancient freedom.

I do not suggest an analogy between imperial Rome and the United States, but in both, military action abroad has weakened legislative controls at home. Time and time again Congress has discovered that U.S. foreign policy is determined or conditioned by actions that it neither directly authorized nor implicitly knew.

Only a newspaper story alerted Congress to the possible danger of a NATO-like alliance with Spain being made by military memorandum. The stationing of some 50,000 American soldiers in Thailand has changed the nature of our commitment to that country—a commitment in no way suggested by any existing treaty.

Low-level military and civilian officials have frequently undertaken a course of action, attributed in only the most theoretical sense to Presidential decision, which in incremental steps has determined the shape and direction of U.S. foreign policy. The ill-fated introduction of Chiang Kai Shek's forces into Burma has left a residue of difficulties in that country. It has also created persisting problems in Laos, and in Northern Thailand, where about 1,200 miles of Thai territory are under the de facto administration of Kuomintang troops.

The transporting by our military of large numbers of Cambodian South Vietnamese, after providing training with our forces and with the South Vietnamese Army, across Cambodia to the Thailand frontier, where they are mounting attacks regularly into Cambodian territory, cannot but affect and undermine U.S. foreign policy. Clearly if Congress is to have a responsible role in the field of foreign policy it has to be advised of such situations.

Southeast Asia is not the only place that activities of minor U.S. officials, unknown to the President or Congress, are determining action which will shape our foreign policy. Although everyone now says that we cannot be the world's policeman, we have in the past, and I expect are presently, maintaining a constabulary for small South American countries. Not only does the United States support South American armies and police, but U.S. soldiers have on occasion engaged in actual combat against native rebels. U.S. rangers have battled the forces of Yon Sosa and Cesar Montes, two Guatemalan guerrilla leaders. Green Berets have also been in Colombia.

The control of local violence should be the exclusive province of local authorities. U.S. intervention in a situation whose eventual outcome and underlying justice is far from clear, is extremely unwise.

What is clear, however, is that these activities do affect our relationships with South American countries. I wonder if there is any connection between this kind of U.S. activity and the recent reception afforded Governor Rockefeller.

In any case, what is important for this discussion is that Congress does not know the full extent of U.S. activities in South America. These various examples are to me sufficient justification and adequate reason for the adoption of Senate Resolution 85.

I would like to discuss some of the arguments in opposition to this resolution. One argument views this resolution as a battle of wills between the Senate

and the President and rather unnecessarily concludes with its belief in a strong President. I also believe in a strong President—and a strong Nation, for that matter. But the concept of a strong President is not involved in this resolution. What is involved is accountability. This resolution holds that decisions involving the continued existence of this country shall be made by people accountable for their actions. We have an elaborate network of safeguards to protect a person's liberty at home but no procedural checks on millions of American soldiers being sent abroad to die. Should not there be some way to relate action abroad to foreign policy and policy to action?

Discussion of this resolution and of similar topics use the language of law and of political science without acknowledging the diffuse reality behind the neat phrases. While we call the President Commander in Chief, he will never be like Henry V a leader of a small band of brothers. The President is the organizational head of an extremely complex bureaucracy and a vast military apparatus. With the best of will, he can only know a fraction of what is happening.

This resolution, suggesting that certain kinds of actions be undertaken only with congressional approval and with the knowledge of high governmental officials, will strengthen rather than weaken the Presidency. It should be remembered that unexercised legislative power does not flow smoothly and directly to the President but rather is diffused throughout the bureaucracy to be arbitrarily exercised in darkness.

Some argue that the language of this resolution is not precise. But I would argue that a degree of imprecision is necessary because the relationship between the legislative and executive branch in the formation of foreign policy must remain, to some degree, ambiguous and flexible. This resolution merely confirms the existence of that relationship without defining it.

I would think that those bothered by the resolution's lack of precision would be even more concerned about the multitude of our vague commitments and the various ways they are established. Nothing could be as vague and as ill-defined as some of our commitments. No American soldier will die because this resolution is vague. Can we say the same about our commitments?

Besides these treaties of vague commitments, various policy statements, Executive orders, Executive assertions, and Executive letters are cited as evidence of our commitments abroad. For example, on October 25, 1962, a letter by President Kennedy to Crown Prince Faisal of Saudi Arabia, stated:

> Under your firm and enlightened leadership, I am confident Saudi Arabia will move ahead successfully on the path of modernization and reform which it has already chartered for itself. In pursuing this course, you may be assured of full United States support for the maintenance of Saudi Arabia's integrity.

This letter now is cited as constituting a commitment by the United States. I leave to the imagination of my colleagues the possible interpretations of this broad assurance.

Others argue that the urgency of the modern world renders congressional approval impractical. No one would suggest hindering the President's ability to respond to sudden attack. The fact, however, that action can be taken within hours does not make it necessary or wise. Also, many of our questionable actions abroad were the cumulative result of a series of gradual steps. Certainly, in a nuclear holocaust, a declaration of war would be an antiquated concept. Paradoxically, however, the looming presence of a possible nuclear holocaust lessens the possibility of the use of nuclear weapons and increases the likelihood that future wars will be fought by conventional means. In such situations, congressional confirmation is not only possible but necessary.

Finally, there is the allegation that support of this resolution "smacks of neoisolationism." Instead of neoisolationism I believe that we have gone from isolationism to interventionism without ever having arrived at internationalism. Our past isolationism and our present interventionism results from the same sense of moral and national superiority. This resolution seeks not to end U.S. involvement in world affairs, but to seek an involvement that does not abuse our power abroad nor impair our free institutions at home. One does not have to be a pacifist to find something amiss in the charge of the light brigade.

In conclusion, I would suggest two further actions that will help Congress establish a more reasonable, reasoned, and responsible foreign policy. I suggest a thorough review by Congress of all executive agreements. Seeking approval always entails some risk of rejection and personal pain. Secretary of State John Hay reflected this personal pain, perhaps to a heightened degree, when he wrote:

> A treaty entering the Senate is like a bull entering the arena. No one can say just how and when the final blow will flow. But one thing is certain—it will never leave the arena alive.

The executive branch of Government increasingly uses the executive agreement to escape the ordeal of dealing with the Senate. As the committee report states, in many instances, the traditional distinction between the treaty as an instrument of a major commitment and the executive agreement as an instrument of a minor one has been reversed.

In 1939, 10 treaties and 26 executive agreements were concluded by the United States. In recent years, there has been a startling increase in the number of executive agreements compared to the number of treaties. In 1936, nine treaties were concluded to 248 executive agreements.

In 1964, 13 to 231.
In 1965, 5 to 197.
In 1966, 10 to 242.
In 1967, 10 to 218.
In 1968, 57 to 226.

Obviously, our increasing involvement in world affairs justifies many of these executive agreements. I believe, however, that a thorough congressional evaluation of these executive agreements would reveal many that are more properly a matter for treaty. Also, such an evaluation would reveal various commitments that should be appreciated by Congress.

I also suggest that the Secretary of State submit to Congress a yearly posture statement. A Secretary of State posture statement would be a healthy counterbalance to the Secretary of Defense posture statement and would help to formulate foreign policy on the basis of diplomatic rather than military considerations. Since military actions abroad, and even weapons systems, are justified as necessitated by our foreign commitments, it is imperative that Congress have a clearer understanding of those commitments. The Secretary of State posture statement would outline our overseas commitments and analyze their present needs, indicate their future development, and relate these commitments to the military posture of the United States.

Mr. President, the first order of business before us is to approve Senate Resolution 85, to make unmistakably clear the sense of this body with respect to constitutionally appropriate procedures for undertaking national commitments. Having done that, I would most earnestly urge the Committee on Foreign Relations and its distinguished chairman to follow up this magnificent service to the Nation with steps to implement the two suggestions I have offered this afternoon: A thorough review of all existing executive agreements and a requirement that the Secretary of State provide Congress with an annual posture statement.

Taken together, these three actions can contribute importantly to a restoration of that reasonable and necessary balance in our constitutional system from which we have so dangerously departed.

Mr. FULBRIGHT. Mr. President, will the Senator from Indiana yield?

Mr. HARTKE. I am happy to yield to the Senator from Arkansas.

Mr. FULBRIGHT. I thank the Senator for a fine contribution to the debate on this subject. He has taken a great interest in it in the past, and I think he has made a great contribution to a better understanding of what the committee is trying to do.

Mr. HARTKE. I thank the distinguished chairman of the Committee on Foreign Relations.

Mr. COOK. Mr. President, will the Senator from Arkansas yield?

Mr. FULBRIGHT. How much time does the Senator from Kentucky require?

Mr. COOK. Ten minutes.

Mr. FULBRIGHT. Mr. President, I yield 10 minutes to the Senator from Kentucky.

The PRESIDING OFFICER. The Senator from Kentucky is recognized for 10 minutes.

Mr. COOK. Mr. President, the Constitution is clear in pointing out that the power to declare war is exclusively vested in the Congress with one important exception: the undisputed authority of the President to repeal a sudden attack on the United States. Much has already been said, and does not need repeating by a freshman Senator, about the instances of erosion of this constitutional authority, primarily during the last 50 years, by acts of the Executive and subsequent acquiescence by Congress to the consequences of those acts. My colleagues, Senators FULBRIGHT and

CHURCH, among others, have traced in great detail, the examples of Executive encroachment, or should I say congressional deference, in the area of foreign troop commitments. Now, the time has come for the Senate, having been apprised of the facts, to render its judgment.

Several alternatives to Senate Resolution 85 have been suggested. I favor and shall vote for the substitute proposal offered by the senior Senator from my own State (Mr. COOPER). The Cooper substitute is, in my view, preferable to Senate Resolution 85, because it clearly defines the term "national commitment" rather than relying entirely upon the committee report and legislative debate to establish meaning. In addition, this definition is rightly limited to the commitment of Armed Forces or financial resources abroad. Further, the substitute specifically pronounces that it would be the sense of the Senate that a national commitment, as defined previously, would result only from affirmative action taken by the Executive and the Congress by means of a treaty, statute, or concurrent resolution of both Houses.

The substitute for Resolution 85 offered by the distinguished Senator from South Dakota (Mr. MUNDT) would seem to be unsatisfactory, in that it includes language which would allow the Executive to act in the absence of congressional authority to "meet a direct and immediate threat to the national security." While I commend the Senator for his position that some resolution is needed indicating the sense of the Senate that the Congress intends to be heard before future foreign troop commitments are made, I fear that his language would give the Executive an unsolicited and ill-advised carte blanche in the name of national security to deploy forces about the world at will.

Also, the Mundt substitute contains another exception to that kind of national commitment which would require congressional authorization. This would allow the executive to commit troops "to protect U.S. citizens and property." This exception, in my opinion, would be extremely unwise because this excuse has already been used entirely too often to justify unauthorized foreign troop commitments by the executive, the most recent example of which was the intervention in the Dominican Republic in 1965. If a situation arises in which our citizens and property in a foreign land are in great jeopardy and the executive can demonstrate this danger to the satisfaction of Congress, I am certain this branch would not fail to support any legitimate action.

Mr. President, I feel that Congress would be in a poorer position under the Mundt substitute than it is now. At the present time, in the absence of a resolution, any liberty the executive takes is through its own initiative, accompanied by the acquiescence of Congress. Under the Mundt resolution, the executive is almost invited to ignore Congress in committing troops to foreign lands and is given the option of declaring its action as necessary for the "national security" or needed "to protect U.S. citizens and property." Historically, too many ill-advised actions have been taken by this Nation under these guises. Definitions of the terms "national security" or "to protect U.S. citizens and property" are too vague and varied to be meaningful as a restriction on the executive. Again, I commend the Senator for his feeling that some resolution is needed, but I would respectfully suggest that a much stronger proposal, such as the Cooper substitute, is required.

The main arguments which have been raised against the passage of any resolution are:

First, that foreign affairs are just too complicated for the average citizen, including Members of Congress, to grasp; and

Second, that great speed is necessary to respond to grave threats to the Nation's survival.

The rebuttal to these contentions can be briefly stated. Members of Congress, especially the Senate, not only have the intelligence but a constitutional responsibility in the area of foreign commitments. In addition, in a number of situations in recent years which were hastily labeled emergencies, American policies would have profited from brief delays to facilitate proper deliberation.

It is important to remember, as the Senator from Idaho (Mr. CHURCH) so articulately put it recently:

> Nothing in the Constitution prevents and no one in the Congress would ever try to prevent the President from acting in a genuine national emergency.

It is also true that a sense-of-the-Senate resolution cannot bind the President, but I think it important that the Senate, as a body, make known its intention to regain its constitutional prerogatives.

It has been said many times before, but certainly bears repeating, that a national commitments resolution passed by this body is not directed at any President as an individual. Support for such a resolution has been found under both a Democratic and a Republican President, and it cuts across party lines and transcends ideology. Passage of this resolution is merely a long overdue notice to the Presidency, as one of the three branches of our Government, that the Congress will again be heard in the matter of foreign troop commitments of this country.

As Prof. Hans Morgenthau pointed out recently in the New Republic, the resolution imposes no constitutional obligation upon the President, but does provide "a political weapon." The importance of this resolution, as that very "political weapon," should not be underestimated because it signals an end to congressional acquiescence to unauthorized commitments of American men and financial resources abroad.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. COOK. I yield.

Mr. FULBRIGHT. I wish to commend the junior Senator from Kentucky for his penetrating and appropriate remarks about the resolution and also about the constitutional relationship between the executive and legislative branches of Government. When I was a first-term Senator, in the same position as the junior Senator from Kentucky, if a similar debate and question had been before the Senate and my attention had been drawn to the responsibilities of the Senate, as the senior Senator from Kentucky (Mr. COOPER) has done in connection with this resolution, I think I would have been a better Senator. I know I missed some opportunities to assert the proper function of the Senate when I was a junior Member of this body.

I am particularly pleased to have the junior Senator from Kentucky take the interest in this matter that he has. I am quite certain that he is making a better contribution to the future government of the country by reason of his participation in this debate.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. COOK. I yield to my colleague from Kentucky.

Mr. COOPER. I commend my colleague on a powerful and well-reasoned speech, a speech which shows that he has studied this subject carefully and is familiar with the constitutional process. As a new Member of the Senate, his study of this broad question has made a great contribution to all of us. I think it should give my colleague great satisfaction.

Mr. DIRKSEN. Mr. President, I yield 15 minutes to the distinguished Senator from Colorado (Mr. DOMINICK).

Mr. DOMINICK. Mr. President, I rise only to set the record straight on my position in this particular debate, particularly as my name was used and some comments were used on page 4 of the report on Senate Resolution 85 as issued from the Senate Foreign Relations Committee. On page 4 of that report I printed part of the statement which I made concerning Senate Resolution 151. I issued the statment at that time, 2 years ago, to set forth my views on the importance of taking action to clarify the relationship between the President and Congress with regard to "national commitments." I have not changed my position at all as to the importance of defining who has the power to make certain commitments, but I do not want my colleagues in the Senate to misinterpret the statement made in 1967 as favoring the specific language in the resolution that was Senate Resolution 151 and is now Senate Resolution 85.

It seems to me that any wording we adopt should reflect the exact position of the Senate as to where this power lies, and any resolution must make it clear that what we are talking about is the commitment of Armed Forces in hostilities in other countries against other states or people.

So, Mr. President, I ask unanimous consent that the full text of my 1967 statement be printed in the RECORD at this point in order to clarify my position.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR PETER H. DOMINICK, SENATE RESOLUTION 151

Mr. Chairman and distinguished members of the Committee on Foreign Relations, within the entire framework of inter-governmental relations there exists a lack of a clear definition as to the meaning of the word "commitment." It is evident in domestic programs as well as in our relations with other nations. I commend the distinguished Chair-

man for his authorship of this resolution and the committee for undertaking action to clarify this term as it applies to actions by representatives of this government and representatives of any foreign power. Your resolution could well open the door to clarification of precisely what constitutes a national commitment and the specific requirements for its binding creation. It is of immense importance to define just who, in fact, has such power. I believe the records should provide answers as whether such power can be delegated and if so to what extent and under what circumstances can the power to commit this nation be delegated. Of particular significance would be a determination as to what extent a national commitment which is binding upon the United States can result from an impromptu meeting between our President and the Head of a foreign power. In the past, such meetings have produced agreements which, while not having status of treaties, have had the effect of binding this nation to fulfill obligations of enormous and far reaching proportions. And we have seen the Vice President assume the power to obligate our taxpayers for large financial expenditures without prior consultation with the Congress.

It strikes me that the situation which now confronts us occured to our forefathers as they labored to draft our Constitution. I believe this concern was inherent in George Washington's admonition against foreign entanglements.

I do not believe that an after-the-fact briefing can qualify as consultation within the meaning of our Constitution. More nearly what exists today is that Congress no longer is requested to advise on matters of foreign relations, only to consent to what has already been reduced to finality.

We need to re-define with utmost clarity the limitations imposed upon the power of the President by the Constitution and the responsibilities clearly assigned to the Congress. At present there exists the interpretation that the Senate has but four ways in which it may exercise any degree of control in our foreign relations. But, are they adequate?

First. The right of review and confirmation of Presidential appointees has, in terms of present day concepts, been rendered relatively ineffective.

Second. The Senate is called upon to advise and consent to treaties in an almost perfunctory manner, and most often after the fact.

Third. The power to declare war has been circumvented by the assertion of the powers of the President as Commander in Chief of the Armed Forces.

Fourth. The responsibility imposed upon Congress to raise and support armies has been seriously undermined for the reason that once the President has committed our Armed Forces into conflict Congress has no alternative but to provide for their effective support.

None of the foregoing four Congressional responsibilties seem realistic in this day and age when it has become acceptable for the President to move our troops into any area at any time whenever he determines that we have a "commitment" to do so.

Congress has not been asked to declare war since 1941, and even then we were in fact already at war. Since 1941, we have been involved in two major conflicts and numerous incidents of American military personnel being sent into hostile areas without prior consultation with Congress. The most recent of such incidents occurred last month and involved our sending C–130 jet aircraft into the Congo.

There is serious room to question whether this action could be justified under the constitutional authority of the President, as Commander-in-chief, to order American military personnel to foreign soil to repel attack, protect the lives and property of U.S. citizens, or to fulfill United States treaty obligations.

It is of utmost importance that any ambiguity which exists, by interpretation or otherwise, in the limitations imposed by the Constitution upon the powers of the President and the responsibilities and powers of the Congress be clarified.

I appreciate the opportunity to be heard on this question of such overriding importance to the future of our nation.

Mr. DOMINICK. Mr. President, as has been stated here, Presidents, with very few exceptions, did seek the authority of Congress prior to committing our Armed Forces to hostile actions against other states through the 19th century. No exact date or event can mark the turning point, but the direction was clear early in the 20th century. It has accelerated in the past 20 years.

The most flagrant use of power by a President without congressional authorization, or even consultation, was in 1967, when President Johnson acted in the Congo incident. In a letter to the President, in which 17 of my colleagues in the Senate joined, I expressed my deep concern about the unilateral action taken by the executive department in deploying American military aircraft, materiel, and personnel into the area, without prior consultation with appropriate committees of Congress. The public was told that the purpose was to insure safety of Americans in the area, and then later told that the action was motivated by the need of the Government of the Democratic Republic of the Congo for logistical support. Our aircraft and personnel engaged in missions to transport Congolese troops, vehicles, food, and communications equipment around the Congo, and also transported aviation fuel for Congolese jet fighter aircraft manned by Ethiopian-trained pilots. The United States had no political commitments which necessitated such involvement in a local, internal dispute. The safety of American civilian personnel could have been insured through use of civilian aircraft.

At this point I ask unanimous consent to have printed in the RECORD my letter of July 28, 1967, together with the names of Senators who cosponsored it with me.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
July 28, 1967.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We have veiwed with serious concern the recent events that have transpired in the Democratic Republic of the Congo and are utterly dismayed by the unilateral action taken by the Executive Department in deploying American military aircraft, materiel and personnel into the area.

This action was taken without prior consultation with appropriate committees of Congress, and the public was told that the purpose was to insure safety of Americans in the area. After the deployment, we were told that the action was motivated not for such purpose, but by the need of the government of the Democratic Republic of the Congo for logistical support.

It is our understanding that these aircraft and our personnel have engaged in more than 35 missions during which we have transported Congolese troops, vehicles, food and communications equipment around the Congo, and have transported aviation fuel for Congolese jet fighter aircraft manned by Ethiopian-trained pilots.

It is our considered judgment that we have no political commitments necessitating such action; that the United States should not interject its military aircraft and personnel into a local, internal dispute; that the safety of American civilian personnel could have been insured through use of civilian aircraft; and that we cannot police the world.

For the foregoing reasons, we, the undersigned:

(1) express our strong disapproval of your action in sending American military personnel, materiel and aircraft into the Congo;

(2) object most strenuously to the Executive Department's taking any such action without first consulting with and obtaining approval from the appropriate committees of Congress; and

(3) urge you most strongly to reconsider your decision and to order our military aircraft, materiel and personnel back to their appropriate bases.

Respectfully,

PETER H. DOMINICK, CARL T. CURTIS, CLIFFORD P. HANSEN, WALLACE F. BENNETT, NORRIS COTTON, KARL E. MUNDT, JAMES B. PEARSON, STROM THURMOND, JOHN G. TOWER, LEN B. JORDAN, EVERETT M. DIRKSEN, HOWARD H. BAKER, JR., GEORGE MURPHY, ROMAN L. HRUSKA, BOURKE B. HICKENLOOPER, FRANK CARLSON, JOHN J. WILLIAMS, and PAUL J. FANNIN, *U.S. Senators.*

Mr. DOMINICK. Mr. President, this was the type of action without congressional authorization that I feel Congress might prevent. It typified the increasing use of this Executive power by then President Johnson.

I was interested in the observation made by the senior Senator from South Dakota (Mr. MUNDT) in the hearings in 1967 on Senate Resolution 151. He noted, after the conference between Mr. Johnson and Mr. Kosygin at Glassboro, that the press and some members of the State Department observed that not much should be expected from the conference—this because Mr. Kosygin, representing Russia, did not have the same authority to commit his nation as did President Johnson. My distinguished colleague noted that this was shocking when he realized that President Johnson was representing a Republic and Mr. Kosygin represented a political monopoly, or autocracy, or dictatorship, or whatever form of government it might be considered.

One of the major arguments against a commitments resolution should be discussed, however. That argument, as discussed in the minority views in the report, indicates that the time allotted to react and defend the country in a crisis is too short. This argument continues to the effect that a decision must be made in less time than it takes to assemble a quorum of Congress, and this resolution, or any similar one, would tie the hands of the President in making emergency decision.

This points out the major problem raised by this debate. The constitutional provisions setting out the powers of Congress to declare war and the powers of the President as Commander in Chief are no longer sufficient in today's times. Senate Resolution 85 and the Fulbright-Cooper substitute certainly do not resolve this problem. The proposal of Senator MUNDT also falls far short of re-

solving the problem, but it at least would not tie the hands of the President to deal with the rapid changes which occur daily throughout the world. It does allow the President to meet a direct and immediate threat to national security and repel an attack on the United States.

Mr. President, no Senator would intend or state that the President should not act to defend this country against sudden attack, or to protect its national security in an emergency. Should missiles suddenly be fired from Cuba against targets in or surrounding the United States, the President clearly has and should have the power and duty to repel that attack.

In 1962, in the Cuban crisis, we faced that problem. The threat was not from Cuba; it really was from the Soviet Union. In that instance, there was time to consult with Congress; and there would have been time to consult with Congress in 1967, when military personnel, planes, and supplies were sent to the Congo.

These points illustrate what I am trying to make clear for the record. The President has the authority and duty to use whatever force is necessary to repel a sudden attack on this country. The President should not, however, have the sole power to commit Armed Forces for military assistance in hostilities in other countries, unless the national security or the protection of U.S. citizens and U.S. property is involved.

The language of Senate Resolution 85, as reported from the committee, and even as revised in the proposed Fulbright-Cooper amendment, as I understand it, seems to me to be too broad. The original resolution did not even define what a "national commitment" is; and in the Fulbright-Cooper amendment we go beyond the question of use of Armed Forces, and include other kinds of action involving only financial aid. It further requires affirmative action by both branches of Congress before anything can be done.

As I say, it seems to me that this is too broad. I think in the future, arguments would arise as to its meaning, and I believe that the President's hands would be tied beyond the degree to which we should tie them. It also seems to me to go beyond the balancing concept we are trying to reach, by giving, in effect, absolute veto power to Congress. It could amount to absolute control; and in this age of ever-contracting time and distance, it is my opinion that the President must be able to act more rapidly than these proposals would permit.

My distinguished colleague from South Dakota (Mr. MUNDT), however, has offered a substitute which, in my opinion, is far better than the original wording. I wish to state that I shall probably support that substitute. However, I would not want that part of the final clause of the Mundt substitute including the words "to protect U.S. property" to be construed as advocating any kind of return to the so-called "gunboat philosophy." This is not the intent, I am sure, of the sponsor. It certainly would not be my intent, and I am sure it is not the intent of most Senators.

We should be clear, as I think the Mundt substitute makes it clear, that the authority that has been granted to the President by prior treaties, statutes, or other legislative actions will not be affected. Under treaties now in effect, each respective country determines its defense contribution. This is determined by the constitutional processes of the country, after which the matter reverts, as I see it, to the Senate of the United States.

What I am trying to say, Mr. President, is that we are faced here with an extremely difficult problem. This country must pursue peace, and is trying to do so. We should not, however, leave the impression that our Armed Forces cannot be committed under any circumstances without congressional action.

We must define the limitations imposed upon the power of the President, while not crippling him so that he is unable to move. It appears to me that the Mundt substitute is the better way of getting at this problem. Unless we review or clarify our position, and talk about it as we have been, the power of Congress in foreign relations may well be reduced to words, and the mere formality of confirming whatever action any President may wish to take. Any resolution which is passed by the Senate should, it seems to me, restrict the commitment of Armed Forces in hostilities for military assistance to other countries, unless the authority to do so is granted either by the Constitution or by affirmative action of Congress.

Mr. President, none of us want to withdraw into a fortress America. This country is too young, too involved in foreign affairs, and too much the shield of other nations to be forced into that position. I, for one, believe that, as the leader of the free world, we must maintain flexibility in our response, but I do not wish to see the power of the Senate reduced in the field of foreign affairs to a simple affirmation, after the fact, of anything that any President may wish to do.

It is for that reason that I have taken the floor to explain my opposition to the pending resolution and my support for the Mundt amendment.

The PRESIDING OFFICER. Who yields time?

Mr. DIRKSEN. Mr. President, I wish to address particularly the distinguished Senator from Arkansas and also the distinguished Senator from Kentucky.

All time would have to be exhausted before the Fulbright group of proposals is open for amendment; but the distinguished Senator from Arkansas, as chairman of the committee and manager of the bill, could, of course, amend his own version if he saw fit to do so.

If the Senator will look at his copy of the resolution, I would respectfully suggest that in line 4, after the term "armed forces," he insert the words "in hostility."

Mr. President, there is a reason for this suggestion. A day or two ago I went over that old list of either express or implied commitments, which began with 1790, when we first began to function as the United States of America. There is probably no place on earth where we have not sent troops at some time without any confrontation involved. In such cases, there were no hostilities as such; there was a state of disorder, and either American citizens or their property were in jeopardy. Such situations included not only China on many occasions, but what was then Russia, and even Siberia, as I recall.

I listed perhaps a dozen or 15 such cases: I did not read the entire list into the RECORD. I could have done so, because the list was supplied to me.

But in no case could one say that there existed a hostile situation as such, with a true confrontation between our forces and those of another country. Probably in some cases the size of our force did not exceed 100 sailors or 100 soldiers. It might have been 200, or it might have been 500; but the situation did not involve hostility as such. Perhaps the situation to which they addressed themselves had to be reported one way or another, by whatever communication was available, in order to apprise the Government in Washington of what was happening.

Conceivably, if such actions as that came within the purview of this resolution, we might have had to have discussion on the Senate floor, or on the House floor, and then a message would have had to go back, and by that time the damage could have been done.

So it would occur to me that the Senator's proposal could be reinforced, and probably would be infinitely better, if the words "in hostility" were inserted in line 4, and likewise in line 6, after the words "armed forces."

That is the first suggestion I would make to the chairman of the Committee on Foreign Relations, and I shall be happy to yield for any comment that he may wish to make.

Mr. FULBRIGHT. Mr. President, I certainly hope the implication is clear that by agreeing to station our Armed Forces abroad the reference is to substantial numbers of armed forces. As a matter of fact, situations such as the Senator has mentioned, involving nations in which there are few people, or the incident is minor, are authorized by legislation. They do not conflict at all with what we have in mind here.

I have in mind the type of agreement that has recently come to my notice in some detail, in Spain and in another country which I hesitate to mention in public, because the matter has not yet been publicized. I am referring to secret executive agreements which commit our forces to the support of another country.

I think they should not be secret. I think they are of such consequence that Congress, the Senate particularly, because of its authority in the area of treaties, should be aware of such commitments. The one in question involves the lives of our citizens as well as, in many cases, a substantial financial resource of the country.

What I am really saying is that I do not know why the Senator wishes to restrict the resolution to hot-war situations. A commitment to station abroad forces which are not fighting, forces which we hope will perhaps never fight, is nevertheless an important commitment.

As I understand what the Senator is saying, it is that such action should not be subject to senatorial approval. It is only in the case of hostilities that the Senator wants us to be in on the matter, so to speak. Do I correctly understand the Senator?

Mr. DIRKSEN. The Senator is correct.

Mr. FULBRIGHT. Another case that is even more serious—and perhaps I should hesitate to speak of it right now because I think it would be premature—is the Spanish case, which has already been thoroughly aired.

I do not approve of the making of such an agreement in secrecy by the Executive. And it would have been made in secrecy. I would never have known of it. I think the Senator from Illinois would not have known of it. He probably would not have. The Senate would not have known it had it not been for a newspaper reporter who, in some fashion that I do not know about, revealed the matter.

This agreement involved a substantial undertaking involving the possibility of our involvement in internal warfare because our troops participated in what they call a "scenario," in joint maneuvers with Spanish forces, inside Spain.

I do not raise the matter because I disapprove of Spain. What I am talking about is American action in making agreements that can be far-reaching in terms of both the number of men we would expose to armed hostilities—if they should break out—and a great deal of money.

As representatives of the taxpayers of the United States, we ought to have something to say about such commitments. We ought to know about them. I think it is a proper function of the Senate.

I do not approve of any Executive making commitments on his own authority. This is not pointed at the present Executive because the Spanish arrangement, for example, was made under the previous administration, was negotiated last fall, and was authorized by the former Secretary of State for the Chief of Staff. I do not think we ought to be bound by that kind of an agreement.

We are saying that we are not going to be bound unless we approve of the commitment. We are not saying that we will not approve of it. It may well be that, if it were submitted to the Senate, the Senate would approve of it. However, does not the Senator from Illinois think he ought to know of the existence of a commitment?

Mr. DIRKSEN. This was all, I am sure, a part of the negotiation that covered the Spanish bases.

We have a very extensive base at Torrejon, about 17 miles outside Madrid. Some years ago I went to look at it.

Mr. FULBRIGHT. I have been there.

Mr. DIRKSEN. In addition, I think we have a nuclear base at Palarmes.

Of course, our leases were coming to an end there, and there was an indisposition on the part of the Spanish Government to continue the leases.

As a matter of fact, I remember that when I was there it was my privilege to have a session with President Franco. Even at that time, the question was raised of those bases being so close to the capital city of Madrid that they might well be moved elsewhere or be abandoned altogether. Out of the delicacy of the whole matter, probably, some agreement had to be negotiated. If that were the case, I do not know that we have to quarrel too much if there was an element of secrecy about it. A condition of secrecy, may have existed in Spain at the time to justify grouping it somewhat on the classified basis. I think one can easily make an argument about it.

Mr. FULBRIGHT. Mr. President, of course I realize that all Presidents do not like to be bothered with the Senate and treaties.

If we want to undertake to carry out our alleged obligation with respect to Spain—and it is extensive—I think it ought to be by approval of the Senate.

Just recently, on the weekend of June 14, a newspaper article discussed the matter in some detail. A more detailed description of our military involvement with Spain is provided by the article, which refers to the joint maneuvers being held in Spain to put down a theoretical rebellion in that country.

That is all very well. I am not promoting any rebellion in that country, but I think it is a Spanish affair and is not our affair. I do not wish to have us committed in that fashion, which I would say is quite unorthodox at the present time, and secret. I do not wish us to be committed in that way.

We are all talking about the possibility of another Vietnam, and it could be another Vietnam in Spain. It could be a civil war. However, I hesitate to put it in those terms, because I do not think it will be. I want it to be certain, however, that we would not take a part in it, and I do not want to approve action by us in the concerns of that country or any other country. I can think of some internal problems. I do not think the United States ought to do it.

Mr. President, newspapers on the weekend of June 14 carried stories—one of which I have already referred to—which clearly indicate why some Members of Congress are disturbed at the manner in which the executive branch is handling its military involvements abroad. I refer to Flora Lewis' story—and others in the Washington Post and New York Times—which described how U.S. military forces have over the past years taken part in joint maneuvers in Spain to practice putting down a theoretical rebellion in that country.

In discussing this matter, I intend to stick closely to the facts disclosed in these newspaper articles. The existence of these joint maneuvers was, as Miss Lewis wrote, originally brought to the attention of the Foreign Relations Committee by the staff of Senator SYMINGTON'S Subcommittee on Commitments and Agreements Abroad. It is my understanding that at the appropriate time, the full details of the subcommittee's findings will be made public.

But based on the news stories alone, there is much for us to be concerned about as we debate this resolution on commitments.

Why were U.S. Army forces brought in from Germany to train to put down the scenario of an "internal rebellion" in Spain? Who authorized such activities?

The news stories indicate that U.S. military commanders in Europe worked out the exercises—and the U.S. Embassy in Madrid was not aware of the scenarios or details of the maneuvers.

What the stories do not mention is the Spanish side of this affair. Certainly the Spanish military commanders were aware of what was being practiced—and since Spain's military represent a key element in the Spanish Government, it must be assumed that the exercises had approval at the highest level.

To carry out these exercises required joint planning on the part of United States and Spanish military officers. Plans covering United States intervention in Spain thus exist. And, in fact, based on the results of the exercises, they provide a tested contingency battle plan in the event that a real insurgency develops in Spain. The foreign policy implications of this type of activity are obvious. But apparently no one in Washington—either in the Pentagon or the State Department—knew about the exercises or cared enough to study them in detail.

Spain, after all, appears relatively quiet these days; with all our other commitments around the world, this one receives little attention at the high policymaker level.

Indeed, why should Spain receive high level attention? The United States has no defense treaty with Spain—it has only an agreement covering use of certain joint military facilities. Furthermore, since the inception of this agreement, various administrations and Secretaries of State have gone to great lengths to reassure both the Congress and the American people that no commitment exists to defend Spain from internal or external forces. At most there was a vague commitment to defend the bases themselves.

While saying that, however, these same officials were unaware of what was being done to establish de facto—through practice maneuvers—what could not be done de jure.

Not all of them were unaware, however. When Gen. Earle Wheeler, Chairman of the Joint Chiefs of Staff, with State Department knowledge, told his opposite numbers on the Spanish High General Staff that U.S. forces in Spain "give Spain a far more visible and credible security guarantee than any written document," he was telling the Spanish what they wanted to hear, and what—fortified by the maneuvers—they have come to believe.

According to one news report, the State Department and the Pentagon are now going to review scenarios of future joint military exercises in Spain and other countries.

That is not enough.

Taking Spain as one example, the question can be asked why do we have joint maneuvers in the first place? Do we want a military alliance with Spain? If so, there is, under our form of government, a constitutional way to go about negotiating and then ratifying such an arrangement in the form of a treaty.

If the executive branch does not believe—for whatever reason—that it can get congressional approval for such a treaty, it should not seek other means to accomplish that end. For by tamper-

ing with what may appear to be our unwieldly constitutional process in a little matter like Spain today, we may one day wake up to find ourselves involved in the Vietnam of tomorrow.

Mr. President, I ask unanimous consent that several pertinent press items be printed in the RECORD at this point.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 14, 1969]

MANEUVERS IN SPAIN STIR STUDY: U.S. REVIEWS ROLE IN JOINT WAR GAMES

(By A. D. Horne)

Plans for U.S. military exercises abroad are now being reviewed in detail by the Pentagon and the State Department as the result of a trip to Spain this spring by two Senate investigators.

Walter Pincus and Roland Paul—chief investigator and counsel, respectively, of the Senate Foreign Relations subcommittee on U.S. Security Agreements and Commitments Abroad—discovered that in at least two joint training exercises with Spain, U.S. troops played the role of suppressors of a domestic rebellion.

Their findings are described in detail on Page A25 by Newsday columnist Flora Lewis.

Reports last February that Spain was being offered strong commitments during negotiations over extension of the 1953 base agreement resulted in a storm of Congressional criticism. The United States and Spain are on the verge of signing a two-year extension of the agreement.

The latest report is also likely to cause a stir in Congress. On Monday, the Senate is expected to begin debate on a resolution, sponsored by Foreign Relations Committee Chairman J. W. Fulbright (D-Ark.), to keep the Executive Branch from making any national commitment to a foreign power without formal Senate concurrence.

In reporting out the Commitments Resolution April 16, the Committee raised the possibility that the Spanish bases agreement could involve the United States in a real situation like that of the hypothetical training exercises later uncovered by Pincus and Paul.

"In practice," the Committee's report suggested, "the very fact of our physical presence in Spain constitutes a sort of quasi-commitment to the defense of the Franco regime, possibly even against internal disruptions."

The Spanish Embassy here found this suggestion "gratuitously offensive" and "detrimental to Spanish sovereignty." An Embassy official stated that "Spain would neither accept nor request, in any hypothesis whatsoever, under the shield of the agreements with the United States, U.S. intervention in her internal affairs."

U.S. officials generally agree that Spain has no need for American assistance against internal threats.

But when Pincus and Paul arrived in Spain several days later and visited the U.S. air bases at Torrejon near Madrid and Moron near Seville, they asked about the 1967 and 1968 joint exercises called "Pathfinder" I and II.

They were shown the scenarios for both exercises, in which troops from "Samland," under a "security treaty" with the host country, practiced putting down a staged rebellion.

These scenarios, they learned, had been prepared by staff officers and never reviewed by either the U.S. Embassy in Madrid or the Pentagon. While they constituted no official commitment for U.S. action in similar but real situations, they furnished ample targets for future embarrassment.

As a result of the "Pathfinder" disclosures, the State and Defense Departments issued new rules this spring requiring that they be furnished not only general descriptions but also scenarios of all future training exercises abroad.

These scenarios, in which troops taking part in maneuvers are given names and roles—often thinly disguised versions of actual situations—in the past were reviewed only at the level of the commanders running the exercises. Now they are being forwarded for review to Washington.

There will be a "Pathfinder" III in Spain this year. It is a safe bet that its scenario will not deal with internal insurgency.

UNITED STATES AFFIRMS GI'S IN SPAIN CONDUCTED ANTI-REBEL TRAINING

WASHINGTON, June 14.—The State Department acknowledged today that United States forces had conducted joint maneuvers in Spain recently to practice putting down a theoretical rebellion against the Spanish Government.

Officials said a review was under way to prohibit such practices in the future. They refused comment on the present nature of the United States commitment to the government of Generalissimo Francisco Franco.

The "war games" exercises were first disclosed in a copyrighted article by Flora Lewis, a syndicated columnist of Newsday, the Long Island paper.

The assumption of the exercise was that "infiltrators" would try to stir up the people to fight against the Franco regime, Miss Lewis reported.

The new development in the controversy over United States relations with Spain came about before a Senate vote next week on a resolution intended to reassert Congressional control over United States commitments abroad.

The nature of the present United States commitment to Spain is vague. The United States has no mutual security agreement with the Franco Government, but it does rent two air fields and a submarine base in Spain. The base agreement was renewed recently for two years and the Senate Foreign Relations Committee was assured at the time that there was no hidden commitment to the Franco regime.

A State Department spokesman declined to say today whether the United States is committed to help defend Spain.

While confirming that the maneuvers took place, he indicated that they had been undertaken without the department's knowledge.

[From the Washington Post, June 14, 1969]

JOINT UNITED STATES-SPANISH MANEUVERS RAISE QUESTIONS IN CONGRESS

(By Flora Lewis)

Senate investigators, working under new orders to dig out what really happens in the wake of U.S. commitments abroad, have found that American troops were used in joint maneuvers to practice putting down a theoretical rebellion in Spain.

There have been at least two major exercises of this type in the last two years, named Pathfinder Express I and II, and a number of minor ones named Sarrio. The troops were flown to Spain from Germany and on at least one occasion parachuted into northern Spain to "round up and destroy guerrillas."

The assumption of the exercise was that "infiltrators" arrived in Spain and stirred people to fight against the Franco regime. Both the "infiltrators" and the "guerillas" were assumed to be anti-Franco Spaniards, not invading foreigners.

Details of the exercises were not known to American civilian officials until recently. They were conducted by the U.S. military command in Europe, and the U.S. Embassy in Madrid received only summaries of the operations that made them sound like routine maneuvers against a hypothetical foreign aggression.

The maneuvers do not commit the United States to help Franco, nor constitute any formal pledge of support. American participation is explained on the grounds of the value of learning the terrain.

However, those Spaniards who have learned about it draw the conclusion that the United States probably is willing to intervene to protect the regime. The Franco government has faced growing opposition recently, and has made free use of its police and armed forces to put it down.

The political impact of American troops exercising in Spain in such circumstances is scarcely lessened by the fact that their presence represents no U.S. political decision.

This is one of the reasons why, for the first time in years, the Senate Foreign Relations Committee has told the Administration that it has no intention of rubberstamping the executive agreement on renewal of U.S. Base rights in Spain.

Partly because of unsavory revelations emerging little by little on what the base deals have involved, partly because of the new mood of challenge on Capitol Hill, there are going to be tough hearings on the new agreement.

Until now, the Committee tended to accept whatever agreements the Executive Branch worked out with foreign governments, without much probing. Now the feeling is that the procedure of executive agreement has been abused, and that the only way for the Senate to recover a real influence on foreign commitments is to assert itself even when it isn't asked to ratify a formal treaty.

The new agreement about to be signed provides for a grant of $50 million worth of arms to Spain in return for two more years of base rights. That is a drastic cut from the deal that was about to be made early this year, then dropped.

Nonetheless, Sen. J. William Fulbright, who heads the Foreign Relations Committee, has told the State Department that he isn't satisfied. He wants to know why the United States should pay at all, if the bases are so important to Spain. And he may bring up the maneuvers to question what relations with Spain are really about.

The issues involved are fundamental, arising from the general sense of ill ease at the way American foreign obligations have slipped out of public and even, in some cases, official civilian awareness and influence.

The challenge isn't directed to the Nixon Administration as such, because the trouble has been building up since World War II. In a sense it goes back a little further, to the time when President Roosevelt used the device of executive agreements to help what later became America's allies because he knew Senate isolationists would block treaties.

In the last decade or so, the use of executive agreements has become a pattern that worked to diminish the role of Congress in foreign affairs. Though it isn't his fault, the mood on Capitol Hill is bound to make for growing tension between Mr. Nixon's Administration and Congress.

Behind it all is the Vietnam war and its frustrations. This mood isn't isolationism, as Mr. Nixon suggested, but a sense of having been hoodwinked too long and a demand to know what is really going on.

[From the Washington Post, June 21, 1969]

UNITED STATES, SPAIN EXTEND BASES AGREEMENT

The United States extended its bases agreement with Spain for 15 months yesterday in a quiet anticlimax to a long controversy.

By an exchange of diplomatic notes at the State Department, Secretary of State William P. Rogers and Spain's Foreign Minister Fernando Maria Castiella y Maiz kept the 1953 agreement in force until September, 1970. If no new agreement is negotiated by then, the U.S. will have another year to pull

out of its Polaris submarine base at Rota, its Strategic Air Command base at Torrejon near Madrid and two less-used air bases at Moron and Zaragoza.

The United States will give Spain military equipment worth $50 million, plus up to $35 million in new Export-Import Bank loans for arms purchases.

The two nations announced that Rogers invited Castiella to return in mid-July for negotiations "to determine the new relationship of cooperation . . . that would follow the present agreement."

Castiella, in a separate statement, stressed that "the era of foreign military bases had ended" and that Spain "must become an active participant on an absolutely equal footing" in a new agreement covering "economic, scientific, technical and cultural aspects."

The bases, he declared, "will become exclusively Spanish bases" and the two nations will negotiate U.S. use of "specific facilities . . . in conditions concretely agreed on in accordance with possible contingencies."

Because of "a great series of international crisis culminating in the Vietnam war," Castiella said, U.S. "Public opinion has entered into a sort of trance of introspection over the foreign obligations of its government and the urgent need to limit its international commitments . . ."

Much of the domestic controversy over the Spanish bases agreement has centered on charges that it constituted a national commitment, entered into by the Pentagon and the State Department without Senate approval.

To this, the State Department declared yesterday that "the defense agreement contains no commitment to Spain, and the present extension does not alter that situation."

U.S. officials said, however, that the joint declaration, signed by Castiella and Secretary of State Dean Rusk at the agreement's first extension, in 1963, remains in effect.

According to the Rusk-Castilla declaration, "a threat to either country, and to the joint facilities that each provides for the common defense, would be a matter of common concern to both countries, and each country would take such action as it may consider appropriate within the framework of its constitutional processes."

Apart from the commitment issue, American opponents of the agreement have charged that its cost has exceeded the value of the bases, and that it has given international respectability to the 30-year-old dictatorship of Generalissimo Francisco Franco. In both the United States and Spain, military officials have been more eager to extend the agreement than their diplomatic counterparts.

[From the New York Times, June 18, 1969]

PROPPING UP FRANCO

Congressional concern over a still-unsigned executive agreement extending American base rights in Spain is more than justified by the disclosure that United States forces have conducted joint maneuvers in Spain to practice putting down a theoretical rebellion against the Spanish Government.

To use American troops thus in direct support of the Franco regime represents an unconscionable perversion of United States principles and policy. The exercises, which have been acknowledged by the State Department, underline the ominous import of a Pentagon memorandum which State has tried to disavow. The memorandum, as paraphrased by the Senate Foreign Relations Committee, asserts that "the presence of American armed forces in Spain constitutes a more significant security guarantee to Spain than would a written agreement."

This is too high a price to pay for four bases that are in part obsolete and in any case could be replaced by other arrangements. The 10,000 American troops currently stationed in Spain have no business propping up regimes like Franco's.

One of the most disturbing aspects of the Spanish affair is evidence that the American military entered into its unsavory liaison with Franco's soldiers without adequate consideration of the political implications and without effective civilian control. It is up to the President and Congress to look beyond Spain in order to make sure that the Pentagon is always an instrument and never an initiator of American foreign policy.

[From the New York Times, June 24, 1969]

A COSTLY ALLIANCE

Only this much can be said for the fifteen-month extension of the agreement covering four American military bases in Spain: It is preferable to Washington's original offer of $175 million in arms aid for the Franco Government in return for a five-year base renewal. It would have been far better if the United States had simply informed Spain many months ago that the bases were no longer required and the 10,000 Americans manning them would be withdrawn within the specified year.

What remains most disturbing about this affair is the clumsy and devious behavior of both the Johnson and Nixon Administrations. The latest display of clumsiness was the pitch for bringing Spain into NATO by the new American ambassador, a political appointee, in a speech to the American club in Madrid. Robert C. Hill's gratuitous remarks will hardly persuade those member governments that have taken NATO principles seriously enough to bar the Franco regime.

Of greater importance is the Administration's fuzziness about the extent of the commitment to defend the Franco regime. The State Department said last week that the agreement "contains no commitment to Spain." But a 1963 declaration, now renewed, says "a threat to either country, and to the joint facilities that each provides for the common defense, would be a matter of concern to both countries, and each country would take such action as it may consider appropriate . . ."

The military advantages of such a relationship with the oppressive Franco regime must be weighed against the heavy political costs to the United States. These costs could soar and that relationship could become the focus for virulent anti-Americanism in Spain itself when General Franco passes from the scene. The Nixon Administration should decide right now that the temporary renewal of the base agreement will be the last—and the Pentagon should plan accordingly.

[From the Washington Post, June 18, 1969]

ENVOY SAYS UNITED STATES FAVORS SPANISH ENTRY INTO NATO

MADRID.—The United States favors Spain's entry into the North Atlantic Treaty Organization, the U.S. Ambassador to Spain, Robert C. Hill, said yesterday.

Hill set out this view in a speech to the American Club and said that he hoped "neighboring countries, which received both before and since the war so much help, will one day get the idea."

Hill said Gen. Andrew J. Goodpaster, new chief of NATO forces, arrives in Spain Wednesday for a 48-hour visit. "I'll let you draw your own conclusions from that visit," he said.

Mr. FULBRIGHT. Mr. President, as a further example of the ease with which the United States becomes committed—or at least misleads foreign governments as to our commitment—I cite the recent press release issued by the Department of State on the renewal of the Spanish base agreement.

On June 20, the Committee on Foreign Relations was given a copy of a draft joint press statement to be issued by the Spanish Foreign Minister and the Secretary of State. It was an announcement of a 2-year extension of our base agreement with Spain, by which the United States undertook to provide $50 million of military grant assistance to Spain over a 2-year period, and to finance some $35 million worth of military purchases through the facilities of the Eximbank.

We all know—or should know—that the funds to give effect to this promise to Spain must be authorized and appropriated by the Congress.

But do the Spanish know this? Indeed, do our own negotiators know this?

There is some doubt, because the press release to which I have just referred reads as follows:

In conjunction with this extension, the United States Government, as authorized by the Congress, *will* provide grant military assistance and credit facilities to Spain for the purchase of military equipment.

The clear implication to me in reading this paragraph is that Congress has already authorized extension of the Spanish agreement, and that the United States "will provide grant military assistance and credit facilities to Spain for the purchase of military equipment." This, of course, is not true.

I leave it to Senators to judge whether this is poor draftsmanship, a Freudian slip, or a commitment of the kind we are trying to discourage by the pending resolution.

I ask unanimous consent to insert at this point the draft joint press release to which I have referred.

There being no objection, the joint press release was ordered to be printed in the RECORD, as follows:

DRAFT JOINT PRESS STATEMENT

Spanish Foreign Minister Castiella and Secretary of State Rogers today exchanged diplomatic notes extending the Defense Agreement of September 26, 1953, until September 26, 1970. Under the terms of the extension the two Governments will use this period to determine the new relationship of cooperation between the two countries that would follow the present Agreement. Secretary Rogers has invited Spanish Foreign Minister Castiella to return to Washington about July 15 to continue the negotiation which opened today.

In conjunction with this extension, the United States Government, as authorized by the Congress, will provide grant military assistance and credit facilities to Spain for the purchase of military equipment.

Mr. FULBRIGHT. Mr. President, in all honesty the Senator says there may be some delicate circumstances in Spanish life that would require the information to be classified. Perhaps there is something. They have a different kind of government, and certainly they do not have our idea of the relationship between the Executive and the representatives of the legislature—they call it the Cortes.

As I understand our constitutional system, I think it gives the Senate the responsibility to approve or disapprove the making of agreements of this character.

That is the sum and substance of it. In the words that I believe the Senator from Illinois used not too long ago, I guess I am a strict constructionist when it comes to the Constitution with regard to this kind of obligation in an area that involves the lives of our young men and

vast amounts of our money. I think it is far more important than in some other areas that the Supreme Court has involved itself in, or some other Government activities.

That is about the sum and substance of it.

I do not know why the Senator from Illinois does not feel the same way, because he is a strict constructionist in other areas. Why is he not in this area?

Mr. DIRKSEN. He is, and he always tries to be mindful that neither by this kind of resolution nor by a statute of any kind can we impair the constitutional power of the President.

Without belaboring the Spanish matter too much, it is a fact that Spain has been our so-called second line of defense. I think that militarily that is well known.

In the interest of our national security, obviously if there is an impairment of that defense line, if a situation develops over there and the President and the National Security Council see it as such, I doubt very much whether we dare to be inhibited by the words we write into a resolution of this kind.

Mr. FULBRIGHT. Mr. President, does the Senator wish to argue about the merits of those bases in Spain?

In the discussions we had in committee with the representatives of the Department of State, it appears to me that these bases are largely obsolete.

The Spanish do not allow us now to base strategic aircraft at the great base of Palarmes. When I was there, and I guess when the Senator from Illinois was there, before the accident, it was a strategic air base.

Mr. DIRKSEN. It was.

Mr. FULBRIGHT. Two of the bases have been put on standby. They are closed but exist for emergency use only. The Senator knows that the bases were operating at a time when airpower was considered to be far more important than it is today with the growth of the missiles. That is not new to the Senator. There is a very grave question, I would say, as to whether those bases are very important at all. I think it is marginal as to whether we have any need for them in our own defense because of the change in the nature of warfare.

If one wants to argue the merits of whether this is a good agreement and in our interest, that is another matter. I was not seeking to make that argument. I do make the argument that whatever their use is and whatever the amount of money—whether $50 million or $500 million and 10,000 or 50,000 men—it is the kind of agreement that the Senate ought to approve or disapprove. I think the Senate has a proper function to carry out in matters of this kind.

I am not prepared to turn over to the military authorities and the executive authorities the negotiation of these agreements without the Senate knowing anything about them and approving or disapproving them. I think it is our responsibility to approve or disapprove them.

Mr. DIRKSEN. Mr. President, I make only one response to the observation that these bases are of doubtful value.

I do not know why we put in all the time and preparation to provide the necessary funds to continue these leases, because certainly that would not have been done without the best expert military judgment in our country. I am sure the Senator will agree to that.

Mr. FULBRIGHT. Mr. President, the Senator has great faith in them. However, when the matter of the bases was raised, our original terms were to extend the leases for 5 years. We offered Spain $175 million in addition, of course, to keeping up our troops and everything else. The Spanish originally requested $1 billion, approximately, as lease money.

What they have finally agreed on, just a few days ago, was a 2 years' extension as of last September and a $50 million lease. In other words, it is a very temporary extension to give time to consider more thoroughly whether they are worth extending or not.

In other words, here was a tremendous change in the view of the Executive, within the space of 2 or 3 months, as to how important they are. I think the change came about purely as a result of attention being drawn to the leases, first, by press reports, and then by the Foreign Relations Committee and the Senate.

With some hundreds of bases abroad, once they are established, a kind of inertia—or perhaps one should say momentum—sets in. The leases are renewed, and they are continued without enough consideration because of the size and complexity of our Government. I reject the idea that in each of these cases of renewal of bases there is some kind of superior wisdom on the part of the colonel or general to whom is designated the duty of negotiation.

In the Spanish case, the Secretary of State requested the Chairman of the Joint Chiefs of Staff to negotiate and he turned it over to General Burchinal, who then became the negotiator.

If the Senator feels all of our military people are so infallible in this respect, I do not share his feeling. They are doing their duty. They do not have the responsibility of weighing all the various considerations I feel the Senator from Illinois and I have. I speak of the cost relative to other costs, and relative to other bases we have, the precedent this sets for bases in Turkey, Libya, and elsewhere. This is one of the few bases where we pay rental, although the bases are just as much for the defense of Spain as they are for ours. I do not see why we should pay any rent at all, because the Spaniards were just as much protected if there is a need of protection as we were.

Originally the only threat was from Russia—and these leases were originally made in the time of Stalin, when there was a much greater active threat from Russia than today. Many circumstances have changed since the original lease of the base was negotiated.

Mr. DIRKSEN. I can offer an historical postcript. The Senator from Arkansas may or may not remember, but I do remember. When I was on the Western Front 51 years ago, we did pay rent for the trenches. I think that was established. I always thought that was an amazing thing.

Mr. FULBRIGHT. Did the Senator approve of it?

Mr. DIRKSEN. Oh, I was probably too young to approve of it.

Mr. FULBRIGHT. Does the Senator now approve of it?

Mr. DIRKSEN. I was thinking only in terms of my own skin and how to get back home after we won a victory.

Mr. FULBRIGHT. Does the Senator now approve of it?

Mr. DIRKSEN. As an historical reflection, I think the wells of anger rise a little now and then.

I have another suggestion or two. I refer to the second paragraph, or the third paragraph, in the first line, after the word "that," that there be inserted the word "future," so that the wording will read:

That it is the sense of the Senate that future national commitments by the United States

And then insert—

will result only from affirmative action.

In the substitute resolution, we do carry the word "future" and also the words "in which the United States is not already involved."

It comes to mind that we are much involved in Vietnam. That appears to be a commitment.

Mr. FULBRIGHT. That is a commitment ostensibly in pursuance of a resolution of Congress.

Mr. DIRKSEN. Oh, yes.

Mr. FULBRIGHT. I do not know why that resolution—which I regard as faulty—is pertinent to this.

Mr. DIRKSEN. But suppose other commitments have to be made which are somewhat collateral, but not in pursuance of it. That would become something new. But we go back, or think of this in terms of the future, and make sure it is prospective and not retrospective.

Mr. FULBRIGHT. Yes, but certainly, by and large, I would say I could hardly think of one of those cases which would not be in the future. Let us assume that a secret agreement has been made already, involving a commitment to send country X 10 divisions. I hesitate to use names. Suppose it has been agreed by one of our colonels or generals, or whoever represented us, or represented the President, that we would furnish 10 divisions in a country's defense and supply it with whatever money is necessary. Suppose that that agreement has already been made and we did not know about it. What is the Senator's attitude toward that? Does not the Senator think we should know about it? Does not the Senator think it is perfectly proper to take the attitude that we should know about it and think it should be submitted for approval, and that, therefore, the Senate is not going to accept it as binding unless the Executive presents it to us for our approval?

Mr. DIRKSEN. How far should we go back to dig up something?

Mr. FULBRIGHT. I do not think we would have to go back very far. I was not thinking of that, but one such case has been brought to my attention involving a commitment that has already been made. I thoroughly disapprove of its being done in this fashion. I am not saying it has no merit. I say it should be submitted for the approval of Congress, because it has broad implications.

I am merely saying that I do not want us to get into a situation like Vietnam by a process of creeping commitment. I am conscious about that situation because I played a small part in it, which I have regretted. I think it should be above board when there is this kind of commitment.

Mr. DIRKSEN. It runs through my mind that either in the resolution that came out of the committee in 1957, either Resolution 181 or 157, they used the word "future." I do not have that language before me.

Mr. FULBRIGHT. The Senator could be correct.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I shall yield to the Senator, but first I wish to make one further statement. Then, I shall yield to the Senator.

The original words were agreed to by the Senator from Georgia and myself. The language was changed in committee primarily at the request of and on the urging of the former Senator from Iowa. When I reintroduced it this year, I again discussed it with the Senator from Georgia. He much preferred simpler language for a sense-of-the-Senate resolution. He does not believe, and I do not much believe either, that in these circumstances it is wise or healthy to be too specific. That is the way that developed.

Mr. DIRKSEN. I can only add one thought, and then I shall yield the floor.

I had reference to Senate Resolution 187, and the committee reported it on November 20. That measure contained the language "circumstances which may arise in the future," and pertained to a situation in which the United States is not already involved. That resolution was reported by the committee. I thought it was. I think it is desirable now.

Mr. CURTIS. Mr. President, will the Senator yield for a question?

Mr. DIRKSEN. I yield the floor.

Mr. CURTIS. If it is not made prospective—in the future—I would like to know what arrangements that might come under the definition of national commitments would be repudiated by this resolution.

Mr. DIRKSEN. That is the question. That is the way confusion arises when subsequently the language is interpreted.

Mr. CURTIS. Is it not true that it finally gets down to a matter of interpretation?

Mr. DIRKSEN. Yes, definitely.

Mr. CURTIS. I say that because I always believed that President Johnson, when he asked for the Tonkin resolution, thought he was getting the consent of Congress to do what he proceeded to do. Other people have regarded that measure differently.

I think that before we are called upon to vote on this resolution we should know whether or not it is confined to a prospective application. If it is not, what national commitments or arrangements have been regarded as national commitments by some that this repudiates?

Mr. COOPER. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield the floor.

Mr. COOPER. I think the purpose of this language is clear and uncomplicated. It provides that the use of our Armed Forces abroad on foreign territory, or the promise to use them abroad shall not be a national commitment unless Congress, in one of the three ways prescribed by the resolution, approves.

Mr. CURTIS. I wish to ask a question in that connection. Are the high seas regarded as foreign territory?

Mr. COOPER. No.

Mr. CURTIS. So this measure does not involve a commitment to use naval forces to blockade something.

Mr. COOPER. It does not apply to the high seas. It is limited to their use on foreign territory.

I think I can clarify the situation. It has been suggested that the words "in hostilities" be inserted.

I wish to emphasize that if a war began or was in progress, and the United States became involved because our troops were there, had been threatened or fired upon, the President would have the constitutional power and duty as commander in chief to defend those troops wherever they might be.

The question we ask is this: Where the United States is not involved and hostilities are in progress, should our Armed Forces be sent to that country without the approval of Congress? The resolution intends that they should not be sent without congressional approval. I doubt that we could ever agree that our Armed Forces should be committed to war without the approval of Congress.

That is one purpose. I will go on now to another purpose.

Mr. CURTIS. First, may I ask one brief question?

Mr. COOPER. Yes.

Mr. CURTIS. I can understand the position of the distinguished Senator from Kentucky with reference to armed forces, but what does "financial resources" mean? Does that mean financial resources in connection with armed forces, or the war effort?

Mr. COOPER. No.

Mr. CURTIS. Or does it mean loans?

Mr. COOPER. No.

Mr. CURTIS. Grants in aid? What does it involve? Does it involve some of the lending agencies in which the United States carries the greater share of the burden?

Mr. COOPER. If the Senator will read that clause, it relates to a promise to assist a foreign country, government, or people by the use of the Armed Forces or financial resources of the United States. The Senator from Arkansas spoke on that point. It is intended to mean that if the President of the United States—and usually it is a member of the executive department—at a lower level, makes a promise in the form of an executive agreement, or by some other means, to use our Armed Forces, or to provide financial resources to assist a foreign country, that promise or agreement should not become effective as a national commitment of this country until it has been approved by Congress.

Mr. CURTIS. It would take financial resources that could lead us into war?

Mr. COOPER. No.

Mr. CURTIS. I thought that was what the Senator just said.

Mr. COOPER. It is clear, just as the Senator from Arkansas pointed out in his example. If the President or his deputies, say the Secretary of State, the Secretary of Defense, or other officials, promise to another country, that if, upon the happening of an event, our Armed Forces shall be used, or that we shall assist that foreign country by the payment of money, then that promise should be known by Congress, and should be approved by Congress. This is the type of situation which may lead us into a war without Congress having either knowledge of the agreement or giving its approval to the agreement.

Mr. CURTIS. I still do not quite get the sense in which it refers to the financial resources.

Mr. COOPER. Well, I can give the Senator several examples. Assume the President is going abroad——

Mr. FULBRIGHT. That is right. The Vice President, too.

Mr. COOPER. And he states that the United States will make available to this country so many millions of dollars. That promise cannot become effective, as the Senator knows, until it is approved by Congress.

Mr. CURTIS. It can put Congress on the spot, because Congress has to make good on the commitments.

Mr. COOPER. Of course, and I do not think the Senator would like to see that happen.

Mr. CURTIS. I should like to know what objection there is to making this prospective to use the word "future," if we reject the idea of making it prospective. I should like to know what situation would invalidate or repudiate it.

Mr. COOPER. As the Senator from Arkansas pointed out so well, the resolution is the result of our joint labors. It has my name on it, but it is our work. We cover three situations.

The first concerns a situation where there are hostilities taking place. We say that our troops should not be committed to that war on foreign territory unless Congress approves.

Second, as the Senator from Arkansas has pointed out, suppose the President or his Secretary of State or Secretary of Defense, or perhaps the commanding officer of our Armed Forces, makes an agreement with another country that upon the happening of a certain event in which our interests are threatened, we agree to send troops, or to make our financial resources available. That is the type of situation, as I said a while ago, that may involve us in war. We would like to protect ourselves against that kind of situation.

Mr. CURTIS. My point is. Does the Senator mean future national commitments—future national commitments or national commitments? What are we repudiating?

Mr. COOPER. I am coming to that. In my third point, which is one objected to by the Senator from Illinois, we say, "the Armed Forces of the United States on foreign territory."

That is intended to say to the President of the United States, not to send large numbers of our troops to be stationed in another country where their very presence will probably bring about their engagement in war. The troops are there and, should hostilities commence in the area, our troops may be fired upon; and our national honor at stake. Without

any determination or decision by the Congress, or the people we would become engaged in a war.

I am sure that neither President Eisenhower, President Kennedy, nor President Johnson ever intended or believed that we would become involved in a major war in Southeast Asia, although this was not their intention, we nevertheless are involved because of the gradual sending of troops over a period of time.

The Senator asks me what it refers to. It can only refer to what might happen in the future.

Mr. CURTIS. Then why not say so?

Mr. COOPER. But there are certain things which have occurred in the past. For example—and if I am wrong, I hope that the Senator will correct me—we have entered into treaties with countries all over the world. Our Pacific area treaties, for example, provide that in case of armed attack each party agrees that it will "act to meet the common danger in accordance with its constitutional processes." In that event, the United States must decide what action to take by its constitutional processes. The resolution would require that in the use of the Armed Forces that the President come to Congress and ask for approval. This is an obligation undertaken in the past, the execution of which calls for actions that may be prospective.

In this connection, Mr. President, I ask unanimous consent that my individual views to the committee's report on Senate Resolution 187 in 1967, which discusses these situations involving the use of our Armed Forces, be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

INDIVIDUAL VIEWS OF MR. COOPER

Senate Resolution 151 in its original form expressed the sense of the Senate that a "national commitment" by the United States to a foreign power requires affirmative action by the executive and legislative branches "through means of a treaty, convention or other legislative instrumentality specifically intended to give effect to such a commitment." So broadly defined, the term commitment would seem to include all forms of economic aid as well as military assistance. In addition, the resolution would seek to limit the authority of the President to enter into executive agreements in requiring their approval by the Congress. In my opinion and in that of other committee members, it was felt that such a resolution would unduly restrict the President in the conduct of our country's foreign affairs.

It is my view that the concern of the Senate and of the country today relates to the assignment of our troops abroad where no military action exists at the time but where the presence of troops in a foreign country, should they be attacked, could set in motion a series of events that would involve our country in a war without the determination of the Congress that the sending of the armed forces was necessary and in our country's best interests.

Therefore, to avoid situations of this type in the future, I felt it more appropriate that the resolution seek to place certain limitations on the deployment of our armed forces outside the United States in a foreign country without congressional authorization. When the committee considered S. Res. 151, I offered an amendment to this end. When my amendment was not adopted, I voted for the amended resolution reported by the committee which is designed to accomplish the same purpose by a somewhat different method.

The text of my amendment and a brief explanatory note are set forth below.

"AMENDMENT RELATING TO THE ASSIGNMENT OF UNITED STATES ARMED FORCES TO DUTY IN FOREIGN COUNTRIES

"*Resolved*, That it is the sense of the Senate that, prospectively, a commitment by the United States to assign its Armed Forces to duty outside the United States for the purpose of providing military assistance to or aiding in the defense of a foreign country, government, or regime results only from affirmative action taken by the Legislative and Executive branches of the United States Government by means of a treaty, statute or concurrent resolution of both Houses of Congress specifically providing for such assignment."

1. My proposed amendment would have no constitutional or legal effect. Its purpose is to advise the President and thus to inhibit the assignment by the President—except with the approval of the Congress—of the armed forces outside the United States to assist in the defense of another country either by the immediate engagement of the United States armed forces in war or to place the United States armed forces on foreign territory where they could become progressively involved in belligerent activities and engage the United States in war.

2. As the amendment applies only to the use of the armed forces in aid or defense of another country, it does not express any intention to invade the constitutional power of the President as commander-in-chief to use the armed forces to defend the United States, to defend members of our armed forces wherever they are, and to safeguard American lives and property—which is his constitutional right and duty.

3. It would not affect the authority of the President as commander-in-chief to deploy armed forces for their training and maneuvers outside the United States, such as the customary maneuvers of the United States Navy.

4. It would not prevent the training of foreign forces in the United States, as is now done.

5. It would not, in my view, prevent the use of military advisors abroad providing they were so limited in number that it could not be intended that they would engage in military operations. The report could spell out precisely the intention of the committee on this point.

6. In the case of the treaties to which the United States is now a party and under which the United States is pledged to provide assistance to certain specified countries through its "constitutional processes" when the security of these countries is threatened, the amendment would assert that "constitutional processes" means the approval of the Congress.

7. It does not define the word "commitment" which might be subject to differing interpretations but does state the circumstances under which the United States would be committed, namely, by the affirmative action of both the executive and legislative branches.

In summary, my amendment is intended to require the specific approval of the Congress before the United States armed forces can be assigned by the President to provide military assistance to or aid in the defense of another country, although at the time no belligerent or hostile acts are taking place. Its purpose is to prevent in the future the progressive involvement of the United States in a series of events leading to war as has been the case in Vietnam.

Mr. FULBRIGHT. If the Senator from Kentucky would yield on the point he mentioned a while ago, that the attention of the committee has been called to what is still a secret agreement. It was made by executive members and not published. No request for approval has been submitted to Congress on it. If we want to add that to it, and there may be others, so that I think it would have the effect of saying that all those already made, even though we do not know about them, even though already made, we would have to honor them.

Mr. CURTIS. Would not the Senator want to repudiate them?

Mr. FULBRIGHT. I might want to consider.

Mr. CURTIS. But the Senator would not know what they were.

Mr. FULBRIGHT. That is right. I might not know what they were. I do not know whether the Senator would want to affirm them even though he did not know what they were, the way it is.

Mr. CURTIS. I do not think we would want to approve them.

Mr. FULBRIGHT. It is true that it would not have any effect in the future.

But let me give the Senator one example of some of the things we had in mind. If the Senator will recall, Vice President Humphrey once made a statement that the policy of the previous administration was to bring the Great Society to Asia when the war was over. Was that a commitment or not? That was a statement made by a very important official of our Government, like many other statements made after a fine banquet, when everyone is in a good humor and we are trying to say something pleasant to people, as we do sometimes in our lives. But we do not mean them too seriously.

However, I have the impression that in foreign countries, those statements are taken to be commitments because under their system of government they do not have a congress which has to approve these things. I think that is one very important aspect of this problem, which is to give notice to foreign countries that real commitments of our wealth—and armies especially—should be made in accordance with constitutional processes. Being a good friend, in good humor, one may make statements, but they should not be taken too seriously.

In February 1966, Vice President Humphrey declared that the United States would provide all necessary assistance to enable Thailand and other countries, if they were threatened by Communist aggression, to defend themselves. That is a very broad statement by a Government official, one which I think should not be taken seriously. What we are saying in this resolution is that all of those people should listen, if we make any such arrangement as that, so that they will know that a commitment should first have the approval of Congress.

I do not think there will be much danger from any former commitments that I know of. Of course, all of them that I know of, with few exceptions, have been approved by Congress, in pursuance of legislative action or treaty.

Mr. CURTIS. If those in the past are binding, they are still binding.

Mr. FULBRIGHT. Oh, yes.

Mr. CURTIS. Even though we say the sense of the Senate is that they are not.

Mr. FULBRIGHT. I do not think the resolution says that. All those made in pursuance of legislative action are certainly binding. Is the Senator saying that, if there were certain agreements we knew nothing about, involving a commitment, an obligation or an unknown amount of money, that the Senator does not think we should repudiate them, once they came to light, even though the Senator should think they are very dangerous to the security of this country?

Mr. CURTIS. No. All I am saying is that if I vote for a resolution that is anything other than prospective, I would like to be informed as to what it is.

Mr. FULBRIGHT. How can I inform the Senator if I do not know anything about it? I am raising questions about those agreements I do not know anything about.

Mr. CURTIS. Are there any of those that the Senator knows about?

Mr. FULBRIGHT. There is one that I do not like.

Mr. CURTIS. Which is that?

Mr. FULBRIGHT. As I suggested, it is a secret one, and I do not want to create any undue controversy that involves another country. I shall be glad to show the Senator what we have in the committee about it. It is still secret.

I want to make clear that the only reason I used the Spanish question as an example is not that I in any way criticize the Spanish people. I have great affection for the Spanish people. I used it simply because it is an example of an agreement that we did not know anything about, and that did not come to light until recently. It is no better or worse than many others. It is our own people I am faulting, not the Spanish people. I want to make clear that I am not criticizing what the Spanish did about it. I am criticizing our own Government, not the Spanish. They are very sensitive. Whatever I may have said should not be interpreted as a criticism of Spain.

Mr. CURTIS. The junior Senator from Nebraska feels that all commitments should be made in a constitutional fashion.

Mr. FULBRIGHT. That is all I am saying.

Mr. CURTIS. But I do not want to take action that reflects upon the good name of past Presidents or Vice Presidents who may have gone around the world making promises of a more abundant life by the use of millions of American dollars, because, as a matter of fact, they made such promises in my State and did not deliver on them, and we are not a foreign territory.

So in laying down the rule for the future, I would not want my vote to reflect on the good name of those retired public servants.

Mr. FULBRIGHT. We are not reflecting on the names of those officials. As we have tried to make clear, in my own view and that of others, through the years the Senate—and I have participated in it—has been rather negligent in its responsibility under the Constitution in not having checked more carefully on the executives. I am not reflecting on anyone specifically. I only used an example. The Senator more or less forces me to use examples of how these things happen. That is why I used the example. I did not mean to reflect on anyone.

Let us assume that a secret agreement is made that we are to send troops to a certain country which is threatened and that those troops will be under the command of the local general. That is something which is very sensitive. I am not sure Senators would agree to that. Suppose we did not know anything about such an agreement because it had not been made public. I do not know whether the Senator from Nebraska or the Senator from Illinois would at all agree to it.

Mr. MUNDT. Mr. President, will the Senator from Arkansas yield?

Mr. FULBRIGHT. I yield.

Mr. MUNDT. I wonder if we could get a little clearer definition of what is involved in the term "financial assistance" or "financial resources."

Mr. FULBRIGHT. There have been so many examples of aid to foreign countries.

Mr. MUNDT. Let me give a specific example. The Senator is a member of the Banking and Currency Committee, as I understand.

Mr. FULBRIGHT. No, I am no longer a member. I was once a member.

Mr. MUNDT. As I understand it, we have made a commitment to aid other countries to support the pound with American dollars, which is a part of our financial resources. We have all kinds of international monetary programs in the interest of the collective protection of the free world's monetary system. One country that is in a little better financial position helps another. For psychological and financial reasons, these agreements are usually secret because of the psychological impact on the currency of a country. Would this resolution prohibit the United States from fulfilling a commitment it made to support, let us say, the pound of England?

Mr. FULBRIGHT. Before I answer, let me inquire of the Chair whose time is being used. We started on the time of the Senator from Illinois.

The PRESIDING OFFICER. We are operating on the time of the Senator from Arkansas.

Mr. FULBRIGHT. We began this interlude on the time of the Senator from Illinois. When did we begin on my time?

Mr. MUNDT. When the Senator from Illinois yielded the floor.

The PRESIDING OFFICER. When the Senator from Illinois yielded the floor.

Mr. FULBRIGHT. How much time have I remaining?

The PRESIDING OFFICER. The Senator from Arkansas has 11 minutes, and the Senator from South Dakota has 20 minutes.

Mr. FULBRIGHT. I will just take a minute. I think it ought to be on the Senator's time, but I will yield myself 2 minutes, and then I will take my seat.

Every one of those agreements has been approved by legislation of Congress. Every one of them conforms, to my knowledge, with the sense of the Senate resolution. I know of no executive agreements in which the executive has gone beyond its authority in supporting the pound or other currencies. They are all subject to legislation having to do with international banks or our own Treasury.

What I am talking about, and what I am suggesting, is that one cannot go off to one of these countries and, in a spirit of great friendship, or for any other reason, make a commitment of foreign aid of $500 million, for example, if it is not authorized in a bill. All that the Senator has suggested has been consistent with legislation that has been enacted. All we are trying to say is, "Do not go around spreading cheer to a foreign country without being authorized by Congress." I do not see anything wrong with that. All of a sudden there seems to be an idea that we ought to let the executive go about making promises without authority. Every one of the kinds of commitment the Senator has mentioned has, I think been authorized by legislation or a treaty—mostly by legislation—so I do not see why that should bother anyone.

Mr. MUNDT. I associate myself entirely with the idea that no President or Vice President or other governmental official should go around and endeavor to commit us to a big foreign aid program. They cannot do it now, in fact, as a firm commitment. We have cut them down in the past; we can do it again.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. FULBRIGHT. It is very embarrassing to review what a President or a Vice President has done.

Mr. MANSFIELD. Mr. President, will the Senator yield one-half minute to me?

Mr. FULBRIGHT. I yield to the majority leader.

Mr. MANSFIELD. Mr. President, I think what we ought to keep in mind is that what we are trying to accomplish is a partnership with the President, a strengthening, and not a diluting, of his hand.

Insofar as the Department of Defense and the Department of State are concerned, the difficulty lies in the fact that as a practical matter, it is difficult for a President to reach down to the lower and middle departmental levels—for which he has responsibility, nevertheless—and know fully what is going on. The matter of the Spanish bases, for example, was inaugurated by the Secretary of State from within his Department. Direction was given to the Chairman of the Joint Chiefs of Staff, General Wheeler, who in turn gave it to General Burchinal, who was located in West Germany. General Burchinal then carried on negotiations which I assume the President of the United States did not know about, and which certainly this President, President Nixon, is not responsible for.

All we are trying to do—and I want to emphasize this, and I could repeat the example over and over again—is to establish an accommodation, a partnership, which will strengthen the President's hand. It will include the legislative branch, as it should be included under the Constitution and deny to no one any

of the responsibility that elected officers of the Government are obligated to exercise. That includes the President, the Vice President, and Members of Congress who have to go back and explain to the people who we represent just what we are doing, the basis on which we have done it, and why we take the action we take.

So this mention of weakening the President's hand or tying his hands is nothing but a lot of balderdash. It just will not hold up. It is not true. We ought to recognize that we are settling a matter of fundamental interest to this body, and doing so with a view to strengthening the hand of the President, rather than weakening it.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. Mr. President, in view of the fact that the distinguished Senator from Arkansas shows some reluctance to insert an amendment in the resolution now before us, along the lines I have suggested, it would have been done by amendment, and then we would have to have a vote. I do not know that I would want to take the time of the Senate to have a vote on that matter. If we did not vote on it, the next matter in order would be the substitute of the Senator from South Dakota and the Senator from Connecticut. Is that correct?

The PRESIDING OFFICER. The pending question is on the amendment offered by the Senator from South Dakota and the Senator from Connecticut.

Mr. DIRKSEN. My particular inquiry is as to whether that amendment is the first one on which the vote will occur.

The PRESIDING OFFICER. That would be the first one.

Mr. DIRKSEN. I think we ought to have the yeas and nays. I request the yeas and nays.

The yeas and nays were ordered.

Mr. MUNDT. Mr. President, first, I wish to express my appreciation to the Senator from Connecticut (Mr. DODD), to the minority leader, and to other Senators with whom I have consulted over the past few days as to what to do about the resolution, Senate Resolution 85. Unhappily, I was in my State at the time the Foreign Relations Committee met, so I was not recorded and had no opportunity to try to change any of the language as the resolution came out of committee.

I was, however, present 2 years ago, in 1967, on the day we brought out of the committee, by unanimous vote, the resolution of that year. As I studied the two resolutions, I became more and more concerned about the ambiguity of Senate Resolution 85.

Fortunately, we are now confronted with a substitute for Senate Resolution 85, because the chairman has accepted the Cooper substitute and our choice is now between the Mundt-Dodd resolution and the Cooper substitute for Senate Resolution 85, with or without amendment.

I add just a word or two as to what motivated me to raise the question and precipitate the dialog, and to try to bring about a more detailed and definite understanding of what we were about, through the presentation of what has been called the Mundt-Dodd substitute and the debate and the revision of Senate Joint Resolution 85 which it has precipitated.

The longer I studied Senate Resolution 85, and tried to relate it to the committee report which, in the main, was the same Senate committee report written for the previous resolution 2 years ago, which was altogether different in verbiage, the more I became convinced that it would be bad policy for the Senate, in trying to reassert additional authority in connection with the determination of where our troops are used and where our money is spent—and I definitely applaud and approve of that endeavor—to agree to a resolution as ambiguous as Senate Resolution 85 as it read prior to the adoption of the Cooper substitute, wherein we simply said:

> Whereas accurate definition of the term "national commitment" in recent years has become obscured: Now, therefore, be it
>
> *Resolved*, That it is the sense of the Senate that a national commitment by the United States to a foreign power necessarily and exclusively results from affirmative action taken by the executive and legislative branches of the United States Government through means of a treaty, convention, or other legislative instrumentality specifically intended to give effect to such a commitment.

Commitment, obviously, as one analyzes the word, could mean anything to anyone. Consequently, it could have had some highly mischievous ramifications.

Former Defense Secretary Clifford has appeared before our committee, for example, and has been giving widescale publicity to a scheme he has to reduce American participation in the Vietnam war, which may or may not have merit, and may or may not be utilized. He proposes that at some future juncture, about 2 years from now, perhaps, we can withdraw our American ground troops and commit ourselves to continue the fighting in Vietnam by providing an air umbrella with whatever necessary air power needs to be involved. That kind of commitment could not be made had we adopted Senate Resolution 85 in its original form, as presented by the Committee on Foreign Relations.

We are about to try new approaches in the Paris peace talks. Every few weeks, someone on our side comes up with some new suggestion or some new approach—eight points, four points, 10 points—and if we are ever going to make any progress in the Paris talks, I suppose it will be through a process of commitment by commitment, on minor steps, until finally we reach the happy day when there can be a comprehensive meeting of minds.

But if we tie the hands of the Executive from making any commitment whatsoever, we would absolutely stultify any chance for progress at the Paris peace talks; and that would be something which the Senate, in trying to show its capacity to help govern the world, help control the Armed Forces, help protect this country, should not engage in, in such ambiguous fashion.

We have the same thing in Korea. We have a DMZ, and a lot of trouble, a lot of border attacks. The North Koreans keep coming down, and there is considerable hostility, mostly between North Koreans and South Koreans. Some have suggested that they pull back the forces on both sides of the DMZ, to keep them far enough apart so that kind of bloody business could be stopped.

That would, however, also require some kind of commitment on our part. Certainly commitments such as that cannot be brought up for debate on the floor of the Senate. We have to provide some kind of power in the Executive to move by degrees and by agreements or commitments on minor points as we engage in negotiations, and this brings me to my greatest concern of all about Senate Resolution 85, as it was originally presented to the Senate.

I ask unanimous consent that the original language of Senate Resolution 85 be printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

> *Resolved*, That it is the sense of the Senate that a national commitment by the United States to a foreign power necessarily and exclusively results from affirmative action taken by the executive and legislative branches of the United States Government through means of a treaty, convention, or other legislative instrumentality specifically intended to give effect to such a commitment.

Mr. MUNDT. Everybody is hoping and praying we are going to have some negotiations between the United States and the U.S.S.R. about the limitation of nuclear weapons and nuclear arms. If in fact we are going to have those negotiations, and make any progress, certainly we are going to have to be in a position to make some commitments as we go along by way of negotiations; because you simply do not bring these conclusions, full blown, into being. We give a little, they give a little; we make a little gain, and if we have to run back on each of those commitments, and have a big debate in the Senate, we are never going to get anywhere negotiating with the Russians, or anyone else, in important matters of that kind.

So Senator DODD and I, after consulting with a number of other Senators, have suggested this substitute. I still think it is preferable to the Cooper substitute for Senate Resolution 85, although I want to be perfectly candid, and say that I think the Cooper substitute is much better than the original text of Senate Joint Resolution 85. However, we cannot legislate retroactively. There is a sound constitutional provision against ex post facto legislation. I think we would be on sounder ground if we made clear in the language of the Cooper substitute what is made clear by the discussion in the Senate; namely that we are talking about the future. We spell that out in the Mundt-Dodd substitute. We also make it clear that what we are trying to do is what the country itself wants to have done, and that is to make it dead certain that we are not going to have, again, armed forces used in

hostilities on foreign territory, without appropriate prior affirmative legislative action.

We spell it out clearly and objectively. We do not get involved in any ambiguities of what the use of American troops means, whether in hostilities or not in hostilities. We do not tie the hands of the President against some contingency when we might find it important to utilize the prestige, the presence, and the authority of the United States.

We provide for what is necessary to repel an attack on the United States, or to meet a direct and immediate threat to the national security, or to protect U.S. citizens and property, in recognition of the fact that the President shall, of course, be able to exercise his constitutional authority and put the Armed Forces to work protecting this country against attack.

The Cooper substitute, I think, implies that. It does not say it specifically, but the Mundt-Dodd substitute makes it clear.

If we are to establish guidelines—and I am in favor of them—for the President and the State Department, I think those guidelines should be just as clear, specific, and definite as possible. After all, this is a sense of the Senate resolution, and if we pass a sense of the Senate resolution which makes no sense, as I think was true of the original language of Senate Resolution 85, certainly our advice is not going to be heeded very seriously.

If, on the other hand, we adopt a resolution which is clear, specific, and definite, I suspect that the average President, Secretary of State, and Secretary of Defense are going to take it seriously enough to consult with us more freely and more frankly than they have in the past. That, in fact, is what we all desire. So I think it is important to use words of precision and words of clear definition.

Mr. President, I shall vote for either resolution, as the Senate prefers. I think that the substitute presented by Senator DODD and myself is a little more precise, a little more meaningful, and a little tighter, and so I favor its adoption. But I say, again, I wish to congratulate publicly Senator DODD, the minority leader, and other Senators who worked hard with me in bringing before the Senate this substitute which, if nothing else, has resulted in a much improved version of Senate Joint Resolution 85 on which we can work our will in the Senate.

Our action has focused enough debate and enough discussion, and brought about enough compromise and sufficient change, so that whatever we do is preferable to what we would have before us otherwise.

I recommend to my colleagues the approval of the substitute resolution which we shall be voting upon in a very few minutes, in the subsequent rollcall vote.

Mr. President, I reserve the remainder of my time.

Mr. HOLLAND. Mr. President, will the Senator yield for a question?

Mr. MUNDT. I yield.

Mr. HOLLAND. I have just one question. What was the Senator's purpose in limiting his substitute to matters of national security; that is, involving the use of the Armed Forces, and not covering in words money commitments, property exchanges, or any of the other things?

Mr. MUNDT. The reason it did not include the phrase that is in the Cooper substitute about financial resources is simply that we were building on the evolutionary history of this resolution in the Senate which had been dealing with Armed Forces and hostile forces all through its development.

Furthermore, when we take overt action by sending in troops, it is an irrevocable action. We cannot pull them back. Then the power and prestige of the country become involved. But if a Vice President or someone else makes a statement, "We are going to get you $100 million," it is not irrevocable. We in Congress have very frequently declined to deliver on such promises to people abroad. I think that is so well understood now, because we have failed to deliver frequently enough, that even the foreign auditor who hears these unauthorized so-called good will promises has about the same kind of skepticism about them that the American voter has when he hears a political promise in a hot campaign. He takes it with a grain of salt.

Mr. HOLLAND. It is, then, the Senator's intention very carefully to limit his substitute resolution so that it covers only the use of the Armed Forces, or commitments to use the Armed Forces, is that correct?

Mr. MUNDT. That is correct.

Mr. HOLLAND. I thank the Senator.

The PRESIDING OFFICER. Who yields time?

Mr. FULBRIGHT. Mr. President, I yield 2 minutes to the Senator from Vermont.

Mr. AIKEN. Mr. President, I have studied the Cooper substitute for Senate Resolution 85, and I can find absolutely nothing in it that would tie the hands of the President or impair his right and duty to protect our Nation whenever the need might arise, as authorized by the Constitution.

Speaking of commitments, we have made hundreds of them, all of which, to the best of my knowledge, have been authorized by Congress. As far as I know, the President has made no commitments whatsoever but those which have been authorized by Congress, and I do not think he intends to. We have had programs which provide for commitments: the Peace Corps, upon which we had hearings this morning, provides for commitments; Public Law 480 authorizes commitments; as do international banks, multilateral banks, and other organizations. We have authorized the Kennedy round of customs and tariffs, and many other things; I cannot go through them all.

As to any fears about any agreements or commitments which might be made with Russia, no commitment which could be made with Russia or any other country would be valid until it had been approved by the Senate.

For example, I refer to the Antarctic agreement with Russia. We have made many agreements with Russia. There were the Limited Test Ban Treaty and others.

I believe it would be in the interest of our country to enact this measure so that if some day we have a President who is inclined to run wild and ignore the desires of the people of the United States or Congress, there would be at least some brake on his operations.

I am sure that President Nixon has no such intention. I can see nothing at all in the pending resolution which would impair his constitutional authority.

Mr. MUNDT. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. Each side has 5 minutes remaining.

Mr. MUNDT. Mr. President, I yield 4 minutes to the distinguished Senator from Wyoming.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 4 minutes.

Mr. McGEE. Mr. President, I talked at great length on this question in the early days of this discussion. I do not intend to repeat it now.

I think on reflection of the dialog we have had we are still neglecting the sensitive question, and that is: How do we really undate the mechanism for the Senate participating in crises decisionmaking in a world that is changing, in a time element that has been shrunken, in a geographical factor that has diminished?

I think we still fail to come to grips with those who have a concern, and a rightful concern, as I see it, when we find circumstances around the world in which, as a genuine effort on the part of someone to head off a worse explosion, a President or Chief Executive finds it important to make a tentative agreement.

A tentative agreement sometimes is then taken up and followed because of the reaction of a potential competitor or an enemy. The result is that we find ourselves pretty inhibited and pretty encroached upon in the Senate in terms of our decisionmaking by actions that a President may well have in good conscience been compelled to make.

I believe we would be more realistic still if we were to address ourselves to some form of mechanism that would make it possible for the Senate to act in an advisory capacity, in a consulting capacity, in a meaningful directive.

There could be a special select committee of the Senate, a special relationship in regard to the Foreign Relations Committee, or whatever it may be. I think we are missing the point. We are not going to be able to follow the Foreign Relations Committee as we have always known it and still address ourselves to the crisis factor.

I petition again the importance of our getting on with the matter.

The resolution will be adopted, I am sure, very quickly and with a substantial margin. However, I think we would be missing the point if we were not to address ourselves to the heart of the matter.

A few days ago, one columnist, Roscoe Drummond, suggested the appointment or selection through some device of a high-powered Senate committee that could act on a moment's notice in a crisis and be in close consultation with the President and the Senate, and overcome

obvious elements involving the cumbersome procedures of the Senate, the difficulty of getting some kind of consensus, and the difficulty of getting some kind of decision without parading before the whole world what our secrets are. I believe we need to focus on this.

I would hope, even as we adopt the measure—and I intend to vote against it—that the chairman of the Committee on Foreign Relations and relevant groups in the Senate will proceed to address themselves to moving up a notch or two on the timeliness of the crisis capability of the Senate.

I still intend not to support the resolution. However, that is no longer a meaningful or relevant factor at the present time.

I remind the Senate that we ought to move farther down the road in the nuclear age to responsible policymaking and a responsible capacity in these times.

Mr. FULBRIGHT. Mr. President, I yield 1 minute to the Senator from Missouri.

The PRESIDING OFFICER. The Senator from Missouri is recognized for 1 minute.

Mr. SYMINGTON. Mr. President, the reasons for the pending resolution are well expressed in what the press says is the first major policy address since 1966, an address that was delivered by Gov. Alf Landon in Manhattan, Kan., yesterday.

Governor Landon stated:

America has oversold its strength, its faith and its hopes.

He further said:

We have oversold our military might. Despite our obvious strength, we cannot make all things happen that we would like to have happen, nor prevent all things from happening that we do not want to happen.

We have oversold the capacity of our economy. Despite our obvious affluence, we cannot finance world security, world development, the Vietnam war, and the elimination of poverty at home—all at the same time.

We have oversold the dollar. Despite the dollar's being one of the world's most stable currencies and monetary value bases, we are witnessing its decline and vulnerability.

Mr. President, I ask unanimous consent to have printed in the RECORD the entire article in question, entitled "Landon Says United States Is Overextended," as it appeared today in the New York Times.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LANDON SAYS UNITED STATES IS OVEREXTENDED—STRENGTH, FAITH AND HOPES OF NATION HELD OVERSOLD

MANHATTAN, KANS., JUNE 24.—Alf M. Landon said here today that "America has oversold its strength, its faith and its hopes."

The Republican Presidential candidate of 1936, addressing the students and faculty of the summer school at Kansas State University, made the comment during a sweeping survey of contemporary foreign policy issues.

He expressed concern over demands for protectionist trade legislation and he called on President Nixon for "tact and, above all, equity" in approaching central foreign policy issues.

Mr. Landon, who is 81 years old, said:

"I strongly believe that many of the problems concerning our attempted world posture derive from the fact that America has oversold its strength, its faith, and its hopes in relation to its abilities and resources.

"We have oversold our military might. Despite our obvious strength, we cannot make all things happen that we would like to have happen, nor prevent all things from happening that we do not want to happen."

SEES LIMIT ON NATION

"We have oversold the capacity of our economy. Despite our obvious affluence, we cannot finance world security, world development, the Vietnam war, and the elimination of poverty at home—all at the same time." He continued:

"We have oversold our will and resolve. We are the most generous people of the world, the most committed to the protection of freedom, the most altruistic, but despite those qualities, there are limits beyond which we cannot reasonably exercise our will and resolve to assume alone the role of world policeman and benefactor.

"We have oversold the dollar. Despite the dollar's being one of the world's most stable currencies and monetary value bases, we are witnessing its decline and vulnerability.

"The United Nations has been oversold. Established to achieve world peace, the United Nations—after 24 years—is far from realizing its purpose, and its goal will remain a distant dream so long as the major powers—including the United States—act unilaterally on major world issues, and so long as Communist China—representing one-fourth of humanity—is unrepresented in that body."

Mr. Landon, who was Governor of Kansas before his unsuccessful bid to defeat President Franklin D. Roosevelt, now lives in Topeka and holds the title adjunct professor of political science at Kansas State University.

His last previous major policy address was in December, 1966, when he inaugurated a lecture series named after him at Kansas State.

Mr. SYMINGTON. Mr. President, to me this address is, in effect, a clear and precise summation of why this resolution is important to the future security and well-being of the United States.

Mr. FULBRIGHT. Mr. President, I yield 2 minutes to the Senator from Virginia.

The PRESIDING OFFICER. The Senator from Virginia is recognized for 2 minutes.

Mr. BYRD of Virginia. Mr. President, I support the pending resolution as originally drafted, or as revised by the Senator from Kentucky and the Senator from Arkansas.

It seems to me that it is important, and the hour is late but not too late, for the Senate to go on record that the Chief Executive over the years has assumed too much authority.

I think the resolution of the Senator from Arkansas is an appropriate resolution.

I think it is desirable for the Senate to put itself on record as saying that any commitments made in the name of the United States are not national commitments unless the elected representatives of the people have participated in that matter by their votes.

Mr. President, I think also it is important to let other countries throughout the world know that in a democracy like the United States, the Chief Executive alone cannot make commitments on behalf of this country, but that for a commitment to be a valid national commitment, it must be participated in by the congressional branch, the elected representatives of the people.

Mr. President, I am pleased to support the pending resolution as revised by the Senator from Arkansas and the Senator from Kentucky.

I hope this will be the beginning of the Senate reasserting itself in the field of foreign policy. The Senate has a grave responsibility in this regard.

Mr. FULBRIGHT. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Arkansas has 2 minutes remaining.

Mr. FULBRIGHT. I yield 1 minute to the distinguished junior Senator from Virginia.

The PRESIDING OFFICER. The Senator from Virginia is recognized for 1 minute.

Mr. SPONG. Mr. President, I will support Senate Resolution 85, as amended by the Senator from Kentucky, not because it will in and of itself change our foreign policy, but because I hope it will signal a beneficial change in the process of our foreign policy.

A Senate resolution cannot change the Constitution. It cannot force a President to modify his approach to foreign policy. It cannot provide Congress with new powers or authority. And, it cannot guarantee that the United States will have a more lucid or intelligible foreign policy or that this Nation will avoid undesirable situations and involvements in the future.

It can, however, suggest procedures which, if followed, would lead to a more precise and more understandable foreign policy—a more fully explained and more widely debated policy.

There have been criticisms of U.S. foreign policy in recent years and criticisms of a lack of policy. There have been criticisms of specific policies and commitments and there have been criticisms of failures to speak and act. It has been said that the United States has not formulated or directed foreign policy, but has only responded to crises and events.

The criticisms and the dissatisfaction resulting from the courses taken stem, I believe, from imprecision in foreign policy and misunderstanding of what policies and commitments do exist. These misunderstandings are prevalent not only among Members of Congress, but also among U.S. citizens, and among our allies, and opponents throughout the world.

There is, first of all, confusion over the number of countries to which the United States is committed. It can be argued that the United States is committed to all of the other 125 members of the United Nations. It can be said that the United States is committed only to the 42 nations with whom it signed regional or bilateral collective defense treaties between 1947 and 1955. Or, it may be argued that the United States is committed to 65 or more nations, when pledges in executive agreements, resolutions, and understandings are added to those contained in treaties.

The question of numbers partially derives from questions over what types

of agreements actually constitute U.S. commitments. While there is no argument over the legality of commitments in the U.N. Charter or in treaties, there is question as to how valid Executive agreements, understandings, and similar instruments are.

Finally, there is question over the exact meaning of commitments. The U.N. Charter and most treaties commit the United States to consult with other nations, in the case of certain events or happenings, to determine action to be taken, and policies to be followed. Do these commitments then mean that action cannot be taken without further authorization by Congress, or may the President follow a course which he simply deems to be consistent with the proposed terms of a treaty or agreement?

These uncertainties are partially responsible for confusion and uncertainty in U.S. foreign policy. These ucertainties can be ameliorated by adherence to the processes envisioned in the commitment resolution.

A resolution, if adopted and followed, can indicate what commitments are considered valid and, in broad outline, what a commitment means. The discussion which would take place in determining new commitments would contribute to understanding of the meaning and extent of U.S. policy. This would help delineate the extent and depth of all U.S. commitments. It would signal when new commitments are made.

Such a course would provide the information necessary for U.S. citizens to develop a greater understanding of their Nation's policy.

It would indicate to foreign nations—both friendly and unfriendly—U.S. intent and purpose. Such a course would udoubtedly diminish the possibility of miscalculation and unwanted confrontations.

For these reasons, I favor the national commitments resolution as modified by the amendment offered by Senator JOHN SHERMAN COOPER. It would fully define the meaning of commitments and specify how they can be made. In doing so, it would help remove questions and uncertainty about U.S. goals.

In considering this resolution, we must, however, be mindful of several things. First, a resolution is not a panacea for the Vietnam war and it is not an absolute guarantee against future misadventures. As the saying goes, hindsight is better than foresight. We now know how Vietnam happened and we wish it had not. With or without this resolution, it is unlikely that either the President or Congress would knowingly venture into a similar situation. But parallels do not always occur, and the test of U.S. foreign policy in the future—whether directed by the President or Congress—will be determined by our ability to recognize new situations and threats which would lead to unwanted involvements and preclude their happening. Hopefully, the resolution will lead to a clarification of U.S. foreign policy and will provoke the type of debate and discussion necessary to indicate the possible consequences of policies the Nation pursues.

Finally, I believe we must remember that the President must have some flexibility in foreign policy. The evidence is quite clear that some delay in acting after the Gulf of Tonkin incident would have had little consequence. Had the United States, however—and I am not arguing that it did—wished to intervene in Czechoslovakia or Greece, it would not have had the time for congressional action before being presented with a fait accompli. Much as I wish it were otherwise, I do not feel that we can completely rule out the possibility that there will not be an occasion where the President has to act rapidly. In adopting this resolution, I do not believe the Congress of the United States should indicate that it believes the need for rapid action is forgone or that it should mislead the American people into believing that such a situation will never again arise.

With these two considerations in mind, however, I believe the procedures envisioned by the resolution should be adopted as constructive and clarifying to U.S. foreign policy.

The PRESIDING OFFICER. Who yields time?

Mr. FULBRIGHT. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 1 minute.

Mr. FULBRIGHT. Mr. President, in closing, I thank the Senator from Kentucky for his very fine contribution to this matter. I think his suggestions have certainly improved the resolution. I have accepted his suggested amendments and join in advocating his revised version, which reads as follows:

Resolved, That (1) a national commitment for the purpose of this resolution means the use of the Armed Forces of the United States on foreign territory, or a promise to assist a foreign country, government, or people by the use of the Armed Forces or financial resources of the United States, either immediately or upon the happening of certain events, and (2) it is the sense of the Senate that a national commitment by the United States results only from affirmative action taken by the executive and legislative branches of the United States Government by means of a treaty, statute, or concurrent resolution of both Houses of Congress specifically providing for such commitment.

It is a bipartisan effort of members of the committee on both sides of the aisle trying, in my view, to reestablish the proper constitutional functions of the Senate of the United States.

It has nothing whatever to do with any kind of partisan matter. It is no reflection upon any of the present members of the executive branch in any way.

In a way, we are saying in the resolution that from here on we are going to be much more conscious of our responsibility and much more careful in the approval of obligations of major importance to our country.

I think it will have a very beneficial effect upon the attitude of foreign countries toward our country.

If we live up to it and make it convincing to them, I believe it will, in the future, help us avoid some of the troubles that have arisen in the past not because anyone intended for trouble to arise, but because many of our people have a very gracious way of saying nice things to people—involving promises beyond their authority—and the other nations have not always understood our constitutional system, which we believe is a good system. I believe it is.

I appreciate the assistance and cooperation of Senators on both sides of the aisle, particularly the members of the committee.

The Senator from Vermont has made a great contribution to the development of the pending resolution, which I now hope the Senate will agree to.

The PRESIDING OFFICER. The time of the Senator has expired.

The Senator from South Dakota has 1 minute.

Mr. MUNDT. Mr. President, I yield 1 minute to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 1 minute.

Mr. DIRKSEN. Mr. President, first, I compliment the distinguished Senator from South Dakota (Mr. MUNDT) and the distinguished Senator from Connecticut (Mr. DODD), both of whom are members of the Committee on Foreign Relations, for giving abundant attention to the matter and developing a substitute that I believe is far more satisfactory than Senate Resolution 85, which is pending before the Senate.

I think they have done excellent work. I rather regret the fact that the word "future" does not appear and that the words "in hostilities" do not appear in the Cooper-Fulbright resolution. However, that is neither here nor there. The matter has been fully discussed.

As I recall, the first vote will occur on the substitute offered by the Senator from South Dakota and the Senator from Connecticut.

The PRESIDING OFFICER. The Senator is correct.

Mr. DIRKSEN. Mr. President, I yield the floor.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment in the nature of a substitute offered by the Senator from South Dakota (Mr. MUNDT) and the Senator from Connecticut (Mr. DODD). On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Tennessee (Mr. GORE), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Iowa (Mr. HUGHES), the Senator from Utah (Mr. MOSS), the Senator from Connecticut (Mr. RIBICOFF), the Senator from Georgia (Mr. RUSSELL), the Senator from Alabama (Mr. SPARKMAN), the Senator from Maryland (Mr. TYDINGS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I also announce that the Senator from Michigan (Mr. HART) is absent on official business.

I further announce that, if present and voting, the Senator from Tennessee (Mr. GORE), the Senator from Michigan (Mr. HART), the Senator from Iowa (Mr. HUGHES), the Senator from Connecticut (Mr. RIBICOFF), the Senator from Georgia (Mr. RUSSELL), and the Senator from

Alabama (Mr. SPARKMAN) would each vote "nay."

Mr. SCOTT. I announce that the Senator from Hawaii (Mr. FONG), the Senator from New York (Mr. GOODELL), and the Senator from California (Mr. MURPHY) are necessarily absent.

If present and voting the Senator from California (Mr. MURPHY) would vote "yea."

The result was announced—yeas 36, nays 50, not voting 14, as follows:

[No. 49 Leg.]

YEAS—36

Allott	Fannin	Mundt
Baker	Goldwater	Packwood
Bellmon	Griffin	Pearson
Bennett	Gurney	Prouty
Boggs	Hansen	Schweiker
Cotton	Hruska	Scott
Curtis	Jackson	Smith
Dirksen	Jordan, Idaho	Stevens
Dodd	Long	Thurmond
Dole	Magnuson	Tower
Dominick	McGee	Williams, Del.
Eastland	Miller	Young, N. Dak.

NAYS—50

Aiken	Fulbright	Mondale
Allen	Gravel	Montoya
Anderson	Harris	Muskie
Bible	Hartke	Nelson
Brooke	Hatfield	Pastore
Burdick	Holland	Pell
Byrd, Va.	Inouye	Percy
Byrd, W. Va.	Javits	Proxmire
Cannon	Jordan, N.C.	Randolph
Case	Kennedy	Saxbe
Church	Mansfield	Spong
Cook	Mathias	Stennis
Cooper	McCarthy	Symington
Cranston	McClellan	Talmadge
Eagleton	McGovern	Yarborough
Ellender	McIntyre	Young, Ohio
Ervin	Metcalf	

NOT VOTING—14

Bayh	Hollings	Russell
Fong	Hughes	Sparkman
Goodell	Moss	Tydings
Gore	Murphy	Williams, N.J.
Hart	Ribicoff	

So the amendment in the nature of a substitute was rejected.

The PRESIDING OFFICER. The question now recurs on the adoption of the resolution.

Mr. FULBRIGHT. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

LEGISLATIVE PROGRAM

Mr. DIRKSEN. Mr. President, while many Senators are in the Chamber, I should like to ask the distinguished majority leader about the program for the remainder of the day.

Mr. MANSFIELD. Mr. President, it is anticipated that following the disposal of the pending resolution, the Senate will proceed to the consideration of H.R. 7206, an act to adjust the salaries of the Vice President of the United States and certain officers of Congress. We intend to do that at this time because we have the distinguished chairman of the Committee on Post Office and Civil Service in the Chamber, and other interested members.

Then we have anticipated that tomorrow we will take up one or two bills, one of which the distinguished Senator from Washington (Mr. MAGNUSON) is interested in, having to do with amending section 502 of the Merchant Marine Act of 1936.

Following that, it is hoped to take up—not necessarily in this order—S. 2416, a bill to authorize appropriations to the Atomic Energy Commission; and S. 1708, a bill to amend title I of the Land and Water Conservation Fund Act of 1965. S. 853, a bill to establish the Sawtooth National Recreational Area in the State of Idaho I understand will be available for consideration next week. Other matters on the calendar will be disposed of during the remainder of this week and early next week.

Mr. MAGNUSON. Mr. President, will the distinguished majority leader yield?

Mr. MANSFIELD. I yield.

Mr. MAGNUSON. On the Executive Calendar is the nomination of Charles H. Meacham, of Alaska, to be Commissioner of Fish and Wildlife, in the Department of the Interior. Is it the intention of the majority leader to take that nomination up?

Mr. MANSFIELD. Yes; I understand that the minority views have been filed and that it will be possible to take up that nomination tomorrow—or on Friday, at the latest.

Mr. MAGNUSON. I ask this because the distinguished Senator from Alaska (Mr. GRAVEL) is now occupying the chair.

Mr. HOLLAND. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. HOLLAND. When is it the intention of the Senator from Montana to take up the Department of Agriculture appropriation bill, which was reported today from the Committee on Appropriations?

Mr. MANSFIELD. As I mentioned to the distinguished Senator from Florida recently, an agreement has been reached with the distinguished Senator from Mississippi (Mr. STENNIS), and as we know, the Senator from Mississippi states that the Defense authorization bill is being marked up and will soon be ready for consideration.

It is my intention to lay it before the Senate on July 3 and make it the pending business on our return from our 1-day vacation over the 4th, or on July 7.

I suggested to the Senator that if he wanted to work in the Agriculture appropriation measure sometime after that, and could work out an arrangement with the distinguished Senator from Mississippi, the chairman of the Armed Services Committee, it would be perfectly agreeable. But as of now, all things going as planned, we will lay the Defense Department authorization bill before the Senate on July 3, make it the pending business, and start debate on July 7.

Mr. HOLLAND. We have discussed the possibility of delaying for 1 day only the bill which will be handled by the distinguished Senator from Mississippi—again in an arrangement worked out with the Senator—with the belief that we can dispose of the Agriculture appropriation bill in 1 day and with the fact clearly in mind that we need to take it to conference. I wonder whether it is possible to work out any such arrangement.

Mr. MANSFIELD. In that respect, I would be at the will of the distinguished Senator from Mississippi, to whom I feel I have already made a commitment. I would appreciate his comments, if he would care to make some at this time.

Mr. STENNIS. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. STENNIS. I have this to say, Mr. President: Of course we could not guarantee that we could get this bill finished. We have been making good headway in the markup and expect to continue work. But this is a large bill, and ABM is just one item in it. In going over the major items, we can see that it will take time. We have finished the hearings, but we are examining the bill very thoroughly.

As an illustration, on a major matter today, we asked the chief of the Air Force to come in for some additional testimony. So we just have that, and we have not taken up the ABM. That was excepted to start with, we will come to that last.

Mr. MANSFIELD. Of course, I would say that the commitment I have made depends upon the bill being marked up and ready to be brought up.

Mr. HOLLAND. We worked pretty hard to get the Agriculture appropriation bill on the calendar. I believe it is the first annual bill on the calendar. I make no request for any preference of any sort, but I want to advise both the majority leader and the Senator from Mississippi (Mr. STENNIS) that progress in conference on that bill will bear very greatly upon the food stamp bill which is to come later, even beyond the construction of that bill, and it bears also on various other matters of legislation which have got to follow. I am eager to have the agriculture bill go to conference at the earliest date possible, not because of any particular interest of my own in these items, and I have mentioned only one, but because I think it is necessary to get this matter underway in conference as speedily as we may. I am sure that the distinguished Senator from Louisiana (Mr. ELLENDER), the chairman, will agree with me that it is important to get this particular appropriation bill in conference at the earliest possible date.

Mr. MANSFIELD. I assure the distinguished Senator that the leadership will do its very best.

I now yield to the Senator from Missouri (Mr. SYMINGTON).

Mr. SYMINGTON. Mr. President, with respect to this Defense authorization bill, I would hope, because of its complexity, that we do not rush consideration on the floor. A tremendous amount of money is involved.

I have listened to the discussion of it in the Committee on Armed Services and in the Committee on Appropriations, and I think I know as much as my limited capacity can absorb about it in the time space in question. But there are still some aspects of the bill I do not fully understand.

If that is true of a member of the committee, it could be at least as true about Members of the Senate who are not on these committees and who are most interested in this bill this year for many reasons.

I would respectfully present that bills which have to do with authorization or appropriation are often considered as to be started in the House of Representatives. Now I do not say for one minute that the House should tell the Senate what to do. But there does not seem to

be any reason for any great hurry, because the House has not even started authorization hearings on either the Army or Navy.

I would hope that when we come to floor discussion this year, with all this accelerated interest because of the ABM discussion and the increasingly dangerous drains on our economy, that every Senator when he sees the gigantic sums coming up in the bill, will have an opportunity to really study it before he casts his vote on what could be the most important piece of legislation considered during this session of Congress.

Mr. MANSFIELD. I can assure the Senator and the Senate that the Defense authorization bill is not going to be considered in just a week or two. It is going to take a long time. We might as well face up to it. I would hope that Senators would follow the admonition of the Senator from Missouri and read with great care and in great detail the hearings which will be on their desks at that time.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. FULBRIGHT. I wish to associate myself with what the Senator from Missouri has said. There ought to be a reasonable period between the time when the bill is reported and the time when it is taken up, so that we may have a chance to read it.

Mr. MANSFIELD. Mr. President, a reasonable time has been set. A commitment has been made. As far as I am concerned, that commitment will be honored. There will be plenty of time to listen to and participate in the debate when the bill is before us. I simply have made an effort to accommodate every Senator in good faith.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. HOLLAND. Mr. President, I have no objection to anything the Senator from Montana has said or to anything the Senator from Missouri or the Senator from Mississippi had said. It seems to me we all know there is going to be a lengthy debate on the military construction bill. It is for that reason that I have discussed with the Senator from Mississippi and the majority leader the process of working in the Agriculture appropriation bill during the general time of debate on that bill, which I hope very much can be done, because there are critical matters that need to go to conference that, I am sure, all Senators know are contained in the Agriculture appropriation bill this year.

I hope the distinguished Senator from Mississippi will agree to allow, early in the week after our return from the July 4 weekend, a day, and I am perfectly willing to come in at the earliest hour that is acceptable and to stay here as long as is acceptable that night, in an effort to get the bill passed that day, which I believe can be done.

Some serious matters will be discussed in connection with the bill.

I see the distinguished Senator from Delaware (Mr. WILLIAMS) on his feet now. I am sure he will have at least one very serious matter in connection with that bill. I do not want in any way to preclude him from being heard to the extent he wants to be heard, and that is true of other Senators. However, I do think, in the interest of the Senate, and agricultural people all over the Nation, and many others who are affected by the food stamp and other provisions of the bill, we should do everything possible to get it to conference at an early date. That is the reason why I brought it up.

I am glad the minority leader is on the floor, because I hope that he, too, will help us to work out an early date by which we can get the bill considered, passed, and to conference.

NATIONAL COMMITMENTS

The Senate resumed the consideration of the resolution (S. Res. 85) expressing the sense of the Senate relative to commitments to foreign powers.

The PRESIDING OFFICER. The question is on agreeing to the resolution. On this question the yeas and nays have been ordered——

Mr. HOLLAND. Mr. President, I want to be heard.

The PRESIDING OFFICER. The Senator from Florida.

Mr. HOLLAND. Mr. President, I intend to vote, and vote gladly for the resolution in the form which it now has.

I had a very lengthy colloquy some days ago with the distinguished Senator from Arkansas and the distinguished Senator from Idaho on the resolution. I note that the Senator from Kentucky, who was present during that colloquy, whether because of that colloquy or because of his own feelings in the matter, has suggested amendments which have been accepted by the Senator from Arkansas and which are now a part of the amended resolution.

I just want to say that there is no question of creating any adverse effect against executive agreements in general as a result of this resolution. That is obviated because the amended resolution now deals with two specific subjects, and only with them, one of which is national security and the other of which is the obligation to pay money from our assets to other nations.

I think that the resolution, as so limited, relates to two matters which are very clearly of national importance and should clearly be defined as to national commitments.

I think the resolution, as reworded, does prevent the meaning of the term "national commitment," as it is used in the resolution, from being obscured; but, instead, makes it rather clear that "national commitment" as now mentioned in the amended resolution relates only to two things, and that is, first, the use of our Armed Forces or any commitment to use them, and, second, the payment out of our moneys to other nations. When so limited, I think the resolution will be helpful both to the Senate and to the executive, and will not be hurtful to friendly nations that have agreements of some sort or another with us.

I have questioned the Senator from Arkansas, and I think I understand that he is trying to create here a resolution which shall govern us, the executive, and other nations in the world as to our foreign relations in the future. I hope that he means—and it is my understanding that he means—that relations now existing that are known to us are not affected in any way, and that if there are any not known to us now and that do become known to us, we should allow them to stand, and they will stand, on their own merits as they are brought to us from time to time.

In the form it now is, I think it is an excellent resolution. I shall vote for it.

I congratulate the Senator from Arkansas both upon his authorship and upon his being willing to accept what I think are excellent limitations as contained in the amendments of the Senator from Kentucky, as they have been submitted and as they are now incorporated in that resolution.

Mr. FULBRIGHT. I thank the Senator from Florida.

Mr. STENNIS. Mr. President, I wholeheartedly support Senate Resolution 85, which deals with our national commitments. The primary purpose of this resolution is to reassert the congressional responsibility in any decision to commit our Armed Forces to hostilities abroad. I believe that this purpose is both sound and salutory. It certainly is in harmony with the intent of the framers of our Constitution.

I feel very strongly that the resolution, if adopted, will be the first step whereby Congress, and especially the Senate, can reestablish its coequal role in foreign relations. The resolution asks only that the legislative branch be consulted during the decisionmaking process with respect to national commitments. It is not enough that we be informed on an after-the-fact basis and then handed the responsibility to provide the men, money, and material resources to fulfill commitments already made by the executive branch. The adoption of the resolution, in my judgment, will contribute substantially to the restoration of the constitutional balance between the executive and legislative departments.

I have long been concerned by the extent and nature of our worldwide commitments and our ability to respond to them. There are 40 countries with which we have formal agreements committing us to assist them militarily in the event of aggression. I do not favor, of course, turning our back on any of our existing commitments and, as I understand the resolution, it will have no effect on existing treaties, acts of Congress, including joint resolutions, or other past actions or commitments of the Government of the United States.

I have been concerned with this problem and with the question of whether we are overextended for quite some time. In 1954 I opposed the sending of our first troops to South Vietnam. I have opposed some of the treaties by which we assumed military commitments and obligations. I warned against our potential involvement in the Congo situation and also opposed the sending of troops to the Middle East during the war in 1967.

I also strongly supported the proposal by former Senator John Bricker, of Ohio,

to amend the Constitution with respect to the treatymaking power. In testifying before a subcommittee of the Judiciary Committee in 1952, Senator Bricker stated that the primary purpose of his amendment was "to prohibit the use of the treaty as an instrument of domestic legislation, and to prevent its use as a vehicle for surrendering national sovereignty."

Specifically, the Bricker amendment provided that a provision of a treaty which conflicted with the Constitution should not be of any force and effect: that a treaty should become effective as internal law only through legislation which would be valid in the absence of a treaty; that Congress should have the power to regulate all Executive and other agreements with any foreign nation or international organization; and that all such agreements should be subject to the same limitations as imposed on treaties.

Unfortunately, on February 26, 1954, the Bricker amendment failed to win support of the necessary two-thirds of the Senate and therefore failed of passage.

My concern about the extent of our commitments resulted in the Preparedness Investigating Subcommittee, which I have the privilege to chair, holding extensive hearings on our worldwide military commitments in 1966 and 1967. These are the hearings in which then Secretary of State Dean Rusk made the now-famous statement that—

> No would-be aggressor should suppose that the absence of a defense treaty, congressional declaration, or U.S. military presence grants immunity to aggression.

Although Secretary Rusk disclaimed that this was its purpose or meaning, this statement comes perilously close to casting us in the role of policeman of the world—a role which we have neither the manpower nor the materiel resources to fulfill.

If you look back over the years to the Korean war, the intervention in Lebanon, the two crises over Cuba, the Dominican intervention, and the war in Southeast Asia, the importance of this resolution becomes clear. While it would not be legally binding upon the President and could not, of course, change his constitutional powers, it would at least be an assertion by the legislative branch of the Government that we do not intend in the future to be unmindful of our constitutional powers and responsibilities.

Basically, what this resolution attempts to do, as I understand it, is to make it plain that Congress, particularly the Senate, will insist that it is given the opportunity to express itself on the validity of foreign commitments before they are extended and especially before any of them are implemented by the commitment of American troops on foreign soil. This is a wise and proper objective, and I hope that this resolution will be adopted by an overwhelming vote.

Mr. PASTORE. Mr. President, if the Senator from Florida had not risen to say what he did say about this resolution, I would have said the very same thing.

When I first read and studied the resolution, I had some doubts and qualms about it, because I did not want to participate in anything that would have been offensive to the administration. I therefore had my doubts, which I expressed before the policy committee. At that time we discussed the proposed amendment on behalf of the Senator from Kentucky (Mr. COOPER), which I think clarifies the definition.

As I see it now, with the incorporation of the Cooper amendment, there is no question in my mind that it is not offensive to the administration. It is nothing more than an attempt to create a sense of partnership between the legislative and executive in certain matters which are very important not only to the legislative process but also to the commitment of American troops.

I see nothing wrong with it. Therefore, I shall vote for it.

Mr. McGEE. Mr. President, Senate consideration of Senate Resolution 85 has been dragging on since last Thursday. It would seem that by now the mood of the Senate is rather clear. Much as I disagree with the resolution, I recognize that in all probability it will be adopted.

Nevertheless, I want the record to show that I consider this to be a regressive and unrealistic step. It is regressive in the sense that it would call into question the legitimacy of the President's role in the formulation and implementation of foreign policy, a development that unquestionably is a necessary response to the demands of the modern age. It is unrealistic in that it fails to provide for placing the responsibility the President now holds into hands equally decisive and determined.

One reason that Senate Resolution 85 has gotten so much attention is that under the pressure of events, the Senate has allowed its sphere of authority and responsibility in foreign affairs to be eroded. In a recent article in the Christian Science Monitor, Roscoe Drummond underscored this point:

> First, it needs to be understood that Congress has not lost powers because anybody has taken anything from it, but because Congress has failed to exercise the powers it possesses.

The question to ask is how the Senate can cut out a new role for itself. Mr. Drummond went on to suggest one possibility; that Congress might bring into being a counterpart to the National Security Council, perhaps in the form of a joint congressional committee.

In any event, if the Senate is to succeed in achieving this new role, it, too, must update its procedures in the foreign relations field as well as upgrade its sense of responsibility by focusing more and more on larger and larger questions. The Senate could afford to address itself well in advance of crises to the broad outlines and directions of American policy. This becomes far more constructive as well as influential than in responding principally to crisis situations after the fact.

The Senate's role in foreign policy of the future can best be achieved by deeds rather than by words—at least of all by the sense-of-the-Senate resolution.

The role of the Senate Foreign Relations Committee in the policy process is whatever it decides it to be. Thus, the committee can hide behind the shelter of a resolution, or it can stand on its deeds.

In fact, it would seem to be more important that the committee and the Senate involve itself with the decision elements implicit in an ABM system as the current International Organization and Disarmament Affairs Subcommittee has been undertaking—the Gore group—or the question of policy toward mainland China; or to reexamine our foreign policy assumptions and commitments in many of the critical areas of the world, as the Subcommittee for U.S. Security Agreements and Commitments Abroad—Symington group—is now doing.

In the final analysis, then, the Senate through the Foreign Relations Committee should preserve its role in national policymaking by deeds and actions rather than by lamenting its role in a sense-of-the-Senate resolution.

My sentiments on Senate Resolution 85 are clear. I would have voted against it had it come to a vote today.

In view of the excellence of Mr. Drummond's article alluded to earlier, I ask unanimous consent that it be printed in the CONGRESSIONAL RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, June 24, 1969]

HOW CONGRESS CAN RECLAIM ITS POWER

(By Roscoe Drummond)

WASHINGTON.—Congress is always fretting about its loss of power and initiative to the President and the Supreme Court.

It should. Something needs to be done and can be done. The time is ripe for Congress to repair the balance.

But, first, it needs to be understood that Congress has not lost powers because anybody has taken anything from it, but because Congress has failed to exercise powers it possesses.

Every activist president from Franklin Roosevelt to Lyndon Johnson has enlarged the role of the executive by using more decisively the powers the Constitution gives him—a process enhanced by the focus which radio and television give to the White House.

Congress has lagged behind.

In two landmark decisions—public desegregation and the one man, one vote ruling providing for reapportionment of state legislatures—the Supreme Court has done more to change the face of the nation than anything Congress had done in two decades.

It was always open to Congress to act in these two areas. It failed to do so.

What can be done? What should be done?

One thing is sure: what Congress is presently trying to do won't work. It is trying to increase its powers by attempting to decrease the president's.

This was the stated objective of the original draft of the Fulbright resolution which prescribed that the president as commander in chief must not use the armed forces outside the United States without prior approval by the Senate. That would have meant that President Kennedy couldn't have acted, as he did successfully to get the Soviet missiles out of Cuba. That would have meant that President Eisenhower could not have acted promptly in sending United States troops to Lebanon. That would mean that no president could act quickly, as needs require in this uncertain and turbulent world.

But the resolution has been so watered

down that it is nearly meaningless, except that it cannot fail to plant doubts in the minds of America's allies and adversaries that the president is losing his freedom of initiative. He isn't, in reality, because no resolution by Congress can amend the president's constitutional powers.

They are broad and, in my judgment, have been used prudently. I know of no foreign policy or foreign military commitment which has not had Senate approval. SEATO (the Southeast Asia Treaty Organization) was overwhelmingly ratified by the Senate. Every military action which President Johnson took in Vietnam had explicit authorization in the Tonkin resolution, also overwhelmingly approved.

There are valid reasons why Congress should recover the powers and initiative which it has lost through neglect. It can do this by effectively using the great powers it possesses—the power of the purse, the power of scrutiny and review, the power of congressional advocacy.

But it can do this only when it is willing to organize and equip itself with the means to do the job.

For years the initiative has always been with the president in part because he has in his hands the means to achieve a coordinated global view of foreign policy, military policy, and domestic policy. The instrument is the National Security Council.

Congress urgently needs the same kind of instrument so it can look at the whole of United States policy, not merely at its separate parts. What is needed is a joint congressional committee on national security to match the work of the National Security Council.

At the present time, at least six different committees in each House—12 in all—examine the bits and pieces of foreign, political, and military commitments and defense spending, and no single committee of Congress ever looks at the whole.

No wonder Congress falters in its job.

No wonder Congress accomplishes so little in supervising and controlling defense spending despite the fact that its powers are great. It deals separately with symptoms, not with causes.

When Congress matches the National Security Council with a joint congressional security committee, it will galvanically recover powers it has long allowed to erode.

Now is the time. It's needed.

Mr. TYDINGS. Mr. President, in the course of the last half century, America has become the foremost power in the world. We have taken a truly global interest in foreign affairs, not only to protect our own interests abroad but also to protect the interests of free men everywhere. The executive branch has rightfully been accorded primary responsibility for formulating our foreign policy.

In order to support our foreign policy, we have relied on our tremendous military might. The consequences of military commitment, however, go far beyond world politics. The ultimate responsibility for deciding when our troops should be committed or deployed in support of our foreign policy belongs to Congress.

But as we have become a world power, the Executive has usurped the role of Congress. All modern Presidents have attributed to themselves the power to employ our troops in foreign hostilities. Too often Congress, as a body, has not even been consulted; and when it has, Congress has succumbed to an emotional need for a momentary expression of national unity. In the recent case of the Tonkin Gulf resolution, it has done so while acting under erroneous or insufficient information. It is time that the resulting imbalance between executive and congressional power was corrected.

The most obvious reason for correcting this imbalance is that it is contrary to the Constitution. When committing our troops to foreign hostilities without specific congressional approval, the Executive ignores the constitutional provisions which give to Congress the exclusive power to declare war and which requires the President to get the advice and consent of the Senate before entering into foreign commitments. Senator CHURCH, in a recent, excellent address, outlined some of the possible consequences of this executive illegality. If, as some have suggested, the "declaration of war" or "advice and consent" provisions of the Constitution are outmoded, they should be amended by the appropriate procedures. Only after thorough debate in the National and State legislatures can we be sure that a change in the basic document of our political system is warranted. Respect for the law of the land requires that extra-legal mechanisms for effecting change be avoided, even if the reasons for that change are sound.

But I do not believe that the reasons are sound. For one thing, excessive executive independence in making military commitments can have harmful effects on our foreign policy. Our present policy of unilateral military peacekeeping has too often been blindly employed to enforce the status quo—to support governments whose domestic policies are repugnant to the ideals of personal freedom and individual dignity which we in America treasure so highly.

An example is our implied readiness to support the regime of the Spanish dictator Franco, upgraded to the status of a de facto commitment by a military memorandum and recent counterinsurgency exercises. Although the administration has disavowed the existence of any formal commitment, its de facto status remains unchanged.

Another example is our failure to cut off military aid from the Greek military junta. Even though Greece is without the most basic of civil liberties, we have continued to supply this repressive regime with weapons and ammunition.

Thus, the absence of legislative scrutiny of our national commitments has led to accepting the inevitability of military support for unwise foreign policies. Only if we in Congress assert our constitutional right to control national commitments can this unfortunate trend be reversed.

I believe, however, that there is an even more fundamental reason for reasserting Congress' foreign policy power. By abdicating our right to control military commitments we are seriously undermining Congress' role in setting national priorities. If the Executive can independently decide when to deploy America's Armed Forces, it essentially has the final say in determining how a large proportion of our resources will be expended. But resource allocation is Congress' most important function—indeed, it is a decision which Congress must control if the constitutional checks and balances system is to have any meaning at all. Without this power, Congress would be nothing more than an ornament, whose only purpose would be to give automatic approval to the decisions of an all powerful Executive.

Our Founding Fathers hoped to spare America from such a catastrophe by implanting in our political system the doctrine of separation of powers, and, in particular, by reserving to Congress the power to make war and to approve foreign commitments.

Thomas Jefferson explained that our Constitution transferred the war power "from the Executive to the legislative body, from those who are to spend to those who are to pay." In other words, the legislature was to determine whether, from their standpoint, a proposed war would be worth the costs.

In fact, costs of war have become far greater than they were when Jefferson wrote. Today we are spending $30 billion a year in Vietnam; the total cost of the war to date has been over a hundred billion, far in excess of all previous foreign wars with the exception of World War II.

The noneconomic costs of military intervention have become even more alarming. Only three decades ago conscription was unknown without a formal declaration of war; the President, when engaged in "nonwar" military involvement, was prohibited from drawing on our vast manpower resources. When he had to go to Congress to ask for a draft, the legislature had an opportunity to evaluate the worth of large-scale military intervention. But ever since 1948, our Presidents have had a conscription system continuously at their disposal. The consequence in Vietnam has been the easy and "politically painless" deployment of a total of more than a million of our young men to battle, with a loss of over 36,000 of their lives and the wounding of hundreds of thousands more. The total number of reported casualties is more than any previous foreign war with the exception of World War II.

But even as the costs of military involvement have increased, we have also developed a greater awareness of other areas of need which we feel have a claim for priority consideration. Today there are an ever-increasing number of desperate domestic needs; but what we sometimes forget is that the resources available to meet these needs are not unlimited. Our involvement in Vietnam, for instance, has led not only to tremendous cost in men and treasure, but it has also forced us to forego alternative uses of these resources—training our manpower for peacetime activities instead of war, and spending our budget on programs to build lives instead of weapons to destroy them. But as our involvement in Vietnam grew, we were told that we could afford both "guns and butter"; in other words, the choice of how our resources were to be allocated was obscured.

It might be suggested that Congress has the opportunity to make the resource-allocation choice when it passes on defense appropriations. It is true that, in many areas, national priorities are established through the appropriations

process. But once our military might has been committed to action, we cannot undercut our fighting men. The issue on a single defense appropriation bill becomes couched in terms of whether we can afford to give our boys less than maximum protection. Congress never has the opportunity to decide if we can afford to have them risking their lives at all—in other words, whether our priorities permit allocating a significant portion of our manpower and economic resources to certain military objectives. The only way to have Congress make that decision is to restore to it the power to approve or disapprove our foreign military commitments.

A military commitment is the most significant economic resource allocation decision which our Nation faces. The Government, through its budget, currently controls a full 20 percent of our national economic resources: almost $200 billion. We now allocate over two-fifths of that amount to national defense; and almost one-sixth to the Vietnam war. The amount spent in Vietnam is more than what we spend on all domestic education and other major social programs combined.

We argue long and hard over how our resources should be spent domestically, and every increase in domestic spending is meticulously examined before Congress gives its approval. And when inflationary dangers force us to decrease Federal spending, it is these programs that are always cut. But the amount we spend in Vietnam is actually scheduled to increase by 10 percent during the coming year.

Thus, without meaningful congressional approval, we have assigned the highest of national priorities to the defense of President Thieu's government in South Vietnam. And the Executive has made a decision at Midway that the preservation of a corrupt and totalitarian government is worth thousands more American lives and billions more of our taxes.

Such a decision should be made openly—in the free debate of our Legislature, not in the backrooms of the Pentagon, CIA, State Department, or even the White House. Only by making an open decision to commit our troops to military action can we be sure that the decision is a deliberate one. It is a decision which should be made in line with our democratic principles, with the interests of all our people represented.

The perspective of the President is that of a single individual, and the advice of his officials is given from the competent but narrow viewpoint of a professional, frequently with a parochial self-interest. Only Congress is responsive to the widely divergent interests of the electorate, and only a decision by Congress can come close to reflecting all the interests of our citizenry.

Perhaps most important, it is a decision which must be made with cognizance of all the other competing claims on our resources. This is the most essential requisite of an optimum determination of our priorities. Congress has long ago ceased to be the primary initiator of new Government programs, having sacrificed that role to the Executive. But the Executive is only one of the advocates who come before Congress to plead their case; other interests in the private sector also present their claims to us. Only Congress has the responsibility to adjust these competing claims in the form of enacted law.

Thus, setting national priorities is Congress' primary role, and one for which it is best suited. By passing Senate Resolution 85 we can begin to reassert our role in determining what priority should be given to the most significant of commitments—the commitment to use military force.

Some have said that in making that decision democratically—by our elected Legislature—valuable time will be lost. But Congress can act quickly and deliberately when necessary. The possible loss of a few hours is well worth the security of knowing that the decision to deploy our troops has been made after careful consideration of the consequences.

Senate Resolution 85 is a proper mechanism for correcting the executive overreaching of the past. One of my colleagues, arguing in opposition to the resolution, has said that henceforth military commitments not cleared with Congress would risk being "clouded with the aura of illegitimacy." But this should not be an objection to the resolution—rather, it reflects the facts is an argument in its favor. A major military involvement is illegitimate, I believe, without congressional approval. Perhaps a source of the discontent with Vietnam is the absence of meaningful congressional legitimization of our involvement there.

Thus, not only does respect for the Constitution demand adherence to the principles expressed in this resolution, but our whole system of government—and the function of Congress as a representative of our people and a resource-allocating institution—requires it. I urge the passage of Senate Resolution 85 as the first step in reasserting Congress' power to control military commitments.

Mr. TOWER. Mr. President, I have followed the debate of the past few days with considerable interest and have observed than many valuable arguments have been presented on both sides. Senate Resolution 85, for all of its brevity, raises numerous vast and complicated issues reaching far back into American history and forward into the future of this country and the world. I will comment briefly on the considerations that seem to me most pertinent.

Senate Resolution 85 purports to clarify the meaning of the term "national commitment." Having read the resolution, however, I do not feel that the term is less obscure. Is this a particular type of "national commitment" that is defined, or is this the only type? The resolution does go on to say that it is a "national commitment by the United States to a foreign power" that is concerned, and that is some help. Moreover, we have received boundless assurances from the supporters of Senate Resolution 85 that what is referred to therein is a "substantial" commitment, and, further, that the proponents of this measure have no difficulty with executive agreements arising in pursuance of existing treaties which have been duly ratified by the Senate. But, in point of fact, the resolution makes no effort to discriminate between what is substantial and what is not. Nor is it clear what sort of connection between a treaty which the Senate had acted upon and an executive agreement pursuant to that treaty is acceptable and what sort is not, although a wide range of possibilities is conceivable. Far from clarifying the definition of the term "national commitment," Senate Resolution 85 seems only to leave the question in a greater state of confusion than it was beforehand.

The amendment offered by the Senator from South Dakota goes a long way toward relieving the uncertainties posed by Senate Resolution 85. It specifies that what we are concerned with is a military commitment. While this is perhaps less ambitious, it is also infinitely more successful in conveying a precise meaning. It does not raise the questions of what is "substantial" or which executive agreements are in pursuance of treaties but only of what is military action "to repel an attack on the United States, or to meet a direct and immediate threat to the national security or to protect U.S. citizens and property."

It has been argued again and again by the opponents of Senate Resolution 85 during the course of this debate that it is essential for the President to have wide flexibility in the field of foreign relations in order to respond swiftly and appropriately to the mercurial exigencies of international diplomacy in this nuclear age. I for one do not think this is unreasonable. Nor do I feel that the current balance of power between the executive and legislative branches threatens to "impose tyranny or disaster on the country" as the committee report suggests. The President wields vast authority in the realm of foreign affairs, but, far from becoming a tyrant, he is ever and always answerable to the people and the Congress. The committee report assumes that a national commitment that might involve the deployment of American troops can be brought to the floor of the Congress, debated, and passed, all in sufficient time to act before the time for acting has flown. Once this may have been true, but the speed of transportation and communication and the devastating extent of the force that can be delivered instantaneously deprives us of the luxury of such a leisurely procedure. If the President were to take it upon himself to act wildly beyond the bounds of prudence, he would find himself subject to checks by the Congress. On the other hand, if the President were to bring an urgent and reasonable request before the Congress, it would be granted—but, perhaps, too late. It becomes a question of whether we trust our duly elected President to execute his office faithfully or whether we trust our enemies to extend us the courtesy of withholding any precipitate action until we have decided what our response will be.

The amendment offered by Senator MUNDT recognizes the unfortunate fact that we cannot anticipate every possible threat that would constitute an immediate danger to our national security and, therefore, leaves the President free to

act to counter such a threat without qualifications.

In his study, "The American Presidency," Clinton Rossiter observed:

In a country over which industrialism has swept in great waves, in a world where active diplomacy is the minimum price of survival, it is not alone power but a vacuum of power that men must fear.

I can think of no one who has been more reluctant than I to pass far-reaching authority into the hands of the Executive. But, faced as we are in the world with powerful enemies who are capable of acting swiftly and without consultation or debate, we must remain constantly prepared to meet with equal celerity any threat to our national security. We cannot predict with real accuracy what form such a threat might take. Can we therefore prescribe, as Senate Resolution 85 seeks to do, the means by which such a threat should be answered? I do not believe we can.

I am not overly sanguine as regards the immense power of the President. We should not look with perfect equanimity on the vast authority of the Presidency. We should be careful about giving the President additional powers, alert to abuses of those he already holds, and aware that the present balance of the Constitution is not a cause for unlimited self-congratulation. But we can look on it, at least, with as much equanimity as we do upon the present state of the Union. For the strengthen of the Presidency is a measure of the strength of the America in which we now live and of her place in the world.

The PRESIDING OFFICER. The question is on the adoption of Senate Resolution 85, as modified. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. KENNEDY. I announce that the the Senator from Indiana (Mr. BAYH), the Senator from Tennessee (Mr. GORE), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Iowa (Mr. HUGHES), the Senator from Utah (Mr. MOSS), the Senator from Connecticut (Mr. RIBICOFF), the Senator from Georgia (Mr. RUSSELL), the Senator from Alabama (Mr. SPARKMAN), the Senator from Maryland (Mr. TYDINGS), and the Senator from New Jersey (Mr. WILLIAMS), are necessarily absent.

I also announce that the Senator from Michigan (Mr. HART) is absent on official business.

I further announce that, if present and voting, the Senator from Tennessee (Mr. GORE), the Senator from Michigan (Mr. HART), the Senator from Iowa (Mr. HUGHES), the Senator from Connecticut (Mr. RIBICOFF), the Senator from Georgia (Mr. RUSSELL), and the Senator from Alabama (Mr. SPARKMAN), would each vote "Yea."

Mr. SCOTT. I announce that the Senator from Hawaii (Mr. FONG), the Senator from New York (Mr. GOODELL), and the Senator from California (Mr. MURPHY) are necessarily absent.

If present and voting, the Senator from California (Mr. MURPHY) would vote "nay."

The result was announced—yeas 70, nays 16, not voting 14, as follows:

[No. 50 Ex.]

YEAS—70

Goodell	Moss	Tydings
Gore	Murphy	Williams, N.J.
Hart	Ribicoff	

So the resolution (S. Res. 85), as modified, was agreed to, as follows:

Resolved, That (1) a national commitment for the purpose of this resolution means the use of the armed forces of the United States on foreign territory, or a promise to assist a foreign country, government, or people by the use of the armed forces or financial resources of the United States, either immediately or upon the happening of certain events, and (2) it is the sense of the Senate that a national commitment by the United States results only from affirmative action taken by the executive and legislative branches of the United States Government by means of a treaty, statute, or concurrent resolution of both Houses of Congress specifically providing for such commitment.

The preamble was agreed to, as follows:

Whereas accurate definition of the term "national commitment" in recent years has become obscured: Now, therefore, be it

Mr. FULBRIGHT. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. MANSFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MANSFIELD. Mr. President, it has been some time since the Senate has witnessed a debate of such outstanding caliber, on an issue of such transcendent importance. The thoughtful and provocative discussion generated by the issue presented with the resolution on national commitments has added immeasurably to the purpose and effect of the resolution.

Simply stated, the Senate has acted to reassert its historical and constitutional role. The overwhelming approval of the resolution has greatly strengthened the partnership that exists between the executive and legislative branches. The Senate has spoken clearly and unequivocably in this regard and I think every Senator may take great pride in this achievement.

I wish to thank especially the Senator from Arkansas, the able and distinguished chairman of the Committee on Foreign Relations. His leadership on this resolution was truly exemplary. I understand that he and the distinguished Senator from Georgia (Mr. RUSSELL), who himself is unexcelled in his special expertise in this area, conferred about the question of the commitments of this Nation some time ago. Thereafter, Senator FULBRIGHT and his committee conducted an exhaustive review of the historical and constitutional role of the Senate with respect to the foreign military and financial obligations of this Nation. This effort culminated in the Senate's commitment to reassert its role. And this fact was overwhelmingly expressed today.

So to Senator FULBRIGHT, to Senator AIKEN, the ranking minority member of the committee whose efforts, as always, were absolutely indispensable and to Senator RUSSELL, and to the members of the Committee on Foreign Relations, the Senate is deeply indebted.

The able and distinguished Senator from Kentucky (Mr. COOPER) should similarly be singled out for his contribution. What has been achieved with this, the Fulbright-Cooper resolution on national commitments, was accomplished in large measure because of the efforts of Senator COOPER. His participation, his fine appreciation of the issue was essential to this success.

Other Senators, too, played vital roles in obtaining such outstanding success. The Senator from Tennessee (Mr. GORE), the Senator from Idaho (Mr. CHURCH), and the Senator from Missouri (Mr. SYMINGTON) added their immense wisdom to the discussion. The Senator from Wyoming (Mr. MCGEE) must also be thanked for articulating with such typical skill and great advocacy his own strong views on the matter.

For their part, the Senate also is deeply grateful for the diligent and extremely capable efforts of the minority leader, the distinguished Senator from Illinois (Mr. DIRKSEN), and for those of the distinguished Senator from South Dakota (Mr. MUNDT) and the distinguished Senator from Connecticut (Mr. DODD). Their support of an alternative proposal contributed, I think, a good deal to the high level discussion obtained.

Once again, to Senator FULBRIGHT, to Senator COOPER, to Senator AIKEN, and to all the members of the Foreign Relations Committee go our deepest thanks. Indeed, every Senator may be justly proud of such an outstanding achievement.

Mr. COOPER. Mr. President, my substitute resolution is not intended to reflect upon any past President and I am certain that President Nixon from his experience and devotion to both the executive and legislative branches understands fully their separate and joint powers and responsibilities.

Mr. President, I would like to read into the RECORD two comments, one by the late Senator Robert Taft and one by President Taft which are appropriate to

a consideration of the scope and purposes of the resolution before us today.

In commenting on the powers of the President as Commander in Chief, the late Senator Robert Taft made this observation in his book "A Foreign Policy for Americans":

> There is one very definite limit—and I think it is admitted by every responsible authority who has discussed the problem—on the President's power to send troops abroad: he cannot send troops abroad if the sending of such troops amounts to the making of war. I think that has been frequently asserted; and whenever any broad statements have been made as to the President's power as Commander-in-Chief to send troops anywhere in the world the point has been made that it is always subject to that particular condition.

President Taft in a series of lectures entitled "The Chief Magistrate and His Powers" comments how a series of events could involve our country in a war without the determination of the Congress that the sending of the Armed Forces was necessary and in our country's best interest. He states:

> The President is the Commander-in-Chief of the army and navy, and the militia when called into the service of the United States. Under this, he can order the army and navy anywhere he will, if the appropriations furnish the means of transportation. Of course, the instrumentality which this power furnishes, gives the President an opportunity to do things which involve consequences that it would be quite beyond his power under the Constitution directly to effect. Under the Constitution, only Congress has the power to declare war, but with the army and the navy, the President can take action such as to involve the country in war and to leave Congress no option but to declare it or to recognize its existence.

Mr. President, in concluding my remarks, I wish to express my thanks to the distinguished chairman of the committee (Mr. FULBRIGHT) for the opportunity to work with him on the resolution. I also express my thanks to Mr. William Haley, my legislative counsel who has worked assiduously on the resolution and the difficult problems concerning the powers of the executive and legislative branches.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Bartlett, one of its reading clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 8644) to make permanent the existing temporary suspension of duty on crude chicory roots; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MILLS, Mr. BOGGS, Mr. WATTS, Mr. BYRNES of Wisconsin, and Mr. UTT were appointed managers on the part of the House at the conference.

RECENT DEVELOPMENTS IN THE ENFORCEMENT OF CIVIL RIGHTS LAWS

Mr. JAVITS. Mr. President, I have received disturbing reports that the administration plans to make major changes in the school desegregation program. These reports are of serious concern to me, and to others who have worked for equal education opportunity legislation over the last 12 years. If these reports are true, the Department of Health, Education, and Welfare plans to reduce greatly the incentive for school systems still segregated to comply with the law. More than 800 school districts—out of 20,000 in the Nation—are now working under plans which call for complete compliance by September 1969. Failure to comply will result in the loss of Federal aid to the district. This hardly seems a severe penalty in view of the fact that the Supreme Court ordered desegregation 15 years ago, and Congress passed title VI of the Civil Rights Act of 1964, 5 years ago, but certainly all incentive to comply will be destroyed if deadlines are adjusted or abolished.

Such a change would be a tragic step backward and a serious breach of faith with a large part of our population. While the black communities in these school districts are the primary beneficiaries of Federal enforcement of the law, the moderate white community looks to Washington, too. Frankly, unless school officials can demonstrate that failure to comply will result in the loss of Federal funds, the chances are that moderate local school officials may be forced to capitulate to the hard-core segregationist element in each community.

The Department's obligation, therefore, is twofold: to enforce the law and to provide backing for men of good will in those communities faced with the problem. A pullback of effort here in Washington will have an electric and deleterious effect throughout the country, for not only will our own efforts be slowed, but these of leaders in each community as well.

While I have waited long before saying this, I believe it is now time to express my profound concern with recent actions of Federal Government departments in the area of civil rights and ask, with all the urgency at my command, that these policies be reviewed and changed. Here are some major considerations:

First. In the early days after the inauguration, I had considerable correspondence with the Department of Defense about the proposed awarding of contracts to certain textile firms which had a policy of segregation in hiring. This correspondence was carried on in the hope that the facts would convince the appropriate officials. Nevertheless, the contracts were awarded without first securing compliance with the law from the firms. I was disappointed, but I was assured that compliance would be forthcoming. But the very real incentive for complying, of course, was removed as soon as the contract was awarded. These matters are still in the works, as I understand it, but unresolved.

Second. A bipartisan group of Senators recently urged the President to send a Federal mediator to Charleston, S.C., to assist in the settlement of the hospital workers strike in that city. The President's decision on this request, of course, does not involve civil rights, but HEW's decision in the case most certainly does. The strike was begun after 12 employees of the hospital were fired—allegedly because they had left their duty stations in order to present demands to hospital administrators. The Office of Civil Rights Enforcement of the Department of Health, Education, and Welfare found that the dismissals were because of race and ordered that the 12 be reinstated or the hospital would face the loss of a large Federal VA contract. Agreement was tentatively reached, which not only provided for the reinstatement of the 12 but substantial wage increases as well. This agreement has now been repudiated by the hospital administrators, or other officials in South Carolina, and it is rumored that HEW will not enforce the threatened cutoff. What is going on here? Is there, or is there not, racial discrimination in this case? Does the law not provide for cutoffs in such circumstances? Why the sudden shift of policy—and what does it mean for the future of hospital desegregation?

Third. Hundreds of thousands of heretofore disenfranchised Negroes have been registered to vote in the South under the Voting Rights Act of 1965 which provides for Federal registrars in areas where voter discrimination has taken place. That law expires next year and it seems evident that any law which is so badly needed and is working so well should be extended. And yet there are concerns that the administration may not support the extension of the law. The Attorney General has postponed five times his appearance before the House Judiciary Committee on this subject—which at least gives me hope that a final decision has not yet been reached. Federal registrars and Federal poll watchers are absolutely essential if the advances of the past 4 years in securing voting rights are not to be destroyed. I urge the Attorney General to support extension of the 1965 Voting Rights Act.

The party of Lincoln has an obligation to do far better than these "straws in the wind" have indicated. We have traditionally been supporters of civil rights legislation—in 1957, 1960, 1964, and 1965. A large percentage of Republicans—as well as Democrats—voted for the civil rights bills and cloture in this Chamber.

In 1964, the distinguished Senator from Illinois (Mr. DIRKSEN) was the architect of the landmark historic Civil Rights Act. If some within the party would change this direction, I would remind them—and the administration—that there are others of us who feel just as strongly that these laws should be enforced fairly and with conviction by our Republican administration. Personally, I would never stand mute while our country—or my party—takes any other course.

I speak out now because once a fact is accomplished, once the administration's honor and prestige is on the line, it is hard to change. Therefore, with the risk I run, as a person who is loyal to the President and who believes in him, I wanted to say these things so that all can take heed.

THE SAIGON GOVERNMENT

Mr. COOK. Mr. President, in a recent commencement speech in my State I dis-

cussed the matter of sources of current student unrest. I said at that time:

To many students the source is inextricably intertwined with the course of the Vietnam war into which we plunged ourselves, against the warnings of many about the consequences of involvement in Asian land wars. There is a widespread feeling throughout the land not only among the student generation but others as well, that the war was not only conceived in bad military advice but has been nurtured to a position of support for a corrupt government which is pitted against the egalitarian demands of its people.

Unfortunately, my worst suspicions about the Saigon regime have been confirmed once again. In the New York Times of June 24, 1969, and the Washington Post of this morning, there appeared a news article indicating that the magazine Newsweek might be permanently banned from South Vietnam, because of a recent article appearing in its June 23 issue entitled, "Vietnam Exodus: A Favored Few." The story adds that the particular issue in which the article appeared has, in fact, been barred from public sale.

Mr. President, I ask unanimous consent that the article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

VIETNAM EXODUS: A FAVORED FEW

To the statesmen charged with settling it, the end of the Vietnam may still seem a long way off. But many of South Vietnam's more affluent and sophisticated citizens are not so sure, and already they have begun to hedge their postwar bets. Hundreds of them have slipped out of the country to self-imposed exile in Europe or the United States, and many hundreds more are clamoring to leave. "When the war ends, it will mean a coalition government," explains a Saigon university student. "Then the Communists will be here, and that will destroy the South Vietnam we all love. So we want to get out."

That desire is widespread in South Vietnam. According to one unofficial estimate, the number of passports and exit visas issued by the Ministry of the Interior has increased by about 60 per cent in the past year. And of the 400 or so travelers who leave South Vietnam legally each week—mostly on tourist or other short-term visas—about half never return to their homeland. Others who have been denied a visa pay huge bribes to have themselves smuggled out of the country. Because the exodus is acutely embarrassing to the Saigon regime, government spokesmen are unwilling to say exactly how many of their countrymen have gone into exile. "If someone in my department were to release figures on the number of Vietnamese who have settled abroad permanently, it would create a scandal," says one Interior Ministry official. "And that would probably ruin my own chances of getting out."

PARANOIA

In theory, it is virtually impossible for a South Vietnamese citizen to leave his country for good. Passports and visas for even brief trips abroad are issued only after exhaustive paper work—and usually the payment of a large "fee." One wealthy couple had to come up with $16,700 recently to enable their teenage son to join them in Paris. Draft-age males are not allowed to leave at all unless two military officers above the rank of major sign a guarantee that they will return. And even when all the legal and financial requirements have been met, travel documents still may not be forthcoming. "The government is paranoid," a young Vietnamese coed told Newsweek's Paul Brinkley-Rogers last week. "They are certain that everyone wants to leave Vietnam forever. Many people do. I guess that's why the government is paranoid."

"What makes you mad," growls a young man who has been unable to leave the country, "is that the officials who won't let us go will be the first to clear out when the time comes. We all know that they have bank accounts in Europe and that their children are studying abroad." Indeed, it appears that some highly placed South Vietnamese have already begun to think about the unthinkable. The wife of President Nguyen Van Thieu bought a house in Switzerland earlier this year; when she returned to Saigon, she left her three children in Rome. And the wife of Gen. Cao Van Vien, the South Vietnamese Chief of Staff, has deposited three of her four children in Switzerland.

EXILES

Some South Vietnamese officials whose duties have taken them overseas have already decided not to return. Former Information Minister Pham Xuam Thai was sent to France last year as an observer at the Paris peace talks. But when he was ordered to return to Saigon he abruptly disappeared. According to a Vietnamese friend who has seen him in Paris, Thai is now supporting himself as a janitor and waiter. Ho Huu Tuong, a member of the South Vietnamese House of Representatives, also went to Paris about six months ago as a tourist, but when his three-month visa expired he stayed on. So far, repeated pleas from his constituents and fellow legislators have not persuaded him to return, and he is said to have set up housekeeping with a Vietnamese lady friend whom he managed to spirit out of his homeland. The most imaginative official defector, however, may have been a former assistant to the South Vietnamese military attaché in Thailand. When his tour of duty was over, he decided to remain in Bangkok where, to qualify for a job and a Thai passport, he joined the Bangkok Breadmakers Guild.

Many private citizens also have been able to feather foreign nests. One illegal but effective way to get out of Vietnam is to claim French citizenship (which can be conferred upon any descendant of a French soldier). Currently, the blackmarket price for "proof of French parentage" in Saigon is said to be $2,800. Would-be émigrés who fail to get either French or Vietnamese travel documents can be smuggled out of the country on foreign ships at a cost of $1,100 each (although unscrupulous freighter captains have been known to turn over their illegal passengers—and part of their fares—to South Vietnamese officials before leaving territorial waters). The overland route to sanctuary in Cambodia is even more expensive; that trip costs $5,570 because the smugglers must pay off South Vietnamese officials, Cambodian border guards—and the Viet Cong.

Leaving South Vietnam with some semblance of legality can be even more complicated. One Saigon businessman began the process by dispatching his oldest son to Tokyo, ostensibly to study the pearl business (South Vietnam, as it happens, has no pearl beds). Then, a few months later, he took his two other sons on a visit to Tokyo, paying $550 to each of the army officers who guaranteed their return. Next, the businessman's wife and two more children got permission to attend the oldest boy's wedding in Tokyo. Eventually, most of the family found its way to France, and the father returned to Saigon to run his import-export business. His Parisian bank account now totals $1.6 million. "Saigon is the easiest place to make money," he says, "and France is the place to spend it."

POTS AND PANS

A few of the expatriates settle in the U.S., but most prefer France because of its social and cultural attractions for educated Vietnamese. Even in the best of circumstances, however, life in exile can be bleak. "No matter how wealthy they are," says one Saigon society matron, the people who flee discover that life abroad is not as soft as it was here. Wives who have never touched pots and pans are now in charge of the cooking."

The Saigon government is doing what it can to stem the flow of émigrés. For one thing, it has warned army officers that if the young men they vouch for do not return to South Vietnam, the responsible officers will be sent to jail—a provision of the law that so far has not been enforced. But the government's reach is not very long, and it would seem that until South Vietnam's underpaid civil servants are somehow shielded from temptation, the exodus will go on. "We could send security men overseas to bring these people back," remarks one official. "But if we did, our agents would probably vanish, too."

Mr. COOK. This is just another of many examples, Mr. President, of suppression by the Saigon regime. And this time they even went so far as to suppress one of our publications. Is it any wonder that the people of South Vietnam have so little faith in the government which currently resides in Saigon? These people have experienced suppression of free speech and the closing of their own newspapers for many years, and now we are finding out for ourselves how the Saigon regime operates to eliminate dissent regardless of the verity of the criticisms.

The suppression of the Newsweek article lends great support to the validity of its assertions. In that regard, I have today sent to the Secretary of State a letter requesting answers to certain questions raised by a careful reading of the article in Newsweek and the news stories in the New York Times and the Washington Post. My questions in the letter were these:

(1) Is the news story representation accurate when it says "political officers (of our embassy) are urging newsmen to play down the matter on the ground that a nation at war must take precautions to protect its morale"?

(2) The Newsweek article reports that "a few expatriates settle in the U.S., but most prefer France because of its social and cultural attractions for educated Vietnamese." How many South Vietnamese "expatriates" are living in the United States? What are they currently doing for a living? What were the circumstances surrounding their exodus from South Vietnam? What were their positions in private and/or public life while in South Vietnam? To the best of your knowledge, what is the estimated financial worth of each? Who are the sponsors of these people in the United States?

Mr. President, I ask unanimous consent that the full text of the letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON THE JUDICIARY,
Washington, D.C., June 25, 1969.

Hon. WILLIAM P. ROGERS,
Secretary of State,
Department of State,
Washington, D.C.

DEAR MR. SECRETARY: In the New York Times of June 24, 1969, and the Washington Post of this morning, there was a news article indicating that the magazine Newsweek might be barred from South Vietnam

because of an article appearing in its June 23 issue entitled, "Vietnam Exodus: A Favored Few". The story adds that the issue which the Saigon regime found so objectionable has, in fact, been barred from public sale.

The essence of the story is that many high-level South Vietnamese officials are preparing to leave the country in anticipation of a communist victory or a victory by any of the elements currently disenchanted with the government. My questions to you are essentially these.

(1) Is the news story representation accurate when it says "political officers (of our embassy) are urging newsmen to play down the matter on the ground that a nation at war must take precautions to protect its morale"?

(2) The Newsweek article reports that, "A few expatriates settle in the U.S., but most prefer France because of its social and cultural attractions for educated Vietnamese". How many South Vietnamese "expatriates" are living the United States? What are they currently doing for a living?

What were the circumstances surrounding their exodus from South Vietnam? What were their positions in private and/or public life while in South Vietnam? To the best of your knowledge, what is the estimated financial worth of each? Who are the sponsors of these people in the United States?

As you know, I am extremely concerned about continuing reports of corruption, profit-making, and general disregard for the Vietnamese people by the Saigon regime. Your prompt attention to these inquiries would be greatly appreciated.

With best wishes.

Sincerely yours,

MARLOW W. COOK,
U.S. Senator.

Mr. COOK. Mr. President, I am confident that the Secretary will do his best to supply answers to the questions I have raised. These answers, Mr. President, are important to the American people. What kind of government are we continuing to prop up by our military presence? How many rich South Vietnamese are growing richer by our continued presence? I think it important, Mr. President, that no settlement of the Vietnam war be contingent upon the continued existence of the current Saigon regime. The South Vietnamese people deserve a better fate: the legacy of 40,000 dead young Americans demands no less.

THE IMPLEMENTATION OF THE GUN CONTROL ACT OF 1968

Mr. MANSFIELD. Mr. President, as it states, the chief purpose of the gun control law enacted last year is to support Federal, State, and local law enforcement officials in their fight against crime and violence. No regulations, the Congress said, would be implemented, save those that are necessary to effectuate the purpose of the law.

I appreciate the difficulties faced by the Treasury Department in drafting regulations implementing this law. Legislative intent is not always an easy matter to construe. What is clear is that any regulations must fall squarely within the authority granted the Secretary of the Treasury.

Senators will recall that in the section of the law concerning the restrictions on the importation of sporting weapons, Congress created a special exception for members of the Armed Forces serving abroad. That exception was made through a floor amendment offered by the distinguished Senator from Nebraska (Mr. HRUSKA), who was so closely involved with the development of this legislation. Specifically, Congress said the exception would apply to any member of the U.S. Armed Forces who is on active duty outside the United States.

It came to my attention that this excepting provision was being interpreted by the Alcohol, Tobacco, and Firearms Division of the Treasury Department—the agency responsible for the enforcement of this law—as applying only to an Armed Forces member whose permanent duty station is located abroad. Acting upon this interpretation, the Division had been denying the importation privilege to servicemen who indeed are on active duty outside the United States—the designation assigned by Congress—but who do not have a permanent duty station abroad—the words used by the Treasury Department. In so doing the Department had not only misread the intent of Congress, it had rendered meaningless the plain language employed.

What made this amply clear—to me at least—was the fact that Congress did choose to use the expression "permanent duty station" elsewhere in the law. It did so in assigning a special definition of what "resident" means in the case of a member of the Armed Forces where it says in the definitions section:

> A member of the Armed Forces on active duty is a resident of the State in which his permanent duty station is located.

In this section the statute refers specifically to "permanent duty station." If Congress intended to make the importation exception applicable only to servicemen having a permanent duty station abroad, I think it simply would have used the language again. But it did not choose to adopt such a narrow criterion and the importation exception refers to "any member of the U.S. Armed Forces who is on active duty outside the United States."

The hardship imposed by the Treasury Department's failure to give any meaning to this provision of the law was brought to my attention by Army Maj. Lones W. Wigger, a Montanan and a man who has compiled a truly remarkable record in using firearms for sport. He is a national prone champion; a five-time national position champion; he was twice national indoor champion; a member of the Pan American Team of 1963 and the Olympic Teams of 1964 and 1968 where he won gold and silver medals, setting two world records. Additionally, he has won all major service marksmanship awards including the Distinguished Rifle Badge, and two badges for excellence in competition.

Major Wigger was denied a license to import the firearms he needs to pursue his remarkable talents. He was denied the license though he was assigned on active duty outside the United States and otherwise met the express terms of the military exception to the import restrictions provided by Congress. When he attempted to import weapons through a third party licensee at the suggestion of the Treasury Department, they arrived in a damaged and unusable condition. For a man of his particular talent who has represented his nation as a marksman with such distinction, such a procedure was neither adequate nor desirable.

In my opinion, there is no question that Major Wigger met the provisions of the law passed by the Congress. And I am happy to say that the agency now agrees.

I realize, of course, that it is not desirable to extend the exception to every individual who happens to be on a 2- or 3-day sojourn overseas. However, I do think that any serviceman who is on active duty outside the United States and who otherwise meets the provisions of the law should be accorded the full benefit of the wishes of Congress in creating the exemption. I feet, as I have said, that the statute as written is clear in this regard. So I am quite pleased that the agency responsible has changed its position.

Mr. President, I ask unanimous consent that my correspondence with the Treasury Department on this matter be printed in the RECORD.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

U.S. TREASURY DEPARTMENT,
INTERNAL REVENUE SERVICE,
Washington, D.C., May 23, 1969.

Hon. MIKE MANSFIELD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MANSFIELD: This refers to your letter of May 15, 1969, concerning the application of Major Lones W. Wigger, Jr., to import four .22 caliber target rifles from West Germany. This application was resubmitted upon the suggestion of Mr. Cecil M. Wolfe, a member of my staff, so that we might reevaluate our position with respect to the individual importation of firearms by members to the Armed Forces on temporary duty outside the United States.

After careful consideration, I find that I again must decline to approve Major Wigger's individual permit to import the four rifles. I am enclosing a copy of my letter to Major Wigger returning his application. In addition to the reasons given in my letter to Major Wigger, it is hoped the following remarks will fully clarify my position in this matter.

Section 925(a)(4), Title 18, United States Code, provides that *"when established to the satisfaction of the Secretary to be consistent with the provisions of this chapter* and other applicable Federal and State laws and published ordinances, the Secretary may authorize the transportation, shipment, or importation into the United States to the place of residence of any member of the Armed Forces who is on active duty outside the United States (or who has been on active duty outside the United States within the sixty-day period immediately preceding the transportation, shipment, receipt or importation), of any firearm or ammunition which is (A) determined by the Secretary to be generally recognized as particularly suitable for sporting purposes * * * and (B) *intended for the personal use of such member."* [Italics Supplied.]

As pointed out in my letter to Major Wigger I do not believe it would be "consistent with the provisions" of Chapter 44 to hold that a member of the Armed Forces on active duty in the United States is eligible for this exemption solely because of a temporary duty assignment which takes him outside the United States. I believe that Congress intended that this privilege be applicable only in connection with a permanent active duty assignment such as would preclude a simultaneous permanent duty station in this coun-

try. This view is borne out by statements of Senator Hruska who introduced the floor amendment which became Section 925(a)(4) of Title 18, United States Code. Senator Hruska indicated that his amendment was intended to prevent a hardship with respect to overseas servicemen who had acquired firearms to participate in sporting activities at their overseas assignments and who would otherwise experience difficulty in transporting or shipping these personally owned firearms to their homes in the United States. CONGRESSIONAL RECORD, volume 114, part 21, page 27145. This justification is not applicable to a member of the Armed Forces on active duty in the United States, who acquires a firearm in connection with a brief overseas assignment on official business.

An individual American citizen, who goes overseas is precluded by the Gun Control Act from personally importing a firearm back into the United States. However, he may have the importation accomplished for him if he utilizes a firearms licensee in his home state and the firearm is "generally recognized as particularly suitable for sporting purposes." I believe, to be consistent with the provisions of the law, I must hold that Major Wigger is subject to the same restriction. I, therefore, do not feel that I can approve his application.

I hope the foregoing satisfactorily explains my position in this matter.

Very truly yours,

HAROLD A. SERR,
Director, Alcohol, Tobacco, and Firearms Division.

JUNE 2, 1969.

Hon. DAVID M. KENNEDY,
Secretary of the Treasury, Washington, D.C.

DEAR MR. SECRETARY: I have a letter of May 23 from Mr. Harold A. Serr, Director of the Alcohol, Tobacco and Firearms Division of the Internal Revenue Service, explaining your Department's reasons for not granting Major Lones W. Wigger a license to import sporting weapons under the Gun Control Act of 1968. Mr. Serr was aware that the Major was assigned on active duty outside of the United States and otherwise met the express terms of the military exception to the import restrictions provided by Congress in the Gun Control Act of 1968. After thoroughly considering all of the points raised by the letter, I find that the sole basis for denying the application rests upon the fact that the regulations promulgated by your Department pursuant to the Gun Control Act construe a member of the Armed Forces on active duty outside the United States to mean only one whose *permanent duty station* has been transferred abroad. Such a construction, it is said, was within your discretion.

I do not agree. And with this letter I wish to lodge my protest for the manner in which this matter was handled and especially for your Department's failure to give any meaning at all to the words of the exception that were so carefully chosen by Congress.

First of all, I should point out that Major Wigger has compiled a truly outstanding record as a marksman and has represented our nation with great honor at national and international competitions. I understand that Mr. Serr was made fully aware of this fact. But for the record I should point out that his achievements include the following: National Prone Champion; five-time National Position Champion; twice National Indoor Champion; member Pan American Champion 1963 and the Olympic Teams of 1964 and 1968 where he won Gold and Silver medals, setting two world records; World Championship Team (1966), winning four Gold medals. Additionally, he has won all major service marksmanship awards including the Distinguished Rifle Badge and two badges for Excellence in Competition.

In spite of his achievements, Major Wigger has never sought special consideration though certainly his unique contributions I would think demonstrate his entitlement beyond question. I only raise this point in view of the fact—as Mr. Serr was advised—that in the past when Major Wigger attempted to import weapons through a third party licensee (as your Department suggested he do), the weapons arrived in a damaged and unusable condition. I would think you would agree that for a man of his particular talent who has represented his nation so well in this endeavor such a procedure is neither adequate nor desirable.

I raise this matter also because the discretion given you under this particular law permits you to allow a variance from the licensing procedures established. I favor your having such discretion so long as it is exercised reasonably. I would think that the special considerations of this case are so compelling and of such urgency that allowing such a variance would have been amply justified. That you failed so to act has disturbed me very much.

With regard to the discretion that is claimed for you respecting the provision of the Gun Law that excepts servicemen from import restrictions, I might point out that nowhere in the law has Congress given you the authority to render meaningless the words it chose in designating those entitled to the exception.

Specifically, I refer to the construction of the phrase "on active duty outside the United States"—the words that designate those members of the Armed Forces who may import weapons. Your department says that these words must mean that the serviceman has a permanent duty station abroad as though Congress could not itself have made such a specific designation. Indeed, Congress did choose expressly to employ the phrase "permanent duty station" when defining a serviceman's place of residence. It seems elementary that in construing any statute—especially one containing sanctions of a penal nature—the words must be taken in their strictest sense. Having used the phrase "permanent duty station" elsewhere in the Act, Congress knew very well the meaning of that expression. But Congress did not choose to use it when designating those who would be entitled to the exception here. Instead, it granted the dispensation to any serviceman who is on active duty outside the United States, not only to those who have a permanent duty station abroad. In short, your construction in the Wigger case, and no doubt in other cases, has rendered meaningless the use of those words. If a narrower dispensation were felt necessary by Congress, it would simply have again chosen to use the expression "permanent duty station".

It is clear that whatever your discretion may be under this Act, I am quite confident that it does not authorize you to render meaningless the words of a law enacted by Congress. If such discretion existed our entire system of government would be jeopardized.

In the circumstances, I would hope that a more satisfactory resolution of this problem could be achieved. It may well be that the only solution lies in an amendment that places beyond doubt the meaning of this provision of the Gun Law.

Sincerely,

MIKE MANSFIELD.

U.S. TREASURY DEPARTMENT,
INTERNAL REVENUE SERVICE,
Washington, D.C., June 5, 1969.

Hon. MIKE MANSFIELD,
U.S. Senate, Washington, D.C.

DEAR SENATOR MANSFIELD: Your letter to Secretary Kennedy dated June 2, 1969, protested the ruling of Mr. Harold A. Serr, Director, Alcohol, Tobacco and Firearms Division, covering the importation exemption in 18 U.S.C. 925(a)(4) for members of the Armed Services. That ruling was made by Mr. Serr in his letter to you dated May 23, 1969, and, in pertinent part, held that the exemption was applicable "only in connection with a permanent active duty assignment such as would preclude a simultaneous permanent duty station in this country." You suggest that under the plain meaning of the statutory language, the exemption should be available to any serviceman who returns to this country from an overseas active duty assignment. The Service has also received similar criticisms from others. The Secretary requested that I review this matter and answer your protest.

The language of section 925(a)(4) would support your suggested interpretation of the exemption. However, I cannot say that the interpretation incorporated in the ruling is unsupportable.

The Congressional purpose of 18 U.S.C. Chapter 44 was stated in section 101 of P.L. 90-618 (82 Stat. 1213). That purpose included the statement that the Chapter "* * * is not intended to * * * provide for the imposition by Federal regulations of any procedures or requirements other than those reasonably necessary to implement and effectuate the provisions of this * * *" Chapter.

Upon reconsideration, I have concluded that the restrictive ruling is not necessary "to implement and effectuate" Chapter 44. Further, a relaxation of the ruling will not unduly hamper the enforcement of the law. Under these circumstances, it is held that members of the Armed Forces returning to the United States from an active duty assignment overseas are entitled to the section 925(a)(4) exemption, provided, of course, that the other requirements of the section are met.

Under the relaxed ruling, the Service will place more emphasis on the section 925(a)(4) qualifying requirement that sporting firearms imported by servicemen must be intended for their own use. This, I believe, is necessary to prevent possible commercial importations by members of the Armed Services.

Any future applications to import firearms submitted by Major Wigger will be acted on under this ruling.

Your interest in the proper implementation of the Gun Control Act of 1968 is sincerely appreciated. Please advise if I may be of any further service.

Sincererly yours,

RANDOLPH W. THROWER,
Commissioner.

FLY IT, IT IS YOURS

Mr. ERVIN. Mr. President, former President Woodrow Wilson, on the subject of the American flag, said:

It has no other character than that which we give it from generation to generation. The choice is ours. It floats in majestic silence above the hosts that execute those choices whether in peace or war. And yet, though silent, it speaks to us—speaks to us of the past, of the men and women who went before us and of the records they wrote upon it.

To those of us who believe those lines to be true and who have been greatly saddened and disturbed by the senseless actions of anarchists and others, here and abroad, as they burn, mutilate, and otherwise desecrate our flag, I am happy to offer a measure of comfort by calling attention to the "Fly It, It's Yours" campaign of the High Point, N.C., television station, WGHP-TV.

This program was conceived to stimulate community interest in the American flag and its proper display through the medium of television. It started 4 weeks prior to Flag Day, June 14, and will conclude on July 4. In addition to broadcasts concerning the flag, its history and

meaning, WGHP–TV has made flags available to the public at cost as well as various printed materials to supplement the on-the-air activities. Furthermore, the station has worked with leaders in the community, civic associations, and other interested citizens in an effort to promote communitywide awareness of the traditions and high ideals which "Old Glory" symbolizes.

As I salute WGHP–TV for the excellence of "Fly It, It's Yours" program, I commend to all of us who wish for our flag to retain its rightful place the words of Supreme Court Justice John M. Harlan in *Halter* v. *Nebraska* 205 U.S. 34, 43 (1907):

To every true American the flag is the symbol of the Nation's power—the emblem of freedom in its truest, best sense. It is not extravagant to say that to all lovers of the country it signifies government resting on the consent of the governed; liberty regulated by law; the protection of the weak against the strong; security against the exercise of arbitrary power; and absolute safety for free institutions against foreign aggression.

I ask unanimous consent that a letter and an editorial statement from Mr. Philip J. Lombardo, general manager of WGHP–TV, which gives the details of this program be printed in the RECORD.

There being no objection, the letter and statement were ordered to be printed in the RECORD, as follows:

WGHP–TV,
High Point, N.C., June 16, 1969.

Hon. SAM J. ERVIN, Jr.,
U.S. Senate,
Washington, D.C.

DEAR SENATOR ERVIN: Four weeks prior to National Flag Day, June 14, 1969, WGHP–Television began a project that we feel certain will be of great interest to you. In order to stimulate interest and to make our community again aware of the traditions and high ideals for which the Flag of the United States is a visible symbol, WGHP–Television began on May 19, 1969, to dedicate its time and efforts to encouraging the observance of National Flag Day. Through July 4, 1969, we will make available, to all citizens who would display the emblem of our Union, at cost, a fine quality American Flag. This will be a non-profit campaign in the community interest.

In conjunction with this campaign the television station has taken a definite stand on the desperate need for a personal display of love of country, and each member of our staff and all "air" personalities have offered their time and energies "gratis" for commentaries on the air and for all the duties surrounding the actual sale of Flags and mailing. We have also compiled information regarding the history of National Flag Day, the speech proclaiming June 14 National Flag Day by President Woodrow Wilson in 1916, the proper way to display our Flag and the most significant dates on which we display the Flag. This has been sent, with a reprint concerning the history of the Flag from *Reader's Digest*, to all area teachers, professors, student leaders, civic leaders and ministers in a sincere hope that they will use the information for lectures, discussion groups, and/or sermons, as the case may be. In addition, announcements on our airways have been dedicated to news features, commentaries and public service messages aimed at encouraging patriotic interest in displaying the American Flag.

After having been on the air with this for just two weeks, we have received a tremendous response, not only in actual Flag orders from across the State and from South Carolina and Virginia, but in genuine concern from our citizens for more patriotic display of our Flag. We have been especially pleased with the enthusiasm and interest that we have received from the non-profit community service organizations in our area. As a result of this, WGHP–Television will be working "hand-in-hand" with the Salvation Army, Boy Scouts of America, Girl Scouts of America, Y.M.C.A., Y.W.C.A., public libraries and many other interested citizens.

WGHP–Television is very proud to be a voice in the communities that we serve as a broadcasting facility, and we constantly strive to ascertain the needs and desires of our fellow citizens. Through our continual contacts with community leaders, it has become openly apparent in recent weeks that a need for awareness and rededication to the ideals for which our Union stands is sought by each person with whom we talked. Our current campaign is a direct result of this local expression of concern. It is an endeavor that we as a television station have undertaken because we strongly believe that patriotism and the expression of that personal feeling by displaying the emblem of our country is an action of which we need to remind each other frequently. We believe that the display of the American Flag is the best way to begin. We have faith in this Union and your leadership. Amid all of our other problems, we sincerely hope that this will bring encouragement to you and your colleagues.

Sincerely yours,
PHILIP J. LOMBARDO,
General Manager.

A STATEMENT OF POSITION BY WGHP–TV PRESENTED BY PHILIP J. LOMBARDO, GENERAL MANAGER

It should be apparent to WGHP–TV viewers, through our daily schedule of news and entertainment programs, that station management stays abreast of the needs and desires of our community . . . and contributes, in every feasible way toward fulfilling these needs.

It should *also* be apparent, through its programming, that station management strives to contribute measurably to community efforts of betterment.

Therefore, it is *only* in matters of extreme importance that the *voice* of management is heard on the air.

Such is the case now.

We feel that the time has come for a renewed dedication of love of country.

These days, there are perhaps a number of definitions for the word *patriotism*, for it, like religious faith, is a very personal expression. The essence, though, of *any* definition is simply love of country.

We feel that the word patriotism should be heard more often . . . that the feeling should be expressed more often; and we know of no better way to begin, than to show, and be proud of, our symbol of national unity . . . the American flag. Such action demonstrates that we, as citizens, appreciate the many privileges that come with being an American citizen. With this in mind, channel eight is embarking on an energetic campaign of encouraging people to "Fly It, It's Yours." We will, make available during the coming weeks, the history of the flag, the history of National Flag Day, President Woodrow Wilson's 1916 speech proclaiming June 14 as National Flag Day, the most significant dates on which the flag is flown, and instructions on the proper way to display the American flag . . . to all teachers, student leaders, college professors, and ministers in our area. This is being done in hopes that they will find an opportunity to use the information in a class lecture or project, or a sermon, as the case may be.

Channel eight will also be encouraging individual expressions of patriotism by making available, without profit, American flags. All of our on-the-air personalities will be actively participating by broadcasting reminders of the importance of the flag. They will also be appearing at area shopping centers to demonstrate in a personal way, that channel eight is sincere in this effort, and we hope that you will display your patriotism by displaying an American flag.

"Fly It . . . It's Yours."

TIME FOR CONGRESS TO ACT ON HOUSE HUNTING BLUES

Mr. PROXMIRE. Mr. President, an article entitled "House Hunting Blues," published in today's Wall Street Journal, clearly describes the plight of the home buyer and the homebuilder as a result of the high interest rate policy of the administration and the Federal Reserve.

Effective interest rates for mortgages in May averaged 7.64 percent—and this was before the prime rate went to 8.5 percent.

In some places, seven to eight points were demanded by financial institutions for housing loans. Points are nothing more than an advanced payment of interest and are used to circumvent usury laws or ceilings on mortgage interest rates.

In addition, the size of the downpayments have been rising and the price of the houses themselves have gone up as much as 1 percent per month.

The higher price for houses, the increases in the interest rates, the larger downpayments, and the demand for points have all worked effectively to greatly reduce the demand for privately built conventional housing.

Once again, the policies, and lack of policies, of the administration and the Federal Reserve Board have made housing bear an unfair and unreasonable burden. Once again, housing has borne the brunt of high interest rates and tight money policies.

In the meantime, the fundamental means of fighting inflation have been studiously avoided. We cannot stop inflation by tinkering with monetary policy and by merely raising interest rates.

We need to cut expenditures—especially those for unneeded and wasteful military items, the excessive spending for the space program, and for highways and other public works. And this will take Presidential and administration leadership which until now has not existed.

This is the way to stop inflation. But such policies have not been forthcoming. In the meantime, housing has once again been required to take an unfair burden in the fight against inflation. And even worse, it is a burden and a sacrifice which is unlikely to solve the basic problem.

I ask unanimous consent that the Wall Street Journal article, detailing the particular problems in the homebuilding industry as a result of the excessively high interest rate policies now being pursued, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, June 25, 1969]

RISING INTEREST RATES, HOME PRICES DISCOURAGE MANY WOULD-BE BUYERS—HOUSING START FORECAST DIPS BELOW YEAR-AGO FIGURE; DOWN PAYMENTS RAISED

A Philadelphia accountant who has combed the Main Line suburbs for the past six

months in search of a home tells a tale of woe.

"The prices are simply outlandish," he moans. "We started out looking at the $35,000 level, but when you mention that price to a broker he just laughs. We looked at one house for $43,000 that had ceilings so low that you couldn't maneuver—you'd have to walk around like a hunchback. Another place for $42,000 had a tiny kitchen. It also was dark, dingy and dirty."

The accountant has slowed his search lately, but not because he wants a home any less. "With interest rates like they are, we probably couldn't get a mortgage even if we found a decent place," he says gloomily.

The Philadelphian's plight illustrates the extreme difficulties home hunters all around the country are having these days. Bankers, real estate brokers and people in the market for houses agree that the current housing squeeze is the worst in recent years. Few predict it will get better in the months ahead.

Behind this situation is a demand for money from all sectors of the economy that has sent interest rates soaring to all-time highs. On June 9, bankers raised their prime rate—the interest they charge their most credit-worthy corporate customers—to a record 8½% from 7½%. It was the fifth prime rate boost since December and the first full percentage-point increase since 1945.

Mortgage interest rates also have been rising sharply. The Federal Home Loan Bank Board reports that the effective interest on conventional new home loans averaged 7.64% in May, up from 7.3% in January and 6.84% in May 1968. Savings and loan associations are the nation's biggest mortgage lenders, and in recent months their supply of new funds has slackened as depositors have sought higher returns elsewhere. This trend may reduce their lending activity.

The maximum interest rate that lenders can charge on mortgage loans guaranteed by Federal agencies still stands at 7½%, but it's expected to rise to 8% shortly to reflect money market realities.

High-priced money is threatening to dry up the already meager supply of homes on the market. Builders complain that money for construction loans is scarce at precisely the time they need more of it to cope with rising labor and construction materials costs. The result is a cutback in their home-building plans.

The National Association of Home Builders, a Washington-based trade group, earlier this year predicted that about 1.7 million new homes would be started in 1969, about 13% more than in 1968. Six weeks ago it revised that estimate to forecast a 3% drop for the year. Now "we are going to have to revise that figure down again" as a result of the effects of the most recent prime-rate increase, says Michael Sumichrast, chief NAHB economist.

A shortage of new homes means that prices of existing homes are going up rapidly—more than 1% a month in some metropolitan areas. But homeowners are reluctant to cash in on this bonanza because it would entail braving the bruising housing and mortgage markets again for another home.

SCARED OFF

"A guy will hear about the big prices people are paying for homes and come in to see about selling his," says Frank La Rosa, a real estate broker in Westbury, Long Island, N.Y., "When he sees the current interest figures, he says, 'My God, I can't give up my 5% mortgage for those rates.' He decides to add a room to his present house."

Mr. La Rosa says he currently has about 25% fewer home listings than at this time a year ago.

The situation is much the same elsewhere. "I could get you $3,500 more for your home today than last year," Cleveland real estate man Lloyd A. Lehman tells one former customer. "But I can't guarantee you that I'd be able to find you another home."

The mortgage money-housing pinch is especially severe in states where usury laws have pegged the maximum interest rates that banks can charge on conventional home loans well below the returns available from other types of lending. In Illinois, Michigan and Pennsylvania, for instance, the maximum mortgage interest rate is 7% (though banks can get 7½% on loans guaranteed by the Federal Housing Administration and the Veterans Administration). In New York and New Jersey, it's 7½%.

Lenders in some areas can circumvent those limits by tacking service fees known as "points" on home loans they make; a "point" is equal to 1% of the amount of the loan, and it must be paid in cash when the loan agreement is completed.

In Michigan, where the law doesn't permit lenders to add "points" to conventional home loans, many have simply stopped making such loans. They are adding up to seven points on FHA-backed mortgages.

In the Chicago area, some financial institutions responded to the latest prime-rate increase by boosting their points on 7½% FHA loans to 8½ from five. At that rate, the service charge on a $20,000 mortgage comes to a whopping $1,700.

DOWN PAYMENT REQUIREMENTS RISE

Lenders also have moved to make it tougher on potential borrowers by raising down-payment requirements in the Chicago area, down payments on conventional mortgages range from 30% to 40% of the home price, up from 20% to 25% just two months ago. Savings and loan concerns in Chicago insist they still are investing most of their funds in local home mortgages, but real estate men dispute this.

"The lenders have let us down completely," asserts one real estate salesman in a suburb north of Chicago. "They're either sitting on their money waiting for the usury rate to go up (such a bill currently is pending in the Illinois legislature), or buying out-of-state mortgages at higher rates. I've had four deals collapse in the last two weeks because my people couldn't get mortgages."

Home lending hasn't stopped in New York and New Jersey, but many lenders have cut back their activity by accepting mortgage applications only from their own depositors or from customers of real estate men with whom they do a lot of business. And a few of them have begun casting a warier eye on loan applications from savings account holders.

"The other day we gave a $22,000 mortgage at 7½% with a 25% down payment to a man who had a $2,800 savings account with us," says Cadman H. Frederick, vice president of Suffolk County Federal Savings & Loan on New York's Long Island. "It turned out he deposited the $2,500 the day he asked for the loan and withdraw $2,400 of it the day after he got his mortgage. From now on we're going to check on how long people have had savings accounts with us."

Low and middle-income house hunters are feeling the housing squeeze most. Rising building costs have pushed many new homes out of their reach, and they are having an increasingly tough time making the monthly payments required by today's high interest rates.

In Philadelphia, for instance, A. P. Orleans & Co., a large building concern, offered row houses for $17,000 a year ago; the same house sells for $18,500 today. "We are rapidly losing the bottom of the market," says Edward Borowsky, the firm's sales manager.

In San Francisco, "there's slim pickings in the $20,000 to $25,000 range," says Lee Barrett, president of Leland Barrett Realty Co. Real estate men there say few houses are being built to sell at those prices, and price increases have taken existing homes out of that bracket.

According to some real estate men, the housing pinch also is affecting the well-to-do. Says Joe George, manager of William E. Doud Real Estate in the prosperous Los Feliz section of Los Angeles: "The $100,000 homes aren't selling as well as they used to. People just don't want to borrow that kind of money at today's interest rates." (Mortgage interest runs as high as 9% in Los Angeles.)

At best, the housing pinch is causing home buyers to lower their standards and stretch their budgets. Mr. and Mrs. Charles Williams started out last March looking for a three-bedroom home near New York; they wanted to pay about $25,000 and to put $5,000 down. The Williamses' found a $25,000 home in Fanwood, N.J., but they had to put down $5,900 and settled for two bedrooms and an attic they will have to convert into a third bedroom. "After three months of looking, we felt lucky to get what we did," says Mrs. Williams.

A Philadelphia machine shop superintendent and his family fared worse. They sold their 23-year-old row house for $12,000 two months ago because "the way the neighborhood was changing, we figured it was no longer safe for our daughters," says the wife. After looking at some 30 homes in suburbs north of the city, they settled for an apartment. "We found just one house in our price range—at $24,900," she says. "The roof leaked and the floors needed refinishing. It would have cost us another $5,000 to make it livable."

VALEDICTORY—FRANK M. GOLLOP

Mr. HATFIELD. Mr. President, today's youth are rebelling. No one can argue that point. They are rebelling against what they see as the hypocrisy of a complacent generation. While I do not condone the violence that has erupted on some of our college campuses, I do believe that the youth of today are telling this country some very important things. I think that it is up to all Americans to listen. They do not disbelieve in the basic ideals upon which this country was founded. Rather, they condemn the lack of full implementation of these ideals.

I hope, Mr. President, that we will become not repressive against our young people, but receptive to their thoughts and their uncompromised idealism. We should begin to listen to intelligent voices in all segments of our society.

For the benefit of Senators, I ask unanimous consent to have printed in the RECORD the valedictory address given by Frank M. Gollop at the University of Santa Clara on June 14, 1969. I commend this address for its clarity, its maturity, and its honesty.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Aristotle once said, "Man, by his very nature, desires to know." It is this age-long impulse to know that which is true and to follow that which is good which has been the determining factor in lifting mankind through history.

This quest progresses, however, only through the medium of clash. Political revolutions, for example, are inaugurated by a growing sense that existing institutions have ceased to adequately meet the problems. In much the same way, scientific revolutions are inaugurated by a growing sense that existing theories have ceased to function adequately in the exploration of nature. Whenever the

"status quo" has been recognized as failing, the time for change has arrived.

It is this very sense of society's malfunctioning that is the catalyzing agent for the present social revolution. In short, twentieth century institutions are failing to answer questions, basic to man's existence. For example:

How can a Black or Brown man become convinced of his self-worth and our sincerity when the press continually misrepresents his activities, when his political representatives are unresponsive to his hunger, and when business will not employ him?

How do we cure America's poverty when society insists on sending a man to the moon?

How can an eighteen year old boy justify killing another youth, a Vietnamese, whom he has never met?

America's youth has only recently intuited this sense of malfunctioning and is presently searching for solutions. While the feasibility and worth of many suggestions may be legitimately questioned, one thing is certain: the record clearly shows that the needed remedies cannot be measured in a test tube, argued in Congress, or satisfied by economic graphs. The present crisis is significant because it provides an occasion for the complete structural retooling of society.

And so, in desperation, youth are turning not to science, not to politics, not to business but to the university—for here imaginative solutions have traditionally been sought.

But, unfortunately, rather than uncovering centers of imaginative thought, students are finding that the primary reasons for a college's existence seem to be found either in the mere knowledge conveyed to the students or in the mere opportunities for research afforded to the faculty. Consequently, facing urgent problems, an unresponsive structure, and incapable universities, students are protesting.

The challenges they are leveling at campus administrators across the nation, and Santa Clara was no exception this year, is based on a premise which I think Alfred North Whitehead summarizes so well in the statement, "The justification for a university is that it preserves the connection between knowledge and the best of life by uniting the young and the old in the imaginative consideration of learning." The true university imparts information, but it imparts it imaginatively. This is the function it must perform for society. A university which fails in this respect has no reason for existence.

The atmosphere of excitement arising from imaginative consideration, transforms knowledge. A fact is no longer a bare fact; it is invested with all its possibilities. It is no longer a burden on the memory; it is as Whitehead said, "energizing as the poet of our dreams, and as the architect of our purposes."

Youth is imaginative and, I am encouraged by the belief that, if the imagination be strengthened by experience this energy can in great measure be preserved through life. The tragedy of the twentieth century world is that those who are imaginative have but slight experience and those who are experienced have feeble imaginations. The true university must weld both together in a balanced tension. It is this transformation of Santa Clara from a good school of education into a center of imaginative thought that this graduating class has witnessed this year.

Admittedly, this transformation is far from complete, but the direction has surely been established. During this past year, Santa Clara has become aware of the power students must have in determining university policy and has imaginatively created the "President's Council;" Santa Clara has become conscious of the unconscious racism on campus and has imaginatively created an ethnic studies program and a scholarship fund for minority students; and, most recently, Santa Clara has become aware of the freedom and responsibility necessary to successful community living and, I am confident, will imaginatively create a dormitory policy promoting student maturity.

It is in this increasingly potent atmosphere of continual re-evaluation and change that our imaginations have been nourished, our experiences broadened, and our development encouraged.

Inevitably, the puzzling question is asked: If Santa Clara has become imaginatively aware and creative in such a short time, how has it been able to do so both quickly and non-violently? The answer, I believe, is simple: Beyond our obvious advantage of limited size and our blessing of freedom from state censorship and control, Santa Clara is singular in that it is Christian.

A presumption of an ultimate unity directs Santa Clara's education. It finds expression in a sense of wholeness and openness to all expressions of humanness.

Man exists in brokenness and separation; his life is fragmented. Consequently knowledge is necessarily diffused and the unity of understanding possible for Man is an imperfect one. As C. P. Snow and others have suggested, this fragmentation results in the impoverishment of culture.

A Christian education involves the recognition that knowledge is fragmented and that disciplined study and investigation requires division, specialization and concentration. But combined with this acceptance, is an insistence that real understanding and wisdom cannot be compartmentalized, that the various methods and expressions of man's knowledge are parts of a greater whole, and that this whole is one truth.

Santa Clara has been able to move quickly and effectively because its imaginative creativity works from and builds on a foundation of unifying wholeness rather than like many state institutions, from a sea of transient experiences.

With all this in mind, I would like to address myself for a moment solely to those who have come to witness the graduates receive their diplomas.

Remember, the mind is never passive. It is perpetual activity, delicate, receptive, responsive to stimulus. Its life cannot be postponed until the university has finished sharpening it. Whatever interest is attached to the classroom's subject matter must be evoked here and now; whatever powers are strengthened in the pupil, must be exercised here and now; and whatever possibilities of mental life are imparted must be exemplified here and now. Imagination cannot be acquired once and for all, and then kept indefinitely in an ice box to be produced periodically in stated quantities.

With this in mind, view campus disorders not with fear but with pride for the imaginative life is not a stage of life but a way of living. Surely, I condone neither the destruction of property nor harm to anyone—this should be made clear; but let me also make clear that while the pressure placed on university officials has been great—for many, unbearable—their obligation to society is large.

Given the urgent need for change, the inability of the present structure, and given the hope of a university, then the only thing we have to fear is society's intoleration of imagination.

Finally, addressing myself to the students, I pose one fundamental challenge. While the initial discipline of imagination requires that there be no responsibility for immediate action and while no concrete organization must be established, we all face the burden of leaving the womb. No longer will we be able to enjoy the university's leisure, its freedom from restraint, its freedom from harassing worry, the great variety of experience, and the stimulation of other minds diverse in opinion and equipment. Reflection on this has made me fully aware of what so many before me have referred to as the "cold cruel world."

Four years have taught us much. Gaining from the realism and experience of others, our idealism has been tempered so that our consciences are strong and our convictions firm. My only challenge to this class is to employ our imaginations and maintain our convictions.

To make my point perfectly clear, I point to those male graduates who have decided to wear the white arm band of protest against the military. I sincerely applaud your courage and will always guard your right to follow your imagination and your conscience. I only hope that you will carry your message beyond the campus boundaries by living a life consistent with your convictions. In short, when your student deferment expires, I ask you to reread your published statement of today and employ the courage you have displayed by applying for the status of a conscientious objector. For once having left the university womb, to compromise by joining a reserve unit, to evade the draft by changing your address, or to escape it all by leaving the country would make today's protest, at most, superficial. Remember, a life of inconsistency and continual compromise is worse than the most complacent patriot.

The gift which the university has offered us is the old one of imagination, the lighted torch which passes from hand to hand. It is a dangerous gift. Left free, there is nothing it will not question, reconsider, analyze. Left free, convictions will result which while they must continually be re-evaluated, must be acted upon in a consistent, unified life.

To all present, I suggest that if we are timid as to that danger, then the proper course is to shut down our universities. With the class of 1969, I share the final thought that not to be timid to that danger is the greatest gift that we could ever give to the University of Santa Clara.

THE UNIVERSITY OF WISCONSIN-MILWAUKEE CHANCELLOR ON "THE STATE AND THE UNIVERSITY"

Mr. NELSON. Mr. President, I wish to bring to the attention of the Senate a speech given by Dr. J. Martin Klotsche, chancellor of the University of Wisconsin-Milwaukee, entitled "The State and the University."

Dr. Klotsche is an eminent educator, and in his long service to the University of Wisconsin at Milwaukee has built it into a world renowned university with an enrollment of nearly 17,000. In his long and distinguished career at the University of Wisconsin-Milwaukee, he has emphasized service to the urban society in which the university is located and from which its students come and return to. His success in this important approach has made the school an intricate part of the Milwaukee community and it now functions in a wide variety of community activities.

Dr. Klotsche stresses decentralization of university control and independence in decisionmaking so that the university can best serve the many demands made on it. He also recognizes that the "university above all else must strive to be respected rather than popular. It cannot be all things to all people and expect to survive."

I ask unanimous consent that Dr. Klotsche's "Chancellor's Night" speech of February 18, 1969, be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

Chancellor's Night is an appropriate occasion to call attention to the important role that both the university and the city play in our society, for both the metropolis and the urban university are assuming dominant positions in the closing decades of this century. That we are an urban society has now been fully documented. In 1960, 70 per cent of our population lived in cities, while five American cities—New York, Chicago, Los Angeles, Philadelphia and Detroit—accounted for 20 per cent of the nation's total population. Eighty-five per cent of our population increase between 1950 and 1960 occurred in the 212 standard metropolitan areas. During that period our urban population increased in all 50 states of the Union; in four states it doubled. In contrast, our rural population declined in 28 states.

The urban trend in this country is irreversible, for a society based on science and technology is inevitably urban. Whether we like it or not, our cities are here to stay.

And so are our universities. They have always been important institutions in our society, but with a rapid industrialization and advance in science and technology, they have become central in providing trained manpower, in advancing new knowledge and breakthroughs, and in applying that knowledge to the problems of the day. And the university in the city has a peculiarly unique function to address itself to the problems of the city and participate actively in the struggle for the survival of our cities.

It should come as no surprise to anyone that institutions as volatile as the city and as the university should both find themselves in deep trouble. At every turn our cities are plagued with problems, whether traffic and parking, environmental pollution, recurring fiscal crisis, racial tensions, or aggravated problems in the ghettoes. Our universities, too, are in distress. Student protests, disruption and violence are prevalent on many college campses. Universities everywhere are faced with increasing financial strains. Increasing demands are made upon them for services, and therefore they are overextending themselves, often carrying on activities beyond their resources. Our urban universities are no exception.

Yet, in their common struggle for survival, the city and the urban university have much in common. The city is the university's laboratory. In a very real sense it is the campus of the university. Its schools, its courts, its welfare agencies, its businesses, its medical and health facilities, its governmental institutions, are all learning situations for university students. The problems of the city present ideal case studies for the student and scholar, and provide unparalleled clinical situations. Opportunities for volunteer service and involvement in community action are unlimited.

The university in turn makes its impact felt on the city. Its graduates are placed in industry, government and education. Its faculty are sought after by public and private bodies to advise and consult. Its public service contributions can be significant. It enriches the artistic, cultural and intellectual life of the area.

There was a time when the university could remain in the ivory tower and take a detached role. But now it must step down from its ivory tower, whether it likes it or not, for the problems of the city can no longer be ignored. How the university can best involve itself in the life of the city is not easy to determine, and the terms on which the university should participate are not easy to define.

For the university is not a monolithic structure with all power and authority vested in the office of the chancellor. One cannot properly speak of "the university" with decision-making responsibilities emanating from one central source. Rather, the university is a highly decentralized institution consisting of a number of component parts. It has schools and colleges, departments, centers and institutes, each with its own responsibilities and programs and a high degree of independence in such matters as faculty appointments, program development, and academic thrust. To an outsider such decentralization may appear to border on anarchy, but inside the university there is strong sentiment that this is what gives to the university vitality and freshness, even though it often becomes difficult, at times impossible, for the university to organize its resources for an attack on a community problem.

The problems of the university committed to an urban role are also made difficult because the resources of the university are not unlimited, while requests for services, involvement and participation are constantly mounting. It therefore becomes necessary for the university to establish priorities and to determine on a highly selective basis what should be attempted and where it should put its chips. In so doing it must be prepared to say "No" to many requests and incur the disfavor of those who have been denied its services. The university above all else must strive to be respected rather than popular. It cannot be all things to all people and expect to survive.

Now let me report more specifically on the state of the University of Wisconsin-Milwaukee. Where are we here in Milwaukee and where do we want to go?

1. Our enrollment continues to increase steadily at a rate of about 8 per cent a year. Last fall we enrolled almost 17,000 students and should reach the 20,000 mark in the biennium of 1969–71. At the undergraduate level we still draw predominantly from this metropolitan area, with only about 3 per cent of our undergraduate students from out of state. Our undergraduates have other interesting characteristics. Our student profile shows that they are older, that a higher percentage are married, and that more of them are working than is the case on a residential campus such as Madison.

Our student body is less activist than is the case elsewhere, although there are now indications of greater student involvement in the affairs of the community and a more substantial interest in the affairs of the community and the nation. We had our own black demands last spring, are engaged in discussions now on this matter, and no doubt will have many more before the year is out. The number of our black students is still a relatively small percentage of our total (not more than 2 per cent), but we are working hard to increase the number of disadvantaged students enrolled here.

We are most encouraged by the results of a new experimental program that was begun last fall. A group of about 75 high-risk students, not admissible by normal standards, was admitted through a careful program of selection, based not so much on the traditional tests but on such factors as personal motivation and individual consultation. On admittance, individual counseling and tutoring programs were developed for each student, and at the end of the semester 63 per cent of them survived their academic program.

We are indeed encouraged by this result and intend to expand and further develop this program.

Our graduate enrollments have shown the greatest growth. To be sure, enrollments plateaued off this year because of uncertainties related to the draft, but we feel this is only temporary. There are now over 2,500 students enrolled in more than 50 Master's and eight Ph.D. programs. They represent 15 per cent of our total enrollment compared to 5 per cent ten years ago. In time, one fourth of our enrollments will be graduate students.

We also are continuing to develop our programs for the part-time student. There are now almost 4,000 in this category, many of them enrolled in evening and late afternoon hours. The university in the city has a special responsibility to the adult who wants to continue to learn to keep up in his own field, to assist in his professional advancement, or to contribute to his personal self-fulfillment. We view with some concern recent proposals to limit the enrollment of the University of Wisconsin—Milwaukee, if this should result in discouraging the expansion of our continuing education program.

2. We are pleased with the results of our faculty recruitment in spite of tough competition which we face in the academic market place. There are over 2,000 institutions of higher learning in this country competing for college and university teaching talent. The State University of New York alone needs to recruit 15,000 new faculty members by 1975. We now have almost 700 full-time faculty members, and our departments and administrators are engaged in a year-round effort to recruit new faculty. In our areas of concentration related to our urban mission, we are attracting distinguished people with world-wide reputations. Our Center for Great Lakes Studies is attracting national attention because of the faculty who are teaching and conducting research there. The Fine Arts Quartet, in residence on this campus, is world renowned. The College of Applied Science and Engineering this year attracted a core of three faculty members, specialists in engineering materials, from the Massachusetts Institute of Technology, as a result of a generous gift from the Pelton Steel Company of Milwaukee. Our theoretical physics group is nationally known and last year attracted to this campus physicists from all over the world.

3. In the area of program development we have now finally resolved the question of major status. There are now to be two major public universities in the State of Wisconsin—one in Madison and the other in Milwaukee—offering in addition to undergraduate work a wide variety of professional and graduate programs leading to the doctorate. There are now eight professional schools at the UWM, and a medical school has been approved by the Board of Regents and the Coordinating Council for Higher Education. We are particularly pleased with the development of our two newest professional schools. We already have over 425 students enrolled in our School of Nursing, and our School of Architecture which was created in July of 1968 will have over 100 students enrolled in the third year of the program in the next academic year. We now have eight approved Ph.D. programs at the UWM and plan to add other doctoral programs at the rate of about one a year until we reach a goal of 20 or 25. We do not intend to duplicate or match the Madison campus in the development of doctoral programs, but we do intend to be selective and concentrate on specialties that are unique to Milwaukee. The approval by the Board of Regents at its February, 1969, meeting of a Ph.D. in Economics with an urban emphasis is a case in point.

4. Our building program continues to move ahead in a most satisfactory manner. Last spring we dedicated our Fine Arts Center. We now have under construction three residence halls which, when completed in the fall of 1970, will house 2,000 students. Ground has also been broken for a new heating plant, and an expanded Union will be started this spring and should be completed within two years. Our Science Complex which will house our College of Applied Science and Engineering, our Math-

ematics Department and Computer Center is under construction on the west end of the campus. These buildings will have parking facilities attached to them, thereby adding 1,000 additional spaces for this purpose. A General Classroom Building, to house our School of Education and our School of Social Welfare, is in the planning stages, as is a Chemistry Building. Total expenditures for these projects represents a capital outlay of $50 million.

5. Extramural support for the UWM has also been most encouraging. In 1967–68 we passed the $7,000,000 mark in gift, contract and nonstate support for the UWM. In 1956 the total was only a modest $9,000, but we have shown a substantial increase each year since then. A National Science Foundation grant of one half million dollars was given to UWM this past year to develop our Surface Studies program, an interdisciplinary program developed by our Physics and Chemistry Departments in conjunction with the College of Applied Science and Engineering. Milwaukee's Eschweiler family made a substantial contribution for a special professorship in our newly created School of Architecture.

And yet we still have much to do, especially in the area of our public image in this community. We are at least five years ahead of the public understanding of what is going on on this campus. We are continuously at work on the matter of our image. We have created in the last year two advisory committees, one to the School of Business Administration, the other to the College of Applied Science and Engineering. Our Friday evening programs at the Manfred Olson Planetarium have proved so popular that they now are repeated a second time on the same evening. Our School of Fine Arts lists 44 major cultural attractions during the next three months, most of them available to the general public.

Yet we find that parking nuisances, concern over obscenity incidents and neighborhood opposition to our westward expansion at times overshadow our more positive contributions to the city.

We graduated from this University in June, 1968, and this January, 1,700 persons. These young men and women are trained for business, engineering, nursing, education, fine arts, and social welfare. Two-thirds of them will remain in Milwaukee. Last year our School of Education certified 400 teachers, 90 per cent of whom remained in the State of Wisconsin. Our faculty in increasing numbers are serving the metropolitan area as consultants and actively participating in a wide variety of community activities. The Harbor Commission, the Urban Coalition, the Model Cities program, the committee for the reorganization of city government, the Urban Observatory, are but a few examples. I have already referred to the varied cultural activities offered by the University and the visits to the Planetarium, which last year attracted over 25,000 people. Out-of-town visitors are coming to Milwaukee because of the University, and the existence of the University in this community makes Milwaukee a more attractive place to live in and thereby assists business and industry in recruiting personnel.

Contrary to the view of some who contend that the University deteriorates the neighborhood, it is worth mentioning that property values in the immediate area of the University have risen over 30 per cent in the last four years. Once a final decision is made on the expansion of the campus, we can proceed with an orderly and systematic development of the neighborhood. New business and commercial expansion and housing undertaken by private developers will follow, all of which will add substantially to the city's tax base. With a payroll of close to $15 million, much of which is being spent in this area, another $5 million spent for goods and services, $50 million now programmed for construction, and additional secondary spending stimulated by these dollar expenditures, the University's contribution to the economy of the area now approaches $80 million a year.

The University is clearly an important asset to the community.

It provides education to many young people who otherwise could not attend college.

It makes it possible for a large number of adults to continue their education.

It provides trained manpower in many professional areas now in short supply.

Its faculty achieve research breakthroughs and contribute new knowledge and insight to the improvement of the city.

It provides a wide variety of cultural and educational programs that improve the quality of city life.

It contributes substantially to the economy of the region through payrolls, spending, goods and services.

We are more than an institution that provides low cost education to commuting students, although this should not be ignored as a factor of importance. But in addition we are an institution that affects every aspect of this community's life. We supply trained manpower. We contribute our research talent. We extend our services through expanded programs of outreach.

Our future will not be denied us. We are in the mainstream of American higher education. We are the *urban campus* of a truly great university that has a long tradition of service to the state, nation and world.

AUSTRALIAN ADVANTAGES UNDER THE INTERNATIONAL GRAINS ARRANGEMENT

Mr. HARRIS. Mr. President, I rise to speak at this time with reference to the International Grains Arrangement under which U.S. wheat producers and exporters have operated for the last year.

This past Monday, June 23, there began an International Grains Arrangement meeting in London to discuss the many problems of the world wheat market and the internal difficulties of the IGA itself. At this time, when a comprehensive review of the agreement is being made, it is incumbent upon the Senate of the United States, which approved this treaty a year ago, to take a hard look at at least two of the most striking inequities which have occurred since adoption of this agreement.

I am speaking first of all about the advantages which one of the signing nations, Australia, has taken to the detriment of other member nations, especially the United States.

It is no accident that Australia has been able to undercut our prices in many world markets. By setting up a freight formula based on inefficient vessels and transport techniques, and then doing their actual shipping in larger more modern vessels which are chartered at reduced rates, they have appeared to stay within the price ranges set by the agreement while, in fact, their alleged "compliance" is a covert violation of the spirit of the arrangement.

Under the IGA, the United States is not able to take similar advantage of freight flexibilities since our rates are set by the convention, supposedly as a basis for the other nations to calculate from. I am sure the Australians would not want this situation reversed, with all of the flexibilities in our favor instead, and should therefore be willing to renegotiate the treaty to include a realistic freight calculation schedule. At the very least, they should be willing to comply more fairly under the present system until this problem has been worked out.

Second, I am concerned about the probable loss of a large share of the U.S. wheat market in Taiwan to France. The French have sold wheat at such low prices that there is no way to compete with them under the IGA. We would like to think that no violation of the agreement's minima has occurred but are left almost no choice given the exceedingly low prices at which France is offering its wheat in Asia. Full cooperation by France, as a representative of the European Common Market, is absolutely essential for the present arrangement to operate fairly. Situations like the recent one in Taiwan should be of grave concern to all member nations, not only to the United States.

Our wheat farmers have enough problems already with a reduced market and lower prices generally to have to bear the further burden of countries which refuse to meet their responsibilities under this supposedly cooperative and mutually beneficial agreement.

If nothing is done at London this week, Australia and France should be seriously concerned that our patience may be running out with regard to our support of the provisions of this agreement which are so much to their advantage.

REPRESENTATIVE FINDLEY ON THE COST OF GROWING COTTON

Mr. TALMADGE. Mr. President, Representative PAUL FINDLEY, of Illinois, made use of a remarkable argument before Congress on April 30, 1969, in his effort to have limitations imposed on payments to farmers under the Food and Agriculture Act of 1965. Referring to "a recent study at Louisiana State University," he said: [1]

> The university study implies that, due to economic factors, farmers there would continue to plant cotton even though a payment limitation is imposed. This was clear in the study's analysis of competitive crops to which cotton farmers could turn. In other words, the limitation would not reduce profit on cotton production to such an extent that the land would be planted to other crops. Said another way, taxpayers need not make payments over $20,000 in order to get cooperation in the cotton program.
>
> The same economic factors obviously apply throughout the land of cotton.

Later, on June 10, Representative FINDLEY placed in the RECORD the study on which the above argument was obviously based. It turned out to be a brief analysis entitled "Soybean-Cotton Competition" by Dr. Clyde St. Clergy, farm management specialist with the Louisiana Cooperative Extension Service.

This incident serves to illustrate the extreme distortions of information which are being used to mislead people about the nature of the limitations issue. Dr.

[1] CONGRESSIONAL RECORD, April 30, 1969, p. 10868.

St. Clergy himself is clearly on record as an opponent of payment limitations. He delivered an address entitled "The Case Against Payment Limitations" on March 25, 1969, before the Southern Region Extension Public Affairs Committee.[2] In this address, he made no reference to his study of "Soybean-Cotton Competition" for the obvious reason that he himself recognized it shed no meaningful light on the issue.

Comparing Mr. FINDLEY's conclusions from the study with the actual content of the study itself, let us ask three questions:

First. What does the study actually show about the profitableness of growing cotton?

The study makes no reference to profits and no pretense at measuring the profitableness of cotton production. The only cost figures given are the so-called "variable costs," from which Dr. St. Clergy excludes both the cost of ginning[3] and the interest and depreciation on machinery and equipment. These excluded items of cost are equal to 66 percent of the amount included by St. Clergy under "variable costs" if we take as our authority a study by Hamill and Woolf of Louisiana State University, which St. Clergy used in his analysis.[4] This calculation is based on a cost analysis for medium and large farms, using four-row equipment, in an efficient cotton-growing area of Louisiana in 1967. In addition there are the costs of land ownership, general overhead, and management, which Hamill and Woolf did not attempt to measure. According to the U.S. Department of Agriculture, land and general overhead account for some 23 percent of the total cost of producing cotton in the United States.[5]

Second. What does the study show about the farmer's ability to continue cotton production if limitations are imposed?

There is a theory that the consumers in the United States can count on getting the cotton produced to supply their needs, so long as the farmer's "variable costs" are covered by the income he receives from cotton, and he has no better alternative. Mr. FINDLEY, using St. Clergy's indication that the margin above "variable costs" would be more per acre in Louisiana in 1969 for cotton than for soybeans, draws the conclusion that American farmers will go right on growing cotton even if they are placed under limitations in 1970 and later years.

St. Clergy's study sheds no light on this question one way or the other. The study was designed to help Louisiana farmers make a one-time decision between cotton and soybeans at a time when the decision was right upon them. To do this, St. Clergy had to assume that the farmer had the equipment to grow either crop and therefore would incur the depreciation and interest costs of owning the equipment whether he used it or not. Accordingly these big costs—which are seven times as much per acre for cotton as for soybeans—were excluded from his definition of the "variable costs" to be considered. But if Mr. FINDLEY thinks farmers can go on growing cotton in future years without regard to the cost of buying and owning machinery, he is no great farm economist.

On this point alone, his conclusions become completely invalid. But of course, if farmers are going to stay in production across future years, they must have a reasonable expectation that they can cover all their costs, including the big range of fixed and overhead costs, and that in addition they will get a reasonable return for their effort and investment, just as other business men must do. A reasonable return must include adequate incentive to keep on working and investing in the face of the risks involved, and cotton production is a high risk enterprise.

Third. What does the study show about the comparative production costs of cotton and other farm enterprises?

St. Clergy's cost figures, in addition to having such a limited definition, took account of only one alternative crop in only one State, Louisiana. Even for this comparison, Louisiana's average yield per harvested acre in the last three seasons was 24.7 bushels of soybeans as compared with 620 pounds of cotton, whereas for the 10 other States which grow a substantial amount of both crops, the average was 23.6 bushels of soybeans compared with 435 pounds of cotton. Obviously the yields of cotton were much more attractive, as compared with soybeans, in Louisiana than in the rest of the region.

It is just ridiculous to look at St. Clergy's figures and say, "The same economic factors obviously apply throughout the land of cotton."

Mr. President, in his statement of June 10, Representative FINDLEY referred to those areas where "wealthy farmers get the biggest payments for not growing crops." The campaign to kill the payments program is built on the false and demagogic claims that it is "for not growing crops." Only a minor part of the cotton payments made under the act of 1965 has ever consisted of the diversion payments, designed to discourage plantings above 65 percent of allotments. The largest, or "wealthy" cotton farmers generally tended to plant the full allowed acreage and thus avoid diversion payments altogether. For the growing season now underway, there are no diversion payments at all to cotton producers which are conditioned on diverting acreage. The true purpose of the payments is to help farmers produce cotton and sell it at low, competitive prices in spite of the high cost of production.

A great illusion is being nurtured about the huge size of a few cotton producers. Our national leaders should try to encourage true perspective on the really huge size of our whole country today. If they profess concern for the welfare of consumers, they should relate the cotton problems to the fact that American consumers now spend about 47 billions—yes billions—of dollars annually on clothing, plus a great deal more on other textile products in homefurnishings and other fields. It is extremely important to consumers that our cotton production system be kept alive as a vigorous competitor to the small handful of synthetic fiber companies which are tending more and more to dominate the textile scene. Consumers want and need cotton products, but cotton cannot survive unless it meets the challenge of the synthetics in research, advertising, and all the modern techniques of production and merchandising. One synthetic producer now gets about 1.3 billions—yes, billions—of dollars annually from the sale of fiber in this country. This is about as much as the market value of all the cotton grown by all 300,000 cotton producers combined. Yet Representative FINDLEY deplores the "trend toward bigness" among farmers, not among synthetic competitors. Cotton desperately needs the innovative influence and leadership of its large producers if it is to contend successfully against the enormous firms which are absorbing its markets. The cost-price squeeze applies to the large as well as the small producers. If the larger ones are killed off or driven out of cotton by discriminatory limitations, all cotton producers and all textile consumers will suffer.

It is a supreme irony that Representative FINDLEY selected Dr. St. Clergy's study to use in his campaign against payments to the larger farmers "for not growing crops." The truth is that the occasion for the St. Clergy study was the very fact that diversion payments to cotton had been generally eliminated with respect to the 1969 crop. He was trying to help Louisiana farmers make short-term decisions under this very situation.

Dr. St. Clergy himself, whom Representative FINDLEY has chosen to publicize, points his finger straight at the connection between welfare and limitations in the address mentioned above. If payments are to be withheld from all farmers except those of very modest size, then the question is immediately raised whether the farm programs of the future will "continue to be directed toward maintenance of an efficient agricultural plant that will guarantee the consuming public a steady supply of commodities at fair prices."

Or will they, he asks, become "welfare oriented" programs. It would be a good idea for Representative FINDLEY and all those of kindred minds to ponder Dr. St. Clergy's conclusion:

> If limitations are going to be enacted, then I contend that farm programs should be placed under the administration of the Department of Health, Education, and Welfare.

CONSERVATION IN THE CITIES

Mr. NELSON. Mr. President, earlier this spring Mrs. Donald E. Clusen, of Green Bay, Wis., spoke at the 34th North

---

[2] Mimeographed address, distributed by Louisiana Cooperative Extension Service.

[3] Ginning is excluded on the assumption that this cost will be offset by the gross revenue from the sale of cottonseed. This assumption is supported by experience in most years of the past, but the cottonseed support prices announced for 1969 indicate that this is a most unreliable assumption for the future.

American wildlife and natural resources conference general session in Washington, D.C., on the topic "Broadening Conservation's Constituency."

Mrs. Clusen's remarks centered on the problems of promoting conservation in an urban environment. Mrs. Clusen said:

The most predominant block is lack of identification on the part of "city people" with conservation groups.

Mrs. Clusen went on to say that conservation is more than just a national park, an oil slick off the Pacific coastline, or a summer vacation. Conservation relates to the total environment, including all the physical discomforts of urban life. The challenge is to the conservationist, to bring the relevancy of conservation issues to city problems and to create an awareness on the part of city dwellers to this relevancy.

Mrs. Clusen, the second vice president of the League of Women Voters of the United States, has long been concerned with the quality of the environment. As national chairman of the Water Resources Committee of the League of Women Voters, she has often been a speaker at land and water use conferences and at conservation group meetings and service clubs. She has often given testimony on behalf of the League before various committees of the House and Senate in Washington, urging passage of legislation to promote comprehensive long-range planning for conservation and development of water resources and improvement of water quality.

I ask unanimous consent that Mrs. Clusen's speech to the North American wildlife and natural resources conference be printed in the RECORD so that all may have the benefit of her thoughtful comments on broadening conservation's constituency.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

BROADENING CONSERVATION'S CONSTITUENCY

(By Mrs. Donald E. Clusen, at the 34th North American Wildlife and Natural Resources Conference General Session, Mar. 5, 1969, Washington, D.C.)

On behalf of the League of Women Voters I should like to congratulate you upon the choice of theme for your conference this year—"Conservation In An Urbanizing Society." This choice denotes a concern and an awareness of the fact that the problems of human resources and natural resources are inextricably interwoven. My organization shares this attitude with you and welcomes the dedicated conservationist as an ally in trying to find the means to cope with the monumental problems facing people and with the relationship of people to their physical environment.

The need and the dimensions of the resource crisis of the 1970's has been well documented and eloquently expressed during the past two days of this conference. It is altogether appropriate that this final session be devoted to the actions needed for the job ahead. The League is honored to have this opportunity to share with you our thoughts on how to broaden the base of those who seek solutions to conservation problems in an urban age.

It occurs to me that there is merit in attempting to identify the blocks which exist before trying to propose solutions. Therefore, I pose the basic question: Why haven't people in cities flocked to conservation's banner? Supported conservation causes in large numbers? Assisted in funding conservation needs enthusiastically? Applied the skill and knowledge of the conservationist to urban environments? I am sure there are many psychological and human factors involved in the response to this question, but in our few moments here together I should like to suggest three basic blocks to the acceptance of conservation's cause by urban leadership and to propose three basic remedies for these blocks.

To my mind, the first and most predominant block is lack of identification on the part of "city people" with conservation groups. Conservationists have somehow failed in semantics and in human contact with those who live in urban areas, failed to communicate real concern for their physical environment and their conservation problems. If you live in an over-populated area with little or no open space, few parks, only an occasional tree—if you are accustomed to the fumes which accompany city life, unable to swim in the closest river, it is difficult for you to relate these problems to the image which is evoked by the word "conservation." To the average urban dweller "conservation" means something which has to do with the Grand Canyon, the deer hunter, the fisherman, and the bird watcher but has little or no relevance to the city dweller and his daily problems of existing in a metropolis. If he thinks about these things at all, it is in terms of making his vacation plans or the amount of his tax dollar that is being spent to support camp grounds, clean up the oil slick off the California coast, or build a dam in the West. It is something "out there," and those who are conservation adherents are, to him, for the most part, almost as alien as a man from outer space. It would never occur to the usual city resident, unless he has deep roots in the soil or an unusual concern for his environment, to seek out the local chapter of any of the numerous conservation groups in his area. The city dweller simply does not identify the word "conservationist" with himself nor the word "conservation" with his urban physical discomforts.

The second major block follows along the same line. In addition to lack of identification with conservation groups, the urbanite fails to identify his environmental problems as conservation problems. He knows he can't swim in the river at his doorstep because it is polluted—or catch fish in it—or go boating on it—but he fails to make the connection between this fact and the conservation groups which worked so hard during the setting of water quality standards last year. He knows the trees on his block are dying—or being removed to make way for a wider street or an urban renewal project—but he makes no connection between this loss of trees and the work of conservation groups with urban planners and city engineers and the state resource agency to save some greenery—some open space—in the city. He knows that when it rains his newly-developed area is a sea of mud, his basement is flooded, his street impassible, but he doesn't think of this in terms of the work conservation groups have done in the establishment of building procedures to prevent soil erosion or to achieve comprehensive planning. The urban man does not regard any of these problems as conservation problems. He sees them as problems of city government, or the price of progress, or a fact of life with which he is so accustomed to coexist that he ceases to see it at all.

The third block to vital growth in conservation groups from the urban segment is lack of awareness on the part of the latter of the aid—the expertise, the warmth, the helping hand—which is available to him from conservation interests, both public and private. Somehow in the barrage of words from conservationists, we have failed to convey the message that we care for people as well as trees; for the city as well as the country; for man as well as moose; for the city park as well as the national park. We have also failed to give high visibility and priority to the tools and the technology possessed by conservationists to remedy some of the ills of the city. We have not related well the know-how and willingness of conservation leaders to serve the cause of urban environmental problems—nor have we crossed the semantics barrier which exists.

There has been much debate in the past few years about the terms "conservation" and "preservation." To the uninitiated the meaning of either term and the distinction between them is cloudy. In the minds of city dwellers, the issue is no more resolved than it was in the last century. I personally prefer the definition of Dr. Raymond F. Dasmann, Director of Environmental Studies for the Conservation Foundation, who says, "Conservation is now defined as the rational use of the environment to achieve the highest quality of living for mankind." This definition has relevance to urban areas and sets forth a goal and a hope of a quality environment for urban as well as rural areas.

These three blocks then, I see as the major problems—

City dwellers don't identify with conservation groups;

City dwellers don't see their environmental problems as conservation problems;

City dwellers are unaware of the tools and the willingness of conservationists to assist them.

How to overcome these problems? I am going to propose in explicit and somewhat elementary terms some possibilities to you, because I believe that this is the point at which we must cease to be philosophical and be practical; this is the point at which we must stop being theoretical and become concrete.

First, conservationists must show a renewed interest in the people and the leaders and get to know those who live in the city. We must go to them—where they live—and speak their language. This power structure will not be the one with which we are accustomed to dealing, and it will not always be either pleasant or polite. There will be resistance and disbelief, apathy and a tendency to regard you as dreamers who live in an unreal world. You will need to seek out, at every opportunity, the leaders of urban groups, the spokesmen for the ghettos of the inner city, the heads of labor unions, the officials of city government. You will need to work to identify the people who are interested in the cities and the people who live in the cities. As in approaching any other new audience, you will need to make new contacts and learn about them in advance. What are their goals? What motivates them? You will need to be prepared for rebuff, for you will be seeking out not conservation's natural allies—as we so often recommend—but its un-natural allies!

Urban dwellers do not automatically care about the same things as conservationists and so the burden of proof is on you—to commit yourselves for the long haul; to prove that you care what happens in the cities; to show that you are willing, indeed eager, to accept these citizens as co-workers and make their causes yours. You will need to work more intensively with the ward politician, the city planner, the urban renewal architect, the businessman's luncheon group, the community action boards.

The mantle of purity and the aura of pristine virtue which surrounds the concept of conservation in the minds of the man on the city street must be blown away. You will need to demonstrate graphically your willingness to identify with the city. An im-

portant principle of opinion-building—the identification principle—is involved. To accept an idea or a point of view, the people we are trying to reach must see clearly that it affects their personal desires, their hopes, or their interests. Identification has to do with self-interest. The problems which concern conservationists must be made meaningful to city people in ways that are observable and measurable from the point of view of their lives, in ways they will understand, in ways that will cause them to act.

How do we do this? Mainly it requires the ability to see things as others see them. We must project ourselves into the minds of other individuals or groups whose background and point of view may be quite different from our own. Such projection requires understanding and imagination, but you are imaginative people. Developing this ability to understand the attitudes and emotions of others will make the difference in bridging the communications gap which faces conservationists as they attempt to enlist city residents for their causes.

In order to further identify conservation groups with urban residents, we need to face the second block—that of helping these citizens to see their environmental problems as conservation problems and our goals as relevant to them. Perhaps the best way to achieve this is to try to bring it all closer to home. For example, those who live in the city do care about where their children play; they do want to be able to find a green belt and some open space in or adjacent to the city proper. These are goals which they can understand and can identify with close to home, and it is with these immediate concerns that conservationists must cope if they are going to reach and motivate this wider base.

People do not buy ideas separated from action—either action by the sponsors of the idea or action which people themselves can take to prove the merit of any idea. Unless a means of action is provided, people tend to shrug off appeals to do things.

Another basic axiom is that people must be involved in the selection of the goal in order to care about its achievement. Therefore, it behooves us, in opening our dialogue with the city, to attempt to find out what not only the leaders but the people want in the regeneration of their city.

When you know what the people who live there want for their neighborhoods, you will know how you can help them take some productive action to get it. One good case history of a small project in a major metropolitan area—a new park established or an old one saved—a place for walking, picnicking, relaxing, just beyond the city limits—a small waterfront area which offers brief respite from a bustling city—any of these things will do more to bring adherents to conservation from the ranks of the population of that city than thousands of acres added to a national park 2000 miles away.

The need is great for higher visibility to be given to the desire and the ability of conservationists to assist in achieving a quality environment in urban areas. We must devote as much thought, as much creativity, and commit as much personnel and funds to this end as to reaching citizens in other areas of American life. Conservation programs, publications, possibilities for action must be made a part of the program of every organized group in the city if the message is to be extended. A great deal more needs to be done through the schools and children need to be reached at a much earlier age.

Young urban people will determine the environmental decisions of tomorrow. Their attention must be caught today.

Go to the schools, the news media, the power structure, the community organizations, the government in the cities and volunteer your group's ideas, personnel, and funds to help in rejuvenation of this nation's cities—for failure to do so leaves the ultimate resolution of these questions in the hands of people to whom conservation is only a word.

These then are the challenges and choices which I see for conversationists who want to broaden their constituency. The challenges: lack of identification of city residents with conservation groups, lack of relevancy of conservation issues to city problems, lack of awareness of what conservationists can and are willing to do to aid in rebuilding our cities. The choices: to show an interest in urban problems and to meet urban residents on their ground and speak their language; to bring conservation causes closer to home; to make available and to commit with renewed vigor and open-mindedness, conservation's talents and money to these ends.

In our ultimate desire to preserve the future, we cannot afford to neglect the present. Entire generations grow with scarcely the existence of a green tree naturally grown or a cluster of wild flowers in a field. What dreams can we expect of eyes which have known only sooty concrete and steel? Evermore, urban man finds himself a particle of a metropolis but part of no community; alone against all the problems and nothingness a world beyond his ken has devised. And yet it need not be so. Never before in the history of the world has man possessed so much wealth and power, been master of so much technique and knowledge. It would truly be ironic if he could not bond all that experience and strength to the service of the preservation of his chosen home.

There is, in this room today, the imagination and the knowledge to lead the way to a new understanding of the relationship between conservation and the urban community. The continued survival of the new broader definition of conservation may very well depend upon how well the communication gap with this new constituency can be bridged. It deserves your best men and women, your greatest sense of purpose, your highest priority. Knowing you, I believe you will accept this challenge as you have so many others.

TO INSURE A LASTING AND SECURE PEACE

Mr. PROXMIRE. Mr. President, U Thant, Secretary General of the United Nations, has expressed his opinion that—

> The establishment of human rights provides the foundation upon which rests the political structure of human freedom; the achievement of human freedom generates the will as well as the capacity for economic and social progress; the attainment of economic and social progress provides the basis for true peace.

He is only one of many distinguished public figures who have been able to perceive the important relationship between the safeguarding of human liberties and the maintenance of world harmony and peace.

To insure a lasting and secure peace, nations and peoples all over the world must be ready to fully accept the idea that human rights can and must be secured through international cooperation. Today, I would like to talk about the violation of one of the most basic of human rights which occurs whenever forced labor is present.

The United Nations has not been the only world body working to improve the plight of the oppressed worker. In fact, the constitution of the International Labor Organization—ILO—recognizes that labor is not a commodity. The ILO constitution guarantees all human beings, irrespective of race, creed, or sex, the right to pursue both their material well-being and their spiritual development in conditions of freedom and dignity, of economic security and equal opportunity. To this end, the ILO has gradually built up a body of 128 international labor conventions and 131 recommendations, the majority of which deal with the protection of certain fundamental human rights and freedoms. One of these is the prohibition of forced labor.

Back in 1951, the U.N. and ILO jointly established an ad hoc committee to study forced labor. That committee found that systems of forced labor currently practiced by a number of nations not only threatened fundamental human rights but also jeopardized the freedom and status of the worker.

This report served as the stimulus for a series of other studies undertaken by the ILO, some in conjunction with the Economic and Social Council of the United Nations. On each occasion, sufficient incriminating evidence was found for repeated condemnations of forced labor as contrary to the principles of the United Nations Charter and the Universal Declaration of Human Rights.

In 1956, the ILO urged that action be taken towards the elimination of forced labor wherever it might exist. The U.N. commended the ILO for the action it had taken and expressed its interest in having the ILO take further action. The Economic and Social Council requested the Secretary General to transmit to the Director General of the ILO any information which might be received concerning forced labor. The ILO was, at the same time, invited to include in its annual report to the Council an account of the action taken in this field.

The following year, the International Labor Conference unanimously adopted a new convention—the abolition of forced labor. President Kennedy submitted this convention to the Senate in 1963 where it has lain dormant since then. The opposition to this treaty has centered around the interpretation of clause No. 4 of the first article which states:

> Each member of the International Labor Organization which ratifies this convention undertakes to suppress and not to make use of any form of forced or compulsory labor as a punishment for having participated in strikes.

Detractors of the convention claim that this clause could be construed to prohibit enforcing sanctions against public or Federal employees who strike their employers. For example, it has been suggested that clause No. 4 would pave the way for New York City teachers to strike in direct violation of New York State's Conlin-Wadlin Act. But former Attorney General Ramsey Clark has this to say about the Forced Labor Convention:

> (1) The provisions of the convention are wholly consistent with our Constitution and require no implementation by the Congress or by the legislatures of the States as the rights under these conventions have been enjoyed by American citizens for many years.
>
> (2) The provisions of this Forced Labor Convention actually fall far below our own existing standards of human decency.
>
> (3) The test as to whether a convention is domestic in nature is whether it is an appropriate matter of international concern

and human rights are clearly matters of great international concern.

(4) We must maintain our leadership in the field of human rights.

Mr. President, let us, as Members of the Senate, make the ratification of this convention one of our most pressing concerns. For as Professor Gardner has said:

Ratification will dissipate the embarrassing contradiction between our failure to ratify these conventions and our traditional support of the basic human rights with which they are concerned.

THE ABM AND THE GAITHER REPORT

Mr. JACKSON. Mr. President, I believe it can be useful to see the debate concerning the ABM in historical perspective, and particularly, in relation to certain findings of the Gaither Committee, on the issue of missile defense. That Committee is the largest independent study which has been made of deterrence and safety in the nuclear age, and it reported to President Eisenhower on November 7, 1957.

This historical perspective on the ABM debate is now possible, thanks to a statement submitted to the Senate Armed Services Committee this week by Robert C. Sprague, who, during the last half of 1957, directed the Gaither study. Dr. Sprague submitted his statement to the committee in response to a request from Senator STENNIS, chairman of the Armed Services Committee.

I believe Mr. Sprague's full statement will be of great interest to all Members of Congress, and I ask unanimous consent that the text be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ABM: DETERRENCE AND THE IMPACT OF A TECHNICAL BREAKTHROUGH IN THE NUCLEAR AGE

(A Statement to the Senate Armed Services Committee by Robert C. Sprague, June 23, 1969)

QUALIFICATIONS

Perhaps I should begin by outlining briefly my qualifications for having an opinion worth considering in connection with President Nixon's recommendation for the installation of a thin ABM system about which there is much controversy.

I graduated from the United States Naval Academy in 1920, from the Naval Post-Graduate School in 1922 and received an M.S. degree in Naval Architecture from MIT in 1924. Radio, later identified as electronics, had been my hobby since 1910.

In 1926 I founded the company now known as the Sprague Electric Company for the manufacture of a tone control device and a new type capacitor used in it. The company today is the largest manufacturer of basic "passive" electronic components—capacitors, resistors and inductors—and an increasingly important manufacturer of "active" electronic components—transistors and integrated circuits.

We have over 4,000 electronic and electrical equipment manufacturers as customers. Last year we supplied these basic components to over 200,000 different manufacturing specifications. Less than 3% of our business is directly with the United States Government and as a general supplier to the industry approximately 22% is renegotiable.

Our products have a high technical content and undergo rapid obsolescence. The company employs about 800 engineers and scientists, and about 100 of these are engaged in advanced research and development.

So I continually find myself, as I am sure do members of the Committee, in the position of having to make important decisions on priorities and essential expenditures in areas in which I am not a professional in a technical sense.

I completed my education prior to the discovery of quantum mechanics, nuclear physics, and solid state physics. Yet I have to make important decisions involving new technologies in which I do not have technical expertise and which can have a dramatic impact on the security and profitability of the company, and about which our scientists and engineers have frequent disagreement!

I believe I may be able to make a useful contribution to the Committee's consideration of the ABM from two points of view which, I believe, from reading the testimony already submitted, are new to the Committee.—

First, for the reasons just stated and having to do with important business decisions in highly technical areas.

Secondly, as a citizen outside of government who, between the fall of 1953 and the first of January, 1958, spent the equivalent of four years concentrating on problems of air defense—first against bombers carrying atomic weapons, then bombers carrying nuclear weapons and finally against missiles carrying nuclear weapons. During this period I made such a study for the Preparedness Sub-committee of the Senate Armed Services Committee.

My final report was submitted to President Eisenhower, following which I was appointed civilian consultant to the National Security Council on our Continental Defenses. In 1954 I was also advisor to the Killian Committee which studied our strategic defensive and offensive position vis-a-vis Russia, including a study of our intelligence activities and the problem of the security of our worldwide communications in the event of a nuclear attack.

Finally, during the last half of 1957, I directed the so-called "Gaither" Study which, among other things, was charged with investigating the deterrent value of our retaliatory forces and the economic and political consequences of any significant shift of emphasis and direction in defense programs.

During this period, I had access to all classified material which might conceivably be of importance to the particular matter at hand, including policy papers of the National Security Council, reports of annual War Gameings of postulated future nuclear attacks on the United States; classified documents of the Defense Department, including those of the Joint Chiefs of Staff; classified studies made for various branches of the Government by not-for-profits, such as by the Rand Corporation; National Intelligence Estimates of the Central Intelligence Agency and of the Intelligence Branches of the Several Services; the results of the atomic and nuclear tests available from the Atomic Energy Commission, including the "Ivy" test in the Pacific—the first test of a fusion device; and finally, information, classified and unclassified, from the Office of Defense Mobilization.

In addition, I personally visited typical installations of the Air Defense Command and of the Strategic Air Command. I was also briefed by the experts at MIT and Lincoln Laboratories on work going on there in connection with active defense plans and programs, including the SAGE Air Defense Program.

I also received numerous personal briefings by senior military personnel and weapons and systems planners and analysts.

Since that time, I have kept reasonably up-to-date as a Trustee of the Mitre Corporation and of the Hudson Institute.

When asked to join the Committee (established by Dean Acheson and Paul Nitze) to Maintain a Prudent Defense Policy, I made arrangements for classified briefings so that I could up-date the knowledge which I acquired during the 1950's in this area of national interest.

To my surprise, I found this rather easy to do as I still retain, in an approved security file, my full notes on the classified material to which I was exposed during these several endeavors. *I found that nothing really has changed in Air Defense since January 1, 1958 except the numbers—the number of missiles available to the U.S. and the U.S.S.R., the improved accuracy of the missiles, the size of the warheads, and improvements in the radars and computers.*

IF DISTINGUISHED SCIENTISTS DISAGREE?

There is, I believe, an analogy between the position in which members of the Senate Armed Services Committee find themselves in considering the ABM matter and the position in which I find myself from time to time in determining priorities and approving large expenditures (not large by national standards but large relative to my company's total capital).

In my 43 years in industry and as a consultant in National Defense matters I have formed two strong opinions which are today Cardinal Rules I follow in making important decisions in highly technical areas:—

Rule No. 1: In assessing the potential of any important new field of technology involving new processes or systems—*Half the scientists, or at least a large fraction, are usually wrong.*

Rule No. 2: If a significant percentage of scientists agree, or only sometimes if one or two agree, that something new can be done—*It can be.*

Just three examples of the first of these rules in the defense area are the development of nuclear warheads based on the fusion reaction, the development of long-range ballistics missiles with high accuracy, and particularly the development of the Polaris missile system.

In the 1950's when the Killian Committee and the so-called "Gaither Committee" looked at the Polaris system, the successful completion of that program was given a very low probability. Indeed, it was much lower than the probability of success of an ABM system is considered to have at this time.

The problem of underwater navigation to a point so accurate in the ocean that a missile can be launched with any reasonable probability of hitting a target was unsolved, the problem of developing a stable platform from which to launch solid-propellant missiles under water had not been solved nor had solid-propellant missiles themselves been perfected, and a communication system to permit continuous worldwide contact with our submerged submarines on station had still to be proven.

In civilian affairs, one of the most dramatic instances of technical experts disagreeing on a comparatively simple matter appeared in testimony leading to a settlement of one of Boston's greatest disasters and most complicated litigation.

On January 15, 1919, a huge molasses tank located on Atlantic Avenue in Boston and owned by the U.S. Industrial Alcohol Co. burst, pouring a stream of molasses down Atlantic Avenue in some cases over three feet deep. Thirty people lost their lives, most of them by drowning in molasses; numerous horses, dogs, and cats were killed; and there was a great property damage. Suits for very large damages were brought by 129 plaintiffs! The Superior Court in Boston turned over this complicated case to an "Auditor" in the person of Mr. Hugh Ogden. Mr. Ogden was a distinguished Boston attorney who, towards the end of World War I, was Judge Advocate General of the Rhine District.

Whether the company was or was not liable apparently depended on whether "secondary" stresses in the tank were the cause of the failure or whether the failure was caused by "primary" stresses and consequently improperly designed.

Distinguished technical experts testified on both sides of the question. In his findings and report to the Court, Mr. Ogden made this thought-provoking statement:

"I have listened to men upon the faith of whose judgment any capitalist might well rely in the expenditure of millions of structural steel, swear that the secondary stresses in a structure of this kind were negligible and I have heard from equally authoritative sources that these same secondary stresses were undoubtedly the cause of the accident. Amid this swirl of polemical scientific waters it is not strange that the auditor has at times felt that the only rock to which he could safely cling was the obvious fact that *at least one-half the scientists must be wrong.*" (Italics Mine.)

I believe Mr. Ogden's conclusion merits serious consideration when considering the conflicting technical testimony before your Committee.

IMPACT OF A TECHNICAL BREAKTHROUGH

My company's business is highly competitive and technical. An important technical breakthrough by our competition could be fatal if not matched at a particular point in time by our own proven competence and implementation. I will give you two dramatic examples. In the early 1950's the invention of the transistor was a technical breakthrough with dramatic implications for the electronic components industry, not fully understood nor appreciated at that time. Later, in the early 1960's, monolithic integrated circuits were invented, which made possible functional circuits involving 40 and more discrete components—capacitors, resistors, diodes and transistors—all in an area the size of the head of a pin.

In the early days of both these inventions there were many uncertainties and disagreements concerning the eventual costs, reliability, and performance of these devices. Initially they were outrageously costly and very unreliable.

In considering transistors and their possible impact, I received strongly divergent opinions from our scientists, several maintaining that they would never be important commercially and others maintaining that in time they would replace vacuum tubes.

So, we hedged our bets by setting up a modest research and development activity. We did not do so as daringly and with the money and manpower several of our competitors allocated to their development of these new devices, and it was not until recently that we became large volume producers of silicon transistors. Although we vacated an early dominant position in our industry for these devices by our lack of aggressiveness, due to continuing research since the early 1950's we had the basic technical competence which made possible our late commercial start. But others are the present leaders . . .

The matter of integrated circuits, however, was even more critical. For transistors mostly replaced vacuum tubes and opened up new markets not possible to tube circuits. The only competitive impact here was loss of opportunity in a new field of technology and the impact that the change to transistor circuits in the industry was to have on components—capacitors and resistors—and particularly components designed for tube circuits.

But, with integrated circuits we were faced with the possibility that, if they proved reliable and could be economically produced, we might lose a large part of our existing business in capacitors and resistors because of this new technology. So, here was a question, if not of survival, at least of a dramatic impact on our regular business.

About six years ago I was asked to give a talk in Chicago to members of our industry on the future of integrated circuits. At that time the production of these devices was very small and their cost so astronomical that they could only be used in military and space applications where size and weight were of the utmost importance.

The highest recovery then achieved on an individual silicon device, a transistor or diode, was around 80%—in other words, eight shippable units out of ten started down the production lines. As there were an average of about 40 silicon devices processed on a single chip of silicon at that time, all of which had to work to create a functional circuit, it appeared that the number of recoverable units could be calculated from the equation $(0.80)^{40}$. (*This is the type of failure prediction that has been presented to your committee in connection with missiles and the ABM system.*) It works out that $(0.80)^{40}$ is a small fraction of 1% (about 0.14%) and that was the order of the industry's experience at that point in time. As a result, I made a statement to the rather sophisticated audience which I was addressing that these devices could have important military and space applications, but because of their very high costs they would never be competitive with discrete components for use in entertainment electronics equipment, i.e. radios, televisions, tape recorders, etc. And no one disputed my calculation nor my statement!

Fortunately, in spite of what appeared to be valid mathematics at the time and based on the strong recommendation of only one of our scientists that *the risk of being wrong was too great to hazard,* we initiated an active development program in this new area of technology. We set up a pilot line at considerable expense, staffed it with 40 scientists, engineers, and technicians and undertook to manufacture, on a pilot basis, a particular integrated circuit. You may be interested, but surprised, to learn that this costly operation produced on the average 2500 units a week for nine months before a single satisfactory unit was produced! This seemed to prove my earlier mathematics were valid. But the week we produced our first satisfactory unit, 30% were good!

And today, functional circuit chips, more complicated than the one above described, are being produced in our Worcester plant with recoveries in the 25–30% area and a new integrated circuit device on a prototype line is being produced with a yield of 65%. Further, the cost of these devices this year reached a level where they are now competitive with assemblies of discrete components performing the same function. As a result they are being increasingly used in television and radio sets!

Sprague Electric's investment to achieve a competitive position in this vital area now totals around 33 million dollars. For a company with capital of around 60 million dollars, this is a really significant investment in an area where we believe it had to be made *in the event what has happened might happen, as viewed from a point in time six years ago.*

ABM is *such* a technical breakthrough in the business of maintaining an "Assured Deterrent" as were the invention of the transistor and later of monolithic integrated circuits in making possible dramatic improvements in electronic components. Other important breakthroughs in the weapons business were warheads using the fusion reaction and the development of accurate long-range ballistic missiles.

It also takes from five to ten years to develop a new system or process, work out the bugs and develop its full potential. This cannot be done by only continuing research and development. A reasonable lead time (which could be quite short) in achieving this competence can be very critical in a competitive sense.

The United States does not have 100% assurance that a satisfactory Arms Control Treaty will be reached with the Soviets or, if negotiated, that it will be faithfully adhered to by them anymore than my company can have reasonable assurance that a competitor will not take advantage of a technical breakthrough to destroy us. Therefore, it behooves one, either as a company or as a nation, to exploit to the fullest any such important technical breakthrough which has a potential of placing us as a nation in an intolerable bargaining position at some uncertain time in the future. The "Cuban Missile Crisis" was resolved in our favor because we were at *that* time in a very strong and more than equal competitive position.

The resources of the United States, despite our domestic problems, are more than adequate to exploit the technical breakthrough of ABM—involving the expenditure of a few billion dollars per year of our gross National Product of 900+ billion per year (approximately one-tenth of one percent of our GNP). My company spends about 8% of our sales dollar to try to insure that we won't be destroyed by technical breakthroughs of our competitors.

We are under continuing pressure to improve the lot of our workers—better personal identification, higher wages, more fringe benefits, etc. etc.—just as the United States has major problems to improve our cities and the lot of our underprivileged citizens. But, in spite of these pressures we must do what needs to be done, not only to survive but to remain in a strong competitive position.

THE "GAITHER" REPORT

To place the debate concerning an ABM in historical perspective, it may be worthwhile mentioning several findings of the so-called "Gaither Committee".

This was probably the largest independent study which has been made of deterrence and Survival in the nuclear age. Mr. Rowan Gaither was the original Director of the study and I was his Co-Director. When he had to withdraw during the middle of the study due to illness, I was appointed Director and Mr. William J. Foster was named Co-Director.

The report of the panel was made to President Eisenhower and members of his Senior Civilian and Military Staff on November 7, 1957.

One of the assignments of the panel was to study the deterrent value of our retaliatory forces and the economic and political consequences of any significant shift of emphasis or direction in defense programs.

The panel therefore examined active and passive defense measures from two standpoints—their contribution to deterrence, and their protection to the civil population if war should come by accident or design.

This was a very large effort involving some 113 full-time and part-time staff, advisors and consultants. The participants are shown in Appendix B.

The panel, in the preparation of its report benefitted from information sources of broad scope, and, in many cases, of great sensitivity; and the membership assessed the implications of this knowledge and directed its findings to the problems confronting the panel.

The Steering Committee had full responsibility for the report.

It is of possible interest to note that the Steering Committee and its technical advisor, who were collectively responsible for the final report, was made up of one college president; a senior member of a prominent consulting firm; a senior executive of a large foundation and more recently a college president; three scientists; a staff member of the prominent not-for-profit advisors to the Government; the president of the Brookings Institution; and three businessmen.

I might also mention that the members of the Steering Committee, who were responsible for the conclusions, recommendations

and final drafting of the report, were *unanimous* in their recommendations.

It is particularly interesting at this time that one of the highest priority recommendations was for an ABM system to protect our SAC bases against a possible future Russian missile attack.—In other words, a "Safeguard" missile defense system!

The report also contained a time table forecasting the *Characteristics* and *Effects* of four future periods, the one for the 1970–75 period, as it turns out, with great accuracy. Also stated were the devastating implications of a technical breakthrough during this period by either the U.S. or the U.S.S.R. Specifically mentioned as such a technical breakthrough was a *high certainty missile defense against ballistic missiles.*

As only the number, sizes of nuclear warheads and accuracies of the missiles now available to the U.S. and U.S.S.R. are different, and the components of the System—Radars, Computers and Missiles—are much further developed than those in the Nike-Zeus system considered at that time, *the need for installation of an ABM system today appears to be even more valid than it was in November of 1957.*

THE PROBLEM OF COMPLEXITY

I can assure the Committee, based on my early exposure in depth to the problems of developing a reliable missile system, nuclear warheads and the Polaris missile system and other complex systems, that while the ABM system is complex, the components for the proposed ABM Safeguard system are more fully advanced and better tested than were the components of any of these other systems when I first studied them.

There is one point in connection with the problem of software which may be worth mentioning. Software for programming the computers at the missile sites, *while essential,* is not beyond the present state of the art. It is more complicated, but not dramatically so, than the software programming for the Space Track Radar in Florida, which successfully tracks and identifies literally thousands of space objects, satellites and fragments.

What is more complex, *but not essential,* at least, initially, is the netting of the system to make it even more effective. With an adequate effort I have no doubt that this software programming can be worked out by the time the radars, missiles and computers are located on sites in 1973 and 1974, if a large and competent professional team is assigned to the job.

It is also certain that the programming and effectiveness of the system can be improved over the years and *it is exactly this type of improvement we urgently need to work on, as soon as possible, with a deployed working system.* We will urgently need this experience as the Russians now have the opportunity to obtain some of this experience with their ABM system around Moscow, even though their missiles may be less effective than our Spartan and particularly our Sprint missiles.

Of all the testimony and literature I have read on the subject, the statement before your Committee, by Freeman J. Dyson of the Institute for Advanced Study at Princeton, was most to the point and I quote:

"In the long run the battle between offensive and defensive technology is a battle of information. If the defense knows where the offensive warheads are, it is not too difficult to destroy them. For the last 20 years the offensive has had an overwhelming advantage, but this advantage is being reduced as defensive information-handling capability improves. In the long run, I believe the defense will prevail because the defense will have more accurate and timely information than the offense. Defensive batteries within a hundred miles of the battle should ultimately be able to out-maneuver incoming offensive vehicles controlled from a command center 5000 miles away on land or in a submarine off-shore. The offensive command will be fighting the battle blind, without any possibility of quick reaction to defensive moves. I consider that it is only a question of time, perhaps ten or twenty years, before these inherent advantages of the defense become actual. The time that it will take to overturn the doctrine of the supremacy of the offensive will of course depend on *political decisions* as well as on technological developments." (Italics mine.)

It took over ten years to develop the SAGE Air Defense System. Unfortunately, the entire system was never implemented as designed. For reasons of economy the control centers, including the large vital computers, were placed in vulnerable above ground buildings which could be destroyed by low over-pressures, instead of in hardened sites as planned. Some protection, however, was secured later by dispersal of the system.

It also took ten years and more to develop accuracy, hardening and penetration aids for our Ballistic Missile Systems.

Much has been mentioned about the invulnerability of Polaris as an "Assured Deterrent" and there is no indication whatsoever that this position is not valid today. However, it is not inconceivable to imagine developing a system to destroy essential underwater communication from the main land by introducing artificial static at the wave lengths used or as needed in the event of a crisis situation. Nor does it seem entirely impossible, with adequate effort, to develop a capability of tracking our Polaris submarines to their designated underwater stations. And in a crisis situation to destroy them or render them ineffective.

CONCLUSIONS AND RECOMMENDATIONS

In conclusion, I consider it absolutely essential to our competitive position and continuance as the leader of the Free World to do whatever is necessary to be in the position of operating a deployed ABM system, so that there would be little possibility that our major national "competitor", the U.S.S.R., or any other nation could, overtly or covertly, develop in the years immediately ahead greater competence in this new important area of deterrent technology.

It is also my belief, for the reasons stated, that it might drastically weaken our bargaining position with the Soviets during the mid-1970's if we do not proceed at this time to deploy the ABM system proposed by the President.

Finally, I invite your attention to a quotation from Herman Kahn, one of the contributors to a new book, *Why ABM? Policy Issues in the Missile Defense Controversy.* This is a collection of papers by the staff and fellow members of the Hudson Institute, of which Mr. Kahn is the director, and which will be published early next month:

"It would greatly and appropriately help the cause of the proponents of ABM if ABM were generally perceived (and presented) as a shield designed to facilitate both current arms control negotiations and, eventually, comprehensive and lasting arms control measures. It is important for the two objectives to be pursued in parallel and jointly."

I, therefore, respectfully recommend that implementation of the "Safeguard" ABM system be recommended by your committee and funded by the Congress.

APPENDIX A

BIOGRAPHICAL HIGHLIGHTS OF THE STEERING COMMITTEE OF THE GAITHER COMMITTEE

Robert C. Sprague, *Director*—Chairman and Founder of Sprague Electric Company; Consultant on Continental Defense to National Security Council, 1954–58; Director of "Gaither Committee"; Ex-President and Chairman of Radio-Electronic-Television Manufacturers' Association; Fellow of The Institute of Electrical and Electronics Engineers; Life Member of Corporation of Massachusetts Institute of Technology; Former Chairman of Federal Reserve Bank of Boston.

William C. Foster, *Co-Director*—Under-Secretary of Commerce 1946–48; Deputy Administrator of ECA, 1950–51; Deputy Secretary of Defense 1951–53; Vice President, Olin Mathieson Chemical Corp. 1955–58; Director, U.S. Arms Control & Disarmament Agency 1961–.

James P. Baxter III—President, Williams College, 1937–61; Deputy Director, OSS, 1940–43; Author and Pulitzer Prize Winner in History (1947).

Robert D. Calkins—Dean of School of Business, Columbia University 1941–47; Vice-President General Education Board 1947–52; President, the Brookings Institution, 1952–1967; Vice-Chancellor and Professor of Economics, University of California at Santa Cruz, 1967–.

John J. Corson—Deputy Director General UNRRA 1944–45; Executive Washington Post 1945–50; Management Consultant, McKinsey & Co. 1951–66; Professor of International Affairs, Princeton University 1962–66; Author.

Edward P. Oliver, *Technical Advisor*—Senior Staff Member, Systems Science Department, Rand Corporation; Formerly Rand Project Leader on Manned Bomber Study, Liaison Representative at SAC Operations Analysis Division and Liaison Representative at Headquarters, USAF.

James A. Perkins—President, Cornell University 1963–69; Vice President, Swarthmore College 1945–50; Vice President, Carnegie Corp. 1951–53; Trustee, Rand Corp.; Member of Advisory Committee to U.S. Arms Control; Member of President's Special Committee on Nuclear Proliferation; Member, Presidential Panel of Consultants on Foreign Policy.

Robert C. Prim—Research Mathematician, Bell Telephone Laboratories, 1949–58; Director, Mathematics and Mechanical Research, Bell Telephone Laboratories, 1958–61; Special Assistant to the Director, Defense Research & Engineering, 1961–63; Vice President, Research, Sandia Corp. 1963–64; Vice President, Data Systems Division, Litton Industries 1964

Hector R. Skifter—Member, National Defense Research Committee 1942–45; President, Airborne Instruments Laboratories, Inc. 1945–59; Assistant Director of Defense Research & Engineering, 1959–60; Vice President, Cutler-Hammer, Inc., 1960–64; Fellow of the Institute of Electrical and Electronics Engineers. (Deceased, 1964)

William Webster—Former Chairman of the Research and Development Board of Department of Defense; President and Chief Executive New England Electric System; Former Deputy Chairman, Federal Reserve Bank of Boston.

Jerome B. Wiesner—Staff Member, MIT Radiation Laboratory, 1942–45; Associated with Massachusetts Institute of Technology since 1946 in various posts, including Associate Director of Research of Laboratory for Electronics (1949–52), Dean of Science (1964–66) and Provost of the Institute (1966-); Chairman, The President's Science Advisory Committee and Special Assistant to the President on Science and Technology, 1961–1964; Fellow of the Institute of Electrical and Electronics Engineers; Author.

APPENDIX B

MEMBERSHIP OF THE GAITHER COMMITTEE

STEERING COMMITTEE

Director—Sprague, Mr. Robert C., Sprague Electric Company.

Co-Director—Foster, Mr. William C., Olin-Mathieson Chemical Corp.

Baxter, Dr. James P. III., Williams College.

Calkins, Dr. Robert D., Brookings Institution.

Corson, Mr. John J., McKinsey and Company.

Perkins, Dr. James A., Carnegie Corporation.
Prim, Dr. Robert C., Bell Telephone Labs.
Skifter, Dr. Hector R., Airborne Instruments Labs.
Webster, Mr. William, New England Electric System.
Wiesner, Professor Jerome B., Massachusetts Institute of Technology.
Technical Advisor—Oliver, Mr. Edward P., Rand Corporation.

ADVISORY PANEL

Gaither, H. Rowan, Jr., Ford Foundation.
Carney, Admiral Robert B., Westinghouse Electric Co.
Doolittle, General James H., Shell Oil Company.
Hull, General John E., Manufacturing Chemists Assoc.
Kelly, Dr. Mervin J., Bell Telephone Laboratories.
Lawrence, Dr. Ernest O., Radiation Laboratory, University of California.
Lovett, Mr. Robert, Brown Bros., Harriman.
McCloy, Mr. John J., Chase Manhattan Bank.
Stanton, Dr. Frank, Columbia Broadcasting System.

SCIENCE ADVISORY COMMITTEE—SUBCOMMITTEE

Fisk, Dr. James B., Bell Telephone Laboratories.
Killian, Dr. James R., Jr., Massachusetts Institute of Technology.
Rabi, Dr. I. I., Science Advisory Committee.
Higinbotham, Dr. William A., Brookhaven National Lab.

EXECUTIVE STAFF

Beckler, Mr. David Z., Science Advisory Committee.
Ford, Lt. Colonel Vincent T., United States Air Force.

INSTITUTE FOR DEFENSE ANALYSES OFFICERS

McCormack, General James, Jr., President.
Hill, Dr. Albert G., Vice President and Director of Research.

PROJECT MEMBERS

Alexander, Dr. Sidney S., Massachusetts Institute of Technology.
Barrer, Mr. Donald Y., IDA/WSEG.
Berkner, Dr. Lloyd V., Associated Universities, Inc.
Bissell, Mr. Richard M., Central Intelligence Agency.
Booth, Dr. Eugene T., Columbia University.
Booth, Mr. Richard P., Bell Telephone Laboratories.
Bouricius, Dr. Willard G., International Business Machines Corp.
Bradley, Dr. William E., Philco Corporation.
Butler, Mr. William E., Chase Manhattan Bank.
Carulli, Mr. Leonard, McKinsey and Company.
Clifford, Dr. Joseph M., IDA/WSEG.
Contos, Dr. George A., IDA/WSEG.
Cross, Mr. James E., Center for International Study.
Daniel, Dr. John H., IDA/WSEG.
Elliott, Dr. Edwin O., Operations Evaluation Group.
Emberson, Dr. Richard, Associated Universities, Inc.
Frantz, Mr. William J., Boeing Aircraft Corporation.
Fredericks, Dr. J. Wayne, Ford Foundation.
George, Mr. Edwin B., Office of Defense Mobilization.
Hall, Dr. William M., Raytheon Manufacturing Co.
Hansen, Dr. Robert J., Massachusetts Institute of Technology.
Hanson, Dr. Joseph O., U.S. Information Agency
Hartgering, Lt. Colonel James, Walter Reed Medical Center.
Hawkins, Mr. Robert A., AVCO Manufacturing Company.
Horton, Mr. H. Burke, Office of Defense Mobilization.
Hutchins, Mr. William R., Raytheon Manufacturing Corp.
Jones, Mr. Chandler W., Narragansett Electric Company.
Keeny, Mr. Spurgeon M., Jr., Office of Secretary of Defense (R&E).
Klotz, Mr. John W., Office of Secretary of Defense (R&E).
Knox, Omar E., Colonel, USAF, IDA/WSEG.
Kybal, Mr. Dalimil, Lockheed Aircraft Corp.
Lawson, Dr. Joel S., University of Illinois.
Lawwill, Dr. Stanley J., Strategic Air Command.
Lincoln, Colonel George A., United States Military Academy.
Lindsay, Mr. Franklin A., McKinsey and Company.
Longacre, Dr. Andrew, Syracuse University.
Marshall, Dr. Andrew W., Rand Corporation.
McMillan, Dr. Brockway, Bell Telephone Laboratories.
McMillan, Dr. Edwin M., University of California.
McRae, Dr. Vincent V., Operations Research Office.
Merritt, Dr. Melvin L., Sandia Corporation.
Michael, Dr. Donald N., Dunlap & Associates.
Minshull, Mr. William H., Jr., Hughes Aircraft Corporation.
Navoy, Mr. Anthony J., IDA/WSEG.
Nelson, General Otto L., Jr., New York Life Insurance Co.
Newmark, Dr. Nathan M., University of Illinois.
Nichols, Mr. Guy W., Jr., New England Electric System.
Nitze, Mr. Paul H., School of Advanced International Studies.
Pechman, Dr. Joseph H., Committee for Economic Development.
Popenoe, Mr. Oliver, Office of Defense Mobilization.
Rodgers, Dr. Franklin A., Lincoln Laboratory.
Rohrbacher, Dr. Bruce W., McKinsey and Company.
Sanchez, Mr. Luis R., Rand Corporation.
Siebert, Dr. William McC., Massachusetts Institute of Technology.
Smith, Lt. Colonel Glen A., Central Intelligence Agency.
Stockley, Mr. Robert, Federal Civil Defense Administration.
Stone, Dr. Donald C., Springfield College.
Strope, Mr. Walmer E., U.S. Naval Radiological Laboratory.
Taylor, Mr. Norman H., Lincoln Laboratory.
Van Atta, Dr. Lester, Hughes Aircraft Co.
Walters, Mr. Lawrence R., IDA/WSEG.
White, Mr. William L., Stanford Research Institute.
Whitmer, Dr. Robert, Ramo-Wooldridge Corp.
Wine, Major Paul H., USAF, NORAD.
Wood, Mr. Marshall K., Office of Secretary of Defense (S&L).
York Dr. Herbert F., University of California.

SCHOOL DESEGREGATION

Mr. MONDALE. Mr. President, last week it was reported that the Nixon administration is considering softening the school desegregation guidelines. These reports deeply disturbed me, and a number of other Senators in both parties, who have in recent months been urging the administration to support the existing guidelines, and to continue the established practice of fair and firm implementation of the school desegregation program.

The tragic consequences of any softening of these desegregation guidelines were clearly spelled out in an editorial in this morning's issue of the Washington Post. The editorial, entitled "A Double Standard for Desegregation," states very accurately that a relaxation of the desegregation deadline "will have rewarded those who have held out the longest and humiliated those who have argued to their white southern brethren the necessity and advantage of going along with the law."

Mr. President, I ask unanimous consent that this editorial, a copy of the letter I sent President Nixon last Friday protesting any move to soften the school desegregation guidelines, and my statement on school desegregation guidelines be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A DOUBLE STANDARD FOR DESEGREGATION

"He told us that he was going to do more for the underprivileged and more for the Negro than any President has ever done." The remark was made by Hobson Reynolds, head of the Negro Elks Organization, upon emerging from a meeting between half a dozen Negro leaders and President-elect Nixon in January, a short while before the inauguration. Since that time it has become plain that anything Mr. Nixon might have had in mind in the way of domestic programs with a price tag, would have to yield to the pressures of a costly war and an overheated economy.

One would have surmised, however, that this circumstance would put an obligation on the President to affirm his good faith in other ways. It hasn't quite turned out like that. On the contrary, where civil rights of the admirably old-fashioned, cost-free, constitutional kind are concerned, the only signal the Administration has emitted clearly is one of internal confusion and weakness. The most ordinary move in the execution of laws on the books becomes, somehow, the subject of an endless political debate within the Administration; decisions are fought over where none are required to be made, since the statutes and court interpretations of them already exist; and—incredibly—there is even some movement toward undoing the body of law that has been so painstakingly built up in the past few years by Republican and Democratic legislators alike. The Voting Rights Act of 1965 is in jeopardy. Now we learn that there is terrific pressure within the Administration to reinterpret a Supreme Court ruling affecting HEW's enforcement policies under Title VI of the Civil Rights Act of 1964—which is to say, the school guidelines.

If the Administration really means to slip the autumn of 1969 deadline which has been set for compliance with the terms of what was after all a 1954 Supreme Court decision, it will have done a number of things. First it will have established two sets of standards for desegregation of schools in the South: one judicial standard and one which is more lenient fixed by itself. It will also encourage those several hundred Southern school districts that are in the reluctant process of yielding at last to a Court ruling more than fifteen years old to try to renegotiate their plans. It will have rewarded those who held out longest and humiliated those who argued to their white Southern brethren the necessity and advantage of going along with the law.

The social ordeal of the South will go on for a long while; but the legal tests in this

matter were nearing an end. A show of weakened resolve in Washington can only prolong the agony and create more disruption than it can possibly contain.

JUNE 20, 1969.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am extremely disappointed to learn that the Administration is considering softening the school desegregation guidelines. I have followed the Title VI school desegregation program very closely over the past few years, and have in recent months been critical about certain statements and actions of the Administration with respect to this program.

My criticism ceased, however, when Secretary Finch stated clearly and unequivocally on several occasions recently that the current school desegregation guidelines are going to be enforced. I applauded the Secretary for his statement in an April 21 press conference that "the guidelines which are in existence are going to be enforced," and when he endorsed the existing guidelines more specifically in a letter of May 8 to Senators Williams (N.J.), Eagleton, Hughes, Cranston and myself. The Secretary wrote that:

"The law is clear, and so is our responsibility to enforce it. We are continuing to require school systems which have failed under freedom of choice plans to abolish discrimination to adopt a more meaningful and effective method which will accomplish the task by the fall of 1969. We shall allow delays beyond that date only where there are substantial impediments, such as the need for new construction. This is in accordance with the policy followed by the previous Administration. I believe it is important that the Title VI program maintain the momentum that has been established. . . ."

This position must be supported clearly and firmly. The school desegregation program is at a critical point, and any suggestion of change, uncertainty or vacillation will destroy the progress in recent years, and be a breach of faith with the school districts that have voluntarily come into compliance.

As one who is deeply concerned about the fair and firm enforcement of civil rights programs, I urge you to clarify this ambiguous situation by publicly announcing that your Administration will support the current school desegregation guidelines.

Sincerely,

WALTER F. MONDALE.

STATEMENT OF SENATOR WALTER F. MONDALE ON SCHOOL DESEGREGATION GUIDELINES

The commitments of this nation to black school children in the South are long overdue. Since the 1954 Supreme Court decision in *Brown* v. *Board of Education,* southern school districts have been obligated to end school segregation and to disestablish dual school systems. Yet 16 years later, equal educational opportunity is still not a reality for the great majority of black children living in the South.

Despite this fact and despite long delays of Southern school districts to come into compliance with Title VI of the Civil Rights Act of 1964 and the continuous mandates of the courts, the Nixon Administration is reportedly now planning to give still more time to foot-dragging school districts not to comply by softening the school desegregation guidelines. Reportedly, the Administration is considering either eliminating the 1969–70 deadline for ending the dual school system and/or reinterpreting the Supreme Court's *Green* decision requiring school boards to come up with desegregation plans that promise realistically to work *now.*

The principles governing school desegregation have been firmly established in law, administrative and educational practices since enactment of Title VI of the Civil Rights Act of 1964. To change, formally or informally, the school desegregation guidelines at this point will do irreparable harm to black and white school children in the South who are entitled to an integrated quality education, to the cause of integration in the nation, to the moderate, law abiding white Southern leadership who have attempted to comply with the law, and to the tenuous remaining confidence of many black leaders and black citizens in the ability and willingness of the Federal Government to honor its commitments to them—commitments promised since 1954.

Those school officials who have been the most vocal against the guidelines are the very ones who have done the least to comply. Their contention that it is impossible to comply with the guidelines is false and belied by the hundreds of districts who have complied. Moreover, their bad faith should not be now rewarded with Federal capitulation which justifies their foot-dragging stance and undercuts progress already made in other law abiding school districts.

HEW officials estimate that 1,016 school districts have completely eliminated the dual school system since September of 1965. Another 234 are scheduled to complete the process this Fall, and another 96 have approved HEW plans to eliminate their dual school systems in September 1970. While many of these school districts experienced little difficulty in complying because they are small or have relatively small numbers of black students, a large number of this group are substantial districts with large numbers of black students. Leadership and a firm stand by Federal and local officials is the key to the progress in these districts.

(Attached is a more detailed memo which gives specific examples of some school districts in the South who have achieved substantial desegregation).

School districts with good desegregation plans already approved by HEW are moving now to renegotiate such plans in view of the 1970–71 desegregation plans developed by HEW in 21 South Carolina school cases under court order. Aiken, South Carolina, which has a 33% black student population, which is 35% desegregated this year, and which has a good plan, has withdrawn its plan and is now attempting to negotiate a 1970 plan with HEW. Another South Carolina school district, Chester County, which has a 48% black student population and is presently 35% desegregated, has also notified HEW that it will not deliver on its 1969–70 plan to completely eliminate the dual school system. This kind of action represents the trend. It is encouraged by HEW's lack of firmness. Further changes by HEW and the Justice Department at this point can only erode the hardwon progress of a decade, reward lawlessness and say clearly to minorities that the Nixon Administration will disregard their needs.

At a time when we hear great cries for easing spending in our domestic programs, great talk of inflation, and see the slashes in budgets of our domestic programs, the least this Administration can do is to enforce existing laws where no great outlays of money are required. To do less is to do nothing. To do less is to subvert the law. To do less is to encourage bitterness. To do less is to rob tens of thousands of black and white school children in the South of an opportunity to have a decent, good, integrated education and to learn together in preparing for this country's future.

A DRAFT PROPOSAL

Mr. BOGGS. Mr. President, William Prickett, a very perceptive lawyer from Wilmington, Del., has written an article about the draft in the June issue of the American Bar Association Journal.

Mr. Prickett states that this country needs a draft law which "combines certainty and fairness."

He proposes a system under which every young man in the country perform service for his country—in the Armed Forces, if he is able, in one of the various civilian services if he is not. Mr. Prickett proposes liberal exemptions should serve longer when they go on active duty.

I believe that Mr. Prickett has made a careful, objective study of the Selective Service System and has made some thoughtful proposals. He is to be commended for it.

Mr. President, I ask unanimous consent to have Mr. Prickett's article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DRAFT PROBLEMS: A BOLD ANSWER

(By William Prickett)

Solicitor General Erwin N. Griswold, former dean of the Harvard Law School, spoke with grim clarity in a speech before the American Law Institute in May of 1968 about the growing lawlessness that marks American society, particularly its youth. As a factor "contributing to emotion and to strong reaction," he cited our draft laws—their inequities and the real or apparent arbitrariness of administration. "To some extent," he said, "this [arbitrariness] is inherent in the system of local administration—which has a measure of merit—but in our colleges and universities, there are students who come from many different places, and the different policies of different draft boards sometimes stand out rather starkly when they are placed side by side."

A less widely recognized impact of the draft is the presence in our universities, particularly our graduate schools, of many students who, though able, are not really motivated toward intellectual life or professional training and who therefore take their energy out in other activities. Yet another effect is the increase in early marriage and parenthood, the Dean pointed out.

"Finally," he observed, ". . . the draft has all but made effective academic discipline impossible."

Why is this? The students who have misbehaved at Columbia, or California, or Stanford, or wherever, should be expelled, you say. Their conduct surely merits that, as far as the University is concerned. But what happens if they are expelled, or even suspended for a year? They cease to be students, they are immediately classified I-A, and are very likely to be drafted. Perhaps that is what should be done. But it does convert the academic penalty into something potentially far more serious, and many Faculty members, who usually participate in disciplinary actions, have not been willing to take such a responsibility.

Dean Griswold thus states the problem, but does not offer any solution. Uncomfortable memories of the Dean's tax class remind me that this was often the way: The Dean would state a tax problem with clarity and force and then ask some hapless student for the answer. Boldness very occasionally served when adequate research or preparation was lacking. The following, then, is a bold answer to one part of the problem the Dean poses.

The present draft law is wrong from every point of view. The uncertainties it creates begin for young men at about the age of 16 and may continue until the age of 26. These uncertainties are created not only by

international crises but by the vagaries of standards in selecting those who are required to do military service. Even worse, the present system puts a definite premium on the avoidance, if not the evasion, of military service. It makes even honorable young men magnify small or create fanciful physical disabilities in order to avoid apparently useless and possibly dangerous years with the military. It gives early marriage to a teenage sweetheart the added allure of possibly avoiding military service. Finally, as the Dean points out, the draft induces many college students who are not properly qualified or motivated to embrace the scholarly world of graduate school in the hope of avoiding military service.

From the military point of view the draft is not satisfactory. While the need of the armed services for manpower varies from time to time, the military establishment of the United States does need a substantial number of young men each year. It needs a "mix" of privates, company-grade officers and specialists on a continuous basis in order to fill the ranks of privates, noncommissioned officers, specialists and officers. Those who serve in today's Army must be physically and mentally well qualified. It has been reported that only about half of the young men of America are in fact qualified at present. The military establishment needs a firm, fair national policy that will provide the manpower necessary for the defense commitments of the United States. The manpower policy must, however, be flexible enough to respond to the varying needs of the country, depending on the international situation at any given time.

What young men of America need is a law that combines certainty and fairness, that allows a young man to plan his education, his family and his career, allows him to fulfill honorably his legitimate obligation to his country and deals equally with all: rich, poor, ignorant, intelligent, white and black. The military services need a law that provides them with the quantity and quality of men that enable them to meet the military obligations of the country. Can the varying needs of the military establishment for adequate manpower and the legitimate desires of the youth of the United States for certainty and fairness be satisfactorily reconciled in a new law? The rest of this paper is to show it can.

The lottery system should be rejected. A lottery system honestly run might be fairer than the haphazard draft system currently in force, but it seems undesirable that the high obligation of doing military service should depend on the turn of a card or the drawing of a lot. In addition, that system would not solve the problem of the uncertainty. In fact, it might increase the uncertainty in that one's obligation to serve would not be entirely dependent on the extent that one could magnify physical defects or on the vagaries of the local board, but on the whim of Lady Luck.

It should be adopted as national policy that every young man, except those in jail or mental institutions, be required at some time in his life to perform a period of federal service. (As will be explained further on, "federal service" does not necessarily mean military service.) Having established that principle, it remains to work out a system under which this service would be performed.

In order for the system to work, it should have built into it incentives, so that each individual youth would do his federal service at the optimum time, from his point of view as well as the point of view of the Armed Forces of the United States. Furthermore, since the basic objective is to fill the military manpower requirements of the Armed Forces, the period of service should be no longer than is necessary from their point of view.

The largest need of the military is for privates, apprentice seamen and basic airmen. From the point of view of the military, the optimum age for a private, airman or apprentice seaman is 18. From the point of view of most young men, it is easiest and best to do military service at 18. The majority have not married nor have they started on their trade, profession or career. Therefore, one would start with the proposition that the shortest period of military service would be for young men who enter the military service after their eighteenth birthday or graduation from high school, whichever occurs sooner. (A premium on graduation from high school might well be built into the system.) The basic period of service for those entering at 18 or after graduation from high school would have to be determined by the minimum time it would take the military to train the young men to be militarily useful or to utilize their services in time of actual crisis or warfare. Thus the basic period might have to vary from time to time.

This is all very well for the young man who is not going to college. This system would enable him to get his military service in at the optimum time for him and the military service. But what about those who are going to college? The young men that are going to college should not, under any circumstances, be excused from service. On the contrary, since the college man usually enjoys more benefits than others before going to college and is likely to enjoy more benefits from the country after college, he should be required to give something more by way of federal service. On the other hand, college students should be freely deferred on the justification that the military service needs college graduates, not as privates, but as junior officers. From the point of view, then, of the military, college men should be encouraged to enter the military service when they have completed their college education rather than before. However, in order to make it clear that deferment of federal service during a period when a man is in college is not a favor to those lucky enough to go to college, the period of service after college should be somewhat longer than the period required of those who enter military service at 18 or upon graduation from high school. For example, if it were determined that the period of service for the 18-year-olds should be eighteen months, then the period for the college graduate should be set at twenty-two or perhaps twenty-four months. Of course, if a student dropped out of college, was expelled or failed, he would be required within a reasonably short time to perform his federal service obligation. The period of obligation would be correspondingly longer because it had been deferred.

Early marriage would in no way exempt the individual from performing his national service obligation. However, a girl might think twice about an early marriage to a youth she knows is certainly going to have to do his federal service.

All very well for the high school graduate and those going to college, but what about those who are going on to graduate school? Their situation should likewise be examined first in terms of the needs of the military establishment. The military, for example, needs doctors. Therefore, those who are going to enter the medical field should not be encouraged to do their military service as privates, nor should they be encouraged to do their military service after the completion of college. Rather, incentives should be built into the system to encourage them to do their service as doctors. Not only should they be freely deferred through college and medical school (and perhaps even internship), but the Government might well pay for their last year of medical school if necessary. However, at the end of their medical education, the young doctors would have a service obligation that would be somewhat longer than that of the 18-year-old or the college graduate. Of course, the doctor's rank and military pay would be commensurate with the training he had received and his professional status. The military would also expect that a man of his age and professional standing might be married.

As for graduate students whose specialty would have no value in the armed services, they would have already had the choice of doing the minimum service as privates when they turned 18 or doing military service for a somewhat longer period when they graduated from college. If, however, they elected to continue their education into graduate school, they would then have at the end of that period a correspondingly longer period of service to perform, either as privates or as officers if qualified. For example, if the basic period for the 18-year-old was eighteen months and for the college graduate twenty-four months, the graduate student might be required to do thirty or thirty-two months of service. Of course, the period of service required of 18-year-olds, college students and graduate students would have to be reviewed and set from time to time (*i.e.*, every two years) in view of the current necessities of the military service and in order to readjust incentives for the young men to do their military service at the optimum time from their own point of view as well as that of the Armed Forces.

This basic plan would provide the military with the manpower it needs and would make the manpower available at a time when the individual is best suited for the tasks for which the military needs him. At the same time, it would eliminate the uncertainty that exists today and that is so unfair and disturbing to our young men. It would reverse the situation that puts a premium on the avoidance or evasion of military service and that, by encouraging deception, is thought by some to warp the moral fiber of each young generation.

However, the proposal as yet does not contain any alternative for the many young men who genuinely do not meet the high physical and mental requirements of the military service today. If those who cannot qualify physically or mentally are entirely excused from the obligation of federal service do not the same incentives remain that currently encourage the avoidance or evasion of military service? The answer is that the inability to qualify for military service because of physical or mental defects should not be the basis for the total avoidance of federal service. Those who could not meet the high standards for military service would still have the basic obligation to perform a service to the United States. The Peace Corps, the reconstitution of the Civilian Conservation Corps and service in state and federal hospitals and mental institutions all provide vast unfilled opportunities for service. However, federal service other than military service should not be an easy short-term alternative to the rigors of military service. It should be at least as lengthy as corresponding military service and just as arduous. In the second place, nonmilitary federal service should not be the basis for the many rights and benefits that accrue to those who have served in the Armed Forces. These benefits and rights should be reserved to the young men who are able to perform military service for the country. In other words, the alternative form of service for those not physically or mentally qualified for military service should not be made attractive enough so that the physically and mentally qualified young men would prefer to do this service rather than do their military service. On the other side of the coin, it seems likely that many handicapped persons would welcome the opportunity to serve in a limited way.

The present draft applies only to young men, and my proposal speaks only of the young men of the nation. However, in these days of equality, the obligation to do federal service for the country should not be

confined to the young men, but should be made to apply to the young women as well.

Of course, it is obvious that there would be heavy "costs", financial and otherwise, in carrying out these proposed reforms, and it might be that the costs are too high. However, this suggested revision of the basic federal service law would solve many of the problems which American youth is having in connection with the draft and would help stem some of the growing lawlessness.

PROBLEMS OF OUR POLICE DEPARTMENTS

Mr. DODD. Mr. President, Chief of Police James F. Ahern, of New Haven, Conn., made an important presentation before the U.S. Conference of Mayors in Pittsburgh on June 17.

Chief Ahern's remarks are valuable to all of us who are interested in solving the multitude of problems which face the police departments of our great metropolitan areas.

I ask unanimous consent to have Chief Ahern's statement printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

PROBLEMS OF OUR POLICE DEPARTMENTS

Police departments need a great deal of help, but have yet to receive it. In general, politicians, government officials and citizens provide more rhetoric than financial support; more criticism than constructive ideas. In many ways, this country's leaders are trapped in the words of fifty years ago, wanting the police to walk a beat and talk with a brogue.

Law and order means many things to many people. To some it means the repression of the rights of the poor, the outspoken and the millions who crowd our ghettos. To others it means tough law enforcement for everyone but them. And to still others, it means a concern about rising crime rates and violence in the streets.

But when it comes to talking about the causes underlying present conditions, why police operate the way they do, what they need to perform better, there is mostly silence.

There are good reasons why police in this country are the way they are today. Most local politicians have traditionally used police departments for political ends. In some ways, present political leaders are paying the price for past errors. More recently, office-seekers in their election campaigns or in so-called "public debates" on law and order too frequently have sent clear signals to individual police officers that old behavior, old traditions, old faults are not only to be encouraged, but worthy of support. They have said, in effect, that any changes in the past few years are really a passing thing. Law and order is political issue, in most cases, raises the expectation among police and the community that regression to former times is the order of the day; that police officers are not "really" accountable for their actions and conduct.

If this country's leaders really believe that violence should be decreased, and that police departments should be improved, then mayors, governors, Congressmen and members of the executive branch are going to have to provide the support. And that support must consist of more than lip service, and tongue clacking about teenage drug addiction, or increasing crime. It will mean money; it will mean sensitivity to the problems. In short, it will mean substantial backing for police, even when it challenges other bureaucracies. Support will mean resisting the emotional pleas for a return to past practices.

I am not suggesting that police departments operate alone or independent of civilian control. In fact, civilian control (is crucial.) But the role of the political structure—for the general well-being—should be to develop broad policy for a department to implement and to insure that that policy is supported so that it can be effectively realized.

One reason why this support is important now is that for the first time financial aid is becoming available.

The 1968 Crime Control Act represents an effort by the Federal Government to assist local police. It provided, I thought, the opportunity to develop a rational, and useful strategy for improving police departments. But things have not worked out that way. I realize there has been a change in administration and substantial staff turn-over during the past months. But there is no indication that the Federal Government, working through a conglomerate of newly established state agencies, has a strategy, focus, or any real understanding of the problems faced on the local level.

Although the law itself is not without problems, it does provide the Federal Government with enough latitude to get things moving.

But action has not come. States have been slow to set up administering agencies. When established, they have tended to exclude urban law enforcement officers, and just as important, representatives of the cities. This, it seems to me is amazing considering that serious crime and social problems are an urban phenomenon.

One of the key aspects of the Act is the planning support it provides. Planning funds—desperately needed at the local level—have been allocated in such a way as to limit their ability to result in cogent programs.

More importantly, however, the regional approach to criminal justice planning if it continues along these lines with present support will widely miss the mark, solving in five or ten years hence, if at all, problems faced today in major urban areas.

The apparent strategy of the Federal Government concerning planning funds is questionable from its impact point of view. But also it raises substantial questions concerning the role of State planning agency staff and their governing boards.

In Connecticut, the twenty-eight-member planning committee has one urban representative from the State's largest city, one police chief from a major city, one suburban chief and the State police commissioner. All other members represent various interests, primarily on the State and Federal level. Three-quarters of the representatives are attorneys. This committee controls the programs, despite the fact that 75 percent of the action money will be spent by municipalities and their local police departments. While Connecticut may be unique, no state provides adequate police or urban representation and the Federal Government is permitting, in fact encouraging, this pattern to continue.

Police departments and the cities they serve need more dollars; they need new kinds of talent; they need to develop institutions which can change to meet the needs of today. And they need them administered by those most aware of the problems.

Police must take fresh approaches, acquire new techniques and skills, modernize all levels of activity. These things must happen quickly, if we are to make our cities better places to live. Patterns of the past must be altered to meet the demands of today. Civil service, for example, while an important objective in the early 1900's may be less than helpful today. Its restrictions once protected employees who had no labor unions. Today it means that lateral entry is an impossible dream.

Police departments need to develop new recruitment methods. Begin attracting better educated men and need to prepare them to handle the wide-range of human problems that police are involved in.

It shocks me that police officers in this country are recruited at the high school level and expected to perform as the best educated in the community. Most police departments give only a few weeks of training. Then expect their men to deal with some of the most complex people problems facing us.

We must develop ways that individuals with new types of skills can enter the police and have a rewarding career in law enforcement. Police need computer programers, personnel specialists, skilled trainers, administrators and highly trained specialists to deal with addicts, young men and women and other difficult problems.

New Haven has begun to make some of these moves. The Mayor and others in the city have supported the Department's request for new civilian help—more than 50 positions in the past 14 months. They have realized that money is needed to bring the Department to grade level so to speak. But we still have a long way to go.

As I mentioned earlier, all of the things police departments need require both financial and moral support. The days when police departments can be manipulated for political ends must cease if we are to live up to the expectations of the community.

Mayors and other political leaders have an important role to play in all of this. The police are crucial to a city's operation. Police, after all, come in contact with more citizens than any other municipal agency. How mayors back their police will be a central factor in how these organizations function and, hopefully, change in the coming years.

MORE ABUSES AND FRAUD IN MEDICARE AND MEDICAID

Mr. WILLIAMS of Delaware. Mr. President, on May 14, I described to the Senate some of the more glaring abuses in the medicare and medicaid programs which have been uncovered in the course of the Finance Committee's investigation.

During the past weeks I have received a great many letters and telephone calls from public-spirited individuals all over the country giving information about abuses and frauds in medicare and medicaid. Every one of these cases is being carefully evaluated, and where appropriate, followup investigation initiated.

Questions have been raised as to whether we have adequate laws to cope with these fraud cases. To clear up any misunderstanding I shall ask that sections 231 and 232 of title 31 of the United States Code, which set civil penalties for fraud such as those perpetrated under medicaid and medicare, appear in the RECORD at the conclusion of my remarks along with sections 286, 287, and 1001 of title 18 of the United States Code, Thus actual and prospective defrauders of medicare will be able to familiarize themselves with some of the penalties they face for cheating the taxpayers.

It should be noted that section 231 provides for payment to the Government of double the amount defrauded plus $2,000. Of course, these are just civil penalties. Criminal prosecution under sections 286, 287, and 1001 of title 18 of the United States Code is also available

as another means of deterring potential abuses or of assuring adequate punishment of those defrauding the United States. Those provisions provide for fines of up to $10,000 and imprisonment of up to 5 and 10 years.

In this connection citizens who are aware of fraudulent activities in the medicare program should report such cases to the Department of Justice through their local U.S. attorney. It would be helpful if a copy of the material given to the Department of Justice were also sent to the Committee on Finance for its information.

Additionally, I expect that the Social Security Administration will want to furnish every hospital, nursing home, physician, laboratory, and other supplier of services under medicare with summaries of sections 231 and 232 of title 31 and sections 286, 287, and 1001 of title 18 and related statutes. Of course, they would also want to add an appropriate penalty statement to the forms used by hospitals, nursing homes, and doctors in claiming payment.

Mr. President, sections 231 and 232—"the False Claims Act"—date back to the Civil War. At that time many persons attempted to exploit the tremendous increase in governmental purchases of goods and services by defrauding the Federal Government. I would like to read from the floor statement of Senator Jacob Howard, who managed the bill in the Senate. I think my colleagues will find that the situation of 100 years ago has disturbingly direct relevance to the present medicare-medicaid situation. Senator Howard said:

> The country, as we know has been full of complaints respecting the frauds and corruptions practiced in obtaining pay from the Government during the present war; and it is said, and earnestly urged upon our attention, that further legislation is pressingly necessary to prevent this great evil, and I suppose there can be no doubt that these complaints are, in the main, well founded.—(The Congressional Globe, February 14, 1863, page 952)

It is interesting to note that the House was not satisfied with the Senate bill's provision for double damages plus a $2,000 penalty. The House bill required that any person convicted of defrauding the Government "be punished by imprisonment of not less than 1 nor more than 5 years, or by fine of not less than $1,000 and not more than $5,000." The Senate quickly accepted the House amendment.

I ask unanimous consent that sections 286, 287, and 1001 of title 18 of the United States Code and sections 231 and 232 of title 31 of the United States Code be printed in the RECORD.

There being no objection, the sections of the United States Code were ordered to be printed in the RECORD, as follows:

TITLE 18 UNITED STATES CODE—CRIMES AND CRIMINAL PROCEDURE

SECTION 286. CONSPIRACY TO DEFRAUD THE GOVERNMENT WITH RESPECT TO CLAIMS

Whoever enters into any agreement, combination, or conspiracy to defraud the United States, or any department or agency thereof, by obtaining or aiding to obtain the payment or allowance of any false, fictitious, or fraudulent claim, shall be fined not more than $10,000 or imprisoned not more than ten years or both.

SECTION 287. FALSE, FICTITIOUS OR FRAUDULENT CLAIMS

Whoever makes or presents to any person or officer in the civil, military, or naval service of the United States, or to any department or agency thereof, any claim upon or against the United States, or any department or agency thereof, knowing such claim to be false, fictitious, or fraudulent, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

SECTION 1001. STATEMENTS OR ENTRIES GENERALLY

Whoever, in any matter with the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, canceals or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious or fraudulent statement or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

TITLE 31, UNITED STATES CODE—MONEY AND FINANCE

SECTION 231. LIABILITY OF PERSONS MAKING FALSE CLAIMS

Any person not in the military or naval forces of the United States, or in the militia called into or actually employed in the service of the United States, who shall make or cause to be made, or present or cause to be presented, for payment or approval, to or by any person or officer in the civil, military, or naval service of the United States, any claim upon or against the Government of the United States, or any department or officer thereof, knowing such claim to be false, fictitious, or fraudulent, or who, for the purpose of obtaining or aiding to obtain the payment or approval of such claim, makes, uses, or causes to be made or used, any false bill, receipt, voucher, roll, account, claim, certificate, affidavit, or deposition, knowing the same to contain any fraudulent or fictitious statement or entry, or who enters into any agreement, combination, or conspiracy to defraud the Government of the United States, or any department or officer thereof, by obtaining or aiding to obtain the payment or allowance of any false or fraudulent claim, or who, having charge, possession, custody, or control of any money or other public property used or to be used in the military or naval service, who, with intent to defraud the United States or willfully to conceal such money or other property, delivers or causes to be delivered, to any other person having authority to receive the same, any amount of such money or other property less than that for which he received a certificate or took a receipt, and every person authorized to make or deliver any certificate, voucher, receipt, or other paper certifying the receipt of arms, ammunition, provisions, clothing, or other property so uses or to be used, who makes or delivers the same to any other person wtihout a full knowledge of the truth of the facts stated therein, and with intent to defraud the United States, and every person who knowingly purchases or receives in pledge for any obligation or indebtedness from any soldier, officer, sailor, or other person called into or employed in the military or naval service any arms, equipments, ammunition, clothes, military stores, or other public property, such soldier, sailor, officer, or other persons not having the lawful right to pledge or sell the same, shall forfeit and pay to the United States the sum of $2,000 and, in addition, double the amount of damages which the United States may have sustained by reason of the doing or committing such act, together with the costs of suit; and such forfeiture and damages shall be sued for in the same suit.

SECTION 232. SAME; SUITS; PROCEDURE

(A) The several district courts of the United States, the several district courts of the Territories of the United States, within whose jurisdictional limits the person doing or committing such act shall be found, shall wheresoever such act may have been done or committed, have full power and jurisdiction to hear, try, and determine such suit.

(B) Except as hereinafter provided, such suit may be brought and carried on by any person, as well for himself as for the United States, the same shall be at the sole cost and charge of such person, and shall be in the name of the United States, but shall not be withdrawn or discontinued without the consent, in writing, of the judge of the court and the United States Attorney, first filed in the case, setting forth their reasons for such consent.

(C) Whenever any such suit shall be brought by any person under Clause (B) of this section notice of the pendency of such suit shall be given to the United States by serving upon the United States attorney for the district in which such suit shall have been brought a copy of the bill of complaint and by sending, by registered mail, or by certified mail, to the Attorney General of the United States at Washington, District of Columbia, a copy of such bill together with a disclosure in writing of substantially all evidence and informatiaon in his possession material to the effective prosecution of such suit. The United States shall have sixty days, after service as above provided, within which to enter appearance in such suit. If the United States shall fail, or decline in writing to the court, during said period of sixty days to enter any such suit, such person may carry on such suit. If the United States within said period shall enter appearance in such suit the same shall be carried on solely by the United States. In carrying on such suit the United States shall not be bound by any action taken by the person who brought it, and may proceed in all respects as if it were instituting the suit: Provided, That if the United States shall fail to carry on such suit with due diligence within a period of six months from the date of its appearance therein, or within such additional time as the court after notice may allow, such suit may be carried on by the person bringing the same in accordance with clause (B) of this section. The court shall have no jurisdiction to proceed with any such suit brought under clause (B) of this section or pending suit brought under this section whenever it shall be made to appear that such suit was based upon evidence or information in the possession of the United States, or any agency, officer or employee thereof, at the time such suit was brought: Provided, however, That no abatement shall be had as to a suit pending on December 23, 1943, if before such suit was filed such person had in his possession and voluntarily disclosed to the Attorney General substantial evidence and information which was not theretofore in the possession of the Department of Justice.

(D) In any suit whether or not on appeal pending on December 23, 1943, brought under this section, the court in which such suit is pending shall stay all further proceedings, and shall forthwith cause written notice, by registered mail, or by certified mail, to be given the Attorney General that such suit is pending, and the Attorney General shall have sixty days from the date of such notice to appear and carry on such suit in accordance with clause (C) of this section.

(E)(1) In any such suit, if carried on by the United States as herein provided, the court may award to the person who brought

such suit, out of the proceeds of such suit or any settlement of any claim involved therein, which shall be collected, an amount which in the judgment of the court is fair and reasonable compensation to such person for disclosure of the information or evidence not in the possession of the United States when such suit was brought. Any such award shall in no event exceed one-tenth of the proceeds of such suit or any settlement thereof.

(2) In any such suit when not carried on by the United States as herein provided, whether heretofore or hereafter brought, the court may award to the person who brought such suit and prosecuted it to final judgment, or to settlement, as provided in clause (B) of this section, out of the proceeds of such suit or any settlement of any claim involved therein, which shall be collected, an amount, not in excess of one-fourth of the proceeds of such suit or any settlement thereof, which in the judgment of the court is fair and reasonable compensation to such person for the collection of any forfeiture and damages; and such person shall be entitled to receive to his own use such reasonable expenses as the court shall find to have been necessarily incurred and all costs the court may award against the defendant, to be allowed and taxed according to any provision of law or rule of court in force, or that shall be in force in suits between private parties in said court: Provided, That such person shall be liable for all costs incurred by himself in such case and shall have no claim therefor on the United States.

MARITIME COLLECTIVE BARGAINING

Mr. MAGNUSON. Mr. President, I believe it is worthy of special notice that four of the Nation's leading maritime trade unions and a number of associations of shipowners have reached agreement on new 3-year collective-bargaining contracts, without more than minor interruption to maritime services on the east and gulf coasts.

This is a most welcome development. It underscores once again the vitality of the American institution of free collective bargaining. It is also worthy of note that the new agreements were worked out by the parties themselves. There was no need of Government intervention, and they did not call for it.

Three of the unions were able to reach tentative agreements with the Maritime Service Committee and other shipping groups ahead of the June 15 deadline. These unions were the National Marine Engineers' Beneficial Association, the American Radio Association, and the National Maritime Union. The fourth union—the Masters, Mates & Pilots—reached substantial agreement on June 17, less than 48 hours after the expiration of the old contracts, for a major portion of their contracts.

Maritime labor agreements are detailed and complex instruments. It was a major accomplishment to reach agreement so promptly, in view of past difficulties on the American waterfronts. So I compliment the leaders of these fine organizations, and the representatives of the shipowners, for a splendid piece of work which well served our national interest.

I hope that on the basis of this accomplishment, we may use the next 3 years of labor-management stability in the maritime industry to develop a program for building the American merchant marine. Such a step is long overdue. We now have no excuse for delay. We must act before we are hopelessly outstripped on the high seas.

WASTE AND INEFFICIENCY IN DEFENSE DEPARTMENT

Mr. GOLDWATER. Mr. President, in the past, the Senator from Wisconsin (Mr. PROXMIRE) and I have been trusting enough of each other that we have put communications to one another in the RECORD after having them delivered.

When I read in the evening paper of Monday and the morning paper of Tuesday the uncalled-for remarks of former Secretary of Defense McNamara, I wrote the Senator from Wisconsin a letter, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., June 24, 1969.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR BILL: You will recall that when I appeared before your subcommittee several weeks ago, I raised the question of why former Secretary of Defense Robert McNamara had not testified on the question of waste and inefficiency in the defense establishment during his tenure.

You explained that Secretary McNamara had been invited but that his duties as President of the World Bank were keeping him so busy that he was unable to accept the subcommittee's invitation. I read in today's newspapers that Mr. McNamara has not been too busy to grant an extended interview on the matters which your subcommittee is investigating.

Because of some of the things former Secretary McNamara is quoted as having said in that interview, I believe it is more imperative than ever that he be heard by your group. For example, the UPI quoted McNamara as stating that he spent much of his time "fighting a Congress that wanted to spend too much on useless military projects." I think we who serve in Congress are entitled to know what he is referring to.

At another point Mr. McNamara is quoted as saying, "any number of times I was ordered to begin work on a project which was totally wasteful."

This, too, needs amplification and explanation from the man who guided the destinies of the Defense Department during the longest and most notorious period of waste and inefficiency that any government department has ever incurred.

It goes without saying that Mr. McNamara probably was not referring to the multibillion dollar TFX project for which he himself must bear almost complete responsibility.

In all events I should like you to renew your invitation to Mr. McNamara in light of his recent publicized remarks.

Sincerely,

BARRY GOLDWATER.

Mr. GOLDWATER. Mr. President, I have urged, as the reader can see from my letter, that in view of the fact that Mr. McNamara stated—

Fighting a Congress that wanted to spend too much on useless military projects.

And again stated that—

Any number of times I was ordered to begin work on a project which was totally wasteful.

I think Mr. McNamara should be brought before the committee to state precisely what the projects were and who forced him to take an action that he, as Secretary of Defense, certainly did not have to take unless he wanted to. Mr. McNamara's explanation to the invitations by the Senator from Wisconsin has been to the effect that, as head of the World Bank, it would be improper for him to do so. In view of the fact that he does not feel it improper to hold press conferences on the same subject, I think his first excuse is a lame and useless one.

O'CALLAHAN AGAINST PARKER AND MILITARY JUSTICE

Mr. ERVIN. Mr. President, recently in O'Callahan against Parker the Supreme Court, by a five-to-three vote, ruled that courts-martial have no jurisdiction to try offenses committed by service personnel if those offenses are not "service-connected." While I am anxious to protect the constitutional rights of servicemen—and have sponsored legislation to that end—I find that there are several disquieting features to the opinion of the Court, written by Mr. Justice Douglas. Furthermore, the problem of military jurisdiction is of such significance that the opinions in O'Callahan deserve close consideration by the public and the Congress.

In the first place, it seems clear that in most quarters the assumption prior to O'Callahan was that the status of persons in the military permitted Congress to subject them to trial by court-martial, regardless of the nature of the crime, where committed, and whether in peacetime or in wartime. Certainly the Uniform Code of Military Justice is predicated on this assumption, and many service personnel have been tried for civil-type offenses of the very kind that were allegedly committed by Sergeant O'Callahan. If the O'Callahan case is given retroactive effect, which would seem a logical inference with respect to trials by courts-martial that lacked jurisdiction over the offense, then it is clear that the Federal courts will soon be flooded with petitions for habeas corpus and suits for backpay or other relief. While I recognize that over the years there have been those scholars who questioned military jurisdiction over civil-type offenses, such as murder, rape, larceny, burglary, and housebreaking, it does appear to me that here again the Supreme Court has changed the Constitution, rather than interpreted it.

Second, if the Constitution is to be modified, I am reluctant to see it modified by a five-to-three decision of the Supreme Court when one member of the majority, the Chief Justice, was scheduled for almost immediate retirement. The present situation as to the composition of the Court, which is now in transition, signifies that the rule established in O'Callahan will be shrouded in uncertainty. The obvious question is how much weight will the new members of the Supreme Court give to a fundamental constitutional decision rendered on the eve of change in membership in the Court. Will they feel free to overrule the case as soon as an occasion presents it-

self, or will its effect be gradually whittled away in the future by distinctions based on the particular facts? Frankly, I think it unfortunate that in these circumstances a divided court has chosen to decide the issue in the first instance, rather than setting it for reargument.

In the third place, the element of uncertainty that now exists is heightened by the failure of the majority in O'Callahan to provide meaningful guidelines for the future exercise of military jurisdiction. The basic criterion employed is whether the offense was "service-connected." Interestingly, the concept of service-connection has not in recent years played any part in military justice. I am informed that a computer search reveals that the words "service-connected" appears only one time in 37 volumes of the opinions of the Court of Military Appeals and the military boards of review. In that solitary instance, United States against Kelley, 22 CMR 723—1956—the factor of service-connection was not material to any issue in the case. In the U.S. Code the concept of service connection has been used chiefly in determining availability of veterans benefits and disability retirement pay. In that context, the concept has been given a very broad scope. See 38 U.S.C. section 101(6) and 38 U.S.C. section 105. In fact, under these statutes service personnel are deemed to be acting in line of duty—and injuries under such circumstances are service-connected—even when they are on authorized leave. Certainly, a broad concept of service-connection is appropriate in deciding who is entitled to the benefits which Congress has intended for military personnel. But it seems clear from Justice Douglas' opinion that he would not accept a broad interpretation in deciding the scope of court-martial jurisdiction. Under the circumstances, there is considerable ambiguity in the touchstone which the Court proposes to utilize in determining military jurisdiction.

In the fourth place, I am concerned about some of the practical consequences that may flow from the decision. I have already mentioned some of these consequences if the decision is held to be retroactive. Let me note that some equally unpalatable consequences will be encountered if the *O'Callahan* case is determined to have extraterritorial applicability and to apply to service personnel stationed overseas. In terms of its logic, such a result would be perfectly consistent with the majority opinion, although it is not necessitated by that opinion. In any event, if courts-martial cannot try military personnel for civil type offenses committed overseas, the consequence will be that either they will be tried in the foreign courts of the country where the offenses are committed or else will go unpunished. The former alternative hardly conduces to a protection of the constitutional rights with which the majority opinion in O'Callahan is concerned. The latter alternative is not consistent with justice. In this same connection, I should mention that up to the present time the United States has been successful in obtaining from foreign governments a significant percentage of waivers of their jurisdiction over American service personnel, even when those governments possessed primary jurisdiction under the terms of the NATO Status of Forces Agreement or other treaties. However, the United States cannot request a waiver of jurisdiction by a foreign government when it lacks jurisdiction to try the service personnel for the offense involved. Admittedly, Congress might seek to ameliorate the problem by extending the special and maritime jurisdiction of Federal civil courts to include non-service-connected offenses committed by American military personnel overseas. But this solution, if constitutionally permissible, raises any number of practical problems.

Even in the United States some practical problems inhere in the result reached by the majority in O'Callahan against Parker. In a case concerning the right of military personnel to sue the Government under the Federal Tort Claims Act for torts suffered by them while they were acting in line of duty, the Supreme Court noted that it would be ironic to have the rights of service personnel, who have no choice as to where they must serve, hinge on the law of the place where they happen to be located when a tort occurs. See Feres against United States, 340 U.S. 135 (1950). The O'Callahan case signifies that in a substantial number of criminal cases servicemen will be tried according to the substantive and procedural law of the State where they happen to be stationed, generally without their choice, rather than be tried by a court-martial, pursuant to a Uniform Code of Military Justice. Admittedly, the State courts already have concurrent jurisdiction in many instances and so, even prior to O'Callahan, military personnel were not insulated against State court trial. Also, there has been increasing standardization of State court trials, as the Supreme Court has turned the Bill of Rights into a Code of Criminal Procedure. Even so, I am concerned about the consequences of a decision which removes the possibility of a trial by court-martial pursuant to uniform standards prescribed by the Congress for military personnel.

This leads me to my fifth point. I think it quite unfortunate that the majority opinion makes several disparaging references to military justice. By so doing, Justice Douglas has, in effect, tended to minimize the very significant advances and improvements in military justice that have been made in recent years—such as the adoption of the Uniform Code of Military Justice in 1950, the recent enactment of the Military Justice Act of 1968, and the able opinions of the Court of Military Appeals. I would be the last person to claim that military justice is flawless. Indeed, the hearings of the Subcommittee on Constitutional Rights in 1962 and 1966 provided documented insights into deficiencies. Some of these deficiencies have since been corrected by legislation, court decision, or administrative regulation. Some still exist, for example, in the field of administrative discharges, and these, too, I trust will soon be corrected. Indeed, I have introduced legislation to this end.

However, in fairness, it should be noted that the record of the civil courts is not completely without blemish; otherwise, there would have been no occasion for many recent decisions by various Federal and State appellate courts. Justice Douglas' opinion derides "so-called military justice." In fairness to the conscientious judge advocates who administer that system, it should be remembered that: First, courts-martial were excluding evidence obtained by unreasonable search and seizure or by wiretapping long before the Supreme Court first informed State courts in Mapp against Ohio, 367 U.S. 643—1961—that they must apply the exclusionary rule in such instances; second, in courts-martial qualified lawyers were provided without cost to defend service personnel, indigent or otherwise, in all major criminal cases long before Gidgeon against Wainwright, 372 U.S. 335—1963—required appointment of counsel for indigents in the State courts; third, article 31 of the Uniform Code of Military Justice enacted a warning requirement for military investigations long before the Supreme Court in Miranda against Arizona, 384 U.S. 436—1966—adopted such a requirement for Federal and State courts—and, indeed, Chief Justice Warren relied on the military practice in seeking to justify the warning; fourth, defense counsel in courts-martial are in a far better position to obtain pretrial discovery of the prosecution's case than would be true in Federal district courts under rule 16 or in most State courts; fifth, verbatim records of trial by court-martial were provided as a matter of course and without cost to the accused, long before Griffin against Illinois, 351 U.S. 12—1956—imposed this burden on the State courts; and, sixth, appellate review of appropriateness of sentence takes place in the system of military justice, but is still unavailable in the Federal courts and in almost all State courts. Furthermore, the Court of Military Appeals has made clear that most constitutional safeguards are fully applicable to service personnel. Admittedly courts-martial do not proceed on the basis of grand jury indictment; but, at least until the Supreme Court expressly overrules Hurtado against California, 110 U.S. 516—1884—there is no requirement that State court prosecutions be based on indictment.

Taking all the circumstances into account, I hope that clarification can soon be provided with respect to the present murky legal situation concerning court-martial jurisdiction. Meanwhile, I trust that Congress will closely follow developments with a view to considering corrective legislation that may seem desirable and constitutionally permissible.

MEDICARE—PLANNED ELIMINATION OF FLAT PERCENTAGE ALLOWANCE

Mr. EAGLETON. Mr. President, many hospital officials in my State have written me to express their deep concern about the planned elimination by the

Department of Health, Education, and Welfare of the flat percentage allowance as an element applied to allowable cost in computing reimbursement for hospitals and extended care facilities participating in medicare.

This allowance—2 percent for nonprofit hospitals and 1½ percent for proprietary hospitals—is scheduled to be dropped by HEW as of June 30, 1969.

The hospital officials and trustees who have written me are worried that this reduction in medicare reimbursements will have to be borne by nonmedicare patients. They are also upset, because the decision was taken by HEW without consultation with the American Hospital Association, the designated representative of hospitals the Nation over in matters concerning medicare.

The Social Security Administration has begun a study of the present principles under which reimbursements are made to hospitals for medicare patients. This study would have been more timely if it had been made, and proposals for revisions in reimbursement principles outlined, before the discontinuance of the percentage allowance is to take effect. As matters stand, hospitals are operating under a cloud of extreme financial uncertainty. This is a situation that must be clarified at the earliest possible date.

Mr. President, I ask unanimous consent that an excellent editorial dealing with this subject, which appeared in the June 13, 1969, edition of the Cape Girardeau, Mo., Southeastern Missourian be printed in the RECORD, a series of letters from knowledgeable hospital administrators in my State.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BUREAUCRATIC DOUBLECROSS

The nation's hospitals, which without question made Medicare work, are the victims of a bureaucratic double-cross by the Department of Health, Education and Welfare.

St. Francis and Southeast Missouri Hospitals here have joined the chorus of protest arising across the country to the unilateral decision of the government agency to remove a two per cent cost factor from Medicare reimbursements to hospitals.

The two per cent was put into the program at its outset to compensate the hospitals for factors which could not be recognized otherwise by formula or cost analysis. It is calculated on the base of Medicare payments made to the hospitals.

Principal among these intangible costs was the extra amount of nursing care required by the elderly. Studies across the country are unanimous that it does cost more to care for the elderly than for other patients.

It is, however, exceedingly difficult—and most expensive if it is done right—to calculate down into hours and dollars and cents the extra amount of time the nursing staff of a hospital must give to these older patients.

It is not only that. Hospitals can calculate only raw costs. They cannot include capital improvements—many brought on by the added Medicare load—as a part of Medicare costs. If money is borrowed, Medicare would pay only a part of the interest. As one hospital administrator put it, "There is no way they would help us get off the ground."

When a hospital must buy equipment, even though it became necessary because of the Medicare load, the government will pay only a share of interest and depreciation. Nothing is allowed for growth and development.

Indicative of the added cost brought to hospitals because of Medicare is a study by the American Hospital Association showing a 20 per cent increase in administrative and general manhours to comply with the reporting requirements of Medicare.

Is it any wonder the hospitals fought for a percentage factor over the costs allowed by the government? It was their only way of meeting the added and intangible costs brought on by the program.

And now the Department of Health, Education and Welfare says this factor will terminate July 1.

Hospital officials are particularly distressed at this unilateral and high-handed action. In 1965 and 1966 when the program was being initiated, HEW people courted the hospitals to gain their participation. They called it a patrnership in medicine and made every effort to gain hospital participation, knowing the program would not work without wholehearted co-operation of these institutions.

Now that Medicare is off the ground, the promises have been forgotten, as all too often is the case with government agencies. The department knows full well it would not be the government—HEW to be exact—which would feel the wrath of the public if hospitals were to withdraw, but the hospitals themselves. They have the hospitals over a barrel and they know it.

Even more galling to the nation's hospitals is the fact that the government agency promised there would be prior consultation with the American Hospital Association before it would make any changes in Medicare.

The AHA received only a blunt notification that the two per cent factor would be ended on July 1. There was no effort by the administration to renew the "partnership" of 1966. Efforts of AHA to see Secretary Finch of HEW were rebuffed.

A meeting is being held today between lesser officials and those of AHA. We hope it is fruitful, but in view of the position of the government up to now hold little hope.

One thing is certain. The government has not played fair with the nation's hospitals. There must be a solution to this problem. Hospitals cannot continue to absorb costs that rightfully should be borne by Medicare without either (1) lowering patient care or (2) passing these charges on in even higher costs—contrary to the law HEW defends—to non-Medicare patients.

CEDAR COUNTY MEMORIAL HOSPITAL,
El Dorado Springs, Mo., May 2, 1969.

Hon. THOMAS EAGLETON,
Senate Office Building,
Washington, D.C.

DEAR SIR: I am interested in the rescinding of the 2% above cost for Medicare patients in hospitals. Didn't the Federal Government go into contract with hospitals for this service and wasn't the 2% a part of that contract? If they can do this we don't have to adhere to their regulations. We haven't been consulted, only told that it would be rescinded on a given date.

I am wondering if there is a man in Congress that has ever owned a business that can say he could operate for cost without a profit factor.

As sure as you do this the hospital is doomed. There can be no growth or better services rendered if this is to happen. In our hospital, Medicare is the most of our census so this leaves us without a source of revenue for improvement or expanded services.

In the first place Medicare does not cover all of our costs. You should all know just how many deductions are substracted on a cost report. We have numerous patients that are transferred to another hospital the same day in which we have incurred much expense and we are not allowed a days care charge. How do you propose to pay for items like these?

I hope you will all vote against this measure and see that the public gets what was contracted for and not allow a recession in hospital care.

Sincerely,

JOHN P. BISHOP,
Administrator.

ST. JOSEPH HOSPITAL,
St. Charles, Mo., May 5, 1969.

The Honorable THOMAS EAGLETON,
Senate Office Building,
Washington, D.C.

DEAR SENATOR EAGLETON: We are writing to you in regard to a Bill which will be coming before Congress. At the present time hospitals are being reimbursed on historical costs plus two per cent for all Medicare patients. If this two per cent factor is removed from the reimbursable rate, our hospitals will not be able to replace assets used by Medicare patients, because of the well-known inflationary trend in costs.

If the hospital must replace assets at a higher cost level, the non-Medicare patients will be paying for the assets used by Medicare patients. This will be in contradition to the fundamentals of the Medicare regulation.

It is therefore, imperative that the hospitals receive a cost plus factor large enough to replace supplies and equipment in the inflationary market.

We will appreciate your assistance in preventing this proposed change from passing.

Sincerely yours,

Sister M. FRANCIS CLARE BROWN, S.S.M.,
Administrator.

ST. FRANCIS HOSPITAL,
Cape Girardeau, Mo., May 6, 1969.

Senator THOMAS EAGLETON,
St. Louis, Mo.

DEAR SENATOR EAGLETON: It is our understanding that the 2% over allowable costs which Medicare has been adding to their reimbursement to hospitals is to be discontinued effective July 1, 1969.

This allowed compensation over and above other Medicare defined costs was to compensate hospitals for expenses admittedly necessary for the operation of a hospital, but which were not includable in the Medicare cost statement.

An example of such a real, but non-allowable cost is free service, whether this be in the form of outright charity or whether it be bad debt. As you well know, when a patient is brought to our door unconscious, hemorrhaging, crushed, or severely sick or injured, as many of our patients are, we are not permitted to ask him for credit references, credit cards, or advance payments, and then check these out before admitting him. We must admit him, spend money for labor, supplies, and equipment necessary to treat him and then hope he will pay us for our out-of-pocket expenses. Last year we were left "holding the bag" for $57,000.00 by such patients. Medicare will allow bad debts of Medicare patients only who do not pay their deductibles. This catagory of bad debts is insignificant when compared to the bad debts and free service of non-medicare patients. We maintain that this $57,000.00 is a legitimate cost of doing business and should therefore be equally born by all patients served by the hospital. If we are not reimbursed for this expense by someone, we will of necessity have to close our doors in which case we will be unable to serve even Medicare patients.

When Medicare refuses to accept its share of this cost, we have but one choice, and that is to pass it on to an ever decreasing

percentage of private pay patients, which of course is most unfair. Last year 43% of our total charges were to Medicare patients. We feel that Medicare should therefore have paid us 43% of $57,000.00 or $24,510.00. The 2% allowance which is (or was) intended to cover not only this expense, but other like indirect expenses amounted to only $13,561.00 for St. Francis Hospital last year. Now even this small amount, we understand, is to be discontinued.

We simply cannot go on carrying such a large number of patients who do not pay their fair share of our costs. We ask that you therefore, please take whatever action is necessary to at least prevent this 2% allowance from being eliminated. Your efforts in this regard will certainly be appreciated.

Sincerely,

JOHN J. KEUSENKOTHEN,
Controller.

POPLAR BLUFF HOSPITAL,
Poplar Bluff, Mo., May 6, 1969.

Honorable THOMAS EAGLETON,
St. Louis, Mo.

DEAR SENATOR EAGLETON: We would like to protest the reduction in re-imbursement to hospitals under Public Law 89-97.

Hospitals have worked long and hard to make the Medicare Program work for the benefit of the elder citizens of this nation. The Medicare payments in their present form, do not adequately reimburse hospitals for the care rendered to these patients.

We feel that Medicare should assume its proper burden, final audits should be made current—, we have not as yet had finalization of our 1966, 1967 or 1968 audits.

We urge no cut in Medicare reimbursement be made until hospitals and Government have jointly reviewed the entire reimbursement matter.

Sincerely,

LILLIAN CLANAHAN,
Administrator.

CONCORDIA LUTHERAN CHURCH,
Maplewood, Mo., May 6, 1969.

Hon. THOMAS EAGLETON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR EAGLETON: For a little over one year I have been serving as a trustee on the Board of Directors of Lutheran Hospital here in St. Louis. In the course of that time I have become somewhat disturbed between the patient costs in the hospital and the reimbursement rate from Medicare. The president of the hospital has explained this to us time after time and has said that the rate for reimbursement from Medicare either does not cover all the services or at least does not cover the total cost of the Medicare patients.

And now I have just heard that there may be a reduction in Medicare reimbursement. Frankly, I think that once the government has established its rate and the hospitals have adjusted their way to conform to this rate that then a reduction in reimbursement is not only highly undesirable but may even pose some threat to the good medical care in hospitals.

I want to ask you specifically is it true that the department of Health, Education, and Welfare plans to remove the 2% allowance which they have granted in the past to hospitals for Medicare? Is this simply going to be withdrawn without adequate consultation with hospitals?

Why should the private patients in the hospital assume any more costs of the patients who are there under the Medicare reimbursement program? I think this is most serious and deserves your immediate attention.

I not only await your reply; I trust you will use the influence of your office to make certain that adequate medical care will be given to the seniors of our nation through proper Medicare reimbursement programs.

Cordially yours,

JOHN E. MEYER.

KANSAS CITY AREA HOSPITAL ASSOCIATION,
Kansas City, Mo., May 6, 1969.

To: Administrators.
Re: Medicare Reimbursement.

During the past few days, you have received material from AHA, Missouri Hospital Association and KCAHA concerning the reduction in medicare reimbursement by eliminating the 2% allowance.

We join both AHA and MHA in urging that you and your trustees use every means of communication to your congressmen to ask their help in seeking a delay of this unilateral action of HEW until the entire matter of medicare reimbursement can be reviewed by the hospitals with the government.

The seriousness of this whole medicare question can be seen in these statistics, which are provided as factual support in approaching your congressmen. A survey of nine of our hospitals having 3,028 beds indicates the following:

Present annual losses from unallowable costs	$651,600
Estimated annual loss as a result of disallowance of 2%	404,000
Total anticipated annual loss	1,055,400

The anticipated total annual medicare loss per bed is $349. The anticipated per bed annual loss on disallowance of the 2% only is $134.

Projected for all Association hospitals except Veterans, the annual overall medicare loss would be $2,018,257. The 2% allowance reduction amounts to $775,095 annually.

It is unlikely that most congressmen are acquainted with the background of this crippling HEW administrative order. It is imperative that they be informed of its consequences.

RUSSELL H. MILLER,
President.

RESEARCH HOSPITAL AND MEDICAL CENTER,
Kansas City, Mo., May 8, 1969.

Hon. THOMAS F. EAGLETON,
U.S. Senate, Senate Office Building,
Washington, D.C.

DEAR SENATOR EAGLETON: We wish to express our deep concern over the recent HEW decision to withdraw the additional 2% allowance presently included in Medicare reimbursement methods and about cost reimbursement methods in general.

Reimbursement by Medicare is presently based on 102% of our actual costs of operation less any costs determined by those who interpret Medicare regulations to be non-allowable. As examples, we are not reimbursed for expenses related to Coffee Shop, Barber Shop, Beauty Shop, Gift Shop and Community Development operations, although these are obviously a part of the overall costs of operation and these facilities are available to both Medicare and non-Medicare patients and visitors.

We must also exclude the costs for telephone and television, even though these important services are used by all patients, including Medicare patients, and are provided within our regular daily service charge.

We were, as a result of Medicare reimbursement methods, paid approximately $55,000 less than actual costs of services to Medicare patients during 1967, even considering reimbursement to be at the 102% rate.

The recent decision by HEW to disallow the 2% factor will obviously cause our present sizeable underpayment to increase significantly. In fact, the underpayment for 1967 would have been increased by $48,000, if the 2% had been withdrawn at that time. Underpayments of such major proportions must obviously be offset by charges to non-Medicare patients. This certainly is contrary to our understanding of the original intent of the Medicare Law, i.e., that no discrimination in charges or services should be made between Medicare and non-Medicare patients. This is pointed out clearly in HEW Manual HIR-4 (12-68), subpart D, paragraph 405, 402., which states in part, "The share of the total institutional cost that is borne by the program is related to the care furnished beneficiaries so that no part of their cost would need to be borne by other patients." This is obviously not supported by present reimbursement methods. Considering these facts, we strongly recommend that the recent decision to withdraw the 2% allowance be withheld; moreover, that current reimbursement methods be revised to comply with the original stated intent of the Medicare law so that reimbursements for all Medicare patients cover the entire cost of hospitalization.

We are enclosing for your information, copies of two letters which have been mailed to our Trustees. Both letters are from Ray R. Eppert who has been selected by the American Hospital Association to serve as trustee spokesman on the matter of Medicare Reimbursement. One letter is directed to the Trustees of the nation's hospitals and the other to the President of the United States.

Your support to prevent the withdrawal of the 2% allowance will be greatly appreciated.

Cordially,

ROBERT E. ADAMS,
Executive Director.

SAINT JOSEPH HOSPITAL,
St. Joseph, Mo., May 12, 1969.

Hon. THOMAS EAGLETON,
Senate Office Building,
Washington, D.C.

DEAR SENATOR EAGLETON: Our hospital, a Missouri not-for-profit corporation, has been furnishing care to the aged of Northwest Missouri for many years. We have participated in the Medicare program since it's beginning in July of 1966, as provider No. 260090.

We have been reimbursed under the standard formula proposed by the Social Security Administration. This formula spells out the costs recognized by Social Security Administration and eliminates others not thought by Social Security Administration to effect their patients. Needless to say, these eliminated expenses are impossible to eliminate and still run an efficient care unit. Social Security Administration adds to their recognized cost a 2-per cent allowance to cover unrecognizable or overlooked cost of care.

In our case the eliminated costs for fiscal year ended June 30, 1968 amounted to over $195,000. Our 2 per cent allowance amounted to $64,000. Thus, even with the 2 per cent allowance, we are underpaid on our *costs* for Medicare patients.

According to the latest notice as of July 1, 1969 Social Security Administration will no longer pay us the 2 per cent allowance. This action would greatly effect our financing.

We are very much concerned that the Social Security Administration did not consult the associations thru which our thoughts have always been presented, namely, American Hospital Association, or Catholic Hospital Association, regarding the cut-back in reimbursement to us as providers.

Another subject which we are vitally interested in is Public Law 90-490 which has to our knowledge no appropriation for implementation. We, as an institution providing aid to the acute ill, have a great need for nursing personnel and would favor any financing for qualified nursing schools.

We would appreciate your efforts in regard to a fair review of the financing cut-back in Medicare reimbursements to providers and appropriations for Public Law 90-490.

Sincerely yours,

Sister MARY HELEN NEUHOFF,
Administrator.

JOHNSON COUNTY MEMORIAL HOSPITAL,
Warrensburg, Mo., May 12, 1969.

Mr. THOMAS EAGLETON,
U.S. Senator,
Senate Office Building,
Washington, D.C.

DEAR SENATOR EAGLETON: Our hospital has just received the information which indicates that HEW plans to cease paying hospitals the 2 per cent allowance on Medicare patients after July 1, 1969.

This action would mean, using Medicare figures to date, that our small hospital would have been cut short on expenses claimed of $45,000.00 in the short time Medicare has been operating.

There are many areas which are equally unfair as far as Medicare reimbursement is concerned. One of these in our hospital is the fact that our Nurses Call and Communication System is tied to our television in each patient's room—therefore, the entire Nurses Call and Communication System costs (approximately $3,000.00 per year) are deducted from Medicare payment.

We respectfully request your assistance in obtaining full and reasonable discussion of the American Hospital Association's Statement on Financial Requirements of Health Care Institutions. The statement clearly points out the costs of operation and capital needs of hospitals which are not now being paid for by the Medicare system.

Continued non-payment of the proper share of the costs of health care needs by Medicare will, no doubt, have serious effect on the future of the voluntary health care system of the United States.

Sincerely,

JOHN L. INNES,
Chairman.

BETHESDA GENERAL HOSPITAL,
St. Louis, Mo., May 14, 1969.

The Honorable THOMAS EAGLETON,
Senate Office Building,
Washington, D.C.

DEAR MR. EAGLETON: From the inception of the Medicare Program, Bethesda General Hospital has made every attempt to assure the "Partnership in health" concept which was advocated by the Federal Government. We have assumed considerable responsibility in making this partnership a lasting relationship which could achieve success over a period of time. We, along with other voluntary nonprofit charitable hospitals, have demonstrated our willingness to cooperate with the Government at the various levels necessary.

Hospital charges are set at a level which will produce sufficient income to operate the hospital at an optimum level of acceptable care, and the hospital is dependent upon income from its charges in order to continue and progress. Under the Medicare Program, income from patient care has been considerably less than the billed charges which are needed. This has been true under the present reimbursement formula, which includes the two percent factor which is about to be dropped. The recent announcement of the Department of Health, Education, and Welfare concerning the reimbursement change for providers of care to social security administration beneficiaries, was made without any consultation with the American Hospital Association. Such an abrupt announcement, which has such a radical impact on hospital financing, causes hospitals to wonder if the "Partnership in health" relationship is likely to have a future. Hospitals across the nation were shocked and disappointed to have this pronouncement thrust upon us through the news media.

We respectfully urge the Department of Health, Education, and Welfare, and our elected representatives, to carefully study the Medicare reimbursement problems as they exist today.

Further, we urge HEW to maintain full communication with the American Hospital Association, which is the official voice of the hospitals of our nation. Unless we can arrive at an equitable solution to the reimbursement problems for social security recipients, the nation's voluntary hospital system will soon be in dire financial straits.

We respectfully solicit your interest and support on this critical subject.

Cordially,

JOHN F. NORWOOD,
Administrator.

NORTH KANSAS CITY
MEMORIAL HOSPITAL,
May 14, 1969.

Senator THOMAS EAGLETON,
Senate Office Building,
Washington, D.C.

The North Kansas City Memorial Hospital heard with great alarm the proposed elimination of the two percent of operating costs which has until now been added in the computation of Medicare costs. We believe that the hospitals of this nation cannot permit the recent decision to remove the two percent Medicare allowance—a part of the reasonable costs guaranteed by the law—to stand without vigorous protest. The inadequacy of the reimbursement formula without this two percent will place the hospitals of this country in an even worse condition than they have been since they started the care of Social Security patients almost three years ago.

There are two major reasons why the Medicare reimbursement formula has placed this and other hospitals in an extremely dangerous financial position:

1. Bad Debts and Free Service Excluded: At first glance the logic used by SSA in excluding all Bad Debts and Free Service except as they apply to Medicare patients seems sound. When a second look is taken, however, the problem of fairness to all patients and hospitals shows the inequity of such logic. This can be broken down as follows:

(a) If Commercial Insurance carriers and Blue Cross took the same attitude then the only ones left to pay for non paying are the self insured patients.

(b) Why, then, should the self insured patient who always pays his bill, pay for the non paying patients any more than Medicare, Commercial Carriers or Blue Cross patients. I might add that the self insured patients are very few and if only they paid for non paying patients their charges would be extremely high.

(c) If no third party or self insured patients pay for the non paying patient then where is the hospital to look for reimbursement for these patients?

In hospitals where Medicare represents over 50% of their patients this bad debt situation is critical. Hospitals are not like the normal business. If a patient (customer) presents himself for needed medical care the hospital must provide it. The patient's credit record can not be considered if the medical care is needed.

2. The rapid advances in medicine have made equipment obsolete very rapidly. New techniques make expensive equipment necessary almost daily. As a result of this, it is necessary for hospitals to make a gain in order to maintain a status quo. The two per cent, even if computed on what hospitals consider as total costs, is not generally considered to be an adequate gain. In addition to new expensive equipment the hospital must be able to expand to meet the ever increasing population they serve. This is more of a problem than in the past because:

(a) Few contributions are made by wealthy residents, industry and the public in general than in the past.

Federal funds are very difficult to obtain for new construction, especially by metropolitan hospitals.

(c) Governmental hospitals are in a difficult position because they are unable to bet new bonds passed. The public, already feeling they are overtaxed, do not eagerly vote for more taxes.

The hospitals, faced with these problems, find they must pay for construction out of revenue. At this time, the only way for hospitals to have construction covered under Medicare is to go in debt. The hospital that tries to accumulate cash so as to not pay interest is at a disadvantage.

At this time if the two percent is eliminated it will cost our hospital $22,000.00 this year. In addition the bad debt situation discussed above costs another $28,000.00. When you consider that our hospital only has 25% Medicare patient days and a $5,000,000.00 budget you can see what this means to a large institution with a high volume of Social Security patients.

The North Kansas City Memorial Hospital earnestly solicits your help in the restoration of the two percent and, if anything, increasing it or changing the SSA's attitude toward Bad Debts and Free Service. If something is not done we fear the hospitals of the country will be in a very serious financial situation.

CHARLES F. CLAASSEN,
Administrator.

ALBANY, MO.,
May 15, 1969.

Hon. THOMAS EAGLETON,
Senate Office Building,
Washington, D.C.

DEAR MR. EAGLETON: As a member of the Gentry County Memorial Hospital Board in Albany, Missouri, I am greatly disturbed over Medicare reimbursements to our hospitals.

The way this is affecting our hospital and many others, is that Medicare Patients include 70% of patient care. While the other group is about 30%. Many of the other group are nonpaying cases, whose bills in time have to be charged off our books. If the 2% is unpaid by the Government, it has to be charged on Regular Patient Cost, so you can easily understand why hospital costs are skyrocketing as they are, when Medicare is not paying its total cost, even at 102%.

I also noticed that Congress has passed Public Law #90–490, which helps the different schools of nursing through the country, and is so badly needed, but as yet no appropriations have been made.

I am urging you to further investigate this serious situation and give it your wholehearted support.

With kind personal regards, I am,
Most Sincerely,
(Mrs. J. H.) BERNICE FLOWERS DEGGINGER.

AURORA COMMUNITY HOSPITAL,
Aurora, Mo., May 16, 1969.

The Honorable THOMAS EAGLETON,
St. Louis, Mo.

DEAR MR. EAGLETON: This letter is prompted by a notice that H.E.W. is eliminating the two percent over cost being paid on medicare patients to Hospitals.

We strongly object to this move for the following reasons:

At the present time we feel that we are not even breaking even at the present rate of payments. Medicare does not allow certain expenses in the hospital which we still have to maintain. There is no allowance for bad debts, still our largest loss for bad debts is on medicare patients.

Our costs have increased greatly because of restrictions and record keeping demanded by H.E.W. The extra survey forms, keeping up on S.S.A. requirements, attending seminars and all other red tape more than uses up the two percent over costs (medicare calculations) that we receive.

I have talked to many Administrators in this area and we all agree that we, as a group of Hospitals, if represented by our Hospital

Association, should refuse to participate in the Medicare Program.

There is absolutely no reason why the Hospitals should be the goat in supporting a health program that apparently cannot financially support itself.

Respectfully yours,

LEONARD BISBY,
Administrator.

SOUTHEAST MISSOURI HOSPITAL,
Cape Girardeau, Mo., May 21, 1969.

Re: HEW Proposal to Eliminate 2 Percent Factor in Medicare, Medicaid Reimbursement.

The Honorable THOMAS F. EAGLETON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR EAGLETON: As a trustee of Southeast Missouri Hospital, I am concerned with the current and continuing provision of quality health care to the citizens of our service area which includes much of southeast Missouri and southern Illinois. This concern, along with our confidence in the Medicare Program was shaken recently as I learned of the move to curtail what knowledgeable persons in the health field already have demonstrated is an inadequate reimbursement rate for the care of Medicare patients. It has also been repeatedly demonstrated that greater costs are involved in the care of these older persons, a number of which the reimbursement formula does not recognize.

It is inconceivable to me that this announcement was made without any prior consultation with the American Hospital Association whom we designated to act on behalf of the nation's hospitals to make Medicare work initially and on a continuing basis. It is also inconceivable that hospitals have not received full payment for the care rendered Medicare patients back to the beginning of the program in 1966. This underfinancing by Medicare cannot continue without erosion of the resources of hospitals or subsidization of Medicare's rightful share of hospital cost by others.

All of us are concerned with rising hospital and medical costs, and if this proposed curtailment in reimbursement was motivated by a desire to dramatize or curtail this rise, it has most certainly missed the mark. It is our observation that the Medicare Program has been a major factor in creating demands that account for this cost rise and the many "regulations" have all but eliminated innovation and experimentation which might have led to more economical provision of this care.

The impact of this 2% factor at our 200-bed hospital has amounted to $40,000 yearly. This is too large a sum to pass along to our few remaining patients who pay the established charges for our services!

I urge you to exert every influence possible to assure that full discussion of this and subsequent changes in the implementation of the Medicare-Medicaid programs is held with the representative of the providing agencies. I also urge that you do whatever is possible to see that this unwise decision is not implemented. Its consequences for Southeast Missouri Hospital and all hospitals throughout our country would be devastating.

Sincerely yours,

JOHN T. LAMKIN,
Secretary-Treasurer.

ST. ANTHONY'S HOSPITAL,
St. Louis, Mo., May 22, 1969.

The Honorable THOMAS EAGLETON,
Senate Office Building,
Washington, D.C.

SIR: To my great distress, I have read that the Department of Health, Education and Welfare is going to eliminate from Medicare and Medicaid payments to not-for-profit hospitals the two per cent of operating costs allowed under the reimbursement formula costs which are not otherwise recognized.

In my opinion, this action will compound an already grave situation. Social Security payments to hospitals, even in their present form, do not adequately reimburse our medical facilities for the care and services that are being given to Medicare and Medicaid patients. A reduction by two per cent in these payments could bring about a crisis situation in many of our nation's hospitals.

With the advent of Medicare and Medicaid, the Federal Government and our health system contracted to provide medical services to the elderly and medically indigent at a bargain rate of cost plus two per cent. This in effect forces the private pay and commercially insured patient to subsidize the program through increased Social Security payments and higher hospital bills. That is, if our hospitals are to continue to grow and develop at the same rate as they have during the past 50 years.

I seriously doubt that our Federal Government would be so foolish as to even attempt to contract for defense equipment, highways, etc., at such a low rate.

While the great majority of this country's hospitals are not-for-profit organizations, I know of no industry that can long stay away from bankruptcy without generating sufficient funds from revenue to assist in its capital needs.

Hospitals are no exception.

The Department of Health, Education and Welfare should abandon its proposed action concerning the reimbursement formula, and indeed recognize the need for additional money to be placed in funds to assure the continuing ability of hospitals to expand and provide new equipment.

Sincerely,

BOB HYLAND.

KANSAS CITY, MO.,
May 22, 1969.

Senator THOMAS F. EAGLETON,
The U.S. Senate, Senate Office Building,
Washington, D.C.

DEAR SENATOR EAGLETON: As a trustee of Baptist Memorial Hospital here in Kansas City, I wish to solicit your support in prevailing on the Health Education and Welfare Agency to rescind their announced intention, dated April 15, 1969, to eliminate the two percent over-riding allowance to cover part of the costs of Medicare and Medicaid patients in hospitals.

This matter has received a great deal of attention by the administrative staff and trustees of our hospital. Calculations by the financial people indicate the elimination of this allowance will increase the daily cost of "non-Medicare patients" by a minimum average of 60 cents per day. You will agree, I believe, there is no fairness in passing such charges along to patients who do not benefit in any way from the Medicare program.

Again, I shall greatly appreciate your good offices in attempting to have this HEW announcement rescinded.

Sincerely yours,

JOE E. CULPEPPER.

INDEPENDENCE SANITARIUM & HOSPITAL,
Independence, Mo., May 22, 1969.

Senator THOMAS EAGLETON,
Senator Office Building,
Washington, D.C.

DEAR SENATOR EAGLETON: At our Board of Trustee meeting this last week we were advised of the action whereby the Department of Health, Education, and Welfare plans to cease paying the 2% allowance in addition to specific costs of Medicare billings to our patients.

You are acquainted with the fact that HEW already requires that we put away 3% of a patients' bill subject to eventual audit of our books of Medicare patient accounts by Medicare auditors. Finally, in March, two months ago, we received $32,000.00 which was due us from our audit of December, 1967. Now they want to reduce monies paid on these patients' expenses by the 2% which hospitals were hoping to use to replace equipment used in care of the patients. The combination of these accounting practices make it real difficult for us in this hospital, and therefore, we petition you to give consideration to maintaining the cost of patient care plus 2% billing practices announced by the Medicare program from its inception.

Otherwise, we do not see wherein it will be possible for us to operate with any degree of efficiency and expectancy to serve the patient with quality care and keep our equipment replaced on a desirable program in support of the care our doctors are striving to give.

We therefore request your sincere consideration and action in this matter.

Respectfully submitted,

W. WALLACE SMITH,
Chairman, Board of Trustees.

(P.S.—It may interest you to note that since the inception of Medicare we have a greater volume of paper work. We now average 7½ weeks time to collect the patient account, whereas up to July 1, 1966 our patient accounts were turning over in 4½ weeks. In this period of time our receivables due to many elements have increased from $330,000.00 to $780,000.00. The attached information may also be of interest to you.)

BARNES HOSPITAL,
St. Louis, Mo., June 6, 1969.

Re: Secretary Finch's announcement of the deletion of the 2% allowance on Medicare patients' hospital bills.

Hon. THOMAS F. EAGLETON,
U.S. Senate,
Senate Office Building,
Washington, D.C.

DEAR TOM: I am speaking on behalf of Barnes Hospital in St. Louis where I happen to be chairman of the Board of Trustees. I can assure you that even with the 2% allowance Barnes Hospital is losing money on Medicare patients if you interpret the actual cost of servicing the patients. As you know, most of the patients are older and they require more than the average amount of nursing care; therefore, younger patients are actually paying part of their costs. Also you know that the Medicare reimbursement formula on depreciation costs is based on an historical cost basis rather than on current appraised values.

The hospital's trustees and administrators accepted Public Law 89–97 (Medicare) in good faith, thinking that the 2% allowance would be continued. It's disappointing to the hospitals now to be told that this 2% is going to be withdrawn because they had no opportunity for testimony or consultation on the consideration of hospital needs. Inadequate financial reimbursement impairs the integrity and threatens the hospital's ability to serve the sick and injured.

In the interest of Medicare, the care and welfare of our older people, and in the interest of private voluntary not-for-profit hospitals, I suggest that Secretary Finch or other responsible officers of Health, Education and Welfare meet with the American Hospital Association to reconsider the arbitrary decision that has been made to reduce reimbursement to hospitals.

Most sincerely,

RAYMOND E. ROWLAND.

DEACONESS HOSPITAL,
St. Louis, Mo., June 10, 1969.

Hon. THOMAS EAGLETON,
Senate Office Building,
Washington, D.C.

DEAR SENATOR EAGLETON: I write to you relative to the report that the Department of Health, Education and Welfare proposes to eliminate the two percent of operating costs from the Medicare payments to not-for-profit hospitals.

It is an established fact that Medicare

payments to hospitals currently do not adequately reimburse them for the care and the services offered to beneficiaries. The proposed elimination of the two percent of operating cost payments will further magnify and aggravate a most critical condition in our hospitals. It is already evident that the private patients are paying more than their just share of the total cost of providing patient care due to the inequities currently in force in the Medicare reimbursement formula. The further loss of the two percent of operating costs could become a critical problem for most, if not all, not-for-profit hospitals.

It is my sincere hope that the Department of Health, Education and Welfare will recognize that hospitals have need for additional funds as they seek to improve the quality of patient care in the decade of the 70's and that the Department shall, therefore, disavow its announced intentions to eliminate the two percent of operating costs.

Your assistance in bringing such a response will be deeply appreciated.

Very truly yours,

CARL C. RASCHE,
Administrator.

ST. JOHN'S MEDICAL CENTER,
Joplin, Mo., June 10, 1969.

The Honorable Senator THOMAS EAGLETON,
Senate Office Building,
Washington, D.C.

DEAR SENATOR: You must be fully aware of the present issue on Medicare reimbursement wherein the American Hospital Association, on behalf of the hospitals, has strongly protested the proposed elimination from the Medicare payments of the two percent allowance as a proper component of reasonable cost, guaranteed under the law.

On behalf of St. John's Medical Center, I am making this appeal to you to support the stand of the American Hospital Association. Even with the two percent factor, the present Medicare reimbursement formula is still inadequate for the following reasons:

1. It does not sufficiently recognize the greater nursing costs involved in caring for older patients.

2. Non-Medicare patients are bearing substantially the entire burden for the acquisition or replacement of equipment in an ever-rising cost market, expansion of existing services, creation of new improved services and retirement of debt.

Furthermore, since the American Hospital Association is the Medicare reimbursement representative for more than ninety percent of the hospitals, and since the proposed elimination of the two percent factor is the result of an administrative budget decision and not the result of discussions and negotiations with our said representative, it is just and proper that no modifications be made until there has been full evaluation of the current formula with specific consideration of Medicare's responsibility to assume its proper burden as outlined in the AHA's Statement on the Financial Requirements of Health Care Institutions and Services.

We know we can depend on your support on this important issue, its effect having a very great impact on our hospital operation.

Truly yours in Christ,

Sister MARY TERENCE, R.S.M.,
Administrator.

THE DEXTER MEMORIAL HOSPITAL,
Dexter, Mo., June 21, 1969.

Re: Medicare Reimbursement.

Hon. THOMAS EAGLETON,
U.S. Senator, Senate Office Building, Washington, D.C.

DEAR SENATOR: I am on the Board of Directors of the Dexter Memorial Hospital, which was organized under the Not-For-Profit Corporation Act, and was built by private donations and a matching Hill-Harris Grant. We have qualified under the Medicare Reimbursement Program, administered by the Department of Health, Education and Welfare, and our per-diem has been established at $36.33 per day. Previously, under this program, when a Medicare patient enters the hospital that patient pays a deductible amount of $44.00. Medicare then reimburses the hospital in an amount determined by multiplying the number of days the patient stays in the hospital by the per-diem rate. This reimbursement, generally, must cover all charges made by the hospital, including room and board, drugs, lab, etc. The hospital, in participating in the Medicare Program, must accept the reimbursement amount paid by Medicare in full payment of all charges made by the hospital to the patient. Thus, if a particular patient were in the hospital for a period of five days and had extensive tests, his bill could well amount to $400.00 or $500.00. Yet, Medicare would pay only $181.65, and the hospital would have to write off the remainder of the bill.

In addition to the reimbursement allowed by Medicare, which is based on cost studies made for each particular hospital, Medicare has been allowing an additional two per cent over cost. However, after July 1, 1969, HEW is going to eliminate the two per cent allowance. This would be very detrimental to all hospitals, as the present Medicare formula does not adequately reimburse hospitals for care rendered to Medicare patients. This is a particularly serious problem in our hospital, and in other hospitals in rural areas, as 50% to 60% of our patient load consists of Medicare patients.

I would like to cite you a few examples of the writeoffs we are sustaining under present Medicare schedules. We had one patient who was in the hospital three days, whose total bill was $163.95, on which Medicare paid $64.99, and on which we had a writeoff of $93.36. Another patient was in the hospital four days, and had a total bill of $189.20, on which Medicare paid $101.32, with a writeoff of $82.28. Another patient was in the hospital four days, with a total bill of $277.25 on which Medicare paid $101.32, and the patient paid the deductible $44.00, leaving a writeoff of $80.93.

The American Hospital Association has requested HEW to forestall this action eliminating the two per cent factor until the complete reimbursement schedule can be restudied. The Association has appointed a special task force to work with the Social Security Administration on this problem. We would like to enlist your assistance in this matter, and would request that you contact the appropriate officials in the Department of Health, Education and Welfare to delay this elimination until the reimbursement system can be completely restudied, as requested by the American Hospital Association. Your assistance and cooperation will be greatly appreciated.

Sincerely yours,

JOHN WM. RINGER,
President, Board of Directors.

AN IMPROVED TRANSPACIFIC AIRLINE SERVICE HAS BEEN TOO LONG DELAYED

Mr. TOWER. Mr. President, yesterday saw the writing of another unhappy chapter in the long-contested transpacific air route case. New and improved service to Hawaii is not yet started. A final decision issued in January authorizing new service March 5 has been repeatedly stayed since that time. It was stayed again yesterday. I think that the Civil Aeronautics Board and the administration must now advise the American people: Why has this needed service been so long delayed? And, when may we expect ultimate resolution?

The hardships visited on the traveling public of the United States by delaying the improvements in service to which they have been many times found entitled is intolerable. The burden put upon the carriers authorized to provide the service through a now five times delayed effective date in the new authorization is now unbearable. The lack of use of new tourist facilities in Hawaii is damaging to the economy of our 50th State and the travel of our citizens to foreign lands rather than Hawaii affects adversely our Nation's gold flow.

On May 28, 1969, certificates of public convenience and necessity authorizing the vast bulk of the international air transportation in issue in the transpacific case became final and effective. I do not perceive why a similar finality is denied for the mainland-Hawaii awards that were made in the domestic decision announced last January. Because of the long standing need of the public for improved service and a final Board decision which left unresolved only a relatively minor issue, the carriers have acted in reliance upon a final decision and have prepared to provide needed public service. Plans for inauguration in March were delayed first to April, then to May, then June, July, and finally their effectiveness has been further stayed by a Board order issued yesterday.

The impact of these repeated delays in terms of public service denied and in terms of the economy of the country is substantial. Literally hundreds of people have been employed, trained, and positioned at various cities throughout the country. Aircraft have been made ready. Station installations have been made, ticket offices opened, and reservations taken, but the public has repeatedly forfeited the opportunity to use the needed new service as the effective date of the certificates has been repeatedly delayed.

Personnel have been employed and trained to provide the service necessary to operate the flights to Hawaii. Facilities for reservations, ticketing baggage and freight handling and all the additional services necessary to operate have been leased or built and this represents a sizable commitment. The continuing delay makes employment suffer, the public suffer, and certainly the airlines and their stockholders will continue to suffer until their decision is final. The United States cannot permit such unproductive expenditure of dollars. It weakens our fiscal system, and perhaps most significantly in the long run, the United States and the dollar will suffer.

It is not my intent to be critical of either the Board or the administration. Congress does, however, have a responsibility to oversee the function of the Civil Aeronautics Board, and its relations with the administration. When, as here, there is no apparent reason for the delay in the carrying out of these functions, I must repeat: Why the delay? and When may we expect the final decision? This is the least to which the public, and the airlines and the Congress are

entitled. Certainly there must be some area for planning, some program to permit early implementation of service and some way to curtail the current waste of funds.

The uncertainty reflects most poignantly in the newly employed persons whose job future is at stake. It is the kind of uncertainty that they and we should not have to face unless there is some good and sufficient reason.

If there is an explanation for the delay, that explanation should be presented promptly. If there is no reason, and I perceive none, service between the mainland and Hawaii should be permitted to start before final resolution of the relatively less important service needs of the South Pacific.

Travel and tourism are a multimillion dollar industry in the United States. They are particularly so in our 50th State, Hawaii, which is dependent on air transportation to bring visitors to the islands. I therefore again ask: Why the delay in this service? When may we expect the service to start? I ask not just on behalf of the mainland people who want to visit Hawaii, not just on behalf of the airlines who have spent many hundreds of thousands of dollars in preparation for this service, not just on behalf of airline employees whose livelihood may be dependent on getting this service inaugurated, not just for airline shareholders who have seen their investments eroded by falling prices, but more particularly on behalf of the people of the State of Hawaii who have devoted hundreds of thousands of dollars to new installations, to employment creating tourist attractions, and to the facilities that will be utilized by this ever-increasing number of Hawaiian visitors.

The commitment to Hawaiian tourism is important not just to Hawaii, but to the Nation as a whole. One of the significant contributors to the U.S. adverse balance of payment is the dollars spent in foreign lands by American travelers. To the extent these people will travel to and from such garden spots of our own Nation as Hawaii, the adverse affect on the balance of payment will be curbed.

I have reviewed only briefly the great and unrecoverable damage being done to many interests by the repeated delay of final implementation of the decision already made. There can be no reason to examine further these questions that have already been examined in such great depth over many weeks of hearings and literally tens of thousands of pages of records. Decisions are not always easy to make, but they must be made if progress is to continue. A decision has been made here. Continued progress awaits only its implementation. It is for these reasons that we now ask the Board and the Administration these two critical questions: Why has this long needed new service been repeatedly delayed? When will the public interest be finally vindicated by permitting implementation of the required new service to Hawaii?

THE QUIET MAJORITY

Mr. BIBLE. Mr. President, as I have observed in the past, it is unfortunate that so much attention is focused on the unruly campus militants and so little on the vast majority of American college students who are orderly and responsible. The noisy rabble can make the front page and get prime-time television news coverage by disrupting a university, defying the law, and mouthing obscenities—all in the name of change. Then there is the quiet majority. These students think they should try to get an education while they are going to college. They think that change should be achieved in an orderly manner through responsible student government and the nonviolent democratic process.

They get their education. They create change. But little attention is directed their way.

I should like to direct some attention their way, for a change. Let us turn for a moment from the strife-torn campuses and look at a more typical institution of higher learning—the University of Nevada.

They have not had any violence in Nevada. Only the administration has been occupying the administration building. No fires. No threats. No marches. The only confrontations have been orderly. And the change has been orderly.

This was duly noted—and little publicized—in the commencement address at the university's Reno campus a few weeks ago. I ask unanimous consent that this address, as highlighted in the university's staff newsletter, be printed in the RECORD, so that the quiet majority will get at least a little of the attention it deserves.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

COMMENCEMENT DRAWS MANY PLAUDITS

The University's first outdoor commencement and President N. Edd Miller's pinch-hit remarks in the absence of the scheduled speaker, Chancellor Roger Heyns, drew plaudits from faculty, students and townspeople alike.

Here are excerpts from Dr. Miller's remarks:

"In this time of great unrest and even of tragic violence on many college campuses, it seems appropriate to say a few words about change on the campus.

"Educational institutions are often glacial in making changes and often even in recognizing the need for change. There is a need, however, now being recognized, for greater involvement, wider participation in the affairs of the University, and greater relevance of the University and its programs to the society in which it exists. This need for change is being met in various ways on different college campuses. Sometimes it comes with disruption and even violence; sometimes it comes through rational open discussion. For this to occur, a climate must exist that encourages free and open and candid discussion of issues and wide participation in decision making.

"On this campus, I submit, change is taking place, but in an orderly and peaceful way. All segments of the University community—regents, administration, faculty, staff, and students—have worked hard to create an open climate for orderly change.

"So, I would like to discuss with you the class of 1969 as a case history of student involvement in appropriate ways in the life of the University.

"I feel a special, personal attachment to this Class. We have entered the University as freshmen in 1965 and I have followed the activities and progress of this group of University citizens with care, interest and enthusiasm. The members of this graduating class have made a distinguished record for themselves in the University.

"Not only in academic achievement but in many other ways this Class has had a significant impact on the University. Under the leadership provided by members of this Class important changes have taken place in the life of the University.

"I think it important to say to all of you that our student body has been active as have student bodies on other campuses across the country. They have, however, channeled their concerns and their activities through organized student government and have expressed themselves in orderly fashion. Unfortunately, no headlines these days accompany this kind of orderly change, but I assure you headlines and commendation are much deserved. They have achieved much and have accomplished their goals without disruption to the processes of the University. Protest and dissent we have had, but these points of view have been expressed freely, openly, and without violence. The people of this state should be proud of this group of students at the University of Nevada.

"I commend to all of you this group of graduates of the University and assure you that our society is in good hands with the kind of people represented here. To the graduates I offer my warmest congratulations and best wishes and my hope for continued success in all your endeavors in the years ahead."

THE PESTICIDE PERIL—XX

Mr. NELSON. Mr. President, for 7 days now the romantic and legendary Rhine River in Europe has been contaminated by a substance which has killed nearly every fish in its waters from St. Goar to the North Sea—a distance of more than 200 miles.

According to this morning's Washington Post, a state of emergency was proclaimed along the riverbank in three German states. In the Netherlands, major cities including Amsterdam and Rotterdam stopped taking Rhine drinking water and switched to reservoirs, leaving Rotterdam with only a week's supply.

Millions of fish are lying dead along the banks, and millions more have drifted into the nets of Rhine fishermen, filling them so full that they have to be cut open. Yet, no one knows exactly what is causing this catastrophe.

However, analysis by the Dutch Government Health Service has discovered the presence of the insecticide, Endosulvan, in the dead fish.

This tragic killing is frightening. Worse still, it has happened before in many other locations. According to the New York Times:

In 1960 pesticides wiped out astronomical numbers of fish in the lower Mississippi. Industrial wastes long ago exterminated shad in the Delaware, shellfish in the Merrimack, and practically everything in the Hudson for at least ten miles below Albany.

The quality of our environment is in serious trouble. All nations are involved, for the manner in which the inhabitants of one country treat their environment affects the environment of their neighbor's. We can no longer afford to be careless. This is especially the case regarding the use of pesticides.

I ask unanimous consent to have printed in the RECORD an article entitled "Mystery Pollution Kills Fish in Rhine," written by Joe Alex Morris, and published in the Washington Post of June 25, 1969; an article entitled "Two Nations Act in Rhine Poisoning Crisis," written by David Binder, and published in the New York Times of June 25, 1969; and an editorial entitled "The Deteriorating Environment," published in the New York Times of June 25, 1969.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington (D.C.) Post, June 25, 1969]

MYSTERY POLLUTION KILLS FISH IN RHINE

(By Joe Alex Morris)

BONN, June 24.—The fish in Germany's romantic Rhine River have been dying by the millions this week as a mysterious poison has turned more than 100 miles of river into a piscatorial wasteland.

A state of emergency was proclaimed along the riverbank in three German states. In the Netherlands, major cities including Amsterdam and Rotterdam stopped taking Rhine drinking water and switched to reservoirs. This left Rotterdam with only a week's supply.

In both countries, public warnings were broadcast over the radio and by river patrol boats to stay out of the water and not to eat river fish. In some places, small boys were reported selling dead fish scooped up from the surface.

Farmers organized emergency brigades to keep their livestock from wandering to the river.

No human casualties have so far been reported. Despite round-the-clock efforts to identify the poison, it was still a mystery today.

[Later in the day, news agencies quoted the Dutch government health service as saying that the poison probably was an insecticide called Endosulvan. An analysis of dead fish taken from the river showed the presence of this insecticide. The source of the insecticide was still not known.]

About 3.5 million Germans drink water from the Rhine, a heavily polluted stream under the best circumstances.

The poisoning, which is considered a catastrophe here, apparently started somewhere near Bingen, where legend says the Lorelei serenaded sailors and drew them to destruction.

Experts are leaning to the theory that a dangerous cargo fell from one of the many barges that make the river Europe's most heavily traveled waterway, and split open on the legendary rocks. The first dead fish were discovered Thursday near Bingen.

The river has since been awash with dead fish, floating downstream with their bellies up. Included were tons of river eels that inhabit the river deeps and normally are not affected by the water flow.

Analysis has determined that the fish died from suffocation, caused by paralysis of their breathing organs. Authorities in Coblenz reported today that tests there showed the contamination had passed their area, but, in a test near Bonn, fish from pure-water sources died in seven minutes after being put into the Rhine.

Officials said it was impossible to predict the ultimate effects. But they tended to minimize any danger to human life.

As for the fish life, "we never had such a catastrophe before," said one North Rhine-Westphalia official. "The Rhine will be biologically kaput for years to come."

The students at Heidelberg may also refrain a long time before singing the traditional drinking song that goes:

"If the water of the Rhine were golden wine,
Then I would gladly be a little fish."

[From the New York Times, June 25, 1969]

TWO NATIONS ACT IN RHINE POISONING CRISIS

(By David Binder)

BONN, June 24.—Dead fish by the millions floated in the northern part of the Rhine today as an unidentified chemical spread for the fifth day over more than 200 miles of the river in West Germany and the Netherlands.

So far no effect has been detected in the drinking water. But waterworks along the German banks have set up special testing facilities to guard against letting contaminated water through to householders.

[Dutch health authorities said that the substance had been identified as a insecticide that posed little danger to humans, United Press International reported from the Hague.]

Cattleowners have been warned to keep their herds away from the river. A report from The Hague said that both Amsterdam and Rotterdam, which get the major part of their drinking water from the river, had closed their Rhine conduits. Rotterdam has large reservoirs while Amsterdam uses wells in the nearby dunes.

River police warn constantly through loudspeakers against swimming in the Rhine. This has been a dubious sport for more than a decade because of steadily increasing amounts of industrial waste being dumped into the stream.

Authorities of the State of Rhineland-Palantinate have narrowed the source of the chemical to a site near St. Goar, a medieval winegrowers town in the middle of the renowned "Romantic Rhine" stretch of ancient castles and steep vineyard slopes. The Rhine, 820 miles long, flows from the Alps to the North Sea and passes or borders on Switzerland, Leichtenstein, Austria, Germany, France and Netherlands.

In a telephone interview an official said that the state government was working on the theory that a barge dumped a "granulated" chemical substance into the stream sometime Wednesday night. Dead fish were noticed in increasing numbers below St. Goar starting Thursday.

LITTLE INDUSTRY IN AREA

The river police at Mainz and Düsseldorf are searching records for all ships that passed St. Goar at the time. The police acted on the basis of a criminal warrant filed by the Rhineland-Palatinate State Attorney against an unknown perpetrator.

Officials in Mainz have virtually ruled out the possibility that the chemical emanated from an industrial source, since the area around St. Goar has almost no industry and the Rhine water a few miles upstream at Wiesbaden, just below the great chemical factories of Mannheim and Ludwigshafen, has been tested and found relatively clean and abounding in fish.

The theory of a granular pollutant holds that the substance sank to the bed of the Rhine at St. Goar and continues to contaminate the water from there down stream.

However, a top official of the North Rhine-Westphalia Government said that his experts were working on the theory that the problem came from nerve gas containers sunk at the end of World War II at St. Goar. The official, who asked not to be identified, said the specialists had established that the containers would have taken 25 years to rust through in fresh water.

The estimate of 25 years could point to a time close to the arrival of allied troops on the Rhine in World War II. Allied troops crossed the Rhine in March, 1945.

Fish taken from other German streams and placed in the Rhine near Düsseldorf today died in seven minutes. However, chemists working aboard two laboratory ships plying between Düsseldorf and Mainz have been unable to isolate the specific cause from the 1,000 or so other foreign substances to be found in the waterway.

For example, potash mines on the French and German banks of the Rhine daily pour 30,000 tons of waste salts into the river. While new purification plants on the German stretch have gradually reduced the impurities in the last year, the Rhine remains a filthy and foul-smelling stream.

Major waterworks at four sites below St. Goar have set up aquariums filled with trout, a highly sensitive fish, to determine if the Rhine poison is blocked by filtering processes used for water for households.

According to river authorities, almost every fish in the river below St. Goar has been killed since Thursday. Millions are lying along the banks. Millions more—carp, eels and bream—have drifted into the nets of Rhine fishermen, filling them so full that they have to be cut open open.

[From the New York Times, June 25, 1969]

THE DETERIORATING ENVIRONMENT

Secretary General U Thant has taken time out from the usual preoccupation of United National officials with saving the world from war to sound the alarm against a slower but dangerously advanced form of global suicide.

In a report to member nations, based on the studies of an advisory group preparing for a world conference in Stockholm in 1972, the Secretary General warned of a general deterioration of the world's environment which is heading the planet toward catastrophe without so far arousing the concern of more than a small fraction of its inhabitants. If urgent action is not taken to arrest the pollution of air, land and water, "the future of life on earth could be endangered."

Within hours of Mr. Thant's report, as though to lend it emphasis, word comes from West Germany and Holland of millions of dead fish floating down the Rhine, poisoned by some as yet undertermined substance. Apart from the loss of marine life itself, the danger of contamination is considered so serious that the cities of Amsterdam, Rotterdam, and The Hague have switched to emergency sources of drinking water.

The coincidence of the two events is dramatic, but such massive fish-kills as the one on the Rhine are tragically no longer novel. In 1960 pesticides wiped out astronomical numbers of fish in the lower Mississippi. Industrial wastes long ago exterminated shad in the Delaware, shellfish in the Merrimack, and practically everything in the Hudson for at least ten miles below Albany—a stretch of water that according to an authority on the subject "can only be described by an ichthyologist with the pen of Dante."

The United Nations report, which is concerned with all aspects of the threatened environment, differs from many such warnings in two respects, both impressive. First, it links the dangerous deterioration of world resources to the simultaneous growth in population, which may be expected to require progressively more of those resources while—unless the lessons of ecology sink in—it reduces their yield still further. And, second, the report puts emphasis on the global nature of the problem. Rich and poor nations alike are involved and vitally affected by each other's treatment of the common environment. They have therefore no alternative but to work together in their "one biosphere within which space and resources, though vast, are limited."

SMALL BUSINESS CAUGHT IN TRIPLE CREDIT SQUEEZE—ADMINISTRATION SHOULD RELEASE $170 MILLION IN SBA LOAN AUTHORITY NOW

Mr. BIBLE. Mr. President, I invite the attention of the Senate to the credit

problems of small business firms, which are becoming increasingly acute.

Earlier this month, the Select Committee on Small Business, on which I serve as chairman, concluded preliminary hearings on the legislative oversight of the Small Business Administration.

Evidence developed in the course of this inquiry indicates that the executive branch has reduced the business loan program of the Small Business Administration by 58.48 percent for fiscal year 1969. In other words, for the 12 months ending on June 30 of this year, the White House has allowed SBA to loan only about two-fifths of the sums budgeted and approved by both Houses of Congress for this period. The amounts withheld are in three categories as follows:

SBA BUSINESS LOANS

[In millions of dollars]

Fiscal year 1969	Direct loan program	Immediate participation loans (SBA share)	Small business investment company program
Loan authorization approved by Congress	77	184.0	30.0
Loan authorization committed	18	94.1	8.7
Loan authority remaining on June 20, 1969	59	89.9	21.3
Total			170.2

The officials of the SBA testifying at our hearings agreed that if this remaining $170 million of loan authority is not released by the end of the fiscal year, it will lapse and therefore become permanently unavailable for any assistance to the 5½ million small business firms of this country.

In an effort to restore this loan money, I have, on behalf of the Small Business Committee, forwarded to the White House a letter urging the President and the Bureau of the Budget to take all steps necessary to assure that this loan authority is carried forward on the books for a period adequate to actually make it available to small business borrowers through the approval and disbursement of the loans attributable to this authority.

The urgent need for such action can be demonstrated by a brief review of what is happening in the private money markets.

STRINGENCY IN PRIVATE CREDIT MARKETS

As the Members of this body are aware, the prime bank interest rate has risen five times in the past 7 months, in the following sequence:

Increase in prime interest rate, December 1968 to date

	Percent
On Dec. 2, 1968, from 6.25 percent (6.0 percent for some banks), to	6.5
On Dec. 18, 1968, to	6.75
On Jan. 7, 1969, to	7.0
On Mar. 17, 1969, to	7.5
On June 10, 1969, to	8.5

The March increase to a then record high, in the words of one reporter: "received the silent approbation of Government officials who had warned Americans not to expect any relief soon from the highest interest rates in history in light of today's overheated economy." [1]

There followed, 2½ months later, the most recent and unprecedented jump to 8½ percent. To realize how unusual this full point increase was, it must be remembered that of the 33 changes in the prime rate since World War II, all of the shifts from 1945 to 1955 were of one-fourth point. After 1956 there were nine changes of one-half point. The June 10, 1969, rise has been the only change as large as 1 percent ever made in the prime rate, either up or down.[2]

Of course, other money market instruments have followed suit—and continue to escalate along with bank rates of interest.[3]

In the real world of finance, it is recognized that this prime rate states the basic cost of money to national corporations with the finest credit ratings. It thus tells only part of the story.

A factor not reflected is the "compensating balance." These are funds which borrowers are informally required to maintain on deposit in noninterest paying accounts at the lender's bank. The level of compensating balances is now about 20 percent, meaning that "the best corporate customers are paying an effective rate—of interest—of 10.6 percent." [4]

Another consideration is that relatively few loan applications are granted the "prime rate." Every month the Federal Reserve System publishes a tabulation of the interest rates on various sizes of loans. The most recent table, covering February 1969 when the prime rate was 7 percent, demonstrates that it is the big borrowers who get the premium rates, while small businesses must accept interest rates scaled up to 1½ points above the prime:

BANK RATES ON SHORT TERM BUSINESS LOANS, FEBRUARY 1969

Interest rate (percent per annum)	Size of loan: $1,000 to $9,000	$10,000 to $99,000	$100,000 to $499,000	$500,000 to $1,000,000	$1,000,000 and over
	Percentage distribution of dollar amounts				
7 or less	16.3	18.9	28.4	38.1	59.2
7.01 to 7.49	13.6	13.1	24.8	33.2	24.6
7.5 to 7.99	30.8	36.1	25.1	15.8	10.7
8.0 to 8.49	26.8	19.6	13.6	8.8	3.9
8.5 and over	12.3	12.3	8.3	4.0	1.6
Total	[1] 100.0	100.0	[1] 100.0	[1] 100.0	100.0

[1] Numbers may not add due to rounding.

Source: Federal Reserve Bulletin, May 1969, table A31.

Not only are the large corporations favored with lower interest rates, but they can and, as the Wall Street Journal points out, have taken other self-protective measures:

> But for large segments of the economy, especially big corporations and financial institutions other than commercial banks, the credit squeeze is less painful than in 1966 . . . major national companies have thus far managed to insulate themselves in large degree against credit restraint. They are bidding aggressively for funds in the commercial paper market, in which they offer unsecured corporate promissory notes for short-term funds at high interest rates. In addition, following the 1966 crunch, the companies rushed to establish firm loan commitments with their banks, refunded short-term debt into long and accumulated assets that could quickly be turned into cash. These preparations have paid off in recent months.[5]

The Journal believed these factors explain "the easily overlooked fact that broad Government policies of stringent credit restraint hit various kinds of borrowers unevenly" and specifically weigh most heavily upon small businesses, governmental borrowers, and the housing industry—which is also predominantly composed of small firms.

With this background in the private sector, a massive cutback of 58½ percent in the public credit program of the SBA—which is intended to be the lender of last resort—puts the small business community between the jaws of a vise, crushing it from two directions.

The full impact of these forces, we fear, is immediately ahead.

Financial statistics show that the ratio of loans to bank deposits, a commonly accepted measure of credit pressures, stood at 71 percent in May 1969, significantly higher than during the tightest period of the 1966 credit shortage. Because of a new method in calculating required reserves at the end of the month, commercial banks have postponed the effect of tax borrowings and other recent credit demands until the end of this month so that "their problem is still ahead." [6]

Reports emanating from the International Monetary Conference of the American Bankers Association were that

[5] "How the Crunch, etc.," *loc. cit.*

[6] "Comments on Credit," *loc. cit.*, p. 1.

we may see still another increase in interest rates in the near future.[7]

INVESTMENT TAX CREDIT IN JEOPARDY

However, there is a third element on the horizon, the administration's proposal to repeal the investment tax credit. The Secretary of the Treasury and other administration witnesses have refused to consider a continuation of the credit for small business firms.

On May 20, a statement was presented to the Ways and Means Committee of the House of Representatives on behalf of myself, as chairman, and the Senator from New York (Mr. JAVITS), as ranking minority member of the Small Business Committee. We urged the committee to retain the investment tax credit for small business firms and farmers up to $25,000 in investment, with a cutoff at $1 million in income, so that large firms would not gain a windfall from a measure intended as relief for small business.

We pointed out the particular advantages of the tax credit to small and dynamic companies, which have the greatest needs for growth capital, and the entire free enterprise system which would flow from continuing the credit for small firms only. We also emphasized that there would be a "substantial revenue gain" from the adoption of our proposal, probably over $3 billion. This is so because truly small firms account for a very minor share of existing investment tax credits and not as high as is being claimed by some Treasury Department spokesmen.

On June 12, the Senator from Alabama (Mr. SPARKMAN) expressed his judgment that the investment tax credit should be retained at the $150,000 level of investment for balance of payments, among other compelling reasons. I was impressed by the Senator's historical research on the subject. It reminds us that the Treasury Department, in 1961, after considering a wide variety of tax devices for bringing us abreast of foreign governments in the tax field, chose the investment tax credit, "primarily because it increases the profitability of investment far more per dollar of revenue cost than any of the other alternatives."[8]

I hope that the House, the Committee on Finance, and the Senate, will consider these contentions as the current surtax legislation moves through the Congress.

THESE THREE FORCES ARE CONVERGING ON SMALL FIRMS

In the meantime, the prospects are that a combination of the three forces I have described: that is, record interest rates and intensifying stringency in the private money markets: the cutback of 58½ percent in the public SBA lending programs; and the proposed elimination of the investment tax credit for small business, will create intolerable financial pressures on smaller and independent businesses.

Under these circumstances, small firms which would ordinarily survive will go out of business. Others that would have been successful will be less so, or will experience reverses that may take years to overcome. Others which may escape setbacks will be denied their fair share of economic expansion. The system of free enterprise itself—ease of entry, competition, and growth of firms supplying new products and services—will be impaired. Opportunities for men of imagination and enterprise will be limited.

Mr. President, as one commentator has said, "money markets are reeling under the cumulative pressure of a tight-money policy that keeps squeezing, squeezing, squeezing."[9]

In my judgment, it is primarily small business that is getting caught in this triple squeeze. It seems apparent that the small and independent firms are absorbing more than their share of the restraints on the economy. I feel that they should not in the future continue to bear a disproportionate part of the sacrifices necessary to achieve the country's domestic and international goals.

I wonder if there are any other domestic programs which have been reduced by three-fifths in a single year. I am concerned that small business, because it is not strong enough to protect itself, has been singled out for the worst treatment.

The members of our committee share this concern. Many of us have discussed these matters in detail, and several, including the Senator from Alaska (Mr. GRAVEL), have made timely and important contributions to the committee's work in this area.

WHAT CAN BE DONE

Fortunately, there are steps which can be taken that will provide some measure of relief to hard-pressed small firms. One of these is to free the SBA loan authority already provided by the Congress. Accordingly, I have urged the White House, in the letter to President Nixon to which I referred, to take immediate action in order to release the $170.2 million in SBA loan authorizations, and to take all other action which may be necessary to assure that the funds are carried over on the books of the SBA until the actual loans can be approved and disbursed. Of course, if any further congressional action is needed to reach this result, we urge the President to inform us of this, with his recommendations. The important thing is to get the job done.

Mr. President, it seems unfortunately clear that small business is headed for a credit crisis. I hope the administration will do what it can to avoid it. The action we have suggested can be taken now to mitigate some of the most undesirable consequences.

I, therefore, call upon the administration to begin its relief to the small business community by releasing the full amount of the lending authority for the section 7(a) business loan programs and small business investment company lending, together with other steps which are necessary to implement this action which are administrative and, therefore, conveniently within the control of the executive department.

We on the Small Business Committee stand ready to cooperate in these matters and will continue to do all we can in the Senate to meet this gathering emergency with affirmative and effective action.

For the information of all who are concerned, I ask unanimous consent that our letter to the President requesting release of SBA loan authority for fiscal year 1969 be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
SELECT COMMITTEE
ON SMALL BUSINESS,
Washington, D.C., June 25, 1969.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: May I respectfully call your attention to several fact situations which I believe are placing the 5½ million small businessmen of this country in an economic straitjacket as a result of skyrocketing bank interest rates and the absence of direct loan money from the Small Business Administration.

The Senate Select Committee on Small Business, of which I have the honor to be Chairman, has just concluded the preliminary phase of hearings on the legislative oversight of the Small Business Administration. Many of our members have expressed deep concern at the drastic reductions in both the budget requests for the SBA loan programs and Executive action reducing loan commitments substantially below amounts approved by the Congress.

According to our Committee's calculations, there remain, within SBA Section 7(a) financial assistance and investment company programs, loan authorizations totaling more than $170 million which will expire if not released before the end of this fiscal year. The amounts are in three categories, as follows: for the direct business loan program $59 million; for SBA's share of immediate participation loans $89.9 million; and for the SBIC lending program $21.3 million, for a total of $170.2 million.

It is my understanding that the release of such authority is for lending rather than spending, so that the budgetary "expenditure" features of these loans would be subject to an immediate offsetting repayment of principal and interest. Moreover, the amounts to be loaned are already in the SBA revolving fund so that no new "appropriations" would be required. Accordingly, expenditure controls would appear to be only a secondary consideration in this matter.

You will recall that last April the Department of Agriculture obtained release of $41 million for the Farmers Home Administration under similar conditions. I feel that small business is entitled to at least comparable treatment in government loan money availability in the face of credit needs of small business which, in the tightening money market, are becoming increasingly acute.

The prime bank rate has reached 8½% and other market instruments have followed suit, raising interest rates to their highest peaks in 100 years. Small, independent, and family businesses, which are less creditworthy than large national firms, customarily pay interest rates scaled upward from the prime.

With this background in the private sector, a cut in the public lending program of last resort in the order of 58.5% is creating

[7] "Another 'Prime' Rate Rise May Be Needed, U.S. Bankers, Meeting in Copenhagen, Say," by Richard F. Janssen, *Wall Street Journal* June 17, 1969, p. 4:2.

[9] "Money Market Crisis Could Hit This Month," by Peter S. Nagan, *Washington Post*, June 8, 1969, p. G3:3.

a massive squeeze on our 5½ million small businessmen.

Therefore, immediate action is required if small business is not to bear a disproportionate part of the sacrifices necessary to curtail inflation. This may be done administratively, beginning with the release of the full $170.2 million in Congressionally approved loan authority for fiscal year 1969 SBA and SBIC loan programs. This should extend to all necessary technical and implementing measures, which will allow this authority to be carried over on the books until these small business loans can be approved and disbursed. I urge that you instruct the Budget Bureau before June 30 to take the administrative action which is conveniently within your control, and to recommend to Congress whatever additional action may be needed to preserve the budget authority I have described so that it will not become permanently unavailable to the SBA and the small business community.

Very respectfully,

ALAN BIBLE, *Chairman.*

SBA LOAN FUNDS SHOULD BE RELEASED BEFORE JUNE 30

Mr. GRAVEL. Mr. President, the legislative oversight hearings of the Select Committee on Small Business now in progress clearly indicate that the executive branch has been gradually tightening the noose around the loan programs of the Small Business Administration.

As a junior member of this distinguished committee, I strongly support its most recent efforts to obtain economic justice for smaller firms. I commend the chairman, the Senator from Nevada (Mr. BIBLE), for his decision to reconvene the hearings in mid-July so that we may continue our scrutiny over the kind of assistance available to smaller firms from the Small Business Administration, the Department of Commerce, and the Nixon administration as a whole.

At this time, as Senator BIBLE has pointed out, there are few reasons for optimism.

From the testimony at the committee's public hearings June 10–12, it appears that SBA's lending funds have been drastically reduced several times within the past year and a half, and that the direct business loan program of the agency is, in fact, at a complete standstill.

These cutbacks have been of two types; first, reduced requests for funds in the President's budget, and, second, action by the Budget Bureau to roll back lending authority below congressionally approved budget levels. The results have been the same in both cases—the permanent unavailability of loan funds which small businessmen need and Congress is willing to provide through SBA programs. In fact, the results of these executive actions have been cumulative.

Chairman BIBLE has asked for the details of each of these reductions—how they were made and how deeply they have cut into SBA's capacity to do its job. The complete statistics will become available next month, but we are now in a position to review the preliminary figures already on the public record.

It was startling for me to learn that, for this year and next year, the SBA business loan program will actually show a minus figure for net lending, as shown in the following table:

MAJOR CREDIT PROGRAMS—COMMERCE AND TRANSPORTATION

[In millions of dollars]

Agency and programs	Fiscal years 1967 actual	1968 actual	1969 estimate	1970 estimate
Small Business Administration	101	176	−16	−46

Source: The Budget of the U.S. Government, for fiscal years 1969 (p. 115) and 1970 (p. 111).

This means, Mr. President, that more money is being taken out of the SBA loan program than is repaid in the principle and interest. For the 1970 fiscal year just ahead, the back-up will amount to nearly $50 million, which I believe should be immediately available for relending.

The amounts committed in loans by the executive branch are far below the levels which Congress has been willing to appropriate and has actually appropriated during this period. For instance, for fiscal year 1968, Congress approved a loan authority budget level of $88.3 million for the direct loan program. Of this, the executive branch would only commit $54 million. For fiscal year 1969 the SBA should have been provided with at least the previous year's $88 million, plus the restoration of the $34.3 million withheld in 1968 together with some extra funds to grow on. In fact, however, they were only allowed to request budget authority for a far lower direct loan level for current year ending June 30, 1969. Congress approved $77 million for this fiscal year. But the agency was not even allowed to commit this much. The figure was cut all the way back to $18 million. That $18 million was the amount that finally became available for direct loans after all of the cutbacks.

SBA LENDING HAS BEEN VIRTUALLY HALTED

As a consequence SBA ran out of direct loan authority midway through the year. The agency was forced to issue a directive virtually closing down the direct and participation business loan program in the following language:

> As far as FA (financial assistance) programs are concerned the 7(a) direct and immediate participation program levels have been most affected. Our FY 1969 Congressional appropriations submission reflected $77 million for 7(a) direct loans and $184 million for the SBA share of the IP (immediate participation) loans. While the original estimate of the effect of the Congressional action for these loans was a FY 1969 level of $155 million, $41 million direct and $114 million IP (SBA share), further analysis of income and expenditures has resulted in reductions to $18 million for 7(a) direct and 94.1 million for IP.
>
> In view of our first half year allocations, rates of approval and expenditures, and existing backlog, it became necessary to cut off immediately further acceptance of 7(a) direct loan applications. At the same time it was deemed essential that we preserve for the balance of the fiscal year as much of our 7(a) IP program as possible.
>
> However, with $52,4 million already allocated for 7(a) IP loans, only $41.7 million (SBA share) will be available for the last six months of the fiscal year; less than $7 million per month nationally.

The cutbacks in the direct loan authority by the executive branch left an unused $59 million in congressionally authorized budget loan level for fiscal year 1969. This authority can be turned over to the Small Business Administration provided action is taken before June 30. As long as the authority is released by that date it will not lapse and will be available for present or future use in the direct loan and participation programs. If this loan authority is not released, it will revert to the U.S. Treasury and will no longer be available for use in any SBA lending program.

Mr. President, anyone who has been reading the newspapers these days is aware of the compelling reasons of taking such action.

SMALL BUSINESS IS NOT KEEPING PACE

Although the economy has been expanding at a rapid rate, small firms have been precluded from gaining their fair share of these advances by the shortage and expense of capital. Defense procurement has flown up and away because of Vietnam but the small business share of military purchases has declined from 21.8 percent in 1966 to 16 percent in the last half of 1968. Corporate profits have likewise soared 32.8 percent, or almost one-third between 1964 and the beginning of 1969, but 50 giant companies at the summit of our economy account for 39.8 percent of all industry profits, according to the annual Fortune 500 survey.

A comparison among some of the advances in national income, with particular attention to professional firms, farm businesses, and other proprietorships which are predominantly small business, is contained in the following table:

Advances from 1964 to the beginning of 1969

[In billions of dollars]

	Percent
Proprietors' income:	
Business and professional	+18.9
Farm	+24.3
Corporate profits (after taxes)	+32.8
Gross national product	+36.1
Wages and salaries	+38.1

Source: "Federal Reserve Bulletin," May 1969, Tables A66 and A67.

It thus appears to me that the income of smaller and independent businessmen and farmers in this country are lagging behind most of the other indicators. One of the leading disabilities of the small businessman in this regard has been the steep climb, since 1965, of the prime interest rate to 8½ percent. Other forms of commercial financing have risen accordingly. As dizzy as the present peaks are, there have been newspaper reports that interest rates may even go higher before they turn down. In addition to this, the Federal Reserve Board, as a prudent anti-inflationary measure, is "reducing liquidity" in our financial system, which boils down to the fact that banks will end up with less money to loan at higher prices.

As the chairman of our committee has said:

> It has been acknowledged that new and small firms are normally under capitalized. The small local, or family firm, or any company with a new product is simply not in a position to compete for credit with a huge national corporation.

This is the background in the private money market against which the

massive cutbacks in the public loan program of the Small Business Administration should be viewed. I can think of no reason why small and independent businesses should be paying a disproportionate price for the Nation's involvement in Vietnam while the giant corporations net record profits, which are not even subject to an excess profits tax such as existed during all of the major armed conflicts of this century.

As I have said, the Small Business Committee will reexamine the Small Business Administration and the Department of Commerce with respect to these matters during July. We will be collecting further information upon which to base the committee's ultimate findings and recommendations.

ACTION SHOULD BE TAKEN

In the meantime, there is action which can be taken by the executive branch which can provide substantial relief. That is the release of the $170.2 million in loan authority which the executive branch has impounded for fiscal year 1969, and which will lapse if it is not released by the end of this month. There is a precedent for such a decision in the release of $41 million for Farmers Home Administration loans in April of this year. It seems to me that the small businessmen of this country are entitled to comparable treatment.

I therefore join in the call upon the Bureau of the Budget and President Nixon to release this $170.2 million SBA loan authority before June 30, including the $59 million for direct loans; the $89.9 million representing the SBA share of IP—immediate participation—loans and $21.3 million representing loan assistance to small business investment companies. In other words, I am asking for the release of the full $170.2 million for all SBA programs which the Congress approved for these programs before the end of fiscal year 1969. I understand that Chairman BIBLE has officially made this request in a recent letter to the White House, and I wish to give that recommendation my unqualified endorsement.

As the committee investigation proceeds, I shall continue to do all that I can to support a rebuilding of the SBA direct loan program as well as other SBA and Federal programs which can benefit the small business firms of Alaska and the rest of the Nation in the months and years ahead.

SENATOR GRIFFIN ANSWERS ABM DOUBTS

Mr. DIRKSEN. Mr. President, I ask unanimous consent to have printed in the RECORD an article entitled "Griffin Answers ABM Doubts," published in the Chicago Tribune of June 24, 1969.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Chicago Tribune, June 24, 1969]

GRIFFIN ANSWERS ABM DOUBTS

(By Willard Edwards)

WASHINGTON, June 23.—The answer came suddenly to Sen. Robert P. Griffin [R., Mich.], removing doubts about his vote on a great national issue, dissolving a mood of brooding irresolution.

For those citizens confused by the uproar of conflicting claims about an anti-ballistic missile [ABM] system for the United States, it may be comforting to learn that many responsible members of Congress, like Griffin, have been similarly bewildered.

The story of how Griffin made up his mind is instructive. He told it with typical candor, confessing the difficulty he found in understanding scientific arguments about the feasibility of the ABM. He could not but be impressed by the fact that a majority of the scientific community were opposed to it.

In the end, he did what reasonable men do in reaching a difficult decision. He drew upon his own knowledge and experience to apply common sense to a problem in a field where he was a novice and in which the experts themselves were quarreling.

Griffin is an authority on labor legislation [co-author of the Landrum-Griffin act] and it occurred to him that President Nixon, in forthcoming arms control negotiations with Russia, was in the position of a party to a labor dispute. Immediately, he knew what his stand had to be.

Let him tell the story:

"I delayed a long time before deciding. I am not a scientist. I found it very difficult to understand and evaluate the arguments of the impressive experts on both sides of the ABM question. Most seemed to be opposed to it."

"I thought back into history. Back in World War II, many in the scientific community said the atomic bomb could not be developed or not developed in time. The fact had to be faced that the Germans were in the process of developing it. I wonder what the world would be like today if we had decided against developing the bomb and Hitler had won that race.

"Again, in the development of the hydrogen bomb, many scientists said it couldn't be done. But it was done and it kept us ahead of the Soviet Union. I wondered where we would have been, during the missile crisis in Cuba, if we hadn't been as strong as we were at that time.

"Then I decided to look at the issue from a different point of view. Everyone is concerned about the arms race. Opponents of the ABM seem to regard it as an impediment to the possibility of reaching arms control with the Russians. I began to realize that just the opposite was true.

"It came to me that President Nixon, as he prepares to sit down at the negotiating table with Russia, is like a labor union leader negotiating with management on a contract.

"In such cases, the union members are almost always asked for strike authorization in the event of nonagreement. Many times, union members are not really in favor of going on strike at that point but they NEVER turn down their negotiators. It would be devastating for the members to repudiate their bargainers just as they sit down at the negotiating table.

"I can't imagine the Congress of the United States rejecting the President on his ABM proposal and thereby damaging his ability to negotiate in a meaningful way with the Soviet Union. I can't conceive it pulling the rug from under our chief negotiator as he's about to sit down at the table.

"And that's what we will be doing if we spurn his leadership in this difficult and complex situation."

Until last week, Griffin was one of the "undecided" senators wooed by both sides in an almost evenly divided chamber. His vote appeared to assure the Nixon administration of a clear majority—at least 51—when the final roll is called.

INCREASING CRIME RATES EMPHASIZES THE NEED TO ENACT S. 9, CRIMINAL INJURIES COMPENSATION ACT

Mr. YARBOROUGH. Mr. President, I would like to call the attention of my colleagues to an article which appeared on page A–11 of the Washington Post of Wednesday, June 25, 1969. This article reveals that the rate of reported crime is up 10 percent for the first 3 months of this year alone. The figures for the District of Columbia are particularly shocking.

These statistics underline the need for enactment of my bill, S. 9, the Criminal Injuries Compensation Act. As I have pointed out on numerous occasions, our present legal system concentrates on the criminal and virtually ignores the plight of the victims of crime. My proposal would correct this wrong, at least in the District of Columbia and certain other federally administered areas where it would apply.

This bill is now pending before the Judiciary Committee. I hope that hearings can be scheduled and that we can get action on this measure soon.

Mr. President, I ask unanimous consent that the article entitled "FBI's Statistics Show U.S. Crime Up 10 Percent," which appeared in the Washington Post on Wednesday, June 25, 1969, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FBI'S STATISTICS SHOW U.S. CRIME UP 10 PERCENT

Reported crime rose 10 per cent in the United States during the first three months of this year, according to statistics released by the FBI yesterday.

A breakdown showed the District of Columbia rated sixth highest in the Nation for the number of murders in that period.

Nationally, crimes of violence increased at double the rate of crimes against property. The Northeastern states received the brunt of this increase with 26 per cent more violent crime than for the same three months last year.

The statistics comparing the first three months in Washington this year with the corresponding period last year tell the following story:

Murders this year, 63, last year, 41; forcible rape, 77 and 53; robberies, 2788 and 1777; aggravated assaults, 707 and 705; burglary, breaking or entering, 4872 and 4007; larceny $50 and over 2177 and 1567, and auto theft, 2098 and 1948.

The report stated that crime in the Nation's suburban areas rose 11 per cent in the first quarter, one per cent more than in the cities.

IN THE NATION: TURNABOUT AMONG LIBERALS

Mr. CHURCH. Mr. President, Mr. Tom Wicker, writing in yesterday's New York Times, speaks favorably of the national commitments resolution in an article in which he takes note of "a new reliance by liberals on congressional responbility."

The article is highly pertinent to the current debate. Accordingly, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, June 24, 1969]

TURNABOUT AMONG LIBERALS

(By Tom Wicker)

WASHINGTON, June 23—Senator Frank Church of Idaho is generally considered a

liberal Democrat; and the most distinguishing feature of a liberal Democrat in recent decades has been that he believed in a strong Federal Government—hence, necessarily, in a powerful Presidency.

But Church took the Senate floor the other day to criticize, among other things, Franklin Roosevelt's World War II "destroyer deal," the manner in which Harry S. Truman put American forces into the Korean war, and the theory of a bipartisan foreign policy. The Roosevelt and Truman actions have been cited for years as splendid examples of the "strong Presidency" in action; and bipartisanship on foreign policy obviously tends to strengthen the hand of whatever President may be conducting the policy.

NATIONAL COMMITMENTS

Church was speaking in favor of the "National Commitments Resolution," and the strange circumstances surrounding this document are not limited to the fact that it was devised by liberals to restrain Presidents; its leading opponent is that pillar of Republican conservatism, Everett Dirksen, playing a most unfamiliar role as a defender of Presidential power.

The resolution expresses the sense of the Senate that "a national commitment by the United States to a foreign power necessarily and exclusively results from affirmative action taken by the executive and legislative branches"—for instance, a treaty or some other such "legislative instrumentality." Its intent is to restrain a President from making a commitment on his own to some foreign government, then claiming it as a "national commitment" that has to be honored by Congress.

THE VIETNAM EXPERIENCE

This resolution springs unquestionably from the Vietnam experience—an obscure "commitment" first made by President Eisenhower to the Diem regime in 1956, extended by President Kennedy, then transformed by President Johnson into a major war. The Tonkin Gulf Resolution, in which Congress voted Mr. Johnson a blank check it did not expect him to use, added an extra sting to the experience.

But even the resentments and disillusionments of the Vietnam years would hardly cause men with a broad outlook on the world, such as Church and J. W. Fulbright of Arkansas, to vote to "tie the President's hands" in the conduct of foreign affairs; they know well that under the Constitution all American Presidents who wanted to exercise it have had such a strong hand in foreign policy that Woodrow Wilson could say that it was virtually unlimited.

In fact, the commitments resolution—upon which the Senate soon will vote—will not tie any President's hands because he still would have exclusive power to act in any real national emergency, and because at other times the Senate would have no power of enforcement. Resolution or no resolution, Presidents will go on conducting American foreign affairs largely as they see fit, as long as the Constitution makes it possible and practicalities make it necessary.

The resolution might, however, put President Nixon and perhaps his successor on notice that at least this Congress and maybe its successor (things being as cyclical as they are) are in a mood to be much tougher on the whole question of national commitments—making a strong protest when, for example, promises are made to Spain that seem out of all proportion to the value of American bases there; or conducting determined investigations of other dubious American involvements abroad. This kind of sentiment is strong already in Congress, and the debate on the resolution may well generate more.

Perhaps there might be developed, too, a more questing public attitude toward national commitments. Does any government, no matter how inept or reactionary, deserve American assistance if its only virtue is anti-Communism? Obviously not, but then what is the American role in the world? What kind of assistance can we usefully offer? To whom and when?

GIVING PRESIDENTS PAUSE

Not only the people and Congress but Presidents themselves need to ask such questions more urgently and answer them more thoughtfully; and if pointed Senate action makes Presidents think long and hard before making far-reaching commitments, so much the better.

The Senate resolution is interesting, moreover, in that it seems to signal a new reliance by liberals on Congressional responsibility, a sharp departure from the old attitude of investing more and more power in a Presidency already too nearly out of control for comfort.

THE TEXAS FEDERATION OF WOMEN'S CLUBS SUPPORTS 100,000-ACRE BIG THICKET NATIONAL PARK IN SOUTHEAST TEXAS

Mr. YARBOROUGH. Mr. President, at their convention on May 7, 1969, the Texas Federation of Women's Clubs ratified a resolution asking the Congress to pass immediately my bill, S. 4, which calls for the establishment of a Big Thicket National Park containing at least 100,000 acres in southeast Texas.

The Texas Federation of Women's Clubs recognizes the necessity of preserving this beautiful and unique wilderness now, before its destruction is complete. The Big Thicket originally covered 3.5 million acres. Now, only 300,000 acres remain. Because of the many benefits a Big Thicket National Park would offer to the State, region, and Nation, the Texas Federation of Women's Clubs has made the preservation of at least 100,000 acres of the Big Thicket a special project.

Mr. President, I ask unanimous consent that the resolution of the Texas Federation of Women's Clubs be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

BIG THICKET NATIONAL PARK BILL

Whereas park officials the length and breadth of our country proclaim an overstrain on park facilities—due to the awesome increase of the nation's population—and plead for acquisition of additional land suitable for park use while such land is still procurable; and

Whereas the area of East Texas known as the Big Thicket, by nature of its unique ecology, great natural beauty, multifarious plant and animal life, and abundant fresh water supplies, has since 1938 been successfully approved by the National Park Service as a highly desirable site for a National Park; and

Whereas such a park at this site offers the certainty of many benefits—esthetic, scientific and economic—to nation, state and region; and

Whereas preservation of the Big Thicket has been declared a special project for the Texas Federation of Women's Clubs; therefore be it

Resolved, That the Texas Federation of Women's Clubs go on record as requesting the Congress to pass immediately S4 and set aside 100,000 acres of East Texas as a Big Thicket National Park.

Ratified May 7, 1969.

ADDRESS BY SENATOR CLIFFORD CASE ON THE QUESTION OF OUR NATIONAL SECURITY

Mr. BROOKE. Mr. President, on Monday, June 23, the distinguished senior Senator from New Jersey (Mr. CASE) addressed the annual convention of the American Library Association in Atlantic City, N.J., on the matter of our national defense.

At that time, Senator CASE pointed out, as he has done so often and so eloquently in the past, the dangers inherent in a continuation of the arms race. In his determination to educate the public as to the real dangers of MIRV, Senator CASE discussed the technical features of this new weapons system, the serious problems it would pose for inspection efforts, and the imminence of the last opportunity for a moratorium on tests and deployment.

I commend the Senator for his continuing efforts, and ask unanimous consent that the text of his address be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

PARTIAL TEXT OF ADDRESS BY SENATOR CLIFFORD P. CASE TO THE OPENING GENERAL SESSION, ANNUAL CONVENTION, AMERICAN LIBRARY ASSOCIATION, IN CONVENTION HALL, ATLANTIC CITY, N.J., JUNE 22, 1969

It is a great privilege to discuss with you tonight a concern that lies close to the heart of every American—the security of our country in a turbulent and hostile world.

For thirty years, this concern has overshadowed—when it has not completely dominated—our public and private lives.

For almost as long, this concern has focused on the portent of holocaust that is implicit in the nuclear arms race.

And it is about this arms race that I wish to speak.

The United States and the Soviet Union—not to mention Great Britain, France, and Communist China—have spent untold billions to acquire and perfect nuclear arsenals of unimaginably destructive power.

So frightening are these weapons, in fact, that to insure against their ever being used has long been the central objective of American strategic weapons policy.

To that end, we have placed major reliance on the concept of deterrence. Specifically, we have sought to persuade the Soviet Union that it would be suicidal to launch a nuclear attack against the United States because we would always retain the capacity to destroy them in return.

That we have had and continue to have such a capacity—that is, the weapons to assure destruction of the Soviet Union even after a massive first-strike against the United States—is unquestioned.

Nor does anyone question the fact that the Soviet Union exercises a similar deterrent against us. Both nations, in short, possess what is called a "second-strike capability" vis-a-vis the other, and it is this delicate "balance of terror" that has served—so far—to bar the use of nuclear weapons by either side.

Today, however, both nations are poised to cross the threshold of a new and potentially disastrous phase of the strategic arms race. And that is why the fullest public understanding of the issues involved is of such urgency.

Both the United States and the Soviet Union are about to introduce entirely new families of offensive missiles, the characteristics of which could destroy all hope of re-

lying on mutual deterrence to prevent nuclear war.

These new weapons are called MIRVs—an acronym for Multiple Independently Targetable Re-entry Vehicles.

Not only do MIRVs mean more than one warhead for each Intercontinental Ballistic Missile or ICBM—and our plans call for from three to fourteen warheads per missile—but each warhead would be capable of attacking a separate target.

At a minimum, the actual deployment of MIRVed missiles by both nations—at the cost of many additional billions over the next few years—would bring us to a point of no greater security than exists today.

The gravest threat of MIRV, however, is to the concept of deterrence. For such weapons point to the possibility of destroying so many of the other side's offensive missiles before they could be fired that a "first strike" would no longer so clearly be suicidal.

It is the development of such a first-strike capability that is so worrisome to all who have looked closely at the strategic weapons problem. Indeed, Secretary of Defense Laird has based the Administration's case for building the Safeguard anti-ballistic missile system on the contention that the Soviets are "going for a first-strike capability" by adding MIRVs to their largest missiles.

All of this would appear to be beyond the rational control of man were it not for two facts:

First, neither the United States nor the Soviet Union has fully developed MIRVs.

Second, both nations are preparing to enter bilateral negotiations for a Strategic Arms Limitation Treaty.

Taken together, these facts offer a real if fleeting opportunity to stay the mad momentum of nuclear armaments.

This week, more than forty members of the United States Senate joined in urging a moratorium on the further testing of MIRVs by both nations.

I myself have proposed an even more direct initiative. I believe that President Nixon should immediately suspend flight tests of MIRVs for so long as the Soviet Union does the same.

Along with Senator Brooke of Massachusetts, who has done so much to raise this issue to the fore, I know of nothing that is so certain to insure that the strategic arms race continues on an upward spiral as the deployment of MIRVs.

Today, thanks to independent surveillance systems, both the United States and the Soviet Union can count the other's offensive missiles and estimate with some assurance the damage they might do.

But once these missiles can be fitted with multiple warheads, and especially MIRVs, such assurance will not be possible.

Yet the only real hope of avoiding the deployment of MIRV warheads by both sides is to ban the testing of MIRVs before they have been fully developed.

And that moment is rapidly approaching. Indeed, when I first raised this question with Secretary Laird when he appeared before the Foreign Relations Committee three months ago, he said we would be deploying MIRVs "not in the too distant future."

The United States has already conducted quite a number of MIRV flight tests with Poseidon and Minuteman III missiles. The Soviet Union has also conducted flight tests of multiple warheads in the Pacific.

Whether they are testing true MIRVs or simpler MRVs—that is, multiple re-entry vehicles without independent guidance—has been a matter of some dispute in the intelligence community.

(Incidentally, my colleagues on the Foreign Relations Committee and I will be meeting with Secretary Laird and the Director of Central Intelligence tomorrow morning to clarify this matter.)

But whether the Soviets are testing MIRVs or simply MRVs is truly beside the point. For it is undisputed that the United States is substantially ahead of the Soviets in MIRV technology. And no one can maintain that a mutual moratorium on flight tests would enable the Soviets to overcome our lead.

More importantly, I know of no one who is prepared to dispute the proposition that, once MIRVs are fully tested by either or both sides, there would be no way of checking on compliance with an agreement *not* to deploy MIRVs except by detailed, on-site inspections which the Soviet Union would never agree to and we would not be likely to either.

The importance of immediate action to stop MIRV flight tests *now*—before they have been completed by either side—cannot, therefore, be overestimated. Upon taking this action *now* may well depend the possibility of any effective limitation on strategic armaments by agreement between our country and the Soviet Union.

On Thursday evening, the President indicated that talks might begin in early August. He said that he was considering the possibility of a moratorium on MIRV tests as part of any arms control agreement. But he rejected the initiative I have proposed, as being not in our interests.

Again, let me state, to avoid any possible misunderstanding, what my proposal is. It is very simple. It has two parts.

The first part is that, without waiting for anyone else, we immediately stop all flight tests of our MIRVs.

The second part is that we not resume such flight tests so long as the Soviet Union does not resume such tests.

I wholly disagree with the President that my proposal is not in our national interest. My proposal would entail no risk to our national security for these reasons:

We are substantially ahead of the Soviets in MIRV technology.

We can monitor their flight tests—as they can monitor ours. If they resume tests, we will know.

We can maintain our readiness to resume testing, as we must assume the Soviets would also do.

We can resume tests immediately should they decide to do so.

Obviously, this is not unilateral disarmament, or anything approaching it.

Certainly President Eisenhower did not think so when, just over ten years ago—on October 31, 1958—he announced that the United States would conduct no further tests of nuclear weapons in the atmosphere for so long as the Soviets did likewise.

The Soviets observed that moratorium for three years, until September 1, 1961, when they resumed testing. The United States then conducted further tests of its own. But the moratorium, even though broken, unquestionably paved the way for the partial Test Ban Treaty of 1963, which the Senate ratified by a vote of 80 to 19.

If we are ever to conclude a Strategic Arms Limitation Treaty with the Soviet Union, the terms of that agreement must be such that the President, the Senate, and the American people can be confident of our ability to detect violations that might jeopardize our safety.

We can have no such confidence once the Soviets have fully tested MIRV warheads. Nor could they have any such confidence once we have reached that stage.

Indeed, there is good reason to believe that, somewhere short of full testing, both nations would have to conclude that it was too late to enter a moratorium on testing with sufficient insurance that the other side could not deploy.

To speak then of a moratorium as part of an overall agreement that no one anticipates reaching for several years is tragically wide of the mark.

In fact, such an approach can only buttress what has been authoritatively reported to be the Defense Department's position.

This, in brief, is that the die has already been cast and that both the United States and the Soviet Union inevitably must proceed with the full development and deployment of MIRVs and of anti-ballistic missile systems, before entering into any agreement to freeze strategic weapons.

Such a prescription is the very antithesis of arms control. If adopted as the position of the United States Government, it would lead, in my judgment, to an intolerable escalation of arms.

At this critical juncture in the formation of national policy, it is not only proper but essential that the Legislative Branch seek to prevent the Executive Branch from leading our nation across a threshold of no return.

The only path to national security in the nucelar age lies in arms control, not in the proliferation of weapons.

The plateau on which the United States and the Soviet Union now stand is one that may be uniquely suited to a mutual halt.

We have not months, perhaps not many weeks, before it may be too late. If we wait for a mutual agreement to limit MIRV testing and deployment, the chances are we shall be too late. Under my proposal we would seize the initiative. We would do something while there still may be time. We would not just talk about doing something until the deadline for action has passed.

We must seize this opportunity to take the initiative before the inexorable forces of technology decree the defeat of man's best hope.

SENATOR MILLER ON "CAPITOL CLOAKROOM"

Mr. MUNDT. Mr. President, on June 18, the program "Capitol Cloakroom" consisted of an interview by several leading CBS news analysts and the distinguished senior Senator from Iowa (Mr. MILLER). Because of the timely nature of the questions discussed and the able and perceptive answers provided by my colleague from Iowa, I ask unanimous consent that a transcript of the program be printed in the RECORD.

Mr. President, I heard this panel discussion on my car radio and I found it to be both lively and informative.

I especially commend to my colleagues Senator MILLER'S highly pertinent and very informative discussion of the pros and cons of the ABM controversy.

There being no objection, the program was ordered to be printed in the RECORD, as follows:

CBS CAPITOL CLOAKROOM, JUNE 18, 1969

Participating: Senator MILLER, ROGER MUDD, GEORGE HERMAN, and DAVID DICK.

Q. Senator Miller, is the ten percent tax surcharge necessary to block runaway inflation?

Q. Senator, is the anti-ballistic missile issue being stalled to let passions cool in the Senate?

Q. What does the Republican rejection of Mayor John Lindsay signify?

Q. Welcome to Capitol Cloakroom, Senator Miller. Your committee membership—Finance, Agriculture, Joint Economic and the GOP Senatorial Campaign Committee—prompts a long list of questions and we'll begin with Finance, with your permission, and taxation and inflation. The other day the House Ways and Means Committee cleared a modified extension of the ten percent tax surcharge, ten percent until January and five percent until June. As you in favor of it and

do you think it's necessary to stop or block what Treasury Secretary David Kennedy fears will be runaway inflation.

A. Well, I'm in favor of it and as far as its necessity is concerned I think you know that the best thinking in the Administration certainly is that it is necessary. However, let's put it in perspective. It's necessary only as a part of a package. The ten percent surcharge by itself is not going to do the job on inflation. If you're going to do a job on the inflation problem, you have to work on it on both the monetary and the fiscal sides of the ledger. On the monetary side, I think that the Federal Reserve Board is increasing the money supply at a very moderate rate and it has increased the rediscount rate substantially, which results in higher interest rates. And that takes care of that one side. The other side of the ledger is the fiscal side, and that means taxes and spending and you have to have both. During the debate at the time the surcharge was first proposed, it was brought out, I think, very clearly that nobody who was voting for the ten percent surcharge expected this to have an anti-inflationary impact immediately (in fact, not for several months, if not years), because people who would have to pay more taxes and still wanted to make purchases would dig into their savings and make the purchases just the same. And it was sounded loud and clear that the best way to have an immediate impact on the inflation picture was to have a curb in federal spending. And that's why we insisted, you may remember, that if we were going to respond to President Johnson's surcharge request that President Johnson would also have to be willing to accept a $6 billion reduction in federal spending. And so, with the passage of the surtax, this is not going to get the job done unless the Congress cooperates with the Administration in holding down federal spending too. And with that kind of a package we can do a job on inflation.

Q. Holding down how much?

A. Well, certainly holding it down to the extent that the amount of federal borrowing is going to be minimized, preferably eliminated.

Q. During the course of a great deal of this testimony about why the surtax in 1968 didn't control inflation any better than it did, there was a good deal of sort of backward looking that perhaps the Federal Reserve Board had been working in the opposite direction from the surtax. Do you think something should be done, as has often been suggested here, to get the Federal Reserve Board in a little better coordination with the Administration and with Congress?

A. Well, there are two schools of thought on this, as you well know. One is to have the Federal Reserve Board exist as a very independent body; the other is to make it subject to Administrative dictates. I can see where either school of thought could prevail at a given period of time. However, my personal view is that the independence of the Federal Reserve Board is going to be best in the long run, and will not be changed subject to the whims of an Administration which may be in and out of office. But certainly the Federal Reserve Board by increasing the money supply at an unduly fast rate last year went contrary to the fiscal policy which Congress and the Administration itself had dictated. And now they have confessed to their error and we will trust that they will not fall into a similar error in the future.

Q. Senator, there's a portion of this bipartisan effort which includes removing some low-income families from the rolls and there are some members of Congress who refer to this as a "sweetener." Is this the extent of tax reform that you expect this year?

A. No. Most of us expect to have two packages of tax measures. The first one I refer to as a "mini-package," which consists of the ten percent surcharge, "sweetened" up, if you wish to use that term, by certain measures such as the removal of a number of low income taxpayers from the impact of federal income taxes, such as repeal or modification, at the very least, of the investment tax credit. Maybe one or two other items. That's the mini-package; that's the one that we need to get out of the way very, very quickly.

Q. And continuing the excise taxes.

A. And continuing the excise taxes. Now, as a follow-on however, I think that there is great expectation that the House Ways and Means Committee will send out a package, a substantial package, of tax reform proposals sometime by mid-summer or the latter part of the summer; and then, if the session continues on through the fall, as all indications are that it will, then the Senate Finance Committee will get around to working on that and probably have this second package out by the end of the year. The second package, of course, would include a number of things, not the least of which would be substantial reform of tax exempt private foundations, and this alone could occupy a considerable amount of the time of the Congress. But I think two packages are due this year.

Q. You didn't mention reform on the twenty-seven and one-half percent oil depletion allowance. Do you favor that?

A. Well, I have always opposed the arbitrary, meat-ax approach to cutting down on percentage depletion, be it percentage depletion in the oil and gas industry or percentage depletion in other minerals. And, you know, this could go clear down to five percent percentage depletion on sand and gravel. I think that the Administration's proposal in the form of a minimum tax approach is a pretty good way of handling this. Now, in other words, we might argue about whether there should be a change in percentage depletion; we might argue whether there should be a change in longterm capital gains; whether there should be a change in tax exempt municipal bond interest. But there's one thing I would hope we could get together on and that is that regardless of where this tax exempt income comes from, people should pay a certain amount of tax. And that's what the minimum tax approach is all about. And I think that it's a very good way of dealing with this problem, certainly in the short run. It avoids all the arguments, when you meet each one of these items head on, and at the same time I think it satisfies the bulk of the American tax paying public by assuring them that regardless of where this comes from people are going to pay some taxes.

Q. Senator, in discussing inflation with monetary experts in the government, many say that there's a growing body of evidence that the greatest enemy the Administration has is what they call inflation psychology, that people now believe inflation is a permanent part of our lives, almost a self-fulfilling prophecy. If they believe prices go up, they're going to go up. How does the Administration combat that?

A. Well, Roger, we all have our ideas on it. I have my own and I'm very glad you asked that question. I think that a good many of your so-called smart money people are counting on the Congress to not change its spots. And, as you well know, over the last eight years the Congress has had the proclivity of running our federal government billions and billions of dollars deeper in debt year after year after year. Now, you still have generally the same makeup of the Congress in 1969, and some of the smart money boys are betting on the fact that the Congress is not going to change its spots and it's going to continue to appropriate more money than the federal government takes in and, of course, if they do, then we're going to have continued inflation and high interest rates.

Q. Well, the Congress isn't primarily to blame for inflation, is it?

A. Oh, I think it is. This is where it starts, because, when a majority of the members of Congress vote to run your federal government billions and billions deeper in debt, as night follows day you're going to have inflation. Now you can talk about wage increases and price increases as aggravating inflation, and, of course, if they're unduly high they will aggravate inflation. But it starts right here on Capitol Hill. And until you have a majority of the members of Congress who refuse to vote more spending than we take in, you're going to have more inflation. And so I can understand why some smart money people are counting on the Congress not changing its policy and continuing the inflationary fiscal policies that they have followed here for the last eight years. I don't think they will this year. And when the people of the United States find that Congress is going to hold a rein on federal spending and is going to meet the fiscal requirements by coupling spending and taxing in a package that will bring us out pretty well, even-steven, then the inflationary psychology will go out of the window. Now, that won't happen, however, until later on this year when we have taken action on our appropriation bills. And so I personally do not think that the inflationary psychology will tone down enough to start getting the job down on inflation until probably this fall.

Q. And to do your part you'd be willing to vote against appropriations that would help Iowa?

A. I've said on the floor many times that Iowa, by my vote, will be pleased to take its fair share of reduction of spending in order to do a job on inflation.

Q. What's the impact on all of this balance between income and outgo of the federal government of the tax reform bill. Will it bring in more money or will it bring in less? This is the second package, the tax reform package.

A. Well, according to the Administration's proposals and desires, you know they desire to have a package which will pretty well even out; in other words, there will be some areas which will cost the revenue and there will be others which will bring in more revenue. For example, closing some of the loopholes on tax exempt foundations unquestionably will bring in more revenue. On the other hand, if there is a liberalization of moving expense deductions, that will cost the revenue. I think it would be very unfortunate if the package was not a relatively balanced package so that income and outgo would be just about the same.

Q. One of the things they're talking about cutting when they start talking now about cutting expenses is what used to be sacrosanct—military spending. One of the items that everybody's been accepting as a sort of symbol is the anti-ballistic missile. Now there was a big fuss here a couple of weeks, a month ago and you haven't heard much about it lately. Is it being quietly stalled so that we'll forget about it?

A. Well, I don't know. The leadership would probably tell you that it's not being deliberately stalled at all. There's no particular hurry on it. After all, you want to realize that this is an issue which was, I think, prematurely got out into the open. It's a part of the military authorization measure, and that isn't going to be due out until July anyhow. And in previous years, as I recall, the military measure doesn't come out until July or August. And until it does come out for action, then we're not going to meet this issue headon with roll call votes in the Senate. I just think that it was prematurely raised.

Q. The President raised it, though, did he not?

A. Well, I think the President raised it in that he took a position on it. But even before the President raised it, there were speeches being made about the anti-ballistic missile. Actually, you remember, this

was raised at least two and, I think, three times last year. We had three different debates down here on the floor, at various stages of our legislative program, on the anti-ballistic missile. So, it's pretty much old hat.

Q. Are you in favor of the President's Safeguard proposal?

A. Yes, I am. And I want to make it very clear that I understand, and I think most of us who favor it, understand, that there are some good decent, conscientious American citizens who disagree with us. It's a very difficult thing for the average human being, certainly the average voter, to make a judgment on this. It's a very difficult thing for the average Senator, because we're not scientists. I'm not a physicist. What do I do when somebody says "well, the ABM won't work," and someone else says "the ABM will work"? And they're both scientists.

Q. Why did you decide it would work, then?

A. Well, I placed my chips in the basket of Dr. Wigner, the Nobel Laureate of Princeton University.

Q. Why him?

A. Well, I'll tell you. Of all the physicists in the world, he's the only one that has received the four top awards for physics—Nobel Peace Prize, the Fermi Award, the National Science Medal and one other. He is preeminent in his field. I'll take him compared to a thousand other physicists.

Now, when they achieve his recognition, maybe I'll be more inclined to listen to them. It's a case of where you put your chips. You want to play golf. Are you going to put your chips with Jack Nicklaus or some unknown or somebody who's just starting in?

Q. Dr. Hans Bethe?

A. Well, all I can tell you is this: There's nobody in the physics field who has attained the achievements that Dr. Wigner has attained.

Q. But his awards were not in recognition for his work in the ABM field, were they?

A. Well, the question is one of physics as to whether the ABM will or will not work.

Q. Well, it's a question of testing it, isn't it? Don't both sides admit you really won't know until you test it?

A. No, I don't think so. I think that your physicists like Dr. Wigner will tell you that it will work. Of course, you have to have testing to check out certain things. The development of the hydrogen bomb should be recalled. You may remember one noted physicist, Dr. Oppenheimer, said it wouldn't work. Since then he has come up with an admission that he was wrong.

Q. Senator, in the taxpayers' mind it seems that there are misgivings that the Nixon Administration may be losing ground on two fronts—the inflation crisis at home and a speedy conclusion of the war in Vietnam. Do you share that concern?

A. Well, I certainly am concerned about both of those points. And I don't know about anybody who isn't. However, I don't think the Administration is losing ground. And I don't think that it should either lose ground or gain ground. I think it would be very shortsighted for anybody to expect that a new President and a new Administration and a new Congress could get this inflationary momentum tailed back in a relatively short period of time. As a matter of fact, I don't think that anybody, certainly not me, certainly not the President's Council of Economic Advisers, certainly not the chairmen of various committees around here, really appreciated the impact on this economy of ours of the $25 billion budget deficit that we had a year and a half ago. I don't think anybody dreamed what that impact was. And we're beginning to find out what a horrible impact it had, and it's just going to take a while to work it out; and you're going to have to have both the Congress and the Administration working together. If the Congress doesn't work with the Administration by getting this budget of ours into a reasonable balance, it's going to get worse.

Q. Senator, before we shift to politics, may I ask you if you believe inflation to be a permanent part of our lives?

A. No, and I think it would be most unfortunate for anybody to say so. I understand that there are some so-called "new economists" who preach that doctrine. Of course, when they do, they're flying in the face of a national economic policy which was declared in a bi-partisan bill passed by Congress in 1946 known as the Employment Act of 1946, which set forth twin goals for our national policy objectives. Those twin goals are full employment and a stable dollar. And when they said a stable dollar, they weren't talking about inflation as being a permanent fixture in this country. For somebody to come along and say you can't attain both of those goals—if you're going to have full employment you've got to have inflation or if you're going to have a stable dollar you're going to have unemployment—is a confession of failure of the capitalistic economic system. And I'm not about to join in such a confession.

Q. Does a stable dollar mean no yearly rise at all?

A. That's right.

Q. Or does it mean what was sometimes talked about in the Eisenhower years as two percent a year.

A. No, a stable dollar means a stable dollar-period. And I'm pleased to say that, for the first time in nine years, I have heard a spokesman for the Administration, Dr. Paul McCracken, the Chairman of the Council of Economic Advisers, state that the objective of this Administration is zero inflation.

Q. Senator, I'd like to ask you a specific political question. What does the Republican rejection of Mayor John Lindsay mean to you?

A. Well, first of all, this is pretty early to give you a definite answer. In any election there has to be a certain amount of very careful analysis, lest you make some premature judgments. I don't think that the analysis has been made that would enable one, that is in depth, to answer that question. It'll entail some polling, I'm sure. In the second place, I want to emphasize this: And that is that New York City politics is an area of its own. The New York Republican Party, the New York City Republican Party, the New York City Democratic Party, are not by any means indicative of the national parties or the national scene.

Q. But if you back up and take the victory of the former police chief in Minneapolis or Yorty in Los Angeles, New York may be indicative, mightn't it?

A. Now, I'll agree with you. If you can bring in other cities around the country besides New York City, then you may well find a pattern. But to take New York City by itself and say here's what happened in a primary election in New York City; therefore, this is a national trend would be most erroneous. Now, if you're going to bring in Minneapolis and Los Angeles and New York, and you seem to see a pattern forming there I think you have a point. And the point seems to be that people want to have safe streets, and they want to have a firmer attitude towards crime and violence. And certainly that is what the analyses show as the cause of the Minneapolis election and probably, to some extent, the Los Angeles election.

Q. What I was trying to get at was what effect that trend would have on you and the Senate. Would it slow down the Senate; would the trend of law and order be felt here on the Hill?

A. I think that it will be observed, but I have the feeling that the law-and-order, and reduction and minimization of violence and crime trend arrived on Capitol Hill loud and clear a year or two ago. In other words, I think that what happened in Minneapolis, for example, really is a revelation of what we had revealed to us last year at the time we were taking action of Safe Streets bill.

Q. Now you have a half dozen members of the Senate who are liberals, mostly Democrats who are elected by less than 55 percent. Do you think that these liberals are now endangered in 1970? I mean, the half dozen who are up in 1970.

A. Well, I would have to tell you this, as a member of the Republican Senatorial Campaign Committee, that any elections with that kind of a margin we deem to be marginal seats and they are in our target sights.

Q. Hugh Scott in Pennsylvania?

A. Well, I thought you were talking about Democratic seats.

Q. I'm talking about liberals in general.

A. Well, now, if you're talking about Republican seats where there's a 55 percent vote, then they're going to be in the target sights of our Democratic friends. That's the way we play the ballgame. And those are marginal seats by either party's definition.

Q. Who'll be the easiest Democratic Senator to knock off in '70, Senator?

A. Well, I don't think that we have concluded that there would be anyone who would be easiest, but I can tell you that there are about a dozen of those seats that we think we have a real chance of picking up. The reason is that there has been a Republican trend. We have Republican governors in a good many of those states. The people seem to be responding more to Republican philosophy and to Republican candidates, especially if they are, as they usually have been lately, young, attractive, dynamic people with progressive and yet responsible viewpoints. So, I think that . . . I wouldn't single out any particular one; I just tell you that there are twelve that are in our target sights as real possibilities.

Q. In the thirty seconds we have, are you willing to join your Republican colleague, Senator Goodell, in challenging your party leader, Mr. Dirksen, to remove his opposition to the appointment of Dr. Knowles to the HEW?

A. Well, I haven't made a thorough study of the Dr. Knowles appointment. I am somewhat distressed by the impasse that has existed for a long time. But I have the feeling that Senator Dirksen has some points to support his position. I would like to have this thing debated a little more behind closed doors than it has been to date. I think that it, perhaps, will be. I have had my attention invited to a record during a hearing which indicates that Dr. Knowles might have some tough sledding if he comes up for confirmation in the Senate.

Q. We've got to close our doors now, Senator. Thank you for being with us on Capitol Cloakroom.

INFORMATION CONCERNING FUNDS FOR IMPACT AREA LEGISLATION

Mr. YARBOROUGH. Mr. President, because I know of the great interest Senators have in the impacted areas legislation—Public Law 874—I bring to their attention the most current information on the impact of the administration budget proposals on the school districts affected in each State. I feel sure that this information can be most useful to each Senator in coming to his own evaluation of the adequacy of the funding proposed.

Mr. President, I ask unanimous consent that the letter addressed to me under date of June 12, 1969, by the Honorable James E. Allen, Jr., and the

appended tables be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,
OFFICE OF EDUCATION,
Washington, D. C., June 12, 1969.

Hon. RALPH YARBOROUGH,
Chairman, Committee on Labor and Public Welfare, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: We are pleased to provide the latest information that is available regarding entitlements to school districts under Title I of Public Law 81-874, in response to your letter of May 16. The table (enclosure A) shows the number of "a" and "b" children and the amounts for each, by Congressional District, for Fiscal Year 1968.

Initial applications for Fiscal Year 1969 funds are being processed now, many having been received near the deadline date of March 31, 1969. Approximately one-fourth of the 4,560 applications have not been processed. Precise entitlements for each applicant will not be known until final data is submitted by each applicant by September 30, 1969. The 1968 amounts are estimated to increase by approximately 32 percent in 1970. (One of the difficulties in projecting estimates for every applicant is that the rate of payment per child varies from State to State and, in many States, from school district to school district.)

A second table (enclosure B) presents a fairly accurate picture of the effect that the 1970 budget request would have on each State. Amounts required for full funding and for funding only "a" pupils and Section 6 are shown for each State, as well as the difference between the two. The difference would be that amount necessary for funding category "b" pupils and other Sections of the Act. Being a State table, it cannot indicate school districts that will not receive any entitlement because they educate only category "b" pupils. Also, it does not show the school districts which will receive only a small entitlement because they educate mostly "b" pupils and only a few "a" pupils.

It is estimated that categories "a" and Section 6 pupils will number about 457,000 in 1970; there will be approximately two and one half million "b" pupils in 1970.

Sincerely yours,

JAMES E. ALLEN, Jr.,
Assistant Secretary for Education and U.S. Commissioner of Education.

CONSTRUCTION-DIFFERENTIAL SUBSIDY

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 258, H.R. 265. I do this so that the bill will become the pending business for tomorrow.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 265) to amend section 502 of the Merchant Marine Act, 1936, relating to construction-differential subsidies.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

ORDER FOR ADJOURNMENT UNTIL 12 O'CLOCK NOON TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT

Mr. MANSFIELD. Mr. President, if there is no further business to come before the Senate, I move, in accordance with the previous order, that the Senate adjourn until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 6 o'clock and 40 minutes p.m.) the Senate adjourned until tomorrow, Thursday, June 26, 1969, at 12 o'clock noon.

NOMINATIONS

Executive nominations received by the Senate June 25, 1969:

U.S. ASSAY OFFICE

Nicholas Costanzo, of New York to be Superintendent of the U.S. Assay Office at New York, N.Y.

CONFIRMATION

Executive nominations confirmed by the Senate June 25, 1969:

DEPARTMENT OF JUSTICE

Robert B. Krupansky, of Ohio, to be U.S. attorney for the northern district of Ohio for the term of 4 years.

HOUSE OF REPRESENTATIVES—*Wednesday, June 25, 1969*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

In every nation he who fears God and does what is right is acceptable to Him.—Acts 10: 35.

O God, our Father, who hast bidden us to let our light so shine before men that they may see our good works and glorify Thee, grant us grace to be faithful leaders of our people, thoughtful in our thinking, wise in our wisdom, genuine in our goodness, and with hearts ever open to Thee. Weave our lives and the life of our Nation into the struggle for freedom and justice and peace in our world.

Guide Thou our President, our Speaker, and these Members of Congress in their endeavor to find a just basis for the ending of war and in their efforts to discover a strong foundation for international cooperation and peace.

Awaken in our people an abounding good will and tie it to an adventurous willingness to work with Thee for the good of all.

To this end we commit our lives in the spirit of Jesus Christ, our Lord. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed, with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 4297. An act to amend the act of November 8, 1966.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 38. An act to consent to the upper Niobrara River compact between the States of Wyoming and Nebraska;

S. 952. An act to provide for the appointment of additional district judges, and for other purposes;

S.J. Res. 11. Joint resolution to provide for the appointment of Robert Strange McNamara as Citizen Regent of the Board of Regents of the Smithsonian Institution; and

S.J. Res. 126. Joint resolution to increase the appropriation authorization for the food stamp program for fiscal 1970 to $750,000,000.

SECOND CONGRESSIONAL DISTRICT OF MONTANA RETURNS TO THE FOLD

(Mr. OLSEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OLSEN. Mr. Speaker, I have an important announcement to make, that the Second Congressional District of Montana has returned to the Democratic fold.

The new Member is John Melcher, of Forsyth, Mont., a former State senator and former member of our house of representatives in Montana. He is a veterinarian and operates as well a feed lot and cattle business. He is a very progressive and fine Representative for Montana and, of course, for the United States.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. OLSEN. I yield to the gentleman.

Mr. ALBERT. Mr. Speaker, I thank the gentleman for yielding. This is one of the most important elections held in this country for a long time. It was certainly pleasing to me to hear the gentleman from Montana make his announcement, as I am sure it has been pleasing to all Members on both sides of the aisle, because we are getting into the Congress a very fine addition to our ranks.

I think it is very significant that John Melcher has won an election in a district that has not gone Democratic since 1958, in a district that President Nixon carried last fall by 17,670, and our former colleague, Mr. Battin, carried by 44,136 in the last general election. This district has been Republican by votes of 55 percent in 1962, 54 percent in 1964, 60 percent in 1966, and 68 percent in 1968.

This is the third out of four special elections that have been won by Democrats this year. This is one of two districts that have been held by Republicans. This makes this Congress only two short of the majority we had in the last Congress. We are on our way. We are going to have our majority back.

QUALIFICATIONS FOR APPOINTMENT TO SUPREME COURT

(Mr. DORN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DORN. Mr. Speaker, the American people have been shocked beyond measure at some of the recent decisions of our Supreme Court and the conduct of some of its members.

I have the highest esteem for the legal profession and for the judges serving with devotion and dedication, both State and Federal throughout the Nation; however, I do believe that the time has come in a democracy such as ours to set qualifications for membership and tenure of office for the Supreme Court. The time has come to provide for a review of the stewardship of its members. If we are ever to curb the excessive power of the Supreme Court and preserve our freedom, now is the time. The highest ethical standards of conduct are absolutely necessary in the highest court of our land. Standards of conduct are necessary for the Congress and the executive branch as well.

Mr. Speaker, I join many of my colleagues in introducing legislation which would set qualifications and tenure for members of the U.S. Supreme Court. My bill would require that members be natural-born citizens of the United States who have attained at least 35 years of age upon taking office. It would require that a person must have served as either a Federal or State judge or some combination of both for at least 10 years, and at least 5 years of this time shall have been served as an appellate judge. The appointment to the Court would be for 10 years. A Justice may serve for more than one 10-year term with the consent of the Senate. Members of the Court shall hold their offices during good behavior and adherence to high ethical standards.

PERMISSION FOR SUBCOMMITTEE ON FISHERIES AND WILDLIFE CONSERVATION, COMMITTEE ON MERCHANT MARINE AND FISHERIES, TO SIT DURING GENERAL DEBATE TODAY

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that the Subcommittee on Fisheries and Wildlife Conservation of the Committee on Merchant Marine and Fisheries be permitted to sit this afternoon for the purpose of taking testimony during general debate.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

COUNTING THE VOTES ON SURTAX EXTENSION

(Mr. HAYS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. HAYS. Mr. Speaker, in the years gone by I have heard a great deal of moaning and groaning from the other side about arm twisting from the executive branch. A member of the press has just told me the minority leader, the gentleman from Michigan (Mr. GERALD R. FORD), had told the press a few minutes ago he had 170 votes on his side for the tax bill.

Mr. FORD should know more about how many votes he has on that side than I do, but just as a precautionary matter it might be wise for him to review his addition, because I think he may be a little high on his estimate.

THE NEED FOR IMMEDIATE TAX REFORM

(Mr. VANIK asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. VANIK. Mr. Speaker, the delay which has been afforded in the consideration of the surtax in the House of Representatives provides those on both sides of this issue an opportunity to reflect on their positions.

The American people have a right to know how President Nixon stands on basic tax reforms to close major loopholes. They have already heard that he wants to extend the surtax.

How does President Nixon stand on oil depletion allowance reduction, imposition of capital gains at death, minimum tax on wealth, and reducing stock options?

During the past few weeks of deliberation on the surtax and tax reform, it has seemed clear that the administration has had a sufficient majority of its own party in the House to protect loopholes in the law. It is now high time that the mandate of the American people be recognized by the administration, and those gapping tax loopholes be closed forthwith. To do so, it is likely that the Democrats in the House could produce the necessary votes to complement Republican support for this proposition.

If the President does not intend to stand firmly behind tax reform now, then the American people have a right to know.

In the absence of firm commitments in favor of strong tax reforms from the President and his administration, prospects for any action on the surtax will indeed be grim, next Monday, or next month.

I have already been informed by WRIGHT PATMAN, chairman of the House Banking and Currency Committee and Joint Economic Committee, that he has now expressed his opposition to extension of the surtax. It is my hope that any other Members committed to the passage of the surtax will now review this position. The administration must understand that there can be no further action on the surtax without a clear-cut program of meaningful, revenue-producing tax reform. This responsible position deserves the support of every Member of the House of Representatives.

PERSONAL EXEMPTION INCREASE—PROGRESS REPORT

(Mr. SAYLOR asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. SAYLOR. Mr. Speaker, as promised in a letter to our colleagues dated June 13, I am keeping the House posted on the progress of my drive to find additional Members to support a bill to raise the personal exemption amount to

$1,000. Today I have introduced a bill along with 24 of our colleagues that would effect this needed reform in the income tax laws. I am extremely pleased to report that in addition to the Members joining me on this new bill, eight others have introduced similar legislation in the past 2 weeks.

When I began the drive, I pointed out that 155 Members were in support of various proposals to raise the personal exemption amount. As it stands now, there are 185 Members supporting the legislation. The goal is 218 Members and I am more and more confident that the remaining 33 supporters will come forward and join the bandwagon that is forming. I plan to introduce another bill with additional Members, and invite those who wish to join this crusade to call my office.

With 218 Members supporting H.R. 12120 and similar bills, we are convinced that the Committee on Ways and Means will include this reform in the package of tax reform legislation for this year. The real winner in this movement is the middle-income taxpayer. That taxpayer has been ignored far too long, yet he is the one that carries the heaviest burden of Federal income taxes. Raising the personal exemption amount is a first step toward providing this taxpayer with the relief he so justly deserves.

CALL OF THE HOUSE

Mr. WAGGONNER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 90]

Andrews, Ala.	Hébert	O'Hara
Ashley	Heckler, Mass.	Ottinger
Blatnik	Hull	Pelly
Buchanan	Joelson	Pepper
Button	Kirwan	Powell
Carey	Kuykendall	Pryor, Ark.
Clark	Landgrebe	Rees
Diggs	McDonald, Mich.	Rosenthal
Esch	Mailliard	Rostenkowski
Fisher	Mann	Satterfield
Gallagher	Miller, Calif.	Scherle
Gettys	Mills	Stephens
Gude	Murphy, N.Y.	Stuckey
Hagan	Nedzi	Thompson, N.J.
Hawkins		Wolff

The SPEAKER pro tempore (Mr. HOLIFIELD). On this rollcall 387 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PERMISSION FOR SUBCOMMITTEE ON ELECTIONS, COMMITTEE ON HOUSE ADMINISTRATION, TO SIT DURING GENERAL DEBATE TODAY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the Subcommittee on Elections of the Committee on House Administration may sit during general debate today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PROVIDING FOR AN ADDITIONAL CLERK FOR ALL HOUSE MEMBERS

Mr. FRIEDEL. Mr. Speaker, by direction of the Committee on House Administration, I submit a privileged report (Rept. No. 91–327) on the resolution (H. Res. 357) providing for an additional clerk for all House Members, and ask for immediate consideration of the resolution.

The Clerk read the resolution, as follows:

H. RES. 357

Resolved, That, effective on the first day of the first month which begins after the date of adoption of this resolution, there shall be paid out of the contingent fund of the House, until otherwise provided by law, such sums as may be necessary to increase the basic clerk hire allowance of each Member and the Resident Commissioner from Puerto Rico by an additional $2,500 per annum, and each such Member and Resident Commissioner shall be entitled to one clerk in addition to those to which he is otherwise entitled.

With the following committee amendment:

On page 1, after line 9, insert the following: "SEC. 2. Until otherwise provided by law, the increases in rates of pay provided by section 2(b) of House Resolution 441, Ninety-first Congress, shall be paid out of the contingent fund of the House of Representatives."

The SPEAKER pro tempore. The gentleman from Maryland (Mr. FRIEDEL) is recognized for 1 hour.

Mr. FRIEDEL. Mr. Speaker, House Resolution 357 authorizes each Member, as he needs, one additional clerk, and an increase in his basic clerk-hire allowance of $2,500.

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. FRIEDEL. Mr. Speaker, I yield to the gentleman from Iowa.

Mr. KYL. Mr. Speaker, if this proposal called for additional clerk-hire for those Members whose districts are of such size they can justify a need for additional help I would not object to it. I do object.

In the first place, I doubt the need.

In the second place, I believe the timing in this kind of activity is all wrong. At a time we are talking about a surtax and investment credits and increases in salaries for all kinds of groups across the country I believe we not only discredit to our good sense, but also do violence to this institution which we represent.

I hope there are sufficient Members here who are willing to stand up and be counted when we do have a vote on this matter, because I intend to ask for a rollcall.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. FRIEDEL. I yield to the gentleman from Iowa.

Mr. GROSS. What is the cost of this legislation?

Mr. FRIEDEL. Well, it is almost impossible to predict. Even at the present time every Member does not use his full clerk-hire allowance. It is difficult to say how many will need it. If they do not need the additional allowance, the money is not spent.

Mr. GROSS. Is it not a fact that this can run to about $3.6 million?

Mr. FRIEDEL. Is that $3.6 million?

Mr. GROSS. Yes, sir.

Mr. FRIEDEL. If 100 percent of the Members utilized the additional allowance it could approximate that figure. However, the fact is that a vast number of Members do not currently use all of their allowance and we could hardly expect all Members to utilize this additional sum.

Mr. GROSS. Just a minute. What is the limit on a base pay of $2,500?

Mr. FRIEDEL. I believe it amounts to $7,897.

Mr. GROSS. The gentleman says it is a little more than $6,000. It is $7,500, is it not? The gentleman knows, I am sure, it is at least $7,500. Would he care to multiply 436 by $7,500, as the possible cost of this resolution?

Mr. FRIEDEL. The gentleman is using the case that every Member would take advantage of it, and that has not been proved over the years.

Mr. GROSS. I might just as well assume that every Member would take advantage of it as that not all Members would take advantage of it.

Let me ask the gentleman this question: Where is it proposed to get the money to foot this kind of bill?

Mr. FRIEDEL. Where is what? I did not follow the question.

Mr. GROSS. Where is it proposed to get the money for this kind of bill?

Mr. FRIEDEL. This money will come out of appropriations to the contingent fund.

Mr. GROSS. Out of what?

Mr. FRIEDEL. The contingent fund.

Mr. GROSS. Do the taxpayers provide that money?

Mr. FRIEDEL. Certainly.

Mr. GROSS. It would come out of the pockets of the taxpayers, would it not?

Mr. FRIEDEL. What about the mail we are getting from our taxpayers? Every Member is piled up with mail. The mail is stacked up. It is hard to answer all the letters. We have our staffs working until 7, 8 or 9 or even later at night, and on Saturdays and Sundays. Some Members require large staffs to properly answer their mail and serve their constituents.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. FRIEDEL. I yield to the gentleman from Louisiana.

Mr. PASSMAN. If I understand this legislation correctly, it is to provide additional funds for Members who need an additional secretary for their office or offices to expedite replies to the tens of thousands of letters and inquiries they receive annually from their constituents. Of course, it is on a monthly basis and no unused portion can be carried over from one month to another. The money is not given to the Member, but only makes it possible for him to employ a secretary, with money being paid directly to the secretary and not the Member. Is that correct?

Mr. FRIEDEL. Absolutely.

Mr. PASSMAN. It is a fact that if a Member does not need an additional secretary, then the money is never paid out. In my case, I have not used approximately $160,000 gross of the allotment available to me for clerk hire during my tenure in Congres. I might ask the chairman to verify the fact that if a Member does not need the money for hiring

additional personnel, he does not have to use it, does he?

Mr. FRIEDEL. No, sir.

Mr. PASSMAN. I am of the opinion that many other Members are turning back or not using much of their clerk-hire accounts. I do not believe that I should pass judgment on other Members' needs for a staff for handling their correspondence.

Now, I should like to ask my good friend from Iowa (Mr. GROSS), who is a Member who likes to answer his mail, if he is able to turn back, or maybe I should say not use all of his clerk-hire allowance?

Mr. GROSS. Yes, I have. For 20 years.

Mr. PASSMAN. Well, do you not give other Members credit for possessing the same integrity and turning back or not using the portion they do not need?

Mr. GROSS. I do not know whether they will or not.

Mr. PASSMAN. I think they will. I am willing to trust the Members, and I believe that you can, too.

Mr. GROSS. I do not think any of them need it.

Mr. TEAGUE of California. Mr. Speaker, will the gentleman yield?

Mr. FRIEDEL. I yield to the gentleman from California.

Mr. TEAGUE of California. I happen to have a constituency of approximately 800,000 people. I do not want to stand up here and appear to be trying to be more pure than my brothers, but I have no trouble answering my mail. I do not think this is needed, and I am going to vote against it.

Mr. FRIEDEL. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

Mr. WAGGONNER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore (Mr. HOLIFIELD). The Chair will count.

Two hundred and nineteen Members are present, a quorum.

The question is on the committee amendment.

The committee amendment was agreed to.

Mr. HALL. Mr. Speaker, a parliamentary inquiry. Is the Chair rendering an opinion on the vote on final passage of the resolution?

The SPEAKER pro tempore. The Chair announced the vote on the amendment to the resolution.

Mr. HALL. I thank the Chair.

The SPEAKER pro tempore. The question is on the resolution.

Mr. KYL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 204, nays 195, not voting 33, as follows:

[Roll No. 91]

Evins, Tenn.	Morse	Thompson, N.J.
Gallagher	Murphy, N.Y.	Wilson, Bob
Gettys	Nedzi	Wolff
Hastings	O'Hara	

So the resolution was agreed to.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Cunningham.

Mr. Kirwan with Mr. Bob Wilson.

Mr. Carey with Mr. Morse.

Mr. Miller of California with Mrs. Heckler of Massachusetts.

Mr. Murphy of New York with Mr. Hastings.

Mr. Evins of Tennessee with Mr. McMillan.

Mr. Wolff with Mr. Button.

Mr. Thompson of New Jersey with Mr. Esch.

Mr. Rostenkowski with Mr. Diggs.

Mr. Gettys with Mr. Mills.

Mr. Gallagher with Mr. Stuckey.

Mr. O'Hara with Mr. Pryor of Arkansas.

Mr. Blatnik with Mr. Satterfield.

Mr. Pepper with Mr. Ashley.

Mr. Nedzi with Mr. Joelson.

Mr. Symington with Mr. Powell.

Mr. JOHNSON of California changed his vote from "nay" to "yea."

Messrs. GOLDWATER and ROTH changed their votes from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 7906, INTERSTATE TAXATION ACT

Mr. YOUNG. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 438 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 438

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7906) to regulate and foster commerce among the States by providing a system for the taxation of interstate commerce. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the

bill shall be read for amendment under the five-minute rule. It shall be in order to consider, without the intervention of any point of order, the text of the bill H.R. 906 as an amendment to the bill. At the conclusion of the consideration of H.R. 7906 for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Texas is recognized for 1 hour.

Mr. YOUNG. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. SMITH), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 438 provides an open rule with 2 hours of general debate for consideration of H.R. 7906 to regulate and foster commerce among the States by providing a system for the taxation of interstate commerce. The resolution also makes it in order to consider, without the intervention of a point of order, H.R. 906 as an amendment to the bill. This provision was made in the rule because a question of germaneness could be raised.

H.R. 7906 is identical to H.R. 2158 which was adopted by the House in May of last year, including an amendment identical to H.R. 906 prohibiting the double taxation of personal income.

The bill deals with liabilities for State and local corporate net income taxes, capital stock taxes, and sales, use, and gross receipts taxes with respect to the sale of tangible personal property.

Mr. Speaker, I urge the adoption of House Resolution 438 in order that H.R. 7906 may be considered.

Mr. Speaker, I yield such time as he may consume to the gentleman from Connecticut (Mr. MONAGAN).

Mr. MONAGAN. Mr. Speaker, I rise in support of the rule, and also the bill, H.R. 7906. I shall not have an opportunity to speak on the bill later.

Mr. Speaker, the Interstate Taxation Act of 1969 has the two desirable qualities of being responsive to the States' pressing needs for increased revenues and to the business community's desire to have some degree of uniformity in the varied and constantly changing State and local tax laws. The net effect will contribute to a healthy national economy.

My interest in this legislation is not new. In the 87th Congress I introduced H.R. 3055 defining the power of the States to impose tax assessments on sales in interstate commerce. Many of the principles of that bill were subsequently incorporated into H.R. 2158, the Interstate Taxation Act of 1968, which is identical to the bill presently under consideration.

The need for congressional action in the area of interstate taxation has been long recognized and this remedial legislation is overdue. From the ratification of the Constitution to the present day, courts have had the problem of reconciling the States' interest in taxing enterprises doing business in their jurisdiction with the Nation's interest in maintaining the free flow of interstate commerce. The courts received no direction from Congress in striking this difficult balance and the result has been a multiplicity of State and local tax laws which have proved difficult to enforce and burdensome on business. The effect has been an impediment to the free flow of commerce and a loss of State revenues.

In 1959 in the wake of two Supreme Court decisions holding that a company engaged exclusively in interstate commerce in a State could be required to pay an income tax in that State and the Court's later refusal to review a State court decision upholding an income tax on a company whose only contacts in the State were the solicitation of orders, Congress moved to act in this area. The result was Public Law 86–272, prohibiting State income taxation of companies whose only presence in the State was the solicitation of orders. It also authorized a comprehensive review of taxation of interstate commerce.

A year later, through the enactment of Public Law 87–17, the study was expanded to encompass State taxation. A Special Subcommittee on State Taxation of Interstate Commerce was formed thereunder and commenced the long-awaited review. The measure before us today embodies the recommendations of that study.

H.R. 7906, in six major provisions, offers guidelines to resolve the most serious of the many problem areas of State taxation of businesses engaged in interstate commerce. The bill provides, first, a uniform jurisdictional rule based on the maintenance of a business location for the imposition of corporate net income, capital stock, and sales use and gross receipts taxes with respect to the sale of tangible personal property; second, an optional two factor—property and payroll—apportionment formula for smaller companies for the division of net income or capital; third, rules in the sales and use tax area for locating sales for tax purposes in the State of destination, credits for prior sales or use taxes paid, exemption of household goods for new residents, uniform treatment of freight charges, accounting for local sales taxes, conclusiveness of resale and exemption certificates, and encouragement of direct payment of sales or use tax by business buyers; fourth, prohibits charges for out-of-State audits; and fifth, provides a remedy for geographical discrimination by the States in the sales tax and gross receipts tax area.

The bill clarifies the congressional intent to enact additional remedial legislation in this area whenever necessary by a further provision for a continuing evaluation by Congress of State progress in resolving problems not dealt with in the bill. This section takes on greater significance since the measure in its present form excludes corporations whose gross receipts exceed $1 million. While the burden of complying with the numerous and complex State and local tax laws falls more heavily on small corporations, large corporations are by no means exempt from the hardships presented, and a review of State tax structures may at a future date make clear that larger corporations should be included in the coverage of this remedial legislation.

While some States may experience a slight loss of revenues with the enactment of this bill, the long-term effects of the measure should increase State revenues through an overall increase in economic growth and the greater ease of compliance with, and enforcement of, State and local tax laws. In my own State of Connecticut, it is calculated that the passage of this bill will increase corporate income tax revenues by .13 percent, with no significant loss in sale and use tax revenues.

This bill will benefit State governments, the business community, and the Nation as a whole, and I hope the House will act favorably on this urgently needed measure.

Mr. YOUNG. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. SISK).

Mr. SISK. Mr. Speaker, I rise in opposition to the bill.

Mr. Speaker, I wish to reaffirm my oppositions to the restrictions on State and local powers of taxation contemplated by H.R. 7906, this year's version of the Interstate Taxation Act.

Within California there is united opposition to this legislation by State and local governments and the business community. The opposition of the California Legislature has been expressed by resolution. The adverse views of Governor Reagan have been conveyed to the members of the California delegation. Major business associations, including the California State Chamber of Commerce, California Manufacturers Association, and the California Retailers Association, together with many individual businesses, large and small, are actively working against passage of this bill.

This legislation was generated by a study authorized by Congress in 1959. Any justification for such Federal restrictions existing at that time has now largely disappeared.

All but four sales tax States now grant credit for sales or use taxes paid to another State on the same transaction. Most local sales taxes are administered at the State level. No State currently charges for out-of-State audits. Tax reporting procedures have been simplified.

Of the 39 States which have a corporation income tax law, 23, including California, have enacted the Uniform Division of Income for Tax Purposes Act. Also, 29 of the 41 States with corporation or personal income tax laws are presently using the Federal income tax base, with some modifications, as the base for State purposes. Major portions of the income tax laws in four more States are modeled on the Federal law.

Action by the States in organizing a multistate tax commission and compact will further accelerate this movement toward standardization. On this record, the States have earned, and should be accorded by Congress, an opportunity to resolve any remaining problems of interstate business without being subjected to arbitrary and synthetic rules which would favor one group of taxpayers over another.

Mr. YOUNG. Mr. Speaker, I yield 30

minutes to the gentleman from California (Mr. SMITH).

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. WAGGONNER. Mr. Speaker, I make the point of order that a quorum is not present.

Mr. Speaker, I withdraw my point of order.

The SPEAKER. The gentleman from Louisiana withdraws his point of order.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. The gentleman from Iowa makes the point of order that a quorum is not present, and evidently a quorum is not present.

Mr. WAGGONNER. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 92]

Ashley	Hansen, Wash.	O'Hara
Button	Hébert	Ottinger
Carey	Heckler, Mass.	Pepper
Clark	Holifield	Pike
Clay	Ichord	Powell
Cohelan	Joelson	Pryor, Ark.
Cunningham	Kirwan	Purcell
Dickinson	Kleppe	Rarick
Diggs	Leggett	Reid, N.Y.
Edwards, Calif.	McMillan	Rivers
Edwards, La.	Martin	Rosenthal
Esch	Miller, Calif.	Rostenkowski
Evins, Tenn.	Mills	Ruppe
Fallon	Mollohan	Satterfield
Gallagher	Montgomery	Steiger, Ariz.
Garmatz	Murphy, N.Y.	Thompson, N.J.
Gettys	Nedzi	Wilson, Bob
Hanna	Nix	Wolff

The SPEAKER. On this rollcall 377 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 790. Joint resolution making continuing appropriations for the fiscal year 1970, and for other purposes.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested a bill of the House of the following title:

H.R. 4229. An act to continue for a temporary period the existing suspension of duty on heptanoic acid.

PROVIDING FOR CONSIDERATION OF H.R. 7906, INTERSTATE TAXATION ACT

The SPEAKER. The gentleman from California (Mr. SMITH) is recognized for 30 minutes.

Mr. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman.

Mr. BOGGS. Mr. Speaker, I appreciate the gentleman yielding.

I take this time to inform the House that in the light of the message which has just come from the Senate that it is my intention, after disposition of the rule now before the House, to ask unanimous consent to consider the Senate amendments to that bill which involves the extension for 31 days of existing withholding rates.

Mr. BURTON of California. Mr. Speaker, will the gentleman from California yield?

Mr. SMITH of California. I yield to the gentleman.

Mr. BURTON of California. Mr. Speaker, I may object to the unanimous-consent request.

I would like to ask the distinguished gentleman from Louisiana if he can inform the House as to the status of the Senate repeal of the AFDC freeze that is costing my own community and our own State untold millions of wasted administrative dollars while they await congressional action.

I wonder if the distinguished gentleman from Louisiana can give the House a report on that very vital matter that is affecting most of the States of the Nation including our own State at considerable taxpayer expense while we await the action of the House on that matter.

Mr. Speaker, our own Governor of California, Governor Reagan, has repeatedly asked that we deal with this.

I merely want to pin down while we are in this more favorable context, whether or not the House is going to fish or cut bait on this matter that is of such great concern to my own local community and to our State government as well.

Mr. BOGGS. Mr. Speaker, will the gentleman from California yield?

Mr. SMITH of California. I yield to the gentleman.

Mr. BOGGS. Mr. Speaker, it is my information, may I say in reply to the gentleman from California, that the matter is on the Speaker's desk, and that the House has not yet agreed to a conference, and I have not as of this minute been authorized by the chairman of the committee to agree to a conference.

I will say to the gentleman that so far as I am personally concerned, I have been opposed and continue to be opposed to that freeze.

Mr. BYRNES of Wisconsin. Mr. Speaker, will the gentleman from California yield?

Mr. SMITH of California. I yield to the gentleman.

Mr. BYRNES of Wisconsin. I can say to the gentleman that I have been in support of lifting that freeze and the ceiling imposed upon the State under the present law and relieve them from the problems they would have to face up to on June 30.

Certainly, I think it is incumbent that we act on the ceiling before June 30.

I do not know what the leadership has done with respect to going to conference and whether there is a hangup somewhere.

Mr. BURTON of California. Mr. Speaker, will the gentleman from California yield?

Mr. SMITH of California. I yield briefly to the gentleman.

Mr. BURTON of California. Mr. Speaker, as the distinguished gentleman from Wisconsin knows, and as does the distinguished gentleman from Louisiana, this problem was brought to the attention of the Committee on Ways and Means several months ago. It was predicted then that there would be millions of taxpayers' dollars wasted unless we dealt with this matter in some definitive way before the end of the fiscal year.

This matter has not been dealt with and the taxpayers of this country have been forced, as a result of our inaction, to waste literally millions of dollars reshuffling welfare applications.

This is at a very late stage of the game. The House is not going to be in session tomorrow, as I understand it because of the death of our distinguished colleague, Mr. Bates, of Massachusetts. We may well not be in session on Friday and I do think it is about time that the House acted responsively on this matter and definitively and I intend if I am on the floor, before acceding to the unanimous consent request, I believe I have a right as one Member to give the firmest of assurances at least to the people of my community and the people in our State that we are not going to have this sword of Damocles hanging over their head, while we contemplate, if you will pardon the expression, this legislative navel.

Mr. SMITH of California. Mr. Speaker, may I suggest to the distinguished gentleman that he endeavor to get the answer to that question before the unanimous-consent request is made or to obtain it if possible when the unanimous-consent request is made under a reservation of objection at which time Members can go into this question.

I would like to get into the matter at hand and get it over with if we possibly can.

Mr. Speaker, this resolution, House Resolution 438, provides for an open rule with 2 hours of general debate for the consideration of the bill (H.R. 7906) to regulate and foster commerce among the States by providing a system for the taxation of interstate commerce. The rule also makes in order the consideration of H.R. 906, introduced by the gentleman from Iowa (Mr. SMITH).

H.R. 906 has to do with imposing taxes on individuals. The main statement or explanation of it is that no State or political subdivision shall impose for any taxable year an income tax on the income of any individual which was earned or derived during any period while the individual was not a resident of the State, except to the extent the income was earned or derived from sources within the State.

The Rules Committee felt that this was a good place to consider that question, in this Interstate Taxation Act.

H.R. 7906 is identical with H.R. 2158, which passed the House on May 22, 1968 by a vote of 284 to 89. H.R. 906 is identi-

cal with an amendment placed into H.R. 2158 on the House floor when that matter was considered last year. The bill did not pass the other body.

Mr. Speaker, as the Members know, this is somewhat of a controversial bill. Some States are for it, some are against it. Some businesses in one State are for it, and some of the same businesses in another State are opposed to it. The officials of the State of California are opposed to it. I personally favor the bill. I think it is a start in the right direction toward having some equalization of taxes throughout the 50 States.

The purpose of the bill is to establish Federal criteria to be followed by the several States in their taxing policies with respect to out-of-State businesses.

Until 1959 such businesses had few problems with the States. If they were not physically in a State with a business location—a sales force and a stock of goods—they were as a general rule not taxed because they were an interstate corporation and State taxation was considered to be an encumbrance on interstate commerce. In 1954 the Supreme Court held that a corporation was taxable on the portion of its income earned within the taxing State even if it were not engaged in intrastate business there. In 1960 the Court held that a State could require sellers in interstate commerce to collect its sales and use taxes. This second decision, more than the first, spurred Congress to action. H.R. 7906 is an attempt to define what contacts a business must have within a State to come within its jurisdiction for tax purposes.

Three taxes, net income, capital stock, and a gross receipts tax are covered by title I. Under the bill, no firm doing less than $1 million Federal net taxable income will have a tax obligation to any State unless it has a business location within the State. Three tests are provided, any one of which will give the firm a business location for tax purposes: First, owned or leased property within the State; second, a full-time employee whose duties are more than taking orders; or third, maintaining a stock of goods for sale.

Under title II, if a firm is liable for State income taxes, it has an option of determining how much of its income is subject to taxation. Current State formulas use three factors: payroll, property, and sales within the State. The Federal formula does not include sales, only the first two. This has caused some concern among a number of States.

Title III covers sales and use taxes and their collection by out-of-State sellers. Here no $1 million limitation applies; all interstate companies selling in a State can be required to collect and remit such taxes if they meet the jurisdictional tests provided by the bill. An interstate sale must have its "destination" in a State in order for that State to impose a sales tax or require the seller to collect it. The three tests of title I are carried over—owned or leased property, full-time employee, and an inventory of goods—and a fourth test is added; jurisdiction is found if the company regularly makes household deliveries in the State. As in title I, only one test needs to be met to subject the company to taxation.

Mr. Speaker, I urge the adoption of the rule.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman from Missouri.

Mr. HALL. I appreciate the gentleman yielding. Is it his understanding that the waiver of points of order applies only to the text of the bill H.R. 906, which will be submitted as an amendment, and that the rest of the bill H.R. 7906 will be subject to a point of order?

Mr. SMITH of California. H.R. 906 relates to another subject matter. It would not be germane on the bill as a whole. The bill H.R. 7906 is subject to amendment. The bill H.R. 906 would be in order and could not be objected to. As far as objection to any other part of H.R. 7906, the rule does not contain any waiver of points of order. The rule provides for the offer by the gentleman from Iowa (Mr. SMITH) of H.R. 906 as an amendment to the bill, and H.R. 7906 can be amended by the House during the debate.

I have no further requests for time. I reserve the balance of my time.

Mr. BOLLING. Mr. Speaker, I yield 1 minute to the gentleman from Missouri (Mr. HUNGATE).

Mr. HUNGATE. Mr. Speaker, I simply request my colleagues to be sure to check with their local governments, their State governments, and Governors, and State legislatures as to the position they will take on this bill on State taxation on interstate commerce H.R. 7906.

Mr. BOLLING. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON H.R. 8644, SUSPENSION OF DUTY ON CRUDE CHICORY ROOTS

Mr. BOGGS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 8644) to make permanent the existing temporary suspension of duty on crude chicory roots, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. GROSS. Mr. Speaker, reserving the right to object, this would send the bill to conference?

Mr. BOGGS. If the gentleman will yield, that is correct.

Mr. GROSS Are the amendments germane to the bill? Does the gentleman know?

Mr. BOGGS. That is a matter the conferees would have to determine in any event. All this does is send the bill to conference.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana? The Chair hears none, and appoints the following conferees: Messrs. MILLS, BOGGS, WATTS, BYRNES of Wisconsin, and UTT.

SUSPENSION OF DUTY ON HEPTANOIC ACID

Mr. BOGGS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 4229) to continue for a temporary period the existing suspension of duty on heptanoic acid, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

On page 1, after line 6, insert:

"SEC. 2. (a) Section 3402 of the Internal Revenue Code of 1954 (relating to income tax collected at source) is amended—

"(1) by striking out 'June 30, 1969' in subsection (a)(1) and inserting in lieu thereof 'July 31, 1969';

"(2) by striking out 'July 1, 1969' in subsection (a)(2) and inserting in lieu thereof 'August 1, 1969'; and

"(3) by striking out 'July 1, 1969' in subsection (c)(6) and inserting in lieu thereof 'August 1, 1969'.

"(b) The amendments made by subsection (a) shall apply with respect to wages paid after June 30, 1969."

Amend the title so as to read: "An Act to continue for a temporary period the existing suspension of duty on heptanoic acid, and to continue for one month the existing rates of withholding of income tax."

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. BYRNES of Wisconsin. Mr. Speaker, reserving the right to object, I think we should have an explanation, and I yield to the gentleman from Louisiana for an explanation of the Senate amendments.

Mr. BOGGS. Mr. Speaker, I appreciate the gentleman from Wisconsin yielding and I appreciate the request of the gentleman from Wisconsin, the distinguished ranking minority member of the Ways and Means Committee.

The purport of this Senate amendment is to extend the "surcharge" withholding rates for the 1-month period from June 30, 1969, through July 31, 1969. It has no permanent effect insofar as tax liability is concerned, but it is vital for the administration of the Internal Revenue Code. As of now it would be literally impossible for the employers of the country to change their computerized machinery that is required to set up different withholding tables in the various firms in the country. So that is all it does. It is merely a continuation of the present situation so that there will be time to consider the surcharge and related matters without upsetting the present withholding.

Mr. BYRNES of Wisconsin. Mr. Speaker, I address this question also to the gentleman from Louisiana. I understand this also is essential for those employers who do not have the luxury of a computer and who have to make up these withholding tables and payrolls and do it within a day or two.

If we did not do this, we would revert, unless the surtax extension was signed by the President by Monday night, to the old withholding tax that was in effect prior to the imposition of the surtax.

Then, if we did extend the surtax at some point, they would have to revert

again and go back to the current tables. This would create, as I understand it, an intolerable situation for workers and employers.

Mr. BOGGS. Plus an intolerable situation in the Internal Revenue Service in attempting to administer the law, whatever it might be.

Mr. BYRNES of Wisconsin. Mr. Speaker, I yield to the gentleman from California (Mr. BURTON) if he desires to have me do so.

Mr. BURTON of California. I thank the gentleman from Wisconsin.

I had previously asked the gentleman whether at this very late stage of the game it was the gentleman's impression, assuming the gentleman had a point of view with reference to the AFDC freeze, whether or not the position requested by the Secretary of Health, Education, and Welfare, the position requested by most of the Governors of the country, the position requested by every single authority in the field of public assistance, was going to be given favorable recognition by a repeal of this provision which has been found to be unworkable, a repeal that is now in conference?

If I understood the gentleman from Wisconsin correctly, I understood it was the gentleman's indisposition to concur in the Senate amendments in conference. Is that understanding correct?

Mr. BYRNES of Wisconsin. Well, let me suggest to the gentleman, I believe it is impossible to tell the gentleman what can happen in a conference. I am going to try to support the position of the House. But as far as this issue is concerned, I believe the House disposition is to recede and concur basically in the amendment adopted by the Senate.

I believe our position in the House is, if I would interpret it correctly as a conferee, that the ceiling should be lifted. It would be my intention to be inclined to go along with the objective of the Senate amendment. I believe that is generally what the gentleman desires.

Mr. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Louisiana.

Mr. BOGGS. I will state I personally concur in the position taken by the gentleman from Wisconsin. Until this moment we were unable to make any statement to the gentleman. Unless we have the conference and unless we act, the gentleman will have no relief when June 30 arrives.

Mr. BURTON of California. The gentleman from California had previously queried the gentleman from Wisconsin. I understand very clearly what the gentleman has said.

Before I make my objection to this unanimous-consent request I will pose the question just one more time.

This matter has been pending before the committee, and the gentleman is a distinguished member of the Committee on Ways and Means. The question has been pending for a number of years. I am sure the gentleman has an opinion. I would merely like to have the gentleman's view as to whether or not he will support his administration's position that the freeze be repealed. That lends itself to a "yes" or "no" answer. If the gentleman feels this is not the proper forum for such a response, it would be my intention, as I have told the gentleman privately, to withhold consent.

This matter has been unduly delayed, perhaps just as the surtax matter has been unduly delayed. The Ways and Means Committee has an onerous schedule. We are now confronted with some difficult problems. They will be difficult problems in the months ahead. Perhaps we can get this one question behind us.

Mr. BYRNES of Wisconsin. Mr. Speaker, in conjunction with my reservation, let me respond to the gentleman in this way: In the first place, I do not intend to be threatened as to what my position is or is not. I am very glad to state to the gentleman what my current general feeling is with respect to the freeze. I will say it is this, Mr. Speaker: I believe the freeze would do grave injustice—and I stated this months ago—and that the freeze should be lifted. This is the freeze that under law would go into effect July 1. I believe it would be impossible for the States to live within that freeze which was imposed a year ago.

I still feel, however, we have a very serious problem, and therefore the freeze should be lifted and the States be permitted to continue under the present basic law so far as receiving aid for dependent children from the Federal Government is concerned.

I further believe that there is a problem that we have to face up to at some time or other as to how we cope with the very serious problem of dependent children and dependent children's families in this welfare area. This is a most serious problem for the States and the Federal Government as well as the people involved. I would be inclined in my own personal view in order to keep that currently before us not necessarily just to eliminate the freeze but to lift the freeze so as to give us an opportunity to look into what might be a desirable approach in this very difficult area. As I say, the freeze has to be lifted for a period and for a period sufficient for the States to make any plans that they have to make. It would be my thought that it should be lifted for at least a year, but in that time and so as to keep it before the committee and keep the issue alive, I think it is well that we do have our attention constantly focused on it by not repealing the ceiling completely. That is my personal view. As to what would happen in conference, I think it is completely inappropriate to suggest as to what one can or cannot do in a conference. As far as I am concerned, I point out that I am one individual Member, but I do not intend to be browbeaten or blackmailed by having it suggested that I have to take a position that conforms with that of the gentleman from California as a conferee of this House. As a conferee I intend to do what I think is best for this House and for this country and not just act on the basis of what the gentleman from California believes that he thinks is right.

Mr. BURTON of California. Mr. Speaker, I am sure the gentleman from Wisconsin does not mean to imply that the gentleman from California is citing only his own personal views on this matter. If the gentleman was listening—and he always does, and so therefore I am sure that he did listen—to the recital of the great number of authorities and responsible people of both political parties concerned with regard to the undue delay on this question, I am sure that the gentleman realizes that it was not merely a personal opinion. I am sure that the gentleman from Wisconsin further realizes that if we should take such immediate action on this withholding matter, the gentleman from California has a right—nay, I say he has a duty—to get the same kind of immediate action as it affects the potential recipients of AFDC who may be adversely affected either on July 2, 1969, or 1970 so that they get the same kind of immediate relief.

Mr. BYRNES of Wisconsin. Just so that the record may be clear—and then I will yield to the gentleman from Louisiana—I have told the gentleman from California months ago of my desire to cooperate and to see that this freeze was lifted. I thought it would be absolutely improper for any of the States affected by this to have to put into effect what would result from a freeze. I assured him of my cooperation and still assure him of my cooperation and belief that the States should not have to face up to the problem that the freeze would impose. I think it is very unfortunate, Mr. Speaker, that because of a situation which I think the gentleman from California understood, that was beyond the control of any of us, there was a gap here in taking care of this Senate amendment when it came over. I think it is very appropriate that the gentleman from California called our attention today to the fact that it was sitting here on the Speaker's desk and a conference had not been appointed and the conferees had not met. I think it is most appropriate that this matter be resolved immediately. If I had known about it, I would have done what I could have to see that it did go in that direction. Conferees have now been appointed, and I am sure that they are going to meet and do what is right as far as this House, and as far as the country are concerned. Why we have to be threatened with creating chaos for the workers of this country and the employers of this country in making out their payroll next week is beyond me. That we should be threatened that we will create that chaos unless we agree ahead of time on what as conferees we are going to do and what i's will be dotted and what t's will be crossed I think is absolutely unreasonable and preposterous.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. BURTON of California. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

INTERSTATE TAXATION ACT

Mr. RODINO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the

State of the Union for the consideration of the bill (H.R. 7906) to regulate and foster commerce among the States by providing a system for the taxation of interstate commerce.

The SPEAKER. The question is on the motion offered by the gentleman from New Jersey.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 7906, with Mr. MONAGAN in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from New Jersey (Mr. RODINO) will be recognized for 1 hour, and the gentleman from Minnesota (Mr. MACGREGOR) will be recognized for 1 hour.

The Chair recognizes the gentleman from New Jersey.

Mr. RODINO. Mr. Chairman, I yield such time as he may consume to the gentleman from New York, the distinguished chairman of the House Committee on the Judiciary (Mr. CELLER).

Mr. CELLER. Mr. Chairman, the Interstate Taxation Act—H.R. 7906—is a measure which has already won the strong approval of the House of Representatives. In the last Congress, the Committee on the Judiciary reported an identical bill—H.R. 2158—sponsored by former Representative Edwin Willis, of Louisiana. Last year that bill passed the House by a large majority of 284 to 89. Unfortunately, however, there was not sufficient time remaining in the session for full consideration of the bill by the other body.

As I pointed out during the debate last year, the Interstate Taxation Act, H.R. 7906, embodies a program that is essential if we are to preserve one of our most cherished economic principles—the principle that our national market is common to all of our States and that the flow of interstate commerce ought not to be unduly impeded. When our States joined together in ratification of the Constitution in 1789, they enshrined this principle in the commerce clause and affirmed it as one of the cornerstones of their Union. Throughout our history, the commerce clause has been one of the major sources of our economic strength. In recent years, however, a serious erosion of the principle of the commerce clause has taken place due to the proliferation of State and local taxes.

In 1959, problems arising from State taxation of interstate commerce reached critical proportions in the celebrated Northwestern Portland Cement Company case. The Supreme Court made it clear that only Congress can appropriately deal with the vexing problems that arise from a plethora of conflicting State and local tax laws. At that time, both the Court, as well as the business community, turned to us for guidance. As a result, the late Senator Harry Byrd, of Virginia, and the late Representative Francis Walter—both of whom served in Congress with great distinction—sponsored legislation which gave Congress a mandate to remedy the situation. It was this legislation, Public Law 86–272, that gave rise to the extensive study that the Judiciary Committee conducted.

The Special Subcommittee on State Taxation of Interstate Commerce, which was initially chaired by former Representative Edwin Willis, of Louisiana—another legislator of great distinction—began its study 8 years ago. At that time it was already apparent that interstate business was being seriously burdened. In the ensuing years the situation has grown progressively worse, and there has been an even greater outcry for relief.

With all 50 States and many thousands of local governments each taxing interstate commerce according to their own individual sets of rules, the cost of compliance often exceeds the actual amount of tax liability. Small businesses located in one State are subjected to taxation in far away States in which the businessman owns no property, has no employees, and is without political representation. Often tax liabilities are determined by negotiations with the tax administrator rather than by clearly established rules of law.

As the States reach farther and farther to impose smaller and smaller liabilities on more and more out-of-State companies, tax administrators are called on more and more to enforce the unenforceable and businessmen to comply with the impossible. Noncompliance and nonenforcement are the rule rather than the exception. Since the system has grown unworkable, it is essential that a national policy of the type embodied in H.R. 7906 be adopted which will preserve the taxing autonomy of our States and at the same time reaffirm the basic principle of the commerce clause.

In the last Congress, the House of Representatives clearly recognized the need for such a policy when it passed this proposal by an overwhelming majority.

Mr. Chairman, the solutions provided by this proposal are all based on the obvious necessity for Congress to provide jurisdictional standards—so that no State can infringe upon its sister States by imposing its own nationwide tax system. The jurisdictional rule established in this bill is logical, simple, and fair. Reduced to its essence, this bill provides that generally no businessman will be taxable in any jurisdiction in which he does not either employ labor or maintain tangible property. Such a rule is not only consistent with basic notions of fair play, it is also in accord with the practical realities of our modern economy. At the same time, the rule accords sufficiently with the revenue requirements of the States so as to preclude the possibility of depriving any State of a significant amount of revenue.

The passage of H.R. 7906 will be of immense benefit to the business community, to the integrity of our Federal system, to the vitality of our States, and to the efficient functioning of our courts. I strongly urge that the House of Representatives once again adopt this measure. It was sorely needed when we passed it by an overwhelming majority last year. Today the need for its prompt enactment is even greater.

Mr. MACGREGOR. Mr. Chairman, I yield such time as he may use to the distinguished ranking minority member of the Committee on the Judiciary, the gentleman from Ohio (Mr. MCCULLOCH).

Mr. MCCULLOCH. Mr. Chairman, I rise in support of H.R. 7906, the interstate taxation bill. On January 23 of this year, I introduced H.R. 4178 which is identical in all respects with the bill we are now considering and which is identical with the bill that was reported by the Judiciary Committee last year and was passed last year by this body. The vote was overwhelming: 284 to 89, as Congressman SMITH of California has indicated.

The history of this legislation reflects well on the Congress.

There are some who criticize Congress as the fallen branch of our tripartite Government. It is said that Congress only reacts to Executive proposals but does not imaginatively and creatively seek solutions to problems.

To those doubters, I proffer H.R. 7906. This legislation is indeed, the child of Congress.

Congress perceived the need.

Congress initiated the study.

Congress drafted the bill.

We have spent 7½ years of labor on this bill—four volumes of hearings and four volumes of exhaustive and thorough analysis of the problem.

The bill accurately reflects those tireless efforts. It sets a standard of excellence for the legislative process. Thus, with pride, I lend my name to that long list of men who support this bill.

The problem of multiple State taxation of businesses operating in interstate commerce is not a simple one. The issues are many and complex.

But ultimately, the search has been for some golden mean, some rule to balance the competing interests of State revenues and of free commerce. The bill achieves a golden mean. It is fair.

There are those who would argue that a State should be allowed to tax a business even though it is in no way located in the State.

There are those who would argue that a State should be allowed to require a business to police the collection of the State's sales and use tax even though it is in no way located in the State.

I can well appreciate how these arguments would appeal to State and local tax collectors. Their task is to raise revenue and to do so as painlessly as possible.

Certainly, it is advantageous for State and local tax collectors to deflect the impact of their taxes onto those without political representation in the State.

But is that fair? Is that good for the country?

Today, American business is burdened with conflicting, chaotic, and multiple taxation by the States. It is time for Congress to act.

Congress has invoked the commerce clause of the Constitution to enact laws in the areas of crime, welfare, and civil rights. Now it invokes the commerce clause to foster the interstate flow of goods. Clearly, this legislation is constitutional.

For we are once again confronted with the problem that led to the calling of the Constitutional Convention of 1787, the imposition of State taxes on out-of-State businesses. Our forefathers recognized how mischievous this problem could be. They realized that a national common market was the necessary predicate of national prosperity.

I stand before this body today to reaffirm the constitutional principle of the American common market. That principle has served us well. We are the richest nation on this earth. That principle merits the continued support of every Member of this body.

No one can deny that State taxation of interstate commerce is a definite problem. No one can deny the right and the duty of Congress to remedy this problem. Yet the States have voiced two practical objections to this legislation.

The first is loss of revenue. This objection is without merit. The record shows that the States—at present—are not collecting taxes from businesses which are not located in the taxing State. The Special Subcommittee on Interstate Taxation found that there was 97.5 percent noncompliance in the income tax area and 93.5 percent noncompliance in the sales and use tax area—volume 1 at 303 and volume 3 at 729.

That is a despicable situation. Impossible laws breed disrespect for law at a time when respect for law is essential to our national well-being. Impossible laws allow tax commissioners to exercise wide discretion to discriminate and to harass businesses with impunity. Impossible laws jeopardize the very existence of small businesses. For in most States, there is no statute of limitations on tax liability. Thus every year, the small businesses—many of whom do not realize that they are liable—get deeper and deeper in debt.

The second objection is that the bill favors interstate business over local business. This is not true. There are no tax havens in this country, and none are created by this legislation. The bill operates not to favor interstate business by making it tax-free but rather to promote uniformity and efficiency in the collection of State taxes.

To those who worry about their local industry, let me say again that the out-of-State competition is not complying with the local tax laws, because, realistically, they are impossible to enforce. Thus, by establishing that interstate business need no longer do the impossible, the bill does not tip the balance against local industry.

Moreover, there is a provision in the bill—often overlooked—that would extend State sales-and-use-tax jurisdiction to areas now off limits to tax collectors.

In *Miller Bros. Co.* v. *Maryland*, 347 U.S. 340 (1954), the Supreme Court ruled that a State could not require an out-of-State business to collect sales and use taxes for the State even if the business regularly delivered products in its own vehicles across State lines to consumers within the State.

Section 101(2) of the bill changes that result. A State would be permitted to require the out-of-State business to collect the sales and use tax if it "regularly makes household deliveries in the State." This would not only fill State coffers but would also protect local retailers who now suffer from unencumbered competition from across-the-border businessmen.

Local businessmen in border areas have been seriously disadvantaged by the Miller Bros. rule. We change that. H.R. 7906 would permit businessmen on both sides of a border to compete according to the same rules.

Hence, it is evident that the two objections are groundless. The bill does not rob States of their revenue, nor does it discriminate against local business.

In summary, the bill lays down a golden rule. It strikes a balance by invoking commonsense in an area of confusing, chaotic, and complex tax laws.

But beyond that, on a higher level, this bill says much for the integrity of the lawmaking process. In the 13th century, the philosopher, Thomas Aquinas, discussing the nature of law, wrote that a law that is impossible to obey is not really a law at all.

Certainly, the maze of State tax laws is impossible to obey. There are thousands of small businesses that employ fewer than five people yet market their products nationally.

How is it possible for such a business to comply with the 38 corporate income tax laws, the 38 sales and use tax laws, the 37 capital stock tax laws, and the eight gross receipts tax laws, all imposed by the States?

Moreover, how is it possible for such a business to comply with over 2,300 sales and use tax laws, over 1,000 gross receipts tax laws, and over 100 corporate income tax laws which are imposed at the local level?

Certainly, in exercising our constitutional duty to promote the free flow of interstate commerce, we as lawmakers must fashion a rule that is possible to obey, a rule that will command the respect of the business community, a rule that will preserve the integrity and the obligation of law.

H.R. 7906 is such a rule.

I urge its passage, and I ask your support.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey.

Mr. RODINO. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, the bill before us today—the proposed Interstate Taxation Act—is the product of one of the most comprehensive and exhaustive studies ever conducted by Congress. It is a bill which has fundamental importance for our Nation's commercial life, and has the warm endorsement both of industry and labor. This bill passed the House of Representatives last year by a strong majority of 284 to 89. Unfortunately, however, passage by the House occurred too late in the session for the Senate to consider the bill.

H.R. 7906 is identical to the bill that was reported in the last Congress by the Committee on the Judiciary. As many of you will recall, that bill was later amended on the floor to include a provision prohibiting the double taxation of personal income, which was sponsored by Representative NEAL SMITH of Iowa. Since the Judiciary Committee conducted no study of the personal income tax problem, we felt that we ought not to include this provision in the bill. However, I personally support the amendment and plan to vote for it when it is offered.

It has now been almost a decade since the Judiciary Committee first received a mandate from Congress to study the problems of State taxation of interstate commerce. In 1959, the Supreme Court—after having handed down more than 300 full-dressed opinions relating to the taxation of interstate commerce—made it clear in the celebrated Northwestern Portland Cement case that it looked to Congress to provide reasonable standards. At the same time, the business community found itself so overwhelmed by diverse and chaotic State and local tax requirements that it, too, turned to Congress to establish standards. As a result, in the 86th Congress, we enacted Public Law 86–272 which gave rise to the Special Subcommittee on State Taxation of Interstate Commerce.

Starting in 1959, we established an advisory committee of distinguished experts from the business community, from the academic community and from State governments. From 1961 to 1966, under the chairmanship of Representative Edwin Willis, the special subcommittee devoted 5 years to an extensive study communicating with every State tax administrator in the United States, officials of numerous cities and counties, and literally tens of thousands of businessmen all over the country. The material published by us occupies eight full volumes and has become the definitive work on this subject.

Mr. Chairman, our study amply documents the need for this legislation.

We ascertained that of the several hundred thousand companies engaged in interstate commerce half have fewer than 20 employees, a substantial number have fewer than 10 employees, and a significant minority have fewer than five. Yet, these companies typically sell their products in many States, and even among those companies which are so small that their annual gross proceeds are less than $200,000, a considerable number sell their products in a truly nationwide market.

The number of jurisdictions taxing these companies is staggering. There are in effect at the State level 41 sets of corporate income tax laws, 44 sales and use tax laws, 37 capital stock laws and eight gross receipts tax laws of general applicability. In addition, to compound further the chaos and confusion, business taxes are rapidly proliferating on a local level—with sales taxes already imposed by about 3,000 localities, gross receipts taxes by over 1,000 and corporate income taxes by more than 200 local governments.

Under the circumstances, it is not surprising that this chaotic system has broken down. The business community simply cannot afford the facilities necessary to comply with the present rules. Correspondingly, the States themselves do not have the facilities necessary to enforce their laws. As a result, noncom-

pliance and nonenforcement are the rule rather than the exception.

In addition to imposing insurmountable compliance burdens on the business community, the present system of State taxation of interstate commerce is also replete with inequities that result in the overtaxation of some taxpayers and the undertaxation of others. In the income tax area, for example, some companies are now taxable on more than 100 percent of their profits while other similarly situated companies are paying a tax on much less than 100 percent. Clearly this is a situation which Congress has the responsibility to eliminate.

At the same time the present system also contains a number of inequitable laws that give to locally based companies benefits that are not available to competitors who are based outside of the taxing State. There is no doubt that such laws both run counter to the basic purposes of the commerce clause of the Constitution and violate sound tax principles of evenhandedness.

In addition to representing a serious threat to our Nation's economic life, the present system has created among our taxpayers a highly undesirable attitude. Faced with unfair and unworkable rules, taxpayers generally have developed a widespread resistance to the assumption of State tax liabilities. Rather than file tax returns under circumstances in which the tax itself is often exceeded by the cost of preparing the return, taxpayers in many cases have understandably disregarded the State and local laws. If this situation is to be remedied—and State and local tax laws complied with—Congress simply must provide a system of uniform rules which are both workable and equitable.

To provide a proper system, the Interstate Taxation Act establishes simple and equitable guidelines. Title I of the bill provides uniform jurisdictional standards for each of the four types of taxes which were included in our study: corporate income taxes, capital stock taxes, sales and use taxes, and gross receipts taxes. Under these standards a company would not be subject to the jurisdiction of any State in which it does not maintain a "business location," which is defined to include: the owning or leasing of real estate, the maintenance of a localized employee, or the regular maintenance of a stock of tangible personal property for sale in the ordinary course of business.

There are two significant exceptions to the basic jurisdictional standard. One exception occurs in the sales and use tax area in the form of a provision which makes an out-of-State seller liable for the collection of a tax if he regularly makes household deliveries in the State. The other exception to the basic "business location" standard occurs in the income and capital stock tax areas, and involves the exclusion from the jurisdictional rule of those corporations which have an annual net income in excess of $1 million.

Title II provides a supplement to the jurisdictional standard in the form of a limit on the percentage of income or capital which can be taxed in those cases in which a company is taxable in more than one State. Under title II, the maximum percentage of income or capital which is taxable is determined by a simple two-factor formula based on property and wages. This is also a standard which is reasonable and fair—and which will substantially reduce the severe compliance problems currently faced by small businesses.

Title III provides uniform rules in the sales and use tax area. Under this title, any possibility of an interstate sale being subjected to double taxation is entirely removed.

Title IV provides for continued congressional scrutiny of the problems left unresolved by the bill.

Title V contains definitional provisions. In addtiion, it prohibits States from imposing discriminatory taxes on interstate commerce, as well as from requiring an out-of-State taxpayer to pay for the traveling expenses and living expenses of auditors.

In considering this bill in its entirety, it is important to note that each State and subdivision retains complete freedom to impose whatever type tax it chooses. No Federal agency is given any authority whatsoever over State tax matters. The bill will create no cost whatsoever for the Federal Government.

In terms of its effect on the States, it is important also to note that in the long run this legislation will bring about an overall increase of the revenues of all of the States. This increase will be due to two factors: On the one hand, State revenues will be increased as a result of the economic growth that will be stimulated by the removal of the trade barriers currently impeding interstate commerce. On the other hand, State revenues will be increased as a result of the greater ease of enforcement and compliance which will be obtained under the uniform standards established by H.R. 7906.

In providing equitable standards for the taxation of interstate commerce, this bill will assure the survival of the many small businesses in the United States which ship goods in interstate commerce. At the same time, it will replace the present chaotic system with reasonable and practical rules—so that each taxpayer will be able to ascertain with certainty just what his liabilities are. Clearly, this type of certainty is essential if tax laws are to operate properly.

Because of the basic reforms that this proposal will bring, H.R. 7906 will make a major contribution to the Nation's economic life. I believe that the strong support for this bill which has been expressed by both industry and labor is testimony in itself to the fact that these reforms are needed. Thus I am submitting for the RECORD a representative list of some of the groups which are urging that this bill be enacted. I would like to add my voice to theirs in urging my colleagues to pass this measure once again.

Mr. Chairman, at this time I include a representative list of national associations supporting the proposed Interstate Taxation Act, H.R. 7906:

LIST OF NATIONAL ASSOCIATIONS SUPPORTING H.R. 7906

National Association of Manufacturers.
National Association of Wholesalers.
International Ladies' Garment Workers Union.
United States Chamber of Commerce.
National Council of Salesmen's Organizations.
American Association of Nurserymen.
Magazine Publishers Association.
National Small Business Association.
American Textile Manufacturers Institute.
Direct Mail Advertising Association.
Manufacturing Chemists Association.
National Food Brokers Association.
Automotive Services Industries Association.
Financial Executives Institute.
Apparel Industry Association.
Printing Industries Association.
National Frozen Food Association.
Northamerican Heating & Airconditioning Wholesalers Association.
National Candy Wholesalers Association.
Laundry & Cleaners Allied Trades Association.
National Equipment Distributors Association.
National Association of Electrical Distributors.
Wholesale Stationers' Association.
National Association of Sporting Goods Wholesalers.
Southern Industrial Distributors' Association.
Association of Institutional Distributors.
National Building Material Distributors Association.
American Movers Conference.
Movers' & Warehousemen's Association of America.
Society of American Florists.
Point-of-Purchase Advertising Institute.
Automotive Wholesaler Trade Association Executives.
Farm Equipment Wholesalers Association.
National American Wholesale Lumber Association.
Air-Conditioning & Refrigeration Wholesalers.
Screen Process Printing Association.
Food Services Equipment Industry Association.
American Advertising Federation.
National Electronic Distributors Association.
American Institute of Supply Association.
Manufacturers Agents National Association.
American Textbook Publishers Institute.
National Kitchen Distributors Association.
Laundry and Cleaners Allied Trades Association.
National Sash & Door Jobbers Association.
Shoe Service Institute.
Administrative Management Society.

Mr. McCULLOCH. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Ohio.

Mr. McCULLOCH. Mr. Chairman, I would ask the chairman of the subcommittee one question for the information of the House:

Would the gentleman from New Jersey advise the Committee who the ranking minority member of this special and able subcommittee was over the last 6 or 7 years, and until January 3, 1969?

Mr. RODINO. The former ranking member is now the Governor of the great State of West Virginia, and our former colleague, then Congressman Arch Moore, who was a very ardent supporter of this bill.

Mr. McCULLOCH. Mr. Chairman, one further question:

Will the gentleman from New Jersey advise the Committee the names of the chairmen of the House and Senate committees who yielded jurisdiction for the study of this important legislation by the Committee on the Judiciary of the House?

Mr. RODINO. On the Senate side it was the distinguished Senator from Virginia, Senator Harry Byrd, Sr., and on the House side, the distinguished chairman of the House Committee on Ways and Means, the gentleman from Arkansas (Mr. MILLS).

As a matter of fact, I might say for the enlightment of the House that it was at the insistence of Senator Harry Byrd, Sr., that this study was then undertaken and initiated by Congressman Willis.

Mr. McCULLOCH. I thank the gentleman.

Mr. COLLIER. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman.

Mr. COLLIER. I have just one clarifying question, if I may.

I listened carefully to the gentleman's explanation and it poses one question in my mind. Perhaps you could throw some light on it and inform me because I have had an inquiry along these lines very recently.

In the event that a man is a manufacturer's representative and handles possibly eight or 10 or 12 different lines and rents a sales office which he operates, in behalf of those firms that he is representing, would he in that case be leasing?

Mr. RODINO. That is correct.

Mr. COLLIER. What would his status be, however, in light of the fact that he, as most manufacturer's representatives, is operating as an independent contractor? He does not handle the contract or the goods, but merely in sum and substance is an order taker and the product on the order that he has taken is shipped directly from a company out of the State to his customer.

Mr. RODINO. He would be liable since he is leasing or renting property which brings him within the jurisdiction or the standards or the jurisdictional formula that we set up.

Mr. COLLIER. Would there in that instance really be a principal-agency relationship inasmuch as he would be operating on a sort of multiple order taking basis as an independent contractor? In that instance, if your response is correct, would each of those manufacturers that he represents be liable to the extent of the volume of business that he did for each?

Mr. RODINO. Now I understand the gentleman's question a little more clearly.

If he is an independent contractor who is leasing, then he is liable. The company is not liable because it does not come within the requirements of the formula we have set up.

Mr. COLLIER. If it receives the order and it receives the payment from the individual customer, and generally he is drawing on a commission basis—he would be liable. But the company that received the payment directly from the customer and did in fact ship the goods, would not be liable, is that correct?

Mr. RODINO. That is correct unless the company had a business location in that area.

Mr. COLLIER. I thank the gentleman.

Mr. TAFT. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman.

Mr. TAFT. I believe the gentleman said a few moments ago that the bill does not affect in any way the choice or type of tax of a State or local government that might be involved.

I wonder just looking at the first few lines of the bill which states:

> No State or political subdivision thereof shall have power—
>
> (1) to impose a net income tax or capital stock tax on a corporation other than an excluded corporation unless the corporation has a business location in the State during the taxable year;
>
> (2) to require a person to collect a sales or use tax with respect to a sale of tangible personal property unless the person has a business location in the State or regularly makes household deliveries in the State; or
>
> (3) to impose a gross receipts tax with respect to a sale of tangible personal property unless the seller has a business location in the State.

In other words, as I understand, all of these things can be done today. State taxes can be and are imposed in those areas or there would not be a need for the bill.

Is it not necessarily true, then, that this bill does amount to a limitation on the types of taxes or the choice of tax an individual State might make?

Mr. RODINO. The limitation is a jurisdictional limitation but not as to the type of the tax that may be imposed.

Mr. TAFT. It restricts the type of sales tax or gross receipts tax and type of income tax; is that not correct?

Mr. RODINO. If you want to put it that way, yes. I would state that the main thrust is to set up these jurisdictional standards without in any way actually limiting the imposition of taxes.

Mr. TAFT. If the gentleman will yield further, I have one or two additional questions on which he might be able to be of some assistance. Why was the exclusion level of $1 million inserted? In other words, as I understand, corporations with an average net income in excess of $1 million would not be helped in any way by this bill. As I understand, we would set up really two classes of taxpayers, one of which might be paying a tax under certain circumstances, where a competitor that might be somewhat smaller might not be paying the same tax, although they may be in the same business and in the same State. In my opinion, this might very well violate the rule of the uniformity in the constitutions of some of the States.

Did the committee consider that question? What comment would the gentleman make in relation to that?

Mr. RODINO. Yes, the committee did consider that question. The problem that developed as a result of the chaos and confusion that confronted the smaller companies in those areas was great. The larger companies were not confronted with the same problem. The exhaustive study conducted by the subcommittee reveals that there are, in fact, a number of serious problems which presently confront the larger corporations. However, because tax problems of the large corporations, I would say, invariably do involve complex questions of international tax policy as well as questions of State and local tax policy, the subcommittee recommended that those measures be postponed pending a further evaluation of the steps taken by the States in this area.

As a result, we have title IV in the bill, which gives this committee continued oversight once the measure is enacted, so that if problems develop in this area, they will also be dealt with.

Mr. MacGREGOR. Mr. Chairman, will the distinguished gentleman from New Jersey yield to me so that I may make a further reply to the question of the gentleman from Ohio?

Mr. RODINO. I yield to the gentleman from Minnesota.

Mr. MacGREGOR. In further response to the inquiry of the gentleman from Ohio, I think it should be candidly said that the legislative work product of the special subcommittee in this area sounds in pragmatism if not in logic. During the tortuous course of the development of this legislation, it is no secret that tax administrators in several States, and to a lesser extent the Governors thereof, voiced loud complaints to the subcommittee about the losses in revenue that would accrue if we were not to incorporate a $1 million limitation on the applicability of the provisions of this statute. The subcommittee in its wisdom, wishing to be responsive if possible to this plea from the tax collectors across the face of the land, consulted by way of hearings with representatives of both small and large businesses. It did appear to us as though the incorporation of a $1 million net sales limitation, which was suggested to the subcommittee by one of the most knowledgeable of the State tax administrators—such suggestion seeming to meet with the approval of small and big business—was a prudent step for us to take in seeking to develop legislation which would attract the strongest possible support across the broadest range of opinion and interest.

I am pleased that the chairman of the subcommittee, the gentleman from New Jersey (Mr. RODINO), called attention to title IV of the bill. Title IV of the bill imposes on the Committee on the Judiciary of the House of Representatives a continuing responsibility during the course of the first 4 years following passage of the bill, should that come about, to evaluate the operation of the bill and, specifically, to consider the ramifications of the million-dollar test.

Mr. TAFT. I thank the gentleman.

Mr. ICHORD. Mr. Chairman, will the gentleman from New Jersey yield?

Mr. RODINO. I yield to the gentleman from Missouri.

Mr. ICHORD. Mr. Chairman, I compliment the gentleman from New Jersey first of all for the very competent manner in which he has handled a very complicated subject, but, as the gentleman well knows, I have considerable reservation about this legislation primarily be-

cause of the supposed effect upon the State of Missouri. I would like to inquire of the gentleman as to who prepared the summary on pages 11 and 12 of the report as to the effect of H.R. 7906 on the various States of the Union?

Mr. RODINO. Mr. Chairman, the staff of the subcommittee went into an exhaustive study in the preparation of these estimates.

Mr. ICHORD. Mr. Chairman, I just concluded a conversation with the Governor of the State of Missouri, and he stated that his experts in State government are still estimating that this bill will result in Missouri losing between $25 and $50 million of sales and use tax revenues. I notice in the summary that the staff indicates the loss in Missouri will not exceed 0.09 percent.

Missouri's take from the sales and use tax is approximately $350 million. This is only one-tenth of 1 percent of what the staff represents. One percent would only be $3 million. Here the State is estimating $25 to $50 million.

I cannot see how the State could possibly be that far off. I would question the study of the staff before I would question the conclusions of the State of Missouri.

Mr. RODINO. I would say to the gentleman that I am not surprised since we have heard from several of the tax administrators and those people who have jurisdiction over the tax revenues of the State, and the same complaint has been made. Invariably their figures are much higher and I might say in my judgment exaggerated.

Mr. ICHORD. Of course, it is very difficult for the staff. I did not mean to be disparaging to the staff of the committee, but it is very difficult for them to make a study of the varying tax laws of the different States.

Mr. RODINO. I would say to the gentleman from Missouri that the staff did not do this in just 1 day or 1 month or 1 year. It took all of 6 years to compile these estimates.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota (Mr. MACGREGOR).

Mr. MACGREGOR. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I rise in support of H.R. 7906. Along with many other members of the Committee on the Judiciary, I am a coauthor of an identical measure, H.R. 4178.

Mr. Chairman, I should like to correct some printing errors in the report which accompanies the bill presently under consideration. H.R. 7906.

On page 1 of the report, under the paragraph entitled "Purpose of the legislation," on line 5 of the first paragraph, the date "1978" appears. Those of us serving on the Committee on the Judiciary like to think we are looking ahead, but we did not really look ahead 9 years. That vote refers to a vote taken in the House last year and the date, of course, should be "1968."

On page 11 of the committee report, under the subheading "Arkansas," in discussing the effects of the adoption of H.R. 7906 on State revenues, the words appear under Arkansas, "Corporate income tax: 0.06 percent." To those words should be added the word "loss" so that the report would read for Arkansas: "Corporate income tax: 0.06 percent loss."

On page 14 of the committee report, under the State of Washington, under "Sales and use tax" there is an error in the amount, which should read "0.1 percent" instead of "1.01 percent."

Mr. Chairman, during the course of the debate on the rule the distinguished Member of the House Committee on the Judiciary, the gentleman from Missouri (Mr. HUNGATE) suggested that before members of this committee or of the House voted on this bill they should consult with their tax administrators in their respective States and with their Governors. I believe that is an excellent suggestion. While they are on the telephone I might suggest they ask the operator to put them in touch with a representative group of small businessmen in their respective States. They would get quite a different answer if they were to consult with the small businessmen, who increasingly, with a relatively small plant and a limited number of employees, operate frequently by mail order in a number of States. In short, Mr. Chairman, this is a small-businessman-taxpayers' benefit bill instead of a tax collector's dream.

Mr. ADAMS. Mr. Chairman, will the gentleman yield ?

Mr. MACGREGOR. I yield to the gentleman from Washington.

Mr. ADAMS. The problem that we have is we deal with the small intrastate businesses who are in competition. If we ask them, particularly in a State which has a sales and use tax and is dealing with border States shipping in small commercial items, we find our small State businesses have a great deal of difficulty. They are paying the State tax, and the interstate operation is not, and they may be within 15 or 20 miles, of the border and easily reached by truck delivery.

Mr. MACGREGOR. I hope the gentleman will listen to all the debate and carefully read the RECORD after he has cast his affirmative vote, because he will find that this bill which overturns the Miller Brothers helps the company in one State with reference to unfair competition from a competitor across the State line instead of hurting the company within the State as the gentleman suggested.

Mr. Chairman, the present system of State taxation of interstate commerce does not work. The flaws cannot be remedied by State action alone. At the present time, we are confronted with a situation in which the tax administrators of each State and local subdivision will assert that they have the power to reach across their own borders for the purpose of regulating companies which make their sales across State lines. In effect, each jurisdiction is attempting to impose its own nationwide tax system.

It is an uncontroverted fact that nonenforcement of the present jurisdictional limits of the State and local governments is the rule and not the exception. Conversely, noncompliance on the part of the local taxpayers is also the rule and not the exception. The State and their subdivisions do not have the administrative agencies necessary to enforce their present rules in an evenhanded way. Likewise, small businesses do not have the clerks, typists, accountants and tax lawyers necessary to comply with these rules.

These facts were clearly documented in the four-volume study made by the Special Subcommittee on Interstate Taxation. Based on the experience of thousands of companies, the subcommittee learned that noncompliance was the rule in 97 percent of the income tax cases and 93 percent of the sales and use tax cases where the businesses were located outside the taxing state.

The fact of widespread nonenforcement and noncompliance—uncontroverted in the hearings before the Special Subcommittee on Interstate Taxation—is a clear indication that practical and workable standards must be created. If we do not act to create them in the Congress, I assure you they will be created piecemeal by the courts. I would suggest to the members of this committee that it is far preferable to establish standards through the medium of action by the elective Representatives of the American people rather than by the case-by-case, hodgepodge method of decisions in the Federal judiciary.

Obviously, the chaos and confusion which characterizes the whole area of State taxation of interstate commerce stems primarily from the absence of meaningful jurisdictional standards. As each individual tax collector reaches further there and further beyond his own State borders, more and more taxpayers are exposed to compliance problems that stagger the imagination. As a result, any legislative solution must address itself to the basic question of the circumstances in which a company located in one State can be called on to pay taxes to or within another State. Unless we face this basic jurisdictional issue, we in the Congress will evade our responsibility to all of the States, and to the entire small business community of America.

In analyzing the details of H.R. 7906, I would suggest that each Member of Congress consider the insurmountable problems which are now facing small companies in his or her own State. A typical small company has less than 50 employees—in fact, a great many of them have less than 10 employees. Notwithstanding its size, such a small company in your State often sells its products in many other States—States in which it owns no property, and has no local employees. As a result, many such companies are exposed to liabilities in all or most all of 50 States, as well as in thousands of local jurisdictions. It is preposterous to assume that such a company can comply with the differing tax requirements of all of these jurisdictions. By laying down simple and practical jurisdictional standards, title I of H.R. 7906 will give the small companies the type of protection that is obviously needed.

Title I provides that the small company in your State cannot be taxable by another State unless it maintains what

is referred to as a "business location" in the other State. Now the term "business location" is a word of art which is used throughout the entire bill, and defined in section 511 to include: First, the owning or leasing of real estate; second, the maintenance of a stock of goods for sale in the regular course of business; or third, the presence of a local employee whose activities consist of more than the mere solicitation of orders.

I recognize that some of the tax administrators oppose these jurisdictional standards, and have created the impression that the only effect of title I is to impose limitations on present State taxing powers over interstate commerce. Let me point out to you that this is not the case, for there is a basic exception to title I which actually extends the jurisdictional reach of the States beyond the limits already established by the U.S. Supreme Court.

If I may respectfully have the attention of the gentleman from Washington (Mr. ADAMS), I will now directly respond to the point which he raised.

This exception appears in section 101 (2) which allows the States to impose sales tax collection requirements on all out-of-State sellers who regularly make deliveries to households in the State. This provision reverses the Supreme Court's decision in Miller Brothers against Maryland. The reversal of the rule in this case has long been advocated by the tax administrators themselves, and has also been recommended by the Advisory Commission on Intergovernmental Relations. It is regarded by the Judiciary Committee as an important means of strengthening State taxing powers in an area where local retailers clearly need protection from out-of-State competitors.

When all of the jurisdictional standards in title I are considered in their entirety, and in the light of the 6-year study conducted by our subcommittee, it becomes clear that under these standards the States generally will be able to continue to impose their business taxes on most of the companies which are currently complying with State laws, and will, in the sales tax area, be able to reach an even larger number of companies than they now reach. At the same time, the typical small company located in your State will be relieved of the responsibility of having to comply with a completely unworkable system of multi-State, multicounty, and multicity taxation.

That the subcommittee has molded legislation which will achieve fair and workable jurisdictional standards without causing the States to suffer revenue losses is made clear by the subcommittee's State-by-State analysis which appears on pages 11 through 15 of House Report 91–279, which accompanies this legislation.

Although title I provides the basic relief which is essential for all of the small companies, further measures designed to reduce compliance problems also appear in title II and title III.

Under title II, if a small company in your State is taxable on its income or capital in another State it may determine its liability under an extremely simple and practical formula. Under that formula no State will be able to tax a greater percentage of income or capital than the percentage arrived at by computing the proportion of tangible assets in the State and wages paid to employees in the State. This simple formula has several features which will not only reduce the compliance problems of small companies, but will also greatly increase the administrative efficiency of the State tax collectors.

First of all, since the formula does not contain a sales factor, it will not be necessary for a small company to keep detailed records of each interstate shipment. Second, since all of the company's income is subjected to the same simple formula, no disputes can arise with respect to the allocation of a wide variety of specialized items such as dividends, capital gains, rents, patent royalties, interest on bonds, and so forth.

These features of the formula in title II will so simplify the administration of corporate income tax laws that all of the States which impose income taxes will benefit.

Title III of H.R. 7906 will likewise increase the efficiency of compliance and enforcement in the sales and use tax area. For example, section 301(a) of title III applies a uniform rule for locating sales—a practical rule which conforms to the present practice of most of the States. Section 301(b) also provides a uniform standard for the imposition of use taxes so that such a tax cannot be imposed on a company that does not have a business location in the State, nor on an individual who does not have a dwelling place in the taxing State.

Section 301(c) of title III provides for a system of reciprocal credits so that each State will be required to give a credit for prior sales or use taxes imposed by other States. This system of reciprocal credits is one with which all of the State tax administrators are in agreement. However, there are, in fact, still some States which do not grant such credits. As a result, section 301(c) will complete the task of providing a nationwide uniform system of reciprocity.

Section 305 of title III is of particular significance. It provides a standard for the taxation of interstate sales by local governments. Because of the widespread proliferation of local sales and use taxes this provision will protect small companies all over the United States from being completely overwhelmed by the jurisdictional assertions of more than 3,000 political subdivisions, each of which is currently taxing interstate commerce according to its own individual rules. Clearly, the compliance problems under this intolerable situation are enormous. Section 305 in itself will spare thousands of small companies the price of countless weeks and months of labor in filling out tax forms which is often more costly than the actual tax dollars involved.

Now the three titles which I have reviewed contain the major substantive provisions of H.R. 7906. Each provision is based on a sound and logical principle, and has been formulated so as to both reduce the compliance problems of the small companies and to increase the efficiency of States tax administration. At the same time there is no single provision which is designed to protect any special interest, or to prejudice the interest of any State.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. MacGREGOR. Mr. Chairman, I yield to the gentleman from New York, (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, I thank the distinguished gentleman from Minnesota for yielding for several questions. Before propounding those questions, let me say that I support the goal of this legislation, and I propose to vote for it on its final passage.

However, in a study of this legislation several questions have arisen. In checking with my own New York State Tax Commission I found that they would like to have these matters discussed on the floor as part of the legislative history.

First, Mr. Chairman, I wonder if the gentleman from Minnesota could discuss a little further the impact of title II with respect to the factors that are to be considered in determining the maximum percentage of income or capital to be taxed. Apparently this is to be based on the property and payroll proportionate formula, and does not allow any receipts factors such as is currently involved in most allocation formulas used by the States.

It seems to me, Mr. Chairman, that this might result in some degree of discrimination against the industrial States which have, of course, located in them the property and the payrolls that are to be the basis of the maximum percentage of income to be taxed.

Mr. MACGREGOR. Mr. Chairman, the gentleman from New York has raised a significant point. It was one of the principal problems or hurdles faced by the special subcommittee in the consideration of this legislation. This partcular hurdle was known as the three-factor formula versus the two-factor formula. In fact, early drafts of the bill did include as an additional factor the factor which the gentleman has indicated, and we did for some time favor in the subcommittee a somewhat more comprehensive formula based on the three factors instead of the ultimate two-factor formula, which we now have. Again, in the course of the legislative development of this bill, and with due consideration to the interests of the industrial States, and with the argument which the gentleman from New York has so well propounded, it was the determination——

The CHAIRMAN. The time of the gentleman has again expired.

Mr. MACGREGOR. Mr. Chairman, I yield myself 3 additional minutes.

It was the determination of the subcommittee that it was wiser and more equitable to all of the States to adopt the two-factor formula which is contained in the bill, for it would promote efficient enforcement by the States and compliance by the taxpayer.

Mr. CONABLE. Mr. Chairman, the second question is this:

I wonder if any discussion was had in the committee on section 305, which re-

stricts the classification of interstate sales according to geographic areas in the State?

Now as I understand it, the section does not affect locally imposed sales and use taxes which are State administered and uniformly applied.

However, in our State we have a municipal tax administered by the municipality to a substantial extent.

It seems to me, looking at the committee report on page 13 where it states that New York State would suffer no significant loss of sales and use taxes, that this statement must relate to the State itself and not to the municipalities which I think would doubtless suffer substantially sales tax losses as a result of this provision, section 305.

Mr. MACGREGOR. May I respond to the gentleman from New York who was kind enough to raise this point with me before the formal debate began.

I cannot improve by interpretation the clear language expressed in lines 24 and 25 on page 10 of the bill and the top four lines on page 11 of the bill which read as follows:

> No seller shall be required by a State or political subdivision thereof to classify interstate sales for sales tax accounting purposes according to geographic areas of the State in any manner other than to account for interstate sales with destinations in political subdivisions in which the seller has a business location or regularly makes household deliveries.

With respect to the second point the gentleman made, I think it is a fair criticism, if you will, to indicate page 11 through 15 of the committee report where we have endeavored to indicate the only loss of revenue which our exhaustive studies show will be suffered by the States. It was impossible for us to determine, notwithstanding the exhaustive 4-year study that was made and the voluminous materials gathered, and evaluate with accuracy to determine the loss of revenue to the individual subdivisions because they are approximately 3,000 in number at the present time.

Mr. CONABLE. Does not the gentleman agree with me then that if a State does have a number of municipally administered taxes, it may have a substantial impact on municipal revenues in the State?

Mr. MACGREGOR. I could not so agree because I have no factual data on which to base such a conclusion.

Mr. CONABLE. I have some reservations about the double standard implicit in this million dollar differentiation that is made. I do not believe, in the answer that the gentleman gave earlier to a question from the gentleman from Ohio (Mr. TAFT), that he specified this million dollar standard applies only to income and to capital stock tax provisions; is that not correct?

This million dollar standard, this double standard, does not apply to the sales tax; is that correct?

Mr. MACGREGOR. That is correct.

Mr. CONABLE. I thank the gentleman very much for that further elucidation.

Mr. RODINO. Mr. Chairman, I yield to the gentleman from Ohio (Mr. FEIGHAN) such time as he may consume.

Mr. FEIGHAN. Mr. Chairman, I wish to commend the very distinguished and able chairman of the subcommittee, the gentleman from New Jersey (Mr. RODINO) as well as those members of the subcommittee, both past and present, who have worked so arduously in producing such a good bill.

I also want to commend the gentleman from New Jersey (Mr. RODINO) for his very clear and concise presentation.

I would like to mention two very outstanding former tax administrators of the State of Ohio under two administrations of different parties, both of whom came to Washington to testify on behalf of this legislation.

One is Mr. Bill Evitt the tax administrator under former Gov. John Bricker who subsequently was a Senator and also Mr. Emory C. Glander tax administrator under Gov. Frank J. Lausche who also subsequently became a U.S. Senator.

Mr. Chairman, the European Common Market was formed to facilitate and promote trade among its member nations. Every member of the Common Market is able to trade freely with every other member.

The United States is also a member of a common market—the "American common market." By that, I mean that each State in our Nation has free access to markets in every other State. Our common market, in fact, is much older than the European version. Indeed, this principle of free trade among the States is the backbone of our great American economy.

Yet our "American common market" is in danger. For several years now American business has been working under an ever-increasing handicap: our many State and local tax laws. With the growing volume of interstate business in today's age of rapid and efficient transportation, the tendency of local and State governments has been to reach out for increased revenues from out-of-State businesses, resulting in a serious burden being placed on the shoulders of participants in interstate commerce.

H.R. 7906, the Interstate Taxation Act, will help to alleviate that burden. This bill, which is identical to one which I cosponsored, will limit the taxing power of a State over the smaller out-of-State firms doing business within that State's boundaries. Basically, a firm would have to meet a certain standard before the State could levy corporate income taxes, sales or use taxes, capital stock taxes, or gross receipts taxes on that firm. This "business location standard" is based on the firm's property, employment, and inventory located within the State in question.

H.R. 7906 will also first, provide a uniform method for establishing the maximum percentage of income which can be taxed by any one State; second, reduce multiple sales taxes and facilitate the collection responsibilities of the interstate seller; and third, provide for continued study of the subject of State taxation of interstate commerce by the House Judiciary Committee and the Senate Finance Committee.

This bill is identical to an earlier one, H.R. 2158, which was passed last year by the House by a vote of 284 to 89. Unfortunately the bill was adopted too late in the session for the Senate to give this important measure its full consideration.

Mr. Chairman, I hope that the bill now before us, H.R. 7906, will receive the wholehearted support of the House.

Mr. RODINO. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri (Mr. HUNGATE).

Mr. ADAMS. Mr. Chairman, will the gentleman yield?

Mr. HUNGATE. I yield to the gentleman from Washington.

Mr. ADAMS. I ask the Chairman of the Committee if I might yield the 5 minutes that I have to the gentleman from Missouri, and participate in this debate at the same time.

Mr. RODINO. Before I yield 5 minutes, may I inquire of the Chair how much time the gentleman from New Jersey has consumed?

The CHAIRMAN. Forty-three minutes have been consumed, with 17 minutes remaining after the gentleman from Missouri has finished.

Mr. RODINO. I yield 2 minutes to the gentleman from Washington.

Mr. ADAMS. Mr. Chairman, will the gentleman yield?

Mr. HUNGATE. I yield to the gentleman from Washington not to exceed 2 minutes.

The CHAIRMAN. The gentleman from New Jersey has already yielded to the gentleman from Missouri 5 minutes. You may yield additional time later.

Mr. ADAMS. Mr. Chairman, I rise in opposition to this bill. I wish to indicate that the Members of the Washington delegation will oppose the bill. We have carefully tried to examine the statement on page 14 of the report as to the revenue losses to the State. We find that an examination of the information with which we were supplied only 12 firms doing business in the State of Washington replied to the questionnaires of the staff, whereas the State revenue people have examined 6,000 of the out-of-State registered taxpayers, and their estimates indicate there would be a biennial loss—the State operates on a 2-year basis—of $72 million in tax revenues to the State of Washington during this period.

I also want to indicate by sections how this loss will occur. Basically, it generally occurs in two situations, one being from the change in collections from out-of-State taxpayers when ordered by the State when they sell into our State from those States that do not have sales and use taxes. The other basically is in the jurisdiction to tax where the mail-order firms and those who are using consigned goods and have the ability to operate in our State without paying a sales and use tax. These are two basic areas of tax avoidance.

The advocates of the proposed Interstate Tax Act, H.R. 7906, continue to understate the potential loss of revenue to the various State and local governments in the Nation from enactment of the proposed bill. For example, recent figures released by the Subcommittee on State Taxation of Interstate Commerce suggest that the loss in sales and use tax revenue to the state of Washington would be a maximum of 1.01 percent

of the present yield and that there would be no significant loss in the state's business and occupation—gross receipts—tax revenues. These estimates apparently came from a staff report made several years ago by the Subcommittee on State Taxation and were based upon nationally compiled business statistics and not from data from the State's tax files and tax statistics. The Washington State Department of Revenue has pointed out errors in these figures on previous occasions, but this has not been acknowledged or considered by the subcommittee. Based upon the Washington State Department of Revenue's latest estimate of the impact of H.R. 7906 upon the State's revenue for the biennium beginning July 1, 1969, the total potential revenue loss to the State would be $72 million. The total potential loss in sales and use tax revenues is equal to approximately 5 percent of the estimated yield from those sources for the 1969–71 biennium and the total potential business and occupation tax loss is approximately $20 million. The total potential loss is more money than was appropriated by the Washington Legislature from the general fund for the combined operations for all of the executive departments of State government, the legislative operations, and the judicial branch for the 1969–71 biennium.

II. SUMMARY OF REVENUE LOSS BY SECTIONS

H.R. 7906 has been passed by the U.S. House of Representatives and is now pending before the U.S. Senate. The estimates herein of the impact of revenue loss to be suffered by the State of Washington under the provisions of H.R. 7906 replace previous estimates of April 17, 1967. In addition to the estimates, which have been revised to the 1969–71 fiscal biennium, a brief discussion as an appendix has been attached which discusses the relationship of these estimates to the estimates of Washington's revenue losses under the bill as they were presented to the House for consideration.

H.R. 7906 replaces H.R. 16491 as introduced in the Congress in the fall of 1966 and, as amended, contains only one change from H.R. 16491 which would have any impact upon revenues of this State. The change is in the form of an addition to section 511 providing the general rule on "business location." It adds a third provision to the rule and the rule may now be summarized as follows: "Business location" is considered as first, owning or leasing of real property; second, having one or more employees "located" in the State under section 513; or third, maintaining stocks of goods for sale in the ordinary course of business.

The added provision broadens the rule to the advantage of the States. It is qualified, however, to the extent that property on consignment and in the hands of and offered for sale by a consignee may not be considered as stock maintained by the consignor. This qualification would limit the application of the stock of goods provision of the "business location" rule to goods held in a warehouse in this State by an out-of-State vendor and would to an extent limit any revenue change which would result from the inclusion of the third item above in the section.

Detail of the amounts and reasons for the losses are contained herein. They are summarized as follows:

[In millions]

Immediate loss	$34.6
Potential loss	35.9
Total potential loss	[1] 70.5

[1] Revised impact on an aggregate basis as of May 1969, $72.0 million.

III. DETAILS OF REVENUE IMPACT ESTIMATES BY SECTION

TITLE I—JURISDICTION OF TAX

Section 101(2): This section provides that no State shall have the power to require a seller to collect sales or use tax with respect to sales of tangible personal property unless the seller has a business location in the State or regularly makes household deliveries in the State. Based on anticipated levels of payments a net biennial loss of $15.8 million can be expected in connection with out-of-State vendors which do not meet the proposed technical requirements for a "business location" in this State, but which are presently collecting sales and use tax with respect to sales to Washington residents by reason of substantial local sales activity—solicitation and order-taking by salesmen and employees or independent agents or the maintaining of stocks of goods in the hands of a consignee which are offered for sale on the account of the consignee. This net loss is based upon a gross loss reduced by an estimated amount which would be recovered through voluntary reporting and/or a substantial increase in audit activity as to Washington consumers and, in addition, by the fact that it would be possible to require sales tax collection by certain out-of-State firms which regularly make household deliveries into the State.

Additional potential losses of $25.5 million per biennium are projected as the result of changes in modes of business operations permitting tax avoidance by the elimination of business locations in the State. See additional comments under section 511 and 513 below.

Section 101(3): This would prevent the State from imposing the business and occupation tax with respect to the sale of tangible personal property unless the seller has a business location in the State. It would result in a loss of business and occupation tax revenue from out-of-State manufacturers and other businesses in regard to their wholesaling and retailing activities in this State.

With respect to foreign taxpayers which are reporting business and occupation tax under present Washington statutes which would be exempt with enactment of the interstate taxation act, because of the business location limitations provided in the act, it is estimated that a biennial tax loss of $5.6 million would occur. This would be primarily represented by firms making wholesale sales in the State. As in the instance cited above, changes in methods of operation would undoubtedly occur causing increased revenue losses of $10.4 million per biennium. See section 511 and 513 for comments regarding the "business location" and "location of employee."

TITLE III—SALES AND USE TAXES

Section 301(b): This would restrict the imposition of use tax with respect to the use of tangible personal property of persons without a business location in the State or a resident individual. We estimate a biennial loss here of $3.9 million. Under the terms of this provision Washington would lack authority to tax nonresident firms in connection with tax on advertising materials, executive cars, and other business property used in the State.

Section 303 provides for the deduction of "freight charges or other charges for transporting tangible personal property to the purchaser" if such charges are separately stated by the seller. Present law allows the deduction of actual freight or delivery charges which are billed separately to the buyer and which are paid as an advance for the buyer from the place where title passes. Thus, this section would expand the deduction to include any freight or transportation charge which is designated as such on the invoice. There is no requirement that the charges represent actual freight costs. Hence, the freight deduction is completely subject to manipulation by the seller. We predict a minimum revenue loss of $2.2 million under this section.

Section 304 provides sales and use tax immunity to business buyers making out-of-State purchases, simply by furnishing the seller with the purchaser's registration number without any provision for a stipulation that the purchase is for resale or is an exempt sale. The present law and procedures require the seller to prove that such sales are in fact immune from these taxes. Part (2) of the section permits a purchaser not registered with the department of revenue for the payment of taxes to make exempt purchases merely by presenting the seller with a certificate stating a reason for exemption. Without the proviso for the issuance of immunity numbers, as contained in the previous bill (H.R. 11798), the department of revenue will have no way of controlling or auditing such purchases for use tax purposes. This provision would cause a biennial loss in tax revenue of $1.9 million. It is important to note that this estimate is based upon the presumption the department of revenue would be in a position to recover a portion of the unpaid tax through initiating a greatly expanded audit program and conducting regular audits of accounts not presently given audit coverage but which, as holders of registration numbers, would have to be checked in order to determine whether or not their immune purchases were valid and to ascertain that use tax had been reported on taxable items. Without this expanded audit program the revenue loss would be much greater than the figure stated.

TITLE V

Section 504: The definition of use tax, as provided in this section, is so broad that it would include a use tax that is complementary to a general sales tax and a use tax complementary to some types of special sales taxes including, for example, cigarette and gasoline taxes. Under section 301(b) a State could not impose its use taxes with respect to such items shipped from an out-of-State location to an out-of-State individual who picked them up at a post office or

a terminal of a common carrier in this State. This could lend legality to substantial bootlegging operations in items such as cigarettes. An estimate of the revenue losses which might be expected in this context is difficult to determine. Past experience has shown that legal loopholes are quickly utilized and there is every indication that biennial revenue losses in regard to cigarette taxes would total at least $2.1 million per biennium.

Section 511(a): This section defines "business location" as the term is used in section 101 (2) and (3). It restricts the term to a person first, owning or leasing real property in the State; second, having one or more employees in the State; or third, maintaining stocks of goods in the State for sale in the ordinary course of business.

Condition (2) regarding "location of employees" is discussed further under section 513. The definition would remove firms from tax liability that have only a stock of goods in this State held in the hands of a consignee and offered for sale on the account of the consignee. Stocks of goods held by consignees under such conditions now constitute "doing business" on the part of the out-of-State vendor and make such vendors liable for gross receipts taxes. Such vendors are now also liable for the collection of sales and use taxes whenever retail sales are made by the vendor to purchasers in this State, whether the goods are shipped from points in or outside this State. Estimated revenue losses that would accrue under this definition are included under Section 101 (2) and (3).

Section 513 (a) (b) (c) (d): The "location of employee" in the State is defined in this section. Under its provisions an employee's activity creates tax liability for his employer when his services are performed entirely in this State or when his services outside the State are only incidental to his instate activities. When his services are both in and out of the State and the employer maintains a place of business from which the employee regularly leaves and returns, the employee's instate sales activities create tax liability. Such place is known as the employee's "base of operations." Where the employer does not maintain a place of business in the State, the solicitation of orders by the employee does not create tax liability if the orders are sent outside the State for approval or rejection and are filled by shipment or delivery from a point outside the State.

Washington law, under authority of U.S. Supreme Court decisions, presently makes retail sales solicited by a resident salesman or sales agent, under such conditions of approval and delivery, as described above, subject to sales or use taxes but not to gross receipts taxes. In cases where the employer has only a stock of goods, or goods held on consignment in this State, orders filled from such stocks become subject to the gross receipts tax as well as sales and use taxes. The proposed bill would remove sales from goods held in the hands of a consignee and offered for sale on the account of the consignee from tax liability. The estimate of the revenue loss that would occur under these conditions is included under section 101(2)(3).

Section 513(e): This section holds that an employee installing or repairing tangible property resulting from an interstate sale cannot be considered located in the State if such services are incidental to the sale. At present such installation or repair services, whether performed by the vendor's employees, or by a subcontractor, make the entire sale subject to sales, use, and gross receipts taxes. This liability occurs regardless of any other conditions of liability surrounding the sale. The proposed bill will exempt the gross amount of many sales of considerable size, such as the installation of a generator in a power dam on the Columbia River. An estimated biennial revenue loss of $3.1 million can be expected under this section.

SUMMARY OF BIENNIAL REVENUE LOSS TO THE STATE OF WASHINGTON DURING THE 1969-71 BIENNIUM WITH THE ADOPTION, BY CONGRESS, OF H.R. 7906

[In millions]

Title and section	Immediate impact with passage of H.R. 7906 (biennial loss)	Additional potential loss with changes in business modes of operation
I. 101(2)	−$15.8	−$25.5
I. 101(3)	−5.6	−10.4
III. 301(b)	−3.9	
III. 303	−2.2	
III. 304	−1.9	
V. 504	−2.1	
V. 513(e)	−3.1	
Immediate loss	34.6	
Potential loss		35.9
Immediate loss		34.6
Total potential loss [1]		70.5

[1] Revised impact on an aggregate basis as of May 1969, $72.000.000.

SUMMARY OF BIENNIAL REVENUE LOSS TO THE STATE OF WASHINGTON DURING THE 1969-71 BIENNIUM, BY TYPE OF TAX, WITH THE ADOPTION, BY CONGRESS, OF H.R. 7906

[In millions]

Type of tax	Immediate impact with passage of H.R. 7906 (biennial Loss)	Additional potential loss with changes in business modes of operation
Sales	−$23.9	−$25.5
Business and occupation	−8.6	−10.4
Cigarette taxes	−2.1	
Immediate loss	34.6	
Potential loss		35.9
Immediate loss		34.6
Total potential loss		[1] 70.5

[1] Revised impact on an aggregate basis as of May 1969, $72,-000,000.

Mr. HUNGATE. I thank the gentleman for his contribution.

Mr. Chairman, it has somewhere been said that one with God is a majority. This was not true in the last Congress on this bill, but I am going to give that saying another chance.

We are considering this bill regarding State taxation of interstate commerce at a time when all States and local political subdivisions are desperate for funds and additional methods of raising revenue. This bill proposes to exempt any corporation from State income taxes, capital stock taxes, use taxes, and gross receipt taxes in many specific and technically defined areas. Although the language is possibly inevitably legalistic, a reasonable construction would appear to be that the only foreign corporations on which a State could levy these taxes after this act became effective would be those which would meet one or more of the following tests:

A business location in the State, regular household deliveries in the State, or corporations with an annual income exceeding $1 million. Those corporations averaging $1 million are called excluded corporations.

I propose to offer an amendment to change the definition of excluded corporation from one averaging $1 million income per year to one averaging $500,000 annual income per year. This would seem to me to come closer to our definition of small businesses, as our desire would be and is, I am certain, to avoid unduly burdening small businessmen, while seeing the larger corporations, so far as possible, make their fair contribution to local, State, and municipal government bodies. I would submit that in most areas of most of our States, I believe, a corporation with an average annual income of $500,000 to $1 million would not generally be considered to be a small business.

Mr. Chairman, as we talked about small business, my colleague from Minnesota made reference to my request that Members contact their Governors and State tax officers. I hope Members will and have done so.

In Missouri, the Governor and the State legislature represent the small businessmen. It would be well for us to contact the small businessmen too, but in my State the Governor and the State legislators represent the small businessmen.

It has been stated that we have several organizations—some 50—who support this bill. I suggest that 50 States do not support this bill through their legislatures and Governors. I wonder if anyone could tell me—and I would yield—the names of the States or any State Governors who are supporting the bill, if my distinguished subcommittee chairman has that information.

Does Mr. Moore support this bill, does the gentleman know?

Mr. RODINO. Mr. Chairman, if the gentleman will yield, Mr. Moore was a great supporter of this bill. Mr. Moore worked on this study and helped develop the bill and he supported it wholeheartedly.

Mr. HUNGATE. Could the chairman tell me the names of any other Governors who support this measure?

Mr. RODINO. The former Governor of Vermont supported this bill.

Mr. HUNGATE. Any current Governors?

Mr. RODINO. I am sorry, I do not have that at the present time.

Mr. HUNGATE. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. RODINO. I yield the gentleman 2 additional minutes.

Mr. HUNGATE. Mr. Chairman, am I correct or incorrect that the tax administrators from Ohio—whatever their

proper title is—who favored this measure were not those currently in office? I understood those named would have been serving under Governor Bricker and Governor Lausche.

Mr. RODINO. We believe that is a correct statement.

Mr. TAFT. Mr. Chairman, will the gentleman yield?

Mr. HUNGATE. I yield to the gentleman from Ohio.

Mr. TAFT. Mr. Chairman, I happen to know the gentlemen referred to, and they were very distinguished gentlemen, but I would say it is a long time since they were tax commissioners for Ohio. Since then they have been among the more successful tax practitioners in Ohio.

Mr. HUNGATE. Mr. Chairman, I appreciate the gentleman's contribution. It is worth while as always.

Mr. Chairman, when we talk about the average annual income exceeding $1 million, what do we mean? Is that for 1 year or 2 years, or is it for 20 years, or for the life of the corporation?

Mr. RODINO. We apply a 5-year period to average the net taxable income.

Mr. HUNGATE. Mr. Chairman, I thank the gentleman.

I also thank the gentleman for yielding and I thank the distinguished chairman of the subcommittee and the ranking minority member for their courtesy which they have always extended me throughout our discussion or disagreements on this measure.

I still urge the House to reject this measure.

In discussing the present chaotic tax system we have, it was said that if we pass this bill we will be able to look forward to reasonable regulations written in Washington and enforced from here—and I am sure we have all had experience with those.

(Mr. WALDIE asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. WALDIE. Mr. Chairman, I am opposed to the enactment of H.R. 7906. In stating my opposition, I would like to review the arguments given in support of the bill.

It is contended that this bill is designed to assist small business. Our analysis in California shows that many of the companies that would be exempted from sales and use tax collections are large organizations that operate throughout the United States. We note that one of these companies is in the top 50 of the 500 largest industrial corporations listed by Fortune in its May 15, 1969, issue. I will place at an appropriate time in the RECORD an exhibit which lists some of the different types of businesses that would gain immunity from sales and use tax collections. The tax loss on the 25 companies listed in the exhibit would be more than $2,500,000 per year and these are merely a few of hundreds of companies that would be exempted.

What causes this problem? It occurs because under H.R. 7906 a company is not considered to have a business location in the State if its only activity consists of the solicitation of sales by employees, or others, for acceptance or shipment from an out-of-State location. An interstate business can have any number of full-time employees engaged in selling activities in a State without establishing a business location for the employer. There are many companies that operate in this manner and many more will be so organized if the tax advantage is given. It is this feature that would enable many corporations to exploit the national market and in the aggregate make billions of dollars of sales without being subject to State or local sales or use taxes.

The presence of such solicitors operating in direct competition with local businesses should subject their employers to the same tax burdens as the local businesses. Otherwise, the local businesses are operating at a tax disadvantage which, in the case of California, is 5 percent.

It is contended that the revenue loss to the States would be insignificant. This is a highly misleading argument. The report of the Judiciary Committee is inaccurate and understates tenfold the California loss on sales and use taxes. It may be assumed that similar errors were made with reference to other States.

The corporation income tax provisions will also adversely affect California's revenues and create tax advantages for out-of-State business over locally based businesses. Such businesses already have a substantial advantage. Under existing Federal jurisdictional restrictions, some corporations employing salesmen within this State make sales of more than $10 million annually without incurring tax liability. The bill would further extend immunity from State taxation. It would also permit most interstate corporations to determine their California income by the bill's tax formula or by using California's existing formula. This provision would require all such corporations to make a double computation in order to determine the method producing the smallest amount of tax. Certainly such a requirement is contrary to the special subcommittee's avowed intention of striving for greater simplicity.

The proposal would significantly curtail State taxing jurisdiction. The enforcement of State taxing laws would be severely hampered at a time when revenue requirements are increasing at an unprecedented rate.

It is also contended by some that the State tax administrators are the principal opponents of this bill. This is not the case in California where the California State Chamber of Commerce, the California Manufacturers Association, and the California Retailers Association all actively oppose H.R. 7906. In addition, local government would be adversely affected and the League of California Cities and County Supervisors Association oppose the bill.

It is contended that Congress must act to provide uniform rules that will eliminate unreasonable and widely varying State practices. This may have been a valid argument when the subcommittee started its study in 1960, but this is no longer the case. The States have acted in recent years to remove substantially all of the inequities to which objections were made. The Multistate Tax Compact provides an excellent medium for accomplishing additional standardization in State tax administration. Federal intervention is not warranted.

I urge a no vote on H.R. 7906.

Mr. MACGREGOR. Mr. Chairman, I yield 4 minutes to the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. Mr. Chairman, I did not favor this bill when it came before the House the last time for the very reasons that have been stated by some of the speakers today. I feared that it would impair the revenues of the State of Illinois unduly, and that we would suffer as a result of it, and that it would have other adverse effects in my State.

That fear has been pretty much eliminated from my thinking at this time, and I feel that the main purposes of this legislation are to eliminate duplication and to end inequities. In the application of this legislation the States would receive the revenues which they legitimately should have under their sales, use, capital stock, and income tax laws.

I do not know of any legislation that has had more thorough or more careful study than this legislation.

I do not know a legislative prerogative which is more legitimately exercised than this, nor one which the Congress has been more admonished to exercise than this authority we are exercising through this legislation.

All of us who are lawyers are aware of the many U.S. Supreme Court and other Federal and State court cases dealing with the subject of multiple sales and use taxes. We are aware of the problems which are encountered by the courts in their efforts to legislate guidelines for interpreting the conflicting State laws which exist today.

As a matter of fact, we are responding today to the admonishment of the courts to set legislative guidelines which can benefit the businessmen, the individuals, and all of the citizens of the country who are involved in interstate transactions.

So as a result of the careful and thorough study, the extensive hearings that have been held, the effort to respond to legislative demand, the effort to provide equity where inequity exists, the effort to eliminate duplication where that exists—and it exists throughout the Nation—we are afforded an opportunity today to do something quite constructive.

I might say that an amendment will be offered by the gentleman from Iowa (Mr. SMITH) which would help to secure to the States their fair share of revenues from income taxes and yet at the same time avoid duplication. I intend to support the amendment when it is offered.

No legitimate State taxes will be authorized under this bill. No extensive Federal bureaucracy will be created by enactment of H.R. 7916.

In the interests of equity and equality, the Interstate Taxation Act should be passed.

Mr. MACGREGOR. Mr. Chairman, I yield 8 minutes to the gentleman from Michigan (Mr. HUTCHINSON).

Mr. HUTCHINSON. Mr. Chairman, in 1966 when the present mayor of New

York, the Honorable John Lindsay, left Congress, I was privileged and honored to be appointed to the Subcommittee on State Taxation of Interstate Commerce to fill that vacancy. During the balance of the 89th Congress and during the 90th Congress I served as a member of the subcommittee.

I am not a member of the subcommittee in the present Congress.

A year ago, when identical legislation was reported to the House, I wrote separate views. My position, as stated in those separate views, was not an out-and-out opposition to any legislation in this field. As a matter of fact, I stated then, and my position has not changed, that I believe the jurisdictional standards set forth in the bill are fair, and they are equitable, and they are understandable and they are simple.

The part of the bill to which I objected a year ago—and my position has not changed in this regard, either—was an objection to the concept of title II. Title II has to do only with income tax questions, and it makes provisions with regard to a corporation earning income of less than an average annual income of $1 million. In order to generate $1 million of annual income an ordinary business has to have several million dollars worth of sales. So it is not a small business, really.

But any business which generates an income of not more than a million dollars is permitted under title II to some preference. Such a corporate business can choose either to pay a State income tax, and its jurisdiction to that State is admitted, in accordance with that State's laws, or it may choose to pay according to a two-factor formula which may be very foreign to that State's tax system.

I made this argument and a year ago I offered an amendment to strike title II from the bill. I do not intend to offer such an amendment this year for the reason that I went to the well and I lost, and I have not seen any particular growth in sentiment for the view that I have expressed. In other words, I do not see that the States are particularly troubled about title II, although I disagreed with it in philosophy.

The States a year ago, or at least my State, were very quick in reaction. They repeatedly told me of their opposition. A year ago I heard from my Governor and I heard from my State attorney general. Even the legislature of the State of Michigan a year ago resolved against this legislation. I must say that I have not heard from any of them this year. I have, however, heard from my State commissioner of revenue. Also last night and this morning I heard from one of the assistants in the attorney general's office of my State. The question that was raised to me on the telephone this morning was the very question that has been presented here previously today, that is to say, a challenge to the accuracy and the validity of the effect of this legislation on State revenues as it is set forth in the last three or four pages of the committee report. It says there, as to the State of Michigan—and I state this so as to put it on the record—according to the information set forth on page 13 of the committee report, with regard to sales and use taxes, Michigan will suffer no significant loss, it says, and there will be a maximum possible loss which could not exceed more than one-tenth of 1 percent. The sales and use tax revenues of the State of Michigan at the present time are $790 million. One-tenth of 1 percent of that figure would amount to only $790,000. However, I am informed that the State, yesterday, pulled out of its computer the use tax payments of its out-of-State sales taxpayers, businesses which under the definitions in this bill do not have a business location in Michigan, and it was found the revenue loss from this category of taxpayer alone would be not $790,000 but $7,580,134.21. I am informed of that by my State attorney general's office as of noon today.

So I submit, Mr. Chairman, that I do not think we should rely upon the accuracy of the statements in the back end of this report as to the effect of this bill on State revenues.

However, I say that the concepts of this bill do not disturb me, because up until 10 years ago no State thought that it could tax any out-of-State taxpayer unless that taxpayer engaged in an intrastate business within that State. In other words, unless you had a local business in that State, the State could not reach you. Then 10 years ago, in 1959, the Supreme Court of the United States started amending the law in this field. They amended it and the States woke up the next morning and found out that they had a great deal more tax power than they ever imagined they had.

The effect of this legislation now before us is simply to put the situation back as it was before the Supreme Court started to amend the law. Now, Mr. Chairman, from that standpoint I believe that this legislation is all to the good. I am disturbed about the concept of title II. I believe that the small businessmen are going to realize that title II is not going to give them what they think they are going to get, but I guess the only way they can learn is to learn through experience, so I am willing to let them learn it, and I am prepared to vote for the bill.

Mr. Chairman, I yield back the balance of my time.

Mr. RODINO. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. EILBERG).

Mr. EILBERG. Mr. Chairman, I would like to clarify the effect of title II of this bill on foreign commerce.

As a former member of the Special Subcommittee on State Taxation of Interstate Commerce, Congressman CORMAN from California was one of the original sponsors of this legislation in the 89th and 90th Congresses. In this regard, the bill offered by Congressman CORMAN, H.R. 5501, is identical to H.R. 7906. It is my understanding that title II of this proposal in no way increases the tax burdens on corporations engaged in foreign commerce as compared with corporations engaged only in interstate commerce. I am sure that the gentleman from New Jersey will agree.

Mr. RODINO. Mr. Chairman, I would like to say to the gentleman from Pennsylvania that his statement is accurate, and I agree completely. Title II of the bill is intended solely and only as a limitation upon the tax otherwise payable by a business which is engaged in interstate commerce, or foreign commerce. The taxing jurisdictions already have the mechanism which avoids taxing the income from foreign commerce. This act will in no way change, nor suggest a change, in the present practice with respect to businesses that operate abroad.

Mr. EILBERG. Although the bill does not contain a specific provision to that effect, the result is implied; is it not?

Mr. RODINO. I would say to the gentleman that, yes, it is implied. All we have done here is to clarify and make more certain the method of arriving at the tax liability.

Mr. EILBERG. Mr. Chairman, as a member of this subcommittee, there are many misconceptions about H.R. 7906, the Rodino bill, on State taxation of interstate commerce.

To summarize, here are some quick facts which I hope will clear up some of these misconceptions.

H.R. 7906 is not a tax bill. It will impose no taxes of any kind, Federal, State, or local.

Second, H.R. 7906 is purely bipartisan. Laboring hard for more than 8 years, dedicated members of both major parties amicably worked together to produce and perfect this bill.

Third, H.R. 7906 will not deprive any State of any significant revenues it is now receiving, and if enacted would insure all the States greatly increased revenues through continued expansion of the mutually beneficial interstate commerce which has made this Nation the richest in the world.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RODINO. Mr. Chairman, I yield 1 additional minute to the gentleman from Pennsylvania.

Mr. EILBERG. Fourth, H.R. 7906 simply provides the essential jurisdictional ground rules for a healthy business growth throughout all 50 States, by ending in a workable way the present and increasingly chaotic interstate tax procedures of most States.

Fifth, H.R. 7906 will afford direly needed protection to small businesses now plagued by a deadly maze of State and local tax liabilities, the enforcement of which would wipe out most such companies and their employees.

Mr. Chairman, for all these reasons—and for the many others cited here today and recorded in the voluminous hearings on this subject—I urge my colleagues on both sides of the aisle to vote for immediate passage of H.R. 7906.

Mr. MACGREGOR. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. WIGGINS).

Mr. WIGGINS. Mr. Chairman, I would like to ask a couple of questions to help clarify some of the language of the bill, if I may have the attention of the gentleman from New Jersey and the gentleman from Minnesota as well.

I would like to call attention to section 522 of the bill. That section is entitled "Prohibition Against Geographical Discrimination" and provides among other things that no State law may impose a

greater sales, use or gross receipt tax upon tangible personal property originating from without the State than it would impose upon identical personal property originating from within the State.

In other words, as I understand it, this section is intended to prohibit a State from raising tariff barriers to the free flow of commerce by discriminating tax rates.

Since the term "gross receipts tax" is defined in section 505 in terms of any tax other than a sales tax measured by gross volume of business, in terms of gross receipts, or in any other terms, was it the intention of the committee to apply the term "gross receipts" to a tax measured by the value of crates of eggs, for example, barrels of oil, for example, or even gallons of wine, for example?

Mr. RODINO. Yes; the gentleman is correct.

Mr. WIGGINS. Under that interpretation then, Mr. Chairman, is it also true that a State is prohibited from imposing a discriminatory gross receipt tax which would have the effect, for example, of giving preferential tax treatment to wine produced domestically over wine produced in another State?

Mr. RODINO. Yes.

Mr. WIGGINS. I thank the gentleman for that clarification.

Mr. MACGREGOR. Mr. Chairman, I yield 1 minute to the gentlewoman from Washington (Mrs. MAY).

Mrs. MAY. Mr. Chairman, I rise in opposition to H.R. 7906. My opposition to this bill is based on what I believe to be the real issue involved; namely, tax dollars. And I urge my colleagues to consider this for a moment.

Last year when the Interstate Taxation Act was before us in the House, I showed how the revenue loss to the State of Washington, as estimated by the staff of the Special Subcommittee on State Taxation of Interstate Commerce, was both unreliable and grossly understated. At that time I submitted for the RECORD some data which proved that the subcommittee's choice of a formula to measure revenue loss was internally inconsistent and the method selected was devised to give the impression of minimal tax impact.

Let me just say now, Mr. Chairman, that although the losses estimated to the State of Washington were substantial last year, they are even more so now. I am advised that as the result of economic changes, our potential revenue loss at this time has risen to $72 million a biennium.

I am further advised that California has just prepared a similar memorandum to one prepared by the State of Washington which shows substantial losses to that State, too. If this is true of these two States, I submit that my colleagues should look closely at the question of reliability of committee figures with respect to the States and the people they represent in the Congress.

Mr. Chairman, I am interested in simplicity of taxation and I am interested in uniform jurisdictional rules. I am not, however, interested in additional jurisdictional limitations which would, in effect, relieve out-of-State businesses of tax liability in my State, thus giving them an unfair advantage, competitively, over those businesses located in my State. And that, I believe, is really what H.R. 7906 would do.

Rather than pass a bill such as H.R. 7906, Mr. Chairman, I believe we should give encouragement and support to the States, which have been moving effectively to bring greater uniformity into their taxing systems. A majority of States have, within the past several years, adopted specific legislation to provide the uniformity which the Judiciary Subcommittee had recommended. The Multistate Tax Commission now has 18 regular members and 10 associate members. Utah and North Dakota are the 17th and 18th regular members, effective May 13 and July 1 of this year. Tennessee became the 10th associate member last week on June 19.

The multi-State tax compact is either currently being considered or is expected to be considered shortly by the legislatures of several other States. Still other States are considering associate membership.

This, Mr. Chairman, is an outstanding record on the part of the States in a short period of time. Their action dramatically demonstrates recognition on the part of the States of their own problems and a vigorous and affirmative program to correct those inequities that do exist. And I feel that these actions by State and local governments should be commended and encouraged rather than discouraged and declared useless as I believe this Federal legislation, at this time, would do.

Mr. MACGREGOR. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. TAFT).

Mr. TAFT. Mr. Chairman, I have been deeply impressed by the knowledge and the depth of inquiry on this legislation. I mean this in all sincerity.

I do not know why the bill disturbs me as much as it does, but I opposed it last year and stated I thought it was confusing and dangerous then. And I still do. I suppose perhaps this comes from the fact that in my youth I practiced a good deal of law in this field.

But now I remember with some caution the words of Alexander Pope:

A little knowledge is a dangerous thing.
Drink deep or taste not the Pierian spring.

But I do think some questions ought to be asked because the field is so complex. I do not think there has been a very full assessment of the proposal by the country generally or by responsible local officials throughout the country.

I think the Senate was wise in taking a long look at this bill last year. It was said earlier a couple of times that the bill passed the House and then went to the Senate, but too late for any action.

It passed this House and went to the Senate on May 22, 1968, and as I recall, the Senate did not adjourn until sometime in mid-October. Perhaps that was too short a time. In fact, perhaps the Senate ought to take the same 7 years that the House has taken in reexamining this bill and trying to clean it up before we put it into effect and correct some of the possible ramifications that might develop from it.

But, as I said, I do not intend to challenge the knowledge of the members of the Committee on the Judiciary, I respect their ability as lawyers and respect the time and the work that they have put into this bill.

For that reason I intend in the remaining few minutes to raise just a few questions for consideration by the Senate when the legislation gets over to the other body. Some of the questions are as follows:

Is there any State association of tax officials, or is there any group of Governors in the Governors Conference or otherwise that has examined this proposal from the other side of the fence?

I think there are also some practical and constitutional questions that are bound in the bill. It seems to me it was clear from the answer of the distinguished gentleman from New Jersey to my first query to him some minutes ago that the bill does in a very real sense impose new Federal limitations upon the State taxing power. Is that not a dangerous precedent for us to be setting at a time when we seem all too often to be taking power away from the States, when the lesson we should have learned is that sometimes it is better to keep our nose out of such affairs and leave them to the States to handle unless there is some crying national need involved—and I do not believe that is true here.

Is not the approach of the interstate compact, which I recognize has not made satisfactory progress, a better approach than a statutory approach?

I wonder, too, if the setting aside of practically all of the court precedents in connection with State-taxation matters, which I believe is the effect that this bill will have, will not be a lawyer's dream rather than a taxpayer's dream. And will taxpayers not be paying out more in legal fees to lawyers to attempt to get new interpretations of the various ramifications of this bill on the State tax laws than they would be paying for the admittedly bothersome redtape which is involved in complying with some of the State tax statutes?

I wonder, too, if the bill does not violate, as I indicated earlier, the uniformity-rule provisions that many States have in their constitutions with regard to taxation, in that it sets up two different classes of taxpayers who may be taxed differently, even though they are competing with each other.

There was some mention also of the Miller case. I had explained to me what the effect of that case would be on household deliveries, but it seems to me that here again we have two possible classes of taxpayers who are in competition with each other. On the one side is the man who is shipping across a State line into a State and making household deliveries, but is also making plant deliveries, and therefore, under the present language, would have to pay a tax on the plant deliveries as well as the household deliveries, and the other man is not making any household deliveries but is simply a straight wholesaler making merely plant deliveries.

I wonder why there is an exclusion of

cost of out-of-State audits? This apparently applies as well to excluded corporations. Would not that make it extremely difficult, in the case of banks and many other institutions? I understand that we are to go into bankholding company legislation. This seems to me to raise a lot of questions as to whether or not the elimination of the cost of doing a proper audit in order to see that taxes are paid should properly be eliminated by the Federal Congress.

What about subsidiaries and subcorporations? This is not, in my opinion, really covered here. Are we going to pierce the corporate entity as we do in the case of the antitrust laws? Otherwise will there not be subsidiaries set up to avoid taxes?

These are some of the questions I hope the Senate will go into in examining this legislation.

Mr. RODINO. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia (Mr. FLYNT).

Mr. FLYNT. Mr. Chairman, I rise in support of the bill H.R. 7906. I have supported this bill since the Supreme Court decisions in 1959 and 1960 made legislation similar to this imperative if we are to provide reasonably uniform treatment of taxation by the States on income derived from interstate commerce.

I associate myself with the remarks which have been made in support of this bill by the gentleman from New Jersey and by the gentleman from Minnesota and by others.

I have worked very closely with the members of the Judiciary Committee, including the gentleman from New Jersey (Mr. RODINO), who is now chairman of the Subcommittee on State Taxation of Interstate Commerce. Prior to that, during his service in this body, I worked very closely with the gentleman from Louisiana, Mr. Willis. Of course, I have worked with the minority members, including the gentleman from Minnesota (Mr. MACGREGOR), Governor Moore, of West Virginia, a former Member of this body, and with the other members on the minority side.

I have long recognized the crying need for legislation of this kind. This is a difficult bill to understand fully and to comprehend. It is even more difficult to explain this bill fully, to those who are interested in it so that they, too, can listen and understand it. I think the remarks made by the gentleman from New Jersey, the gentleman from Minnesota, and others in support of this bill have been illuminating and clear and should have resolved the doubts of anyone who might have been otherwise inclined to oppose this legislation.

When this legislation was first proposed, I supported it, because I thought it was right, and I supported it because I thought it was absolutely necessary.

When the Governor of my State and the revenue commissioner of my State initially came out in strong opposition to it, I recognized immediately I was going to have to do my homework on this subject if I were going to be able to withstand any assaults they made on me and other members of the Georgia delegation who supported legislation which at that time the Governor and commissioner opposed. The Governor and revenue commissioner of our State came to us and asked us to oppose the concept and the principle of this legislation on the theory it would cost the State of Georgia several million dollars, in State revenues.

After having become knowledgeable enough on this subject and after having discussed it with the tax experts, including the revenue commissioner of my State, I readily admitted to him that it might cost the State of Georgia some money, but I sought to convince the Governor and the revenue commissioner of my State that whatever the State lost in revenue, it would be made up to the taxpayers—businessmen who engaged in interstate commerce outside the State of Georgia and by consumers within the State of Georgia who would benefit tenfold or more in ratio to the small loss of revenue that the State of Georgia might incur.

It took a long time to get this point of view across, but finally the Governor of our State, and the revenue commissioner, came up with a proposal which was submitted to the Committee on the Judiciary and accepted by the Committee on the Judiciary, and by the subcommittee which handled this legislation, which met all of the objections which the revenue officials of our State had theretofore had. We worked out an effective compromise in language without compromising principle.

Mr. Chairman, we feel this is legislation which will be of tremendous benefit to businessmen in Georgia who are engaged in a substantial amount of interstate commerce. It will also be a matter of substantial savings to consumers in Georgia who buy goods which come into Georgia through the means of interstate commerce. This bill might well be named—in addition to the title it bears—a bill for the benefit of consumers and for small businessmen.

Mr. Chairman, I listened with a great deal of interest to the very persuasive arguments made by the gentleman from Missouri (Mr. HUNGATE), a distinguished lawyer, when he gave the disadvantages which would accrue to his State if this bill should become law.

I would say to the gentleman from Missouri and also to the gentleman from Washington (Mr. ADAMS) who engaged in a colloquy with him, that it is true that the figures which were cited by the gentleman from Missouri and the gentleman from Washington (Mr. ADAMS) might very well be accurate, but I would say to the gentleman from Missouri, whatever loss might accrue in revenues to the State of Missouri would be more than made up in savings to businessmen and manufacturers and consumers in his State of Missouri.

We in Georgia are surrounded by four States and the Atlantic Ocean, We were confronted once with the same arguments which I am sure have been made to the gentleman from Missouri. We have tried to work this matter out consistent with what is right and what is necessary.

The CHAIRMAN. The time of the gentleman from Georgia has again expired.

Mr. MACGREGOR. Mr. Chairman, I yield to the gentleman 1 additional minute.

Mr. HUNGATE. Mr. Chairman, will the gentleman yield?

Mr. FLYNT. I gladly yield to the gentleman from Missouri.

Mr. HUNGATE. I would inquire in what way this would be made up in sales?

Mr. FLYNT. I did not say it would be made up in "sales." I said it would be made up in "savings" to consumers and in both gross and net income to the manufacturers in the State who are engaged in interstate commerce without any substantial loss to any State.

That is true for the reason that it would clear the air of uncertainty as to what States other than the State of Missouri could do to those very people who are engaged in interstate commerce.

The people who have told me they are concerned about the need for this legislation have told me it takes additional tax counsel and additional clerical and inhouse legal and tax experts to advise them as to what they might expect not only from what other States can do but from what other States will do even if permitted to levy unreasonable and discriminatory taxes against them.

The CHAIRMAN. The time of the gentleman from Georgia has again expired.

Mr. RODINO. Mr. Chairman, I yield the gentleman 1 additional minute.

Mr. FLYNT. I believe that if the gentleman from Missouri and others who have expressed opposition to this legislation would undertake to find out the need for clarification which is necessary to avoid discriminatory and sometimes double taxation which accrues to manufacturers who engage in interstate commerce, and also to avoid additional costs to consumers who are required to buy goods coming in through interstate commerce, most of their objections could be reconciled.

Mr. HUNGATE. Mr. Chairman, will the gentleman yield further?

Mr. FLYNT. I yield again to the gentleman from Missouri.

Mr. HUNGATE. Could the gentleman tell me why the breaking point of $1 million? If it is a good bill, why is it not good for everyone?

Mr. FLYNT. I believe that question could be more properly answered by the members of the subcommittee who are the floor managers of this bill, but if I have time, I shall be glad to give my reasons why I think so.

One reason—and perhaps not the only reason but certainly a compelling reason—is to get some legislation of this kind on the books so that we can know what it will do. If it becomes necessary to extend the figure beyond $1 million or to reduce it we can do it if and when we have had the benefit of experience with this legislation which we are advocating the passage of today.

Mr. HUNGATE. I thank the gentleman for his answer and his comments.

Mr. FLYNT. Mr. Chairman, this is sound legislation, and while it may not be perfect it is a necessary step in the right direction. I urge its passage and I hope that it will receive an overwhelming majority in the House of Representatives.

Mr. MACGREGOR. Mr. Chairman, I yield 2 minutes to the gentleman from Washington (Mr. PELLY).

Mr. PELLY. Mr. Chairman, I oppose H.R. 7906 as I did last year when a similar bill was before the House, and for the same reasons.

For one thing, I should point out that, contrary to the committee report on this bill, its enactment would substantially decrease State revenues. As far as my own State of Washington, a careful study by our State officials this year indicates that this Interstate Taxation Act would reduce my State's income by $72 million per biennium. Likewise, I understand other States would be adversely affected.

I remind my colleagues that witnesses for 46 States testified on this bill in 1967, and they pointed out that this legislative approach could cost the States dearly in income, shift the burden of taxation among taxpayers, and impede their administration of their own tax laws.

The members of the Multistate Tax Commission, meeting in Houston, Tex., just this past June 20, decried the passage of H.R. 7906, again stating that it would seriously decrease State and local revenues beyond normal economic growth levels. Their feeling was that preferential immunity and exemptions inevitably must decrease actual State and local revenues.

The statement released by the Multistate Tax Commission at their Houston meeting said that even more fallacious is the allegation in the committee report that the States have imposed trade barriers on the national economy. Unprecedented prosperity and the record high gross national product levels refute the existence of such barriers.

The member States of the Multistate Tax Commission urge Congress to consider realistically the revenue impact of the proposed bill on State and local governments as well as the competitive disadvantages which the bill inflicts upon local businesses which will not be able to qualify for the prefential tax immunities which the bill would create.

Mr. Chairman, I would hope my colleagues would evaluate the effect of this bill on the revenues of their respective States. And I urge my colleagues to consider the matter and vote this bill down.

Mr. MACGREGOR. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. FISH), a member of the Committee on the Judiciary.

Mr. FISH. Mr. Chairman, as a subcommittee member and a sponsor of an identical measure, H.R. 10166, I rise in support of this bill, H.R. 7906.

I commend the gentleman from New Jersey, the distinguished chairman of the subcommittee, for his able leadership once again in steering this bill to the floor.

This is a good and necessary bill and a help to all small businesses engaged in interstate commerce, to protect them from unequal tax burdens.

I now insert in the RECORD a letter from the New York commissioner of taxation and finance to the chairman of the Committee on the Judiciary, the distinguished gentleman from New York (Mr. CELLER), dated June 20, 1969:

STATE OF NEW YORK, DEPARTMENT OF TAXATION AND FINANCE,
Albany, June 20, 1969.

* * * * *

The New York State administration agrees that interstate business should have protection from unreasonable state and local tax requirements. However, as Governor Rockefeller stated in his letter to you, dated January 13, 1967, several changes are still needed to make this bill acceptable.

Specifically, a provision is necessary in Title II for a receipts factor based on destination. Without such a provision, the economic climate of New York and other highly urban industrial states would be seriously impaired. This change would not only make the bill more equitable but would bring it more nearly into conformity with the allocation procedures now employed in almost all of the states.

A second change needed in the bill is the elimination of Section 305 which restricts the classification of interstate sales according to geographic areas of a state. Unless this change is made, the bill would virtually preclude the continuance of local taxes of the type now imposed in New York State. While business in general would undoubtedly be gald to avoid the necessity of collecting and segregating local sales taxes, the importance of local nonproperty taxes in preventing unbearable taxes on property is also well recognized. Thus, until a more satisfactory alternative is available, nothing should be done to destroy this local tax source.

A third necessary change is the elimination of the double standard for treating firms above and below one million dollars of average annual income. This distinction would create confusion and inequities for New York firms that are taxable in other states. A corporation might fall in one class in one year and in the other class the next year. With most state constitutions requiring uniformity of treatment, this arbitrary distinction represents an undesirable innovation which would result in much litigation.

In addition to the above changes in the Interstate Taxation Act, which New York has previously requested, I should call your attention to the undesirable effects that would result from enactment of H.R. 906, which the Rules Committee has recommended for consideration as an amendment to H.R. 7906.

This latter bill is not relevant to legislation regulating business taxes, since it relates to individual income taxes. Furthermore, hearings have not been held on this proposal and the states have not been given any other opportunity to present their views.

The domicile test which this proposal would establish as the sole criterion of taxation of income earned in another state would conflict with the present New York rules under which nondomiciliaries who maintain homes in New York and who spend more than 183 days here, are taxed as New York residents. This might be interpreted as preventing our taxing the New York rental income and/or various types of New York business income received by nondomiciliaries.

Superimposing a special set of domicile rules on our existing statutory resident and nonresident definitions and procedures could also require drastic changes in our statute which would have significant revenue effects. For example, it is probable that the proposed legislation would not permit us to tax income from intangibles owned by nondomiciliaries who are presently taxable as New York residents under the permanent-place-of-abode/183-day test of our statute.

Our present statute on the application of the personal income tax to nonresidents reflects almost fifty years of administrative experience in this complex area. We believe it is worth noting that the uniform definition of "resident" recommended by the Advisory Commission on Intergovernmental Relations is, with only one minor difference, derived verbatim from our statutory provision. (See Commission Report A–27 (dated October 1965) entitled "Federal-State Coordination of Personal Income Taxes—page 30).

While I believe that the subject of personal income taxes should not be included in any bill on the taxation of interstate business, I have indicated substantive objections to the present proposal for your information.

Sincerely yours,

JOSEPH H. MURPHY,
Commissioner.

Mr. MACGREGOR. Mr. Chairman, I now yield 4 minutes to the gentleman from Idaho (Mr. MCCLURE).

Mr. MCCLURE. Mr. Chairman, I, too, rise in opposition to this measure, as I did a year ago.

I want to make further reference to the report of the Multistate Tax Commission to which the gentleman from Washington (Mr. PELLY) made reference. I would like to read that to you, because I think it is revealing with regard to experts' opinions from several States who have studied this matter not from the standpoint of uniformity, necessarily, as this committee's staff has done, but from the standpoint of the impact on the States and the prerogatives which this bill invades which properly belong to the States.

STATES DECRY CREATION OF HUGE TAX LOOPHOLE, CONDEMN H.R. 7906

Contrary to the report of the House Committee on the Judiciary issued on June 2, 1969, the Interstate Taxation Act (H.R. 7906) will substantially decrease state revenues if enacted into law. This emphatic assertion was made today, June 19, 1969 by the Multistate Tax Commission at its conference in Houston.

The House Judiciary Committee Report stated that H.R. 7906 would increase rather than decrease state revenues. The report claimed that the bill would increase state revenue by:

(1) Promoting economic growth by removing alleged "trade barriers" between states; and

(2) Producing greater ease of enforcement and compliance.

Analysis of the Committee's six-year study fails to disclose any valid statistical support for these conclusions.

The member states of the Multistate Tax Commission recognize that normal economic growth will increase revenues. However, it is patent that H.R. 7906, now commonly known as the "Rodino Bill" will seriously decrease state and local revenues beyond normal economic growth levels. Preferential immunity and exemptions inevitably must decrease actual state and local revenues.

Even more fallacious is the allegation in the Committee Report that the states have imposed trade barriers on the national economy. Unprecedented prosperity and the record high gross national product levels refute the existence of such barriers.

The allegation that the proposed bill would ease compliance and thereby would increase state revenues is wrong. The member states of the Multistate Tax Commission have found that H.R. 7906 would actually have the reverse effect. The compliance costs under H.R. 7906 would be increased for multistate corporations subject to tax. This is so because the bill would result in corporate taxpayers having to make one computation in order to determine their liability under existing state law and a second computation in order to determine their tax liability when taking into account the preferential options afforded by H.R. 7906.

The true effect of the bill is not only to decrease state revenue and increase compliance and administrative costs, but also to grant many multistate firms the opportunity to exploit many state markets free of tax consequences. It would exempt these firms from paying their fair share of state and local taxes. In addition, it would cause corporations to re-arrange their business to take advantage of the exemptions and preferential treatment arbitrarily provided by the bill.

The Committee Report also lists by individual states certain percentages which it claims reflect maximum possible revenue losses. If these percentages were correct, the total revenue loss for all of the states would be approximately 12½ million dollars per year (according to the 1967 tax revenues of the various states published by the United States Bureau of the Census). In point of fact, there are several states each of which would suffer a loss much greater than 12½ million dollars if the bill were to pass; and every state would suffer a loss of revenue many times greater than that estimated by the Committee Report.

The member states of the Multistate Tax Commission urge Congress to consider realistically the revenue impact of the proposed bill on state and local governments as well as the competitive disadvantages which the bill inflicts upon local businesses which will not be able to qualify for the preferential tax immunities which the bill would create.

GEORGE KINNEAR,
Chairman.

Mr. Chairman, I have checked with my State, and they state, instead of what is said in the committee report that there would be a .01 percent of loss to the State of Idaho, that they would lose $3 million in corporate income tax revenues.

Further, that there would be 1,600 corporations now paying use and sales taxes that would escape taxation if this measure is passed.

Mr. Chairman, I believe what we are doing, instead of closing loopholes at a time when we are talking about tax reform and closing loopholes, is that we are opening a new loophole for the large corporations, one in which they will save millions of dollars, which burden will be transferred to the small businesses that the committee says are going to be aided by the bil. If there is a loss of revenue to a State it must be made up by other taxpayers. There is such a loss of revenue.

These consumers, these small businessmen who are supposed to be aided by the passage of this legislation will be picking up the burden that the large, multi-State corporations will succeed in shifting from their shoulders to the shoulders of the small taxpayers.

I support the efforts of the gentleman from Iowa (Mr. SMITH) to avoid multiple taxation of individuals and regret that he intends to attach it to this legislation. It should stand on its own. I will have to oppose the bill even though this desirable provision is added.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RODINO. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. KASTENMEIER. Mr. Chairman, I would like today to express my strongest support for a vitally needed piece of legislation, H.R. 7906. The same relevant considerations that led to last year's overwhelming nonpartisan vote in the House in favor of this measure apply now, and perhaps with greater force because still another year has passed with our Nation's commerce impeded by the lack of a rational, fair system for the taxation of interstate commerce.

As a member of the Special Subcommittee on State Taxation of Interstate Commerce, I have been shocked and disappointed to learn during the course of the long and thorough study of this matter, that it is frequently easier to market American products in foreign countries than it is for our small businesses in particular to make shipments to other States here at home. As a result of the increasing dissatisfaction over the burdensome and wasteful manner in which interstate companies are obliged to pay their State taxes, I, along with many of my concerned colleagues in this House, have introduced identical legislation to meet the clear need for remedial action.

I wish to emphasize the point that under this bill one State's gain will not necessarily mean another State's loss since it is expected that this proposal will bring about an increase in the revenues of all States. This will come about as a result of the removal of the trade barriers between the States and also because of the greater ease of compliance which will be obtained under the uniform standards established by H.R. 7906.

Mr. Chairman, if our national market is to be open to all of our citizens, and if our small business enterprises are not to be drowned in a sea of paper, the passage of this bill is imperative, I urge all of my colleagues to consider the benefits that will certainly flow from this bill and cast their votes accordingly. At a time when trade barriers between nations are still a cause of controversy and a waste of effort and resources, it is incumbent upon our own Nation to smooth the flow of commerce across our own internal boundaries and thereby stimulate greater economic benefits for producer and consumer alike.

Mr. MACGREGOR. Mr. Chairman, I yield 2 minutes to the gentleman from Iowa (Mr. SCHERLE).

Mr. SCHERLE. Mr. Chairman, the Interstate Taxation Act—H.R. 7906—now before the House, is desperately needed by the small businessmen of Iowa and of the Nation. I am pleased to give this important legislation the unqualified support it deserves.

Many small- and medium-sized businesses of southwest Iowa manufacture products which would be readily marketable in other States. These enterprises are hampered and discouraged from expanding their production and marketing in other States despite the fact that they have no employees, offices, or property in any State except Iowa. They would be subjected to an increasing maze and multiplicity of varied, confusing, and burdensome State and local tax laws and regulations in almost every State in which they would attempt to do business.

The great administrative problems which now result from any interstate operations has thwarted many firms in their aspirations of marketing their products even in immediately adjacent States. As a result of this situation, the great "American common market" is being increasingly fractionalized, with consequent economic loss to business, to the consumer, and to the Nation generally.

Since 1961, the House Special Subcommittee on State Taxation of Interstate Commerce conducted exhaustive hearings and studies on this serious situation. As a result, the House Judiciary Committee recommended enactment of H.R. 2158, the Interstate Taxation Act, in the 90th Congress. I was pleased to join with the great majority of my colleagues in passage of that legislation, and I urge the House today to pass H.R. 7906, the bill identical to H.R. 2158 as reported in the 90th Congress.

H.R. 7906 is designed to protect business, particularly small- and medium-sized businesses, from conflicting and chaotic multiple-State taxation. It provides national guidelines which allow interstate business to pay its fair share of State and local taxes, with reasonable assurance as to what its obligations are, and with confidence that it will not be subjected to multiple and unfair taxation or intolerable bookkeeping and other compliance burdens.

I generally am opposed to any legislation which diminishes power of the individual States and tends to centralize power in the Federal Government, and so carefully scrutinized the present bill. I am satisfied that H.R. 7906 is an appropriate and reasonable exercise of Federal legislative authority. It provides vitally needed protection for the basic principle to which our great economy owes so much of its success—the principle that our national market is common to all our States and open to all our citizens—yet it provides minimal Federal interference with State taxing discretion and revenue. No Federal administration or supervision would be provided under this legislation. The bill's guidelines are essentially procedural, and will permit State and local governments to pursue their tax policies with respect to interstate companies in a manner consistent with the realities of a multistate or nationwide business.

The Interstate Taxation Act provides a uniform jurisdictional rule based on the maintenance of a "business location" for imposition of corporate net income, capital stock, and sales use and gross receipt taxes with respect to the sale of tangible personal property. Net income or capital of smaller companies could be divided under an optional two-factor—property and payroll—apportionment formula.

In the sales and use tax area, the bill provides rules for locating sales for tax purposes in the State of destination, credits for prior sales or use taxes paid, exemption for household goods of new residents, uniform treatment of freight charges, accounting for local sales taxes, conclusiveness of resale and exemption certificates, and encouragement of direct payment of sales or use tax by business buyers. Out-of-State audit charges would be prohibited. A remedy would be provided for geographical discrimination by the States in the sales tax and gross receipts tax area. The bill further provides for a continuing evaluation by Congress of State progress in resolving any

problems still not solved by the present legislation.

Study of this matter has convinced me that immediate Federal legislation is necessary, in the absence of sufficient States agreeing to any multistate compact solution, if appropriate relief is to be provided American business from an intolerable situation. I believe the stimulant that enactment of H.R. 7906 will provide for expansion of production and sales by Iowa businesses will widely benefit the economy of Iowa and provide substantially increased State and local revenues in the long run, and will benefit the Nation generally. H.R. 7906 provides a reasonable and proper Federal legislative approach to a difficult problem without imposing a new set of Federal bureaucratic superstructure, and it deserves full support by this House, by our companion body, and by the administration.

Mr. MACGREGOR. Mr. Chairman, I yield such time as he may consume to the gentleman from Oregon (Mr. DELLENBACK).

Mr. DELLENBACK. Mr. Chairman, I rise today to join with the State of Oregon and other signatories to the multistate tax compact in opposition to H.R. 7906, a bill which would provide a system for the taxation of interstate commerce. This bill, in the opinion of those States which are making substantial progress in developing their own approach to interstate taxation, is unnecessary and possibly harmful.

Admittedly there has existed for a number of years a problem in this area of interstate taxation. But a growing number of States have moved to solve this problem, and they have moved on a sound basis. After careful study and extensive discussion a compact was created which any State is free to join, on either a full membership basis or an associate membership basis. This compact, known as the multistate tax compact, now has 18 full members and an additional 10 associate members. These numbers have steadily grown and will continue to grow if H.R. 7906 is defeated in this Congress.

Not only does this multistate tax compact have the point of superiority of being an agreement voluntarily arrived at and agreed to by those States which have lived with and studied this problem most carefully.

The multistate tax compact is also an approach to the basic problem which is considerably superior to H.R. 7906. The compact provides for greater uniformity, simplicity, and equity in this field of interstate taxation, without the anticipated tax losses to some States foreseen in the passage of H.R. 7906.

The multistate tax compact contains provisions which better promote uniformity in apportionment so as to avoid multiplicity or duplication of taxation. It provides a simple way for a company having a minimum amount of sales—$100,000 or less annually—to pay a flat rate on such sales without having to file a complicated return.

It gives taxpayers a forum within which to obtain a uniform determination as to apportionment problems, which would be binding on all compact states. It is so constructed that no taxpayer would pay a greater amount of taxes and no State would lose jurisdictional benefits by joining the compact.

I urge that H.R. 7906 be defeated and the individual States be truly encouraged to continue not only to push their sound and constructive solution to this particular problem of interstate taxation, but also to move forward into similar creative State-level solutions to other problems of similar importance.

Mr. MACGREGOR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I think it would be delightful if we, the members of this subcommittee, could say to the Members of the House that all 50 of our States plus the District of Columbia have come forward and have participated in a meaningful interstate compact to take care of all the problems raised over the last decade by the proliferation of sales taxes, use taxes, and income taxes. That has not been the case.

Ample time has been provided to the States to deal with this matter. Really only one alternative remains—that this House give a resounding vote of approval in a few minutes following the adoption of the amendment to be offered by the gentleman from Iowa (Mr. SMITH) to H.R. 7906.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MACGREGOR. I yield to the gentleman from Iowa.

Mr. GROSS. I thank the gentleman for yielding.

Mr. Chairman, the enactment of this legislation into law will solve a very troublesome situation in the State of Iowa.

I heartily support the measure and commend the committee for bringing it to the floor of the House.

Mr. MACGREGOR. I thank the gentleman from Iowa (Mr. GROSS) for his gracious remarks.

Mr. Chairman, I have no further requests for time and yield back the balance of my time.

Mr. RODINO. Mr. Chairman, I yield 1 minute to the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Chairman, I rise in support of this legislation.

I compliment the gentleman from New Jersey for the long and tireless hours he has devoted in bringing this legislation to the floor of the House and to say that I am proud to have been a member of the subcommittee that he has chaired.

Mr. RODINO. I thank my colleague.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RODINO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I merely will conclude by saying reference has been made to a multistate compact. I would like to inform the House that during the protracted and prolonged hearings we held, I inquired of many of the tax administrators who urged the adoption of a tax compact whether after a period of some 4 years if they were not able to bring about a multistate tax compact would they then support a measure such as this?

I did not receive an affirmative answer from any one of the State tax administrators.

The heart of the question is whether or not we are going to be able to eliminate the chaos and confusion and permit interstate commerce to flow so that companies can do business in the common market of America.

I think this bill does that and I urge its support.

Mr. Chairman, I yield back the balance of my time.

Mr. DORN. Mr. Chairman, the Interstate Taxation Act represents the fruits of nearly 10 years of study and discussion on the part of the Congress. It is time to enact this bill to regulate and foster commerce among the States by providing a system for the taxation of interstate commerce.

Some objections have been raised that this legislation might abridge States rights. Nothing could be further from the fact. This program, to bring order and equity to the taxation of interstate commerce and to relieve American business in every State of avoidable burdens and unnecessary costs, was initiated by such able legislators as the late Senator Harry Byrd of Virginia, and Francis Walter of Pennsylvania, as well as Ed Willis of Louisiana. These men were devoted to the autonomy of State and local governments.

As a Member of Congress who has consistently opposed any form of Federal encroachment on the rights and powers of the separate States, I can assure you that the present measure will, rather than abridge the powers of State governments, will strengthen the States.

The success of the American economy is owed primarily to free and expanding trade within the borders of our Nation. We were the first "common market" and every citizen has benefited in one way or another from the free flow of trade among our States, unimpeded by tax or tariff barriers.

It will preserve and enhance the benefits of a free and expanding trade to establish uniformity in State taxation rather than follow a course which would lead to one State imposing taxes on businesses domiciliary in another State.

We owe it to both the businessman and the consumer to protect interstate commerce from unnecessary burdens, all of which add to the cost of doing business and ultimately to the price that people must pay for goods and services.

We need, in particular, to insure that every small businesman in your State and in mine is able to share in the advantages of a free and expanding national market.

In my State of South Carolina this measure will mean that a local businessman can maintain all of his assets and all of his employees in South Carolina and sell the national market without the burden of taxes in which he has no business location and no political representation.

In today's highly competitive world it is vital that we relieve small business of unnecessary burdens and costs which impede his ability to compete. This legislation will accomplish that and it could

well mean the difference between failure or survival for the small manufacturer, the wholesaler, the retailer, and others engaged in interstate commerce from a base within a single State or several States.

While such businessmen may not play a large part in the vast American economy, they are of great importance to their local communities and we strengthen our States by strengthening their ability to compete in the total U.S. market; for their payrolls, their profits and their taxes are vital to the economic well-being of our States.

I am supporting this measure and I so urge my colleagues as enlightened legislation which will set uniform standards benefiting business in whatever State it may be situated and thus benefiting the State itself.

Mr. HORTON. Mr. Chairman, I rise in support of H.R. 7906 which seeks to foster commerce among the States by setting up a workable and equitable system of State taxation of interstate commerce.

It was my privilege, early in the first session of the 90th Congress, to testify before the distinguished members of the House Judiciary Subcommittee which was at that time considering the results of a study of many years on the problems of interstate businesses posed by overlapping State tax requirements and liabilities. As one who had sponsored an earlier version of this bill in the 89th Congress, I was most impressed with this subcommittee's grasp of the problems posed in this area.

The Subcommittee on State Taxation of Interstate Commerce skillfully molded testimony heard from numerous Members of Congress, from State tax commissioners, and from businessmen into a commendable bill, H.R. 2158, which this body passed last year.

The problem, simply stated, is this. The States and localities are badly in need of additional revenue. The tax-budget squeeze has grown worse at the State level in every succeeding year. Thus, the States have not hesitated to reach out with their taxing powers, to claim jurisdiction over income that is not wholly generated within a given State, or that is generated by a business located in several States.

The result of these sincere and, in some cases, necessary efforts on the part of the States to generate more revenue has been an intolerable paperwork task, and often, an inequitable tax result for the businesses operating interstate.

In many cases, businesses without access to sophisticated computer bookkeeping systems, and without legal departments well staffed with tax experts have found it impossible to determine how much tax is owed, on what income, and to which State or States.

This burden of double taxation and paperwork has fallen hardest on the shoulders of the small businessman who has interstate operations. As a member of the Select Committee on Small Business, I am particularly sensitive to the need for this legislation for these people.

This legislation provides reasonable guidelines for levying and collecting certain taxes in the realm of interstate commerce by the several States. It seeks to untangle the web of conflicting taxation that many businessmen find themselves caught in. It is worthy of our full support at this time, so that in this Congress, the Senate will have adequate time to consider this legislation before adjournment next year.

Mr. Chairman, I also want to lend my support to the well-considered amendment offered by our distinguished colleague from Iowa (Mr. SMITH) to provide similar protection from double taxation for individuals who for occupational or other reasons have residences, domiciles or abodes in more than one State.

In our increasingly mobile society, the States must recognize the difficulties their overlapping rules which determine "residency" for tax purposes cause for many families. Mr. SMITH is to be commended for taking the initiative in providing fair Federal guidelines in the area of individual income tax as well.

I trust our colleagues will join in the support of this amendment.

Mr. HANNA. Mr. Chairman, last year, the House passed H.R. 2158, sacrificing the interests of local business communities in the name of uniformity. Except for the provision as to double taxation of personal income, left out of this year's bill, H.R. 7906 is identical to 2158.

The House was wrong in passing H.R. 2158 last year. We would be wrong in passing H.R. 7906 this year.

The Special Subcommittee on State Taxation of Interstate Commerce, began hearings on this subject matter 8 years ago. The need for reform in this field of taxation was then clear. But this fact, as well as the obvious fact of the painstaking and dedicated efforts of this subcommittee, should not in and of themselves insure the passage of 7906. The bill must rise or fall depending upon its own virtues. I believe its faults are greater than its virtues.

I find at least four major faults with this bill. The first is that the "excluded corporation" provision is inadequate. A second, and potentially more serious fault is that the phrase "business location," in section 511 of this bill, is ill defined.

These two faults alone are enough to make us stop and think seriously about passing this bill—even if this bill were to achieve the objectives its authors claim it has achieved. But there are two other things wrong with this bill. First of all, the bill does not establish a uniform system of State taxation of interstate commerce—and a desire for uniformity in this field of tax law was what originated the whole process of subcommittee hearings and reports that has resulted in this piece of legislation.

And finally, there is one other flaw in this bill. It was pointed out by the gentleman from Michigan (Mr. HUTCHINSON), 2 years ago, to his fellow members of the Judiciary Committee, and I do not know why they have not followed his advice on this. The gentleman from Michigan (Mr. HUTCHINSON), told them then "Get rid of the two-factor system," the system the committee wanted to use for apportioning the income tax of interstate companies. Mr. HUTCHINSON told them "Get rid of the two-factor system, and substitute the three-factor system instead. All the States use the three-factor system." Uniformity demands that the Judiciary Committee use the three-factor system in its bill too. But we still have the two-factor system incorporated into this bill.

I would like to go over each one of these four points I have brought up in more detail to show you exactly what my objections to them are.

The first point I mentioned had to do with the "excluded corporation" clause. This provides that interstate companies with an average sales earnings of over a million dollars are susceptible to State taxation. But, in H.R. 7906, it only applies to the income tax and not the sales tax provision of the bill. It should apply to both.

Then, there is the matter of section 511 of this bill—what I shall call the business location clause. The crux of this bill lies in the way this section is applied. Chairman CELLER, in his excellent Fordham Law Review article, summed up the importance of this phrase, "business location." He described the effect of 2158 as follows:

> A company would not be subject to the jurisdiction of any state in which it does not maintain a "business location," which is defined to include: the owning or leasing of real estate, the maintenance of a localized employee, or the regular maintenance of a stock of tangible personal property for sale in the ordinary course of business.

There you have the three criteria for "business location," as explained by Mr. CELLER himself. The first and third criteria—owning or leasing of property, and maintenance of merchandise in the area—can both be evaded by some types of companies. For example, neither criterion covers any type of company which uses independent salesmen taking orders from customers within the State, and then mailing the merchandise to the customer after the sale is made.

But the second criterion—"maintenance of a localized employee"—is the weakest of all.

Section 513 of the bill defines a "localized employee." This section is so weak as to be nearly meaningless. Almost anybody doing substantial business in more than one State can avoid coverage by section 513. For example, a company doing business in both Kansas City, Mo., and Kansas City, Kans., can rotate its salesmen continuously across the border and back again, and escape paying sales or income tax to either State; 513 does not cover salesmen if they do not have their services localized in one State, or if they do not have a base of operations in one State.

The inequity of 513 is obvious. Suppose the kind of company I just mentioned, doing half its business in Missouri and half in Kansas, has 10 salesmen. If five of its salesmen worked permanently in Kansas City, Mo., and five worked permanently in Kansas City, Kans., under 7906, it would have to pay income, sales, and use tax to both States. But, now suppose the company decides to shift all its salesmen around—back and forth from one city to the other, so that each salesman spends half his time in Kansas, and

half his time in Missouri. Under 7906, the company cannot be taxed by either State. There is no real uniformity in a bill that brings about two situations like that.

Take a greeting card company operating in both Kansas City, Kans., and Kansas City, Mo. The salesmen travel to different cardshops in the area—all they carry with them are catalogs of card samples to show to the retailers. Under 7906, this company cannot be taxed by either State. It owns or leases no real property in either Kansas or Missouri. It does not maintain a stock of tangible personal property for sale in the ordinary course of business—all the salesmen carry around with them are the card catalogs, and these salsemen, traveling back and forth from Missouri to Kansas, do not have a base of operations in either State.

So this company, under 7906, would pay no income, sales, or use tax to either Missouri or Kansas. But it is doing business in both States. It depends for its livelihood upon the retailers in both States, the better the business climate is in both States, the more the company prospers. But the State governments cannot touch it, and I believe that is inequitable.

A great jurist, Chief Justice Stone in one of the landmark Supreme Court cases of our time, said a quarter of a century ago:

> To the extent that a corporation exercises the privilege of conducting activities within a state, it enjoys the benefits and protection of the laws of that state. The exercise of that privilege may give rise to obligations.

Stone said that imposing a tax on the corporation was such a justifiable obligation. H.R. 7906 clearly goes against the spirit of what he said.

I am not arguing that no reform is needed. Mr. CELLER points out in his law review article that some companies, with relatively small annual earnings operate in what he called "a truly national market" and, by so doing expose themselves to a multitude of State taxes. No one is denying that it is unfair to require such companies to meet all the requirements imposed upon them. Such diversity is inequitable.

But the Federal legislation itself does not establish as great a degree of uniformity upon State taxation of interstate companies as do the recent cooperative efforts of the States themselves. Working through the multi-State tax compact, and the Uniform Division of Income for Tax Purposes Act, the States have developed a program that establishes a more uniform system, and is broader in scope, than is H.R. 7906.

So we are faced now with a far different situation than our distinguished former colleague, Mr. Willis, was faced with when his subcommittee began studying this situation back in 1961. We all gratefully acknowledge the tremendous achievement of the Special Subcommittee of State Taxation of Interstate Commerce. It has worked long hours. It has compiled a brilliant four-volume work that is a masterpiece in its field. It has brought to the attention of all of us, the need for reform in this specialized area of tax law. The work it has done is of inestimable value.

But the greatest contribution of this subcommittee has not come from any proposed Federal legislation resulting from its efforts. Its contribution has come from the fact that the issuance of this report in itself provided the needed impetus for the States to go ahead and establish reforms on their own. The State reforms are more than adequate. Some students in the field believe that the State standards, particularly in regard to the three-factor formula for determining corporate income tax, are technically better than the Federal standards.

I should now like to draw your attention to the basic reason why I feel the State standard is preferable to the Federal standard. It is the same thing Mr. HUTCHINSON was talking about 2 years ago. H.R. 7906 uses a two-factor formula to determine the amount of income tax to be collected on those interstate companies that do have a business location within the State. The Uniform Division of Income for Tax Purposes Act, adopted by 18 States, includes the more comprehensive three-factor formula. This formula considers property, payroll, and receipts. It is used individually by all the States. Thus, the States adopting the Uniform Division Act for interstate corporation taxation, have achieved uniformity with the individual State corporation tax systems, with the adoption of H.R. 7906, such uniformity would be destroyed.

The rationale of the Special Subcommittee on State Taxation of Interstate Commerce, in originally recommending the two-factor system was that this would result in easier administration of the tax laws. But many people feel the two-factor system is inequitable. Mr. HUTCHINSON, during Judiciary Committee hearings in the 89th Congress, proposed that the two-factor system be eliminated from any proposed legislation, and persuaded half of the committee to go along with him.

The difference between using a two- or a three-factor system can have sizable consequences. For example, the difference between corporate income taxes collected by the District of Columbia, using the two-factor system instead of the three-factor system, would be over 20 percent. New York State would lose $13 million in corporate tax revenues, if the two-factor system was used instead of the three-factor system. These figures come from the special subcommittee report itself. It appears that any State with large consumer interests will be adversely affected by H.R. 7906's use of the two-factor system. Both urban and rural States will be hurt by the two-factor system. For example, the difference to Montana between using the two- and three-factor system for collection of corporate income taxes would be 47 percent.

Why, then, did the Judiciary Committee adopt the two-factor formula? Why did it disregard the warning of Congressman HUTCHINSON, who stated, ". . . it was made abundantly clear the two-factor formula would have had drastic effects in shifting tax burdens. It would have had a violent effect on the tax base of many of the States and would also have created radical shifts in the liabilities of large numbers of companies."

The two-factor system was so obviously inequitable that the Judiciary Committee made it optional. Mr. HUTCHINSON stated that this was not enough. I agree. The two-factor system will damage States with large proportions of consumers. Former Governor Sawyer of Nevada, representing the Western States' Governors' Conference, asked for its deletion. Governor Sawyer, speaking during hearings on a predecessor to H.R. 2158 and H.R. 7906, said:

> Enactment of H.R. 11798 or similar legislation would have a profound impact on the revenues, revenue structures, and hence the economy of each of the several States represented in the Western States' Governors Conference.

So we see there are two basic deficiencies in the two-factor system. First, as Governor Sawyer, and the Special Subcommittee Report, pointed out, it cuts into State corporate income tax revenues. And second, it encourages diversity, instead of uniformity, of methods of corporate taxation. If a company is taxable by a State, it is subject to the three-factor system which all the States use. But if the same company does business in another State, but does not have a business location there, the two-factor system may then apply to it. Thus, with 7906 in effect, there is no uniformity. A company may have to pay two types of corporate income tax—one, under the State three-factor system; the other, under the Federal optional two-factor system. Without 7906, the three-factor formula is applied across-the-board by all the States. With 7906, the uniformity as to formula is destroyed. The Uniform Division Act, on the other hand, maintained this uniformity by adopting the three-factor system.

Having gone over what I consider to be the four major faults of the bill, we now come to the question, should this bill, even with its deficiencies, still be passed by the House? In deciding this question, we must remember that the issue of reform in the area of State taxation of interstate commerce, has already been preempted by the States themselves.

The real issue before us today is not reform of the tax laws. The real question is—now that significant State action has been taken, should Congress still proceed to pass its own law on the subject? The argument of those in favor of 7906 is, "yes—for the sake of uniformity." But we have seen that application of 7906's two-factor system will result in diversity, not uniformity.

Mr. Willis, in arguing last year for the passage of H.R. 2158, said:

> There are still a few diehard tax collectors against this bill. But who is for it? Business is for it.

California businessmen are not for it. The California Chamber of Commerce has taken a strong stand against H.R. 7906. The California manufacturers' association voted unanimously to oppose it, and I cannot believe that there are not businessmen in other States who feel the same way about this bill.

What does this bill give us then? Behind a facade of uniformity in application of tax laws, it works to the detri-

ment of local businessmen everywhere. It deprives State governments of needed revenue. Business leaders in California have studied the bill, and are against it. The executive department of the State has studied the bill, and is against it. But we were told last year, that the only people opposing this legislation were a few "diehard tax collectors."

I have saved what I consider to be the most serious objection to this bill for last. How will 7906 affect State collection of revenues? What impact will 7906 have in a period of our history when we are asking States to carry more and more of the burden of providing needed governmental services? How will 7906 affect the revenues available to the States for this purpose?

I have looked over the report issued by the Judiciary Committee, accompanying H.R. 7906. A list printed in the back of this report shows that the States would not suffer a revenue loss by passage of this bill. For example, the report tells us that the loss of corporate income tax in California, would be "insignificant." The loss of revenue to California from sales and use taxes is listed as only .07 of 1 percent. That is some $4 million right there. And that is not even considering the argument of tax authorities in California that the Judiciary Committee estimate of tax revenue loss is only one-fourth of the probable figure. So the loss of revenue, for this one State alone, will run anywhere from $4 to $16 million.

But, for the sake of argument, let us take the Judiciary Committee's low estimate of $4 million loss of tax revenue. The Judiciary Committee considers that $4 million is insignificant. I am not aware of any State government that would look upon the loss of $4 million of tax revenue as insignificant.

I can think of many ways that a State could put the sum of $4 million to good use. It could be used to finance a new project for educationally handicapped children. Local communities could use their portion of the revenues obtained from sales and use taxes, to increase pension benefits of firemen and policemen.

I do not depreciate the immense contributions of Chairman CELLER, of the past and present subchairmen of the Special Subcommittee on State Taxation of Interstate Commerce, Mr. Willis and my distinguished colleague, Mr. RODINO, or of the late chairman of the Senate Finance Committee, Senator Byrd, all of whom took a part in the process that has led to the introduction of this bill. I believe that their goals have already been largely realized through the development of State-initiated tax reforms in the field of interstate corporation taxation. We ought now to give the States the opportunity to finish the job they have undertaken—before we endeavor to step in and finish the job for them.

Mr. SCHWENGEL. Mr. Chairman, I join today in urging support for H.R. 7906, the Interstate Taxation Act. Having served in the Iowa Legislature for 10 years and now here in the Congress for 13 years, I am well aware of the problems business has encountered in the interstate tax area.

The tax laws of the respective States are voluminous. It is almost impossible for relatively small businessmen operating across State lines to do just the paperwork required by the various State laws.

As one who believes strongly in the importance of what I call the fifth great freedom, the freedom of movement, of men and goods, I feel this legislation is important and should be passed.

The bill before us was not hastily drawn, but came after years of study. It gives Congress the opportunity to provide uniform standards to be observed by the States in levying taxes on income derived from within the State from the conduct of business activity which is exclusively interstate in nature. The situation todays works a real hardship.

At the present time the average businessman is faced with a costly and bewildering maze of different laws and regulations in each State in which he does business. At present the various State tax laws covering interstate commerce are so diverse and so complex as to create widespread inequities. This complexity leads to confusion for auditors and administrators as well as taxpayers.

The defects are not limited to a particular form of tax or to particular States. Jurisdictional statements are often unclear, and guidelines for determining the amount of the tax due are vague or ambiguous. Inevitable byproducts are the widespread rejection of all tax obligations in States where companies have no business locations and inaccuracy in tax computations where reporting does occur.

This bill, H.R. 7906, will do a great deal to rectify a bad and unfair situation. Businessmen throughout the Nation will welcome a general solution which substitutes order and realism for the presently existing uncertainty and confusion. It will provide the certainty, uniformity, evenhandedness, and simplicity which businessmen everywhere need. Interstate companies will be relieved of the red tape and uncertainties now incident to their tax payments, and will be assured that their competitors are paying their fair share. At the same time administration will be greatly aided by adoption of a set of rules that will assure a far higher level of compliance than now exists. It will enable every businessman, wherever he may have his home base of operations, to determine without difficulty the tax liability he will incur in each State in which he sells his wares.

Companies doing interstate business will be relieved of the likelihood of overtaxation. Uniform rules for the assignment of the tax base will protect the seller in interstate commerce from multiple taxation.

Most small businesses will have the decided advantage of having the prospect of having to pay business taxes only in the single State where they have an actual business location, even though their sales may be made in other States. In the case where small businesses do have business locations in one or more other States, the uniform and simplified report requirements called for in this bill will make possible far more accurate compliance with the taxes of those States from records which are easily maintained.

As an aid to a better understanding let us look at how various kinds of businesses and businessmen would be more specifically affected by H.R. 7906. Manufacturers would have most of their tax liability limited to their own home State. Wherever feasible, the out-of-State manufacturer would be relieved of liability to collect a tax on sales of wholesalers or other middlemen. The interstate wholesaler who has an office and a warehouse in one State and supplies customers in adjoining States will be relieved of income and capital stock taxes levied by States other than his home State. Similarly as to retail sales taxes, business making all sales at wholesale will generally be freed of all out-of-State liability if they obtain registration numbers from their customers. Finally, the retailer with stores in a number of States will find his compliance work significantly simplified. Mail-order retailers will not be required to collect taxes outside their "home State."

Let me assure those who fear that their own States might be in danger of losing revenues by this measure that available evidence does not bear out any justification for this fear. No tax is recommended for imposition or repeal. No change in any State tax rate is required. No businesses have been freed from State taxation. No businesses would be exposed to harmful tax-free competition from outside the State. And, perhaps most significant of all, the loss in revenue theoretically available from out-of-State companies will in almost all cases approximately be offset by a gain in revenue from companies located in the taxing State. The measure will work a change in taxpayers among the States, but the net effect of this exchange of revenue will be small.

Thus the simplification and more orderly collection procedures for taxation of interstate commerce will be, in the first instance, of great benefit to small businesses everywhere, but will also represent a great step forward in more equitable and more efficient collection of State and local taxes.

The arguments here presented along with the testimony and the excellent debate so far on the House floor dictates the immediate passage of this legislation and so I urge its favorable consideration by every Member of the House.

Mr. CORMAN. Mr. Chairman, I was pleased that the House last year took favorable action on the Interstate Taxation Act, and regretted that there was not sufficient time after House action to permit the Senate to consider the measure so that final enactment could have resulted.

As a former member of the special subcommittee of the Judiciary Committee that wrote this legislation in the past two Congresses, and having introduced the bill again during this Congress, I strongly urge my colleagues to approve the measure today so that it can go to the Senate in ample time to be considered this year.

The genesis of this legislation was the Supreme Court ruling in a series of 1959 cases dealing with State powers to tax

interstate commerce. The Court ruled that a State could tax that portion of an out-of-State company's income earned within its borders.

The first legislation in 1959 that concerned itself with the complexities of State taxation of interstate commerce was Public Law 272, in the 86th Congress, which only provided relief to the businessman under a very special condition, but also authorized a thorough study of the entire matter. From that time, until today's debate, the House Judiciary Committee has made comprehensive studies of the subject, introduced measures, held extensive hearings, amended and reported a number of bills—and today, I believe, we have before us the best result that all previous deliberations could produce.

Mr. Chairman, I shall not go into the technical aspects of the bill, but I would like to remind the House that for quite a number of years the conduct of the Nation's business has been seriously hampered because of the multiplicity of varied State and local tax laws. The vast proliferation of State taxation programs has caused tremendous difficulties in conducting interstate business, particularly in what we term small businesses.

Our modern society has placed increasing demands on State and local governments, and taxes on the State and local levels have had to be increased to meet the demands for new revenue. New tax programs have been established, and this has led to the present difficult situation, to which this legislation responds.

The problem in collecting and reporting taxes on sales in each State in which business is carried on has become an insurmountable one to the businessman. The burden of compliance often exceeds the amount of the tax that must be paid.

The provisions of the legislation will set guidelines to allow interstate business to pay its own share of State and local taxes, while assuring the businessman that he is not being taxed unfairly and that the cost to him of complicated bookkeeping and compliance with conflicting taxing procedures will no longer be a burden to him.

Enactment of the legislation will ease this burden for the businessman within a very short time,, and it is imperative that he be given this sorely needed relief.

The committee's study also has revealed another positive result if the legislation is enacted. In the long run, the proposal will reflect itself in an overall increase in States' revenue—for two reasons: first, economic growth would be stimulated by the removal of trade barriers; second, it would be easier to enforce and gain compliance with tax laws.

Mr. Chairman, the committee report on the 90th Congress legislation stated:

> Students of America's history have been unanimous in reminding us that our economy, which is the wonder and envy of the world, owes its success largely to one of our oldest and most cherished principles—the principle that our national market is common to all of our States and open to all of our citizens.

The bill before the House today reaffirms this principle and its provisions will preserve it.

I urge the House to give the Interstate Taxation Act its complete support again this year, as it did last year, and to again vote favorably on this much-needed legislation.

Mr. SKUBITZ. Mr. Chairman, I have received a wire signed by the members of The Kansas Joint Legislative Committee on Taxes urging me to vote against this bill.

Now, the committee report indicates that the loss of taxes to Kansas would be minimal. In fact, the committee staff tells me that the loss on corporate income tax would be less than .02 percent. That the loss of sales tax would be less than .80 percent. Dollarwise, I am told it would amount to less than $200,000. This is far out of line with the State estimate of $15,000,000.

This afternoon, I called State department of revenue. I was told that the immediate loss would be $7,000,000 and the potential loss could reach $15,000,000. I was also told that one corporation doing business in Kansas could under the provisions of this act escape payment of $257,000 in taxes. Because of the confusion that exists, I shall vote against this measure.

Mr. PHILBIN. Mr. Chairman, this bill, H.R. 7906, which is designed to prohibit the double taxation of personal income, was passed by the House last May by a vote of 284 to 89.

However, the bill was not reached during the session by the other body and did not pass, hence it is before us once again for our second consideration.

In the broad sense, the purpose of the bill is to preserve, reaffirm, and revitalize the basic principle of free competition provided by the commerce clause of the Constitution to insure free access to every market in the Nation by every farmer and craftsman, and others who are in business.

The basic concept of this principle is that the individual States would not impose customs, duties, or regulations which would exclude the free and ready flow of traffic from one State to another in all parts of the Union.

With the growth of the country, and particularly with the new tax techniques adopted by the several States, some serious problems have developed which could threaten the freedom of commerce that we have always enjoyed in this country. This bill aims to lay down procedural guidelines on permitting State and local governments to pursue their tax policies with respect to interstate companies in a manner consistent with the realities of a multistate or nationwide business.

The fears of those who may see in this measure some uncalled-for interference with the free flow of trade business are unfounded, and I believe that the bill will work out favorably and clarify the question as to what is interstate commerce and what is strictly intrastate commerce.

Obviously, it is important to protect legitimate American businesses which are being subjected to increasing kinds of diverse, conflicting, and overlapping tax laws and regulatory practices which are often beyond their capabilities to handle, and are, moreover, in the nature of harassment and discrimination.

Various tax administrators and some members of the business community have furnished valuable information to the House committee, and their suggestions were embodied in amendments which were approved by the committee during the 90th Congress.

Thus, the definition of business location requires proof of regular maintenance of a stock of tangible personal property in the State for sale in the ordinary course of business.

There is also provision for tax incentives to attract industry into a State, and to implement water or air pollution abatement.

I do not believe that the doubts and fears expressed by some of the opponents of the bill are tenable. I am of the opinion that this bill will be a proper, effective vehicle to clarify existing laws governing interstate commerce, and to furnish helpful guidelines for business, large and small, and ordinary citizens to follow, when they are engaged in interstate business.

I commend the able committee for its hard work and its good judgment in bringing this bill before the House. I believe it will be approved by a large vote, as I think it deserves to be, because it will bring the light of reason, law, and clarification in some areas where they are urgently needed.

Mr. BUCHANAN. Mr. Chairman, I am testifying for the second time on behalf of the Interstate Taxation Act, which although approved by the House last year failed of passage in the Senate. My strong support for this measure comes from a conviction that the present chaotic system of a multiplicity of tax laws administered by the 50 States and thousands of local jurisdictions, imposes a serious impediment to the free flow of commerce among all the States. This free flow of interstate commerce is essential to our Nation's continued economic progress but is, in my judgment, greatly dependent upon some sort of national guidelines which would allow interstate businesses to pay a fair share of State and local taxes without being subjected to multiple and unfair taxation or unreasonable compliance burdens.

H.R. 7906 would provide these much-needed guidelines, as well as a degree of assurance for interstate businesses as to what their legal obligations are. I think it should be noted that this legislation is the result of over 6 years of comprehensive study of interstate tax problems by the Subcommittee on State Taxation of Interstate Commerce. The Congress provided the mandate for this study with the passage of Public Law 86–272. The core of that study is found in title I of H.R. 7906, which establishes uniform jurisdictional standards for each of the four types of taxes covered by the bill: corporate net income taxes, capital stock taxes, sales and use taxes, and gross receipt taxes. Basically, these standards prohibits a company from being subject to the jurisdiction of any State in which it does not maintain a "business location"; that is, the owning or leasing of real estate, having one or more employees located in the State, or regularly maintaining a stock of tangible

personal property for sale in the ordinary course of business.

I strongly request, therefore, that the House pass this meritorious legislation. At the same time, however, I would like to state my strong conviction that H.R. 7906 does not go far enough in that the transportation industry in general and the moving industry in particular—as represented by the irregular common carriers—are not covered under the bill with respect to ad valorem taxes imposed by some of the States. A clear need has, in my judgment, been established for the inclusion of this industry under the provisions of the Interstate Taxation Act.

The very nature of an interstate household mover's business is to make itself available to move anyone anywhere at anytime. The mover's service is a call-and-demand service, on irregular routes and over extensive distances. It is, furthermore, a business subject to wide fluctuations in volume during the various months of the year. It is estimated that some 12 million families are being moved yearly by this industry, with 60 to 70 percent of such moves occurring during the summer months.

In order to provide their essential service, movers must take great risks and are necessarily subject to a multiplicity of State and local tax requirements. The mover's inability to know at any time the extent of his tax liability is a great burden to him individually and to the industry collectively. In the vast and intricate body of State tax laws, changes are always in process. As a result, the mover can never know from day to day what the latest requirements may be of all the taxing jurisdictions.

One of my constituents was assessed by a neighboring State for more than $2,000 in ad valorem taxes within a year. Yet, this mover had no terminal or property within the particular State. He was, in effect, a victim of double taxation since he was already paying ad valorem taxes in Alabama. Since he was not a resident of the other State and owned no tangible or intangible property there, he was a victim of taxation without representation.

My constituent, as well as countless others like him, has had vehicles and shipments detained drivers arrested and fined, although there was no intention to violate the law—only human inability to keep up with the law. The very complexity of the system invites harassment and abuse. Audits made years after a particular tax year may result in large penalties as the outgrowth of a good-faith dispute over uncertain procedures of one of a multitude of taxing bodies.

It is my sincere opinion that movers are not trying to escape taxation. There is simply a clear need for a rational system of taxation which will prevent double and multiple taxation currently experienced by many interstate movers. Without such rules, the inequities, the uncertainties, and the complexities which now exist will continue to multiply with the result that the net revenue from these taxes will decrease, while the cost of compliance increases.

Because, in my judgment, relief for the interstate movers is clearly in order if the future of such an important industry is to be made secure, I have already conveyed the above sentiments to the disguished sponsor of H.R. 7906, Hon. PETER RODINO, who is also Chairman of the Judiciary Committee's Special Subcommittee on State Taxation of Interstate Commerce. I am certainly pleased that his response indicates both an awareness of the need for a solution to this problem and an intention to consider it pursuant to title IV of H.R. 7906. It is certainly my hope that relief will be granted to interstate movers and I invite the Senate in its consideration of H.R. 7906 to consider the abuse of this important segment of our economy.

At this point I include in the RECORD a copy of Mr. RODINO's letter on this subject:

HOUSE OF REPRESENTATIVES,
Washington, D.C., June 20, 1969.

Hon. JOHN BUCHANAN,
House of Representatives,
Washington, D.C.

DEAR JOHN: I have your letter of June 18, 1969, concerning my bill, H.R. 7906, the proposed Interstate Taxation Act.

I share your view that the complex problems currently faced by the household moving industry require some equitable and reasonable solution.

Although corporations engaged in the moving of household goods are treated as excluded corporations under H.R. 7906, the need for relief of this industry is, in my opinion, already clear. As a result, it would seem to me that the problems faced by the moving industry ought to eventually be given consideration under Title IV of my bill, which provides for continued Congressional oversight over those problems left unresolved by the other titles of the bill.

With respect to this matter, the Committee report which accompanied H.R. 7906 states specifically on page 4 that during the course of the study conducted by our subcommittee, "data was accumulated that led the subcommittee to conclude that 'in some excluded areas the need for uniform rules is already clear' (report, p. 1164), and during the course of the hearings testimony confirmed this conclusion at least with respect to the household moving industry and also substantiated the need for further evaluation by Congress of the progress being made by the States in those problem areas not covered by the bill."

I very much appreciate the warm support that you have given to my proposal and want to assure you that I shall continue to exert every effort to bring about the prompt enactment of this sorely needed measure.

Sincerely,

PETER W. RODINO, Jr.,
Chairman, Special Subcommittee on State Taxation of Interstate Commerce.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Interstate Taxation Act."

TABLE OF CONTENTS

TITLE I. JURISDICTION TO TAX

Sec. 101. Uniform jurisdictional standard.

TITLE II. MAXIMUM PERCENTAGE OF INCOME OR CAPITAL ATTRIBUTABLE TO TAXING JURISDICTION

Sec. 201. Optional two-factor formula.
Sec. 202. Property factor.
Sec. 203. Payroll factor.
Sec. 204. Zero denominators.
Sec. 205. Capital account taxes on domestic corporations.
Sec. 206. Local taxes.

TITLE III. SALES AND USE TAXES

Sec. 301. Reduction of multiple taxation.
Sec. 302. Exemption for household goods, including motor vehicles, in the case of persons who establish residence.
Sec. 303. Treatment of freight charges with respect to interstate sales.
Sec. 304. Liability of sellers on sales to business buyers.
Sec. 305. Local sales taxes.

TITLE IV. EVALUATION OF STATE PROGRESS

Sec. 401. Congressional committees.

TITLE V. DEFINITIONS AND MISCELLANEOUS PROVISIONS

PART A. Definitions.
Sec. 501. Net income tax.
Sec. 502. Capital stock tax; capital account tax.
Sec. 503. Sales tax.
Sec. 504. Use tax.
Sec. 505. Gross receipts tax.
Sec. 506. Excluded corporation.
Sec. 507. Sale; sales price.
Sec. 508. Interstate sale.
Sec. 509. Origin.
Sec. 510. Destination.
Sec. 511. Business location.
Sec. 512. Location of property.
Sec. 513. Location of employee.
Sec. 514. Household deliveries.
Sec. 515. State.
Sec. 516. State law.
Sec. 517. Taxable year.
Sec. 518. Valuation date.

PART B. Miscellaneous Provisions.
Sec. 521. Permissible franchise taxes.
Sec. 522. Prohibition against geographical discrimination.
Sec. 523. Applicability of Act.
Sec. 524. Prohibition against out-of-State audit charges.
Sec. 525. Liability with respect to unassessed taxes.
Sec. 526. Effective dates.

TITLE I—JURISDICTION TO TAX

SEC. 101. UNIFORM JURISDICTIONAL STANDARD.

No State or political subdivision thereof shall have power—

(1) to impose a net income tax or capital stock tax on a corporation other than an excluded corporation unless the corporation has a business location in the State during the taxable year;

(2) to require a person to collect a sales or use tax with respect to a sale of tangible personal property unless the person has a business location in the State or regularly makes household deliveries in the State; or

(3) to impose a gross receipts tax with respect to a sale of tangible personal property unless the seller has a business location in the State.

A State or political subdivision shall have power to impose a corporate net income tax or capital stock tax, or a gross receipts tax with respect to a sale of tangible personal property, or to require seller collection of a sales or use tax with respect to a sale of tangible personal property, if it is not denied power to do so under the preceding sentence.

TITLE II—MAXIMUM PERCENTAGE OF INCOME OR CAPITAL ATTRIBUTABLE TO TAXING JURISDICTION

SEC. 201. OPTIONAL TWO-FACTOR FORMULA.

A State or a political subdivision thereof may not impose on a corporation with a business location in more than one State, other than an excluded corporation, a net income tax (or capital stock tax) measured by an amount of net income (or capital) in excess of the amount determined by multiplying the corporation's base by an apportionment frac-

tion which is the average of the corporation's property factor and the corporation's payroll factor for the State for the taxable year. For this purpose the base to which the apportionment fraction is applied shall be the corporation's entire taxable income as determined under State law for that taxable year (or its entire capital as determined under State law for the valuation date at or after the close of that taxable year).

SEC. 202. PROPERTY FACTOR.

(a) IN GENERAL.—A corporation's property factor for any State is a fraction, the numerator of which is the average value of the corporation's property located in that State and the denominator of which is the average value of all of the corporation's property located in any State.

(b) PROPERTY INCLUDED.—The corporation's property factor shall include all the real and tangible personal property which is owned by or leased to the corporation during the taxable year, except —

(1) property which has been permanently retired from use, and

(2) tangible personal property rented out by the corporation to another person for a term of one year or more.

(c) EXCLUSION OF PERSONALITY FROM DENOMINATOR.—The denominator of the corporation's property factor for all States and political subdivisions shall not include the value of any property located in a State in which the corporation has no business location.

(d) STANDARDS FOR VALUING PROPERTY IN PROPERTY FACTOR.—

(1) OWNED PROPERTY.—Property owned by the corporation shall be valued at its original cost.

(2) LEASED PROPERTY.—Property leased to the corporation shall be valued at eight times the gross rents payable by the corporation during the taxable year without any deduction for amounts received by the corporation from subrentals.

(e) AVERAGING OF PROPERTY VALUES.—The average value of the corporation's property shall be determined by averaging values at the beginning and ending of the taxable year; except that values shall be averaged on a semi-annual, quarterly, or monthly basis if reasonably required to reflect properly the location of the corporation's property during the taxable year.

SEC. 203. PAYROLL FACTOR.

(a) IN GENERAL.—A corporation's payroll factor for any State is a fraction, the numerator of which is the amount of wages paid by the corporation to employees located in that State and the denominator of which is the total amount of wages paid by the corporation to all employees located in any State.

(b) PAYROLL INCLUDED.—The corporation's payroll factor shall include all wages paid by the corporation during the taxable year to its employees, except that there shall be excluded from the factor any amount of wages paid to a retired employee.

(c) EMPLOYEES NOT LOCATED IN ANY STATE.—If an employee is not located in any State, the wages paid to that employee shall not be included in either the numerator or the denominator of the corporation's payroll factor for any State or political subdivision.

(d) DEFINITION OF WAGES.—The term "wages" means wages as defined for purposes of Federal income tax withholding in section 3401(a) of the Internal Revenue Code of 1954, but without regard to paragraph (2) thereof.

SEC. 204. ZERO DENOMINATORS.

If the denominator of either the property factor or the payroll factor is zero, then the other factor shall be used as the apportionment fraction for each State and political subdivision. If the denominators of both the property factor and the payroll factor are zero, then the apportionment fraction for the State where the corporation has its business location shall be 100 percent.

SEC. 205. CAPITAL ACCOUNT TAXES ON DOMESTIC CORPORATIONS.

The State in which a corporation is incorporated may impose a capital account tax on that corporation without division of capital, notwithstanding the jurisdictional standard and limitation on attribution otherwise imposed by this Act.

SEC. 206. LOCAL TAXES.

The maximum percentage of net income (or capital) of a corporation attributable to a political subdivision for tax purposes shall be determined under this title in the same manner as though the political subdivision were a State; except that the denominators of the corporation's property factor and payroll factor shall be the denominators applicable to all States and political subdivisions. For this purpose the numerators of the corporation's property factor and payroll factor shall be determined by treating every reference to location in a State, except the references in sections 202(c) and 203(c), as a reference to location in the political subdivision.

TITLE III—SALES AND USE TAXES

SEC. 301. REDUCTION OF MULTIPLE TAXATION.

(a) LOCATION OF SALES.—A State or political subdivision thereof may impose a sales tax or require a seller to collect a sales or use tax with respect to an interstate sale of tangible personal property only if the destination of the sale is—

(1) in that State, or

(2) in a State or political subdivision for which the tax is required to be collected.

(b) IMPOSITION OF USE TAX.—A State or political subdivision thereof may not impose a use tax with respect to tangible personal property of a person without a business location in the State or an individual without a dwelling place in the State; but nothing in this subsection shall effect the power of a State or political subdivision to impose a use tax if the destination of the sale is in the State and the seller has a business location in the State or regularly makes household deliveries in the State.

(c) CREDIT FOR PRIOR TAXES.—The amount of any use tax imposed with respect to tangible personal property shall be reduced by the amount of any sales or use tax previously paid by the taxpayer with respect to the property on account of liability to another State or political subdivision thereof.

(d) REFUND.—A person who pays a use tax imposed with respect to tangible personal property shall be entitled to a refund from the State or political subdivision thereof imposing the tax, up to the amount of the tax so paid, for any sales or use tax subsequently paid to the seller with respect to the property on account of liability to another State or political subdivision thereof.

(e) MOTOR VEHICLES AND MOTOR FUELS.—

(1) VEHICLES.—Nothing in subsection (a) or (b) shall affect the power of a State or political subdivision thereof to impose or require the collection of a sales or use tax with respect to motor vehicles that are registered in the State.

(2) FUELS.—Nothing in this section shall affect the power of a State or political subdivision thereof to impose or require the collection of a sales or use tax with respect to motor fuels consumed in the State.

SEC. 302. EXEMPTION FOR HOUSEHOLD GOODS, INCLUDING MOTOR VEHICLES IN THE CASE OF PERSONS WHO ESTABLISH RESIDENCE.

No State or political subdivision thereof may impose a sales tax, use tax, or other nonrecurring tax measured by cost or value with respect to household goods, including motor vehicles, brought into the State by a person who establishes residence in that State if the goods were acquired by that person thirty days or more before he establishes such residence.

SEC. 303. TREATMENT OF FREIGHT CHARGES WITH RESPECT TO INTERSTATE SALES.

Where the freight charges or other charges for transporting tangible personal property to the purchaser incidental to an interstate sale are not included in the price but are separately stated by the seller, no State or political subdivision may include such charges in the measure of a sales or use tax imposed with respect to the sale or use of the property.

SEC. 304. LIABILITY OF SELLERS ON SALES TO BUSINESS BUYERS.

No seller shall be liable for the collection or payment of a sales or use tax with respect to an interstate sale of tangible personal property if the purchaser of such property furnishes or has furnished to the seller—

(1) a registration number or other form of identification indicating that the purchaser is registered with the jurisdiction imposing the tax to collect or pay a sales or use tax imposed by that jurisdiction, or

(2) a certificate or other written form of evidence indicating the basis for exemption or the reason the seller is not required to pay or collect the tax.

SEC. 305. LOCAL SALES TAXES.

No seller shall be required by a State or political subdivision thereof to classify interstate sales for sales tax accounting purposes according to geographic areas of the State in any manner other than to account for interstate sales with destinations in political subdivisions in which the seller has a business location or regularly makes household deliveries. Where in all geographic areas of a State sales taxes are imposed at the same rate on the same transactions, are administered by the State, and are otherwise applied uniformly so that a seller is not required to classify interstate sales according to geographic areas of the State in any manner whatsoever, such sales taxes whether imposed by the State or by political subdivisions shall be treated as State taxes for purposes of this Act.

TITLE IV—EVALUATION OF STATE PROGRESS

SEC. 401. CONGRESSIONAL COMMITTEES.

The Committee on the Judiciary of the House of Representatives and the Committee on Finance of the United States Senate, acting separately or jointly, or both, or any duly authorized subcommittees thereof, shall for four years following the enactment of this Act evaluate the progress which the several States and their political subdivisions are making in resolving the problems arising from State taxation of interstate commerce and if, after four years from the enactment of this Act, the States and their political subdivisions have not made substantial progress in resolving any such problem, shall propose such measures as are determined to be in the national interest.

TITLE V—DEFINITIONS AND MISCELLANEOUS PROVISIONS

PART A—DEFINITIONS

SEC. 501. NET INCOME TAX.

A "net income tax" is a tax which is imposed on or measured by net income, including any tax which is imposed on or measured by an amount arrived at by deducting from gross income expenses one or more forms of which are not specifically and directly related to particular transactions.

SEC. 502. CAPITAL STOCK TAX; CAPITAL ACCOUNT TAX.

(a) CAPITAL STOCK TAX.—A "capital stock tax" is any tax measured in any way by the capital of a corporation considered in its entirety.

(b) CAPITAL ACCOUNT TAX.—A "capital ac-

count tax" is any capital stock tax measured by number of shares, par or nominal values of shares, paid-in capital, or the like, not including any tax the measure of which includes any element of earned surplus.

A "sales tax" is any tax imposed with respect to retail sales, and measured by the sales price of goods or services sold, which is required by State law to be stated separately from the sales price by the seller, or which is customarily stated separately from the sales price.

SEC. 504. USE TAX.

A "use tax" is any nonrecurring tax, other than a sales tax, which is imposed on or with respect to the exercise or enjoyment of any right or power over tangible personal property incident to the ownership of that property or the leasing of that property from another, including any consumption, keeping, retention, or other use of tangible personal property.

SEC. 505. GROSS RECEIPTS TAX.

A "gross receipts tax" is any tax, other than a sales tax, which is imposed on or measured by the gross volume of business, in terms of gross receipts or in other terms, and in the determination of which no deduction is allowed which would constitute the tax a net income tax.

SEC. 506. EXCLUDED CORPORATION.

(a) IN GENERAL.—An "excluded corporation" is any corporation—

(1) more than 50 percent of the ordinary gross income of which for the taxable year—

(A) is derived from regularly carrying on any one or more of the following business activities:

(i) the transportation for hire of property or passengers, including the rendering by the transporter of services incidental to such transportation;

(ii) the furnishing of—

(I) telephone service or public telegraph service, or

(II) other communications service if the corporation is substantially engaged in furnishing a service described in subdivision (I);

(iii) the sale of electrical energy, gas, or water;

(iv) the issuing of insurance or annuity contracts or reinsurance; or

(v) banking, the lending of money, or the extending of credit;

(B) is received in the form of one or more of the following:

(i) dividends;

(ii) interest; or

(iii) royalties from patents, copyrights, trademarks, or other intangible property and mineral, oil, or gas royalties (but not payments of the type described in section 543 (a) (5) (B) of the Internal Revenue Code of 1954); or

(C) consists of ordinary gross income described in subparagraph (A) and other ordinary gross income described in subparagraph (B);

(2) which is a "personal holding company" as defined in section 542 of the Internal Revenue Code of 1954 or a "foreign personal holding company" as defined in section 552 of such Code; or

(3) which has an average annual income in excess of $1,000,000.

(b) ORDINARY GROSS INCOME.—The term "ordinary gross income" means gross income as determined for the taxable year under the applicable provisions of the Internal Revenue Code of 1954, except that there shall be excluded therefrom—

(1) all gains and losses from the sale or other disposition of capital assets, and

(2) all gains and losses from the sale or other disposition of property of a character described in section 1231(b) of the Internal Revenue Code of 1954 (determined without regard to holding period).

(c) AVERAGE ANNUAL INCOME.—A corporation's "average annual income" with respect to any taxable year (in this subsection referred to as the "computation year") shall be determined as follows:

(1) The period to be used in making the determination (in this subsection referred to as the "averaging period") shall first be established. Such period shall consist of the 5 consecutive taxable years ending with the close of the computation year; except that if the corporation was not required to file a Federal income tax return for 5 consecutive taxable years ending with the close of the computation year, its averaging period shall consist of the 1 or more consecutive taxable years, ending with the close of that year, for which it was required to file such a return.

(2) (A) The amount of the corporation's Federal taxable income for each of the taxable years in its averaging period shall then be determined. Such amount for any year shall be the corporation's taxable income for such year for purposes of the Internal Revenue Code of 1954 (determined without regard to any net operating loss carryback from a taxable year after the computation year), except as otherwise provided in subparagraphs (B) and (C).

(B) If for any portion of its averaging period the corporation's income was included in a consolidated return filed under the Internal Revenue Code of 1954, the corporation's Federal taxable income for that portion of such period shall be considered to be the total consolidated Federal taxable income included in such return (and the corporation's Federal taxable income for any portions of its averaging period to which this subparagraph does not apply shall be determined under the other provisions of this paragraph as though the corporation had no income for any portion of such period to which this subparagraph applies).

(C) If any taxable year in the corporation's averaging period is a period of less than 12 calendar months (and its taxable income for such year is not otherwise annualized for purposes of the Internal Revenue Code of 1954), the corporation's Federal taxable income for such taxable year shall be placed on an annual basis for purposes of this subsection by multiplying such income by 12 and dividing the result by the number of months in such year.

(3) The amounts determined under paragraph (2) for the taxable years in the corporation's averaging period shall be added together, and the total shall be divided by the number of such years. The resulting sum is the corporation's average annual income with respect to the computation year, unless paragraph (4) applies.

(4) (A) If the corporation is affiliated at any time during the computation year with one or more other corporations, its average annual income with respect to the computation year shall be the total of its own average annual income and the average annual income of each of the corporations with which it is so affiliated, as determined under paragraph (3) (with respect to such year) subject to subparagraph (B) of this paragraph.

(B) If two or more of the corporations to which subparagraph (A) applies with respect to any computation year included their income in the same consolidated return filed under the Internal Revenue Code of 1954 for any portion of the applicable averaging period, the total consolidated Federal taxable income included in such return shall be deemed to be their aggregate Federal taxable income for that portion of such period for purposes of subparagraph (A), and paragraph (2) (B) shall be disregarded to the extent that its application would result in a larger aggregate Federal taxable income.

(d) AFFILIATED CORPORATIONS.—For purposes of subsection (c), two or more corporations are "affiliated" if they are members of the same group comprised of one or more corporate members connected through stock ownership with a common owner, which may be either corporate or noncorporate, in the following manner:

(1) more than 50 percent of the voting stock of each member other than the common owner is owned directly by one or more of the other members; and

(2) more than 50 percent of the voting stock of at least one of the members other than the common owner is owned directly by the common owner.

The fact that a corporation is an "excluded corporation" shall not be taken into account in determining whether two or more other corporations are "affiliated".

SEC. 507. SALE; SALES PRICE

The terms "sale" and "sales price" shall be deemed to include leases and rental payments under leases.

SEC. 508. INTERSTATE SALE.

An "interstate sale" is a sale with either its origin or its destination in a State, but not both in the same State.

SEC. 509. ORIGIN.

The origin of a sale is—

(1) in the State or political subdivision in which the seller owns or leases premises at which the property was last located prior to delivery or shipment of the property by the seller to the purchaser or to a designee of the purchaser, or

(2) if the property was never located at premises owned or leased by the seller, in the State or political subdivision in which a business location of the seller is located and in or from which the sale was chiefly negotiated.

SEC. 510. DESTINATION.

The destination of a sale is in the State or political subdivision where the property is delivered or shipped to the purchaser, regardless of the f.o.b. point or other conditions of the sale.

SEC. 511. BUSINESS LOCATION.

(a) GENERAL RULE.—A person shall be considered to have a business location within a State only if that person—

(1) owns or leases real property within the State,

(2) has one or more employees located in the State, or

(3) regularly maintains a stock of tangible personal property in the State for sale in the ordinary course of its business.

For the purpose of paragraph (3), property which is on consignment in the hands of a consignee, and which is offered for sale by the consignee on his own account, shall not be considered as stock maintained by the consignor; and property which is in the hands of a purchaser under a sale or return arrangement shall not be considered as stock maintained by the seller.

(b) EXCEPTION.—If a corporation's only activities within a State consists of the maintenance of an office for gathering news the corporation shall not be considered to have a business location in that State for purposes of paragraph (1) of section 101, to own or lease real property within that State for purposes of section 202, or to have an employee located in the State for purposes of section 203.

(c) BUSINESS LOCATION IN SPECIAL CASES.—If a person does not own or lease real property within any State or have an employee located in any State or regularly maintain a stock of tangible personal property in any State for sale in the ordinary course of its business (or in a case described in the last sentence of section 204), that person shall be considered to have a business location only—

(1) in the State in which the principal place from which its trade or business is conducted is located, or

(2) if the principal place from which its trade or business is conducted is not located in any State, in the State of its legal domicile.

SEC. 512. LOCATION OF PROPERTY.

(a) GENERAL RULE.—Except as otherwise provided in this section, property shall be considered to be located in a State if it is physically present in that State.

(b) RENTED-OUT PERSONALTY.—Personal property which is rented out by a corporation to another person shall be considered to be located in a State if the last base of operations at or from which the property was delivered to a lessee is in that State. If there is no base of operations in any State at which the corporation regularly maintains property of the same general kind for rental purposes, such personal property shall not be considered to be located in any State.

(c) MOVING PROPERTY WHICH IS NOT RENTED OUT.—Personal property which is not rented out and which is characteristically moving property, such as motor vehicles, rolling stock, aircraft, vessels, mobile equipment, and the like, shall be considered to be located in a State if—

(1) the operation of the property is localized in that State, or

(2) the operation of the property is not localized in any State but the principal base of operations from which the property is regularly sent out is in that State.

If the operation of the property is not localized in any State and there is no principal base of operations in any State from which the property is regularly sent out, the property shall not be considered to be located in any State.

(b) MEANING OF TERMS.—

(1) LOCALIZATION OF OPERATION.—The operation of property shall be considered to be localized in a State if during the taxable year it is operated entirely within that State, or it is operated both within and without that State but the operation without the State is—

(A) occasional, or

(B) incidental to its use in the transportation of property or passengers from points within the State to other points within the State, or

(C) incidental to its use in the production, construction, or maintenance of other property located within the State.

(2) BASE OF OPERATIONS.—The term "base of operations", with respect to a corporation's rented-out property or moving property which is not rented out, means the premises at which any such property is regularly maintained by the corporation when—

(A) in the case of rented-out property, it is not in the possession of a lessee, or

(B) in the case of moving property which is not rented out, it is not in operation.

regardless of whether such premises are maintained by the corporation or by some other person; except that if the premises are maintained by an employee of the corporation primarily as a dwelling place they shall not be considered to constitute a base of operations.

SEC. 513. LOCATION OF EMPLOYEE.

(a) GENERAL RULE.—An employee shall be considered to be located in a State if—

(1) the employee's service is localized in that State, or

(2) the employee's service is not localized in any State but some of the service is performed in that State and the employee's base of operations is in that State.

(b) LOCALIZATION OF EMPLOYEE'S SERVICES.—Service of any employee shall be considered to be localized in a State if—

(1) the service is performed entirely within that State, or

(2) the service is performed both within and without that State, but the service performed without the State is incidental to service performed within the State.

(c) EMPLOYEE'S BASE OF OPERATIONS.—The term "base of operations," with respect to an employee, means a single place of business with a permanent location which is maintained by the employer and from which the employee regularly commences his activities and to which he regularly returns in order to perform the functions necessary to the exercise of his trade or profession.

(d) CONTINUATION OF MINIMUM JURISDICTIONAL STANDARD.—An employee shall not be considered to be located in a State if his only business activities within such State on behalf of his employer are either or both of the following:

(1) The solicitation of orders, for sales of tangible personal property, which are sent outside the State for approval or rejection and (if approved) are filled by shipment or delivery from a point outside the State.

(2) The solicitation of orders in the name of or for the benefit of a prospective customer of his employer, if orders by such customer to such employer to enable such customer to fill orders resulting from such solicitation are orders described in paragraph (1).

This subsection shall not apply with respect to business activities carried on by one or more employees within a State if the employer (without regard to those employees) has a business location in such State.

(e) EMPLOYEES OF CONTRACTORS AND EXTRACTORS.—If the employer is engaged in the performance of a contract for the construction of improvements on or to real property in the State or of a contract for the extraction of natural resources located in the State, an employee whose services in the State are related primarily to the performance of the contract shall be presumed to be located in the State. This subsection shall not apply with respect to services performed in installing or repairing tangible property which is the subject of interstate sale by the employer, if such installing or repairing is incidental to the sale.

(f) The term "employee" has the same meaning as it has for purposes of Federal income tax withholding under chapter 24 of the Internal Revenue Code of 1954.

SEC. 514. HOUSEHOLD DELIVERIES.

A seller makes household deliveries in a State or political subdivision if he delivers goods, otherwise than by mail or by a common carrier, to the dwelling places of his purchasers located in that State or subdivision.

SEC. 515. STATE.

The term "State" means the several States of the United States and the District of Columbia.

SEC. 516. STATE LAW.

References in this Act to "State law", "the laws of the State", and the like shall be deemed to include a State constitution, and to include the statutes and other legislative acts, judicial decisions, and administrative regulations and rulings of a State and of any political subdivision.

SEC. 517. TAXABLE YEAR.

A corporation's "taxable year" is the calendar year, fiscal year, or other period upon the basis of which its taxable income is computed for purposes of the Federal income tax.

SEC. 518. VALUATION DATE.

The "valuation date", with respect to a capital stock tax, is the date as of which capital is measured.

PART B—MISCELLANEOUS PROVISIONS

SEC. 521. PERMISSIBLE FRANCHISE TAXES.

The fact that a tax to which this Act applies is imposed by a State or political subdivision thereof in the form of a franchise, privilege, or license tax shall not prevent the imposition of the tax on a person engaged exclusively in interstate commerce within the State; but such a tax may be enforced against a person engaged exclusively in interstate commerce within the State solely as a revenue measure and not by ouster from the State or by criminal or other penalty for engaging in commerce within the State without permission from the State.

SEC. 522. PROHIBITION AGAINST GEOGRAPHICAL DISCRIMINATION.

(a) IN GENERAL.—No provision of State law shall make any person liable for a greater amount of sales or use tax with respect to tangible personal property, or gross receipts tax with respect to tangible personal property, by virtue of the location of any occurrence in a State outside the taxing State, than the amount of the tax for which such person would otherwise be liable if such occurrence were within the State (subject to section 523). For purposes of this subsection, the term "occurrence" includes incorporation, qualification to do business, and the making of a tax payment, and includes an activity of the taxpayer or of a person (including an agency of a State or local government) receiving payments from or making payments to the taxpayer.

(b) COMPUTATION OF TAX LIABILITY UNDER DISCRIMINATORY LAWS.—When any State law is in conflict with subsection (a), tax liability may be discharged in the manner which would be provided under State law if the occurrence in question were within the taxing State.

SEC. 523. APPLICABILITY OF ACT.

Nothing in section 101 or in any other provision of this Act shall be considered—

(1) to repeal Public Law 86–272 with respect to any person;

(2) to increase, decrease, or otherwise affect the power of any State or political subdivision to impose or assess a net income or capital stock tax with respect to an excluded corporation; or

(3) to give any State or political subdivision the power to impose a gross receipts tax with respect to a sale of tangible personal property if the seller would not be subject to the imposition of such a gross receipts tax without regard to the provisions of this Act.

SEC. 524. PROHIBITION AGAINST OUT-OF-STATE AUDIT CHARGES.

No charge may be imposed by a State or political subdivision thereof to cover any part of the cost of conducting outside that State an audit for a tax to which this Act applies, including a net income or capital stock tax imposed on an excluded corporation.

SEC. 525. LIABILITY WITH RESPECT TO UNASSESSED TAXES.

(a) PERIODS ENDING PRIOR TO ENACTMENT DATE.—No State or political subdivision thereof shall have the power, after the date of the enactment of this Act, to assess against any person for any period ending on or before such date in or for which that person became liable for the tax involved—

(1) a corporate net income tax, capital stock tax (other than a capital account tax imposed on corporations incorporated in the State), or gross receipts tax with respect to tangible personal property, if during such period that person did not have a business location in the State; or

(2) a sales or use tax with respect to tangible personal property, if during such period that person was not registered in the State for the purpose of collecting tax, had no business location in the State, and did not regularly make household deliveries in the State.

(b) CERTAIN PRIOR ASSESSMENTS AND COLLECTIONS.—The provisions of subsection (a) shall not be construed—

(1) to invalidate the collection of a tax prior to the time assessment became barred under subsection (a), or

(2) to prohibit the collection of a tax at or after the time assessment became barred under subsection (a), if the tax was assessed prior to such time.

SEC. 526. EFFECTIVE DATES.

(a) CORPORATE NET INCOME TAXES AND CAPITAL STOCK TAXES.—Title II of this Act, and the provisions of section 101 and this title (except section 525) insofar as they

relate to corporate net income taxes or capital stock taxes, shall apply in the case of corporate net income taxes only with respect to taxable years ending after the date of the enactment of this Act, and in the case of capital stock taxes only with respect to taxes for which the valuation date is later than the close of the first taxable year ending after the date of the enactment of this Act. Any corporation shall be permitted to adjust its reporting period for net income tax purposes to the extent necessary to comply with this Act, effective for the first taxable year to which title II applies.

(b) OTHER PROVISIONS.—The remaining provisions of this Act shall take effect on the date of the enactment of this Act.

Mr. RODINO (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMENDMENT OFFERED BY MR. SMITH OF IOWA

Mr. SMITH of Iowa. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Iowa: On page 12, after line 3, insert the following new title:

"TITLE V—TAXATION OF INDIVIDUALS

"SEC. 501. REDUCTION OF MULTIPLE TAXABILITY.

"(a) IN GENERAL.—No State or political subdivision thereof shall have the power to impose an income tax on the income or to establish the rate of taxation on the income of any individual—

"(1) which was earned or derived during any period while the individual was not domiciled in the State except to the extent the income was earned from sources within the State, or

"(2) which was earned or derived from sources without the State during any period while the individual was domiciled in the State except to the extent the tax exceeds any income tax paid on such income to the State (or political subdivision) in which the income was earned or derived.

"(b) DEFINITION.—As used in subsection (a), the term 'earned' means acquired by labor, service, or performance and does not include the mere receipt of interest or dividend payments which are merely a return upon an investment and are not paid as a result of labor, service, or performance rendered."

Mr. SMITH of Iowa (during the reading). Mr. Chairman, in view of the fact that this is the bill, H.R. 906, verbatim, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. SMITH of Iowa. Mr. Chairman, as was mentioned during debate earlier, last year when this bill was before the House, I presented an amendment to the bill which was adopted overwhelmingly. It was amended on the floor and this bill is that amendment of last year, as amended, verbatim.

After this amendment is adopted, assuming it will be, I will offer another amendment to make it conform to the bill.

The purpose of the amendment is to prevent double taxation of individuals or multiple taxation of individuals, as far as income tax is concerned. The principal bill deals with corporations, and this amendment deals with individuals as far as the income tax is concerned. It leaves a preference to the domiciliary State to levy an income tax, but it permits another State to levy a tax to the extent that money is earned or derived from sources within that State. It also provides that the domiciliary State must give credit for the tax owed and paid on income in the other State.

In other words, it prevents double taxation.

Some State commissioners are claiming that by practice this is what they now do. Indeed, I think most of them do as a matter of practice, although many of them do not have to, and if they want to, they can gouge many taxpayers any time they really want to.

Mr. RIVERS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from South Carolina.

Mr. RIVERS. Does the gentleman's amendment deal with a Member of Congress living in Maryland, Virginia, and other places nearby? For example, two distinguished Members of this House were compelled to pay income tax in the State of Maryland. Would the amendment prevent that kind of disgraceful, small act on the part of any State toward a Member of Congress whom they know represents another State? They are taking away from people portions of their salary under the guise of their being domiciled in that State.

Mr. SMITH of Iowa. To the extent that they do not have income earned or derived from sources in those States, it would. I would say, however, to the gentleman, Congressmen are only a few of the 1 million people who find themselves in this position. I would be opposed to legislation that would single out Members of Congress for separate treatment.

Mr. RIVERS. I am speaking for Members of Congress. Members of Congress cannot talk back. I live in the State of Virginia, where they do not practice that sort of smallness. But they do in the State of Maryland.

Members of Congress have raised their voices. I think this is one of the smallest things I have seen in my 30 years in Congress.

Mr. SMITH of Iowa. What I was getting ready to say is that Virginia does not apply it to Members of Congress. Washington, D.C., by law, exempts Members of Congress. But other people do not always get that kind of treatment. What this will do is to apply the same treatment across the board to all people.

Mr. RIVERS. A man selects the domicile in which he desires to live.

Mr. SMITH of Iowa. Yes. We would not interrupt or change the definition of domicile. That is well defined in the law. If one can meet the requirements that are now in the law as to domicile, then that is the primary State for income tax purposes.

Mr. RIVERS. Would an employee of your office or an office of a Member of the other body receive the same treatment?

Mr. SMITH of Iowa. If he were domiciled in one of these States he would be liable for income tax there.

Mr. RIVERS. What about a Federal civil service employee?

Mr. SMITH of Iowa. The State in which he is domiciled has the preference on his tax.

Mr. RIVERS. Even though outside the city of Washington, if you had 100,000 civil service employees, they could elect another State?

Mr. SMITH of Iowa. No, I think domicile is pretty clearly defined in the law. In addition to selecting a State for the domicile, you have to have some other indications as to what in fact is one's domicile. They usually need a home there, to vote there, and do some other things.

Mr. RIVERS. It does not change the basic law of domicile.

Mr. SMITH of Iowa. No, it does not change the law of domicile.

I would also like to discuss briefly some examples: It involves people who move from one State to another during a year. This involves large numbers of people in the United States. They inevitably find in many cases that they end up owing a tax on their entire income in both States, the State from which they moved and the State to which they moved. Soldiers' wives are involved in that. Many of them will go to work near where their husbands are stationed. They find that because they have a place of abode in that State, in addition to the State where they are domiciled, both States can, if they want to, tax the entire income for the entire year.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. SMITH of Iowa was allowed to proceed for 2 additional minutes.)

Mr. SMITH of Iowa. Airline pilots, businessmen, and others find themselves in that situation. A number of people have summer homes or they have winter homes. They may find that due to that fact, they may owe a tax in three States, if the tax commissioners were to enforce their laws.

I do not think it is necessary for an extended colloquy concerning the amendment. I think ultimately it will save the State tax system, because if we do not do something, people will become so disgusted, Congress may outlaw the State income tax entirely.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I congratulate the gentleman for his work. I would like to have him make one point crystal clear, and that is there is no attempt by this amendment to prevent any State from taxing any income an individual may have or earn in his own State. Is that correct?

Mr. SMITH of Iowa. That is correct. There is no tax shelter here at all. The domiciliary State has a preference on the income, and it can even tax any

income earned in another State if the other State did not levy a tax on it.

Mr. ASHBROOK. Is it not also correct if a person would be subject to tax in various States, for instance in Ohio and in Florida, under the gentleman's amendment the person can be taxed under both States? It does not remove from any State any power to tax a resident if he is or is not domiciled in that State.

Mr. SMITH of Iowa. To the extent he earned income from sources in that State.

Mr. ASHBROOK. That is correct. I thank the gentleman for making that clear.

Mr. RIVERS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from South Carolina.

Mr. RIVERS. Mr. Chairman, this is just an implementation, in other words, of the full faith and credit provision of the Constitution?

Mr. SMITH of Iowa. That would be a good way to put it.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. Mr. Chairman, I yield to the gentleman from Iowa (Mr. KYL).

Mr. KYL. Mr. Chairman, I thank the gentleman for bringing this to the floor. This is something which has to do with preventing the possibility of double taxation. I think this is a very constructive step.

Mr. HUNT. Mr. Chairman, I rise in support of the amendment to prohibit the taxation on an individual's income in its entirety in more than one State. In my estimation it is simple equity and many of the arguments advocating a uniform and equitable system of taxation among the several States for businesses and corporations, thus providing relief from the multiplicity of State and local taxes contributing to multiple taxation, apply equally to individuals in principle.

However, there is a situation involving taxes on the incomes of individuals which I feel has not been given the consideration it is due. This is the situation where an individual is domiciled in a State that does not levy an income tax and works in a State where either a State income tax is imposed or the political subdivisions of that State are empowered to levy such taxes based on income. I am personally familiar with the case of New Jersey, a State which does not have an income tax law, and Pennsylvania which, although it does not levy a State income tax, has authorized its political subdivisions to impose such taxes. The city of Philadelphia imposes a 2-percent wage tax on everyone who earns an income within its jurisdiction. This rate will increase to 3 percent effective July 1. The tax is levied at the full rate on residents, nonresidents, and out-of-State residents as well.

I believe, Mr. Chairman, we should look at an individual's tax liability in terms of an aggregate tax burden. For example, the total State and local tax burden in Pennsylvania averages $94.57 per $1,000 of personal income, roughly approximating the $92.83 State and local tax liability in New Jersey. A statistically representative New Jersey resident who works in Philadelphia and pays a 2-percent gross income tax—3 percent beginning July 1, 1969—however, would have $20 per $1,000 of personal income added to his total tax bill, assuming his personal income consists entirely of his wages or salary. Thus, he would pay $20 more tax per $1,000 of personal income than a comparably situated resident of New Jersey who works in New Jersey and $18.26 per $1,000 more than a resident of Pennsylvania who works in Pennsylvania.

With respect to taxation and benefits, I am fully cognizant of the fact the courts have consistently recognized that equal tax burdens do not necessarily require equal benefits. I do not infer from the attitude of the courts in this regard that it is a mandate to any taxing jurisdiction to gouge the helpless taxpayer, especially the nonresident who has no voice at the polls or representation in the disposition of his tax dollar. Rather, I believe the courts view this issue of taxes versus benefits as one to be resolved as fairly as practical by the political instruments of government. There exists no standard by which State and local taxing jurisdictions may apportion the tax burden between residents and nonresidents taking into consideration the relative benefits derived by each class. In this connection, I include the following table, entitled "Local Income Tax Bases, 1967," taken from an information report, M–43, of the Advisory Commission on Intergovernmental Relations, covering "State and Local Finances, Significant Features, 1966 to 1969":

TABLE 42.—LOCAL INCOME TAX BASES, 1967

City	Nonresident rate relative to resident rate	Business taxed [1]		Resident income base includes—				Reciprocal city tax credit allowed	Personal exemptions allowed	Personal deductions allowed	Tax withheld on wages and salaries
		Incorporated	Unincorporated	Wages, salaries, similar income only	Income earned out of jurisdiction	Capital gains	Dividends				
New York, N.Y.	[2]	Yes	Yes	No	Yes	Yes	Yes	No	$600 each [3]	Yes	Yes.
Philadelphia, Pa.	Same	No	Yes	Yes	Yes	No	No	No	No	No	Yes.

[1] Charitable, religious, educational, and other nonprofit organizations exempt in most cases. Tax generally confined to income stemming from activities in city.

[2] Nonresidents taxed on an entirely different basis from residents. The rate is markedly lower. Instead of deductions, an exclusion related to income level is allowed. The exclusion of $3,000 on income up to $10,000 drops to $2,000 for income over $10,000, to $1,000 for $20,000 to $30,000 income, to none for income over $30,000.

[3] Except where derived in connection with the conduct of a business.

Source: Tax Foundation, Inc., "City Income Taxes," research publication No. 12 (new series)

The table compares city income taxes imposed on nonresidents with those on residents. You will note that while most cities, including Philadelphia, impose the same tax rate on both residents and nonresidents, other cities—New York, Baltimore, Detroit, Flint, and Grand Rapids—impose different rates. Three of these impose only half the resident rate on nonresidents.

Just as there exists a pressing need for the establishment of an equitable system for the taxation of interstate commerce, as embodied in the legislation now before us, I firmly believe there is an urgent need to create a national standard for the levying of taxes on the incomes of out-of-State residents as compared with residents. Insofar as the taxation of residents and nonresidents within the same State is concerned, I feel this is justifiably within the sole jurisdiction of the political instruments of the State governments. I cannot subscribe, however, to the argument that to set a national standard respecting income taxes on out-of-State residents is an undue limitation on the State taxing powers.

It is my feeling that a taxpayers' re-

volt is not only confined to our discussions of Federal taxes, but to State and local taxes as well. When President Nixon said:

We shall never make taxation popular, but we can make taxation fair.

He struck a note of optimism to which the American people appeal now for action. I believe it is the responsibility of the Congress to effect a fair and equitable system of taxation at all levels of government to the extent of its jurisdiction.

I favor the Smith of Iowa amendment and urge the Judiciary Committee to give serious consideration to the issue of State and local income taxes as they affect out-of-State residents to cover the situation described by my remarks. The tax credit provisions of the amendment will not benefit New Jersey residents and the residents of other States, where State or local income taxes are not imposed, who must pay out-of-State income taxes. The resulting inequitable and discriminatory aggregate tax burdens should be remedied by appropriate legislation.

Mr. CLEVELAND. Mr. Chairman, will the gentleman yield?

Mr. HUNT. I yield to the gentleman from New Hampshire.

Mr. CLEVELAND. Mr. Chairman. I thank the gentleman for yielding. I support the amendment offered by the gentleman from Iowa (Mr. SMITH) as I did last year. Last year, when we discussed this amendment on the floor of the House on May 22, I not only supported this amendment but offered a clarifying amendment to it. This year I am pleased that the gentleman's amendment includes that amendment, as I think it will strengthen the purpose of his endeavor. As the gentleman from South Carolina (Mr. RIVERS) has already pointed out, I feel that this measure is essentially a clarification of the constitutional mandate expressed in the full faith and credit clause, and I hope that the House will again vote to approve the amendment and the bill.

Mr. RODINO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to state that although I did not, in consultation with the gentleman from Iowa, accept the amendment as a committee amendment, nonetheless I supported the amendment the last time it was proposed and I support it now. I think it is a good amendment.

Mr. MACGREGOR. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I have no objection to the amendment offered by the gentleman from Iowa (Mr. SMITH).

Mr. CEDERBERG. Mr. Speaker, I move to strike the last word.

(By unanimous consent, Mr. CEDERBERG was allowed to speak out of order.)

ANNUAL DINNER IN LONGWORTH BUILDING—ARRIVAL OF PRESIDENT

Mr. CEDERBERG. Mr. Speaker, I take this time just to make this announcement, that tonight is the night of the annual dinner for the House of Representatives in the Longworth Building. Of course all Members are invited. We hope they will be there.

The President is going to be our guest. He will be there at about 6:15. We hope as many Members as possible can be there at that time to greet the President when he arrives.

Mr. PELLY. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, I strongly support this amendment by the gentleman from Iowa (Mr. SMITH) because I believe it would correct a situation under which the State of Alaska recently imposed an income tax on many nonresidents who are domiciled in my State of Washington. These individuals who have no vote in Alaska, or have no benefits such as education of their children in Alaska schools are taxed because they sail on a ship that enters Alaska waters or are truck drivers and airline pilots and fishermen, who although nonresidents, must pay Alaska income taxes just because they must visit Alaska in their jobs.

Therefore, Mr. Chairman, I urge the House to support the Smith amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. SMITH).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SMITH OF IOWA

Mr. SMITH of Iowa. Mr. Chairman, I offer a conforming amendment.

The Clerk read as follows:

Amendment Offered by Mr. SMITH of Iowa: On page 2, strike out all of the table of contents following the item which relates to section 401, and insert the following:

"TITLE V—TAXATION OF INDIVIDUALS

"Sec. 501. Reduction of multiple taxability.

"TITLE VI—DEFINITIONS AND MISCELLANEOUS PROVISIONS

"PART A. DEFINITIONS.

"Sec. 601. Net income tax.
"Sec. 602. Capital stock tax; capital account tax.
"Sec. 603. Sales tax.
"Sec. 604. Use tax.
"Sec. 605. Gross receipts tax.
"Sec. 606. Excluded corporation.
"Sec. 607. Sale; sales price.
"Sec. 608. Interstate sale.
"Sec. 609. Origin.
"Sec. 610. Destination.
"Sec. 611. Business location.
"Sec. 612. Location of property.
"Sec. 613. Location of employee.
"Sec. 614. Household deliveries.
"Sec. 615. State.
"Sec. 616. State law.
"Sec. 617. Taxable year.
"Sec. 618. Valuation date.

"PART B. MISCELLANEOUS PROVISIONS.

"Sec. 621. Permissible franchise taxes.
"Sec. 622. Prohibition against geographical discrimination.
"Sec. 623. Applicability of Act.
"Sec. 624. Prohibition against out-of-State audit charges.
"Sec. 625. Liability with respect to unassessed taxes.
"Sec. 626. Effective dates."

On page 12, line 4, strike out "TITLE V" and insert "TITLE VI".

On page 12, line 7, strike out "SEC. 501." and insert "SEC. 601."

On page 12, line 13, strike out "SEC 502." and insert "SEC. 602."

On page 12, line 22, strike out "SEC. 503." and insert "SEC. 603."

On page 13, line 3, strike out "SEC. 504." and insert "SEC. 604."

On page 13, line 11, strike out "SEC. 505." and insert "SEC. 605."

On page 13, line 17, strike out "SEC. 506." and insert "SEC. 606."

On page 19, line 9, strike out "SEC. 507." and insert "SEC. 607."

On page 19, line 12, strike out "SEC. 508." and insert "SEC. 608."

On page 19, line 15, strike out "SEC. 509." and insert "SEC. 609."

On page 20, line 3, strike out "SEC. 510." and insert "SEC. 610."

On page 20, line 8, strike out "SEC. 511." and insert "SEC. 611."

On page 21, line 18, strike out "SEC. 512." and insert "SEC. 612."

On page 23, line 22, strike out "SEC. 513." and insert "SEC. 613."

On page 26, line 3, strike out "SEC. 514." and insert "SEC. 614."

On page 26, line 8, strike out "SEC. 515." and insert "SEC. 615."

On page 26, line 11, strike out "SEC. 516." and insert "SEC. 616."

On page 26, line 17, strike out "SEC. 517." and insert "SEC. 617."

On page 26, line 22, strike out "SEC. 518." and insert "SEC. 618."

On page 27, line 2, strike out "SEC. 521." and insert "SEC. 621."

On page 27, line 13, strike out "SEC. 522." and insert "SEC. 622."

On page 27, line 22, strike out "523" and insert "623".

On page 28, line 8, strike out "SEC. 523." and insert "SEC. 623."

On page 29, line 1, strike out "SEC. 524." and insert "SEC. 624."

On page 29, line 8, strike out "SEC. 525." and insert "SEC. 625."

On page 29, line 21, strike out "or".

On page 30, line 5, strike out the period and insert "; or".

On page 30, after line 5, insert the following new paragraph:

"(3) an income tax on the income of any individual—

"(A) which was earned or derived while the individual was not domiciled in the State, except to the extent the income was earned from sources within the State, or

"(B) which was earned or derived from sources without the State while the individual was domiciled in the State, except to the extent the tax exceeds any income tax paid on such income to the State (or political subdivisions) in which the income was earned or derived."

On page 30, line 15, strike out "SEC. 526." and insert "SEC. 626."

On page 30, line 18, strike out "525" and insert "625".

On page 31, after line 3, insert the following new subsection:

"(b) TAXATION OF INDIVIDUALS.—Title V of this Act shall apply only with respect to taxable years ending after the date of the enactment of this Act."

On page 31, line 4, strike out "(b)" and insert "(c)".

Mr. SMITH of Iowa (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. SMITH of Iowa. Mr. Chairman, this is a conforming amendment that fits the previous amendment into the bill and renumbers the sections and makes it coincide as to scope and effective date.

I urge the adoption of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. SMITH).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HUNGATE

Mr. HUNGATE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUNGATE: On page 15, line 9, strike out "$1,000,000" and insert in lieu thereof "$500,000".

Mr. HUNGATE. Mr. Chairman, this amendment relates to page 15, line 9, as indicated, and makes only one change in the bill. It would change the definition of an "excluded corporation" from one with an average annual income in excess of $1 million to one with an average annual income in excess of $500,000.

So far as I can ascertain, on the latest year for which I can get figures, the Commerce Department advises me there are some 5,700 corporations with net incomes exceeding $1 million, as of 1965.

The Internal Revenue Service says that there were 5,722 corporations with a net income of $1 million or more as of 1965. The figures I received on those between $500,000 average income and $1 million income show that it would add 5,037 corporations to the total. The excluded corporations are the ones over which your States will retain the powers that they now have to raise the revenue that they so desperately need. In essence this is the only change that my amendment would make. I would suggest that those who have an income of over $500,000 average per year might be something larger than most of us would think of as small business, which is what we are particularly anxious to help. In short, this amendment would change the number of corporations from some 5,700 which would be paying taxes to your States after the enactment of this measure and double it to something over 10,000.

Mr. Chairman, I urge the adoption of my amendment.

Mr. MACGREGOR. Mr. Chairman, I rise in opposition to the amendment.

First of all, let me say the amendment is presented to us here for the first time. It was not presented during the deliberations of the Committee on the Judiciary on this matter where it could have been accorded thoughtful study.

I yield to the gentleman from Missouri if I am in error.

Mr. HUNGATE. Will the gentleman yield whether he is in error or not?

Mr. MACGREGOR. I will yield if he says that what I said is inaccurate, and then I will be pleased to yield for whatever comment he wishes to make.

Mr. HUNGATE. Let me say that the facts that I base this on are accurate. But that does not mean anything. The point I want to make is: Was not the amendment which I just offered discussed in the Committee on the Judiciary?

Mr. MACGREGOR. We discussed at some length in the special Subcommittee on Interstate Taxation what dollar amount was an appropriate limitation.

Mr. Chairman, to conclude—perhaps I should say to continue, although I will be concluding very shortly—we are considering this matter for the first time and we do not know what its effect would be. I appreciate the fact that the gentleman from Missouri may be presenting this with accurate information, but I repeat that we do not know what its effect would be. The lowering of the amount of the limitation should be given careful committee consideration.

Second, I suggest to the gentleman that inflation being what it is in the last 4 years, $500,000 a few years ago is the same as $1 million today. I appreciate that the gentleman wishes in good faith to restrict the bill to small business, but there are many small businesses doing business with an annual volume of close to $1 million.

Mr. Chairman, I ask that the amendment be defeated.

If the gentleman is sincere—and I am sure he is—he will have an opportunity to argue the case before the other body.

Mr. RODINO. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I merely want to reiterate what the gentleman from Minnesota (Mr. MACGREGOR) stated; namely, that this amendment was never offered.

I would point out to the Committee that one of the most outstanding tax administrators, Mr. Cox of Georgia, when discussing this matter with the committee suggested that his was a likely compromise. The $1 million figure was one which was considered at great length. We know what the effect of a $1 million exclusion would be. We certainly do not know what the effect would be if it were reduced to $500,000.

I would also state to the gentleman from Missouri that with title IV in the bill, which gives us the opportunity to oversee what is being done in these taxing jurisdictions, the committee would have an opportunity to oversee this. Should problems arise in this area then under the provisions of title IV of this bill, we would be able to make adjustments.

For that reason I believe this amendment is not timely and I urge its defeat.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. HUNGATE).

The amendment was rejected.

AMENDMENT OFFERED BY MR. TAFT

Mr. TAFT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TAFT: On page 30, line 21, after the word "ending", add "two years"; and on line 24, delete "first" and substitute "third"; and on page 31, line 5, delete "on" and substitute "two years after".

Mr. TAFT. Mr. Chairman and members of the Committee, I shall not take but a minute to explain this very simple amendment. I do not expect it will be adopted, but I believe it is a reasonable and a sound and a precautionary amendment, and perhaps if the amendment is not adopted here it may give warning to the Senate of some of the problems that may arise if legislation of this sort is passed.

Mr. Chairman, the only effect of the amendment would be to delay the effective date of this measure, if passed, for a period of 2 years. I should point out to the Members that many legislatures in the States have biennial sessions, and a 2-year delay in putting it into effect would give them a chance to adjust their thinking insofar as any revenue changes are concerned, as in the case of the State of Washington, or also to adjust their tax laws should there be any change in their tax laws necessary to eliminate some very, very difficult questions that I believe would arise if we simply slap on the legislation as passed on top of their present State tax structure.

Mr. RODINO. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I might say that this problem has been under discussion and under consideration for some 10 years now. It has become clear that there is a necessity to eliminate the chaos and confusion now, to relieve these companies which are unduly burdened by the various vexing questions relating to State taxation of interstate commerce.

Mr. Chairman, I believe that any unnecessary delay would unduly saddle them, and would be unjust and unfair.

For those reasons, I would urge the defeat of the amendment.

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Missouri.

Mr. ICHORD. Mr. Chairman, I thank the gentleman for yielding.

This appears to me, I would say to the gentleman from New Jersey, to be a very reasonable amendment. If the summary in the report is wrong, and the figures of the Missouri revenue people are correct, they will lose $25 to $50 million. Does not the gentleman from New Jersey believe, if this is true, that we should give the States some opportunity to change or readjust their tax laws so that they can make up the $25 million or the $50 million loss? Because the Federal Government is not the only agency of government that is having difficulty getting enough tax revenue. The State governments have just about as severe a problem as the Federal Government has, and they are going to have to get that money some place.

Mr. RODINO. I recognize that the gentleman offers this argument in all sincerity and probably with some justification.

I might say, however, this argument was advanced some 4 years ago as well. Together with that, I might say the figures and the estimates are in dispute. Those who support this bill and the study, in my judgment, and others, have shown there would be a stimulation of commerce and that revenue would be flowing into the various States as a result of the elimination of the chaos and confusion. I think we would find the States would not be adversely affected.

In addition, we have title IV of the bill which provides a safeguard whereby the committee would be able to exercise oversight once this measure is enacted.

Mr. ICHORD. The committee makes no recommendations for what fields of taxation the States can explore in order to make up for this possible loss of revenue?

Mr. RODINO. The committee makes no recommendation as to that.

Mr. MACGREGOR. Mr. Chairman, I move to strike out the last word and rise in opposition to the amendment.

Mr. Chairman, the best arguments in opposition to the amendment offered by the gentleman from Ohio (Mr. TAFT) were uttered by the gentleman from

Ohio (Mr. TAFT) during the course of general debate. The gentleman from Ohio (Mr. TAFT) then referred to the fact that this matter has been 7 years in study in the House Committee on the Judiciary and that it would probably be 7 years in study in the other body before it was passed.

We have delayed a long, long time already in dealing with the vexatious problem that confronts countless small enterprises across this country.

I am sure that the other body is not going to act precipitously on this matter. I would hope that toward the end of next year it would act, but I really do not expect it will act before that time.

I suggest that there will be ample time for the other body to consider whether or not we should wait until after the 1970 State legislative sessions before making this law effective.

I do not believe there is a need to legislate delay in this matter. The guidelines are clear and sufficient. Further State legislation will be unnecessary.

Mr. Chairman, I urge that the amendment be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. TAFT).

The amendment was rejected.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. MONAGAN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7906) to regulate and foster commerce among the States by providing a system for the taxation of interstate commerce, pursuant to House Resolution 438, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MRS. MAY

Mrs. MAY. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentlewoman opposed to the bill?

Mrs. MAY. I am in its present form, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mrs. MAY moves to recommit the bill H.R. 7906 to the Committee on the Judiciary.

Mr. RODINO. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. TAFT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 311, nays 87, not voting 34, as follows:

[Roll No. 93]

NOT VOTING—34

Ashley	Gallagher	Nedzi
Blatnik	Gettys	Nelsen
Button	Hawkins	O'Hara
Carey	Hébert	Pryor, Ark.
Chisholm	Joelson	Pucinski
Conyers	Karth	Purcell
Cunningham	Kirwan	Rostenkowski
Diggs	Kluczynski	Ruppe
Evins, Tenn.	Latta	Thompson, N.J.
Fallon	Miller, Calif.	Watkins
Farbstein	Mills	Wolff

So the bill was passed.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Latta.
Mr. Kirwan with Mr. Cunningham.
Mr. Kluczynski with Mr. Ruppe.
Mr. Miller of California with Mr. Thompson of New Jersey.
Mr. O'Hara with Mr. Nelsen.
Mr. Mills with Mr. Watkins.
Mr. Evins of Tennessee with Mr. Joelson.
Mr. Fallon with Mr. Pryor of Arkansas.
Mr. Pucinski with Mr. Nedzi.
Mr. Farbstein with Mr. Button.
Mr. Rostenkowski with Mr. Wolff.
Mr. Gallagher with Mr. Hawkins.
Mr. Casey with Mr. Conyers.
Mr. Ashley with Mr. Diggs.
Mr. Purcell with Mr. Karth.
Mr. Blatnik with Mr. Gettys.

Mr. MAHON changed his vote from "yea" to "nay."

Mr. BOLAND changed his vote from "nay" to "yea."

Mr. ABERNETHY changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. RODINO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PROVIDING FOR CONCURRING IN THE SENATE AMENDMENTS TO H.R. 4229—TO CONTINUE FOR A TEMPORARY PERIOD THE EXISTING SUSPENSION OF DUTY ON HEPTANOIC ACID

Mr. COLMER, from the Committee on Rules, reported the following privileged resolution (H. Res. 455) providing for concurring in the Senate amendments to H.R. 4229 (Rept. No. 91-328), which was referred to the House Calendar and ordered to be printed:

H. RES. 455

Resolved, That immediately upon the adoption of this resolution the bill (H.R. 4229) to continue for a temporary period the existing suspension of duty on heptanoic acid, with the Senate amendments thereto, be, and the same is hereby taken from the Speaker's table, to the end that the Senate amendments be, and the same are hereby agreed to.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 11400, SUPPLEMENTAL APPROPRIATIONS, 1969

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent that the managers on the part of the House on the bill H.R. 11400 may have until midnight Friday, June 27, to file a conference report.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. GERALD R. FORD asked and was given permission to address the House for 1 minute.)

Mr. GERALD R. FORD. Mr. Speaker, I take this time in order to ask the distinguished majority leader the program for the remainder of this week.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, as previously announced, we will not have any legislative business tomorrow, but we expect on Friday to consider the Senate amendment to H.R. 4229 which authorizes a 30-day withholding tax provision as a temporary measure.

Also, on Friday we may have the conference report on H.R. 11400, the second supplemental appropriations bill for fiscal year 1969, and we may also have the conference report on H.R. 8644, which relates to the freeze on aid to dependent children.

Then, on Monday, we are rescheduling the surtax bill, which is H.R. 12290, pursuant to the request of the distinguished chairman of the Committee on Ways and Means, made to the leadership today. That will be under a 4-hour closed rule.

Mr. GERALD R. FORD. That will be programed and scheduled and voted on Monday next?

Mr. ALBERT. That is what we expect.

Mr. GERALD R. FORD. Mr. Speaker, I thank the gentleman.

HOUR OF MEETING ON FRIDAY, JUNE 27

Mr. ALBERT. Mr. Speaker, for the benefit of Members many of whom have asked that this request be made, I ask unanimous consent that when the House adjourns on Thursday it adjourn to meet at 11 o'clock a.m. on Friday.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. GROSS. Mr. Speaker, reserving the right to object, what will be the necessity, or what will be the rule providing for the supplementary surtax resolution?

Is it to be 1 hour?

Mr. ALBERT. If the gentleman will yield, it is for 1 hour, and the amendment provides for a 30-day extension.

On that, Mr. Speaker, if the gentleman will yield, I defer to the majority whip.

Mr. BOGGS. Mr. Speaker, that is correct.

Mr. GROSS. Mr. Speaker, how much time for debate will be allowed on the bill?

Mr. BOGGS. Mr. Speaker, the bill does not come up until Monday.

Mr. GROSS. Then what is programed for Friday?

Mr. BOGGS. Mr. Speaker, the rule provides for adoption of the Senate amendments, and there will be 1 hour of debate under the control of the chairman of the Committee on Rules, the gentleman from Mississippi (Mr. COLMER).

Mr. GROSS. That is all?

Mr. BOGGS. That is all.

Mr. ANDREWS of Alabama. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Alabama.

Mr. ANDREWS of Alabama. Mr. Speaker, I would like to ask the majority leader, will there be any other legislative business next week?

Mr. ALBERT. Yes.

Mr. ANDREWS of Alabama. Does the gentleman have the schedule at this time?

Mr. ALBERT. I do not. There are at least two other bills that are eligible, but I would like to defer that until Friday.

Mr. ANDREWS of Alabama. But the only one the gentleman is certain of is the tax bill for Monday?

Mr. ALBERT. I am as certain as I can be, and of course there are always reservations, but we expect to consider it on Monday.

Mr. GROSS. Mr. Speaker, further reserving the right to object, what was the other bill we will be taking up on Friday?

Mr. ALBERT. As I indicated, there are two conference reports—others may be ready on Friday—but as far as I know there are two: One is the conference report on the AFDC freeze and the other is the conference report on the supplemental appropriation bill.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 8644, SUSPENSION OF DUTY ON CHICORY ROOTS

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tomorrow night to file a conference report on H.R. 8644, to make permanent the existing temporary suspension of duty on crude chicory roots.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

JOE McCAFFREY OBSERVES 25TH YEAR OF SERVICE ON CAPITOL HILL

(Mr. STAGGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STAGGERS. Mr. Speaker, it is fitting, I think, that we take the opportunity to honor Joe McCaffrey as he observes his 25th year of service on Capitol Hill. No news correspondent in our time has shown a warmer or more sympathetic understanding of the U.S. Congress than has Mr. McCaffrey. His interpretations of legislative maneuvering are consistently to the point, clear, and accurate. They find a large and appreciative audience which has learned to rely on his observations and his conclusions. You can always find him where things are happening. He is a friend to every Member of Congress, and in turn each Member respects his judgment and his reverence for the finest traditions of reporting. He is an honor and an ornament to the news media, and especially to the television and radio programs on which he speaks so effectively and so gracefully.

Mr. Speaker, when I consider my personal relations with Joe McCaffrey, I am inclined to echo the words of admiration spoken some years ago for another newsman of unimpeachable integrity:

Some day I'll pass by the Great Gates of Gold,
And see a man pass through unquestioned and bold.
"A Saint?" I'll ask, and old Peter'll reply:
"No, he carries a pass—he's a newspaper guy."

May the Hill have many more years of Joe McCaffrey, and may all his days be days of contentment and satisfaction with a job well done. And may the Lord watch over his goings in and coming out from this day hence forth and forever more.

CRISIS OF CONFIDENCE HOLDS BACK SURTAX

(Mr. PATMAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and to include extraneous material.)

Mr. PATMAN. Mr. Speaker, the problem of mustering support for an extension of the surtax can be traced directly to a "crisis of confidence" about the Nixon administration's Treasury Department.

Mr. Speaker, many people in this Nation do not have confidence that Secretary of the Treasury David M. Kennedy will push for real tax reform if the surtax is extended. These people know that Secretary Kennedy is tied to the big interests in this country and they doubt that he will have the courage to buck them in a showdown fight over tax reform legislation.

So long as Secretary Kennedy maintains his massive financial ties to his former bank, the Continental Illinois National Bank of Chicago, the people and the Congress cannot have confidence that he will carry out his duties in the interests of the public. Today, he receives a $4,800 monthly pension from the Continental Illinois National Bank and has his health and life insurance paid by the bank. He has already benefited from a $1,400,000 stock option while in office and has a promise of a $200,000 payment from the bank the moment he leaves office.

In short, Mr. Kennedy is receiving much more from the bank than he is from the Federal Government for the performance of his official duties.

With this background it is difficult for the American people to have confidence in a Secretary of the Treasury who will not sever his ties to his former employer. It is difficult for the people to believe that such an official will fight for tax reform that is opposed by so many of his former associates in the banking and business world.

The Secretary's performance—and his outside financial ties—have created a severe crisis of confidence—a new credibility gap in the Federal Government.

Mr. Speaker, I supported the surtax as a necessary economic measure in the last Congress. I have announced my support of extension of the tax in this Congress, but now I am beginning to have serious doubts whether we can expect Mr. Kennedy and his cohorts at the Treasury to back tax reform once the extension is enacted.

It is unfair to saddle the people with this 10-percent surtax if there is no concrete assurance that the big boys will be forced to pay their fair share through the closing of these tax loopholes. The American people are angry over high taxes and high interest rates and they want more than tepid promises from a Secretary of the Treasury who holds such massive interests in the financial world.

Mr. Speaker, I am now convinced that this Congress should not vote an extension of the surtax—for any extended period—until the tax reform measures are reported to the floor and incorporated as a package with the surtax.

The Congress could continue the tax for 2 or 3 weeks by resolution while the administration and its illustrious Secretary of the Treasury got behind a tax reform measure. These 2 or 3 weeks will give the administration plenty of time to muster the support on the Republican side of the aisle.

Let us see if the Secretary of the Treasury is willing to tax his former allies in the banking and business community before we vote this surtax. It is a chance for the Secretary to put up or shut up on tax reform if he really wants it.

This should be a broad set of tax reforms covering every conceivable loophole. And this would mean closing the loopholes through which the commercial banking industry receives millions of dollars in subsidies. For example, the so-called bad debt reserve is a tax loophole through which the financial institutions escape nearly a billion dollars in taxes every year.

Will the Secretary have the courage to close this loophole while he receives his pension from the Continental Illinois National Bank?

The Secretary has failed miserably in preventing the banks from raising interest rates. He refused to do anything—to say anything—to stop the latest prime rate increase from 7½ to 8½ percent. His comments were almost an open invitation for the banks to raise the rates.

Last week, he was before the Banking and Currency Committee and stated that he did nothing and would do nothing to roll back these high interest rates.

Mr. Speaker, it is predictable that Secretary Kennedy's attitude on tax reform will end up like his views on high interest rates. He will not do anything meaningful in either area. He will let the public be gouged both by taxes and by high interest rates.

Mr. Speaker, it is obvious that if we want something done about tax reform and high interest rates, we are going to need a new Secretary of the Treasury—one who can put the public interest ahead of his private interests.

Earlier this year, the Joint Economic Committee, of which I am chairman, supported extension of the surtax but specifically coupled it with the call for tax reforms. This was a sound position and it is one which should be followed now.

The Joint Economic Committee deliberated this issue and took a very firm stand on the great need for tax reform. The committee called for immediate action to reform the Federal revenue structure and we also pointed out that it was "essential for many other reasons and long overdue":

> Despite pressing matters of immediate fiscal policy, we must not lose sight of the objective of revenue reform. This is an opportune time to accomplish this long-delayed job, as the public is giving strong support to this effort. Revenue reform will also eliminate some of the objections to using the tax system for short-run stabilization. It will eliminate many of the manifest inequities in the present tax structure that permit numerous individuals with high incomes to avoid paying their just share of support of Federal programs.

I would like to stress the fact that the committee argued against letting the surtax extension be an excuse for inaction on tax reform. The language is as follows:

> It is imperative that extension of the surtax and excises should not be the excuse for relaxing efforts to tighten control over expenditures, to increase economy and efficiency in Government, to eliminate obsolete or low priority items in the budget, and to drastically revise the tax system to produce a larger tax base, tax equity, and steady economic growth. In the longer run, no fiscal policy can long succeed unless these objectives are realized.

So, today, I am withholding my unqualified support of the extension of the surtax until such time as we have a tax reform bill and until Secretary Kennedy is willing to come to Capitol Hill and fight for these reforms.

TRAGIC SITUATION IN NORTHERN IRELAND

(Mr. O'NEILL of Massachusetts asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'NEILL of Massachusetts. Mr. Speaker, I rise today to direct the attention of my colleagues to the tragic situation in Northern Ireland. Today a bipartisan group of 104 Members of this body asked President Nixon by letter to express our distress over discrimination against Roman Catholics in Northern Ireland. The tragedy of a policy of discrimination is written in the histories of many nations. I believe it would be foolish for the Government of Northern Ireland to ignore the clear and persuasive lessons of history.

I should like to take this opportunity to commend the gentleman from California (Mr. BURTON), for his leadership and effort to the end that this discrimination cease.

Our letter said, in part:

> The opportunity to seek and obtain employment and housing without regard to religion, race, creed or national origin must be guaranteed, if the cause of human dignity is to be advanced by this generation, as the cause of freedom was advanced by our common forefathers.

We ask the President to convey our feelings to Prime Minister James Chichester-Clark of Northern Ireland and to Prime Minister Harold Wilson, not for our benefit but for the good of their nations and the people of Northern Ireland. The question in Northern Ireland is the issue of civil rights, but the rights sought are human rights inalienable and innate. All people who cherish liberty and justice must support and insure equal protection and equal rights under the law. The issue of civil rights is the concept of humanity for what makes us human is our concern for our fellow man and our protection of his interest as our own.

We ask the President to inform the people of Northern Ireland of our pledge of friendship and support in solving this problem, which is tearing their nation and hurting all of its citizens.

I am particularly disturbed, as are my colleagues, that intolerance and discrimination are encouraged by and rooted in the laws of Northern Ireland. We all well know that prejudice cannot be uprooted in a day, but when discrimination is founded in law, intolerance is fed and flourishes.

On Saturday, June 28, the civil rights movement of Northern Ireland will hold a mass rally and march for civil rights. The participants will march from Strabane to Derry to demonstrate their support for equal opportunity and equal protection under the laws. I would like my colleagues and the Nation to focus

their attention on this demonstration and let the people of Northern Ireland know that we support them in their attempts to peacefully change harmful practices and discriminatory laws. We hope to see responsible men on all sides remove the blinds of hate and to bind the wounds of recent conflict.

I urge President Nixon to make known to the leaders of Northern Ireland and of Great Britain our hope that the rights and safety of these marchers will be protected. The state must protect its citizens and the rights of the minority.

I am somewhat disturbed by information I have received regarding the possibility that 8,000 special police reserves will be called up. If these forces known as B-Specials are being called up merely to free the regular forces from daily duties so that the regular police will be able to protect the marchers then all is well. However, if this special constabulary is used to harass the marchers or to assist the extremist, then I am sure that only violent confrontation will result.

In the past, unfortunately, the B-Specials have failed to protect the civil rights demonstrators and have in several cases joined with those extremist who sought to do the marchers harm. During the dairy riots, the allegations of police brutality and collusion with the Ian Paisley extremist arose because of the activities of the special constabulary and not primarily of the regular police.

Because of this and similar incidences, the Catholics in Northern Ireland regard this special force as a political militia and do not expect fair treatment at their hands.

I urge the Government of Northern Ireland to protect these marchers, to insure their safety and thereby demonstrate that the police are not a political tool and that the safety of all citizens is the concern of government.

No people is free unless all are free; no man is secure unless all men are secure. I urge the President to express our concern, and I urge all my colleagues to focus attention on June 28.

Mr. BURTON of California. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL of Massachusetts. I yield to the gentleman from California.

Mr. BURTON of California. Mr. Speaker, I should like to be associated with the remarks of my distinguished colleague from Massachusetts (Mr. O'NEILL) and to commend him, for he has eloquently and forthrightly expressed the concerns which prompted us to initiate this letter to President Nixon.

The right of free men to petition for redress of grievances must be the concern of all free men. The cause of human dignity transcends geographic bounds or political lines of demarkation.

Thus, we in the Congress who joined together to express our concern to President Nixon and to request of him that he relay that concern to the Governments of Great Britain and North Ireland did so to strengthen the common cause of human dignity, to urge that reason prevail over prejudice, that hate and violence bred of past differences not continue to blind men to present needs.

We will watch as free men seek to call attention to their plight by peaceful demonstration in North Ireland June 28 and it is our fervent hope that the rights of these marchers and their safety will be guaranteed.

I am inserting at this point in the RECORD, the full text of the letter of June 24 to President Nixon, together with the names of my colleagues who joined in signing it.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., June 24, 1969.

PRESIDENT RICHARD M. NIXON,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We the undersigned Members of Congress are greatly concerned about the present situation in Northern Ireland. The policy of the Government of Northern Ireland is one designed to discriminate against the Catholic minority in the area of jobs, housing and equal voting rights, among other things.

We are mindful that neither intolerance nor prejudice is unique to any geography or people. They exist wherever reason gives way to passion. However, we know that laws, as an expression of a Government's principles, can discourage and help eliminate the practice of discrimination. Therefore, we are even more disturbed that intolerance and discrimination are encouraged by and rooted in the laws of Northern Ireland. Any society purporting to be democratic must ensure equal protection and equal rights under the law.

The right of all citizens to vote in elections at all levels of government and the guarantee that the vote of each citizen weighs equally is essential in a free society.

The opportunity to seek and obtain employment and housing without regard to religion, race, creed or national origin must be guaranteed, if the cause of human dignity is to be advanced by this generation, as the cause of freedom was advanced by our common forefathers.

Whenever injustice exists, free men everywhere are required by conscience to speak. Thus it is, viewing the oppression of the Catholic minority in North Ireland, we request you to express, through our State Department, to Prime Minister James Chichester-Clark of North Ireland and Prime Minister Harold Wilson of Great Britain, our grave concern. We hope that you will make known this concern to the peoples and Governments of Ireland, Northern Ireland and Great Britain, and also make known our fervent hope and pledge of friendship and support in solving this problem which is the concern of every man who cherishes liberty and justice.

We hope these expressions will urge responsible men on all sides to remove the blinds of hate, to put aside the smoldering memory of past offenses and to bind the wounds of recent conflict. We hope for the sake of all the people of Northern Ireland that these changes occur soon, for no Nation can remain free when any of its people are oppressed.

As we strive to strengthen the common bond that unites all members of our society, we urge the people and Government of Northern Ireland to do the same. It is only in such a climate of shared humanity that concern for historic differences can give way to concern for the real and pressing problems of today.

Sincerely,

THOMAS P. O'NEILL, JR., PHILLIP BURTON, JOHN W. MCCORMACK, Speaker of the House; THOMAS E. MORGAN, WILLIAM S. MAILLIARD, JOHN E. MOSS, GEORGE BROWN, JR., DON EDWARDS, AUGUSTUS HAWKINS, FRANK E. EVANS, WILLIAM L. ST. ONGE, EMILIO Q. DADDARIO, DANTE B. FASCELL, PATSY MINK, ABNER J. MIKVA, WILLIAM T. MURPHY, MELVIN PRICE, DANIEL J. RONAN, JOHN BRADEMAS, EDWARD P. BOLAND, JAMES A. Members of Congress.

Mr. O'NEILL of Massachusetts. I want to thank the gentleman from California for the work he has done in regard to this matter.

SUPREME COURT DECISION ON ADAM CLAYTON POWELL, JR.

(Mr. ROGERS of Colorado asked and was given permission to address the House for 1 minute and to include extraneous matter.)

Mr. ROGERS of Colorado. Mr. Speaker, the Supreme Court of the United States in case No. 138, October term, 1968, handed down a decision on June 16, 1969, in the case of ADAM CLAYTON POWELL, JR., and others, petitioners, against JOHN W. MCCORMACK and others.

I believe this to be a historic decision and I ask unanimous consent that the decision be printed in the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Supreme Court decision follows:

[Supreme Court of the United States—No. 138, October term, 1968]

ADAM CLAYTON POWELL, JR., ET AL., PETITIONERS, v. JOHN W. McCORMACK ET AL.

(On writ of certiorari to the United States Court of Appeals for the District of Columbia Circuit, June 16, 1969)

MR. CHIEF JUSTICE WARREN delivered the opinion of the Court.

In November 1966, Petitioner Adam Clayton Powell, Jr., was duly elected from the 18th Congressional District of New York to serve in the United States House of Representatives for the 90th Congress. However, pursuant to a House resolution, he was not permitted to take his seat. Powell (and some of the voters of his district) then filed suit in Federal District Court, claiming that the House could exclude him only if it found he failed to meet the standing requirements of age, citizenship, and residence contained in Art. I, § 2, of the Constitution—requirements the House specifically found Powell met—and thus had excluded him unconstitutionally. The District Court dismissed petitioners' complaint "for want of jurisdiction of the subject matter." The Court of Appeals affirmed the dismissal, although on somewhat different grounds, each judge filing a separate opinion. We have determined that it was error to dismiss the complaint and that Petitioner Powell is entitled to a declaratory judgment that he was unlawfully excluded from the 90th Congress.

I. FACTS

During the 89th Congress, a Special Subcommittee on Contracts of the Committee on House Administration conducted an investigation into the expenditures of the Committee on Education and Labor, of which Petitioner Adam Clayton Powell, Jr., was chairman. The Special Subcommittee issued a report concluding that Powell and certain staff employees had deceived the House authorities as to travel expenses. The report also indicated there was strong evidence that certain illegal salary payments had been made to Powell's wife at his direction. See H.R. Rep. No. 2349, 89th Cong., 2d Sess., 6–7 (1966). No formal action was taken during the 89th Congress. However, prior to the organization of the 90th Congress, the Democrat members-elect met in caucas and voted to remove Powell as chairman of the Committee on Education and Labor. See H.R. Rep. No. 27, 90th Cong., 1st Sess., 1–2 (1967).

When the 90th Congress met to organize in January 1967, Powell was asked to step aside while the oath was administered to the other members-elect. Following the administration of the oath to the remaining members, the House discussed the procedure to be followed in determining whether Powell was eligible to take his seat. After some debate, by a vote of 364 to 64 the House adopted House Resolution 1, which provided that the Speaker appoint a Select Committee to determine Powell's eligibility. 113 Cong. Rec. 16 (daily ed. Jan. 10, 1967). Although the resolution prohibited Powell from taking his seat until the House acted on the Select Committee's report, it did provide that he should receive all the pay and allowances due a member during the period.

The Select Committee, composed of nine lawyer-members, issued an invitation to Powell to testify before the Committee. The invitation letter stated that the scope of the testimony and investigation would include Powell's qualifications as to age, citizenship, and residency; his involvement in a civil suit (in which he had been held in contempt); and "[m]atters of . . . alleged official misconduct since January 3, 1961." See Hearings on H. R. Res. No. 1 before Select Committee Pursuant to H. R. Res. No. 1, 90th Cong., 1st Sess., 5 (1967) (hereinafter Hearings). Powell appeared at the Committee hearing held on February 8, 1967. After the Committee denied in part Powell's request that certain adversary-type procedures be followed,[1] Powell testified. He would, however, give information relating only to his age, citizenship, and residency; upon the advice of counsel, he refused to answer other questions.

On February 10, 1967, the Select Committee issued another invitation to Powell. In the letter, the Select Committee informed Powell that its responsibility under the House Resolution extended to determining not only whether he met the standing qualifications of Art. I, § 2, but also to "inquire into the question of whether you should be punished or expelled pursuant to the powers granted . . . the House under article I, section 5, . . . of the Constitution. In other words, the Select Committee is of the opinion that at the conclusion of the present inquiry, it has authority to report back to the House recommendations with respect to . . . seating, expulsion or other punishment." See Hearings 110. Powell did not appear at the next hearing, held February 14, 1967. However, his attorney was present, and he informed the Committee that Powell would not testify about matters other than his eligibility under the standing qualifications of Art. I, § 2. Powell's attorney reasserted Powell's contention that the standing qualifications were the exclusive requirements for membership, and he further urged that punishment or expulsion was not possible until a member had been seated. See Hearings 111–113.

The Committee held one further hearing at which neither Powell nor his attorneys were present. Then, on February 23, 1967, the Committee issued its report, finding that Powell met the standing qualifications of Art. I, § 2. H.R. Rep. No. 27, 90th Cong., 1st Sess., 31 (1967). However, the Committee further reported that Powell had asserted an unwarranted privilege and immunity from the processes of the courts of New York; that he had wrongfully diverted House funds for the use of others and himself; and that he had made false reports on expenditures of foreign currency to the Committee on House Administration. *Id.*, at 31–32. The Committee recommended that Powell be sworn and seated as a member of the 90th Congress but that he be censured by the House, fined $40,000 and be deprived of his seniority. *Id.*, at 33.

The report was presented to the House on March 1, 1967, and the House debated the Select Committee's proposed resolution. At the conclusion of the debate, by a vote of 222 to 202 the House rejected a motion to bring the resolution to a vote. An amendment to the resolution was then offered; it called for the exclusion of Powell and a declaration that his seat was vacant. The Speaker ruled that a majority vote of the House would be sufficient to pass the resolution if it were so amended. 113 Cong. Rec. 1942 (daily ed. March 1, 1967). After further debate, the amendment was adopted by a vote of 248 to 176. Then the House adopted by a vote of 307 to 116 House Resolution No. 278 in its amended form, thereby excluding Powell and directing that the Speaker notify the Governor of New York that the seat was vacant.

Powell and 13 voters of the 18th Congressional District of New York subsequently instituted this suit in the United States District Court for the District of Columbia. Five members of the House of Representatives were named as defendants individually and "as representatives of a class of citizens who are presently serving . . . as members of the House of Representatives." John W. McCormack was named in his official capacity as Speaker, and the Clerk of the House of Representatives, the Sergeant-at-Arms and the Doorkeeper were named individually and in their official capacities. The Complaint alleged that House Resolution No. 278 violated the Constitution, specifically Art. I, § 2, cl. 1, because the resolution was inconsistent with the mandate that the members of the House shall be elected by the people of each State, and Art. I, § 2, cl. 2, which, petitioners alleged, sets forth the exclusive qualifications for membership.[2] The Complaint further alleged that the Clerk of the House threatened to refuse to perform the service for Powell to which a duly-elected Congressman is entitled, that the Sergeant-at-Arms refused to pay Powell his salary, and that the Doorkeeper threatened to deny Powell admission to the House Chamber.

Petitioners asked that a three-judge court be convened.[3] Further, they requested the District Court grant a permanent injunction restraining respondents from executing the House Resolution, and enjoining the Speaker from refusing to administer the oath, the Clerk from refusing to perform the duties due a Representative, the Sergeant-at-Arms from refusing to pay Powell his salary and the Doorkeeper from refusing to admit Powell to the Chamber.[4] The complaint also requested a declaratory judgment that Powell's exclusion was unconstitutional.

The District Court granted respondents' motion to dismiss the complaint "for want of jurisdiction of the subject matter." *Powell* v. *McCormack*, 266 F. Supp. 354 (D.C.D.C. 1967).[5] The Court of Appeals for the District of Columbia Circuit affirmed on somewhat different grounds, with each judge filing a separate opinion. *Powell* v. *McCormack*, 129 U.S. App. D.C. 354, 395, F.2d 577 (C.A.D.C. Cir. 1968). We granted certiorari 393 U.S. 949 (1968). While the case was pending on our docket, the 90th Congress officially terminated and the 91st Congress was seated. In November 1968, Powell had again been elected as the representative of the 18th Congressional District of New York, and he was seated by the 91st Congress. The resolution seating Powell also fined him $25,000. See H.R. Res. No. 2, 91st Cong., 1st Sess., 115 Cong. Rec. 21 (daily ed., January 3, 1969). Respondents then filed a suggestion of mootness. We postponed further consideration of this suggestion to a hearing on the merits. 393 U.S. 1060 (1969).

Respondents press upon us a variety of arguments to support the court below; they will be considered in the following order. (1) Events occurring subsequent to the grant of certiorari have rendered this litigation moot. (2) The Speech or Debate Clause of the Constitution, Art. I, § 6, insulates respondents' action from judicial review. (3) The decision to exclude Petitioner Powell is supported by the power granted to the House of Representatives to expel a member. (4) This Court lacks subject matter jurisdiction over petitioners' action. (5) Even if subject matter jurisdiction is present, this litigation is not justifiable either under the general criteria established by this Court or because a political question is involved.

II. MOOTNESS

After certiorari was granted, respondents filed a memorandum suggesting that two events which occurred subsequent to our grant of certiorari require that the case be dismissed as moot. On January 3, 1969, the House of Representatives of the 90th Congress officially terminated, and Petitioner Powell was seated as a member of the 91st Congress. 115 Cong. Rec. 22 (daily ed., January 3, 1969). Respondents insist that the gravamen of petitioners' complaint was the failure of the 90th Congress to seat Petitioner Powell and that, since the House of Representatives is not a continuing body[6] and Powell has now been seated, his claims are moot. Petitioners counter that three issues remain unresolved and thus this litiga-

Footnotes at end of article.

tion presents a "case or controversy" within the meaning of Art. III: [7] (1) whether Powell was unconstitutionally deprived of his seniority by his exclusion from the 90th Congress; (2) whether the resolution of the 91st Congress imposing as "punishment" a $25,000 fine is a continuation of respondents' allegedly unconstitutional exclusion, see H.R. Res. No. 2, 91st Cong., 1st Sess., 115 Cong., Rec. 21 (daily ed., January 3, 1969); and (3) whether Powell is entitled to salary withheld after his exclusion from the 90th Congress. We conclude that Powell's claim for back salary remains viable even though he has been seated in the 91st Congress and thus find it unnecessary to determine whether the other issues have become moot.[8]

Simply stated, a case is moot when the issues presented are no longer "live" or the parties lack a legally cognizable interest in the outcome. See E. Borchard, Declaratory Judgments 35–37 (2d ed. 1941). Where one of the several issues presented becomes moot, the remaining live issues supply the constitutional requirement of a case or controversy. See *United Public Workers* v. *Mitchell*, 330 U.S. 75, 86–94 (1947); 6A, J. Moore, Federal Practice ¶ 57.13 (2d ed. 1966). Despite Powell's obvious and continuing interest in his withheld salary, respondents insist that *Alejandrino* v. *Quezon*, 271 U.S. 528 (1926), leaves us no choice but to dismiss this litigation as moot. Alejandrino, a duly appointed Senator of the Philippine Islands, was suspended for one year by a resolution of the Philippine Senate and deprived of all "prerogatives, privileges and emoluments" for the period of his suspension. The Supreme Court of the Philippines refused to enjoin the suspension. By the time the case reached this Court, the suspension had expired and the Court dismissed as moot Alejandrino's request that the suspension be enjoined. Then, *sua sponte*,[9] the Court considered whether the possibility that Alejandrino was entitled to back salary required it "to retain the case for the purpose of determining whether he [Alejandrino] may not have a mandamus for this purpose." *Id.*, at 533. Characterizing the issue of Alejandrino's salary as a "mere incident" to claim that the suspension was improper, the Court noted that he had not briefed the salary issue and that his request for mandamus did not set out with sufficient clarity the official or set of officials against whom the mandamus should issue. *Id.*, at 533–534. The Court therefore refused to treat the salary claim and dismissed the entire action as moot.

Respondents believe that Powell's salary claim is also a "mere incident" to his insistence that he was unconstitutionally excluded so that we should likewise dismiss this entire action as moot. This argument fails to grasp that the reason for the dismissal in *Alejandrino* was not that Alejandrino's deprivation of salary was insufficiently substantial to prevent the case from becoming moot, but rather that his failure to plead sufficient facts to establish his mandamus claim made it impossible for any court to resolve the mandamus request.[10] By contrast, petitioners' complaint names the official responsible for the payment of congressional salaries and asks for both mandamus and an injunction against that official.[11]

Furthermore, even if respondents are correct that Powell's averments as to injunctive relief are not sufficiently definite, it does not follow that this litigation must be dismissed as moot. Petitioner Powell has not been paid his salary by virtue of an allegedly unconstitutional House resolution. That claim is still unresolved and hotly contested by clearly adverse parties. Declaratory relief has been requested, a form of relief not available when *Alejandrino* was decided.[12] A court may grant declaratory relief even though it chooses not to issue an injunction or mandamus. See *United Public Workers* v. *Mitchell*, supra, at 93; cf. *United States* v. *California*, 332 U.S. 19, 25–26 (1947). A declaratory judgment can then be used as a predicate to further relief, including an injunction. 28 U.S.C. § 2202 (1964 ed.); see *Vermont Structural Slate Co.* v. *Tatko Brothers Slate Co.*, 253 F. 2d 29 (C. A. 2d Cir. 1958); *United States Lines Co.* v. *Shaughnessy*, 195 F. 2d 385 (C. A. 2d Cir. 1952). *Alejandrino* stands only for the proposition that, where one claim has become moot and the pleadings are insufficient to determine whether the plaintiff is entitled to another remedy, the action should be dismissed as moot.[13] There is no suggestion that Powell's averments as to declaratory relief are insufficient and his allegedly unconstitutional deprivation of salary remains unresolved.

Respondents further argue that Powell's "wholly incidental and subordinate" demand for salary is insufficient to prevent this litigation from becoming moot. They suggest that the "primary and principal relief" sought was the seating of Petitioner Powell in the 90th Congress rendering his presumably secondary claims not worthy of judicial consideration. *Bond* v. *Floyd*, 385 U.S. 116 (1966), rejects respondents' theory that the mootness of a "primary" claim requires a conclusion that all "secondary" claims are moot. At the *Bond* oral argument it was suggested that the expiration of the session of the Georgia Legislature which excluded Bond had rendered the case moot. We replied: "The State has not pressed this argument, and it could not do so, because the State has stipulated that if Bond succeeds on his appeal he will receive back salary for the term from which he was excluded." 385 U.S., at 128, n. 4. *Bond* is not controlling, argue respondents, because the legislative term from which Bond was excluded did not end until December 31, 1966,[14] and our decision was rendered December 5; further, when *Bond* was decided, Bond had not as yet been seated while Powell has been.[15] Respondents do not tell us, however, why these factual distinctions create a legally significant difference between *Bond* and this case. We relied in *Bond* on the outstanding salary claim not the facts respondents stress to hold that the case was not moot.

Finally, respondents seem to argue that Powell's proper action to recover salary is a suit in the Court of Claims, so that, having brought the wrong action, a dismissal for mootness is appropriate. The short answer to this argument is that it confuses mootness with whether Powell has established a right to recover against the Sergeant-at-Arms, a question which is inappropriate to treat at this stage of the litigation.[16]

III. SPEECH OR DEBATE CLAUSE

Respondents assert that the Speech or Debate Clause of the Constitution, Art. I, § 6,[17] is an absolute bar to petitioner's action. This Court has on four prior occasions—*Dombrowski* v. *Eastland*, 387 U.S. 82 (1967); *United States* v. *Johnson*, 383 U.S. 169 (1966); *Tenney* v. *Brandhove*, 341 U.S. 367 (1951); and *Kilbourn* v. *Thompson*, 103 U.S. 168 (1880)—been called upon to determine if allegedly unconstitutional action taken by legislators or legislative employees is insulated from judicial review by the Speech or Debate Clause. Both parties insist that their respective positions find support in these cases and tender for decision three distinct issues: (1) whether respondents in participating in the exclusion of Petitioner Powell were "acting in the sphere of legitimate legislative activity," *Tenney* v. *Brandhove*, *supra*, at 376; (2) assuming that respondents were so acting, does the fact that petitioners seek neither damages from any of the respondents nor a criminal prosecution lift the bar of the clause; [18] and (3) even if this action may not be maintained against a Congressman, may those respondents who are merely employees of the House plead the bar of the clause. We find it necessary to treat only the last of these issues.

The Speech of Debate Clause, adopted by the Constitutional Convention without debate or opposition,[19] finds its roots in the conflict between Parliament and the Crown culminating in the Glorious Revolution of 1688 and the English Bill of Rights of 1689.[20] Drawing upon this history, we concluded in *United States* v. *Johnson*, *supra*, at 181, that the purpose of this clause was "to prevent intimidation [of legislators] by the executive and accountability before a possibly hostile judiciary." Although the clause sprung from a fear of seditious libel actions instituted by Crown to punish unfavorable speeches made in Parliament,[21] we have held that it would be a "narrow view" to confine the protection of the Speech or Debate Clause to words spoken in debate. Committee reports, resolutions, and the act of voting are equally covered, as are "things generally done in a session of the House by one of its members in relation to the business before it." *Kilbourn* v. *Thompson*, *supra*, at 204. Furthermore, the clause provides not only a defense on the merits but also protects a legislator from the burden of defending himself. *Dombrowski* v. *Eastland*, *supra*, at 85; see *Tenney* v. *Brandhove*, *supra*, at 377.

Our cases make it clear that the legislative immunity created by the Speech or Debate Clause performs an important function in representative government. It insures that legislators are free to represent the interests of their constituents without fear that they will be later called to task in the courts for that representation. Thus, in *Tenney* v. *Brandhove*, *supra*, at 373, the Court quoted the writings of James Wilson as illuminating the reason for legislative immunity: "In order to enable and encourage a representative of the publick to discharge his publick trust with firmness and success, it is indispensably necessary, that he should enjoy the fullest liberty of speech, and that he should be protected from the resentment of every one, however powerful, to whom the exercise of the liberty may occasion offense." [22]

Legislative immunity does not, of course, bar all judicial review of legislative acts. That issue was settled by implication as early as 1803, see *Marbury* v. *Madison*, 1 Cranch 137, and expressly in *Kilbourn* v. *Thompson*, the first of this Court's cases interpreting the reach of the Speech or Debate Clause. Challenged in *Kilbourn* was the constitutionality of a House resolution ordering the arrest and imprisonment of a recalcitrant witness who had refused to respond to a subpoena issued by a House investigating committee. While holding that the Speech or Debate Clause barred Kilbourn's action for false imprisonment brought against several members of the House, the Court nevertheless reached the merits of Kilbourn's attack and decided that, since the House had no power to punish for contempt, Kilbourn's imprisonment pursuant to the resolution was unconstitutional. It therefore allowed Kilbourn to bring his false imprisonment action against Thompson, the House's Sergeant-at-Arms, who had executed the warrant for Kilbourn's arrest.

The Court first articulated in *Kilbourn* and followed in *Dombrowski* v. *Eastland* [23] the doctrine that, although an action against a Congressman may be barred by the Speech or Debate Clause, legislative employees who participated in the unconstitutional activity are responsible for their acts. Despite the fact that petitioners brought this suit against several House employees—the Sergeant-at-Arms, the Doorkeeper and the Clerk—as well as several Congressmen, respondents argue that *Kilbourn* and *Dombrowski* are distinguishable. Conceding that in *Kilbourn* the presence of the Sergeant-at-Arms and in *Dombrowski* the presence of a congressional subcommittee counsel as defendants in the

Footnotes at end of article.

litigation allowed judicial review of the challenged congressional action, respondents urge that both cases concerned an affirmative act performed by the employee outside the House having a direct effect upon a private citizen. Here, they continue, the relief sought relates to actions taken by House agents solely within the House. Alternatively, respondents insist that Kilbourn and Dombrowski prayed for damages while Petitioner Powell asks that the Sergeant-at-Arms disburse funds, an assertedly greater interference with the legislative process. We reject the proffered distinctions.

That House employees are acting pursuant to express orders of the House does not bar judicial review of the constitutionality of the underlying legislative decision. *Kilbourn* decisively settles this question, since the Sergeant-at-Arms was held liable for false imprisonment even though he did nothing more than execute the House resolution that Kilbourn be arrested and imprisoned.[24] Respondents' suggestions thus ask us to distinguish between affirmative acts of House employees and situations in which the House orders its employees not to act or between actions for damages and claims for salary. We can find no basis in either the history of the Speech or Debate Clause or our cases for either distinction. The purpose of the protection afforded legislators is not to forestall judicial review of legislative action but to insure that legislators are not distracted from or hindered in the performance of their legislative tasks by being called into court to defend their actions. A legislator is no more or no less hindered or distracted by litigation against a legislative employee calling into question the employee's affirmative action than he would be by a lawsuit questioning the employee's failure to act. Nor is the distraction or hinderance increased because the claim is for salary rather than damages, or because the litigation questions action taken by the employee within rather than without the House. Freedom of legislative activity and the purposes of the Speech or Debate Clause are fully protected if legislators are relieved of the burden of defending themselves.[25] In *Kilbourn* and *Dombrowski* we thus dismissed the action against members of Congress but did not regard the Speech or Debate Clause as a bar to reviewing the merits of the challenged congressional action since congressional employees were also sued. Similarly, this action may be dismissed against the Congressmen since petitioners are entitled to maintain their action against House employees and to judicial review of the propriety of the decision to exclude Petitioner Powell.[26] As was said in *Kilbourn*, in language which time has not dimmed:

"Especially is it competent and proper for this court to consider whether its [the legislature's] proceedings are in conformity with the Constitution and laws, because, living under a written constitution, no branch or department of the government is supreme; and it is the province and duty of the judicial department to determine in cases regularly brought before them, whether the powers of any branch of the government, and even those of the legislature in the enactment of laws, have been exercised in conformity to the Constitution; and if they have not, to treat, their acts as null and void." 103 U.S., at 199.

IV. EXCLUSION OR EXPULSION

The resolution excluding Petitioner Powell was adopted by a vote in excess of two-thirds of the 434 Members of Congress—307 to 116. 113 Cong. Res. 1956–1957 (daily ed. March 1, 1967). Article I, § 5, grants the House authority to expel a member "with the Concurrence of two thirds."[27] Respondents assert that the House may expel a member for any reason whatsoever and that, since a two-thirds vote was obtained, the procedure by which Powell was denied his seat in the 90th Congress should be regarded as an expulsion not an exclusion. Cautioning us not to exalt form over substance, respondents quote from the concurring opinion of Judge McGowan in the court below:

"Appellant Powell's cause of action for a judicially compelled seating thus boils down, in my view, to the narrow issue of whether a member found by his colleagues . . . to have engaged in official misconduct must, because of the accidents of timing, be formally admitted before he can be either investigated or expelled. The sponsor of the motion to exclude stated on the floor that he was proceeding on the theory that the power to expel included the power to exclude, provided a ⅔ vote was forthcoming. It was. Therefore, success for Mr. Powell on the merits would mean that the District Court must admonish the House that it is form, not substance, that should govern in great affairs, and accordingly command the House members to act out a charade." 129 U.S. App. D.C., at 383–384, 395 F. 2d, at 606–607.

Although respondents repeatedly urge this Court not to speculate as to the reasons for Powell's exclusion, their attempt to equate exclusion with expulsion would require a similar speculation that the House would have voted to expel Powell had it been faced with that question. Powell had not been seated at the time House Resolution 278 was debated and passed. After a motion to bring the Select Committee's proposed resolution to an immediate vote had been defeated, an amendemnt was offered which mandated Powell's exclusion.[28] Mr. Celler, Chairman of the Select Committee, then posed a parliamentary inquiry to determine whether a two-thirds vote was necessary to pass the resolution if so amended "in the sense that it might amount to an expulsion." 113 Cong. Rec. 1942 (daily ed., March 1, 1967). The Speaker replied that "action by a majority vote would be in accordance with the rules." *Ibid.* Had the amendment been regarded as an attempt to expel Powell, a two-thirds vote would have been constitutionally required. The Speaker ruled that the House was voting to exclude Powell, and we will not speculate what the result might have been if Powell had been seated and expulsion proceedings subsequently instituted.

Nor is the distinction between exclusion and expulsion merely one of form. The misconduct for which Powell was charged occurred prior to the convening of the 90th Congress. On several occasions the House has debated whether a member can be expelled for actions taken during a prior Congress and the House's own manual of procedure applicable in the 90th Congress states that "both Houses have distrusted their power to punish in such cases." Rules of the House of Representatives, H. R. Doc. No. 529, 89th Cong., 2d Sess., 25 (1967); see G. Galloway, History of the House of Representatives 32 (1961). The House rules manual reflects positions taken by prior Congresses. For example, the report of the Select Committee appointed to consider the expulsion of John W. Langley states unequivocally that the House will not expel a member for misconduct committed during an earlier Congress.

"[I]t must be said that with practical uniformity the precedents in such cases are to the effect that the House will not expel a Member for reprehensible action prior to his election as a Member, not even for conviction for an offense. On May 23, 1884, Speaker Carlisle decided that the House had no right to punish a Member for any offense alleged to have been committed previous to the time when he was elected a Member, and added, 'That has been so frequently decided in the House that it is no longer a matter of dispute.'" H. R. Rep. No. 30, 69th Cong., 1st Sess., 1–2 (1925).[29]

Members of the House having expressed a belief that such strictures apply to its own power to expel, we will not assume that two-thirds of its members would have expelled Powell for his prior conduct had the Speaker announced that House Resolution 278 was for expulsion rather than exclusion.[30]

Finally, the proceedings which culminated in Powell's exclusion cast considerable doubt upon respondent's assumption that the two-thirds vote necessary to expel would have been mustered. These proceedings have been succinctly described by Congressman Eckhardt.

"The House voted 202 votes for the previous question[31] leading toward the adoption of the [Select] Committee report. It voted 222 votes against the previous question, opening the floor for the Curtis Amendment which ultimately excluded Powell.

"Upon adoption of the Curtis Amendment, the vote again fell short of two-thirds, being 248 yeas to 176 nays. Only on the final vote, adopting the Resolution as amended, was more than a two-thirds vote obtained, the vote being 307 yeas to 116 nays. On this last vote, as a practical matter, members who would not have denied Powell a seat if they were given the choice to punish him had to cast an aye vote or else record themselves as opposed to the only punishment that was likely to come before the House. Had the matter come up through the processes of expulsion, it appears that the two-thirds vote would have failed, and then members would have been able to apply a lesser penalty."[32]

We need express no opinion as to the accuracy of Congressman Eckhardt's prediction that expulsion proceedings would have produced a different result. However, the House's own views of the extent of its power to expel combined with the Congressman's analysis counsel that exclusion and expulsion are not fungible proceedings. The Speaker ruled that House Resolution 278 contemplated an exclusion proceeding. We must decline respondents' suggestion that we overrule the Speaker and hold that, although the House manifested an intent to exclude Powell, its action should be tested by whatever standards may govern an expulsion.

V. SUBJECT MATTER JURISDICTION

As we pointed out in *Baker* v. *Carr*, 369 U.S. 186, 198 (1962), there is a significant difference between determining whether a federal court has "jurisdiction over the subject matter" and determining whether a cause over which a court has subject matter jurisdiction is "justiciable." The District Court determined that "to decide this case on the merits . . . would constitute a clear violation of the doctrine of separation of powers" and then dismissed the complaint "for want of jurisdiction of the subject matter." *Powell* v. *McCormack*, 266 F. Supp. 354, 359, 360 (D. C. D. C. 1967). However, as the Court of Appeals correctly recognized, the doctrine of separation of powers is more properly considered in determining whether the case is "justiciable." We agree with the unanimous conclusion of the Court of Appeals that the District Court has jurisdiction over the subject matter of this case.[33] However, for reasons set forth in Part VI, *infra*, we disagree with the Court of Appeals' conclusion that this case is not justiciable.

In *Baker* v. *Carr*, *supra*, we noted that a federal district court lacks jurisdiction over the subject matter (1) if the cause does not "arise under" the Federal Constitution, laws or treaties (or fall within one of the other enumerated categories of Article III); or (2) if it is not a "case or controversy" within the meaning of that phrase in Article III; or (3) if the cause is not one described by any jurisdictional statute. And, as in *Baker* v. *Carr*, *supra*, our determination (see Part VI, § B (1) *infra*) that this cause presents

Footnotes at end of article.

no nonjusticiable "political question" disposes of respondents' contentions [34] that this cause is not a "case or controversy." [35]

Respondents first contend that this is not a case "arising under" the Constitution within the meaning of Article III. They emphasize that Art. I, § 5, assigns to each house of Congress the power to judge the elections and qualifications of its own members and to punish its members for disorderly behavior. Respondents also note that under Art. I, § 3, the Senate has the "sole power" to try all impeachments. Respondents argue that these delegations (to "judge," to "punish," and to "try") to the Legislative Branch are explicit grants of "judicial power" to the Congress and constitute specific exceptions to the general mandate of Article III that the "judicial power" shall be vested in the federal courts. Thus, respondents maintain, the "power conferred on the courts by article III does not authorize this Court to do anything more than declare its lack of jurisdiction to proceed." [36]

We reject this contention. Article III, § 1, provides the "judicial Power . . . shall be vested in one Supreme Court, and in such inferior Courts as the Congress may . . . establish." Further, § 2 mandates that the "judicial Power shall extend to all Cases . . . arising under this Constitution. . . ." It has long been held that a suit "arises under" the Constitution if petitioners' claims "will be sustained if the Constitution . . . [is] given one construction and will be defeated if it [is] given another." [37] *Bell* v. *Hood*, 327 U.S. 678, 685 (1946). See *King County* v. *Seattle School District No. 1*, 263 U.S. 361, 363–364 (1923). Cf. *Osborn* v. *Bank of the United States*, 22 U.S. (9 Wheat.). 738 (1824). See generally, C. Wright, Federal Courts 48–52 (1963). Thus, this case clearly is one "arising under" the Constitution as the Court has interpreted that phrase. Any bar to federal courts reviewing the judgments made by the House or Senate in excluding a member arises from the allocation of powers between the two branches of the Federal Government (a question of justiciability), and not from the petitioners' failure to state a claim based on federal law.

Respondents next contend that the Court of Appeals erred in ruling that petitioners' suit is "authorized by a jurisdictional statute," *i.e.*, 28 U.S.C. §1331(a) (1964 ed.). Section 1331 (a) provides that district courts shall have jurisdiction in "all civil actions wherein the matter in controversy . . . arises under the Constitution . . . ." Respondents urge that even though a case may "arise under the Constitution" for purposes of Article III, it does not necessarily "arise under the Constitution" for purposes of § 1331 (a). Although they recognize there is little legislative history concerning the enactment of § 1331 (a), respondents argue that the history of the period when the section was first enacted indicates that the drafters did not intend to include suits questioning the exclusion of Congressmen in this grant of "federal question" jurisdiction.

Respondents claim that the passage of the Force Act [38] in 1870 lends support to their interpretation of the intended scope of § 1331. The Force Act gives the district courts jurisdiction over "any civil action to recover possession of any office . . . wherein it appears the sole question . . . arises out of the denial of the right to vote . . . on account of race, color, or previous condition of servitude." However, the Act specifically excludes suits concerning the office of Congressman. Respondents maintain that this exclusion demonstrates Congress' intention to prohibit federal courts from entertaining suits regarding the seating of Congressmen.

We have noted that the grant of jurisdiction in § 1331(a), while made in the language used in Article III, is not in all respects coextensive with the potential for federal jurisdiction found in Article III. See *Zwickler* v. *Koota*, 389 U.S. 241, 246, n. 8 (1967). Nevertheless, it has generally been recognized that the intent of the drafters was to provide a broad jurisdictional grant to the federal courts. See, *e.g.*, P. Mishkin, The Federal "Question" in the District Courts, 53 Col. L. Rev. 157, 160 (1953); J. Chadbourn and A. Levin, Original Jurisdiction of Federal Questions, 90 U. Pa. L. Rev. 639, 644–645 (1942). And, as noted above, the resolution of this case depends directly on construction of the Constitution. The Court has consistently held such suits are authorized by the statute. *Bell* v. *Hood*, *supra*; *King County* v. *Seattle School District No. 1*, *supra*. See, *e.g.*, *Gully* v. *First Nat'l Bank in Meridian*, 299 U.S. 109, 112 (1936); *The Fair* v. *Kohler Die & Specialty Co.*, 288 U.S. 22, 25 (1913).

As respondents recognize, there is nothing in the wording or legislative history of § 1331 or in the decisions of this Court which would indicate that there is any basis for the interpretation they would give that section. Nor do we think the passage of the Force Act indicates that § 1331 does not confer jurisdiction in this case. The Force Act is limited to election challenges where a denial of the right to vote in violation of the Fifteenth Amendment is alleged. See 28 U.S.C. § 1344 (1964 ed.). Further, the Act was passed five years before the original version of § 1331 was enacted. While it might be inferred that Congress intended to give each House the exclusive power to decide congressional election challenges,[39] there is absolutely no indication that the passage of this Act evidences an intention to impose other restrictions on the broad grant of jurisdiction in § 1331.

VI. JUSTICIABILITY

Having concluded that the Court of Appeals correctly ruled that the District Court had jurisdiction over the subject matter, we turn to the question whether the case is justiciable. Two determinations must be made in this regard. First, we must decide whether the claim presented and the relief sought are of the type which admit of judicial resolution. Second, we must determine whether the structure of the Federal Government renders the issue presented a "political question"—that is, a question which is not justiciable in federal court because of the separation of powers provided by the Constitution.

A. General considerations

In deciding generally whether a claim is justiciable, a court must determine whether "the duty asserted can be judicially identified and its breach judicially determined, and whether protection for the right asserted can be judicially molded." *Baker* v. *Carr*, *supra*, at 198. Respondents do not seriously contend that the duty asserted and its alleged breach cannot be judicially determined. If petitioners are correct, the House had a duty to seat Powell once it determined he met the standing requirements set forth in the Constitution. It is undisputed that he met those requirements and that he was nevertheless excluded.

Respondents do maintain, however, that this case not justiciable because, they assert, it is impossible for a federal court to "mold effective relief for resolving this case." Respondents emphasize that petitioners asked for coercive relief against the officers of the House, and, they contend, federal courts cannot issue mandamus or injunctions compelling officers or employes of the House to perform specific official acts. Respondents rely primarily on the Speech or Debate Clause to support this contention.

We need express no opinion about the appropriateness of coercive relief in this case, for petitioners sought a declaratory judgment, a form of relief the District Court could have issued. The Declaratory Judgment Act, 28 U. S. C. § 2201 (1964 ed.), provides that a district court may "declare the rights . . . of any interested party . . . whether or not further relief is or could be sought." The availability of declaratory relief depends on whether there is a live dispute between the parties, *Golden* v. *Zwickler*, 394 U. S. 103 (1969), and a request for a declaratory relief may be considered independently of whether other forms of relief are appropriate. See *United Public Workers* v. *Mitchell*, 330 U. S. 75, 93 (1947); 6A J. Moore, Federal Practice ¶ 57.08(3) (2d ed., 1966); cf. *United States* v. *California*, 332 U. S. 19, 25–26 (1947). We thus conclude that in terms of the general criteria of justiciability, this case is justiciable.

B. Political question doctrine

Textually Demonstrable Constitutional Commitment

Respondents maintain that even if this case is otherwise justiciable, it presents only a political question. It is well-established that the federal courts will not adjudicate political questions. See, *e.g.*, *Coleman* v. *Miller*, 307 U. S. 433 (1939); *Oetjen* v. *Central Leather Co.*, 246 U. S. 297 (1918). In *Baker* v. *Carr*, *supra*, we noted that political questions are not justiciable primarily because of the separation of powers within the Federal Government. After reviewing our decisions in this area, we concluded that on the surface of any case held to involve a political question was a least one of the following formulations:

"A textually demonstrable constitutional commitment of the issue to a co-ordinate political department; or a lack of judicially discoverable and manageable standards for resolving it; or the impossibility of deciding without an initial policy determinaton of a kind clearly for nonjudicial discretion; or the impossibility of a court's undertaking independent resolution without expressing lack of the respect due coordinate branches of government; or an unusual need for unquestioning adherence to a political decision already made; or the potentiality of embarrassment from multifarious pronouncements by various departments on one question." *Id.*, at 217.

Respondents' first contention is that this case presents a political question because under Art. I, § 5, there has been a "textually demonstrable constitutional commitment" to the House of the "adjudicatory power" to determine Powell's qualifications. Thus it is argued that the House, and the House alone, has power to determine who is qualified to be a member.[40]

In order to determine whether there has been a textual commitment to a co-ordinate department of the Government, we must interpret the Constitution. In other words, we must first determine what power the Constitution confers upon the House through Art. I, § 5, before we can determine to what extent, if any, the exercise of that power is subject to judicial review. Respondents maintain that the House has broad power under § 5, and, they argue, the House may determine which are the qualifications necessary for membership. On the other hand, petitioners allege that the Constitution provides that an elected representative may be denied his seat only if the House finds he does not meet one of the standing qualifications expressly prescribed by the Constitution.

If examination of § 5 disclosed that the Constitution gives the House judicially unreviewable power to set qualifications for membership and to judge whether prospective members meet those qualifications, further review of the House determination might well be barred by the political question doctrine. On the other hand, if the Constitution gives the House power to judge only whether elected members possess the three standing qualifications set forth in the Constitution,[41] further consideration would be necessary to determine whether

---

Footnotes at end of article.

any of the other formulations of the political question doctrine are "inextricable from the case at bar." [42] *Baker* v. *Carr*, *supra*, at 217.

In other words, whether there is a "textually demonstrable constitutional commitment of the issue to a coordinate political department of government" and what is the scope of such commitment are questions we must resolve for the first time in this case.[43] For, as we pointed out in *Baker* v. *Carr*, *supra*, "[d]eciding whether a matter has in any measure been committed by the Constitution to another branch of government, or whether the action of that branch exceeds whatever authority has been committed, is itself a delicate exercise in constitutional interpretation and is the responsibility of this Court as ultimate interpreter of the Constitution." *Id.*, at 211.

In order to determine the scope of any "textual commitment" under Art. I, § 5, we necessarily must determine the meaning of the phrase to "judge the qualifications of its members." Petitioners argue that the records of the debates during the Constitutional Convention, available commentary from the post-Convention, pre-ratification period, and early congressional applications of Art. I, § 5, support their construction of the section. Respondents insist, however, that a careful examination of the pre-Convention practices of the English Parliament and American colonial assemblies demonstrates that by 1787, a legislature's power to judge the qualifications of its members was generally understood to encompass exclusion or expulsion on the ground that an individual's character or past conduct rendered him unfit to serve. When the Constitution and the debates over its adoption are thus viewed in historical perspective, argue respondents, it becomes clear that the "qualifications" expressly set forth in the Constitution were not meant to limit the long recognized legislative power to exclude or expel at will, but merely to establish "standing incapacities," which could be altered only by a constitutional amendment. Our examination of the relevant historical materials leads us to the conclusion that petitioners are correct and that the Constitution leaves the House [44] without authority to exclude any person, duly elected by his constituents, who meets all the requirements for membership expressly prescribed in the Constitution.

a. The Pre-Convention Precedents: Since our rejection of respondents' interpretation of § 5 results in significant measure from a disagreement with their historical analysis, we must consider the relevant historical antecedents in considerable detail. As do respondents, we begin with the English and colonial precedents.

The earliest English exclusion precedent appears to be a declaration by the House of Commons in 1553 "that Alex. Nowell, being Prebendary [*i.e.*, a clergyman] in Westminster, and thereby having voice in the Convocation House, cannot be a member of this House . . . ." J. Tanner, Tudor Constitutional Documents: 1485–1603, at 596 (2d ed. 1930). This decision, however, was consistent with a long-established tradition that clergy who participated in their own representative assemblies or convocations were ineligible for membership in the House of Commons.[45] See 1 E. Porritt, The Unreformed House of Commons 125 (1963); Taswell-Langmead's English Constitutional History 142–143 (11th ed. T. Plucknett 1960). The traditional ineligibility of clergymen was recognized as a standing incapacity.[46] See 1 Blackstone's Commentaries *175. Nowell's exclusion, therefore, is irrelevant to the present case, for petitioners concede—and we agree—that if Powell had not met one of the standing qualifications set forth in the Constitution, he could have been excluded under Art. I, § 5. The earliest colonial exclusions also fail to support respondents' theory.[47]

Respondents' remaining 16th and 17th century English precedents all are cases of expulsion, although some were for misdeeds not encompassed within recognized standing incapacities existing either at the time of the expulsions or at the time the Constitution was drafted in 1787.[48] Although these early expulsion orders occasionally contained statements suggesting that the individual expelled was thereafter ineligible for re-election, at least for the duration of the Parliament from which he was expelled,[49] there is no indication that any were re-elected and thereafter excluded. Respondents' colonial precedents during this period follow a similar pattern.[50]

Apparently the re-election of an expelled member first occurred in 1712. The House of Commons had expelled Robert Walpole for receiving kickbacks for contracts relating to "foraging the Troops," 17 H. C. Jour. 28, and committed him to the Tower. Nevertheless, two months later he was re-elected. The House thereupon resolved "[t]hat Robert Walpole, Esquire, having been, this Session of Parliament, committed a Prisoner to the *Tower* of *London*, and expelled [from] this House, . . . is incapable of being elected a Member to serve *in this present Parliament* . . ." *Id.*, at 128. (Emphasis added in part.) A new election was ordered, and Walpole was not re-elected. At least two similar exclusions after an initial expulsion were effected in the American colonies during the first half of the 18th century.[51]

Respondents urge that the Walpole case provides strong support for their conclusion that the pre-Convention English and colonial practice was that members-elect could be excluded for their prior misdeeds at the sole discretion of the legislative body to which they had been elected. However, this conclusion overlooks an important limiting characteristic of the Walpole case and of both the colonial exclusion cases on which respondents rely: the excluded member had been previously expelled. Moreover, Walpole was excluded only for the remainder of the Parliament from which he had been expelled. "The theory seems to have been that expulsion lasted as long as the parliament . . ." Taswell-Langmead's, *supra* at 584, n. 99. Accord, 1 Blackstone's Commentaries *176. Thus, Walpole's exclusion justifies only the proposition that an expulsion lasted for the remainder of the particular Parliament, and the expelled member was therefore subject to subsequent exclusion if reelected prior to the next general election. The two colonial cases arguably support a somewhat broader principle, *i.e.*, that the assembly could permanently expel. Apparently the colonies did not consistently adhere to the theory that an expulsion lasted only until the election of a new asesmbly. M. Clarke, Parliamentary Privilege in the American Colonies 196–202 (1943).[52] Clearly, however, none of these cases supports respondents' contention that by the 18th century the English Parliament and colonial assemblies had assumed absolute discretion to exclude any member-elect they deemed unfit to serve. Rather, they seem to demonstrate that a member could be excluded only if he had first been expelled.

Even if these cases could be construed to support respondents' contention, their precedential value was nullified prior to the Constitutional Convention. By 1782, after a long struggle, the arbitrary exercise of the power to exclude was unequivocally repudiated by a House of Commons resolution which ended the most notorious English election dispute of the 18th century—the John Wilkes case. While serving as a member of Parliament in 1763, Wilkes published an attack on a recent peace treaty with France, calling it a product of bribery and condemning the Crown's ministers as " 'the tools of despotism and corruption.' " R. Postgate, That Devil Wilkes 53 (1929). Wilkes and others who were involved with the publication in which the attack appeared were arrested.[53] Prior to Wilkes' trial, the House of Commons expelled him for publishing "a false, scandalous, and seditious libel." 15 Parl. Hist. Eng. 1393 (1764). Wilkes then fled to France and was subsequently sentenced to exile. 9 L. Gipson, The British Empire Before the American Revolution 37 (1956).

Wilkes returned to England in 1768, the same year in which the Parliament from which he had been expelled was dissolved. He was elected to the next Parliament, and he then surrendered himself to the Court of King's Bench. Wilkes was convicted of seditious libel and sentenced to 22 months' imprisonment. The new Parliament declared him ineligible for membership and ordered that he be "expelled this House." 16 Parl. Hist. Eng. 545 (1769). Although Wilkes was re-elected to fill the vacant seat three times, each time the same Parliament declared him ineligible and refused to seat him. See 11 L. Gipson, *Supra*, at 207–215.[54]

Wilkes was released from prison in 1770 and was again elected to Parliament in 1774. For the next several years, he unsuccessfully campaigned to have the resolutions expelling him and declaring him incapable of reelection expunged from the record. Finally, in 1782, the House of Commons voted to expunge them, resolving that the prior House actions were "subversive of the Rights of the Whole Body of Electors of this Kingdom." 22 Parl. Hist. Eng. 1411 (1782).

With the successful resolution of Wilkes' long and bitter struggle for the right of the British electorate to be represented by men of their own choice, it is evident that, on the eve of the Constitutional Convention, English precedent stood for the proposition that "the law of the land had regulated the qualifications of members to serve in parliament" and those qualifications were "not occasional but fixed." 16 Parl. Hist. Eng. 589, 590 (1769). Certainly English practice did not support, nor had it ever supported, respondents' assertion that the power to judge qualifications was generally understood to encompass the right to exclude members-elect for general misconduct not within standing qualifications. With the repudiation in 1782 of the only two precedents for excluding a member-elect who had been previously expelled,[55] it appears that the House of Commons also repudiated any "control over the eligibility of candidates, except in the administration of the laws which define their [standing] qualifications." May's Parliamentary Practice 66 (13th ed. Webster 1924). See Taswell-Langmead's supra, at 585.[56]

The resolution of the Wilkes case similarly undermined the precedential value of the earlier colonial exclusions, for the principles upon which they had been based were repudiated by the very body the colonial assemblies sought to imitate and whose precedents they generally followed. See M. Clarke, *supra*, at 54, 59–60, 196. Thus, in 1784 the Council of Censors of the Pennsylvania Assembly [57] denounced the prior expulsion of an unnamed assemblyman, ruling that his expulsion had not been effected in conformity with the recently enacted Pennsylvania Constitution.[58] In the course of its report, the Council denounced by name the Parliamentary exclusions of both Walpole and Wilkes, stating that they "reflected dishonor on none but the authors of these violences." Pennsylvania Convention Proceedings: 1776–1790, at 89 (1825).

Wilkes' struggle and his ultimate victory had a significant impact in the American colonies. His advocacy of libertarian causes [59] and his pursuit of the right to be seated in Parliament became a *cause celebre* for the colonists. "[T]he cry of 'Wilkies and Liberty' echoed loudly across the Atlantic Ocean as wide publicity was given to every step of Wilke's public career in the colonial press. . . . The reaction in America took on sig-

Footnotes at end of article.

nificant proportions. Colonials tended to identify their cause with that of Wilkes. They saw him as a popular hero and a martyr to the struggle for liberty. . . . They named towns, counties, and even children in his honour." 11 L. Gipson, *supra*, at 222.[60] It is within this historical context that we must examine the Convention debates in 1787, just five years after Wilkes' final victory.

b. Convention Debates: Relying heavily on Professor Charles Warren's analysis [61] of the Convention debates, petitioners argue that the proceedings manifest the Framers' unequivocal intention to deny either branch of Congress the authority to add to or otherwise vary the membership qualifications expressly set forth in the Constitution. We do not completely agree, for the debates are subject to other interpretations. However, we have concluded that the records of the debates, viewed in the context of the bitter struggle for the right to freely choose representatives which had recently concluded in England and in light of the distinction the Framers made between the power to expel and the power to exclude, indicate that petitioners' ultimate conclusion is correct.

The Convention opened in late May 1787. By the end of July, the delegates adopted, with a minimum of debate, age requirements for membership in both the Senate and the House. The Convention then appointed a Committee of Detail to draft a constitution incorporating these and other resolutions adopted during the preceding months. Two days after the Committee was appointed, George Mason, of Virginia, moved that the Committee consider a clause " 'requiring certain qualifications of landed property & citizenship' " and disqualifying from membership in Congress persons who had unsettled accounts or who were indebted to the United States. 2 The Records of the Federal Convention of 1787, at 121 (M. Farrand rev. ed. 1966) (hereinafter cited as Farrand). A vigorous debate ensued. Charles Pinckney and General Charles C. Pinckney, both of South Carolina, moved to extend these incapacities to both the judicial and executive branches of the new government. But John Dickinson, of Delaware, opposed the inclusion of any statement of qualifications in the Constitution. He argued that it would be "impossible to make a complete one, and a partial one would by implication tie up the hands of the Legislature from supplying the omissions." *Id.*, at 123.[62] Dickinson's argument was rejected; and, after eliminating the disqualification of debtors and the limitation to "landed" property, the Convention adopted Mason's proposal to instruct the Committee of Detail to draft a property qualification. *Id.*, at 116–117.

The Committee reported in early August, proposing no change in the age requirement; however, it did recommend adding citizenship and residency requirements for membership. After first debating what the precise requirements should be, on August 8, 1787, the delegates unanimously adopted the three qualifications embodied in Art I, § 2. *Id.*, at 213.[63]

On August 10, the Convention considered the Committee of Detail's proposal that the "Legislature of the United States shall have the authority to establish such uniform qualifications of the members of each House, with regard to property, as to the said Legislature shall seem expedient." *Id.*, at 179. The debate on this proposal discloses much about the views of the Framers on the issue of qualifications. For example, James Madison urged its rejection, stating that the proposal would vest "an improper & dangerous power in the Legislature. The qualifications of electors and elected were fundamental articles in a Republican Govt. and ought to be fixed by the Constitution. If the Legislature could regulate those of either, it can by degrees subvert the Constitution. A Republic may be converted into an aristocracy or oligarchy as well by limiting the number capable of being elected, as the number authorized to elect. . . . It was a power also, which might be made subservient to the views of one faction agst. another. Qualifications founded on artificial distinctions may be devised, by the stronger in order to keep out partisans of a [weaker] faction." *Id.*, at 249–250.[64]

Significantly, Madison's argument was not aimed at the imposition of a property qualification as such, but rather at the delegation to the Congress of the discretionary power to establish any qualifications. The parallel between Madison's arguments and those made in Wilkes' behalf is striking.[65]

In view of what followed Madison's speech, it appears that on this critical day the Framers were facing and then rejecting the possibility that the legislature would have power to usurp the "indisputable right of the people to return whom they thought proper" [66] to the legislature. Oliver Ellsworth, of Connecticut, noted that a legislative power to establish property qualifications was exceptional and "dangerous because it would be much more liable to abuse." *Id.*, at 250. Gouverneur Morris then moved to strike "with regard to property" from the Committee's proposal. His intention was "to leave the Legislature entirely at large." *Ibid.* Hugh Williamson, of North Carolina, expressed concern that if a majority of the legislature should happen to be "composed of any particular description of men, of lawyers for example, . . . the future elections might be secured to their own body." *Ibid.*[67] Mr. Madison then referred to the British Parliament's assumption of the power to regulate the qualifications of both electors and the elected and noted that "the abuse they had made of it was a lesson worthy of our attention. They had made the changes in both cases subservient to their own views or to the views of political or Religious parties." *Ibid.*[68] Shortly thereafter, the Convention rejected both Gouveneur Morris' motion and the Committee's proposal. Later the same day, the Convention adopted without debate the provision authorizing each House "to be the judge of the . . . qualifications of its own members." *Id.*, at 254.

One other decision made the same day is very important to determining the meaning of Art. I, § 5. When the delegates reached the Committee of Detail's proposal to empower each House to expel its members, Madison "observed that the right of expulsion . . . was too important to be exercised by a bare majority of a quorum: and in emergencies one faction might be dangerously abused." *Id.*, at 254. He therefore moved that "with the concurrence of two-thirds" be inserted. With the exception of one State, whose delegation was divided, the motion was unanimously approved without debate, although Gouverneur Morris noted his opposition. The importance of this decision cannot be over-emphasized. None of the parties to this suit disputes that prior to 1787 the legislative powers to judge qualifications and to expel were exercised by a majority vote. Indeed, without exception, the English and colonial antecedents to Art. I, § 5, cl. 1 and 2, support this conclusion. Thus, the Convention's decision to increase the vote required to expel, because that power was "too important to be exercised by a bare majority," while at the same time not similarly restricting the power to judge qualifications, is compelling evidence that they considered the latter already limited by the standing qualifications previously adopted.[69]

Respondents urge, however, that these events must be considered in light of what they regard as a very significant change made in Art. I, § 2, cl. 2, by the Committee of Style. When the Committee of Detail reported the provision to the Convention, it read:

"Every member of the House of Representatives shall be of the age of twenty-five years; shall have been a citizen of [in] the United States for at least three years before his election; and shall be, at the time of his election, a resident of the State in which he shall be chosen." *Id.*, at 178.

However, as finally drafted by the Committee of Style, these qualifications were stated in their present negative form. Respondents note that there are no records of the "deliberations" of the Committee of Style. Nevertheless, they speculate that this particular change was designed to make the provision correspond to the form used by Blackstone in listing the "standing incapacities" for membership in the House of Commons. See 1 Blackstone's Commentaries *175–176. Blackstone, who was an apologist for the anti-Wilkes forces in Parliament,[70] had added to his Commentaries after Wilkes' exclusion the assertion that individuals who were not ineligible for the Commons under the standing incapacities could still be denied their seat if the Commons deemed them unfit for other reasons.[71] Since Blackstone's Commentaries were widely circulated in the Colonies, respondents further speculate that the Committee of Style rephrased the qualifications provision in the negative to clarify the delegates' intention "only to prescribe the standing incapacities without imposing any other limit on the historic power of each house to judge qualifications on a case by case basis." [72]

Respondents' argument is inherently weak, however, because it assumes that legislative bodies historically possessed the power to judge qualifications on a case-by-case basis. As noted above, the basis for that conclusion was the Walpole and Wilkes cases, which by the time of the Convention, had been denounced by the House of Commons and repudiated by at least one State government. Moreover, respondents' argument misrepresents the function of the Committee of Style. It was appointed only "to revise the style of and arrange the articles which had been agreed to . . ." 2 Farrand 553. "The Committee . . . had no authority from the Convention to make alterations of substance in the Constitutions voted by the Convention, nor did it purport to do so; and certainly the Convention had no belief . . . that any important change was, in fact, made in the provisions as to qualifications adopted by it on August 10." [73]

Petitioners also argue that the post-Convention debates over the Constitution's ratification support their interpretation of § 5. For example, they emphasize Hamilton's reply to the antifederalist charge that the new Constitution favored the wealthy and well-born:

"The truth is that there is no method of securing to the rich the preference apprehended but by prescribing qualifications of property either for those who may elect or be elected. But this forms no part of the power to be conferred upon the national government. Its authority would be expressly restricted to the regulation of the *times*, the *places*, the *manner* of elections. *The qualifications of the persons who may choose or be chosen, as has been remarked upon other occasions, are defined and fixed in the Constitution, and are unalterable by the legislature.*" The Federalist 371 (Mentor ed.). (Emphasis added in part.)

Madison had expressed similar views in an earlier essay,[74] and his arguments at the Convention leave no doubt about his agreement with Hamilton on this issue.

Respondents counter that Hamilton was actually addressing himself to criticism of Art. I, § 4, which authorizes Congress to regulate the times, places, and manner of electing members of Congress. They note that prominent antifederalists had argued that

Footnotes at end of article.

this power could be used to "confer on the rich and *well-born* all honours." Brutus No. IV, N.Y. Journal, Nov. 29, 1787, p. 7. (Emphasis in original.) Respondents' contention, however, ignores Hamilton's express reliance on the immutability of the qualifications set forth in the Constitution.[75]

The debates at the state conventions also demonstrate the Framers' understanding that the qualifications for members of Congress had been fixed in the Constitution. Before the New York convention, for example, Hamilton emphasized: "[T]he true principle of a republic is, that the people should choose whom they please to govern them. Representation is imperfect in proportion as the current of popular favor is checked. This great source of free government, popular election, should be perfectly pure, and the most unbounded liberty allowed." 2 Debates on the Federal Constitution 257 (J. Elliot ed. 1876) (hereinafter cited as Elliot's Debates).[76] In Virginia, where the Federalists faced powerful opposition by advocates of popular democracy, Wilson Carey Nicholas, a future member of both the House and Senate and later Governor of the State, met the arguments that the new Constitution violated democratic principles with the following interpretation of Art. I, § 2, cl. 2: "[A]s it respects the qualifications of the elected. It has ever been considered a great security to liberty, that very few should be excluded from the right of being chosen to the legislature. This Constitution has amply attended this idea. We find no qualifications required except those of age and residence which create a certainty of their judgment being matured, and of being attached to their state." 3 Elliot's Debates 8.

c. Post-Ratification: As clear as these statements appear, respondents dismiss them as "general statements . . . directed to other issues."[77] They suggest that far more relevant is Congress' own understanding of its power to judge qualifications as manifested in post-ratification exclusion cases. Unquestionably, both the House and Senate have excluded members-elect for reasons other than their failure to meet the Constitution's standing qualifications. For almost the first 100 years of its existence, however, Congress strictly limited its power to judge the qualifications of its members to those enumerated in the Constitution.

Congress was first confronted with the issue in 1807,[78] when the eligibility of William McCreery was challenged because he did not meet additional residency requirements imposed by the State of Maryland. In recommending that he be seated, the House Election Committee reasoned:

"The Committee proceeded to examine the Constitution with relation to the case submitted to them, and find that qualifications of members are therein determined, without reserving any authority to the State Legislatures to change, add to, or diminish those qualifications; and that, by that instrument, Congress is constituted the sole judge of the qualifications prescribed by it, and are obliged to decide agreeably to the Constitutional rules. . . ." 17 Annals of Cong. 871 (1807).

Lest there be any misunderstanding of the basis for the committee's recommendation, during the ensuing debate the chairman explained the principles by which the committee was governed:

"The Committee of Elections considered the qualifications of members to have been unalterably determined by the Federal Convention, unless changed by an authority equal to that which framed the Constitution at first; that neither the State nor the Federal Legislatures are vested with authority to add to those qualifications, so as to change them. . . . Congress, by the Federal Constitution, are not authorized to prescribe the qualifications of their own members, but they are authorized to judge of their qualifications; in doing so, however, they must be governed by the rules prescribed by the Federal Constitution, and by them only. These are the principles on which the Election Committee have made up their report and upon which their resolution is founded." *Id.*, at 872.

The chairman emphasized that the committee's narrow construction of the power of the House to judge qualifications was compelled by the "fundamental principle in a free government," *id.*, at 873, that restrictions upon the people to choose their own representatives must be limited to those "absolutely necessary for the safety of the society." *Id.*, at 874. At the conclusion of a lengthy debate, which tended to center on the more narrow issue of the power of the States to add to the standing qualifications set forth in the Constitution, the House agreed by a vote of 89 to 18 to seat Congressman McCreery. *Id.*, at 1237. See 1 A. Hinds, Precedents of the House of Representatives § 414 (1907) (hereinafter cited as Hinds).

There was no significant challenge to these principles for the next several decades.[79] They came under heavy attack, however, "during the stress of civil war [but initially] the House of Representatives declined to exercise the power [to exclude], even under circumstances of great provocation."[80] Rules of the House of Representatives, H.R. Doc. No. 529, 89th Cong., 2d Sess., § 12, at 7 (1967). The abandonment of such restraint, however, was among the casualties of the general upheaval produced in war's wake. In 1868, the House voted for the first time in its history to exclude a member-elect. It refused to seat two duly elected representatives for giving aid and comfort to the Confederacy. See 1 Hinds §§ 449–451.[81] "This change was produced by the North's bitter enmity toward those who failed to support the Union cause during the war, and was effected by the Radical Republican domination of Congress. It was a shift brought by the naked urgency of power and was given little doctrinal support." Comment, Legislative Exclusion: Julian Bond and Adam Clayton Powell, 35 U. Chi. L. Rev. 151, 157 (1967).[82] From that time until the present, congressional practice has been erratic;[83] and on the few occasions when a member-elect was excluded although he met all the qualifications set forth in the Constitution, there were frequently vigorous dissents.[84] Even the annotations to the official manual of procedure for the 90th Congress manifests doubt as to the House's power to exclude a member-elect who has met the constitutionally prescribed qualifications. See Rules of the House of Representatives, H.R. Doc No. 529, 89th Cong., 2d Sess., § 12, at 7–8 (1967).

Had these congressional exclusion precedents been more consistent, their precedential value still would be quite limited. See Note, the Power of a House of Congress to Judge the Qualifications of its Members, 81 Harv. L. Rev. 673, 679 (1968).[85] That an unconstitutional action has been taken before surely does not render that same action any less unconstitutional at a later date. Particularly in view of the Congress' own doubts in those few cases where it did exclude members-elect, we are not inclined to give its precedents controlling weight. The relevancy of prior exclusion cases is limited largely to the insight they afford in correctly ascertaining the draftsmen's intent. Obviously, therefore, the precedential value of these cases tends to increase in proportion to their proximity to the Convention in 1787. See *Myers* v. *United States*, 272 U.S. 52, 175 (1926). And, what evidence we have of Congress' early understanding confirms our conclusion that the House is without power to exclude any member-elect who meets the Constitution's requirements for membership.

d. Conclusion: Had the intent of the Framers emerged from these materials with less clarity, we would nevertheless have been compelled to resolve any ambiguity in favor of a narrow construction of the scope of Congress' power to exclude members-elect. A fundamental principle of our representative democracy is, in Hamilton's words, "that the people should choose whom they please to govern them." 2 Elliot's Debates 257. As Madison pointed out at the Convention, this principle is undermined as much by limiting whom the people can select as by limiting the franchise itself. In apparent agreement with this basic philosophy, the Convention adopted his suggestion limiting the power to expel. To allow essentially that same power to be exercised under the guise of judging qualifications, would be to ignore Madison's warning, borne out in the Wilkes case and some of Congress' own post-Civil War exclusion cases, against "vesting an improper & dangerous power in the Legislature." 2 Farrand 249. Moreover, it would effectively nullify the Convention's decision to require a two-third vote for expulsion. Unquestionably, Congress has an interest in preserving its institutional integrity, but in most cases that interest can be sufficiently safeguarded by the exercise of its power to punish its members for disorderly behavior and, in extreme cases, to expel a member with the concurrence of two-thirds. In short, both the intention of the Framers, to the extent it can be determined, and an examination of the basic principles of our democratic system persuade us that the Constitution does not vest in the Congress a discretionary power to deny membership by a majority vote.

For these reasons, we have concluded that Art. I, § 5, is at most a "textually demonstrable commitment" to Congress to judge only the qualifications expressly set forth in the Constitution. Therefore, the "textual commitment" formulation of the political question doctrine does not bar federal courts from adjudicating petitioners' claims.

2. Other considerations

Respondents' alternate contention is that the case presents a political question because judicial resolution of petitioners' claim would produce a "potentially embarrassing confrontation between coordinate branches" of the Federal Government. But, as our interpretation of Art. I, § 5, discloses, a determination of Petitioner Powell's right to sit woud require no more than an interpretation of the Constitution. Such a determination falls within the traditional role accorded courts to interpret the law, and does not involve a "lack of respect due [a] coordinate branch of government," nor does it involve an "initial policy determination of a kind clearly for nonjudicial discretion." *Baker* v. *Carr*, *supra*, at 217. Our system of government requires that federal courts on occasion interpret the Constitution in a manner at variance with the construction given the document by another branch. The alleged conflict[86] that such an adjudication may cause cannot justify the courts' avoiding their constitutional responsibility. See *United States* v. *Brown*, 381 U.S. 437, 462 (1965); *Youngstown Sheet and Tube Co.* v. *Sawyer*, 343 U.S. 579, 613–614 (1952) (Frankfurter, J., concurring); *Myers* v. *United States*, 272 U.S. 52, 293 (1926) (Brandeis, J., dissenting).

Nor are any of the other formulations of a political question "inextricable from the case at bar." *Baker* v. *Carr*, *supra*, at 217. Petitioners seek a determination that the House was without power to exclude Powell from the 90th Congress, which, we have seen, requires an interpretation of the Constitution—a determination for which clearly there are "judicially manageable standards." Finally, a judicial resolution of petitioners' claim will not result in "multifarious pronouncements by various departments on one question." For, as we noted in *Baker* v. *Carr*,

Footnotes at end of article.

supra, at 211, it is the responsibility of this Court to act as the ultimate interpreter of the Constitution. *Marbury* v. *Madison*, 1 Cranch 137 (1803). Thus, we conclude that petitioners' claim is not barred by the political question doctrine, and having determined that the claim is otherwise generally justiciable, we hold that the case is justiciable.

VII. CONCLUSION

To summarize, we have determined the following: (1) This case has not been mooted by Powell's seating in the 91st Congress. (2) Although this action should be dismissed against respondent Congressmen, it may be sustained against their agents. (3) The 90th Congress' denial of membership to Powell cannot be treated as an expulsion. (4) We have jurisdiction over the subject matter of this controversy. (5) The case is justiciable.

Further, analysis of the "textual commitment" under Art. I, § 5 (see Part VI, Section B(1)), has demonstrated that in judging the qualifications of its members Congress is limited to the standing qualifications prescribed in the Constitution. Respondents concede that Powell met these. Thus, there is no need to remand this case to determine whether he was entitled to be seated in the 90th Congress. Therefore, we hold that, since Adam Clayton Powell, Jr., was duly elected by the voters of the 18th Congressional District of New York and was not ineligible to serve under any provision of the Constitution, the House was without power to exclude him from its membership.

Petitioners seek additional forms of equitable relief, including mandamus for the release of Petitioner Powell's back pay. The propriety of such remedies, however, is more appropriately considered in the first instance by the courts below. Therefore, as to Respondents McCormack, Albert, Ford, Celler, and Moore, the judgment of the Court of Appeals for the District of Columbia Circuit is affirmed. As to Respondents Jennings, Johnson, and Miller, the judgment of the Court of Appeals for the District of Columbia Circuit is reversed and the case is remanded to the United States District Court for the District of Columbia with instructions to enter a declaratory judgment and for further proceedings consistent with this opinion.

It is so ordered.

FOOTNOTES

[1] Powell requested that he be given (1) notice of the charges pending against him, including a bill of particulars as to any accuser; (2) the opportunity to confront any accuser, to attend all committee sessions where evidence was given, and the right to cross-examine all witnesses; (3) public hearings; (4) the right to have the Select Committee issue its process to summon witnesses for his defense; (5) and a transcript of every hearing. Hearings on H.R. Res. No. 1 before Select Committee Pursuant to H.R. Res. No. 1, 90th Cong., 1st Sess., 54 (1967).

The Select Committee noted that it had given Powell notice of the matters it would inquire into, that Powell had the right to attend all hearings (which would be public) with his counsel, and that the Committee would call witnesses upon Powell's written request and supply a transcript of the hearings. *Id.*, at 59.

[2] The complaint also attacked the House Resolution as a bill of attainder, and *ex post facto* law and as cruel and unusual punishment. Further, petitioners charged that the hearing procedures adopted by the Select Committee violated the Due Process Clause of the Fifth Amendment.

[3] The District Court refused to convene a three-judge court and the Court of Appeals affirmed. Petitioners did not press this issue in their petition for writ of certiorari, apparently recognizing the Validity of the Court of Appeals' ruling. See *Stamler* v. *Willis*, 393 U.S. 217 (1969).

[4] Petitioners also requested that a writ of mandamus issue ordering that the named officials perform the same acts.

[5] The District Court entered its order April 7, 1967, and a notice of appeal was filed the same day. On April 11, 1967, Powell was reelected to the House of Representatives in a special election called to fill his seat. The formal certification of election was received by the House on May 1, 1967, but Powell did not again present himself to the House or ask to be given the oath of office.

[6] Respondents' authority for this assertion is a footnote contained in *Gojack* v. *United States*, 384 U.S. 702, 707, n. 4. (1966): "Neither the House of Representatives nor its committees are continuing bodies."

[7] The rule that this Court lacks jurisdiction to consider the merits of a moot case is a branch of the constitutional command that the judicial power extends only to cases or controversies. See *Sibron* v. *New York*, 392 U.S. 40, 57 (1968); R. Robertson & F. Kirkham, Jurisdiction of the Supreme Court of the United States §§ 270–271 (R. Wolfson & P. Kurland ed., 1951); S. Diamond, Federal Jurisdiction To Decide Moot Cases, 94 U. Pa. L. Rev. 125 (1946); Note, Cases Moot on Appeal: A Limit on the Judicial Power, 103 U. Pa. L. Rev. 772 (1955).

[8] Petitioners do not press their claim that respondent McCormack should be required to administer the oath to Powell, apparently conceding that the seating of Powell has rendered this specific claim moot. Where several forms of relief are requested and one of these requests subsequently becomes moot, the Court has still considered the remaining requests. See *Standard Fashion Co.* v. *Magrane-Houston Co.*, 258 U.S. 346, 353 (1922). Respondents also argue that the seating of Petitioner Powell has mooted the claims of Powell's constituents. Since this case will be remanded, that issue as well as petitioners' other claims can be disposed of by the court below.

[9] Alejandrino's brief did not consider either the possibility that his request for injunctive relief had become moot or whether his salary claim required that the Court treat the propriety of his suspension. No brief was filed on behalf of respondents.

[10] After discussing the insufficiency of Alejandrino's averments as to the officer responsible for his salary, the Court stated: "Were that set out, the remedy of the Senator would seem to be by mandamus to compel such official in the discharge of his ministerial duty to pay him the salary due. . . ." 271 U.S., at 534. That the insufficiency of Alejandrino's averments was the reason for dismissal is further substantiated by a later passage: "As we are not able to derive from the petition sufficient information upon which properly to afford such a remedy [mandamus], we must treat the whole case as moot and act accordingly." *Id.*, at 535.

[11] Paragraph 18b of petitioners' complaint avers that "Leake W. Johnson, as Sergeant-at-Arms of the House" is responsible for and refuses to pay Powell's salary and prays for an injunction restraining the Sergeant-at-Arms from implementing the House resolution depriving Powell of his salary as well as mandamus to order that the salary be paid.

[12] Federal courts were first empowered to grant declaratory judgments in 1934, see 48 Stat. 955, 10 years after Alejandrino filed his complaint.

[13] It was expressly stated in *Alejandrino* that a properly pleaded mandamus action could be brought, 271 U.S., at 535, impliedly holding that Alejandrino's salary claim had not been mooted by the expiration of his suspension.

[14] Respondents do not supply any substantiation for their assertion that the term of the Georgia Legislature did not expire until December 31. Presumably, they base their statements upon Ga. Code Ann. §§ 2–1601, 2–1603 (Supp. 1968).

[15] Respondents also suggest that *Bond* is not applicable because the parties in *Bond* had stipulated that Bond would be entitled to back salary if his constitutional challenges were accepted, while there is no stipulation in this case. However, if the claim in *Bond* was moot, a stipulation by the parties could not confer jurisdiction. See, *e.g.*, *California* v. *San Pablo and Tulare Railroad Co.*, 149 U.S. 308, 314 (1893).

[16] Since the court below disposed of this case on grounds of justiciability, it did not pass upon whether Powell had brought an appropriate action to recover his salary. Where a court of appeals has misconceived the applicable law and therefore failed to pass upon a question, our general practice has been to remand the case to that court for consideration of the remaining issues. See, *e.g.*, *Utah Pie Co.* v. *Continental Baking Co.*, 386 U.S. 685, 704 (1967); *Bank of America National Trust & Savings Assn.* v. *Parnell*, 352 U.S. 29, 34 (1956). We believe that such action is appropriate for resolution of whether Powell in this litigation is entitled to mandamus against the Sergeant-at-Arms for salary withheld pursuant to the House resolution.

[17] Article I, § 6, provides: "for any Speech or Debate in either House, they [Senators and Representatives] shall not be questioned in any other place."

[18] Petitioners ask the Court to draw a distinction between declaratory relief sought against members of Congress and either an action for damages or a criminal prosecution, emphasizing that our four previous cases concerned "criminal or civil sanctions of a deterrent nature." Brief for Petitioners, at 171.

[19] See 5 Debates on the Federal Constitution 406 (J. Elliot ed. 1876); 2 Records of the Federal Convention 246 (Farrand rev. ed. 1966) (hereinafter cited as Farrand).

[20] The English Bill of Rights contained a provision substantially identical to Art. I, § 6: "That the Freedom of Speech, and Debates or Proceedings in Parliament, ought not to be impeached or questioned in any Court or Place out of Parliament." 1 W. & M., Sess. 2, c. 2. The English and American colonial history is traced in some detail in A. Cella, The Doctrine of Legislative Privilege of Freedom of Speech and Debate: Its Past, Present and Future as a Bar to Criminal Prosecutions in the Courts, 2 Suffolk U. L. Rev. 1, 3–16 (1968), and L. Yankwich, The Immunity of Congressional Speech—Its Origin, Meaning and Scope, 99 U. Pa. L. Rev. 960, 961–966 (1951).

[21] *United States* v. *Johnson*, 383 U.S. 169, 182–183 (1966).

[22] 1 The Works of James Wilson 421 (McCloskey ed. 1967).

[23] In *Dombrowski* $500,000 in damages was sought against a Senator and the chief counsel of a Senate Subcommittee chaired by that Senator. Record, pp. 10–11. We affirmed the grant of summary judgment as to the Senator but reversed as to subcommittee counsel.

[24] The Court in *Kilbourn* quoted extensively from *Stockdale* v. *Hansard*, 9 AD. & E. 1, 114, 112, Eng. Rep. 1112, 1156 (Q.B. 1839), to refute the assertion that House agents were immune because they were executing orders of the House: "[I]f the Speaker, by authority of the House, order an illegal Act, though that authority shall exempt him from question, his order shall no more justify the person who executed it than King Charles's warrant for levying ship-money could justify his revenue officer." Kilbourn eventually recovered $20,000 against Thompson. See *Kilbourn* v. *Thompson*, 11 D.C. (MacArth. & M.) 401, 432 (Sup. Ct. 1883).

[25] A Congressman is not by virtue of the Speech or Debate Clause absolved of the responsibility of filing a motion to dismiss and the trial court must still determine the applicability of the clause to plaintiff's ac-

tion. See *Tenney* v. *Brandhove*, 341 U.S. 367, 377 (1951).

[26] Given our disposition of this issue, we need not decide whether under the Speech or Debate Clause petitioners would be entitled to maintain this action solely against members of Congress where no agents participated in the challenged action and no other remedy was available. Cf. *Kilbourn* v. *Thompson*, 103 U.S. 168, 204–205 (1880).

[27] Powell was "excluded" from the 90th Congress, *i.e.*, he was not administered the oath of office and was prevented from taking his seat. If he had been allowed to take the oath and subsequently had been required to surrender his seat, the House's action would have constituted an "expulsion." Since we conclude that Powell was excluded from the 90th Congress, we express no view on what limitations may exist on Congress' power to expel or otherwise punish a member once he has been seated.

[28] House Resolution 278, as amended and adopted, provided "That said Adam Clayton Powell . . . be and the same hereby is *excluded* from membership in the 90th Congress . . . ." 113 Cong. Rec. 1942 (daily ed. March 1, 1967) (Emphasis added)

[29] Other Congresses have expressed an identical view. The Report of the Judiciary Committee concerning the proposed expulsion of William S. King and John G. Shumaker informed the House:

"Your committee are of the opinion that the House of Representatives has no authority to take jurisdiction of violations of law or offenses committed against a previous Congress. This is a purely legislative body, and entirely unsuited for the trial of crimes. The fifth section of the first article of the Constitution authorizes 'each house to determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.' This power is evidently given to enable each house to exercise its constitutional function of legislation unobstructed. It cannot vest in Congress jurisdiction to try a member for an offense committed before his election; for such offense a member, like any other citizen, is amenable to the courts alone." H.R. Rep. No. 815, 44th Cong., 1st Sess., 2 (1976).

See also 15 Cong. Rec. 4434 (1884) (ruling of the Speaker); H.R. Rep. No. 81, 42d Cong., 3d Sess., 8 (1873) (expulsion of James Brooks and Oakes Ames); H.R. Rep. No. 179, 35th Cong., 1st Sess., 4–5 (1858) (expulsion of Orsamus B. Matteson).

[30] We express no view as to whether such a ruling would have been proper. A further distinction between expulsion and exclusion inheres in the fact that a member whose expulsion is contemplated may as a matter of right address the House and participate fully in debate while a member-elect apparently does not have a similar right. In prior cases the member whose expulsion was under debate has been allowed to make a long and often impassioned defense. See Cong. Globe, 42d Cong., 3d Sess., 1723 (1873) (expulsion of Oakes Ames); Cong. Globe, 41st Cong., 2d Sess., 1524–1525, 1544 (1870) (expulsion of B. F. Whittemore); Cong. Globe, 34th Cong., 3d Sess., 925–926 (1857) (expulsion of William A. Gilbert); Cong. Globe, 34th Cong., 3d Sess., 947–951 (1857) (expulsion of William W. Welch); 9 Annals of Cong. 2966 (1799) (expulsion of Matthew Lyon). On at least one occasion the member has been allowed to cross-examine other members during the expulsion debate. 2 A. Hinds, Precedents of the House of Representatives § 1643 (1907).

[31] A motion for the previous question is a debate-limiting device which, when carried, has the effect of terminating debate and of forcing a vote on the subject at hand. See Rules of the House of Representatives, H.R. Doc. No. 529, 89th Cong., 2d Sess., §§ 804–809 (1967); Cannon's Procedure in the House of Representatives, H. R. Doc. No. 610, 87th Cong., 2d Sess., 277–281 (1963).

[32] R. Eckhardt, The Adam Clayton Powell Case, 45 Tex. L. Rev. 1205, 1209 (1967). The views of Congressman Eckhardt were echoed during the exclusion proceedings. Congressman Cleveland stated that, although he voted in favor of and supported the Select Committee's recommendation, if the exclusion amendment received a favorable vote on the motion for the previous question, then he would support the amendment "on final passage." CONGRESSIONAL RECORD, vol. 113, pt. 4, p. 5031. Congressman Gubser was even more explicit:

"I shall vote against the previous question on the Curtis amendment simply because I believe future and perfecting amendments should be allowed. But if the previous question is ordered, then I will be placed on the horns of an impossible dilemma.

"Mr. Speaker, I want to expel Adam Clayton Powell, by seating him first, but that will not be my choice when the Curtis amendment is before us. I will be forced to vote for exclusion, about which I have great constitutional doubts, or to vote for no punishment at all. Given this raw and isolated issue, the only alternative I can follow is to vote for the Curtis amendment. I shall do so, Mr. Speaker, with great reservation." *Id.*, at 5031.

[33] Although each judge wrote a separate opinion, all were clear in stating that the District Court possessed subject matter jurisdiction. *Powell* v. *McCormack*, 129 U.S. App. D.C. 354, 368, 384, 385; 395 F. 2d 577, 591, 607, 608 (C. A. D. C. Cir 1968).

[34] We have determined that the case is not moot. See Part II, *supra*.

[35] Indeed, the thrust of respondents' argument on this jurisdictional issue is similar to their contentions that this case presents a nonjusticiable "political question." They urge that it would have been "unthinkable" to the Framers of the Constitution for courts to review the decision of a legislature to exclude a member. However, we have previously determined that a claim alleging that a legislature has abridged an individual's constitutional rights by refusing to seat an elected representative constitutes a "case or controversy" over which federal courts have jurisdiction. See *Bond* v. *Floyd*, 385 U.S. 116, 131 (1966). To the extent the expectations of the Framers are discernible and relevant to this case, they must therefore relate to the special problem of review by *federal* courts of actions of the *federal* legislature. This is of course a problem of separation of powers and is to be considered in determining justiciability. See *Baker* v. *Carr*, 369 U.S. 186, 210 (1962).

[36] Brief for Respondents, at 39.

[37] Petitioners' complaint is predicated, *inter alia*, on several sections of Article I, Article III, and several amendments to the Constitution. Respondents do not challenge the substantiality of these claims.

[38] Act of May 31, 1870, c. 114, 16 Stat. 146. The statute is now 28 U.S.C. § 1344 (1964 ed.).

[39] See Cong. Globe, 41st Cong., 2d Sess., 3872 (1870).

[40] Respondents rely on *Barry* v. *United States ex rel. Cunningham*, 279 U.S. 597 (1929). *Barry* involved the power of the Senate to issue an arrest warrant to summon a witness to give testimony concerning a senatorial election. The Court ruled that issuance of the warrant was constitutional, relying on the power of the Senate under Art. I, § 5, to be the judge of the elections of its members. Respondents particularly rely on language the Court used in discussing the power conferred by Art. I, § 5. The Court noted that under § 5 the Senate could "render a judgment which is beyond the authority of any other tribunal to review." *Id.*, at 613.

Barry provides no support for respondents' argument that this case is not justiciable, however. First, in *Barry* the Court reached the merits of the controversy, thus indicating that actions allegedly taken pursuant to Art. I, § 5, are not automatically immune from judicial review. Second, the quoted statement is dictum; and, later in the same opinion, the Court noted that the Senate may exercise its power subject "to the restraints imposed by or found in the implications of the Constitution." *Id.*, at 614. Third, of course, the statement in *Barry* leaves open the particular question that must first be resolved in this case: the existence and scope of the textual commitment to the House to judge the qualifications of members.

[41] In addition to the three qualifications set forth in Art. I, § 2, Art. I, § 3, cl. 7, authorizes the disqualification of any person convicted in an impeachment proceeding from "any Office of honor, Trust or Profit under the United States"; Art. I, § 6, cl. 2, provides that "no Person holding any Office under the United States, shall be a Member of either House during his Continuance in Office"; and § 3 of the 14th Amendment disqualifies any person "who, having previously taken an oath . . . to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof." It has been argued that each of these provisions, as well as the Guaranty Clause of Article IV and the oath requirement of Art. VI, cl. 3, is no less a "qualification" within the meaning of Art. I, § 5, than those set forth in Art. I, § 2. A Dionisopoulos, A Commentary on the Constitutional Issues in the Powell and Related Cases, 17 J. Pub. L. 103, 111–115 (1968). We need not reach this question, however, since both sides agree that Powell was not ineligible under any of these provisions.

[42] Consistent with this interpretation, federal courts might still be barred by the political question doctrine from reviewing the House's factual determination that a member did not meet one of the standing qualifications. This is an issue not presented in this case and we express no view as to its resolution.

[43] Indeed, the force of respondents' other arguments that this case presents a political question depends in great measure on the resolution of the textual commitment question. See Part VI, Section B(2), *infra*.

[44] Since Art. I, § 5, cl. 1, applies to both Houses of Congress, the scope of the Senate's power to judge the qualifications of its members necessarily is identical to the scope of the House's power, with the exception, of course, that Art. I, § 3, cl. 3, establishes different age and citizenship requirements for membership in the Senate.

[45] Since the reign of Henry IV (1399–1413), no clergyman had sat in the House of Commons. 1 E. Porritt, The Unreformed House of Commons 125 (1903).

[46] Because the British do not have a written constitution, standing incapacities or disqualifications for membership in Parliament are derived from "the custom and law of parliament." 1 Blackstone's Commentaries *162; see *id.*, at *175. The groups thus disqualified as of 1770 included aliens; minors; judges who sat in the House of Lords; clergy who were represented in their own convocation; persons "attainted of treason or felony"; sheriffs, mayors, and bailiffs as representatives for their own jurisdictions; and certain taxing officials and officers of the Crown. *Id.*, at *175–176. Not until the exclusion of John Wilkes, discussed *infra*, did Blackstone subscribe to the theory that, in addition, the Commons could declare ineligible an individual "in particular [unspecified] circumstances . . . for that parliament" if it deemed him unfit to serve on grounds not encompassed by the recognized standing incapacities. As we explain, *infra*, this position was subsequently repudiated by the House in 1782. A Clerk of the House of Commons later referred to cases in which this theory was relied upon "as examples of an excess of . . . jurisdiction by the Commons; for one house of Parliament cannot create a disability unknown to the law." May's Parliamentary Practice 67 (13th ed. T. Webster 1924).

[47] In 1619, the Virginia House of Burgesses challenged the eligibility of certain delegates on the ground that they did not hold their plantations under proper patents from the Virginia Company in England. See generally, 7 The Federal and State Constitutions, Colonial Charters, and Other Organic Laws 3783–3810 (F. Thorpe ed. 1909) (hereinafter cited as Thorpe). One of them, a Captain Warde, was admitted on condition that he obtain the necessary patent. The others, representatives from Martin's Brandon plantation, were excluded on the ground that the owner of the plantation had claimed that his patent exempted him from the colony's laws. See Journals of the House of Burgesses of Virginia: 1619–1658/59, at 4–5 (1915); M. Clarke, Parliamentary Privilege in the American Colonies 133–134 (1943). The questions presented by these two cases, therefore, seem to be jurisdictional in nature; that is, an attempt was made to gain representation for plantations over which the assembly may have had no power to act. Thus viewed these cases are analogous to the exclusions for failure to comply with standing qualifications. They certainly are not precedents which support the view that a legislative body could exclude members for mere character defects or prior misconduct disapproved by the assembly. See generally, M. Clarke, *supra*, at 132–204; J. Greene, The Quest for Power: The Lower Houses of Assembly in the Southern Royal Colonies: 1689–1776, at 171–204 (1963).

[48] For example, in 1585 the Commons expelled a Doctor Parry for unspecified misbehavior. A Compleat Journal of the Votes, Speeches and Debates of the House of Lords and House of Commons Throughout the Whole Reign of Queen Elizabeth, of Glorious Memory 352 (D'Ewes ed. 1708); and in 1628 Sir Edmund Sawyer was expelled because he had sought to induce a witness to suppress evidence against Sir Edmund in testimony before the House 1. H. C. Jour. 917.

[49] In expelling Sir Edmund Sawyer in 1628, the Commons declared "him to be unworthy ever to serve as a Member of this House." *Ibid.* Almost identical language was used in the expulsion of H. Benson in 1641. 2 *id.*, at 301. But by 1642, the formula had been changed to "disabled to sit any longer *in this Parliament* as *a Member of this House* . . . ." *Id.*, at 703. (Emphasis added.) By the 18th century it was apparently well established that an expulsion by the House of Commons could last no longer than the duration of the Parliament from which the member was expelled. See I Backstone's Commentaries *176.

[50] For example, in 1652, the Virginia House of Burgesses expelled two members for prior conduct disapproved by the assembly, Journals of the House of Burgesses, *supra*, at 85; and in 1683, Rhode Island expelled a member "from acting in this present Assembly" for refusing to answer a court summons. 1 S. Arnold, History of the State of Rhode Island and Providence Plantations 289 (1859). See generally, M. Clarke, *supra*, at 173–204.

[51] In 1726, the Massachusetts House of Representatives excluded Gershom Woodle, who had been expelled on three previous occasions as "unworthy to be a Member." 7 Journals of the House of Representatives of Massachusetts 1726–1727, at 4–5, 15, 68–69 (1926). In 1758, North Carolina expelled Francis Brown for perjury. He was reelected twice in 1760 and excluded on both occasions; however, when he was elected at the 1761 general election, he was allowed to take his seat. 5 Colonial Records of North Carolina 1057–1058 (1887); 6 *id.*, at 375, 474, 662–663, 672–673 (1888). There may have been similar exclusions of two men elected in 1710 to the New Jersey Assembly. See M. Clarke, *supra*, at 197–198.

[52] Significantly, the occasional assumption of this broader expulsion power did not go unchallenged, M. Clarke, *supra*, at 196–202; and it was not supported by the only parliamentary precedent, the Walpole case.

[53] Pursuant to a general warrant, Wilkes was arrested, his home ransacked, and his private papers seized. In his later election campaigns, Wilkes denounced the use of general warrants, asserting that he was fighting for liberty itself. See 11 L. Gipson, The British Empire Before the American Revolution 213–214 (1965).

[54] The issue before the Commons was clear: could the Commons "put in any disqualification, that is not put in by the law of the land." 1 Cavendish's Debates 384 (ed. J. Wright 1841). The affirmative answer was somewhat less than resounding. After Wilkes' third reelection, the motion to seat his opponent carried 197 to 143.

[55] The validity of the House's action against Wilkes rested to a large extent on the validity of the Walpole precedent. Taswell-Langmead's, *supra*, at 585. Thus, the House of Commons resolution expunging, as subversive to the rights of the whole electorate, the action taken against Wilkes was also a tacit repudiation of the similar action taken against Walpole in 1712.

[56] English law is apparently the same today. See May's Parliamentary Practice 105–108 (17th ed. B. Cocks 1964).

[57] The Council of Censors was established by the 1776 Pennsylvania Constitution. It was an elected body that was specifically charged with the duty "to enquire whether the constitution has been preserved inviolate in every part; and whether the legislative and executive branches of government have performed their duty as guardians of the people, or assumed to themselves, or exercised other or greater powers than they are entitled to by the constitution." Pa. Const. of 1776, §47, 5 Thorpe 3091. See Introduction to Pennsylvania Convention Proceedings: 1776–1790, at IV (1825).

[58] In discussing the case, respondents characterize the earlier action as an *exclusion*. The Council of Censors, however, stated that the general assembly had resolved that the member "is expelled from his seat." Pennsylvania Convention Proceedings, *supra*, at 89. The account of the dissenting committee members suggests that the term expulsion was properly used. They note that in February 1783 the assembly received a letter from the Comptroller General charging the assemblyman with fraud. Not until September 9, 1783, did the assembly vote to expel him. Presumably, he held his seat until that time. But, even if he had been excluded, arguably he was excluded for not meeting a standing incapacity, since the Pennsylvania Constitution of 1776 required assemblymen to be "most noted for wisdom and *virtue*." Pa. Const. of 1776, § 7, 5 Thorpe 3084. (Emphasis added.) In fact, the dissenting members of the Committee argued that the expelled member was ineligible under this very provision. Pennsylvania Convention Proceedings, *supra*, at 89.

Respondents cite one other exclusion during the period between the Declaration of Independence and the Constitutional Convention 11 years later. In 1780 the Virginia Assembly excluded John Breckinridge because he was a minor. Minority, of course, was a traditional standing incapacity, and Professor Warren therefore appears to have been correct in concluding that this exclusion was probably based upon an interpretation of the state constitutional requirement that members must be duly qualified according to law. Va. Const., 7 Thorpe 3816. See C. Warren, The Making of the Constitution 423, n. 1 (1928). Respondents, based upon their misinterpretation of the Pennsylvania case just discussed, criticize Professor Warren for concluding that there had been only one exclusion during this period. Our research, however, has disclosed no other cases.

[59] Wilkes had established a reputation both in England and the Colonies as a champion of free elections, freedom from arbitrary arrest and seizure, and freedom of the press. See 11 L. Gipson, *supra*, at 191–222.

[60] See R. Postgage, That Devil Wilkes 171–172, 173–174 (1929). During the House of Commons debates in 1781, a member remarked that expelling Wilkes had been "one of the great causes which had separated . . . [England] from America." 22 Parl. Hist. Eng. 100–101 (1781).

The writings of the pamphleteer "Junius" were widely reprinted in colonial newspapers and lent considerable support to the revolutionary cause. See 3 Dictionary of American History 190 (1940). Letter XVIII of the "Letters of Junius" bitterly attacked the exclusion of Wilkes. This letter, addressed to Blackstone, asserted:

"You cannot but know, sir, that what was Mr. Wilkes's case yesterday may be yours or mine to-morrow, and that, consequently the common right of every subject of the realm is invaded by it . . . . If the expulsion of a member, not under any legal disability, of itself creates in him an incapacity to be elected, I see a ready way marked out, by which the majority may, at any time, remove the honestest and ablest men who happen to be in opposition to them. To say that they will not make extravagant use of their power would be language unfit for a man so learned in the laws as you are. By your doctrine, sir, they have the power: and laws, you know, are intended to guard against what men may do, not to trust what they will do." 2 Letters of Junius, Letter XVIII, at 118 (1821).

[61] See C. Warren, *supra*, at 399–426.

[62] Dickinson also said that a built-in veneration for wealth would be inconsistent with the republican ideal that merit alone should determine who holds the public trust. 2 The Records of the Federal Constitution of 1787, at 123 (M. Farrand rev. ed. 1966) (hereinafter cited as Farrand).

[63] On August 10, a delegate moved to reconsider the citizenship qualification. The delegate proposed to substitute a three-year requirement for the seven-year requirement already agreed upon. The motion passed. *Id.*, at 251. However, when this proposal was considered on August 13, it was rejected. *Id.*, at 265–266.

[64] Charles Pinckney proposed that the President, judges, and legislators of the United States be required to swear that they possessed a specified amount of unincumbered property. Benjamin Franklin expressed his strong opposition, observing that "[s]ome of the greatest rogues he was ever acquainted with, were the richest rogues." *Id.*, at 249. He voiced the fear that a property requirement would "discourage the common people from removing to this Country." *Ibid.* Thereafter, "the Motion of Mr. Pinkney [*sic*] was rejected by so general a *no*, that the States were not called." *Ibid.* (Emphasis in original.)

[65] "That the right of electors to be represented by men of their own choice, was so essential for the preservation of all of their other rights, that it ought to be considered as one of the most sacred parts of our constitution. . . . That the law of the land had regulated the qualification of members to serve in parliament and that the free holders . . . had an indisputable right to return whom they thought proper, provided he was not disqualified by any of those known laws . . . . They are not occasional but fixed: to rule and govern the question as it shall arise; not to start up on a sudden, and shift from side to side, as the caprice of the day or the fluctuation of party shall direct." 16 Parl. Hist. Eng. 589–590 (1769).

[66] *Id.*, at 589.

[67] Wilkes had made essentially the same argument in one of his early attempts to have the resolutions denying him a seat expunged: "This usurpation, if acquiesced under, would be attended with the most alarming consequences. If you can reject those disagreeable to a majority, and expel whom you please, the House of Commons will be self-created and self-existing. You may expel till you approve, and thus in effect you nominate. The original idea of this House being the representative of the Commons of the realm will be lost." 18 Parl. Hist. Eng. 367 (1775).

[68] Professor Warren concluded that "Madi-

son's reference was undoubtedly to the famous election case of John Wilkes . . . ." C. Warren, *supra*, at 420, n. 1. It is also possible, however, that he was referring to the Parliamentary Test Act, 30 Car. II st. 2, c. 1 (1678), which had excluded Catholics as a group from serving in Parliament.

[69] Professor Charles Warren, upon whose interpretation of these events petitioners rely, concluded that the Convention's decision to reject Gouverneur Morris' proposal and the more limited proposal of the Committee of Detail was an implicit adoption of Madison's position that the qualifications of the elected "were fundamental articles in a Republican Govt. and ought to be fixed by the Constitution." 2 Farrand 249–150. See C. Warren, *supra*, at 420–421. Certainly, Warren argued, "[s]uch action would seem to make it clear that the Convention did not intend to grant to a single branch of Congress . . . the right to establish any qualifications for its members other than those qualifications established by the Constitution itself . . . . For certainly it did not intend that a single branch of Congress should possess a power which the Convention had expressly refused to vest in the whole Congress." *Id.*, at 421. See 1 J. Story, Commentaries on the Constitution of the United States § 625, at 445 (1873). Although Professor Chafee argued that congressional precedents do not support this construction, he nevertheless stated that forbidding any additions to the qualifications expressed in the Constitution was "the soundest policy." Z. Chafee, Free Speech in the United States 256 (1941).

[70] See 10 W. Holdsworth, A History of English Law 540–542 (1938).

[71] Holdsworth notes that in the first edition of Blackstone's Commentaries Blackstone enumerated various incapacities and then concluded that "subject to these standing restrictions and disqualifications, every subject of the realm is eligible [for membership in the House of Commons] of common right." 1 Blackstone's Commentaries *170. Blackstone was called upon in Commons to defend Wilkes' exclusion and the passage was quoted against him. Blackstone retaliated by writing a pamphlet and making two additions to later editions of his *Commentaries* in an effort to justify the decision of Parliament. W. Holdsworth, *supra*, at 540–541.

[72] Appendix D to Brief for Respondents, at 52.

[73] C. Warren, *supra*, at 422, n. 1. Professor Warren buttressed his conclusion by noting that the Massachusetts Constitution of 1780 "contained affirmative qualifications for Representatives and exactly similar negative qualifications for Senators." *Ibid.* Apparently, these provisions were not considered substantively different, for each house was empowered in identical language to "judge of the elections, returns, and qualifications of their own members, *as pointed out in the consultation.*" Mass. Const., Pt. 2, c. I. § 2, Art. IV, 3 Thorpe 1897, and § 3, Art. X, 3 Thorpe 1899. (Emphasis added.) See C. Warren, *supra*, at 422–423, n. 1.

[74] In No. 52 of The Federalist, Madison stated:

"The qualifications of the elected, being less carefully and properly defined by the State constitutions, and being at the same time more susceptible of uniformity, have been very properly considered and regulated by the Convention. [He then enumerated the qualifications for both representatives and Senators.] . . . Under these reasonable limitations, the door of this part of the federal government is open to merit of every description, whether native or adoptive, whether young or old, and without regard to poverty or wealth, or to any particular profession or religious faith." The Federalist 326 (Mentor ed. 1961).

[75] Respondents dismiss Madison's assertion that the "qualifications of the elected, . . . being at the same time more susceptible of uniformity, have been very properly considered and regulated by the convention," as nothing more than a refutation of the charge that the new national legislature would be free to establish additional "standing incapacities." However, this conclusion cannot be reconciled with the pre-Convention history on this question, the Convention debates themselves, and, in particular, the delegates' decision to require a two-thirds vote for expulsion.

[76] At the same convention, Robert Livingston, one of the new Constitution's most ardent supporters and one of the State's most substantial landowners, endorsed this same fundamental principle: "The people are the best judges who ought to represent them. To dictate and control them, to tell them whom they shall not elect, is to abridge their natural rights." 2 Elliot's Debates 292–293.

[77] Appendix D to Brief for Respondents, at 62.

[78] In 1799, during the 5th Congress, 1st Session, the House considered expelling Matthew Lyon, a Republican, for sedition. The vote to expel, however, was 49 to 45, and broke down largely along partisan lines. Although Lyon's opponents, the Federalists, retained a majority in the 6th Congress, to which Lyon was reelected, and although there were political advantages to be gained from again trying to prevent him from taking his seat, there was no effort made to exclude him. See P. Dionisopoulos, A Commentary on the Constitutional Issue in the Powell and Related Cases, 17 J. Pub. L. 107, 123–127 (1968).

[79] Another Maryland representative was unsuccessfully challenged in 1808 on grounds almost identical to those asserted in the challenge of McCreery. See 18 Annals of Cong. 1848–1849 (1808). In 1844, the Senate declined to exclude John M. Niles, who was accused of being mentally incompetent, after a special committee reported him competent. Cong. Globe, 28th Cong., 1st Sess., 564–565, 602 (1844). In 1856, the House rejected an attempt to exclude Samuel Marshall for violating an Illinois law prohibiting state judges from running for other offices. 1 A. Hinds, Precedents of the House of Representatives § 415 (1907) (hereinafter cited as Hinds). That same year, the Senate refused to exclude Lyman Trumbull for violating the same Illinois law. *Ibid.*

[80] Between 1862 and 1867, both the House and Senate resisted several attempts to exclude members-elect who were accused of being disloyal to the Union during the Civil War. See, *id.*, §§ 448, 455, 458; Senate Subcommittee on Privileges and Elections, Senate Committee on Rules and Administration, Senate Election, Expulsion and Censure Cases, S. Doc. No. 71, 87th Cong., 2d Sess., 21 (1962) (hereinafter cited as Senate Cases).

[81] That same year the Senate also excluded a supporter of the Confederacy. Senate Cases 40. The House excluded two others shortly thereafter, one for the same offense, and another for selling appointments to the Military and Naval Academies. See 1 Hinds §§ 459, 464; 2 Hinds § 1273.

[82] This departure from previous House construction of its power to exclude was emphasized by Congressman William P. Fessenden. "[T]he power which we have under the Constitution to judge the qualifications of members of the body is not a mere arbitrary power, to be exerted according to the will of the individuals who may vote upon the subject. It ought to be a power subject to certain rules and founded upon certain principles. So it was up to a very later period, until the rebellion. The rule simply was, if a man came here and presented proper credentials from his State, to allow him to take the ordinary oath, which we all took, to support the Constitution, and be admitted, and if there was any objection to him to try that question afterward." Cong. Globe, 40th Cong., 2d Sess., 685 (1868).

[83] For example, in 1870, the House refused to exclude a Texas Congressman accused of a variety of criminal acts, 1 Hinds § 465; but in 1882 and again in 1900 the House excluded a member-elect for practicing polygamy. 1 Hinds §§ 473, 477–480. Thereafter, it apparently did not consider excluding anyone until shortly after World War I, when it twice excluded Victor L. Berger, an avowed Socialist, for giving aid and comfort to the enemy. Significantly, the House committee investigating Berger concluded that he was ineligible under the express provision of § 3 of the Fourteenth Amendment. 6 C. Cannon, Precedents of the House of Representatives §§ 56–59 (1935) (hereinafter cited as Cannon). Berger, the last person to be excluded from the House prior to Powell, was later reelected and finally admitted after his criminal conviction was reversed. 65 Cong. Rec. 7 (1923).

The House next considered the problem in 1925 when it contemplated excluding John W. Langley for his alleged misconduct. Langley resigned after losing a criminal appeal, and the House therefore never voted upon the question. 6 Cannon § 238. The most recent exclusion attempt prior to Powell's occurred in 1933, when the House refused to exclude a Representative from Minnesota who had been convicted of sending defamatory matter through the mail. See 77 Cong. Rec. 73–74, 131–139 (1933).

The Senate has not excluded anyone since 1929; in that year it refused to seat a member-elect because of improper campaign expenditures. 6 Cannon § 180. In 1947, a concerted effort was made to exclude Senator Theodore C. Bilbo of Mississippi for allegedly accepting gifts from war contractors and illegally intimidating Negroes in Democratic primaries. See 93 Cong. Rec. 3–28 (1947). He died, however, before a decision was reached.

[84] During the debates over H.R. Res. No. 278, Congressman Celler, chairman of both the Select Committee and the Judiciary Committee, forcefully insisted that the Constitution "unalterably fixed and defined" the qualifications for membership in the House and that any other construction of Art. I, § 5, would be "improper and dangerous." CONGRESSIONAL RECORD, vol. 113, pt. 4, p. 4998. See H.R. Rep. No. 484, 43d Cong., 1st Sess., 11–15 (1874) (views of minority); H.R. Rep. No. 85, 56th Cong., 1st Sess., 53–77 (1900) (views of minority). In the latter report, the dissenters argued: "A small partisan majority might render the desire to arbitrarily exclude, by a majority vote, in order to more securely intrench itself in power, irresistible. Hence its exercise is controlled by legal rules. In case of expulsion, when the requisite two-thirds can be had, the motive for the exercise of arbitrary power no longer exists, as a two-thirds partisan majority is sufficient for every purpose. . . . The power of exclusion in a matter of law, to be exercised by a majority vote, in accordance with legal principles, and exists only where a member-elect lacks some of the qualifications required by the Constitution." *Id.*, at 76–77.

[85] "Determining the basis for congressional action is itself difficult since a congressional action, unlike a reported judicial decision, contains no statement of the reasons for the disposition, one must fall back on the debates and the committee reports. If more than one issue is raised in the debates, one can never be sure on what basis the action was predicated. Unlike a court, which is presumed to be disinterested, in an exclusion case the concerned house is in effect a party to the controversy that it must adjudicate. Consequently, some members may be inclined to vote for exclusion though they strongly doubt its constitutionality." 81 Harv. L. Rev., at 679.

[86] In fact, the Court has noted that it is an "inadmissible suggestion" that action might be taken in disregard of a judicial determination. *McPherson* v. *Blacker*, 146 U.S. 1, 24 (1892).

OPINION OF MR. JUSTICE DOUGLAS

While I join the opinion of the Court, I add a few words. As the Court says, the important constitutional question is whether the Congress has the power to deviate from or alter the qualifications for membership as a Representative contained in Art. I, § 2, cl. 2, of the Constitution.[1] Up to now the understanding has been quite clear to the effect that such authority does not exist.[2] To be sure, Art. I, § 5, provides that "Each House shall be the judge of the Elections, Returns and Qualifications of its own Members. . . ." Contests may arise over whether an elected official meets the "qualifications" of the Constitution, in which event the House is the sole judge.[3] But the House is not the sole judge when "qualifications" are added which are not specified in the Constitution.[4]

A man is not seated because he is a Socialist or a Communist.[5]

Another is not seated because in his district members of a minority are systematically excluded from voting.[6]

Another is not seated because he has spoken out in opposition to the war in Vietnam.[7]

The possible list is long. Some cases will have the racist overtones of the present one.

Others may reflect religious or ideological clashes.[8]

At root, however, is the basic integrity of the electoral process. Today we proclaim the constitutional principle of "one man one vote." When that principle is followed and the electors chose a person who is repulsive to the Establishment in Congress, by what constitutional authority can that group of electors be disenfranchised?

By Art. I, § 5, the House may "expel a member" on a vote of two-thirds. And if this were an expulsion case I would think that no justiciable controversy were presented, the vote of the House being two-thirds or more. But it is not an expulsion case. Whether it could have been won as an expulsion case, no one knows. Expulsion for "misconduct" may well raise different questions, different considerations. Policing the conduct of members, a recurring problem in the Senate and House as well, is quite different from the initial decision whether an elected official should be seated. It well might be easier to bar admission than to expel one already seated.

The House excluded Representative-elect Powell from the Ninetieth Congress allegedly for misappropriating public funds and for incurring the contempt of New York courts.[9] Twenty-six years earlier, members of the upper chamber attempted to exclude Senator-elect William Langer of North Dakota for like reasons.[10] Langer first became State's Attorney for Morton County, North Dakota, from 1914 to 1916, and then served as State Attorney General from 1916 to 1920. He became Governor of the State in 1932 and took office in January 1933. In 1934 he was indicated for conspiring to interfere with the enforcement of federal law by illegally soliciting political contributions from federal employees and suit was filed in the State Supreme Court to remove him from office[11] While that suit was pending he called the State Legislature into special session.[12] When it became clear that the court would order his ouster, he signed a Declaration of Independence, invoked martial law, and called out the National Guard.[13] Nonetheless, when his own officers refused to recognize him as the legal head of state, he left office in July 1934. As with Adam Clayton Powell, however, the people of the State still wanted him. In 1937 they re-elected him Governor and, in 1940, they sent him to the United States Senate.

During the swearing-in ceremonies, Senator Barkley drew attention to certain complaints field against Langer by citizens of North Dakota, yet asked that he be allowed to take the oath of office "without prejudice, which is a two-sided proposition—without prejudice to the Senator, and without prejudice to the Senate in the exercise of its rights [to exclude him]." [14]

The matter of Langer's qualifications to serve in the Senate was referred to committee which held confidential hearings on January 9 and 16, 1941, and open hearings on November 3 and 18, 1941. By a vote of 14 to 2, the committee reported that a majority of the Senate had jurisdiction under Art. I, § 5, cl. 1, of the Constitution to exclude Langer; and by a vote of 13 to 3, it reported its recommendation that Langer not be seated.[15]

The charges against Langer were various. As with Powell, they included claims that he had misappropriated public funds [16] and that he had interfered with the judicial process in a way that beclouded the dignity of Congress.[17] Reference was also made to his professional ethics as a lawyer.[18]

Langer enjoyed the powerful advocacy of Senator Murdock from Utah. The Senate debate itself raged for over a year.[19] Much of it related to purely factual allegations of "moral turpitude." Some of it, however, was addressed to the power of the Senate under Art. I, § 5, cl. 1, to exclude a member-elect for lacking qualifications not enumerated in Art. I, § 3.

"Mr. MURDOCK. [U]nder the Senator's theory that the Senate has the right to add qualifications which are not specified in the Constitution, does the Senator believe that the Senate could adopt a rule specifying intellectual and moral qualifications? [20]

"Mr. LUCAS. The Senate can do anything it wants to do . . . . Yes; the Senate can deny a person his seat simply because it does not like the cut of his jaw, if it wishes to." [21]

Senator Murdock argued that the only qualifications for service in the Senate were those enumerated in the Constitution; that Congress had the power to review those enumerated qualifications; but that it could not—while purporting to "judge" those qualifications—in reality add to them.

"Mr. LUCAS. The Senator referred to article I, section 5. What does he think the framers of the Constitution meant when they gave to each House the power to determine or to judge the qualifications, and so forth, of its own Members? [22]

"Mr. MURDOCK. I construe the term 'judge' to mean what it is held to mean in its common, ordinary usage. My understanding of the definition of the word 'judge' as a verb is this: When we judge a thing it is supposed that the rules are laid out; the law is there for us to look at and to apply to the facts.

"But whoever heard the word 'judge' used as meaning the power to add to what is already the law?" [23]

It was also suggested from the floor that the enumerated qualifications in § 3 were only a *minimum* which the Senate could supplement; and that the Founding Fathers so intended by using words of the negative. To which Senator Murdock replied—

"Mr. President, I think it is the very distinguished and able Senator from Georgia who makes the contention that the constitutional provisions relating to qualifications, because they are stated in the negative—that is, 'no person shall be a Senator'—are merely restrictions or prohibitions on the State; but —and I shall read it later on—when we read what Madison said, when we read what Hamilton said, when we read what the other framers of the Constitution said on that question, there cannot be a doubt as to what they intended and what they meant.[24]

* * * * *

"Madison knew that the qualifications should be contained in the Constitution and not left to the whim and caprice of the legislature.[25]

* * * * *

"Bear in mind, that the positive or affirmative phraseology was not changed to the negative by debate or by amendment in the convention, but it was changed by the committee of which Madison was a member, the committee on style." [26]

The Senate was nonetheless troubled by the suggestion that the Constitution compelled it to accept anyone whom the people might elect, no matter how egregious and even criminal his behavior. No need to worry, said Murdock. It is true that the Senate cannot invoke its majority power to "judge" under Art. I, § 5, cl. 1, as a device for excluding men elected by the people who possess the qualifications enumerated by the Constitution. But it does have the power under Art. I, § 5, cl. 2, to expel anyone it designates by a two-thirds vote. Nonetheless, he urged the Senate not to bypass the two-thirds requirement for expulsion by wrongfully invoking its power to exclude.[27]

Mr. LUCAS. The position the Senator from Utah takes is that it does not make any difference what a Senator does in the way of crime, that whenever he is elected by the people of his State, comes here with bona fide credentials, and there is no fraud in the election, the Senate cannot refuse to give him the oath. That is the position the Senator takes?

"Mr. MURDOCK. That is my position; yes.[28]

* * * * *

"My position is that we do not have the right to exclude anyone who comes here clothed with the proper credentials and possessing the constitutional qualifications. My position is that we do not have the right under the provision of the Constitution to which the Senator from Florida referred, to add to the qualifications. My position is that the State is the sole judge of the intellectual and the moral qualifications of the representatives it sends to Congress." [29]

"Mr. MURDOCK [quoting Senator Philander Knox]. 'I know of no defect in the plain rule of the Constitution for which I am contending. . . . I cannot see that any danger to the Senate lies in the fact than an improper character cannot be excluded without a two-thirds vote. It requires the unanimous vote of a jury to convict a man accused of a crime; it should require, and I believe that it does require, a two thirds vote to eject a Senator from his position of honor and power, to which he has been elected by a sovereign State.' " [30]

Thus, after a year of debate, on March 27, 1942, the Senate overruled the recommendation of its committee and voted 52 to 30 to seat Langer.

I believe that Senator Murdock stated the correct constitutional principle governing the present case.

FOOTNOTES

[1] U.S. Const., Art. I, § 2, cl. 2.

"No Person shall be a Representative who shall not have attained to the Age of twenty-five Years, and been seven Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State in which he shall be chosen."

[2] The Constitutional Convention had the occasion to consider several proposals for giving Congress discretion to shape its own qualifications for office and explicitly rejected them. James Madison led the opposition by arguing that such discretion would be "an improper and dangerous power in the Legislature. The qualifications of electors and elected were fundamental articles in a Republican Gov't and ought to be fixed by the Constitution. If the Legislature could regulate those of either, it can by degrees subvert the Constitution." 2 Farrand, Records of the Federal Convention of 1787 249–251 (1911). Alexander Hamilton echoed that same conclusion:

"The qualifications of the persons who may choose or be chosen, as has been remarked upon other occasions, are defined and fixed

in the Constitution, and are unalterable by the legislature." The Federalist No. 60, at 371 (1961).

And so, too, the early Congress of 1807 decided to seat Representative-elect William McCreery on the ground that its power to "judge" was limited by the enumerated qualifications.

"The Committee of Elections considered the qualifications of members to have been unalterably determined by the Federal Convention, unless changed by an authority equal to that which framed the Constitution at first. . . . Congress, by the Federal Constitution, are not authorized to prescribe the qualifications of their own members, but they are authorized to judge of their qualifications; in doing so, however, they must be governed by the rules prescribed by the Federal Constitution, and by them only." 17 Annals of Congress 871 (1807) (remarks of Rep. Findley, Chairman of House Committee of Elections).

Constitutional scholars of two centuries have reaffirmed the principle that congressional power to "judge" the qualifications of its members is limited to those enumerated in the Constitution. J. Story, Commentaries on the Constitution 462 (5th ed. 1902); C. Warren, The Making of the Constitution 420–426 (1937). See also remarks by Emmanuel Celler, Chairman of the House Select Committee which inquired into the qualifications of Adam Clayton Powell, Jr., and which recommended seating him:

"The Constitution lays down three qualifications for one to enter Congress—age, inhabitancy, citizenship. Mr. Powell satisfies all three. The House cannot add to these qualifications." CONGRESSIONAL RECORD, vol. 113, pt. 4, p. 4998.

[3] *Baker* v. *Carr*, 369 U.S. 186, 242, n. 2 (DOUGLAS, J., concurring).

[4] The question whether Congress has authority under the Constitution to add to enumerated qualifications for office is itself a federal question within the particular expertise of this Court. *Baker* v. *Carr*, 369 U.S. 186, 211. Where that authority has been exceeded, redress may be properly sought here. *Marbury* v. *Madison*, 1 Cranch. 137. Congress itself suspected no less in deciding to exclude Rep. Powell.

"[C]ases may readily be postulated where the action of a House in excluding or expelling a Member may directly impinge upon rights under other provisions of the Constitution. In such cases, the unavailability of judicial review may be less certain. Suppose, for example, that a Member was excluded or expelled because of his religion or race, contrary to the equal protection clause, or for making an unpopular speech protected by the first amendment. . . . Exclusion of a Member-elect on grounds other than age, citizenship, or inhabitancy could raise an equally serious constitutional issue." H.R. Rep. No. 27, 90th Cong., 1st Sess., 30 (1967).

OPINION OF MR. JUSTICE STEWART, DISSENTING

I believe that events which have taken place since certiorari was granted in this case on November 18, 1968, have rendered it moot, and that the Court should therefore refrain from deciding the novel, difficult, and delicate constitutional questions which the case presented at its inception.

I

The essential purpose of this lawsuit by Congressman Powell and members of his constituency was to regain the seat from which he was barred by the 90th Congress. That purpose, however, became impossible of attainment on January 3, 1969, when the 90th Congress passed into history and the 91st Congress came into being. On that date, the petitioner's prayer for a judicial decree restraining enforcement of House Resolution No. 278 and commanding the respondents to admit Congressman Powell to membership in the 90th Congress became incontestably moot.

The petitioners assert that actions of the House of Representatives of the 91st Congress have prolonged the controversy raised by Powell's exclusion and preserved the need for a judicial declaration in this case. I believe, to the contrary, that the conduct of the present House of Representatives confirms the mootness of the petitioners' suit against the 90th Congress. Had Powell been excluded from the 91st Congress, he might argue that there was a "continuing controversy" concerning the exclusion attacked in this case.[1] And such an argument might be sound even though the present House of Representatives is a distinct legislative body rather than a continuation of its predecessor,[2] and though any grievance caused by conduct of the 91st Congress is not redressable in this action. But on January 3, 1969, the House of Representatives of the 91st Congress admitted Congressman Powell to membership, and he now sits as the Representative of the 18th Congressional District of New York. With the 90th Congress terminated and Powell now a member of the 91st, it cannot seriously be contended that there remains a judicial controversy between these parties over the power of the House of Representatives to exclude Powell and the power of a court to order him reseated. Understandably, neither the Court nor the petitioners advance the wholly untenable proposition that the continuation of this case can be founded on the infinitely remote possibility that Congressman Powell, or any other Representative, may someday be excluded for the same reasons or in the same manner. And because no foreseeable possibility of such future conduct exists, the respondents have met their heavy burden of showing that "subsequent events made it absolutely clear that the allegedly wrongful behavior could not reasonably be expected to recur." *United States* v. *Concentrated Phosphate Export Assn.*, 393 U.S. 199, 203.[3]

The petitioners further argue that this case cannot be deemed moot because of the principle that "the voluntary abandonment of a practice does not relieve a court of adjudicating its legality . . . ." *Gray* v. *Sanders*, 372 U. S. 368, 376.[4] I think it manifest, however, that this principle and the cases enunciating it have no application to the present case. In the first place, this case does not involve "the voluntary abandonment of a practice." Rather it became moot because of an event over which the respondents had no control—the expiration of the 90th Congress. Moreover, unlike the cases relied on by the petitioners, there has here been no on-going course of conduct of indefinite duration against which a permanent injunction is necessary. Thus, it cannot be said of the respondents' actions in this case, as it was of the conduct sought to be enjoined in *Gray*, for example, that "the practice is deeply rooted and long standing," *id.*, or that, without judicial relief, the respondents would be "free to return to [their] old ways." *United States* v. *W. T. Grant Co.*, 345 U. S. 629, 632.[5] Finally, and most important, the "voluntary abandonment" rule does not dispense with the requirement of a continuing controvery, nor could it under the definition of the judicial power in Article III of the Constitution. Voluntary cessation of unlawful conduct *does* make a case moot "if the defendant can demonstrate that 'there is no reasonable expectation that the wrong will be repeated.'" *Id.*, at 633.[6] Since that is the situation here, the case would be moot even if it could be said that it became so by the House's "voluntary abandonment" of its "practice" of excluding Congressman Powell.

The petitioners' proposition that conduct of the 91st Congress has perpetuated the controversy is based on the fact that House Resolution No. 2—the same resolution by which the House voted to seat Powell—fined him $25,000, and provided that his seniority was to commence as of the date he became a member of the 91st Congress.[7] That punishment, it is said, "arises out of the prior actions of the House which originally impelled this action." It is indisputable, however, that punishment of a House member

Footnotes at end of article.

involves constitutional issues entirely distinct from those raised by exclusion,[8] and that a punishment in one Congress is no legal sense a "continuation" of an exclusion from the previous Congress. A judicial determination that the exclusion was improper would have no bearing on the constitutionality of the punishment, nor any conceivable practical impact on Powell's status in the 91st Congress. It is thus clear that the only connection between the exclusion by the 90th Congress and the punishment by the 91st is that they were evidently based on the same asserted derelictions of Congressman Powell. But this action was not brought to exonerate Powell or to expunge the legislative findings of his wrong-doing; its only purpose was to restrain the action taken in consequence of those findings—Powell's exclusion.

Equally without substance is the petitioners' contention that this case is saved from mootness by application of the asserted "principle" that a case challenging allegedly unconstitutional conduct cannot be rendered moot by further unconstitutional conduct of the defendants. Under this hypothesis, it is said that the "Court can not determine that the conduct of the House on January 3, 1969 has mooted this controversy without inferentially, at least, holding that the action of the House of that day was legal and constitutionally permissible." If there is in our jurisprudence any doctrine remotely resembling the petitioners' theory—which they offer without reference to any authority—it has no conceivable relevance to this case. For the events of January 3, 1969, that made this case moot were the termination of the 90th Congress and Powell's seating in the 91st, *not* the punishment which the petitioners allege to have been unconstitutional. That punishment is wholly irrelevant to the question of mootness and is in no wise before the Court in this case.

The passage of time and intervening events have, therefore, made it impossible to afford the petitioners the principal relief they sought in this case. If any aspect of the case remains alive, it is only Congressman Powell's individual claim for the salary of which he was deprived by his absence from the 90th Congress.[9] But even if that claim can be said to prevent this controversy from being moot, which I doubt, there is no need to reach the fundamental constitutional issues that the Court today undertakes to decide.

This Court has not in the past found that an incidental claim for back pay preserves the controversy between a legislator and the legislative body which evicted him, once the term of his eviction has expired. *Alejandrino* v. *Quezon*, 271 U.S. 528, was a case nearly identical to that before the Court today. The petitioner was a member of the Senate of the Philippines who had been suspended for one year for assaulting a colleague. He brought an action in the Supreme Court of the Philippines against the elected members of the Senate[10] and its officers and employees (the President, Secretary, Sergeant-at-Arms, and Paymaster), seeking a writ of mandamus and an injunction restoring him to his seat and to all the privileges and emoluments of office. The Supreme Court of the Philippines dismissed the action for want of jurisdiction and Alejandrino brought the case here,[11] arguing that the suspension was not authorized by the Philippine Autonomy Act, a statute which incorporated most of the provisions of Article I of the United States Constitution.[12]

Because the period of the suspension had expired while the case was pending on certiorari, a unanimous Court, in an opinion by Chief Justice Taft, vacated the judgment and remanded the case with directions to dismiss it as moot. To Alejandrino's claim that his right to back pay kept the case alive, the Court gave the following answer, which, because of its particular pertinency to this case, I quote at length:

"It may be suggested, as an objection to our vacating the action of the court below, and directing the dismissal of the petition as having become a moot case, that, while the lapse of time has made unnecessary and futile a writ of mandamus to restore Senator Alejandrino to the Island Senate, there still remains a right on his part to the recovery of his emoluments, which were withheld during his suspension, and that we ought to retain the case for the purpose of determining whether he may not have a mandamus for this purpose. . . . It is difficult for the Court to deal with this feature of the case, which is really only a mere incident to the main question made in the petition and considered in the able and extended brief of counsel for the petitioner, and the only brief before us. That brief is not in any part of it directed to the subject of emoluments, nor does it refer us to any statute or to the rules of the Senate by which the method of paying Senators' salaries is provided, or in a definite way describe the duties of the officer or officers or committee charged with the ministerial function of paying them.

* * * * *

". . . the remedy of the Senator would seem to be by mandamus to compel such official in the discharge of his ministerial duty to pay him the salary due, and the presence of the Senate as a party would be unnecessary. Should that official rely upon the resolution of the Senate as a reason for refusing to comply with his duty to pay Senators, the validity of such a defense and the validity of the resolution might become a judicial question affecting the personal right of the complaining Senator, properly to be disposed of in such action, but not requiring the presence of the Senate as a party for its adjudication. The right of the petitioner to his salary does not therefore involve the very serious issue raised in this petition as to the power of the Philippine Supreme Court to compel by mandamus one of the two legislative bodies constituting the legislative branch of the Government to rescind a resolution adopted by it in asserted lawful discipline of one of its members, for disorder and breach of privilege. We think, now that the main question as to the validity of the suspension has become moot, the incidental issue as to the remedy which the suspended Senator may have in recovery of his emoluments, if illegally withheld, should properly be tried in a separate proceeding against an executive officer or officers as described. As we are not able to derive from the petition sufficient information upon which properly to afford such a remedy, we must treat the whole cause as moot and act accordingly. This action on our part of course is without prejudice to a suit by Senator Alejandrino against the proper executive officer or committee by way of mandamus or otherwise to obtain payment of the salary which may have been unlawfully withheld from him." 271 U.S., at 533, 534–535.[13]

Both of the factors on which the Court relied in *Alejandrino* are present in this case. Indeed, the salary claim is an even more incidental and subordinate aspect of this case than it was of *Alejandrino*.[14] And the availability of effective relief for that claim against any of the present respondents is far from certain. As in *Alejandrino*, the briefs and memoranda submitted by the parties in this case contain virtually no discussion of this question—the only question of remedy remaining in the case. It appears from relevant provisions of law, however, that the Sergeant-at-Arms of the House—an official newly elected by each Congress[15]—is responsible for the retention and disbursement to Congressmen of the funds appropriated for their salaries. These funds are payable from the United States Treasury[16] upon requisitions presented by the Sergeant-at-Arms, who is entrusted with keeping the books and accounts "for the compensation and mileage of Members."[17] A Congressman who has presented his credentials and taken the oath of office[18] is entitled to be paid monthly on the basis of certificates of the Clerk[19] and Speaker of the House.[20] Powell's prayer for a mandamus and an injunction against the Sergeant-at-Arms is presumably based on this statutory scheme.

Several important questions remain unanswered, however, on this record. Is the Sergeant-at-Arms the only necessary defendant? If so, the case is surely moot as to the other respondents, including the House members, and they should be dismissed as parties on that ground rather than after resolution of difficult constitutional questions under the Speech and Debate Clause. But it is far from clear that Powell has an appropriate or adequate remedy against the remaining respondents. For if the Speaker does not issue the requisite certificates and Congress does not rescind Resolution 278, can the House agents be enjoined to act in direct contravention of the orders of their employers? Moreover, the office of Sergeant-at-Arms of the 90th Congress has now expired, and the present Sergeant-at-Arms serves the 91st Congress. If he were made a party in that capacity, would he have the authority—or could the 91st Congress confer the authority—to disburse money for a salary owed to a Representative in the previous Congress, particularly one who never took the oath of office? Presumably funds have not been appropriated to the 91st Congress or requisitioned by its Sergeant-at-Arms for the payment of salaries to members of prior Congresses. Nor is it ascertainable from this record whether money appropriated for Powell's salary by the 90th Congress, if any, remains at the disposal of the current House and its Sergeant-at-Arms.[21]

There are, then substantial questions as whether, on his salary claim, Powell could obtain relief against any or all of these respondents. On the other hand, if he was entitled to salary as a member of the 90th Congress, he has a certain and completely satisfactory remedy in an action for a money judgment against the United States in the Court of Claims.[22] While that court could not have ordered Powell reseated or entered a declaratory judgment on the constitutionality of his exclusion,[23] it is not disputed that the Court of Claims could grant him a money judgment for lost salary on the ground that his discharge from the House violated the Constitution. I would remit Congressman Powell to that remedy, and not simply because of the serious doubts about the availability of the one he now pursues. Even if the mandatory relief sought by Powell is appropriate and could be effective, the Court should insist that the salary claim be litigated in a context that would clearly obviate the need to decide some of the constitutional questions with which the Court grapples today, and might avoid them altogether.[24] In an action in the Court of Claims for a money judgment against the United States, there would be no question concerning the impact of the Speech and Debate Clause on a suit against members of the House of Representatievs and their agents, and questions of jurisdiction and justiciability would, if raised at all, be in vastly different and more conventional form.

In short, dismissal of Powell's action against the legislative branch would not in the slightest prejudice his money claim,[25] and it would avoid the necessity of deciding constitutional issues which, in the petitioners' words, "touch the bedrock of our political system [and] strike at the very heart of representative government." If the fundamental principles restraining courts from unnecessarily or prematurely reaching out to decide grave and perhaps unsettling constitutional questions retain any vitality, see *Ashwander*

Footnotes at end of article.

v. *TVA*, 297 U.S. 288, 346–348 (Brandeis, J., concurring), surely there have been few cases more demanding of their application than this one. And those principles are entitled to special respect in suits, like this suit, for declaratory and injunctive relief, which it is within a court's broad discretion to withhold. "We have cautioned against declaratory judgments on issues of public moment, even falling short of constitutionality, in speculative situations." *Public Affairs Press* v. *Rickover*, 369 U.S. 111, 112. "Especially where governmental action is involved, courts should not intervene unless the need for equitable relief is clear, not remote or speculative." *Eccles* v. *Peoples Bank of Lakewood Village*, 333 U.S. 426, 431.

If this lawsuit is to be prolonged, I would at the very least not reach the merits without ascertaining that a decision can lead to some effective relief. The Court's remand for determination of that question implicitly recognizes that there may be no remaining controversy between the Petitioner Powell and any of these respondents redressable by a court, and that its opinion today may be wholly advisory. But I see no good reason for any court even to pass on the question of the availability of relief against any of these respondents. Because the essential purpose of the action against them is no longer attainable and Powell has a fully adequate and far more appropriate remedy for his incidental back pay claim, I would withhold the discretionary relief prayed for and terminate this lawsuit now. Powell's *claim* for salary may not be dead, but this *case* against all these respondents is truly moot. Accordingly, I would vacate the judgment below and remand the case with directions to dismiss the complaint.

FOOTNOTES

[1] 1 See, *e.g.*, *United States* v. *Concentrated Phosphate Export Assn.*, 393 U.S. 199, 202–204; *Carroll* v. *President and Commissioners of Princess Ann*, 393 U.S. 175, 178–179.

[2] See *Gojack* v. *United States*, 384 U.S. 702, 707, n. 4 ("Neither the House of Representatives nor its committees are continuing bodies."); *McGrain* v. *Daugherty*, 273 U.S. 135, 181. Forty-one of the present members of the House were not members of the 90th Congress; and two of the named defendants in this action, Messrs. Moore and Curtis, are no longer members of the House of Representatives. Moreover, the officer-employees of the House, such as the Sergeant-at-Arms, are re-elected by each new Congress. See n. 15, *infra*.

[3] See also *United States* v. *W. T. Grant Co.*, 345, U.S. 629, 633; *United States* v. *Aluminum Co. of America*, 148 F. 2d 416, 448. The Court has only recently concluded that there was no "controversy" in *Golden* v. *Zwickler*, —— U.S. ——, because of "the fact that it was most unlikely that the congressman would again be a candidate for Congress." *Id.*, at ——. It can hardly be maintained that the likelihood of the House of Representatives' again excluding Powell is any greater.

[4] See also *United States* v. *W. T. Grant Co.*, 345 U.S. 629, 632–633; *Local 74, United Bhd of Carpenters & Joinders* v. *NLRB*, 341 U.S. 707, 715; *Walling* v. *Helmerich & Payne, Inc.*, 323 U.S. 37, 43; *Hecht Co.* v. *Bowles*, 321 U.S. 321, 327; *United States* v. *Trans-Missouri Freight Assn.*, 166 U.S. 290, 307–310.

[5] With the exception of *Gray*, the "continuing controversy" cases relied on by the petitioners were actions by the Government or its agencies to halt illegal conduct of the defendants, and, by example, of others engaged in similar conduct. See cases cited, *supra*, nn. 1, 3, 4. The principle that voluntary abandonment of an illegal practice will not make an action moot is especially, if not exclusively, applicable to such public law enforcement suits.

"Private parties may settle their controversies at any time, and rights which a plaintiff may have had at the time of the commencement of the action may terminate before judgment is obtained or while the case is on appeal, and in any such case the court, being informed of the facts, will proceed no further in the action. Here, however, there has been no extinguishment of the rights . . . of the public, the enforcement of which the Government has endeavored to procure by a judgment of a court . . . . The defendants cannot foreclose those rights nor prevent the assertion thereof by the Government as a substantial trustee for the public under the act of Congress, by [voluntary cessation of the challenged conduct]." *United States* v. *Trans-Missouri Freight Assn.*, 166 U.S., at 309. The considerations of public enforcement of a statutory or regulatory scheme which inhere in those cases are not present in this litigation.

[6] Certainly in every decision relied on by the petitioners the Court did not reject the mootness argument solely on the ground that the illegal practice had been voluntarily terminated. In each it proceeded to determine that there was in fact a continuing controversy.

[7] House Resolution No. 2 provided in pertinent part:

"(2) That as punishment Adam Clayton Powell be and he hereby is fined the sum of $25,000, said sum to be paid to the Clerk to be disposed of by him according to law. The Sergeant at Arms of the House is directed to deduct $1,150 per month from the salary otherwise due the said Adam Clayton Powell, and pay the same to said Clerk until said $25,000 fine is fully paid.

"(3) That as further punishment the seniority of the said Adam Clayton Powell in the House of Representatives commence as of the date he takes the oath as a Member of the 91st Congress."

The petitioners' argument that the case is kept alive by Powell's loss of seniority, see *ante*, at —, is founded on the mistaken assumption that the loss of seniority is attributable to the exclusion from the 90th Congress and that seniority would automatically be restored if that exclusion were declared unconstitutional. But the fact is that Powell was stripped of seniority by the action of the 91st Congress, action which is not involved in this case and which would not be affected by judicial review of the exclusion from the 90th Congress. Moreover, even if the conduct of the 91st Congress were challenged in this case, the Court would clearly have no power whatsoever to pass upon the propriety of such internal affairs of the House of Representatives.

[8] Article I, § 5, of the Constitution specifically empowers each House to "punish its Members for disorderly Behaviour."

[9] The salary claim is personal to Congressman Powell, and the other petitioners therefore clearly have no further interest in this lawsuit.

[10] The Philippines Senate was composed of 24 Senators, 22 of whom were elected, and two of whom were appointed by the Governor General. Alejandrino was one of the two appointees. See 271 U.S., at 531–532.

[11] Under the Philippine Autonomy Act, 39 Stat. 545, this Court had jurisdiction to examine by writ of error the final judgments and decrees of the Supreme Court of the Philippine Islands in cases under the Constitution or statutes of the United States. A subsequent statute substituted the writ of certiorari, 39 Stat. 726.

[12] "Section 18 [of the Autonomy Act] provides that the Senate and House respectively shall be the sole judges of the elections, returns and qualifications of their elective members, and each House may determine the rules of its proceedings, punish its members for disorderly behavior, and with the concurrence of two-thirds expel an elective member. The Senators and Representatives shall receive an annual compensation for their services to be ascertained by law and paid out of the Treasury of the Philippine Islands. Senators and Representatives shall in all cases, except treason, felony and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses and in going to and returning from the same; and for any speech or debate in either House they shall not be questioned in any other place." 271 U.S., at 532.

[13] The petitioners rely on the following passage from *Bond* v. *Floyd*, 385 U.S. 116, 128, n. 4, as dispositive of their contention that the salary claim prevents this case from being moot:

"A question was raised in oral argument as to whether this case might not be moot since the session of the House which excluded Bond was no longer in existence. The State has not pressed this argument, and it could not do so, because the State has stipulated that if Bond succeeds on this appeal he will receive back salary for the term from which he was excluded."

I do not believe that this off-hand dictum in *Bond* is determinative of the issue of mootness in this case. In the first place, as the Court in *Bond* noted, it was not there contended by any party that the case was moot. Moreover, contrary to the implication of the statement, the legislative term from which Bond was excluded had not ended at the time of the Court's decision. (The Court's decision was announced on December 5, 1966; Bond's term of office expired on December 31, 1966.) In any event, he had not been seated in a subsequent term, so the continuing controversy had not been rendered clearly moot by any action of the Georgia House, as it has here by the House of Representatives of the 91st Congress. No one suggested in *Bond* that the money claim was the only issue left in the case. Furthermore, the considerations which governed the Court's decision in *Alejandrino* were simply not present in *Bond*. Because of the State's stipulation, there was no doubt, as there is here, see *infra*, at ——, that the Court's decision would lead to effective relief with respect to Bond's salary claim. And finally, there was no suggestion that Bond had an alternative remedy, as Powell has here, see *infra*, at ——, by which he could obtain full relief without requiring the Court to decide novel and delicate constitutional issues.

[14] *Alejandrino* was the only petitioner in the case, and since he was an appointed Senator, it appears that there was no group of voters who remained without representation of their choice in the Senate during his suspension.

[15] 2 U.S.C. § 83.

[16] U.S. Const., Art. I, § 6; 2 U.S.C. § 47.

[17] 2 U.S.C. §§ 80, 78.

[18] 2 U.S.C. § 35.

[19] 2 U.S.C. § 34.

[20] 2 U.S.C. § 48.

[21] The respondents allege without contradiction that the Sergeant-at-Arms does not have sufficient funds to pay Congressman Powell's back salary claims. Separate appropriations for the salaries of Congressmen are made in each fiscal year, see, *e.g.*, 80 Stat. 354, 81 Stat. 127, 82 Stat. 398, and, according to the respondents, "it is the custom of the Sergeant to turn back to the Treasury all unexpended funds at the end of each fiscal year." Thus, the only funds still held by the Sergeant are said to be those appropriated for the present fiscal year commencing July 1, 1968.

[22] "The Court of Claims shall have jurisdiction to render judgment upon any claim against the United States founded either upon the Constitution, or any Act of Congress, ..." 28 U.S.C. § 1491. The district courts have concurrent jurisdiction over such claims only in amounts less than $10,000. 28 U.S.C. § 1346.

[23] *United States* v. *King*, —— U.S. ——. The petitioners suggest that the inability of the Court of Claims to grant such relief might make any remedy in that court inadequate. But since Powell's only remaining interest in the case is to collect his salary, a

money judgment in the Court of Claims would be just as good as, and probably better than, mandatory relief against the agents of the House. The petitioners also suggest that the Court of Claims would be unable to grant relief because of the pendency of Powell's claim in another court, 28 U.S.C. § 1500, but that would, of course, constitute no obstacle if, as I suggest, the Court should order this action dismissed on grounds of mootness.

[24] It is possible, for example, that the United States in such an action would not deny Powell's entitlement to the salary but would seek to offset that sum against the amounts which Powell was found by the House to have appropriated unlawfully from Government coffers to his own use.

[25] Relying on *Bank of Marin* v. *England*, 385 U.S. 99, 101, the petitioners complain that it would impose undue hardship on Powell to force him to "start all over again" now that he has come this far in the present suit. In view of the Court's remand of this case for further proceedings with respect to Powell's remedy, it is at least doubtful that remitting him to an action in the Court of Claims would entail much more cost and delay than will be involved in the present case. And the inconvenience to litigants of further delay or litigation has never been deemed to justify departure from the sound principle, rooted in the Constitution, that important issues of constitutional law should be decided only if necessary and in cases presenting concrete and living controversies.

PRO DDT: ITS USE SAVES UNTOLD LIVES

(Mr. WHITTEN asked and was given permission to extend his remarks at this point in the RECORD and to include a letter from Thomas H. Jukes.)

Mr. WHITTEN. Mr. Speaker, the attacks on essential chemical pesticides, insecticides and fungicides continues. These attacks threaten our standard of living, our greatly improved health, and our increasing length of life. Perhaps the most bitter attack has been directed toward DDT.

As perhaps most of you know, as chairman of the Agriculture Appropriations Subcommittee I have done a great deal of study in this area, and wrote the book "That We May Live," published by D. Van Nostrand Co., Princeton, N.J.

In this connection, I feel it would be very much worthwhile for the membership to read the letter which I have attached to my remarks, sent by Mr. Thomas H. Jukes to Senator GAYLORD NELSON in response to a speech made by Senator NELSON on the Senate floor on May 5, 1969, which appears on page 11348 of the CONGRESSIONAL RECORD of that date. Mr. Jukes is a biochemist, a professor of medical physics, and associate director of the space sciences laboratory of the University of California at Berkeley.

The letter follows:

BERKELEY, CALIF., *May 14, 1969.*

HON. GAYLORD NELSON,
Senate Office Building,
Washington, D.C.

DEAR SENATOR NELSON: I have read with interest your remarks on page 11348 of the *Congressional Record* for May 5, 1969, and I hope you will permit me to discuss some of the matters you have mentioned.

(1) Your first point concerns the selective toxicity of DDT. You state, "Most pesticides, especially DDT and the chlorinated hydrocarbons, cannot distinguish between man's friends and man's enemies. They are almost as lethal to the beneficial insects and creatures as they are to destructive ones."

DDT is relatively innocuous, at recommended conditions for use, to warm-blooded animals and it kills some of the most dangerous pests that confront us; pests that are not deadly in themselves, but are carriers of lethal diseases, including malaria, yellow fever, typhus fever, plague and many others. In addition, many intestinal diseases are carried by houseflies. What "friends" of man can outrank this array of mortal enemies? Some beneficial insects are killed by DDT, of course, but some, such as honeybees, are resistant. So are earthworms (Scientific American, April 1969). I would not suggest that we can get "something for nothing," but the balance is heavily in favor of DDT. Wild animals benefit from DDT, because parasitic insects, ticks and lice suck the blood of animals and carry animal diseases including cattle fever, piroplasmosis, sleeping sickness and heartworm. Even oysters have been claimed to benefit from destruction of barnacles by DDT.

These facts have been lost in the clamor. I refer you to the monumental bibliography of 3404 references compiled by the Division of Biology and Agriculture, National Academy of Sciences, June 1959 (Technical Report, WADC, 55–16, Volume III).

The balance is overwhelmingly in favor of DDT. No humanitarian, cognizant of malaria and typhus, can reach any other conclusion.

(2) Your second point states,

"From the information that has been available to my office, only a few studies—including one at a prison and another at a chemical plant—have been reported. One of the greatest difficulties in evaluating the effects of pesticides on human health has been the lack of any comprehensive research."

The two studies which you mention, both of which were carried out by the U.S. Public Health Service, were comprehensive in scope and demonstrated the breakdown of DDT and excretion of a water-soluble metabolite of DDT by the human body. Moreover, the Montrose Study reached back for 19 years, a period which is almost equal to a generation.

I do not think we can expect so long an experiment to be repeated. The Georgia prisoner study involved a tremendous amount of work, because the subjects were dosed daily for about two years. How many scientists can be induced to spend their time in repeating toxicity tests with a substance that has been found harmless? There is too much other work to do, with the *real* threats to our environment, such as smog and water pollution.

There are many other observations on the low toxicity of DDT, of course, such as the body-dusting program for typhus, carried out on thousands of people without adverse effects; the spraying of millions of houses in India; and other reference material which I enclose. Dr. J. M. Barnes has commented:

"Unfortunately DDT is relatively slowly metabolized and excreted by the mammal and by virtue of its solubility characteristics tends to get laid down in tissue fat. Here it would have remained as an innocent and unrecognized passenger but for the fact that the chemists invented a sensitive chemical method since further enhanced by the gas-liquid chromatographic technique capable of detecting the chlorine and indicating its source even in minute quantities. Thus it has become possible to establish an anxiety neurosis in respect to a few parts per million of a compound in a tissue such as fat where a few parts per thousand in the whole animal are of no toxicological importance. Unless epidemiological studies on the health of people who have been heavily exposed to DDT for 20 years or more reveal an unsuspected long-term toxic effect, this insecticide will go down in history as one that has killed more insects and saved more people than any other substance."

DDT in large doses (5 grams) is being used as an antidote for barbiturate poisoning in attempted suicides, so Dr. Richard Rappolt of San Francisco informs me.

(3) In your third point, you cite the concentration of DDT along the "food chain." Professor S. A. Peoples has shown that a plateau is reached at which intake is balanced by breakdown and excretion in dairy cattle. However, you support your statement by citing DDD rather than DDT. DDD is not DDT. DDD was used in Clear Lake because it is harmless to fish, in contrast to DDT. Very little water flows out of Clear Lake, so that the DDD did indeed tend to concentrate. Despite Miss Carson's lyrical prose on the grebes, the inhabitants of the Clear Lake area continued to demand gnat control. When the control program was switched to mythyl parathion, the grebes came back (see enclosure). Concentration must be expressed in terms of quantity and effect.

(4) Your fourth point is that I erred in stating that the campaign against DDT was emotional and unscientific, and you mentioned three scientists. One of them was Dr. Risebrough, who made the following emotional statement in *Nature* for January 1969:

"The peregrine falcon is a species long highly revered and respected. G. H. Thayer has described it as 'the embodiment of noble rapacity and lonely freedom'."

A reverence for rapacity, however, is not the only matter to be considered.

I listened to an impassioned speech on pesticides by Dr. Risebrough in Berkeley in December 1968, in which he impugned the motivation and integrity of various scientists whose views differed from his, including Dr. Donald Spencer, an animal ecologist who worked for 29 years with the U.S. Fish and Wildlife Service. Dr. Risebrough also said that the results reported by scientists were dependent on the origin of their research funds. Numerous other examples of emotionalism could be cited, including Miss Carson's diatribes in which she accused reputable agricultural scientists of Lysenkoism. After Miss Carson's book, many people with various types of scientific training went on a sort of emotional binge against DDT. The Audubon Society in 1962 collected dead robins; the cause of death unidentified; and exhibited them in glass cases to arouse public sentiment against pesticides. Justice Douglas stated that a new Bill of Rights was needed against the "poisoners of the human race." I enclose a recent unscientific outburst that quotes Professor Cottam of the University of Wisconsin. Many opponents of DDT attempt to reinforce their attacks by verbal assaults on the free enterprise system, which they say is responsible for pesticides. The following passage was omitted by the *Washington Post* from my article.

"Incidentally, Communist China claimed to have produced 17,478,000 tons of insecticides in 1958, and to have applied 60 pounds to every acre of cultivated land in China in the same year. Benzene hexachloride and DDT were described as 'the mainstay in chemical control' of insect pests."

I criticized the 1963 report of the Wiesner Committee (the Panel on the Use of Pesticides) without response. Only one agricultural scientist (Dr. Horsfall) was on the committee. The others had little or no involvement with problems of food production or public health. They included two biochemists, a psychologist, a physical chemist and an anatomist. Their remoteness from realism is shown in the sentence quoted by you.

"Elimination of the use of persistent toxic insecticides should be the goal."

Insecticides have to be toxic to insects, of course, so this word is superfluous. The use of *persistent* insecticides is the greatest weapon of people in the tropics against the shortening of human life. No responsible

committee should make such a statement. It contrasts poorly with the excellent recommendation, quoted by you, that was made by the Environmental Pollution Panel of the President's Science Advisory Committee in 1965. Such research has been going forward, primarily in the laboratories of chemical industry, for many years. Further sensational newspaper attacks on pesticides will discourage it. Indeed, it is my understanding that Esso has already discontinued its program in this field because of the propaganda by Rachel Carson and her imitators.

(5) My fifth point concerns your statement that Dr. Wurster has answered "forcefully and directly" the many points raised by me in my article. I am not aware that this is so. I did not see Dr. Wurster's article or manuscript prior to publication, but I have now read it in the *Congressional Record*. From it, I learn that Dr. Wurster, an organic chemist, regards the saving of millions of human lives as "glamorous"; an interesting view of the motivation of the medical profession. (Has Dr. Wurster ever had typhus fever? Two of my scientist friends had it in the 1930's, and one of them died from the disease). I do not agree with his statement that DDT residues are more widely distributed than any other man-made chemicals. What about fall-out from nuclear bomb tests? What about the numerous chemicals from smog, industrial wastes, etc., that either cannot be detected or have not been looked for? What about chlorinated biphenyls?

He speaks of four properties of DDT:

(1) "Toxicity to almost all animal life rather than simply the insect pest." This statement is meaningless unless reduced to a quantitative basis.

(2) Persistence, so that it remains in it's original toxic form for a decade or longer. This depends entirely on the environment in which DDT finds itself. It is broken down by bacteria and by resistant houseflies, for example.

(3) Mobility.

This is a general property of matter in the dispersed state.

(4) Solubility properties that cause it to be accumulated by living organisms.

This is not an injurious property *per se*—it is a property of calcium, for example. We are brought back to the point of whether the accumulation is injurious and, if so: is the balance of effects in favor of or against DDT?

His statement that "up to 90 percent of all the birds in a community" have been killed by DDT, I simply do not believe. I criticized Dr. Wurster in "Science" (February 16, 1968) for extrapolating a sample of 12 robins to a "total" of 500 to 550. I do not trust such arithmetical gymnastics. Nor do I believe for one moment his statement that "hundreds, perhaps thousands, of municipalities in the Eastern United States have killed millions of birds" with DDT.

Dr. Wurster speaks of "large fish kills" from DDT. Yet the U.S. Fish and Wildlife Service have repeatedly reported that petroleum wastes kill so many more fish than do pesticides that the number killed by pesticides is almost insignificant by comparison. The story about liver enzymes I discount because DDT has been shown to affect the enzymes in question at extremely low levels (1 ppm of diet) and much higher levels of DDT (50 to 100 ppm) have been shown not to affect reproduction in rats or in several species of birds. The studies with rats were carried out by the Food and Drug Administration.

Dr. Wurster states that it is "irrelevant" to cite data from herbivorous birds such as "pheasants, quail, ... turkeys and other game species." Dr. Wurster needs to study ornithology: turkeys in California used to be raised on grasshoppers. Moreover, the data are not irrelevant, because pheasants and quail have been shown to be resistant to high levels of DDT in the diet, and pheasants have been found to contain extremely high levels of DDT as a result of consuming rice treated with DDT. There is another defect in this argument,—the data on the carnivorous birds selected by Dr. Wurster, such as ospreys and bald eagles, are poor because these birds are currently subject to other environmental effects, and there is a lack of controlled observations as I pointed out in my article.

His statement that a million salmon fry "were killed by DDT in Michigan hatcheries" has insufficient evidence to make it acceptable, and I am told it was more likely the result of a disease in view of later findings. Nor do I accept his inference that declines in commercial species of ocean fish are due to DDT. I saw the California sardine and the soupfin shark virtually disappear from the ocean off the California coast prior to World War II. The ocean is a lot bigger than Clear Lake.

Finally, since you cited Dr. Wurster as unemotional, I point out that his statement, "The propagandists with vested interest try to tell us that the food and fiber for a starving world depend on the continued use of DDT", in addition to being nonsense (other pesticides are far more profitable) is an emotional attempt at rabble-rousing.

With best regards,

THOMAS H. JUKES.

PRICE FOR SURTAX EXTENSION

(Mr. OBEY asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. OBEY. Mr. Speaker, there are many congressional liberals who are saying, and rightly so, that the price for their vote for the surtax is meaningful tax reform. I agree with that. But there is an even higher price which we should be demanding, and that is reform in the allocation of our national resources.

We are told by some that responsible men must support an extension of that surtax—that inflation can be beaten only with tight money and with the surtax. Let us look at these allegations in light of developments in the past year.

We have had tight money—in fact, we have had five hikes in the prime interest rate in the past 7 months. The most recent 1-percent increase is the sharpest jump in this century, and the prime interest rate is now at an unprecedented level of 8½ percent. Yet high interest rates have not stopped borrowing by large borrowers; they have only increased the burden on the small ones.

Certainly past experience has shown that trying to curb inflation solely by relying on tight money is like trying to pull a freight train with a gnat.

We have had the surtax a year. It has taken millions of dollars into the Federal Treasury and out of circulation in our economy. Yet, we have had a 5.4-percent increase in the Consumer Price Index from April of 1968 to April of 1969. Certainly other measures are in order.

Leaving aside the economic arguments, one could still accept the surtax if it would provide the revenue to meet the real needs of this Nation:

First, an attack upon pollution and the destruction of our environment;

Second, an attack upon our education needs;

Third, an adequate program for medical facilities and hospital construction;

Fourth, an adequate restructuring of manpower training programs; and

Fifth, a really significant reform of out-dated and self-defeating welfare programs.

But a review of the Nixon budget for fiscal year 1970 reveals that not even a serious attempt to meet these needs will be made.

That budget shows that:

First, while $1 billion has been authorized to aid local units of government for pollution abatement, the administration has only budgeted $214 million.

Second, while $295 million was authorized for hospital construction and modernization, the administration budgeted only $153.9 million.

Third, while $3.6 billion has been authorized for ESEA programs, the administration has budgeted only $1.4 billion.

Any thoughtful person would expect that with the further imposition of the surtax, the Federal Government would at least begin to close the cavernous gap between its promises and performance, its obligations and its actions. Tragically, the budget shows it has no such intention.

This means purely and simply that we are spending our money in the wrong places.

It means that our spending priorities are not in order.

It means that even with a continuation of the 10-percent surtax we will not have the money to meet the needs of a modern society.

It means that we will merely be adding additional millions to our present misallocation of fiscal resources.

We cannot afford that.

That is why, given the lack of determination on the part of both this administration and this Congress to rearrange our priorities, and put first things first, I will not—unless circumstances change—vote for an extension of the surtax.

CONGRESSMAN BOB ECKHARDT STATES HIS POSITION ON THE 10-PERCENT INCOME TAX SURCHARGE

(Mr. ECKHARDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKHARDT. Mr. Speaker, at this time we find ourselves constantly besieged with dramatic statements from the White House and Treasury telling of the dire consequences of a failure to pass legislation extending the 10-percent income tax surcharge before the end of this month. There seems to be almost a sense of panic over this; we are said to face anything from a case of German-type hyperinflation to a stock-market-crash depression. I am not going to be panicked into choosing a Nixon-type compromise: give a sop to the poor, continue tax dodges for the rich, and stick the middleman. There is a logical and practical alternative, one that will keep the pressure on the administration for tax reform. It would preserve and continue the economic restraining effects of the surcharge while allowing time for further consideration of its need.

While I do not fully agree with some of my colleagues that no action whatsoever should be taken on the surcharge until a tax reform bill is presented, I do believe that we need to serve notice on

the President that he will not have his way on this tax legislation without some firm, concrete action on tax reform.

What I am proposing is that Congress pass legislation extending the present withholding rate, which includes the 10-percent additional tax, without actually extending the surtax itself. The benefits of this action are many:

First. We would be able to avoid legislating on such an important matter under the pressure of a deadline.

Second. Many economists are convinced that we will be in the throes of a dangerous economic slowdown in the first quarter of 1970. If the Congress took no action other than to extend the withholding rate, the economy would be blessed by a great influx of spending money to the public at the time of its greatest need; that is, at tax refund time. If inflation is controlled or reversed, Congress would simply pass legislation lowering the withholding rate to its normal level.

Third. The Congress, without engaging in a blind guess, would then be able to decide if the surtax was or was not needed. Congress is pretty good at "hindsight," and it could use it. If the inflation continued unabated the surtax could be enacted retroactively while none of the necessary economic effects would be lost in the interim. Retroactivity would not hurt the taxpayer because he would have paid his taxes by the previous withholding.

Fourth. Tax reform minded Representatives will have the leverage that they have so long sought in this area. We will be able to put the heat on the President to push for tax reform without risking the soundness of the economy by a too early relatxation of fiscal restraint.

Fifth. Also, Congress would retain a real budget control. We could be satisfied that the cuts that are made by the administrative forces are not made in the programs most vital to cities and to the poor. Likewise, that some reductions are made in areas of extravagance like some military boondoggles. With the surtax question impending after the budget cuts, Congress would have potent bargaining strength.

But if we are to reduce exorbitant interest rates, we must take other restraining action. Repeal, flatly, the 7-percent investment credit with no loopholes for those interests who loudly protest.

The actual tax take would be a little less under my plan than in the case of an immediate extension of the surtax. This is because so many people are not subject to withholding and also because people might react to this action by increasing their spending in expectation of a large tax refund.

To counter these possibilities, I would favor an excess profits tax similar to those established during the Second World War and the Korean war. It is unfair for most to suffer increased wartime burdens while others enjoy increased wartime profits. I fully concur with the efforts of Senator McGOVERN in this area.

I think this program is reasonable and fair. I am open minded about alteration in procedure, but I shall not vote for a tax before assurances are made that the big squeeze will not continue to be on the middle-income taxpayer while the great benefits go to the war contractor, and inflation and military expenditures steal the chicken from the poor man's pot.

ONE-BANK HOLDING COMPANY ACT

(Mr. MOORHEAD asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MOORHEAD. Mr. Speaker, yesterday the Committee on Banking and Currency began executive sessions on the pending one-bank holding company legislation. I offered a substitute, and in view of the fact that a motion to table this substitute was defeated by a vote of 15 yeas and 20 noes, it would appear that this substitute may be the vehicle for marking up the one-bank holding company legislation.

In order that other Members and the public may have an opportunity to study this substitute, I include the substitute at this point in the RECORD:

SUBSTITUTE OFFERED BY MR. MOORHEAD

§ 1. Amendments to the Bank Holding Company Act

(a) Section references in this section refer to the sections of Public Law 511, 84th Congress, as amended.

(b) The first section is amended by striking "of 1956".

(c) Section 2(a) is amended to read:

"SEC. 2. (a) (1) Except as provided in paragraph (2) of this subsection, 'bank holding company' means any company that has control over any bank or over any company that is or becomes a bank holding company by virtue of this Act.

"(2) No company is a bank holding company by virtue of

"(A) its ownership or control of shares acquired by it in connection with its underwriting of securities if the shares are held only for such period of time as will permit the sale thereof on a reasonable basis.

"(B) its control of voting rights of shares acquired in the course of a proxy solicitation if the company was formed for the sole purpose of participating in that solicitation.

"(C) its ownership or control of shares acquired in securing or collecting a debt previously contracted in good faith, until two years after the date of acquisition.

"(D) its ownership or control of shares acquired by it of any State chartered bank or trust company which is wholly owned by thrift institutions and which restricts itself to the acceptance of deposits from thrift institutions, deposits arising out of the corporate business of its owners, and deposits of public moneys."

"(3) For the purposes of this Act, any successor to a bank holding company shall be deemed to be a bank holding company from the date on which the predecessor company became a bank holding company."

(d) Section 2(b) is amended (1) by inserting "limited partnership in which the value of the interests of the general partners is less than 25 percent of the value of the interests of all of the partners," immediately after "means any corporation," and (2) by inserting "in which the value of the interests of the general partners is 25 percent or more of the value of the interests of all of the partners" immediately after "any partnership".

(e) Section 2(d) is amended to read:

"(d) (1) Any given company is a subsidiary of any person having control over it.

"(2) Any given person has control

"(A) over any company which is a corporation if the person directly or indirectly or acting in concert with one or more other persons, or through one or more subsidiaries, has power to vote 25 percent or more of any class of voting securities of that corporation.

"(B) over any company which is a corporation or trust if the person controls in any manner the election of a majority of its directors or trustees.

"(C) over any company if the Board determines, after notice and opportunity for hearing, that the person directly or indirectly exercises a controlling influence over the management or policies of that company.

"(3) For the purposes of any proceeding under paragraph (2)(C) of this subsection, there is a presumption that any person who directly and indirectly holds with power to vote less than 5 percent of any class of voting securities of a given corporation does not have control of that corporation.

"(4) In any administrative or judicial proceeding under this Act, other than a proceeding under paragraph (2)(C) of this subsection, a person may not be held to have had control of any given corporation at any given time unless that person, at the time in question, directly and indirectly held with power to vote 5 percent or more of any class of voting securities of the corporation, or had already been found to have control in a proceeding under paragraph (2)(C)."

(f) Section 2 is amended by adding at the end thereof the following:

"(i) The term 'person' includes natural persons, companies, and all other entities cognizable as legal personalities.

"(j) The term 'thrift institution' means (1) a domestic building and loan or savings and loan association, (2) a cooperative bank without capital stock organized and operated for mutual purposes and without profit, or (3) a mutual savings bank not having capital stock represented by shares.

"(k) The term 'antitrust laws' means the Act of July 2, 1890 (the Sherman Antitrust Act, 15 U.S.C. 1–7), the Act of October 15, 1914 (the Clayton Act, 15 U.S.C. 12–27), and any other Acts in pari materia.

"(m) Neither this Act nor any regulation or order under this Act may be raised as a defense in any action under the antitrust laws, except that no criminal action may be brought under the antitrust laws based solely on an activity which the defendant was at the time specifically authorized to perform by an order of the Board, nor may damages be awarded in any civil action under antitrust laws based solely on such an activity."

(g) Section 3(a) is amended to read:

"SEC. 3. (a) (1) Except as provided in paragraph (2) of this subsection, without the prior approval of the Board under this section,

"(A) no action may be taken that causes any company to become a bank holding company.

"(B) no action may be taken that causes a bank to become a subsidiary of a bank holding company.

"(C) no bank holding company may acquire direct or indirect ownership or control of any voting shares of any bank if, after the acquisition, the holding company will directly or indirectly own or control more than 5 percent of the voting shares of the bank.

"(D) no bank holding company or subsidiary thereof, other than a bank, may acquire all or substantially all of the assets of a bank.

"(E) no bank holding company may merge or consolidate with any other bank holding company.

"(2) The prohibitions of paragraph (1) of this subsection do not apply to

"(A) the acquisition of shares by a bank in good faith in a fiduciary capacity, if the

shares (including any stock dividends or securities subsequently acquired by virtue of, in exchange for, or in the exercise of preemptive rights or privileges of, the shares originally acquired) are acquired in kind as part of the corpus of an estate or trust (other than a company as defined in section 2(b)) which is committed to the bank for administration, and the bank owns no shares of the same company which it has purchased (other than in the exercise of preemptive rights or privileges) for its own account or with funds under its control in any capacity.

"(B) shares acquired by a bank in the regular course of securing or collecting a debt previously contracted in good faith and which are disposed of within a period of two years after acquisition.

"(C) additional shares acquired by a bank holding company in a bank in which the bank holding company owned or controlled a majority of the voting shares prior to the acquisition."

(h) Section 3(d) is amended by changing "the effective date of this amendment" to read "July 1, 1966,".

(i) Section 3 is amended by adding the following new subsections at the end thereof:

"(e) The Board shall immediately notify the Attorney General of any approval by it of any proposed acquisition, merger, consolidation, or other transaction required to be approved under this section (referred to in this section as a 'bank acquisition'). If the Board finds that it must act immediately to prevent probable failure of a bank, a bank acquisition may be consummated immediately upon approval. In all other cases, a bank acquisition may not be consummated before the thirtieth calendar day after the date of approval by the Board. No action under the antitrust laws arising out of a bank acquisition may be brought after the expiration of this thirty-day period. The commencement of such an action shall stay the effectiveness of the Board's approval unless the court otherwise specifically orders. In any such action, the court shall review de novo the issues presented. In any judicial proceeding attacking any bank acquisition approved pursuant to this Act on the ground that the transaction alone and of itself constituted a violation of any antitrust laws other than section 2 of the Act of July 2, 1890 (section 2 of the Sherman Antitrust Act, 15 U.S.C. 2), the standards applied by the court shall be identical with those that the Board is directed to apply under this section. Upon the consummation of a bank acquisition in compliance with this section and after the termination of any antitrust litigation commenced within the period prescribed in this subsection, or upon the termination of that period if no such litigation is commenced therein, the transaction may not thereafter be attacked in any judicial proceeding on the ground that it alone and of itself constituted a violation of any antitrust laws other than section 2 of the Act of July 2, 1890 (section 2 of the Sherman Antitrust Act, 15 U.S.C. 2), but nothing in this section exempts any bank holding company involved in such a transaction from complying with the antitrust laws after the consummation of the transaction.

"(f) If any action brought under the antitrust laws arising out of any bank acquisition approved by the Board, the Board and any State banking supervisory agency having jurisdiction within the State involved may appear as a party of its own motion and as of right, and be represented by its counsel.

"(g) Any bank acquisition as to which no litigation was initiated by the Attorney General prior to July 1, 1966, shall be conclusively presumed not to have been in violation of the antitrust laws other than section 2 of the Act of July 2, 1890 (section 2 of the Sherman Antitrust Act, 15 U.S.C. 2).

"(h) Any court having pending before it after June 30, 1966, any litigation initiated under the antitrust laws by the Attorney General with respect to any bank acquisition shall apply the substantive law set forth in this section."

(j) Section 4(a)(1) is amended by striking "after the date of enactment of this Act".

(k) Section 4(b) is amended by changing "After two years from the date of enactment of this Act, no" to read "No".

(m) Section 4(c)(5) is amended to read:

"(5) shares acquired and held in the manner, kinds, and amounts specifically permissible for national banks under Federal statute law and regulations issued pursuant thereto;"

(n) Section 4(c)(8) is amended to read:

"(8) shares of any company all the activities of which are or after its acquisition are to be authorized under subsection (e) or (f) of this section;"

(o) Section 4(c)(9) is amended to read:

"(9) shares lawfully acquired and owned on December 31, 1968, in any company organized under the laws of a foreign country and which is principally engaged in banking or other financial operations outside the United States;"

"(p) Section 4 is amended by adding at the end thereof the following new subsections:

"(e) Except for functions performed by a bank holding company which is a bank, or by subsidiaries whose shares are held under section 3 or under one of the other subsections of this section, and except for functions authorized under subsection (f) of this section, a bank holding company and its subsidiaries may perform no functions other than those set forth in the following numbered paragraphs of this subsection. The enumeration of these functions does not enlarge the powers which any bank holding company or subsidiary would otherwise possess under the laws under which it is organized, incorporated, or created, and their exercise is subject to such restrictions and requirements as the Board may by regulation or order prescribe to prevent undue concentrations of resources, decreased competition, conflicts of interest, or unsound banking practices.

"(1) Acting as principal or as agent to make, buy, sell, endorse, or otherwise deal with secured and unsecured personal and business loans, including mortgage loans.

"(2) Leasing property under any arrangement whereby the lessee is

"(A) obligated to pay over the term of the lease an amount equal to the entire cost of the property plus a finance charge, and

"(B) entitled to ownership of the property at the end of the term of the lease either for a nominal consideration or for no consideration.

"(3) Acting as investment adviser, subject to the prohibitions of subsection (g).

"(4) Performing bookkeeping and other data-processing services utilizing equipment acquired primarily for the purpose of servicing the bank holding company or its subsidiaries, but nothing in this Act authorizes the performance of auditing or other professional functions in the field of accounting.

"(5) Extending and collecting business and personal credit originated through the use of credit cards or other lawful means of identification or control of accounts.

"(6) Acting as trustee, executor, administrator, guardian, or in other personal fiduciary capacities.

"(7) Acting as trustee, registrar, transfer agent, paying agent, or in other business and corporate fiduciary capacities.

"(8) Providing, either as principal or as agent, insurance which

"(A) insures the life of a debtor pursuant to or in connection with a specific credit transaction, or

"(B) provides indemnity for payments becoming due on a specific loan or other credit transaction while the debtor is disabled.

"(9) Making equity investment in community rehabilitation and development corporations organized and operating principally for one or more of the following purposes:

"(A) providing better housing and employment opportunities for persons of low and moderate income.

"(B) assisting persons of low and moderate income to acquire and develop business enterprises.

"(C) participating in urban renewal projects.

"(f)(1) A bank holding company or its subsidiary may carry on any activity of a financial or fiduciary nature if the Board finds, on the record after opportunity for hearing, that the carrying on of the activity in question by the applicant (in the case of an order authorizing the activity on the part of a particular company) or by bank holding companies or their subsidiaries generally (in the case of a regulation authorizing the activity on the part of all companies similarly situated), under the limitations and conditions set forth in the order or regulation,

"(A) would not result in a violation of the antitrust laws;

"(B) is closely related to the business of banking or of managing or controlling banks; and

"(C) is in the public interest when carried on by a bank holding company or its subsidiaries.

"(2) In the event of the failure of the Board to act on any application for an order under this subsection within the ninety-one day period which begins on the date of submission to the Board of the complete record on that application, the application shall be deemed to have been granted.

"(3) Whenever the Board finds that the conduct of any given activity by a bank holding company or subsidiary would be in the public interest but cannot be authorized under the terms of this Act, the Board shall forthwith transmit its finding to the Congress, together with such recommendations for legislative action as it deems appropriate to the circumstances.

"(g)(1) Except as provided in paragraph (2) of this subsection, for the purpose of any provision of Federal law the following activities are neither necessary, incidental, nor related to carrying on the business of banking or of managing or controlling banks, and are not in the public interest to be carried on by banks or bank holding companies or subsidiaries thereof:

"(A) Engaging in the issue, flotation, underwriting, public sale, or distribution, at wholesale or retail, or through syndicate participation, of stocks, bonds, or other similar securities, or of interests in any such securities, whether or not any such interests are redeemable and whether or not the securities to which any such interests relate are in a fund or account or are subject to discretionary sale or purchase.

"(B) Acting as an investment manager or investment adviser of or for any person engaged in any activity described in subparagraph (A) of this paragraph.

"(2) The prohibitions of paragraph (1) of this subsection do not apply to

"(A) the issuance by any bank of certificates of deposit, passbooks, acceptances, checks, or other evidences of banking liabilities.

"(B) the issuance by any bank holding company or subsidiary thereof of stock, bonds, notes, or other evidences of capital loaned to or invested in the company or subsidiary itself and not in any fund or account for reinvestment.

"(C) dealing in and underwriting securities which are by the terms of paragraph 'Seventh' of section 5136 of the Revised Statutes exempted from the limitations and restrictions contained in that paragraph as to dealing in and underwriting investment securities.

"(h) Under such conditions as the Board may by regulation prescribe to prevent abuse of the administrative process, application to the Board for modification of any order issued under subsection (e) or (f) of this section may be made by any person who

would be a proper party to a proceeding, at the time of the application, to issue the order in question de novo.

"(i) Any person may sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by reason of the performance by a bank holding company or subsidiary thereof of any activity not permitted under this section, or performed under an order or regulation of the Board beyond the scope of the Board's authority, under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings. Upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue."

(q) Section 5(b) is amended by adding at the end thereof the following new sentence: "In any proceeding for the issuance of a regulation or order under section 4, the Board shall invite the views of the Attorney General as to the competitive factors involved, and the views of the Comptroller of the Currency and the Federal Deposit Insurance Corporation as to all factors specifically made relevant in section 4 to the proceeding in question."

(r) Section 11 is repealed.

§ 2. Amendments to Federal Deposit Insurance Act

(a) In this section, section references are to the Federal Deposit Insurance Act unless otherwise specified. So much of section 18 (c)(1) (12 U.S.C. 1828(c)(1)) as precedes subparagraph (A) thereof is amended to read:

"(c)(1) Except with the prior written approval of the responsible agency, which shall be the Board of Governors of the Federal Reserve System in the case of any insured bank which is a bank holding company or a subsidiary of a bank holding company, and which shall be the Corporation in the case of any other insured bank, an insured bank may not".

(b) Section 18(c)(2) is amended by inserting "shall be the Board of Governors of the Federal Reserve System if the acquiring, assuming, or resulting bank is a bank holding company or a subsidiary of a bank holding company and otherwise" immediately after "the responsible agency, which".

(c) Section 18(i)(1) is amended to read:

"(i)(1) An insured State nonmember bank may not reduce the amount or retire any part of its common or preferred capital stock, or retire any part of its capital notes or debentures, without the prior consent of

"(A) the Board of Governors of the Federal Reserve System if it is a bank holding company or a subsidiary of a bank holding company.

"(B) the Controller of the Currency if it is a District bank not described in subparagraph (A).

"(C) the Corporation if it is not a bank described in subparagraph (A) or (B)."

(d) Section 18(i)(2) is amended (1) by changing "No" to read "An", (2) by changing "shall" to read "may not", and (3) by inserting "without prior written consent of the Board of Governors of the Federal Reserve System if it is a bank holding company or a subsidiary of a bank holding company, and otherwise" immediately after "approving such conversion,".

(e) Section 3 (12 U.S.C. 1813) is amended by adding the following new subsection at the end:

"(r) The term 'bank holding company', and the term 'subsidiary' with reference to a subsidiary of a bank holding company, have the same meanings as in the Bank Holding Company Act of 1956."

(f) Sections 21 and 22 (12 U.S.C. 1830, 1831) are redesignated as sections 24 and 25, and the following new sections are inserted immediately after section 20:

"SEC. 21. (a) Any insured bank which holds any securities in a fiduciary capacity at the end of any calendar quarter shall, not later than thirty days thereafter, file a statement with the Securities and Exchange Commission setting forth the descriptions and amounts of the securities so held.

"(b) Statements filed pursuant to this section need not disclose the number of beneficiaries for which the bank is acting, or any information about the fiduciary relationships or the beneficiaries thereof, but shall otherwise be in conformity with such regulations as the Securities and Exchange Commission may prescribe.

"(c) For the purposes of this section, the term 'securities' has the same meaning as in the Securities Act of 1933.

"SEC. 22. (a)(1) The prohibitions of this subsection apply to any transaction—

"(A) whose effect may be to substantially lessen competition or tend to create a monopoly in any type of credit or property transactions or in any type of services, and

"(B) which is engaged in by an insured bank, a bank holding company, or any subsidiary of a bank holding company, all of which are referred to hereinafter in this subsection as institutions.

"(2) An institution to whose transactions the prohibitions of this subsection apply may not in any manner extend credit, lease or sell property of any kind, or furnish any service, or fix or vary the consideration for any of the foregoing, on the condition, agreement, or understanding

"(A) that the customer shall obtain some other credit, property, or service from the institution itself or, if the institution is a bank holding company or subsidiary of a bank holding company, from either that company or any subsidiary of that company; or

"(B) that the customer shall not obtain credit, property, or services from a competitor of the institution itself or, if the institution is a bank holding company or a subsidiary of a bank holding company, from a competitor of either that company or any subsidiary of that company.

"(b) The district courts of the United States have jurisdiction to prevent and restrain violations of subsection (a) of this section. It is the duty of the United States attorneys, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. The proceedings may be by way of a petition setting forth the case and praying that the violation be enjoined or otherwise prohibited. When the parties complained of have been duly notified of the petition, the court shall proceed, as soon as may be, to the hearing and determination of the case. While the petition is pending, and before final decree, the court may at any time make such temporary restraining order or prohibition as it deems just in the premises. Whenever it appears to the court that the ends of justice require that other parties be brought before it, the court may cause them to be summoned whether they reside in the district in which the court is held or not, and subpenas to that end may be served in any district by the marshal thereof.

"(c) In any action, civil or criminal, brought by or on behalf of the United States under subsection (a) of this section, subpenas for witnesses may run into any district, but in civil actions no writ of subpena may issue for witnesses living out of the district in which the court is held at a greater distance than one hundred miles from the place of holding the same without the permission of the trial court being first had upon proper application and cause shown.

"(d) Any person who is injured in his business or property by reason of anything forbidden in subsection (a) of this section may sue therefor in any district court of the United States in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

"(e) Any person, firm, corporation, or association may sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of subsection (a) of this section, under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings. Upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue."

(g) The following section is inserted immediately before section 24:

"SEC. 23. (a) Except as provided in subsection (b) of this section, a person who is a director, trustee, officer, or employee of an insured bank may not at the same time be a director, officer, or employee of

"(1) any other insured bank.

"(2) any other company which is a bank holding company or a subsidiary of a bank holding company.

"(3) any insured institution as defined in section 401 of the National Housing Act.

"(4) any insurance company.

"(5) any broker or dealer registered under the Securities Exchange Act of 1934, or be a proprietor or general partner of any such broker or dealer.

"(b) Subsection (a) of this section does not prohibit

"(1) the holding by any individual of any number of positions as director, trustee, officer, or employee of any number of companies within any given group of companies if one of the companies in the group is a bank holding company and all of the rest of them are subsidiaries of that holding company.

"(2) service by any individual in any office or position with any life insurance or annuity company organized and operated without profit to any private shareholder or individual exclusively for the purpose of issuing insurance or annuity contracts to or for the benefit of individuals engaged in the service of educational institutions.

"(3) service by any individual who is a director, trustee, officer, or employee of a thrift institution in any office or position in

"(A) any insurance company the capital stock of which may not by law be owned by any person other than a thrift institution.

"(B) any corporation or association without capital stock organized before September 1, 1957, and operated for mutual purposes and without profit for the purpose of providing reserve funds for, and insurance of shares or deposits in, thrift institutions.

"(C) any corporation or association organized before September 1, 1957, and operated for mutual purposes and without profit for the purpose of providing reserve funds for thrift institutions, but only if 85 percent or more of its income is attributable to providing such reserve funds and to investments.

"(D) any State chartered bank or trust company which is wholly owned by thrift institutions and which restricts itself to the acceptance of deposits from thrift institutions, deposits arising out of the corporate business of those institutions, and deposits of public moneys."

§ 3. Amendment to National Housing Act

Title IV of the National Housing Act is amended by adding at the end thereof the following new section:

"SEC. 411. (a) Except as provided in subsection (b) of this section, a person who is a director, trustee, officer, or employee of

an insured institution may not at the same time be a director, officer, or employee of

"(1) any other insured institution.

"(2) any other company which is a savings and loan holding company or a subsidiary of a savings and loan holding company.

"(3) any insured bank as defined in section 3 of the Federal Deposit Insurance Act.

"(4) any insurance company except an insurance company the capital stock of which by law may not be owned by any person other than a mutual savings bank.

"(5) any broker or dealer registered under the Securities Exchange Act of 1934 or be a principal or a general partner of any such broker or dealer.

"(b) Subsection (a) of this section does not prohibit

"(1) the holding by any individual of any number of positions as director, trustee, officer, or employee of any number of companies within any given group of companies if one of the companies in the group is a savings and loan holding company as defined in section 408 of this title and all the rest of them are subsidiaries of that holding company.

"(2) service by any individual in any office or position with any life insurance or annuity company organized and operated without profit to any private shareholder or individual exclusively for the purpose of issuing insurance or annuity contracts to or for the benefit of individuals engaged in the service of educational institutions.

"(3) service by any individual who is a director, trustee, officer, or employee of a thrift institution in any office or position in

"(A) any insurance company the capital stock of which may not by law be owned by any person other than a thrift institution.

"(B) any corporation or association without capital stock organized before September 1, 1957, and operated for mutual purposes and without profit for the purpose of providing reserve funds for, and insurance of shares or deposits in, thrift institutions.

"(C) any corporation or association organized before September 1, 1957, and operated for mutual purposes and without profit for the purpose of providing reserve funds for thrift institutions, but only if 85 percent or more of its income is attributable to providing such reserve funds and to investments.

"(D) any State chartered bank or trust company which is wholly owned by thrift institutions and which restricts itself to the acceptance of deposits from thrift institutions, deposits arising out of the corporate business of those institutions, and deposits of public moneys."

§ 4. Mutual savings banks

(a) Except as provided in subsection (b) of this section, a person who is a trustee, director, officer, or employee of a mutual savings bank other than an insured bank may not at the same time be a director, trustee, officer, or employee of

(1) any other mutual savings bank which is not an insured bank.

(2) any insured bank as defined in section 3 of the Federal Deposit Insurance Act.

(3) any insured institution as defined in section 401 of the National Housing Act.

(4) any company which is a bank holding company as defined in the Bank Holding Company Act of 1956 or a savings and loan holding company as defined in section 408 of the National Housing Act.

(5) any insurance company except an insurance company the capital stock of which by law may not be owned by any person other than a mutual savings bank.

(6) any broker or dealer registered under the Securities Exchange Act of 1934, or be a principal or a general partner of any such broker or dealer.

(b) Subsection (a) of this section does not prohibit

(1) the holding by any individual of any number of positions as director, trustee, officer, or employee of any number of companies within any given group of companies if one of the companies in the group is either a bank holding company as defined in the Bank Holding Company Act or a savings and loan holding company as defined in section 408 of the National Housing Act and all the rest of them are subsidiaries of that holding company.

(2) service by any individual in any office or position with any life insurance or annuity company organized and operated without profit to any private shareholder or individual exclusively for the purpose of issuing insurance or annuity contracts to or for the benefit of individuals engaged in the service of educational institutions.

(3) service by any individual who is a director, trustee, officer, or employee of a thrift institution in any office or position in

(A) any insurance company the capital stock of which may not by law be owned by any person other than a thrift institution.

(B) any corporation or association without capital stock organized before September 1, 1957, and operated for mutual purposes and without profit for the purpose of providing reserve funds for, and insurance of shares or deposits in, thrift institutions.

(C) any corporation or association organized before September 1, 1957, and operated for mutual purposes and without profit for the purpose of providing reserve funds for thrift institutions, but only if 85 percent or more of its income is attributable to providing such reserve funds and to investments.

(D) any State chartered bank or trust company which is wholly owned by thrift institutions and which restricts itself to the acceptance of deposits from thrift institutions, deposits arising out of the corporate business of those institutions, and deposits of public moneys.

§ 5. Effective dates

(a) Except as otherwise specified in this section, the provisions of this Act become effective upon enactment.

(b) Section 4 and the amendments made by sections 2(g) and 3 become effective on the first day of the third calendar year which begins after the date of enactment.

AMERICAN GI'S CALL TROOP WITHDRAWAL A HOAX

(Mr. PUCINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PUCINSKI. Mr. Speaker, I was very disturbed to read an Associated Press dispatch from Dong Tam, South Vietnam, which said that the first American infantry battalion scheduled to be withdrawn from Vietnam is going home in name only and the men are angry and bitter.

The AP quoted one first lieutenant as saying they are kidding the public, telling folks the 3d Battalion is going home when in fact only the colors and standards are going home.

Under President Nixon's withdrawal order, the 3d Battalion, 60th Infantry, of the U.S. 9th Infantry Division is scheduled to fly to the United States July 8 for demobilization. But it will actually be a composite battalion of 900 men.

The Associated Press states that men with a few months to serve in Vietnam will be transferred to other units. Their places on the trip home will be filled by soldiers from other battalions who have completed or almost completed their 12-month tours.

The Associated Press quotes one soldier as saying:

We don't feel good about people going home with our patches on their uniforms.

Many of the men have already received letters from home and are angry that their families will be disappointed.

Mr. Speaker, this AP dispatch confirms what I said in Chicago last Sunday that widespread talk of troop withdrawals from Vietnam could be a cruel hoax on the American people because it obscures the fact that more than 548,000 American troops will be sent to Vietnam this year and that the 25,000 troops ordered withdrawn by President Nixon is only half of the additional 50,000 troops that were sent to Vietnam in 1968.

I said that the current debate between President Nixon and Senate leaders over long-range plans for an American troop pullout offers no comfort to the families of the 326,000 American boys who will be sent to Vietnam during the remainder of 1969, nor to the families of the 222,000 soldiers who have already been sent to Vietnam thus far this year.

Most Americans are not aware that under our rotation policy, the Pentagon must this year replace more than 548,000 American soldiers sent to Vietnam during 1968.

I am going to place in this RECORD at the conclusion of my remarks the table on rotation for this year and I do this to show how misleading are these very detailed reports about troop withdrawals.

It is quite obvious to me that talk about troop withdrawal only prolongs the war in Vietnam and obscures the fact that the United States will continue to suffer huge losses if a cease-fire or some other meaningful forward movement is not agreed to at the peace talks in Paris.

This huge shipment of American boys to Vietnam during 1969 really fortifies my demand that the administration give the Communists until noon, August 1 of this year to agree to a complete halt in hostilities.

If such a halt in this needless slaughter is not effectuated by noon, August 1, 1969, I believe the United States should serve notice on North Vietnam that we will resume the bombing and that we will take whatever other military steps are necessary to bring this war to a military conclusion.

The figures which I am placing in the RECORD today were compiled for me by the Defense Department and so far as I know we see here for the first time the replacement requirements of troops going to combat in Vietnam.

I am not all persuaded by the argument that other troops come home and this is merely a replacement for the boys coming home from Vietnam.

I have been told by responsible spokesmen in the highest places of our Government that a study now exists that shows some 200,000 American troops could be withdrawn from combat duty immediately and not be replaced if the United States resumed bombing Communist military supply routes in the North.

The bombing halt a year ago released 400,000 North Vietnam troops from home

guard duty. Of these, we know that 100,000 are now fighting our American troops in South Vietnam; another 100,000 have taken over the demilitarized zone and are now waging aggression and artillery attacks on American installations near the DMZ. Forty to fifty thousand North Vietnamese troops are stationed in the north end of Laos and the rest are in North Vietnam's major cities intensifying defenses in anticipation of a renewal of bombing of North Vietnam.

Those who argue against bombing of North Vietnam apparently are oblivious of the fact that Prince Souvanna Phouma, Prime Minister of Laos, recently persuaded the United States not to halt its bombing of North Vietnamese troops in north Laos.

Prince Phouma quite properly stated that a halt in American bombing of north Laos would give Hanoi's four Communist divisions in Laos a military advantage.

It is incredible to me that American bombers can continue to bomb Communist supply lines in Laos but are not permitted to bomb similar lines in North Vietnam which provide ammunition for use against American soldiers.

There are those who continue to naively argue that the bombing pause is causing some sort of morale problem in North Vietnam because since the destruction ended the North Vietnamese are very difficult to discipline. This is about the silliest argument I have ever heard and I am grateful for dispatches from the Washington Star foreign service which clearly indicate that the bombing halt is proving advantageous to North Vietnam.

Our own soldiers in South Vietnam reflect the disgust with the bombing pause. Time magazine on June 20 quoted an Army specialist fourth class who said: "I think our biggest mistake was stopping the bombing of the North."

Mr. Speaker, I am sure that every American wants to end this war as quickly as possible. But the fruitless negotiations in Paris, with no end in sight to hostilities, forces us to conclude that on the basis of present American losses, the number of American soldiers killed in action since the bombing pause started will soon exceed our total losses since we first became involved in Vietnam in 1961.

I am herewith placing in the RECORD the monthly replacement necessary to maintain the present operational levels in Vietnam. Let there be no mistake. Those who talk about withdrawal of troops obscure the reality of the following replacement timetable as prepared by the Department of Defense.

The table follows:

For 1969	
January	51,900
February	48,400
March	42,000
April	41,000
May	39,300
June	43,600
July	49,400
August	41,300
September	82,100
October	48,300
November	39,900
December	46,700
Total	573,900
Less	25,000
Total	548,900

EQUITABLE TAX REFORM SHOULD MAKE UNNECESSARY ANY EXTENSION OF THE SURTAX

(Mr. FEIGHAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. FEIGHAN. Mr. Speaker, it is incumbent upon Members of Congress to provide an equitable tax system for all Americans. Former Secretary of the Treasury, Joseph W. Barr, discussed the possibility of a "taxpayer revolt if we do not soon make some major reforms in our income tax." The possibility of such a revolt is not remote when we consider the causes of this malcontent. The 1967 Internal Revenue statistics were astounding in their revelation that 155 Americans with earnings over $200,000 paid no taxes and even more deplorable, 21 of these individuals earned more than $1,000,000 and escaped without returning any money to Washington. Certainly, such loopholes in our tax system are unfair.

The tax loopholes force good, decent, hard-working people to bear a larger burden of taxation than is necessary. The Federal tax problem is also compounded by a tremendous volume of State and local taxes which all citizens must pay. There is no question of the undue hardship imposed on many middle-class families by the Federal tax bite and the economic blow is equally severe on the poor.

In addition to plugging loopholes, there are other changes needed to provide equity in our tax program. Primary consideration should be given to an increase in the personal tax exemption. The high cost of living and inflation has worked an extreme disadvantage on millions of average families. The Cleveland Press, one of Ohio's outstanding papers, earlier this year listed 20 sources of taxation for most Americans and disclosed that a man with a wife and two children earning $7,500 a year will pay $2,077.05 in taxes. With such a tax bite, the average man would have to work from January 1 until April 11 to pay all his taxes. These people need relief and they deserve it. They are interested in increasing individual tax exemptions, and I am trying to help them through my bill to raise exemption to $1,200.

With the present level of inflation and the spiraling cost of living, $600 is no longer a realistic exemption. No one can support any member of his family for this amount. In 1948, when the Congress raised the personal tax exemption from $500 to $600, the House Ways and Means Committee stated:

> There is no evidence that income, after taxes, although it has increased very considerably during the past two years, has not kept pace with the cost of living. This increase in the cost of living is the reason your Committee's bill provides a $100 per capita increase in exemptions from $500 to $600.

I think the same rationale can be used this year to enact an increase in the present $600 exemption.

Undoubtedly, every Member has received many letters protesting the extension of the 10-percent surtax. In addition to such letters, I have been presented with petitions signed by more than 24,000 persons urging an end to the surtax and an increase in the personal exemption. Signatures on these petitions were obtained by volunteer workers, going from house to house, without any remuneration. The circulators and signers are hardworking, sincere people who feel that the present taxes are extremely burdensome. The drive to collect these signatures was spearheaded by two energetic, efficient women, Mrs. Margaret Kulak and Mrs. Mary O'Malley, who labored tirelessly to organize this campaign.

It is my firm belief that, if adequate steps are taken to eliminate the inequities in our tax laws, there would be no need for a surtax extension after June 30. The surtax should be permitted to lapse. If the necessary steps are taken to provide the required revenues anticipated from the surtax by wiping off the books the outrageous benefits which have long sheltered the wealthy, there would be no need to extend the surtax beyond the June expiration date. An unfair additional tax, the surtax only compounds the problem by adding to the burdensome tax already shouldered by those who can ill afford it. A surtax cannot be assessed on those who have avoided paying any taxes.

Secretary of the Treasury David M. Kennedy and the Honorable Paul W. McCracken, Chairman of the President's Council of Economic Advisors, recently testified before the House Ways and Means Committee that a December 31, 1969, termination of the 10-percent surtax and a subsequent reduction of the surtax to 5 percent until June 30, 1970, would provide the administration with a $6.3 billion dollar surplus. I believe that we should have a comprehensive tax reform package presented to us before reenacting any surtax in order that we could more accurately assess the need for Federal income. The fact that the vote on the surtax has been postponed until July 7 does not alter my view on the need for tax reforms, reforms which are critically needed to increase Government revenues and eliminate rampant injustice in our tax system. It is my firm conviction that tax reform is desperately needed to avoid erosion of the fundamental public respect for the tax law. This respect is the very foundation of the tax system and its successful administration.

MOSS COMMENDS AGENCY HEAD FOR ORDER AGAINST OVERCLASSIFICATION

(Mr. MOSS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MOSS. Mr. Speaker, for many years now, I have fought a continuing battle against the overclassification of documents, files and records by Federal agencies. I have long felt that the American people were not getting all the information they need to understand and properly evaluate the decisions being made by our civilian and military leaders. Such information is absolutely essential to the success of our form of government.

Therefore, I find it refreshing indeed

to read an order recently issued by Dr. John A. Hannah, the new Administrator of the Agency for International Development. Dr. Hannah states categorically that the overclassification of documents hampers freedom of information. He has instructed AID employees to take a hard look at all documents to make certain they are not overclassified. I commend him for this action and I hope other agencies will follow suit.

The text of his order, which was issued on June 13, follows:

DEPARTMENT OF STATE, AGENCY FOR INTERNATIONAL DEVELOPMENT,
Washington, D.C.

To all AID employees:

Since assuming the duties of Administrator of A.I.D., I have observed indications of what appears to me to be overclassification of documents which have been generated by Agency officials in Washington, D.C., and overseas.

Overclassification hampers freedom of information, weakens the classification structure, overburdens storage facilities, delays the handling of documents, and may even defeat the purpose for which the documents were intended. Classified information should not be included in an otherwise unclassified document unless needed for substance and clarity. A common error which seems to be a principal factor in overclassification is the practice of assigning a classification to limt distribution. This is neither desirable nor effectve but most assuredly can be counterproductive. I strongly urge each official, in preparing an Agency paper, to take a hard look to determine whether, in fact, the document requires a classification and, if so, assure that the lowest proper classification is assigned to the material.

As you are aware, classified information does not have to remain classified. When material is assigned a classification it should also be assigned a group marking to effect its automatic downgrading or declassification when the material no longer requires its original degree of protection. I request, therefore, that each office keep its classified information under continuing survey, and downgrade or declassify such information, whenever possible, consistent with security regulations set forth in 5 FAM 900 (Manual Order 631.1).

JOHN A. HANNAH.

THE ATLANTIS PROJECT

(Mr. ROBERTS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ROBERTS. Mr. Speaker, now that man is well on the way to conquering space, the next area of operation is the sea.

The world's marine systems are concerned almost exclusively with operations on or near the surface of the sea. The world's navies operate to control the surface of the sea. Submarine warfare is directed toward surface craft, other submarines and land targets. Military submarines are restricted to depths not significantly greater than the continental shelves.

Our Navy has been concerned with the development of a deep water rescue and research vehicle. One of these vehicles was able to photograph the remains of the submarine *Scorpion*.

The Atlantis program, which has been conducted exclusively by industry in cooperation with the University of Miami, has done a tremendous amount of research on an undersea facility. Initially, Atlantis will be an undersea site for basic research, experimentation, development of design criteria, and evaluation of equipment designs. Atlantis is directed toward developing the technologies required for operations at great depths.

This program has a significant national defense potential, and I urge the Department of Defense and the Congress to fully examine the possibilities offered by the Atlantis program as an offensive and defensive weapon, as well as an opportunity to learn the mysteries of deep-sea submergence.

A summary of the Atlantis project follows:

THE ATLANTIS PROJECT—A NATIONAL OCEAN RESEARCH AND DEVELOPMENT PROGRAM

THE WORLD OCEAN

The ocean, which covers more than 70% of the earth's surface, is commonly owned by all the sovereign nations of the world. Individual persons do not own any part of this area.

The strategic and tactical importance of the sea has been demonstrated consistently since the days of the Greek and Persian wars.

During the 16th and 19th centuries the use of the sea resulted in the spread of Western culture and civilization to much of the world, and formed the basis for much of the international political-legal system that exists in the world today.

During the middle of the 19th century the discovery of offshore oil deposits stimulated national interest in the sea bed and subsoil of the continental shelf. The Truman Proclamation during 1945 claimed an area about three times the size of Texas, and the substance of the Truman Proclamation was incorporated into the Conventions at the U.N. Conference on Law of the Sea at Geneva during 1958.

TECHNOLOGY AND LAW OF THE SEA

Technology is rapidly developing which will allow mankind to occupy and control the bottom of the ocean in the same manner that he already enjoys on the surface of the land.

It is appropriate today to consider what this ability to occupy the ocean will mean, and to consider the extensions of present laws which hopefully will reduce conflicts. Political issues resulting from attempts to extend national sovereignty in the ocean require analysis as to who will lose and who will gain by such an extension. It is necessary to consider alternate situations and to devise systems which will work under these conditions.

The ability to identify available technological options will help to develop a capability to choose the optimum path, rather than to allow circumstances to dictate the choices.

The existing law of the sea was developed primarily for military, navigational, and fishing purposes—and deals with the surface of the sea and not what is beneath it. Existing and future technology will promote military uses of the sea, and will be in advance of many commercial applications. The same technology will be used for commercial purposes unless there is an economic restriction against its use.

Within the next ten years strategic and tactical locations may be established by nations within the ocean, and there may be a tendency to deny access to the ocean around these installations.

The Conventions on the High Seas and the Convention on the Continental Shelf were instances of timely extensions and resolutions on the effect of new technology. Since their enactment in 1958, there have been great strides made in underwater technology, and it is essential that the legal aspects of the problems be examined in order to develop reasonable approaches to the use of the balance of the seas before incompatible national problems arise.

TECHNOLOGY AND NATIONAL POLICY

Within the next decade considerable effort must be expanded to assess the military significance and economic importance of the continental shelf and the deep ocean. We will need to develop vehicles and installations which can give us the capability to prohibit any power unfriendly to us from controlling strategic and tactical locations in the ocean.

The technology of the sea will evolve from the technology normally associated with naval architecture and marine enginering, and in addition it will employ technologies of the type developed for space, for medicine, and for many of our defense programs.

The development of ocean capabilities may significantly alter the balance of national capabilities in the world. The United States is in a unique position because of our extensive aerospace industry, defense industry, advanced capabilities in medicine, and the offshore oil industry. The spectrum of technology, if properly employed, will insure that this nation has the capability to explore and develop the resources of the ocean for the benefits of mankind.

A NATIONAL OCEAN TEST FACILITY REQUIREMENT

In "Effective Use of the Sea", a report of the Panel on Oceanography, of the President's Science Advisory Committee, June 1968, a recommendation was made that a responsible program be initiated for the development of undersea technology and provision for national ocean test facilities.

In the Report of the President to Congress on Marine Resources and Engineering Development, "Marine Science and Activities—A Year of Plans and Progress, March 1968", it was stated that an objective should be to accelerate the development of resources of the marine environment, extend human knowledge of the marine environment, encourage private investment enterprises in exploration, technological development, marine commerce, and economic use of the resources of the marine environment. The Report recommended that these activities be accomplished with close cooperation among all interested agencies, public and private. Special emphasis should be placed upon "Intensifying work in Deep Ocean Technology—to provide a reservoir of advanced engineering knowledge upon which the Navy can draw to meet requirements of future military systems. The same reservoir of technology may contribute to industrial engineering activity and development of deep sea resources."

The Report goes on to say, "The universities and private research laboratories are key sources of basic knowledge and manpower needed by our participants. The full development of this nation's ocean enterprise involves comparative activity by industry, regional authorities, state and local governments, and the academic community."

The Ocean Engineering Program of the U.S. Navy, published by the Oceanographer of the Navy during September 1967, says that the Navy has accepted the responsibility to help develop the undersea technology needed for effective use of the sea in the military, economic, social and political sense. "This must be a cooperative venture—a science—industry—Navy team." The Report goes on to say, "The focal project established for the deep ocean technology program is an experimental man-in-the-sea floor base. The technology developed to establish a manner one-atmosphere sea floor laboratory will provide options for improving man's use of the seashore by projecting commercial marine facilities seaward from urban areas." The Report concludes, "The spin-off value of the national

oceanographic program of development . . . comes about through the interaction of scientists and engineers acting in the government—industry—academic milieu."

NATIONAL OCEAN GOALS AND OBJECTIVES

The Report of the Commission of Marine Science, Engineering and Resources, "Our Nation and the Sea," published in January 1969, indicates that the nation can achieve the capability to operate at the 2,000 foot depth within a relatively short time if basic research and development are accelerated. The Commission recommended that the United States fully utilize the continental shelf and slope to the 2,000 foot depth and establish as a goal the capability to explore the ocean to depths of 20,000 feet by 1980. The Commission also recommended a Continental Shelf Laboratories National Project, "to provide a national capability for research, development, and operations on the continental shelf. The National Project should be jointly planned and operated in consultation with industry and the scientific community."

ATLANTIS PROGRAM OBJECTIVES

The Atlantis Program is a joint University, industry, regional approach to design, fabricate, emplace, and operate this continental shelf test and evaluation facility.

Initially, Atlantis will be an undersea test and evaluation site for basic research, experimentation, development of design criteria, evalution of equipment designs, and for proving underwater operating procedures. Its evolution to become an operating center for larger and more complex installation is anticipated. It will provide an operating capability at continental shelf depths approaching the known limits for effective work of men in the sea. Developments will be directed toward eventual operations at greater depths wherein man-in-the-sea operations are supplemented by work performed by submersibles and remote operating equipment.

Atlantis is the prototype program for deploying a system of undersea stations, which in conjunction with other national defense systems, could provide the ability to control the sea down to extreme depths. Industrially, it is a research and development program for ocean resources development. Educationally, it will provide an experimental program, a laboratory and field training sites for the aggressive extension of the knowledge of the sea.

NATIONAL SECURITY REQUIREMENTS

The world's marine systems are concerned almost exclusively with operations on or near the surface of the sea. The world's navies operate to control the surface of the sea. Submarine warfare is directed against surface craft, other submarines, and land targets. Military submarines can dive to depths not significantly greater than those of the continental shelves.

The Navy is concerned with the development of an operating capability for accomplishing any mission which might require the exploration of the continental shelf. It is logical to extend this capability first from continental shelf depths of less than 1,000 feet to the 6,000 foot depth of selected ridges and sea mounts, next to the 12,000 foot depths of the ocean floor, and finally to the abyssal plains and trenches of the deepest ocean waters.

A significant national defense potential is the development of a prototype station of a system of anti-submarine warfare (ASW) stations deployed along the Mid-Atlantic Ridge and selected sea mounts in the Pacific Ocean. As ASW command and control centers, these stations could extend our anti-submarine defenses to a distance from our shores where submarine-launched missiles become an air defense problem.

The Atlantis program will provide for the development of improved ocean systems, including offensive and defensive weapons, identification and tracking of surface and undersea craft, secure underwater logistics systems, and some initial approaches to deep submergence weapons and vehicles.

INDUSTRIAL REQUIREMENTS

A continental shelf test and evaluation facility is required by industry to develop equipment and techniques for more efficient drilling, mining, fishing, mineral extraction, construction and salvage operations. The facility will support industry efforts by the development of undersea industrial complexes and operations.

Undersea construction is fundamental to any industrial activity in the ocean. Engineers will require the same type of knowledge relating to undersea construction as presently exists for land construction. Undersea construction will require the development of methods for determining soil compactibility, stability and erosion of large areas under the sea. Site survey techniques must be developed for more precise measurement and more effective presentation of data.

Offshore petroleum activities will include the completion of wells on the bottom and the development of high density petroleum complexes associated with the storage and transport of petroleum products.

EDUCATION AND RESEARCH

Education and research will include physical oceanography, geology, biology, and undersea training. As an educational and training activity, the Atlantis Program will provide an opportunity for faculty and student participation in basic and applied research projects, as well as a training facility for underwater laboratory management and operations. The laboratory will provide an opportunity for scientists and engineers to operate for long periods in a submerged station where marine life and its effect can be observed and measured in its environment for extended periods of time.

ATLANTIS PROGRAM DEVELOPMENT

The Atlantis Program objectives, systems advantages, and a systems description was developed by the Department of Ocean Engineering, Institute of Marine Sciences, University of Miami, and Chrysler Corporation's Space Systems Division. At the completion of Phase A in January 1968, a presentation was made to the office of the Oceanographer of the Navy, and Admiral O. D. Waters responded in a letter which said, "I consider you are undertaking a very worthwhile project with a tremendous potential value to industry, education, and the government. Your approach appears basically sound from the general information provided by your presentation, and you have already done a commendable job in achieving support and cooperation from industry, local government, and a multi-university effort."

Phase B, completed in December 1968, included analysis and optimization of several concepts and their sub-systems, preliminary design of the station, its installation, and the development of preliminary program definition.

A report and Atlantis Program Proposal was submitted in January 1969 as a result of this effort. The response from Vice Admiral J. D. Arnold, Vice Chief of Naval Material, said in part, "The potential value of your proposal is well recognized. Your University/industry team has already taken a major step towards providing the nation with a manned underwater laboratory; and this has gained special significance since the publication of the Report of the Commission on Marine Science, Engineering, and Resources, 11 January 1969, which established a National Project for a Continental Shelf Laboratory. With an input of cooperative Federal planning and operation, the Atlantis Program appears to meet all major requirements for becoming a National Continental Shelf Laboratory. In this regard, the Navy is forwarding the Atlantis Program Proposal to the Secretary of the Navy, suggesting that it be presented to the Marine Science Council as a possible candidate for the initial National Project for a Continental Shelf Laboratory, with separate funding as a national project."

Chrysler Corporation Space Systems Division led the industrial team responsible for the Phase B effort with over all responsibility for systems integration, main structure design, and configuration control.

Air Reduction Company, Inc. of Murray Hill, New Jersey, is responsible for the hyperbaric facility and related systems.

J. Ray McDermott, Inc. of New Orleans, La., is responsible for site preparation and installation and retrieval.

Minnesota Mining and Manufacturing Co. of St. Paul, Minn. is responsible for the main habitat manipulators and hydraulics.
